

Next Level Programs of Study

Review Document

Revision Date: April 26, 2024

The purpose of the NLPS Review Document is to provide instructors, administrators, and other stakeholders the opportunity to view the 4-course sequence for each Next Level Program of Study in its entirety and find relevant information about all NLPS courses. Individuals can find course descriptions, the postsecondary courses at Ivy Tech and Vincennes that each NLPS course has been aligned to, and the key competencies for each postsecondary course.

- Postsecondary courses followed by an * are not available for dual credit.
- Vincennes University postsecondary courses followed by a ^ are only available for dual credit through an approved VU Early College program.

CTE funding information, assignment codes, dual credit availability and certification alignment are included where possible. It may still be necessary to use some of the additional resources provided by the CTE team, but the Review Document consolidates much of the pertinent course information into one resource.

Recent Updates (Winter/Spring 2024):

- Assignment Codes have been updated for several courses and added for new pathways. You can also find a breakout list of assignment codes for all courses [here](#).
- Competencies have been added or updated for Biomedical Innovations (5219), Introduction to Health Science Careers (5272), Tractor Trailer Operations (5622), Cooperative Education (6162), Principles of Agriculture (7117), Introduction to Public Safety & First Responders (7190), Technical Math (7218), Fundamentals of Human Services (7276), Community Health Worker (7278), Electronic Fundamentals (7361) and Digital Applications and Responsibility (4528).
- Updates to postsecondary alignment for various courses. This includes the alignment of Ivy Tech's AGRI 102 (Agricultural Business and Farm Management) to Principles of Agriculture (7117). A full summary of postsecondary alignment changes will be shared in May with the release of the 2024-2025 CTE Dual Credit Crosswalk.
- Cybersecurity and Information Assurance is now shown as its own program of study. This pathway was previously embedded as an option within the IT Operations program of study.

Next Level Programs of Study (NLPS) Overview

Indiana has fully launched **Next Level Programs of Study (NLPS)** as of the 2022-2023 school year. This initiative aims to improve the consistency, quality, and intentionality of CTE instruction across Indiana.

The NLPS course structure serves as the key framework for schools and career centers to deliver the benefits available through the CTE redesign. The course structure was designed in collaboration with a working group of high school principals and CTE directors that offer CTE programs through a variety of scheduling options.

A simplified explanation of the course structure is that the 6 credits of content included in the current Level I course have been divided out into three 2-credit courses: Principles, Concentrator A, and Concentrator B. This structure was modeled after other popular CTE programs, such as Engineering and Biomedical Sciences. These programs begin with a foundational course and gradually increase depth of content and occupational specificity.

Next Level Programs of Study

Review Document

The design provides the flexibility needed to offer the programs of study at a comprehensive high school or a career center by allowing schools to offer up to six credits in a pathway per school year. **This is made possible by allowing any required pre-requisites to be implemented as co-requisites.**

Other benefits of the new NLPS course structure include the following:

- Ability to earn CTE Concentrator Status in one year if participating in a multi-period training program that allows the student to complete the Principles, Concentrator A, and Concentrator B courses.
- All NLPS follow the same 4-course structure. This creates greater consistency and expectations across all CTE pathways.
- NLPS more clearly defines the courses and credit needed for the Technical Honors Diploma.
- Most advanced courses (Concentrator A and Concentrator B courses) are each aligned to 6 college credit hours. *Increasing the number of dual credit opportunities is a point of emphasis in NLPS, but students do not have to earn dual credits to be a CTE Concentrator.*
- The Capstone course includes time for embedded work-based learning experiences.

The other primary resources that will assist with NLPS implementation are the following:

The [Master Pathways Document](#) outlines the courses that will be in the Perkins V pathways and along with the courses that are included in the NLPS. The Master Pathway List provides a side-by-side comparison of Perkins V pathways with current courses vs. Perkins V pathways with NLPS courses.

The [Next Level Programs of Study Planning Guide](#) is designed to help schools and career centers take full advantage of the benefits available with the newly redesigned CTE structure. Included in the planning guide are the following sections:

- Comparison chart of current CTE system vs. NLPS on several key factors
- Overview of the course structure utilized for NLPS and its benefits
- Rubric to assist schools/career centers with determining what pathways to offer
- Scheduling options for NLPS
- Additional scheduling options and considerations

NLPS FAQ: The CTE team continues to update the FAQ document to ensure that it is accurate and relevant. New or updated questions are highlighted in red. In particular, the FAQ adds some clarification around the definition of CTE concentrator for Perkins purposes and the C average requirement for Graduation Pathways. The FAQ remains the best central resource to find information that has been shared in newsletter updates or other places regarding common NLPS questions.

To learn more about the Next Level Programs of Study and to use additional resources, please visit the Indiana Commission for Higher Education [website](#).

Introduction to Advanced Manufacturing and Logistics	
Career Cluster	Advanced Manufacturing
Program of Study	
NLPS Sequence	Introductory
Course Code	4796
Course Description	<i>Introduction to Advanced Manufacturing and Logistics focuses on manufacturing systems with an introduction to advanced manufacturing and logistics and their relationship to society, individuals, and the environment. Students apply the skills and knowledge of using modern manufacturing processes to obtain resources and change them into industrial materials, industrial products and consumer products. Students investigate the properties of engineered materials. Students study six major types of material processes: casting and molding; forming; separating; conditioning; finishing; and assembling. After gaining a working knowledge of these materials, students are introduced to advanced manufacturing, logistics, and business principles that are utilized in today's advanced manufacturing industry. Students gain a basic understanding of tooling, electrical skills, operation skills, inventory principles, MSDS's, chart and graph reading and MSSC concepts. There is also an emphasis placed on the flow process principles, material movement, safety, and related business operations. Students have the opportunity to develop the characteristics employers seek as well as skills that will help them in future endeavors.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 or 2 semester course, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	
Additional Notes	Note: This course qualifies for funding at the 8 th grade level
ADDITIONAL COURSE INFO	
Funding	Introductory Available for 8 th grade

Liberal Arts/Sciences Requirements	
Promoted Certifications	
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Manufacturing
4796.D1.1	Students evaluate principles of manufacturing to assess their role in manufacturing operations and processes in logistics.
4796.D1.2	Identify the basics of product design
4796.D1.3	Explain the concepts of engineering and its importance within manufacturing
4796.D1.4	Differentiate between the various types of materials and their applications
4796.D1.5	Develop an understanding of product processing and the equipment associated with it
4796.D1.6	Explain the significance of quality control within product manufacturing
4796.D1.7	Examine the steps and process of product assembly
4796.D1.8	Explore the range of technologies available within manufacturing as a whole
4796.D1.9	Summarize how materials can be processed using tools and machines
Domain	Materials Handling
4796.D1.1	Students examine material handling in warehouses and distribution centers for a clear understanding of moving a product.
4796.D1.2	Discuss material handling, storage, and shipping methods
4796.D1.3	Analyze visual design and appearance requirements for packages
4796.D1.4	Explain size, weight, and shape requirements for packaging
4796.D1.5	Identify material handling and storage equipment
4796.D1.6	Discuss layout plans for processing packages
4796.D1.7	Identify types of warehouses and distribution centers
Domain	Introduction to Logistics
4796.D3.1	Students evaluate the history and fundamentals of logistics to understand its relation to manufacturing.
4796.D3.2	Describe the history and relevance of logistics
4796.D3.3	Examine logistic systems used for the transportation of products and services
4796.D3.4	Define terms associated with the logistics, planning, and management industries
4796.D3.5	Recognize the need for material control planning
4796.D3.6	Explore the various options and methods available for shipping/transportation
4796.D3.7	Explore value added services to improve quality and efficiency
4796.D3.8	Recognize the importance of safety, products, and people
Domain	Basic Business Principles
4796.D4.1	Students analyze business principles to make and support manufacturing and logistics

Next Level Programs of Study

Review Document

	decisions.
4796.D4.2	Develop a strong understanding of profits and losses
4796.D4.3	Explore the practice of marketing and explain its relevance
4796.D4.4	Illustrate the various needs for finance
4796.D4.5	Discover accounting practices and explain why they are needed
4796.D4.6	Explain why there is a need for operations in logistics
4796.D4.7	Discuss and understand business structure within advanced manufacturing and logistics
Domain	Advanced Manufacturing
4796.D5.1	Students evaluate advanced manufacturing procedures to improve processes.
4796.D5.2	Develop an awareness of process flow principles
4796.D5.3	Acquire an understanding of systems
4796.D5.4	Compile basic machine operations skills
4796.D5.5	Practice essential mechanical skills
4796.D5.6	Build an understanding of tooling
4796.D5.7	Explore machining within manufacturing industry
4796.D5.8	Develop a strong understanding of different assembly processes
4796.D5.9	Differentiate between materials
4796.D5.10	Acquire basic electrical knowledge and skills
4796.D5.11	Establish fundamental pneumatic skills
4796.D5.12	Exercise basic skills within hydraulics
4796.D5.13	Demonstrate industrial maintenance skills for use in manufacturing
Domain	Using Logistics
4796.D6.1	Students apply and adapt skills within the field of logistics to improve operations.
4796.D6.2	Explore both macro and global levels of material movement
4796.D6.3	Explains the logistics, planning, and management industries at local, state, national, and international levels
4796.D6.4	Explain the importance of production planning and workflow within logistics
4796.D6.5	Recognize the need for production control
4796.D6.6	Develop an understanding of the principles of inventory
4796.D6.7	Explore continuous improvement to increase product quality
4796.D6.8	Understand MSDS's and explain why they are important within industry
4796.D6.9	Acquire basic skills of chart and graph reading
4796.D6.10	Develop a general understanding of shipping, receiving, and processes
4796.D6.11	Establish a global understanding of markets
Domain	Safety
4796.D7.1	Students incorporate workplace and tool safety to maintain a safe work environment.
4796.D7.2	Identify hazards and apply safety methods for working in manufacturing jobs
4796.D7.3	Identify rules and laws designed to promote safety and health in the transportation, distribution, and logistics environments
4796.D7.4	Demonstrate proper use of safety equipment
Domain	Career Opportunities
4796.D8.1	Students evaluate the education, training, and certification needed for careers in advanced manufacturing and logistics.
4796.D8.2	Examine advanced manufacturing and logistics occupations and the roles and responsibilities of each
4796.D8.3	Examine licensing, certification, and credentialing requirements at the national, state, and

Next Level Programs of Study

Review Document

	local levels for careers in advanced manufacturing and logistics
4796.D8.4	Research local and regional labor market and job growth information
4796.D8.5	Identify employers' expectations, appropriate work habits, ethical conduct, legal responsibilities, and good citizenship skills
4796.D8.6	Demonstrate professional standards as required by business and industry

Advanced Manufacturing: Special Topics	
Career Cluster	Advanced Manufacturing
Program of Study	
NLPS Sequence	
Course Code	4880
Course Description	<i>Advanced Manufacturing: Special Topics is an extended learning experience designed to address the advancement and specialization of careers within the career cluster through the provision of a specialized course for a specific workforce need in the school's region. The learning experience is at a qualified site, and is designed to give the student the opportunity to learn and practice technical skills; while working under the direction of the appropriately licensed professional. Throughout the course, students will focus on learning about employment opportunities and obtaining the knowledge, skills and attitudes essential for success in specific occupations. Course standards and curriculum must be tailored to the specific profession, preparing students to advance in this career field, and where applicable, provide students with opportunities for certification or dual credit. Participation in a related CTSO encourages the development of leadership, communication and career related skills, and opportunities for community service.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 semester course, up to 3 credits per semester, may be offered for successive semesters up to 12 credits
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X
Additional Notes	Schools must have an approved Nonstandard Course Waiver on file to be eligible for CTE Funding.

Advanced Career & Technical Education, College Credit: Advanced Manufacturing	
Career Cluster	Advanced Manufacturing
Program of Study	
NLPS Sequence	
Course Code	6146
Course Description	<i>Advanced Career and Technical Education, College Credit is a course title covering any CTE advanced course offered for credit by an accredited post-secondary institution through an adjunct agreement with a secondary school. The intent of this course is to allow students to earn college credit for courses with content that goes beyond that currently approved for high school credit. This course may be used for any dual enrollment course, including a joint program of study involving a postsecondary partnership.</i>
Prerequisite(s)/ Corequisite(s)	None

7100.D1.7	Connect and operate basic reactive components
7100.D1.8	Analyze basic combination circuits
7100.D1.9	Troubleshoot basic series and parallel electrical circuits
7100.D1.10	Connect and operate single-phase transformer circuits
7100.D1.11	Analyze Inductive Circuits
7100.D1.12	Analyze Capacitive Circuits
Domain	Industrial Internet of Things (IIoT), Networking, Data Analytics
7100.D2.1	Optimize overall equipment effectiveness (OEE)
7100.D2.2	Identify and eliminate production bottlenecks
7100.D2.3	Configure and use a cloud-based data acquisition system
7100.D2.4	Identify Industrial Internet of Things (IIoT) components
7100.D2.5	Use a keypad to operate an AC variable frequency drive (VFD)
7100.D2.6	View and edit basic VFD parameters
7100.D2.7	Interpret a PLC program that controls 2/3-wire VFD operation
7100.D2.8	Operate and monitor a PLC-controlled VFD
7100.D2.9	Reset a VFD after an error occurs
7100.D2.10	Operate and monitor a PLC system
7100.D2.11	Configure a PLC to PC Ethernet/IP Driver
7100.D2.12	Create and edit a PLC project
7100.D2.13	Use status and diagnostic indicators to troubleshoot a PLC system
7100.D2.14	Troubleshoot a PLC system with discrete I/O
7100.D2.15	Connect and configure a managed Ethernet network
7100.D2.16	View Ethernet switch network performance and diagnostics
7100.D2.17	Configure port security of a managed industrial Ethernet switch
7100.D2.18	Configure a virtual LAN using a managed Ethernet switch
7100.D2.19	Adjust and operate a flat belt conveyor
7100.D2.20	Interpret and operate a PLC program that controls a mechatronic system sequence
7100.D2.21	Interpret and operate a robot program that uses a traverse axis
7100.D2.22	Interpret and operate a PLC program that uses discrete I/O handshaking
7100.D2.23	Interpret and operate PLC and robot programs that use Ethernet I/O handshaking
7100.D2.24	Connect and configure an IO-Link Master
7100.D2.25	Connect and operate an IO-Link RFID reader system

