Certified Food Handler JACKIE CLEMONS	___Other (list)		

CRITICAL ITEMS ARE IDENTIFIED IN THE CHECKLIST AND NARRATIVE COLUMNS MARKED "C"
VIOLATION(S) REPEATED FROM PREVIOUS INSPECTIONS ARE DENOTED IN THE "SUMMARY OF VIOLATIONS" AND IN THE NARRAIVE COLUMN MARKED AS "R"

Section #	C	NC	R	Narrative	To Be Corrected
334	X			Observed a faucet equipped with an atmospheric vacuum breaker (AVB) feeding the chemical dispenser for the 3-compartment sink and the mop sink. The AVB is not designed for use in high health hazard applications (e.g. soaps, sprays, degreasers, chemicals, and similar contaminants), and shall not be used where subjected to continuous pressure on the backflow prevention device. Y-Valves, shut-off valves, devices or obstructions downstream (e.g. chemical dispenser, shut-off type spray nozzle, etc.) from faucet AVBs are not permitted, as this will result in continuous water pressure and failure of the backflow prevention device. A continuous presser vacuum breaker is required with these connections to prevent backflow chemical contamination of the water.	30 days
334	X			Observed the sanitizer discharge hose sitting on the bottom of the 3-compartment sink. Trim the line to provide an air gap.	Today
144		X		Observed unlabeled sauce cups in the walk in fridge.	Corrected
245		X		Observed wet/used sanitizer cloths not being stored in sanitizer solution.	Corrected
295		X		Observed debris under the shelves in the walk in cooler and freezer.	5 days
297		X		Observed hard water buildup in the dining area drink dispenser.	5 days
413		X		Observed a door gap at the base of the back door.	
430		X		Observed 2 lights out in the dining area.	10 days

If documentation that the proper back flow device is installed, a follow up will not be required. If a plumber or service provider cannot schedule an appointment with in the next 30 day, contact FCHD for an extension and provide proof that the appointment is scheduled.

Summary of Violations C 2 NC 6 R 0 8
