Section #	C	NC	R	Narrative	To Be Corrected
294	X			Observed quaternary ammonium sanitizer solution concentration too low. Corrected: Person in charge had the sanitizer drained and refilled. Observed the mop sink faucet had a line to a chemical dispenser with the faucets left on. The Atmospheric Vacuum breaker on the faucet is not designed for constant pressure. FCHD recommends installing a bleeder valve to the faucet or connecting the dispenser to an independent water line. The hoses may also be disconnected between uses in the meantime.	Corrected