Next Level Programs of Study

Review Document

7100.D2.26	Interpret and operate a PLC program that uses an IO-Link RFID function block
7100.D2.27	Connect and configure an Ethernet-serial interface
7100.D2.28	Connect and operate a barcode reader
7100.D2.29	Interpret and operate a PLC program that uses barcode reader function block
7100.D2.30	Connect, configure, and operate an IO-Link sensor
7100.D2.31	Interpret and operate a PLC program that uses an IO-Link sensor
7100.D2.32	Interpret and operate a PLC project that tracks production statistics
7100.D2.33	Configure and use a cloud-based SCADA system to track production statistics
7100.D2.34	Configure and use a cloud-based maintenance management system
7100.D2.35	Create and manually populate an SQL database to store data from automation
7100.D2.36	Use a basic query to display and analyze data from an SQL database

Industry 4.0 - Smart Manufacturing Capstone	
Career Cluster	Advanced Manufacturing
Program of Study	Industry 4.0 – Smart Manufacturing
NLPS Sequence	D
Course Code	7222
Course Description	<i>Industry 4.0 - Smart Manufacturing Capstone introduces the basic theory, operation, and programming of industrial robots and their applications through simulations and hands-on laboratory activities. Basic theory, operation, and programming of Programmable Logic Controllers (PLC) will be emphasized in this course along with how automation devices may be integrated with other machines. Multiple industry standard certifications in the field of robotics and automation will be available depending on the length of the course. As a capstone course, students are encouraged to participate in an intensive, embedded work-based learning experience.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Industry 4.0 and Digital Manufacturing; Robotics Design and Innovation; Smart Manufacturing Systems
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas Counts as a quantitative reasoning course
Dual Credit Status	X (PCL/CTE)
Additional Notes	
ADDITIONAL COURSE INFO	
Funding	High Value Level II

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Industrial Robotics I</i>
7222.D1.1	Identify safety hazards and apply safe working practices when working with automated equipment.
7222.D1.2	Demonstrate ability to create and set up a robotic work cell.
7222.D1.3	Demonstrate an ability to properly start up, operate, and shut down an industrial robot.
7222.D1.4	Create and execute robot programs in teach mode and playback mode.
7222.D1.5	Demonstrate ability to define tool center points.
7222.D1.6	Develop an understanding of various coordinate systems used in robotic programming.
7222.D1.7	Demonstrate ability to backup and restore robot programs.
7222.D1.8	Demonstrate an ability to recover robot operation from common faults.
7222.D1.9	Demonstrate an ability to monitor and operate robot inputs & outputs.
7222.D1.10	Create and execute MACROS.
7222.D1.11	Demonstrate an ability to create programs with subroutine structure.
7222.D1.12	Recognize how multiple robots, PLC's, and CNC types of equipment integrate with each other.
7222.D1.13	Demonstrate an ability to edit programmed positions.
7222.D1.14	Demonstrate ability to read and interpret technical documents.
7222.D1.15	Demonstrate ability to use various types of software applicable to course.
7222.D1.16	Assess readiness to take the SACA C-215 Robot System Operations I Certification exam.

Next Level Programs of Study

Review Document

Domain	Programmable Logic Controllers
7222.D2.1	Review basic computer operations.
7222.D2.2	Program from relay logic to ladder logic diagrams.
7222.D2.3	Design timer circuits and logic circuits.
7222.D2.4	Describe logic circuits.
7222.D2.5	Describe the common parts of programmable controllers.
7222.D2.6	Program a start/stop circuit using a PLC.
7222.D2.7	Program counters and timers using a programmable controller.
7222.D2.8	Install and troubleshoot a simple programmable controller system.
7222.D2.9	Discuss input and output analog signals to/ from the PLC.
7222.D2.10	Discuss sequencers.
7222.D2.11	Demonstrate ability to read and interpret technical documents.
7222.D2.12	Demonstrate ability to use various types of software applicable to course.
7222.D2.13	Assess readiness to take the SACA C-207 Programmable Controller Systems 1 Certification exam.
Domain	Industrial Robotics II
7222.D3.1	Continued study of safety hazards and application of safe work practices when working with automated robotic equipment.
7222.D3.2	Demonstrate the ability to write advanced teach pendant programs.
7222.D3.3	Understand the integration process of robots into a multi robot work cell using various types of computer-controlled equipment including the PLC and HMI.
7222.D3.4	Communicate effectively utilizing industry vernacular.
7222.D3.5	Solve technical problems using critical thinking skills.
7222.D3.6	Effectively troubleshoot error codes and return service to a non-functioning robot.
7222.D3.7	Demonstrate how to master and calibrate a robot.
7222.D3.8	Discuss the various applications of EOAT and the nature of automatic tool changing.
7222.D3.9	Apply basic knowledge of robot physics in an automated robotic work cell.
7222.D3.10	Prepare to earn industry recognized robotic certifications.
7222.D3.11	Demonstrate the ability to create and interpret technical documents.
7222.D3.12	Demonstrate ability to use various types of software applicable to course.
7222.D3.13	Demonstrate an ability to create a simulated work-cell using leading edge software.
7222.D3.14	Assess readiness to take the FANUC Certified Robot Operator-1 certification exam.
Domain	Sensors
7222.D4.1	Describe the hazards associated with automated machines and determine appropriate safety methods for working around computer-controlled machinery.
7222.D4.2	Define and discuss open loop and closed loop systems.
7222.D4.3	Discuss the types of switches used in manufacturing automation.
7222.D4.4	Discuss the types of photoelectric sensors used in manufacturing automation.
7222.D4.5	Discuss the types of transducers used in manufacturing automation.
7222.D4.6	Describe and classify sensor systems as discrete, analog, and data types.
7222.D4.7	Develop an understanding of process variables and the appropriate sensor technology used to measure that variable.
7222.D4.8	Analyze and select appropriate sensing control and safety requirements for automated machinery.

Next Level Programs of Study

Review Document

7222.D4.9	Define and discuss the terms sink and source with respect to sensor technology.
7222.D4.10	Analyze and interpret sensor specifications and documentation.
7222.D4.11	Install, program, and troubleshoot sensor systems.
7222.D4.12	Adjust machines for accuracy and repeatability of sensor operations.
7222.D4.13	Solve mathematical problems related to sensor operations.
7222.D4.14	Verbally describe and interpret data obtained from sensor readings.
7222.D4.15	Assess readiness to take the SACA C-205 Sensor Logic Systems 1, C-213 Smart Sensor and Identification Sys. 1 and C-214 Smart Factory Systems 1 Certification exam.

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Advanced Manufacturing
7108.D1.1	Understand the importance of the manufacturing industry, and introduction to common manufacturing concepts through direct interaction with industry.
7108.D1.2	Conduct assigned tasks in a safe and workmanlike manner while working independently or in small groups.
7108.D1.3	Discuss the need for workplace safety and workplace safety training programs as covered by the OSHA 10 Hour program:
7108.D1.4	Attain readiness to take OSHA 10 Hour General Industry Certification exam.
7108.D1.5	Discuss quality systems and reference common manufacturing examples
7108.D1.6	Use quantitative analytical skills to evaluate and process numerical data.
7108.D1.7	Discuss basic blueprint reading fundamentals
7108.D1.8	Discuss basic measurement systems.

Next Level Programs of Study

Review Document

7108.D1.9	Perform basic measurement using precision measuring tools.
7108.D1.10	Demonstrate the ability to read and interpret technical documents.
7108.D1.11	Utilizing and applying software where appropriate to the course.
7108.D1.12	Attain readiness to take MSSC Safety and Quality Certification exam.

Advanced Manufacturing Technology

Career Cluster	Advanced Manufacturing
Program of Study	Industrial Automation and Robotics
NLPS Sequence	B
Course Code	7103
Course Description	<i>Advanced Manufacturing Technology introduces manufacturing processes and practices used in manufacturing environments. The course also covers key electrical principles, including current, voltage, resistance, power, inductance, capacitance, and transformers, along with basic mechanical and fluid power principles. Topics include, types of production, production materials, machining and tooling, manufacturing planning, production control, and product distribution will be covered. Students will be expected to understand the product life cycle from conception through distribution. This course also focuses on technologies used in production processes. Basic power systems, energy transfer systems, machine operation and control will be explored. This course will use lecture, lab, online simulation and programming to prepare students for Certified Production Technician Testing through Manufacturing Skill Standards Council (MSSC).</i>
Prerequisite(s)/ Corequisite(s)	Principles of Advanced Manufacturing
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	<i>Advanced Manufacturing Technology</i>
7103.D1.1	Conduct assigned tasks in a safe and workmanlike manner while working either independently or in small groups
7103.D1.2	Identify basic manufacturing processes and major types of production systems.
7103.D1.3	Define common properties of industrial materials, their application, testing and enhancement
7103.D1.4	Describe the design, tooling, and production aspects of manufacturing.
7103.D1.5	Demonstrate a general knowledge of non-traditional manufacturing processes and automation.
7103.D1.6	Explain the basic concepts of electrical, hydraulic, and pneumatic power systems.
7103.D1.7	Describe and solve for basic electrical quantities such as voltage, amperage, resistance, and power.
7103.D1.8	Describe the types of basic fluid power systems used in manufacturing.

Next Level Programs of Study

Review Document

7103.D1.9	Determine fluid system properties such as pressure, flow, viscosity, and pressure drop
7103.D1.10	Identify the common types and operation of bearing, coupling, belt, and chain systems.
7103.D1.11	Identify physical principles including force, torque, simple machines, and mechanical drives.
7103.D1.12	Describe the basic concepts of machine control, machine automation, and electrical control.
7103.D1.13	Communicate effectively using listening, speaking, reading, and writing skills.
7103.D1.14	Use quantitative analytical skills to evaluate and process numerical data.
7103.D1.15	Solve problems using critical and creative thinking skills.
7103.D1.16	Utilize and apply software where appropriate to the course.
7103.D1.17	Attain readiness to take MSSC Production and Maintenance Awareness Certification exams.
7103.D1.18	Demonstrate ability to read and interpret technical documents.
7103.D1.19	Demonstrate ability to use various types of software applicable to course.
Domain	Electrical Power
7103.D2.1	Demonstrate proper safety precautions related to equipment.
7103.D2.2	Define the following terms: voltage, resistance, current amperage, direct current, alternating current, and power supply.
7103.D2.3	Identify electrical components and form a schematic diagram.
7103.D2.4	Identify types of electrical mechanical switches (SPDT, DPDT, etc.)
7103.D2.5	Use Ohm's Law to calculate voltage, current, and resistance problems.
7103.D2.6	Perform voltage, current, and resistance measurements using the proper measurement devices (both analog and digital meters).
7103.D2.7	Calculate voltage, current, and resistance in simple series, parallel, and series-parallel circuits.
7103.D2.8	Create a schematic drawing and complete single phase AC electrical service connections including meter bases and service panels.
7103.D2.9	Explain the basic principles and operation of transformers, resistors, capacitors, and diodes.
7103.D2.10	Describe the concepts of both DC and AC inductance and capacitance.
7103.D2.11	Calculate values for AC and DC resistive, inductive, and capacitive components.
7103.D2.12	Assemble and test laboratory exercises including building single phase AC switched circuits, and circuits using mechanical relays.
7103.D2.13	Use meters to identify and measure results of AC and DC laboratory exercises.
7103.D2.14	Demonstrate ability to read and interpret technical documents.
7103.D2.15	Demonstrate ability to use various types of software applicable to course.
7103.D3.1	Demonstrate understanding of the basic functions of PLC's

Mechatronics Systems	
Career Cluster	Advanced Manufacturing
Program of Study	Industrial Automation and Robotics
NLPS Sequence	C
Course Code	7106
Course Description	<i>Mechatronics Systems covers the basic electrical and mechanical components and functions of a complex mechatronics system. Through a systems approach, students will learn about</i>

Next Level Programs of Study

Review Document

	<i>mechanical components which lead and support the energy through a mechanical system to increase efficiency and to reduce wear and tear. By understanding the complete system, students will learn and apply troubleshooting strategies to identify, localize and (where possible) to correct malfunctions. Preventive maintenance of mechanical elements and electrical drives as well as safety issues within the system will also be discussed.</i>

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Electrical and Robot Systems</i>
7106.D1.1	Understand the hazards of electromechanical equipment and apply safe working practices.
7106.D1.2	Describe the basic functions and design of a robotic mechatronic system.
7106.D1.3	Apply basic knowledge of robot physics in a mechatronics system.
7106.D1.4	Explain the role of various electrical components within a robotic mechatronic system.
7106.D1.5	Trace and describe the flow of energy and information in a robotic mechatronic system.
7106.D1.6	Describe the basic physical properties of electrical components.
7106.D1.7	Read, analyze, and utilize the technical documents such as data sheets, timing diagrams, operational manuals, schematics, etc. for a mechatronic system.
7106.D1.8	Carry out measurements and adjustments on electrical components/circuits in a mechatronic system.
7106.D1.9	Localize, identify, document and correct (where possible) malfunctions in electrical circuits, based upon the technical documentation.
7106.D1.10	Transfer the knowledge learned from one system to another system.
7106.D1.11	Effectively use current and emerging computer technologies when applicable.
7106.D1.12	Demonstrate ability to read and interpret technical documents.
7106.D1.13	Demonstrate ability to use various types of software applicable to course.
Domain	<i>Mechanical Systems</i>
7106.D2.1	Understand the hazards of electromechanical equipment and apply safe working practices.
7106.D2.2	Explain the role of various mechanical components within a given system or module.
7106.D2.3	Trace and describe the flow of energy in a given mechatronic system or subsystem.
7106.D2.4	Describe the basic physical properties of mechanical components including materials, lubrication requirements, and surface properties.
7106.D2.5	Carry out adjustments on mechanical components in a mechatronic system.
7106.D2.6	Read, analyze, and utilize the technical data sheets for the mechanical components and electrical drives within a mechatronic system.
7106.D2.7	Correctly localize, identify and document causes of malfunctions in mechanical components or electrical drives, based upon the technical documentation.
7106.D2.8	Correct malfunctions where possible, or correctly identify the expertise required to correct a malfunction.
7106.D2.9	Transfer the knowledge learned from one system to another system.
7106.D2.10	Effectively use current and emerging computer technologies when applicable.

