### Describe the present and original (if known) physical appearance

#### EXTERIOR GENERAL:

The Washington Tower is a seventeen (17) story, masonry and steel structure located on Washington Street (National Road) just east of Meridian Street. Although the Tower has had several uses, the exterior of this Classical Beaux Arts "Skyscraper" has not been altered significantly (see photo I). The rectangular site is bounded to the east and north by Court and Scioto Streets.

The Washington Street facade (see photo II) of the structure is a three-bay tower with three distinct segments. The base (see photo III) is a three story limestone facade with a central main entry. Two commercial spaces are located on either side. The canopy is not original and the street level facade has been altered significantly. On the second level are large, "Chicago style" window openings, the two outer bays being slightly wider. The inscription "Hotel Washington" is flanked by two projecting flag standards. The window openings of the next level, three pairs of double-hung sash, are repeated upward, but on this level are framed with a decorated band of carved limestone that wraps around the east side. The fourth level has the stone lintels used on upper levels as well as "paired piers" of stone between the bays. From the fifth to the thirteenth level, the shaft has repetitive window openings and decorative treatment with the suggestion of piers between. The third segment (see photo IV) caps the tower with a three story Classical Pavilion that is more decorated than the lower segment. The fourteenth level has the window openings of the lower floors with the lintel and "piers" of the fourth level. Also, the outer windows are flanked by plaques that form the podium or base, along with string courses on the east and west sides, for the two story paired columns that rise to the projecting cornice. This design is repeated in one bay of both the east and west sides. The windows of the seventeenth level have arched openings. A circle-enclosed "W" is located on either side within each of the entablatures.

#### INTERIOR GENERAL:

The interior of the Washington Tower has been altered several times. Originally intended to be an office building, the structure was renamed the Hotel Washington and opened for business in December of 1912 with three hundred guest rooms. The Lobby level had walls of Rookwood tile and contained the Hotel Desk, a cigar stand, two elevators, the Hotel Buffet and the London Rain Coat Company. A Mezzanine level contained the Lounges, a Barber Shop with manicurist, public stenographers and telephones, and three connecting parlours. The third to the fifteenth level continued the guest suites of 1, 2, 3, 4, and 5 rooms and "sample" rooms with hide-away beds for salespersons. Each suite had its own bath. The sixteenth level had a large assembly hall for conventions, meetings, and dances. The basement level had the "Cafe George" that was decorated in "Dutch" style with Flemish furniture. One side was exclusively for men.

The structure was "fireproof", being constructed of steel, concrete and brick. A vacuum cleaning system and a ventilating system, promising an air change every five minutes, were featured. The Tower was opened as a First Class Hotel. Ownership changed in 1938 and new elevators and furnishings were installed. In 1939 the Bronze Room (35' leather bar) opened with a \$150,000 remodeling of the front desk, entrance facade (marble), and a majority of the rooms. A Coffee Shop was also added. In 1940, The Sapphire Room was put in the space formerly occupied by the Cafe George with white leather furniture, ivory and gold pillars,

"brilliant draperies and patterned carpets", and a mirrored ceiling with an eight foot circular sapphire illuminated by neon. The Tower was again remodeled in 1958 and finally was closed in 1963. In 1965, the structure was reopened as the Washington Tower Apartments. In 1980, the structure is being rehabilitated with office space being the intended use.

**Specific dates** 1912 **Builder/Architect** R. P. Daggett and Company

**Statement of Significance (in one paragraph)**

The Hotel Washington is significant as one of the early first-class hotels of Indianapolis and as a well-recognized landmark.

Hotel Washington competed for the patronage of visitors with such luxury hostelries as the Claypool, Hotel Lincoln, and Hotel Severin. Today, only the Washington and Severin (now Atkinson Hotel) remain. Until the construction of the modern-day Hyatt and Hilton hotels, the Washington was the tallest hotel structure in Indiana. A look from the top still commands a central view of downtown Indianapolis and Monument Circle. With its "sample rooms" equipped with hide-away beds, the Washington was a popular stop for salesmen. Notable guests included Ernie Ford, Nat King Cole, Xavier Cugat, Mary Martin, Vaughn Monroe, Dick Conino, Ray Charles, and Sebastian Cabot.

The building was constructed for J. Edward Krause, and was purchased and remodeled in 1938 by E. W. Benson. Benson died in 1963, and the Hotel Washington was closed on October 31, 1963. It was reopened in 1965 as an apartment building. Plans are now under way to reuse the Washington as an office building.
