FOR IMMEDIATE RELEASE -- February 6, 2009 -- Mister Snacks, Inc. of Amherst, New York, is expanding its recall of specific snack items because the products have the potential to be contaminated with *Salmonella*. This action is a result of the Peanut Corp. of America **expanded** recall of January 28, 2009 for all peanut products manufactured in their Blakely, Georgia facility since January 1, 2007.

Salmonella is an organism, which can cause serious and sometimes fatal infections in young children, frail or elderly people, and others with weakened immune systems. Healthy persons infected with Salmonella often experience fever, diarrhea (which may be bloody), nausea, vomiting and abdominal pain. In rare circumstances, infection with *Salmonella* can result in the organism getting into the bloodstream and producing more severe illnesses such as arterial infections (i.e. infected aneurysms), endocarditis and arthritis. For more information on Salmonella, please visit the Centers for Disease Control and Prevention's Website at http://www.cdc.gov .