Next Level Programs of Study

Review Document

7106.D2.11	Demonstrate ability to read and interpret technical documents.
7106.D2.12	Demonstrate ability to use various types of software applicable to course.

Industrial Automation and Robotics Capstone	
Career Cluster	Advanced Manufacturing
Program of Study	Industrial Automation and Robotics
NLPS Sequence	D
Course Code	7224
Course Description	<i>The Automation and Robotics Capstone course focuses on the installation, maintenance, and repair of industrial robots. Students will also learn the basics of pneumatic, electro pneumatic and hydraulic control circuits as well as the basic theory, fundamentals of digital logic, and programming of programmable logic controllers (PLCs) in a complex mechatronic system. Students will learn to identify malfunctioning robots and to apply troubleshooting strategies to identify and localize problems caused by pneumatic and hydraulic control circuits and PLC hardware. Completing the capstone course will provide students the opportunity to earn a postsecondary certificate and will prepare students to take nationally recognized industry certification exams. Hands-on projects and team activities will allow students to apply learning on the latest industry technologies. Extended work-based learning experiences and industry partnerships are highly encouraged for an authentic industry experience.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Advanced Manufacturing; Advanced Manufacturing Technology; Mechatronics Systems
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas Counts as a quantitative reasoning course
Dual Credit Status	X (PCL/CTE)
Additional Notes

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Fluid Power
7224.D1.1	Calculate and demonstrate the basic physics of fluid mechanics using Pascal's Law.
7224.D1.2	Describe function and construction of various fluid power components, including pumps, valves, cylinders, filters, heat exchangers, pressure regulators, and accumulators.
7224.D1.3	Identify fluid power symbols and interpret fluid power schematic diagrams.
7224.D1.4	Demonstrate basic fluid power plumbing.
7224.D1.5	Design elementary fluid power circuits.
7224.D1.6	Troubleshoot elementary fluid power circuits.
7224.D1.7	Demonstrate knowledge of safety procedures related to fluid power equipment.
7224.D1.8	Demonstrate ability to read and interpret technical documents.
7224.D1.9	Demonstrate ability to use various types of software applicable to course.

Next Level Programs of Study

Review Document

7224.D1.10	Demonstrate proper safety precautions related to equipment.
Domain	Machine Maintenance and Installation
7224.D2.1	Perform the rigging and lifting of industrial components.
7224.D2.2	Describe the principles of mechanical power transmission systems.
7224.D2.3	Make speed, torque, and pitch calculations.
7224.D2.4	Explain the advantages and disadvantages of belt, gear, chain and coupling drives.
7224.D2.5	Install and align belts, gears, chains, and couplings correctly.
7224.D2.6	Describe the use and construction of seals and packings.
7224.D2.7	Recognize the differences and correct uses of plain and anti-friction type bearings.
7224.D2.8	Compare gear drive systems, their components and function.
7224.D2.9	Analyze failures due to heat, vibration, and observation.
7224.D2.10	Selection of proper lubricants for the correct use, in specific applications.
7224.D2.11	Installing and maintaining components safely.
7224.D2.12	Follow conventional industrial safety practices.
Domain	Pressurized Systems
7224.D3.1	Understand the hazards of electromechanical equipment and apply safe working practices.
7224.D3.2	Understand what a mechatronic system is, and the inter relationships of components and modules within a complex mechatronic system with a focus on (electro) pneumatic and hydraulic control systems.
7224.D3.3	Understand the role of (electro) pneumatic and hydraulic control systems in complex mechatronic system and subsystems.
7224.D3.4	Understand troubleshooting, maintenance and safety issues revolving around (electro) pneumatic and hydraulic circuits within a mechatronic system.
7224.D3.5	Explain the role of various pneumatic / hydraulic components within a system or module and trace and describe the flow of energy in a given system or module.
7224.D3.6	Describe the basic physical properties of pneumatic/hydraulic components in a system and carry out measurements and adjustments on pneumatic / hydraulic components.
7224.D3.7	Read, analyze, and utilize technical documents for the pneumatic/hydraulic control system.
7224.D3.8	Localize, identify, document and correct malfunctions in complex mechatronic systems.
7224.D3.9	Transfer the knowledge learned from one system to other systems.
7224.D3.10	Effectively use current and emerging computer technologies when applicable.
Domain	Advanced Control Systems
7224.D4.1	Explain the role of programmable logic controllers within a given system or module.
7224.D4.2	Trace and describe the flow of information in a given mechatronic system or subsystem with a focus on the control function of PLCs in the system.
7224.D4.3	Describe the basic functions and design of PLCs.
7224.D4.4	Read, analyze, and utilize the technical documents such as data sheets, timing diagrams, operation manuals, schematics, and ladder diagrams.
7224.D4.5	Correctly localize, identify, and document system malfunctions in or caused by PLC hardware, based upon the technical documentation.
7224.D4.6	Transfer the knowledge learned from one system to another system.
7224.D4.7	Effectively use current and emerging computer technologies when applicable.
7224.D4.8	Attain readiness to take Level 1 - Siemens Certified Mechatronic Systems Assistant exam.

Next Level Programs of Study

Review Document

Domain	Programmable Logic Controllers
7224.D5.1	Review basic computer operations.
7224.D5.2	Program from relay logic to ladder logic diagrams.
7224.D5.3	Design timer circuits and logic circuits.
7224.D5.4	Describe logic circuits.
7224.D5.5	Describe the common parts of programmable controllers.
7224.D5.6	Program a start/stop circuit using a PLC.
7224.D5.7	Program counters and timers using a programmable controller.
7224.D5.8	Install and troubleshoot a simple programmable controller system.
7224.D5.9	Discuss input and output analog signals to/ from the PLC.
7224.D5.10	Discuss sequencers.
7224.D5.11	Demonstrate ability to read and interpret technical documents.

Competency #	Competency
Domain	Advanced Manufacturing
7108.D1.1	Understand the importance of the manufacturing industry, and introduction to common manufacturing concepts through direct interaction with industry.
7108.D1.2	Conduct assigned tasks in a safe and workmanlike manner while working independently or in small groups.
7108.D1.3	Discuss the need for workplace safety and workplace safety training programs as covered by the OSHA 10 Hour program:
7108.D1.4	Attain readiness to take OSHA 10 Hour General Industry Certification exam.
7108.D1.5	Discuss quality systems and reference common manufacturing examples
7108.D1.6	Use quantitative analytical skills to evaluate and process numerical data.
7108.D1.7	Discuss basic blueprint reading fundamentals
7108.D1.8	Discuss basic measurement systems.

Next Level Programs of Study

Review Document

7108.D1.9	Perform basic measurement using precision measuring tools.
7108.D1.10	Demonstrate the ability to read and interpret technical documents.
7108.D1.11	Utilizing and applying software where appropriate to the course.
7108.D1.12	Attain readiness to take MSSC Safety and Quality Certification exam.

Advanced Manufacturing Technology	
Career Cluster	Advanced Manufacturing
Program of Study	Industrial Maintenance – Electrical, Industrial Maintenance – Mechanical
NLPS Sequence	B
Course Code	7103
Course Description	<i>Advanced Manufacturing Technology introduces manufacturing processes and practices used in manufacturing environments. The course also covers key electrical principles, including current, voltage, resistance, power, inductance, capacitance, and transformers, along with basic mechanical and fluid power principles. Topics include, types of production, production materials, machining and tooling, manufacturing planning, production control, and product distribution will be covered. Students will be expected to understand the product life cycle from conception through distribution. This course also focuses on technologies used in production processes. Basic power systems, energy transfer systems, machine operation and control will be explored. This course will use lecture, lab, online simulation and programming to prepare students for Certified Production Technician Testing through Manufacturing Skill Standards Council (MSSC).</i>
Prerequisite(s)/ Corequisite(s)	Principles of Advanced Manufacturing

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Advanced Manufacturing Technology
7103.D1.1	Conduct assigned tasks in a safe and workmanlike manner while working either independently or in small groups
7103.D1.2	Identify basic manufacturing processes and major types of production systems.
7103.D1.3	Define common properties of industrial materials, their application, testing and enhancement
7103.D1.4	Describe the design, tooling, and production aspects of manufacturing.
7103.D1.5	Demonstrate a general knowledge of non-traditional manufacturing processes and automation.
7103.D1.6	Explain the basic concepts of electrical, hydraulic, and pneumatic power systems.
7103.D1.7	Describe and solve for basic electrical quantities such as voltage, amperage, resistance, and power.
7103.D1.8	Describe the types of basic fluid power systems used in manufacturing.

Next Level Programs of Study

Review Document

7103.D1.9	Determine fluid system properties such as pressure, flow, viscosity, and pressure drop
7103.D1.10	Identify the common types and operation of bearing, coupling, belt, and chain systems.
7103.D1.11	Identify physical principles including force, torque, simple machines, and mechanical drives.
7103.D1.12	Describe the basic concepts of machine control, machine automation, and electrical control.
7103.D1.13	Communicate effectively using listening, speaking, reading, and writing skills.
7103.D1.14	Use quantitative analytical skills to evaluate and process numerical data.
7103.D1.15	Solve problems using critical and creative thinking skills.
7103.D1.16	Utilize and apply software where appropriate to the course.
7103.D1.17	Attain readiness to take MSSC Production and Maintenance Awareness Certification exams.
7103.D1.18	Demonstrate ability to read and interpret technical documents.
7103.D1.19	Demonstrate ability to use various types of software applicable to course.
Domain	Electrical Power
7103.D2.1	Demonstrate proper safety precautions related to equipment.
7103.D2.2	Define the following terms: voltage, resistance, current amperage, direct current, alternating current, and power supply.
7103.D2.3	Identify electrical components and form a schematic diagram.
7103.D2.4	Identify types of electrical mechanical switches (SPDT, DPDT, etc.)
7103.D2.5	Use Ohm's Law to calculate voltage, current, and resistance problems.
7103.D2.6	Perform voltage, current, and resistance measurements using the proper measurement devices (both analog and digital meters).
7103.D2.7	Calculate voltage, current, and resistance in simple series, parallel, and series-parallel circuits.
7103.D2.8	Create a schematic drawing and complete single phase AC electrical service connections including meter bases and service panels.
7103.D2.9	Explain the basic principles and operation of transformers, resistors, capacitors, and diodes.
7103.D2.10	Describe the concepts of both DC and AC inductance and capacitance.
7103.D2.11	Calculate values for AC and DC resistive, inductive, and capacitive components.
7103.D2.12	Assemble and test laboratory exercises including building single phase AC switched circuits, and circuits using mechanical relays.
7103.D2.13	Use meters to identify and measure results of AC and DC laboratory exercises.
7103.D2.14	Demonstrate ability to read and interpret technical documents.
7103.D2.15	Demonstrate ability to use various types of software applicable to course.
7103.D3.1	Demonstrate understanding of the basic functions of PLC's

Industrial Electrical Fundamentals	
Career Cluster	Advanced Manufacturing
Program of Study	Industrial Maintenance – Electrical

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Motor and Motor Controls
7102.D1.1	Demonstrate safe practices and procedures. [c]
7102.D1.2	Identify motors used in commercial and residential applications. [a, e]
7102.D1.3	Identify and describe methods for controlling motor speeds. [a]
7102.D1.4	Appropriately select and install motors. [b, i]
7102.D1.5	Demonstrate methods of starting motors utilized in industrial applications. [e]
7102.D1.6	Identify various types of motor protective devices used in industry. [e]
7102.D1.7	Analyze ladder diagrams for motor circuits. [a, b]
7102.D1.8	Diagnose and troubleshoot motors. [a, b, e]
7102.D1.9	Identify various types of three-phase motor designs and applications. [e]
7102.D1.10	Demonstrate methods for reversing AC and DC motors. [b, e]
7102.D1.11	Explain the methods for accelerating and braking motors. [a, b]
7102.D1.12	Demonstrate ability to read and interpret technical documents. [b, e]
7102.D1.13	Demonstrate ability to use various types of software applicable to course. [a]
7102.D1.14	Assess readiness to take the SACA C-202 Electric Motor Control Systems 1 Certification exam. [h]
Domain	Industrial Wiring
7102.D2.1	Select appropriate device, pull, and junction boxes, and calculate NEC fill values. [a, e]
7102.D2.2	Lay-out and install the common conduit types used in industrial settings. [a, c, d, f]
7102.D2.3	Choose proper conductors, cables, raceways, and fittings. [a, b]
7102.D2.4	Read and examine industrial electrical prints and ladder diagrams. [b, f]
7102.D2.5	Splice, terminate, and specify NEC appropriate wire, conductors, and cable. [a, b]
7102.D2.6	Understand and apply appropriate bonding and grounding techniques. [a, c, e]
7102.D2.7	Specify and size appropriate overcurrent devices. [a, b, c]
7102.D2.8	Recognize the hazards of industrial electricity and the procedures employed to guard against them. [c, d]
7102.D2.9	Size and install appropriate equipment for motor control centers. [a, b, c, d]
7102.D2.10	Demonstrate ability to read and interpret technical documents. [b,e]
7102.D2.11	Demonstrate ability to use various types of software applicable to course. [a]
7102.D2.12	Assess readiness to take the SACA C-206 Electrical System Installation 1 Certification exam. [h]

Industrial Electrical Capstone	
Career Cluster	Advanced Manufacturing
Program of Study	Industrial Maintenance – Electrical
NLPS Sequence	D
Course Code	7260
Course Description	<i>The Industrial Electrical Capstone course is designed to provide an understanding of circuits using alternating current and the motor operation as well as the operation and programming of programmable logic controllers (PLC). The course will also examine the electrical components in a complex mechatronic system. This course will give each student a general understanding of common types of electric motors, extending from the small shaded pole fan motors to the large three-phase motors. This course will use lecture, lab, online simulation and programming to prepare students for the C-207 Programmable Controller Systems 1 Certification through Smart Automation Certification Alliance (SACA).</i>
Prerequisite(s)/ Corequisite(s)	Principles of Advanced Manufacturing; Advanced Manufacturing Technology; Industrial Electrical Fundamentals
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas Counts as a quantitative reasoning course
Dual Credit Status	X (PCL/CTE)

7260.D1.4	Distinguish the difference between three-phase & single-phase distribution. [e]
7260.D1.5	Describe the operation and interconnection of single and three phase transformers. [f]
7260.D1.6	Describe the general principles of electric motor controls. [f]
7260.D1.7	Select and install control devices that will achieve specific operations. [b, e]
7260.D1.8	Troubleshoot complex circuits. [b, e]
7260.D1.9	Recognize types and application circuits. [e]
7260.D1.10	Maintain and install electrical components safely. [c]
7260.D1.11	Demonstrate ability to read and interpret technical documents. [b, e]
7260.D1.12	Demonstrate ability to use various types of software applicable to course. [a]
Domain	Programmable Automation Controls
7260.D2.1	Review basic computer operations. [e]
7260.D2.2	Program from relay logic to ladder logic diagrams. [a]

Next Level Programs of Study

Review Document

7260.D2.3	Design timer circuits and logic circuits. [a]
7260.D2.4	Describe logic circuits. [f]
7260.D2.5	Describe the common parts of programmable controllers. [f]
7260.D2.6	Program a start/stop circuit using a PLC. [a]
7260.D2.7	Program counters and timers using a programmable controller. [a]
7260.D2.8	Install and troubleshoot a simple programmable controller system. [b, e]
7260.D2.9	Discuss input and output analog signals to/ from the PLC. [f]
7260.D2.10	Discuss sequencers. [f]
7260.D2.11	Assess readiness to take the SACA C-207 Programmable Controller Systems 1 Certification exam. [h]
Domain	Industrial Electrical II
7260.D3.1	Understand the hazards of electromechanical equipment and apply safe working practices. [c]
7260.D3.2	Describe the basic functions and design of a robotic mechatronic system. [f]
7260.D3.3	Apply basic knowledge of robot physics in a mechatronics system. [b,e]
7260.D3.4	Explain the role of various electrical components within a robotic mechatronic system. [f]
7260.D3.5	Trace and describe the flow of energy and information in a robotic mechatronic system. [f]
7260.D3.6	Describe the basic physical properties of electrical components. [f]
7260.D3.7	Read, analyze and utilize technical documents such as data sheets, timing diagrams, operational manuals, schematics, etc. for a mechatronic system. [f]
7260.D3.8	Carry out measurements and adjustments on electrical components/circuits in a mechatronic system. [f]
7260.D3.9	Localize, identify, document and correct (where possible) malfunctions in electrical circuits, based upon the technical documentation. [b,e]
7260.D3.10	Transfer the knowledge learned from one system to another system. [b,e]
7260.D3.11	Effectively use current and emerging computer technologies when applicable. [b,e]

Principles of Advanced Manufacturing	
Career Cluster	Advanced Manufacturing
Program of Study	Industrial Automation and Robotics, Industrial Maintenance – Electrical, Industrial Maintenance – Mechanical
NLPS Sequence	A
Course Code	7108
Course Description	<i>Principles of Advanced Manufacturing is a course that includes classroom and laboratory experiences in Industrial Technology and Manufacturing Trends. Domains include safety and impact, manufacturing essentials, lean manufacturing, design principles, and careers in advanced manufacturing. Hands-on projects and team activities will allow students to apply learning on the latest industry technologies. Work-based learning experiences and industry partnerships are highly encouraged for an authentic industry experience.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)

7108.D1.9	Perform basic measurement using precision measuring tools.
7108.D1.10	Demonstrate the ability to read and interpret technical documents.
7108.D1.11	Utilizing and applying software where appropriate to the course.
7108.D1.12	Attain readiness to take MSSC Safety and Quality Certification exam.

Advanced Manufacturing Technology	
Career Cluster	Advanced Manufacturing
Program of Study	Industrial Maintenance – Electrical, Industrial Maintenance – Mechanical
NLPS Sequence	B
Course Code	7103
Course Description	<i>Advanced Manufacturing Technology introduces manufacturing processes and practices used in manufacturing environments. The course also covers key electrical principles, including current, voltage, resistance, power, inductance, capacitance, and transformers, along with basic mechanical and fluid power principles. Topics include, types of production, production materials, machining and tooling, manufacturing planning, production control, and product distribution will be covered. Students will be expected to understand the product life cycle from conception through distribution. This course also focuses on technologies used in production processes. Basic power systems, energy transfer systems, machine operation and control will be explored. This course will use lecture, lab, online simulation and programming to prepare students for Certified Production Technician Testing through Manufacturing Skill Standards Council (MSSC).</i>

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Advanced Manufacturing Technology
7103.D1.1	Conduct assigned tasks in a safe and workmanlike manner while working either independently or in small groups
7103.D1.2	Identify basic manufacturing processes and major types of production systems.
7103.D1.3	Define common properties of industrial materials, their application, testing and enhancement
7103.D1.4	Describe the design, tooling, and production aspects of manufacturing.
7103.D1.5	Demonstrate a general knowledge of non-traditional manufacturing processes and automation.
7103.D1.6	Explain the basic concepts of electrical, hydraulic, and pneumatic power systems.
7103.D1.7	Describe and solve for basic electrical quantities such as voltage, amperage, resistance, and power.
7103.D1.8	Describe the types of basic fluid power systems used in manufacturing.

Next Level Programs of Study

Review Document

7103.D1.9	Determine fluid system properties such as pressure, flow, viscosity, and pressure drop
7103.D1.10	Identify the common types and operation of bearing, coupling, belt, and chain systems.
7103.D1.11	Identify physical principles including force, torque, simple machines, and mechanical drives.
7103.D1.12	Describe the basic concepts of machine control, machine automation, and electrical control.
7103.D1.13	Communicate effectively using listening, speaking, reading, and writing skills.
7103.D1.14	Use quantitative analytical skills to evaluate and process numerical data.
7103.D1.15	Solve problems using critical and creative thinking skills.
7103.D1.16	Utilize and apply software where appropriate to the course.
7103.D1.17	Attain readiness to take MSSC Production and Maintenance Awareness Certification exams.
7103.D1.18	Demonstrate ability to read and interpret technical documents.
7103.D1.19	Demonstrate ability to use various types of software applicable to course.
Domain	Electrical Power
7103.D2.1	Demonstrate proper safety precautions related to equipment.
7103.D2.2	Define the following terms: voltage, resistance, current amperage, direct current, alternating current, and power supply.
7103.D2.3	Identify electrical components and form a schematic diagram.
7103.D2.4	Identify types of electrical mechanical switches (SPDT, DPDT, etc.)
7103.D2.5	Use Ohm's Law to calculate voltage, current, and resistance problems.
7103.D2.6	Perform voltage, current, and resistance measurements using the proper measurement devices (both analog and digital meters).
7103.D2.7	Calculate voltage, current, and resistance in simple series, parallel, and series-parallel circuits.
7103.D2.8	Create a schematic drawing and complete single phase AC electrical service connections including meter bases and service panels.
7103.D2.9	Explain the basic principles and operation of transformers, resistors, capacitors, and diodes.
7103.D2.10	Describe the concepts of both DC and AC inductance and capacitance.
7103.D2.11	Calculate values for AC and DC resistive, inductive, and capacitive components.
7103.D2.12	Assemble and test laboratory exercises including building single phase AC switched circuits, and circuits using mechanical relays.
7103.D2.13	Use meters to identify and measure results of AC and DC laboratory exercises.
7103.D2.14	Demonstrate ability to read and interpret technical documents.
7103.D2.15	Demonstrate ability to use various types of software applicable to course.
7103.D3.1	Demonstrate understanding of the basic functions of PLC's

Industrial Maintenance Fundamentals	
Career Cluster	Advanced Manufacturing

Review Document

7104.D1.1	Demonstrate the proper safety procedures in oxy-fuel welding, shielded metal arc, and gas metal arc welding.
7104.D1.2	Learn proper AWS Standard Welding Terms and Definition.
7104.D1.3	Set up and shut down an oxy-fuel station properly and safely.
7104.D1.4	Select and determine the proper oxy-fuel cutting and welding tip size for a job.
7104.D1.5	Perform stringer beads with and without filler metal with the oxy-fuel torch.
7104.D1.6	Perform butt, lap, and tee joints with OAW.
7104.D1.7	Perform soldering and brazing with oxy-fuel equipment.
7104.D1.8	Perform square cut, bevel cut and hole cut with hand-held oxy-fuel cutting torch.
7104.D1.9	Perform pad of beads on plate with SMA using E7014 electrodes.
7104.D1.10	Perform lap and tee joint weld on thin gauge steel plate with SMA using 6012/6013 electrodes.
7104.D1.11	Perform pad of beads on plate with SMA using E6010/6011 electrodes.
7104.D1.12	Perform pad of beads on plate with SMA using E7018 electrodes.
7104.D1.13	Perform stringers on plate with GMA.
7104.D1.14	Perform butt, lap and tee joint welds in flat position with the MIG (GMA) welding process.
7104.D1.15	Demonstrate ability to read and interpret technical documents.
Domain	Precision Machining
7104.D2.1	Demonstrate applications of machining speeds and feeds.
7104.D2.2	Interpret detail and assembly drawings of tooling and related components.
7104.D2.3	Interpret engineering data presented in graphs or charts, algebraic expressions and proportional relationships.
7104.D2.4	Demonstrate the correct use of basic hand tools, special accessories, and required testing equipment.
7104.D2.5	Perform routine preventative maintenance procedures.
7104.D2.6	Develop and utilize mathematical formulas to compute coordinates and solve machining related problems.
7104.D2.7	Solve problems and make decisions using formal process methods.
7104.D2.8	Solve mathematical problems related to machining operations.

Industrial Maintenance Capstone	
Career Cluster	Advanced Manufacturing
Program of Study	Industrial Maintenance – Mechanical
NLPS Sequence	D
Course Code	7261
Course Description	<i>The Industrial Maintenance Capstone course examines the procedures for the removal, repair and installation of machine components. The methods of installation, lubrication practices, and maintenance procedures for industrial machinery are analyzed. Additionally the course may cover the mechanical components and electrical drives in a complex mechatronic system. By understanding the inner workings of the complete system, students will learn and apply troubleshooting strategies to identify, localize and (where possible) to correct malfunctions. Preventive maintenance of mechanical elements and electrical drives as well as safety issues within the system will be discussed. This course will use lecture, lab, online simulation and</i>

Competency #	Competency
Domain	Fluid Power
7261.D1.1	Calculate and demonstrate the basic physics of fluid mechanics using Pascal's Law.
7261.D1.2	Describe function and construction of various fluid power components, including pumps, valves, cylinders, filters, heat exchangers, pressure regulators, and accumulators.
7261.D1.3	Identify fluid power symbols and interpret fluid power schematic diagrams.
7261.D1.4	Demonstrate basic fluid power plumbing.
7261.D1.5	Design elementary fluid power circuits.
7261.D1.6	Troubleshoot elementary fluid power circuits.
7261.D1.7	Demonstrate knowledge of safety procedures related to fluid power equipment.
7261.D1.8	Demonstrate ability to read and interpret technical documents.
7261.D1.9	Demonstrate ability to use various types of software applicable to course.
7261.D1.10	Demonstrate proper safety precautions related to equipment.
Domain	Machine Maintenance and Installation
7261.D2.1	Perform the rigging and lifting of industrial components.
7261.D2.2	Describe the principles of mechanical power transmission systems.
7261.D2.3	Make speed, torque, and pitch calculations.
7261.D2.4	Explain the advantages and disadvantages of belt, gear, chain and coupling drives.
7261.D2.5	Install and align belts, gears, chains, and couplings correctly.
7261.D2.6	Describe the use and construction of seals and packings.
7261.D2.7	Recognize the differences and correct uses of plain and anti-friction type bearings.
7261.D2.8	Compare gear drive systems, their components and function.
7261.D2.9	Analyze failures due to heat, vibration, and observation.
7261.D2.10	Selection of proper lubricants for the correct use, in specific applications.
7261.D2.11	Installing and maintaining components safely.
7261.D2.12	Follow conventional industrial safety practices.
Domain	Pressurized Systems
7261.D3.1	Understand the hazards of electromechanical equipment and apply safe working practices.
7261.D3.2	Understand what a mechatronic system is, and the inter relationships of components and modules within a complex mechatronic system with a focus on (electro) pneumatic and hydraulic control systems.
7261.D3.3	Understand the role of (electro) pneumatic and hydraulic control systems in complex mechatronic system and subsystems.
7261.D3.4	Understand troubleshooting, maintenance and safety issues revolving around (electro) pneumatic and hydraulic circuits within a mechatronic system.
7261.D3.5	Explain the role of various pneumatic / hydraulic components within a system or module and trace and describe the flow of energy in a given system or module.
7261.D3.6	Describe the basic physical properties of pneumatic/hydraulic components in a system and carry out measurements and adjustments on pneumatic / hydraulic components.
7261.D3.7	Read, analyze, and utilize technical documents for the pneumatic/hydraulic control system.
7261.D3.8	Localize, identify, document and correct malfunctions in complex mechatronic systems.
7261.D3.9	Transfer the knowledge learned from one system to other systems.
7261.D3.10	Effectively use current and emerging computer technologies when applicable.

Review Document

Domain	Mechanical Systems
7261.D4.1	Understand the hazards of electromechanical equipment and apply safe working practices.
7261.D4.2	Explain the role of various mechanical components within a given system or module.
7261.D4.3	Trace and describe the flow of energy in a given mechatronic system or subsystem.
7261.D4.4	Describe the basic physical properties of mechanical components including materials, lubrication requirements, and surface properties.
7261.D4.5	Carry out adjustments on mechanical components in a mechatronic system.
7261.D4.6	Read, analyze, and utilize the technical data sheets for the mechanical components and electrical drives within a mechatronic system.
7261.D4.7	Correctly localize, identify and document causes of malfunctions in mechanical components or electrical drives, based upon the technical documentation.
7261.D4.8	Correct malfunctions where possible, or correctly identify the expertise required to correct a malfunction.
7261.D4.9	Transfer the knowledge learned from one system to another system.
7261.D4.10	Effectively use current and emerging computer technologies when applicable.
7261.D4.11	Demonstrate ability to read and interpret technical documents.
7261.D4.12	Demonstrate ability to use various types of software applicable to course.

7109.D1.4	Demonstrate the correct use of basic hand tools, special accessories, and required testing equipment.
7109.D1.5	Identify the basic parts and applications of measuring and layout tools.
7109.D1.6	Identify the basic parts and functions of the 5 common machine tools
7109.D1.7	Identify and explain the application of all common cutting tools.
7109.D1.8	Identify and explain Metallurgy and heat treatment of steels
7109.D1.9	Perform routine preventative maintenance procedures.
7109.D1.10	Develop and utilize mathematical formulas to compute coordinates and solve machining related problems.
7109.D1.11	Solve problems and make decisions using formal process methods.
7109.D1.12	Solve mathematical problems related to machining operations.
Domain	<i>Print Interpretation</i>
7109.D2.1	Indicate dimensions and tolerances related to fasteners and joining requirements.
7109.D2.2	Understand detail and assembly drawings of gears and cams.
7109.D2.3	Demonstrate skills in multi-view drawings required for manufacture and repair of machinery.
7109.D2.4	Discuss detail drawings involving multi-view projections, sectional views, auxiliary views, dimensioning subassemblies, and isometric illustrations.

Next Level Programs of Study

Review Document

7109.D2.5	Interpret welding symbols and codes.
7109.D2.6	Develop and use mathematical formulas to compute coordinates and solve gearing-related problems
7109.D2.7	Apply basic knowledge of physics-mechanics to industrial related problems.
7109.D2.8	Apply tolerances, limits, and fits to meet manufacturing requirements.
7109.D2.9	Read prints, interpret drawings, and understand engineering specifications.
7109.D2.10	Think critically and independently, analyze, synthesize, and evaluate technical problems and information.
7109.D2.11	Solve problems and make decisions using formal process methods.
7109.D2.12	Solve mathematical problems related to engineering formulas.
7109.D2.13	Verbally describe and interpret data obtained from prints.

Precision Machining Fundamentals	
Career Cluster	Advanced Manufacturing
Program of Study	Precision Machining
NLPS Sequence	B
Course Code	7105
Course Description	<i>Precision Machining Fundamentals will build a foundation in conventional milling and turning. Students will be instructed in the classroom on topics of shop safety, theory, industrial terminology, and calculations. Lab work will consist of the setup and operation of vertical and/or horizontal milling machines and engine lathes. This course prepares the student for the optional National Institute for Metalworking Skills (NIMS) Milling I certification that may be required for college dual credit.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Precision Machining
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas Counts as a quantitative reasoning course
Dual Credit Status	X (PCL/CTE)
Additional Notes	It is recommended that Precision Machining program of study be taught in a 2-3 period block of time. VU dual credit requires that Precision Machining Fundamentals and Advanced Precision Machining be completed concurrently
ADDITIONAL COURSE INFO	
Funding	High Value Level I

Liberal Arts/Sciences Requirements	ITCC - MATH 122: Applied Technical Mathematics; IVYT 113: Student Success in Technology VU - ENGL 101: English Composition I, UCC Electives 12 hours
Promoted Certifications	NIMS Milling I

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Manual Milling and Turning
7105.D1.1	Identify, understand and practice general and machine specific safety rules and practices.
7105.D1.2	Interpret engineering data presented in graphs or charts, algebraic expressions, and proportional relationships.
7105.D1.3	Demonstrate the correct use of basic hand tools, special accessories, and required testing equipment.
7105.D1.4	Perform routine preventative maintenance procedures.
7105.D1.5	Perform linear and angular measurements using a six-inch scale, micrometers, calipers, combination set, and sine bar.
7105.D1.6	Perform layout operations using a combination set, Vernier height gage, and surface plate.
7105.D1.7	Demonstrate the understanding of the theory and function of measuring and layout tools, basic operations performed on conventional machine tools, related shop theory, shop mathematics and calculations.
Domain	Turning Process
7105.D2.1	Identify and demonstrate correct setup and operation of tooling applications for the conventional engine lathe.
7105.D2.2	Utilize mathematical formulas to compute coordinates and solve lathe machining related problems.

Next Level Programs of Study

Review Document

7105.D2.3	Apply feeds and speeds calculations for given material and tooling combinations.
7105.D2.4	Think critically and independently analyze, synthesize, and evaluate technical problems and information.
Domain	Milling Process
7105.D3.1	Demonstrate applications of machining speeds and feeds.
7105.D3.2	Interpret detail and assembly drawings of tooling and related components.
7105.D3.3	Develop and utilize mathematical formulas to compute coordinates and solve milling machine related problems.
7105.D3.4	Perform routine preventative maintenance procedures.
7105.D3.5	Identify and demonstrate correct setup and operation of tooling applications for milling machines.
7105.D3.6	Think critically and independently analyze, synthesize, and evaluate technical problems and information.

Advanced Precision Machining	
Career Cluster	Advanced Manufacturing
Program of Study	Precision Machining
NLPS Sequence	C
Course Code	7107
Course Description	<i>Advanced Precision Machining will build upon the Turning and Milling processes learned in Precision Machining Fundamentals and will build a foundation in abrasive process machines. Students will be instructed in the classroom on topics of shop safety, theory, industrial terminology, and calculations associated with abrasives. Lab work will consist of the setup and operation of bench grinders and surface grinders. Additionally students will be introduced to Computerized Numeric Controlled (CNC) setup, operations and programming. This course prepares the student for the optional National Institute for Metalworking Skills (NIMS) Grinding I certification that may be required for college dual credit.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Precision Machining; Precision Machining Fundamentals
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Advanced Milling and Turning
7107.D1.1	Demonstrate knowledge of basic OSHA requirements, general shop safety, and MSDS information.
7107.D1.2	Create and interpret documentation for safety, set-up, and quality control purposes.
7107.D1.3	Utilize standard shop documents such as Job Routers, Job Process Sheets, Inspection Plans, etc.
7107.D1.4	Effectively interpret part prints or technical drawings, including GD&T, and use the information to select proper gauging and measurement tools.
7107.D1.5	Demonstrate applications of machining speeds and feeds.
7107.D1.6	Interpret detail and assembly drawings of tooling and related components.
7107.D1.7	Interpret engineering data presented in graphs or charts, algebraic expressions, and proportional relationships.
7107.D1.8	Demonstrate the correct use of basic hand tools, special accessories, and required testing equipment.

Review Document

7107.D1.9	Perform routine preventative maintenance procedures.
7107.D1.10	Develop and utilize mathematical formulas to compute coordinates and solve lathe and milling machine related problems.
7107.D1.11	Apply basic knowledge of physics-mechanics to lathe and mill problems.
7107.D1.12	Apply tolerance limits and fits to meet lathe and mill machine tooling problems.
7107.D1.13	Identify and demonstrate correct setup and operation of tooling applications for the conventional engine lathe and mill.
7107.D1.14	Think critically and independently analyze, synthesize, and evaluate technical problems and information.
Domain	Abrasive Processes
7107.D2.1	Demonstrate the correct use of abrasive tooling, special accessories, and required testing equipment.
7107.D2.2	Apply tolerance limits and fits to meet abrasive processing requirements.
7107.D2.3	Identify and demonstrate correct setup and operation of abrasive operations.
7107.D2.4	Solve mathematical problems related to abrasive processing operations.
Domain	Basic CNC Programming and Operation
7107.D3.1	Develop basic CNC programming and operating skills
7107.D3.2	Utilize CNC programming and machine tools to perform complex machining tasks
7107.D3.3	Use CNC machines to rough in parts that will be used in grinding processes.
7107.D3.4	Compare the material cost, waste, manpower, scheduling of producing a part with manual machines compared to using a CNC production method using G- and M-codes

Precision Machining Capstone	
Career Cluster	Advanced Manufacturing
Program of Study	Precision Machining
NLPS Sequence	D
Course Code	7219
Course Description	<i>Precision Machining Capstone is an in-depth study of skills learned in Precision Machining I, with a stronger focus on CNC setup/operation/programming. Students will be introduced to two axis CNC lathe programming and three axis CNC milling machine programming. Develops the theory of programming in the classroom with applications of the program accomplished on industry-type machines. Studies terminology of coordinates, cutter paths, angle cutting, and linear and circular interpolation. Classroom activities will concentrate on precision set-up and inspection work, as well as machine shop calculations. Students will develop skills in advanced machining and measuring parts involving tighter tolerances and more complex geometry. A continued focus on safety will also be presented.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Precision Machining; Precision Machining Fundamentals; Advanced Precision Machining
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas

Competency #	Competency	
Domain	CNC Setup and Operation	
7219.D1.1	Demonstrate a basic knowledge of OSHA requirements, chip handling, and general shop safety	
7219.D1.2	Identify the components of a CNC Mill (Machining Center) and Lathe (Turning Center)	
7219.D1.3	Identify and understand important documentation including job routers/process plan sheets setup sheets, and prints.	
7219.D1.4	Perform machine inspections and preventative maintenance checks on CNC mills & lathes	
7219.D1.5	Understand and navigate the machine control unit (MCU)	

Next Level Programs of Study

Review Document

7219.D1.6	Perform safe and proper machine startup and shut down procedures
7219.D1.7	Recognize and correct machine malfunctions
7219.D1.8	Use jog controls to move the machine manually
7219.D1.9	Locate, assemble, and install the correct tooling in the tool changer/turret.
7219.D1.10	Properly install and align the appropriate work holding systems in the machine according to part documentation
7219.D1.11	Locate and set work offsets
7219.D1.12	Properly set tool offsets for each tool required in the part documentation
7219.D1.13	Load, verify, and safely execute a CNC program in automatic mode
7219.D1.14	Use manual, manual data input, and automatic operation modes.
7219.D1.15	Interpret the components of a basic CNC program
7219.D1.16	Perform basic edits of a part program
7219.D1.17	Use standard measuring and inspection tools to determine if parts are within tolerances
7219.D1.18	Apply basic Geometric Dimensioning & Tolerancing (GD&T) to part inspection.
7219.D1.19	Make tool wear adjustments to manufacture parts to specifications
Domain	CNC Programming: Mill and Lathe
7219.D2.1	Consistently demonstrate proper programming format and techniques for manual CNC programming to machine parts without error.
7219.D2.2	Complete appropriate documentation for safety, set-up, and quality control purposes.
7219.D2.3	Create process plans and routings for machining operations.
7219.D2.4	Choose appropriate tooling for specified material and machining operation.
7219.D2.5	Calculate proper feeds and speeds for optimal tool life, machining time, and part finish.
7219.D2.6	Understand and use the Cartesian Coordinate System
7219.D2.7	Write mill and lathe G and M code programs manually on the machine control/simulator/PC
7219.D2.8	Verify, troubleshoot, and correct part programs and machining problems
7219.D2.9	Navigate CNC controls to run programmed parts

Principles of Welding Technology	
Career Cluster	Advanced Manufacturing
Program of Study	Welding Technology
NLPS Sequence	A
Course Code	7110
Course Description	<i>Principles of Welding Technology includes classroom and laboratory experiences that develop a variety of skills in oxy-fuel cutting and basic welding. This course is designed for individuals who intend to make a career as a Welder, Technician, Designer, Researcher, or Engineer. Emphasis is placed on safety at all times. OSHA standards and guidelines endorsed by the American Welding Society (AWS) are used. Instructional activities emphasize properties of metals, safety issues, blueprint reading, electrical principles, welding symbols, and mechanical drawing through projects and exercises that teach students how to weld and be prepared for postsecondary and career success.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Welding Fundamentals
7110.D1.1	Understand and identify welding symbols and blueprints.
7110.D1.2	Discuss the need for workplace safety and workplace safety training programs as covered by the OSHA 10 Hour program
7110.D1.3	Demonstrate basic welding techniques using virtual welding simulator.
7110.D1.4	Learn proper AWS Standard Welding Terms and Definitions.
7110.D1.5	Effectively analyze and apply Metallurgy fundamentals to welding processes.
7110.D1.6	Identify the five basic welding joints.
7110.D1.7	Understand and identify welding defects and discontinuities.
7110.D1.8	Understand how to interpret Weld Procedure Specifications (WPSs) and their purpose.
7110.D1.9	Demonstrate the use of oxy fuel welding and cutting.
7110.D1.10	Demonstrate the use of plasma arc cutting.
7110.D1.11	Discuss the current trends and opportunities in the welding field.
7110.D1.12	Attain readiness to take OSHA 10 Hour General Industry Certification exam
7110.D1.13	Demonstrate ability to read and interpret technical documents. Apply that knowledge to steel fabrication.
7110.D1.14	Utilize welding symbols to make appropriate welds according to code.
7110.D1.15	Understand the basic concepts of sketching and drawing blueprints.
7110.D1.16	Understand and apply welding symbol terminology and theory to industry applications
7110.D1.17	Demonstrate ability to use various types of software applicable to course.
Domain	Plasma Arc Cutting
7110.D2.1	Understand and apply learned skills to be able to operate CNC plasma cutting equipment
7110.D2.2	Use CAD software to design parts
7110.D2.3	Perform basic maintenance on all required equipment
7110.D2.4	Utilize equipment to its full capability

Next Level Programs of Study

Review Document

7110.D2.5	Use proper terminology as it applies to Plasma Arc Cutting
7110.D2.6	Show they understand safe work practices
7110.D2.7	Apply learned skills to cut and fabricate a project

Shielded Metal Arc Welding	
Career Cluster	Advanced Manufacturing
Program of Study	Welding Technology
NLPS Sequence	B
Course Code	7111
Course Description	<i>Shielded Metal Arc Welding involves the theory and application of the Shielded Metal Arc Welding process. Process theory will include basic electricity, power sources, electrode selection, and all aspects pertaining to equipment operation and maintenance. Laboratory welds will be performed in basic weld joints with a variety of electrodes in the flat, horizontal and vertical positions. Emphasis will be placed on developing the basic skills necessary to comply with AWS industry standards.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Welding Technology
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas

Promoted Certifications	AWS D.1.1 Shielded Metal Arc Welding; AWS Certified Welder
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Shielded Metal Arc Welding
7111.D1.1	Demonstrate electric welding equipment safety.
7111.D1.2	Understand and apply all shielded metal arc welding safety rules.
7111.D1.3	Identify the five basic welding joints.
7111.D1.4	Identify heat input and metal distortion.
7111.D1.5	Describe the capabilities of electric welding equipment.
7111.D1.6	Weld with A.C. and D.C. current.
7111.D1.7	Prepare and tack weld coupons.
7111.D1.8	Make single and multi-pass welds.
7111.D1.9	Weld in the flat, horizontal, vertical, and the overhead position.
7111.D1.10	Identify SMAW electrodes and AWS electrode classification.
7111.D1.11	Describe D.C. straight and reverse polarity.
7111.D1.12	Describe proper electrode manipulation for each type of electrode.
7111.D1.13	Describe proper correct technique for each welding position and electrode type.
7111.D1.14	Demonstrate ability to read and interpret technical documents.
7111.D1.15	Demonstrate ability to use various types of software applicable to course.
Domain	Advanced Shielded Metal Arc Welding
7111.D2.1	Describe differences in currents and polarities; AC, DC Reverse and DC Straight.
7111.D2.2	Explain how to safely use SMAW equipment.
7111.D2.3	Describe the AWS electrode identification system for SMA process.
7111.D2.4	Perform fillet welds on .5" to 1" plate (21-bead multi-pass) in horizontal, vertical, .3and overhead positions.
7111.D2.5	Describe how to control magnetic arc blow in DC welding of groove welds.
7111.D2.6	Prepare and tack groove welds as to AWS D1.1 Structural Steel Code.
7111.D2.7	Perform 3/8" and 1" groove welds as per AWS and ASME Code, in all positions.
7111.D2.8	Perform air carbon arc gouging on steel groove welds.
7111.D2.9	Describe heat input and metal warpage and distortion.
7111.D2.10	Describe methods of destructive and non-destructive testing.
7111.D2.11	Attain readiness to take American Welding Society certification exam
7111.D2.12	Demonstrate ability to read and interpret technical documents.
7111.D2.13	Demonstrate ability to use various types of software applicable to course.

Gas Welding Processes	
Career Cluster	Advanced Manufacturing
Program of Study	Welding Technology
NLPS Sequence	C
Course Code	7101
Course Description	<i>Gas Welding Processes is designed to cover the operation of Gas Metal Arc Welding (MIG) equipment. This will include all settings, adjustments and maintenance needed to weld with a wire feed system. Instruction on both short-arc and spray-arc transfer methods will be covered. Tee, lap, and open groove joints will be done in all positions with solid, fluxcore, and aluminum wire. Test plates will be made for progress evaluation. Schools may choose to offer the course as a comprehensive MIG Welding course or a combination of introductory MIG and TIG Welding operations.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Welding Technology
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	Schools may choose to cover both introductory MIG and TIG Welding. This configuration is available for dual credit through ITCC.

Competency #	Competency
Domain	<i>Gas Metal Arc Welding</i>
7101.D1.1	Employ safety practices involved in gas metal arc welding.
7101.D1.2	Describe constant voltage and wire feed welding processes.
7101.D1.3	Weld with hard wire using short circuit and spray method welding.
7101.D1.4	Weld with flux-core tubular wires.
7101.D1.5	Weld aluminum with spray.
7101.D1.6	Identify the gases used in gas metal arc welding.
7101.D1.7	Perform routine maintenance on gas metal arc welding equipment.
7101.D1.8	Identify and weld five (5) basic types of joints.
7101.D1.9	Demonstrate ability to read and interpret technical documents.
7101.D1.10	Demonstrate ability to use various types of software applicable to course.
Domain	<i>Advanced Gas Metal Arc Welding</i>
7101.D2.1	Demonstrate the proper safety procedures in Gas Metal Arc welding.
7101.D2.2	Learn proper AWS Standard Welding Terms and Definition.
7101.D2.3	Perform weld restarts that are smooth and even with GMAW using short circuiting transfer equipment on mild steel.
7101.D2.4	Perform lap and tee joint welds with GMAW using short circuiting transfer equipment on mild steel in the vertical up, vertical down and overhead position.
7101.D2.5	Perform square groove welds with GMAW using short circuiting transfer equipment on mild steel in the vertical up, vertical down and overhead position.
7101.D2.6	Perform lap and tee joint welds with GMAW using spray equipment on thick mild steel in the flat and horizontal position.
7101.D2.7	Perform V-Groove welds with GMAW using spray equipment on thick mild steel in the flat position.
7101.D2.8	Perform lap, tee, and groove welds with GMAW equipment on aluminum.
7101.D2.9	Understand welding procedure specifications (WPS) and be able to follow them.
7101.D2.10	Understand the basic metallurgical properties of steel and aluminum and how they are affected by welding.
7101.D2.11	Understand the significance of the suffix in GMAW electrode selection.
7101.D2.12	Prepare to create a workmanship sample weldment for GMAW following the AWS provided prints.
7101.D2.13	Gain insight into the Certification for AWS welders
7101.D2.14	Attain readiness to take American Welding Society certification exam
7101.D2.15	Demonstrate ability to read and interpret technical documents.
7101.D2.16	Demonstrate ability to use various types of software applicable to course.

Welding Technology Capstone	
Career Cluster	Advanced Manufacturing
Program of Study	Welding Technology
NLPS Sequence	D
Course Code	7226
Course Description	<i>The Welding Technology Capstone course builds upon the knowledge and skills developed in Welding Fundamentals, Shielded Metal Arc Welding, and Gas Metal Arc Welding by developing advanced welding skills in Gas Tungsten Arc Welding (TIG), Pipe Welding, and Fabrication. As a capstone course, students should have the opportunity to apply their knowledge and use skills through an intensive work-based learning experience.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Welding Technology; Shielded Metal Arc Welding; Gas Welding Processes
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	
ADDITIONAL COURSE INFO	
Funding	High Value Level II

Promoted Certifications	AWS D.1.1 SMAW
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Gas Tungsten Arc Welding
7226.D1.1	Interpret welding symbols and demonstrate how they apply to shop drawings.
7226.D1.2	Identify the various joint configurations and explain how they affect weld strength.
7226.D1.3	Employ and practice safety procedures and practices used in the welding industry.
7226.D1.4	Identify and describe the function of each component of a GTAW station.
7226.D1.5	Identify and specify GTAW electrodes using the AWS electrode classification system.
7226.D1.6	Identify and specify GTAW filler metals using the AWS filler metal classification system.
7226.D1.7	Explain the effects of DCEN, DCEP, and AC current on electrode life, surface cleaning, and weld characteristics.
7226.D1.8	Describe the shielding gases used for GTAW, describe their characteristics and their uses.
7226.D1.9	Select the proper power source, current type, shielding gas, flow rate, electrode type and diameter, nozzle size, and filler metal.
7226.D1.10	Properly assemble and adjust all variables required to produce acceptable GTA welds.
7226.D1.11	Properly prepare tungsten electrodes for welding with AC or DC current.
7226.D1.12	Demonstrate the use of square wave and pulse welding technology and how it applies to GTAW.
7226.D1.13	Properly prepare metals for welding.
7226.D1.14	Identify different types of weld defects and describe steps to prevent them.
7226.D1.15	Describe welding characteristics for Mild Steel, Stainless Steel, and Aluminum and other weldable metals.
7226.D1.16	Demonstrate welding on various types of metals.
Domain	Advanced Gas Tungsten Arc Welding
7226.D2.1	Demonstrate the proper safety procedures in Gas Tungsten Arc welding.
7226.D2.2	Learn proper AWS Standard Welding Terms and Definition.
7226.D2.3	Setup and shut down of a Gas Tungsten Arc station properly and safely.
7226.D2.4	Select and determine the proper electrode and nozzle size for a job.
7226.D2.5	Understand welding procedure specifications (WPS) and be able to follow them.
7226.D2.6	Perform destruction testing with appropriate welds.
7226.D2.7	Perform proper techniques of preparation of tungsten electrodes.
7226.D2.8	Perform balling of tungsten electrodes in preparation for aluminum welding.
7226.D2.9	Gain insight into the Certification for AWS welders.
7226.D2.10	Practice welding, following WPS and instructor's guidelines.
7226.D2.11	Lap/T/Square groove/w/wire on 10ga.steel.
7226.D2.12	Lap/T/Square groove on 10ga. Stainless Steel.
7226.D2.13	Lap/T on 10ga. Aluminum.
7226.D2.14	Workmanship sample prints; steel, stainless steel, aluminum.
7226.D2.15	Attain readiness to take American Welding Society certification exam.
7226.D2.16	Demonstrate ability to read and interpret technical documents.

Next Level Programs of Study

Review Document

Domain	Pipe Welding
7226.D3.1	Understand and apply all shielded metal arc pipe welding and gas tungsten arc welding safety rules.
7226.D3.2	Apply American Welding Society D1.1 code welding criteria to guided bend tests.
7226.D3.3	Utilize and apply shielded metal arc pipe welding process and gas tungsten arc welding fundamentals to pass AWS welding certifications.
7226.D3.4	Apply all appropriate equipment settings and adjustments.
7226.D3.5	Understand and apply the basic principles and terminology involved in destructive weld testing.
7226.D3.6	Employ safety procedures in preparation of and welding of pipe.
7226.D3.7	Perform the proper technique for preparing the pipe for welding.
7226.D3.8	Tack pipe in 2G and 5G position.
7226.D3.9	Weld pipe in the 2G position with the stringer bead method.
7226.D3.10	Weld pipe in the 5G position with the stringer or weave bead method.
7226.D3.11	Prepare pipe for weld test.
7226.D3.12	Demonstrate ability to inspect weld joint before, during and after welding.
7226.D3.13	Demonstrate ability to read and interpret technical documents.
Domain	Fabrication
7226.D4.1	Describe equipment used in basic metal fabrication.
7226.D4.2	Use measuring equipment.
7226.D4.3	Prepare a bill of materials from a print chosen for project.
7226.D4.4	Prepare a list of fabrication steps necessary to fabricate this project.
7226.D4.5	Layout the various tolerances, fits and allowances related to this project.
7226.D4.6	Layout the assigned project.
7226.D4.7	Fabricate the assigned project.
7226.D4.8	Perform visual inspection of project.
7226.D4.9	Produce a detailed drawing of project with welding symbols.
7226.D4.10	Demonstrate ability to read and interpret technical documents.

Introduction to Agriculture, Food, and Natural Resources	
Career Cluster	Agriculture
Program of Study	
NLPS Sequence	Introductory
Course Code	5056
Course Description	<i>Introduction to Agriculture, Food and Natural Resources is a two semester course that is highly recommended as a prerequisite to and as a foundation for all other agricultural classes. Through hands-on learning activities, students are encouraged to investigate areas of agriculture. Students are introduced to the following areas of agriculture: animal science, plant and soil science, food science, horticultural science, agricultural business management, natural resources, agriculture power, structure, and technology, careers in agriculture, leadership, and supervised agricultural experience. An activity and project-based approach is used along with team building to enhance the effectiveness of the student learning activities.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 or 2 semester course, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	
Additional Notes	Note: This course qualifies for funding at the 8 th grade level
ADDITIONAL COURSE INFO	
Funding	Introductory Available for 8 th grade

Four Yr. Course Alignment	
Postsecondary Credential	
Liberal Arts/Sciences Requirements	
Promoted Certifications	
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Careers
5056.D1.1	Students examine the scope of career opportunities in and the importance of agriculture to the economy.
5056.D1.2	Evaluate the nature and scope of agriculture in society and the economy
5056.D1.3	Evaluate and explore the career opportunities in agriculture
5056.D1.4	Describe the means to achieve career opportunities in agriculture
5056.D1.5	Demonstrate the qualities, attributes, and skills necessary to succeed in, or further prepare for, a chosen career while effectively contributing to society
Domain	Leadership
5056.D2.1	Students validate the necessity of leadership skills development in conjunction with participation in The National FFA Organization (FFA) as a critical component to a well-rounded agricultural education.
5056.D2.2	Communicate using strategies that ensure clarity, logic, critical thinking, purpose, and professionalism in formal and informal settings
5056.D2.3	Recognize and explain the role of the FFA in the development of leadership, education, employability, communications, and human relations skills
5056.D2.4	Examine roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment
5056.D2.5	Acquire the communication skills necessary to positively influence others
5056.D2.6	Model characteristics of ethical and effective leaders in the workplace and community (e.g., integrity, self-awareness, self-regulation, etc.)
Domain	Supervised Agricultural Experience
5056.D3.1	Students validate the necessity of a Supervised Agricultural Experience (SAE) as a critical component to a well-rounded agricultural education.
5056.D3.2	Set expectations and goals related to an SAE program and explore the options
5056.D3.3	Distinguish opportunities to apply academic learning to solve problems in the workplace and community (e.g., identify how to: increase productivity, reduce costs, lower inputs, etc.)
5056.D3.4	Assess workplace/community problems and identify the most appropriate academic knowledge and skills to apply
5056.D3.5	Apply academic knowledge and skills to solve problems in the workplace/community and reflect upon the results achieved
5056.D3.6	Develop an individual SEA program and implement record keeping skills
Domain	Plant & Soil Science

Next Level Programs of Study

Review Document

5056.D4.1	Students connect the necessity of plant and soil science to modern agriculture.
5056.D4.2	Apply knowledge of plant classification, plant anatomy and plant physiology to the production and management of plants
5056.D4.3	Prepare and implement plant management strategies that address environmental factors, essential nutrients, and soil management practices for productive plant growth
5056.D4.4	Identify the physical qualities of the soil that determine its use
Domain	Natural Resource
Core Standard 5	Students confirm the importance of preserving and replenishing our natural resources through natural resource management (e.g., water, soil, air, timber, wildlife, etc.).
IAFNR-5.1	Explain interrelationships between natural resources and humans necessary to conduct conservation practices in natural environments
IAFNR-5.2	Summarize the relationship between natural resources, ecosystems, and human activity
IAFNR-5.3	Identify natural resources and their importance to the local community
Domain	Animal Science
5056.D6.1	Students explore concepts related to the modern animal science industry.
5056.D6.2	Examine the components, historical development, global implications, and future trends of the animal systems industry
5056.D6.3	Classify, evaluate, select, and manage animals based on anatomical and physiological characteristics
5056.D6.4	Examine the components of the meat industry
5056.D6.5	Identify and categorize terms and methods related to animal production (e.g., sustainable, conventional, humanely raised, natural, organic, etc.)
5056.D6.6	Examine biosecurity measures utilized to protect the welfare of animals on a local, state, national, and global level
Domain	Agribusiness
5056.D7.1	Students explore the basic economic principles which are used in agricultural business management and industry and how they impact the daily lives of consumers.
5056.D7.2	Define and provide examples of management skills used to organize an AFNR business (e.g., management types, organizational structures, time management techniques, conducting business agreements, etc.)
5056.D7.3	Describe the meaning, importance, and economic impact of entrepreneurship
5056.D7.4	Execute supply-and-demand principles in AFNR businesses
5056.D7.5	Recognize quality AFNR business plan components that have been developed using the SMART (specific, measurable, attainable, realistic, and timely) goals
5056.D7.6	Apply agribusiness management principles in real or simulated agribusiness systems
Domain	Food Science
5056.D8.1	Students apply concepts of agriculture to the various aspects of the food science and processing industry.
5056.D8.2	Examine components of the food industry
5056.D8.3	Apply principles of nutrition, biology, microbiology, chemistry, and human behavior to the development of food products and processing industry
5056.D8.4	Select and process food products for storage, distribution, and consumption
5056.D8.5	Develop and implement procedures to ensure safety, sanitation and quality in food product and processing facilities
Domain	Biotechnology

Next Level Programs of Study

Review Document

5056.D9.1	Students explore the use of data and scientific techniques concerning living organisms in the context of AFNR.
5056.D9.2	Examine and categorize current applications and gains achieved in applying biotechnology to agriculture
5056.D9.3	Analyze the relationship and implications of bioethics, laws, and public perceptions on applications of biotechnology in agriculture (e.g., ethical, legal, social, cultural issues)
5056.D9.4	Research and summarize the evolution of biotechnology in agriculture
Domain	Power, Structure, and Technology
5056.D10.1	Students establish a basic knowledge of agricultural power, structure, technology, and physical science.
5056.D10.2	Apply physical science and engineering principles to design, implement and improve safe and efficient mechanical systems in AFNR situations
5056.D10.3	Apply technology principles in the use of agricultural technical systems
5056.D10.4	Investigate power, structure, and technological systems as they relate to the modern agriculture industry

Supervised Agriculture Experience (SAE)	
Career Cluster	Agriculture
Program of Study	
NLPS Sequence	
Course Code	5228
Course Description	<i>Supervised Agricultural Experience (SAE) is designed to provide students with opportunities to gain experience in the agriculture field(s) in which they are interested. Students will experience and apply what is learned in the classroom, laboratory and training site to real-life situations with a standards-based plan for learning. Students work closely with their agriculture teacher(s), parents and/or employers to get the most out of their SAE program. This course can be offered each year as well as during the summer session. Curriculum content and competencies need to be varied so that school year and summer session experiences are not duplicative.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 semester course, 1 credit per semester, 8 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas.
Dual Credit Status	
Additional Notes	Curriculum content and standards-based plan for learning should not be duplicated when this course is taken for multiple semesters.

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
5228.D1.1	Students shall be able to describe the importance of an SAE program and the benefits that can be obtained from a successful SAE program.
5228.D1.2	Define SAE.
5228.D1.3	Summarize the reasons for having an SAE program.
5228.D1.4	Outline the benefits of a good SAE program.
5228.D1.5	Specify the criteria which must be met to qualify as an SAE program.
5228.D1.6	Evaluate the characteristics of a good SAE program.
5228.D1.7	Explain the relationship of SAE programs to the total agricultural program.
5228.D2.1	Students shall be able to identify the opportunities for SAE projects in the community.
5228.D2.2	List the six major types of SAE programs.
5228.D2.3	Evaluate the characteristics of the SAE program areas.
5228.D2.4	Identify examples of projects in each program area.
5228.D2.5	Identify the resources/opportunities for SAE projects within the school, community, and home.
5228.D2.6	Describe local guidelines for the scope and nature of SAE programs.
5228.D3.1	Students shall be able to select goals for an SAE program.

Next Level Programs of Study

Review Document

5228.D3.2	Explain the importance of setting goals for an SAE program.
5228.D3.3	List the types of goals which could be set for an SAE program.
5228.D3.4	Explain how goals should be set for the SAE program.
5228.D4.1	Students shall outline the steps that are needed to begin an SAE program.
5228.D4.2	Evaluate personal interests for each SAE program area.
5228.D4.3	Outline how to obtain help in determining what will be needed for the SAE program.
5228.D4.4	Offer possible ways of financing the SAE program.
5228.D4.5	Describe the responsibilities involved in planning and conducting an SAE program
5228.D4.6	Write a personal annual and long-range SAE program plan.
5228.D4.7	Discuss the potential value of the selected SAE program for personal and career development.
5228.D4.8	Activate SAE program plans.
5228.D5.1	Students shall be able to keep the following records for their SAE programs: budgets, inventories, financial statements, receipts and expenditures.
5228.D5.2	Explain the importance of keeping records.
5228.D5.3	Identify the necessary forms to keep in the record book.
5228.D5.4	Explain what information is included in Ownership Business Agreements and Placement Training Agreements.
5228.D5.5	Explain what a budget is and where it is used.
5228.D5.6	Identify the information necessary to budgeting.
5228.D5.7	Explain how to complete a budget for an SAE program.
5228.D5.8	Compare and contrast a budget and a cash flow summary.
5228.D5.9	Explain the importance of keeping an accurate inventory and demonstrate how to complete a beginning inventory.
5228.D5.10	Explain the beginning financial statement and demonstrate how to construct it.
5228.D5.11	Explain the methods used to record receipts and expenditures.
5228.D5.12	Demonstrate how to total receipt and expenditure pages at the end of the month.
5228.D5.13	Identify any additional records which should be kept each month and explain their purpose.
5228.D6.1	Students shall be able to complete the forms needed to summarize, analyze, and evaluate the SAE program.
5228.D6.2	Identify the forms needed to summarize the year's records.
5228.D6.3	Explain how the cash flow summary is used.
5228.D6.4	Explain depreciation and how it is recorded.
5228.D6.5	Explain the importance of completing an ending inventory.
5228.D6.6	Identify the purposes of having a profit or loss statement and the information needed to complete it.
5228.D6.7	Explain how enterprises are analyzed in an SAE program
5228.D6.8	Identify where to find the information necessary to complete an SAE program summary.
5228.D6.9	Identify the forms which are used to evaluate and improve an SAE program.

Next Level Programs of Study

Review Document

5228.D6.10	Explain net worth and how does it reveal the progress of an SAE program.
5228.D6.11	Identify some points to evaluate on the financial statement.
5228.D6.12	Identify some ways to increase returns from an SAE program.
5228.D6.13	Identify the “problems” or weaknesses in the SAE program and select possible short- and long-range solutions.
5228.D6.14	Evaluate the overall quality and value of the SAE program.
5228.D6.15	Revise the long-range plan for the SAE program, as necessary.
5228.D6.16	Make appropriate decisions about expanding and/or diversifying the SAE program.
5228.D7.1	Students shall identify the awards that are available based on an SAE program.
5228.D7.2	Identify the awards which may be received from an SAE program.
5228.D7.3	Identify the information needed to complete award applications.
5228.D7.4	Identify the minimum SAE program requirements for FFA degrees.
5228.D8.1	Students shall develop a knowledge of job search techniques and resources available to the job seeker.
5228.D8.2	Prepare a list of contacts for employment based on personal aptitudes, traits, abilities, and interests in relation to career choices.
5228.D8.3	Identify the factors to consider when selecting resources to locate a job.
5228.D8.4	Understand how to interpret want ads and posted job vacancy announcements.
5228.D8.5	Compare and contrast public and private employment agencies.
5228.D8.6	Discuss the services provided by employment agencies.
5228.D8.7	Explain how to use placement services for a personal job search.
5228.D9.1	Students shall understand the importance of the first contact in the job search.
5228.D9.2	Identify and describe six items to be included in a resume.
5228.D9.3	List the important factors to consider when using the telephone for a job search.
5228.D9.4	Describe the important components of a resume.
5228.D9.5	Explain the use of a resume in a job search.
5228.D9.6	List the important components of a cover letter and be able to write one.
5228.D9.7	Complete sample job applications.
5228.D10.1	Students shall understand the fundamental requirements for keeping a job.
5228.D10.2	Discuss the importance of interpersonal communication, appropriate dress, and self-evaluation procedures.
5228.D10.3	Discuss the concept of professional ethics.
5228.D10.4	Understand how being able to follow directions effectively relates to job survival.
5228.D10.5	Gain an understanding of the major reasons why workers are fired from their jobs.
5228.D11.1	Students who are juniors or seniors in Agricultural Science and Business shall have the opportunity to be placed in an Agricultural Cooperative Program related to their individual SAE’s.
5228.D11.2	Gain employment on a farm, ranch or in an agribusiness which is not owned by the student’s

Next Level Programs of Study

Review Document

	parents or guardians.
5228.D11.3	A minimum of 15 hours per week will be required, 10 of the 15 required hours must be during the school week.
5228.D11.4	Demonstrate management skills by keeping satisfactory records.

Advanced Career & Technical Education, College Credit: Agriculture

Career Cluster	Agriculture
Program of Study	
NLPS Sequence	
Course Code	6130
Course Description	<i>Advanced Career and Technical Education, College Credit is a course title covering any CTE advanced course offered for credit by an accredited post-secondary institution through an adjunct agreement with a secondary school. The intent of this course is to allow students to earn college credit for courses with content that goes beyond that currently approved for high school credit. This course may be used for any dual enrollment course, including a joint program of study involving a postsecondary partnership.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 semester course, up to 3 credits per semester, may be offered for successive semesters up to 12 credits
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	A student should earn at least 3 postsecondary credits for each high school credit. Schools must have an approved Nonstandard Course Waiver on file to be eligible for CTE Funding.

Agriculture: Special Topics	
Career Cluster	Agriculture
Program of Study	
NLPS Sequence	
Course Code	6150
Course Description	<i>Agriculture: Special Topics is an extended learning experience designed to address the advancement and specialization of careers within the career cluster through the provision of a specialized course for a specific workforce need in the school's region. The learning experience is at a qualified site, and is designed to give the student the opportunity to learn and practice technical skills; while working under the direction of the appropriately licensed professional. Throughout the course, students will focus on learning about employment opportunities and obtaining the knowledge, skills and attitudes essential for success in specific occupations. Course standards and curriculum must be tailored to the specific profession, preparing students to advance in this career field, and where applicable, provide students with opportunities for certification or dual credit. Participation in a related CTSO encourages the development of leadership, communication and career related skills, and opportunities for community service.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 semester course, up to 3 credits per semester, may be offered for successive semesters up to 12 credits
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X

Program of Study	Ag Mechanical and Engineering, Agri-Science – Plants or Animals, Horticulture, Landscaping, Natural Resources, Precision Agriculture
NLPS Sequence	A
Course Code	7117
Course Description	<i>Principles of Agriculture is a two-semester course that will cover the diversity of the agricultural industry and agribusiness concepts. Students will develop an understanding of the role of agriculture in the United States and globally. Students will explore Agriculture, Food, and Natural Resource (AFNR) systems related to the production of food, fiber and fuel and the associated health, safety and environmental management systems. Topics covered in the course range from animals, plants, food, natural resources, ag power, structures and technology, and agribusiness. Participation in FFA and Supervised Agricultural Experiences (SAE) will be an integral part of this course in order to develop leadership and career ready skills.</i>

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	AFNR Systems
7117.D1.1	Describe the role of agriculture in US and global societies through the domestication and distribution of the world's important crop and livestock species.
7117.D1.2	Recognize the diversity of AFNR systems in the US and the world.
7117.D1.3	Understand the size and productivity of farms and ranches in the US and around the world.
7117.D1.4	Understand US production systems for major grain crops, including Crop Rotation Systems, Tillage Systems, Variety Selection, and Harvest and grain storage technology.
7117.D1.5	Understand US production systems for major livestock animals.
7117.D1.6	Research, examine, and discuss issues and trends that impact AFNR systems on local, state, national and global levels.
7117.D1.7	Examine technologies and analyze their impact on AFNR systems.
Domain	Agribusiness
7117.D2.1	To have students develop an understanding of how economics relates to agriculture, and how economic principles are used to analyze and solve problems in agriculture and agribusiness.
7117.D2.2	To have students understand the structure of the U.S. Agriculture and how agriculture interacts with the aggregate economic system.

Next Level Programs of Study

Review Document

7117.D2.3	To have students recognize the role of producers, input suppliers, food marketing organizations, and consumers in the U.S. Agricultural economy.
7117.D2.4	Help students understand the qualities and characteristics employers in agribusiness expect in prospective employees and how students can develop those qualities and characteristics.
7117.D2.5	Describe the diversity of jobs and careers in agricultural industries in Indiana and the US.
Domain	<i>Safety, Health, and Environment Management Systems</i>
7117.D3.1	Identify and explain the implications of required regulations to maintain and improve safety, health, and environmental management systems.
7117.D3.2	Summarize the importance of safety, health, and environmental management in the workplace.
7117.D3.3	Use appropriate protective equipment and demonstrate safe and proper use of AFNR tools and equipment.
Domain	<i>Careers</i>
7117.D4.1	Evaluate the nature and scope of AFNR systems in society and the economy
7117.D4.2	Describe career opportunities and means to achieve those opportunities in AFNR systems
7117.D4.3	Identify how key organizational structures and processes affect organizational performance and the quality of products and services
7117.D4.4	Demonstrate those qualities, attributes, and skills necessary to succeed in, or further prepare for, a chosen career while effectively contributing to society.
Domain	<i>Leadership</i>
7117.D5.1	Communicate clearly, effectively, and with reason through speaking, writing, visuals, and active listening in formal and informal settings
7117.D5.2	Recognize and explain the role of the FFA in the development of leadership, education, employability, communications, and human relations skills
7117.D5.3	Examine roles within teams, work units, departments, organizations, interorganizational systems, and the larger environment
7117.D5.4	Acquire the skills necessary to positively influence others
7117.D5.5	Develop a skill set to enhance the positive evolution of the whole person
Domain	<i>Supervised Agriculture Experience (SAE)</i>
7117.D6.1	Explain the nature of and become familiar with those terms related to an SAE program.
7117.D6.2	Explore the numerous possibilities for an SAE program which a student might develop.
7117.D6.3	Develop an individual SAE program and implementation plan for record keeping skills.
Domain	<i>Agricultural Business and Farm Management</i>
7117.D7.1	Discuss the basic principles of management and decision-making as related to both farm and non-farm agribusiness.
7117.D7.2	Apply economic principles to case studies in farm and agribusiness.
7117.D7.3	Understand the major financial statements: what they report, how to interpret and use the data and how they are connected
7117.D7.4	Know the alternatives to meeting needs when resource analysis indicates the labor input in a business needs altered. Includes review of resume, interviewing and other job application skills.
7117.D7.5	Identify the best combination of resources to use relative to the enterprises selected for the operation including; crop inputs, livestock inputs, machinery and equipment, and farmstead and buildings.

Next Level Programs of Study

Review Document

7117.D7.6	Know the alternatives for farm recordkeeping and analysis
7117.D7.7	The student will learn to work with others in a management team to combine a limited number of inputs (price, credit policy, advertising dollars, and quantity ordered) within given parameters to experience the outcomes (profits). Emphasis is placed on the practical application of financial statements for analysis.

Agriculture Power, Structure, and Technology	
Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Ag Mechanical and Engineering
NLPS Sequence	B
Course Code	5088
Course Description	<i>Agriculture Power, Structure and Technology is a two semester, lab intensive course in which students develop an understanding of basic principles of tool selection, operation, maintenance, and management of agricultural equipment in concert with the utilization of technology. Topics covered include: safety, problem-solving/troubleshooting, electricity, plumbing, concrete, carpentry, metal technology, engines, emerging technologies, leadership development, supervised agricultural experience, and career opportunities in the area of agriculture power, structure, and technology.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Agriculture
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Agriculture Safety</i>
5088.D1.1	Explain the importance of safety in agricultural mechanics
5088.D1.2	Identify and differentiate between safe and unsafe shop and work safety practices
5088.D1.3	Describe the methods utilized to implement safe work and proper use of safety equipment practices
5088.D1.4	Identify and explain the purpose of signals and symbols in agricultural safety
5088.D1.5	Explain the importance and function of an operator's manual
5088.D1.6	Identify and explain the role that various agencies play in regulating shop safety
5088.D1.7	Locate and demonstrate the proper uses of the first aid and emergency equipment found in an agricultural shop
5088.D1.8	Develop proper safety skills to use for hand and power tools
5088.D1.9	Identify the hand and power tools utilized in agricultural power, structure, and technology
Domain	<i>Tools</i>
5088.D2.1	Display the proper techniques to employ when utilizing hand and power tools
5088.D2.2	Identify and display the correct use of measuring and marking devices
5088.D2.3	Show the correct procedures to follow when preparing to grind, sharpen, and recondition equipment and hand tools
5088.D2.4	Demonstrate a knowledge and understanding of metric to standard measurement conversions
Domain	<i>Electrical Technology</i>
5088.D3.1	Define basic electrical terminology and identify and explain the basic principles of electricity and differentiate between amps, ohms, volts, and watts
5088.D3.2	Recognize and explain schematics and construct wiring circuits
5088.D3.3	Demonstrate safe wiring practices and basic wiring skills
5088.D3.4	Show the methods used to make proper splices, connections and soldering, soldering
5088.D3.5	Explain and demonstrate the methods used to measure electrical circuits for voltage, amperage, resistance, and wattage
5088.D3.6	Solve multi-step problems to install electrical circuits, switching devices, and appliances
5088.D3.7	Justify the need to install ground-fault circuit interrupters Keep this standard as students need to know when to install one in wet locations

Next Level Programs of Study

Review Document

5088.D3.8	Explore and utilize electric motors and controls
Domain	Mechanical Technology
5088.D4.1	Perform mathematical calculations to determine the mechanical advantage of simple machines in AFNR related mechanical systems.
5088.D4.2	Service filtration systems and maintain fluid levels on equipment, machinery, and power units in accordance with operator's manuals.
5088.D4.3	Perform pre-operation inspections, start-up & shut-down procedures on equipment, machinery and power units as specified in owner's manuals
Domain	Engine Technology
5088.D5.1	Identify and explain the function and maintenance of integral engine components
5088.D5.2	Compare and contrast a 4 stroke-cycle, 2 stroke-cycle, and diesel engine
5088.D5.3	Explain and demonstrate proficiency in the use of measuring tools and test instrument
5088.D5.4	Select and use lubricants by proper classification
5088.D5.5	Understand basic fundamentals and troubleshooting for fuel, cooling, electrical, and intake and exhaust systems functions
5088.D5.6	Analyze and explain how the components of internal combustion engines interrelate during operation.
5088.D5.7	Utilize technical manuals and diagnostic tools to determine service and repair needs of spark-and-compression internal combustion engines used in AFNR power, structural and technical systems.

Agriculture Structures Fabrication and Design	
Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Ag Mechanical and Engineering
NLPS Sequence	C
Course Code	7112
Course Description	<i>Agricultural Structures Fabrication and Design is a two-semester course that focuses on metal work, and agricultural structures. This course will allow students to develop skills in welding and metalworking, construction, fabrication, machine components and design while incorporating the engineering design process. Students will also cover safety topics for each area while demonstrating appropriate health and safety standards.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Agriculture
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective credits for all diplomas Counts as a quantitative reasoning course*
Dual Credit Status	X

7112.D3.4	Research and demonstrate appropriate use of chemical pesticides and fertilizers.
7112.D3.5	Research and demonstrate appropriate use of chemical pesticides and fertilizers.
Domain	Construction Technology
7112.D4.1	Apply scale measurement and dimension to develop sketches of agricultural structures.
7112.D4.2	Construct plans for agricultural structures using current technology (e.g., drafting software, computer-aided design, etc.).
7112.D4.3	Analyze a project plan to prepare a bill of materials and an estimate of material costs.
7112.D4.4	Complete a building site analysis checklist to select an ideal building site.
7112.D4.5	Calculate costs associated with the repair and replacement of wood and/or metal components an AFNR structure.
7112.D4.6	Calculate the cost of a water system in an AFNR structure (e.g., copper, PVC, etc.).
7112.D4.7	Calculate volume for concrete projects.
7112.D4.8	Assess and analyze the electrical requirements of an AFNR structure.

Agriculture Mechanization and Technology Capstone	
Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Ag Mechanical and Engineering
NLPS Sequence	D
Course Code	7228
Course Description	<i>The Agriculture Mechanization and Technology Capstone course builds upon the knowledge and skills developed in the Principles, Ag Power, Structures and Technology, Agricultural Structures Fabrication and Design courses by developing advanced skills that students can apply to the field. Students enrolled in this course will participate in lab activities involving agricultural equipment such as fueled power engines, electrical motors, pneumatic and hydraulic systems, etc. Students will be instructed on the operation, maintenance, repair, engineering and design of the agricultural mechanics and technology systems. As a capstone course, students should have the opportunity to apply their knowledge and use skills through an intensive work-based learning experience.</i>
Prerequisite(s)/ Corequisite(s)	Ag Power, Structures and Technology; Ag Structures Fabrication and Design (-or- Precision Ag)

7228.D1.5	Apply physical science and engineering principles to design, implement and improve safe and efficient mechanical systems in AFNR situations.
7228.D1.6	Apply the scientific method to devise strategies to improve the efficiency of operation of AFNR related mechanical systems.
7228.D1.7	Devise and document processes to safely implement and evaluate the safe use of AFNR related tools, machinery, and equipment.
Domain	Control, Monitoring, Geospatial and Other Technologies
7228.D2.1	Apply computer and other technologies (e.g., robotics, CNC, UAS, etc.) to solve problems and increase the efficiency of AFNR systems.
7228.D2.2	Solve problems and calculate changes in efficiency using computer technologies for AFNR systems.
7228.D2.3	Solve problems and evaluate changes in efficiency and create recommendations for the use of technologies in AFNR systems.
7228.D2.4	Prepare and/or use electrical drawings to design, install and troubleshoot electronic control systems in AFNR settings.
7228.D2.5	Design schematic drawings for electrical control systems used in AFNR systems.
7228.D2.6	Troubleshoot electrical control system performance problems found in AFNR power, structural and technical systems.
7228.D2.7	Develop and implement AFNR power, structural, and technical control systems using programmable logic controllers (PLC) and/or other computer-based systems.
7228.D2.8	Apply geospatial technologies to solve problems and increase the efficiency of AFNR systems.
7228.D2.9	Analyze and interpret trends in data collected utilizing geospatial technologies.
7228.D2.10	Install, maintain and service instrumentation and equipment used for precision technologies (i.e., GPS receivers, yield monitors, remote sensors, etc.) used in AFNR systems.
Domain	Hydraulics and Pneumatics
7228.D3.1	Analyze and interpret hydraulic and pneumatic system symbols and diagrams used in AFNR power, structural and technical systems.
7228.D3.2	Utilize speed, torque, and power measurements to calculate efficiency in power transmission systems used in AFNR power, structural and technical systems.
7228.D3.3	Assess and analyze vehicle and machinery performance related to suspension and steering systems used in AFNR power, structural and technical systems.

Review Document

	business needs altered. Includes review of resume, interviewing and other job application skills.
7117.D7.5	Identify the best combination of resources to use relative to the enterprises selected for the operation including; crop inputs, livestock inputs, machinery and equipment, and farmstead and buildings.
7117.D7.6	Know the alternatives for farm recordkeeping and analysis
7117.D7.7	The student will learn to work with others in a management team to combine a limited number of inputs (price, credit policy, advertising dollars, and quantity ordered) within given parameters to experience the outcomes (profits). Emphasis is placed on the practical application of financial statements for analysis.

Animal Science	
Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Agri-Science – Plants or Animals
NLPS Sequence	B
Course Code	5008
Course Description	<i>Animal Science is a two-semester course that provides students with an overview of the animal agriculture industry. Students participate in a large variety of activities and laboratory work including real and simulated animal science experiences and projects. All areas that the students study may be applied to both large and small animals. Topics to be covered in the course include: history and trends in animal agriculture, laws and practices relating to animal agriculture, comparative anatomy and physiology of animals, biosecurity threats and interventions relating to animal and human safety, nutrition, reproduction, careers, leadership, and supervised agricultural experiences relating to animal agriculture.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Agriculture
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas Fulfills a science course requirement for all diplomas Fulfills a physical science requirement for General Diploma
Dual Credit Status	X (PCL/CTE)

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Historic and Current Trends in the Animal Systems Industry</i>
5008.D1.1	Students evaluate the implications of animal origin and analyze common animal production methods from both producer and global perspectives.
5008.D1.2	Evaluate and describe characteristics of animals that developed in response to the animal's environment and led to their domestication.
5008.D1.3	Describe the historical and scientific developments of different animal industries and summarize the products, services and careers associated with each.
5008.D1.4	Explain the role of animal agriculture within the food system in meeting food and nutritional security.
5008.D1.5	Analyze the impact of animal production methods on end product qualities (e.g., price, sustainability, marketing, labeling, animal welfare, etc.)
5008.D1.6	Calculate costs of marketing versus predicted increases in sales
5008.D1.7	Analyze and evaluate the accuracy and effectiveness of records used in an animal system business.
5008.D1.8	Analyze the structure of laws governing animal industries, international trade, and animal production policies.
5008.D1.9	Analyze the local and global impact of sustainable animal agriculture practices on human and environmental systems.
Domain	<i>Animal Husbandry and Welfare</i>
5008.D2.1	Students demonstrate management techniques that ensure animal welfare and analyze procedures to ensure animal safety while maintaining safe animal products.
5008.D2.2	Design production plans that assure the welfare of animals and prevent abuse or mistreatment

5008.D2.3	Analyze and document animal welfare procedures used to ensure safety and maintain low stress when moving and restraining animals.
5008.D2.4	Analyze and document animal husbandry practices and their impact on animal welfare.
5008.D2.5	Utilize tools, technology, and equipment to perform animal husbandry and welfare tasks.
5008.D2.6	Analyze consumer concerns with animal production practices relative to human health.
5008.D2.7	Analyze and summarize the impact of animal trace-back capabilities on producers and consumers.
Domain	Animal Nutrition
5008.D3.1	Students analyze the nutritional needs of animals and evaluate feed rations for effectiveness.
5008.D3.2	Differentiate between nutritional requirements of animals in different growth stages and production systems (e.g., growth, maintenance, gestation, natural, organic, etc.).
5008.D3.3	Correlate a species' nutritional needs to feedstuffs that could meet those needs.
5008.D3.4	Determine the relative nutritional value of feedstuffs by evaluating their general quality and condition.
5008.D3.5	Appraise the adequacy of feed rations using data from the analysis of feedstuffs, animal requirements and performance.
5008.D3.6	Compare and contrast methods that utilize feed additives and growth promotants with production practices that do not, (e.g., organic versus conventional production methods).
5008.D3.7	Utilize tools and equipment to perform animal nutrition tasks.
5008.D3.8	Analyze and apply information from a feed label and feeding directions to feed animals.
5008.D3.9	Analyze technologies used to provide animal nutrition and summarize their potential benefits and consequences.
Domain	Animal Reproduction
5008.D4.1	Students evaluate animals for reproduction readiness and soundness and apply scientific principles to breeding programs.
5008.D4.2	Analyze the functions of major organs in the male and female reproductive systems.
5008.D4.3	Assess and describe factors that lead to reproductive maturity.
5008.D4.4	Evaluate reproductive problems that occur in animals.
5008.D4.5	Compare and contrast the use of genetically superior animals in the production of animals and animal products.
5008.D4.6	Demonstrate how to determine probability trait inheritance in animals.
5008.D4.7	Analyze how DNA analysis can detect genetic defects in breeding stock
5008.D4.8	Analyze the care needs for breeding stock in each stage of growth.
5008.D4.9	Calculate the potential economic benefits of natural versus artificial breeding methods.
5008.D4.10	Develop an understanding of artificial insemination, embryo transfer, and cloning.
5008.D4.11	Analyze the processes of major reproductive management practices, including estrous synchronization, superovulation, flushing and embryo transfer.
5008.D4.12	Compare and contrast quantitative breeding value differences between genetically superior animals and animals of average genetic value.
Domain	Environmental Considerations of Animals
5008.D5.1	Design animal housing, equipment, and handling facilities for the major systems of animal production.
5008.D5.2	Critique designs for an animal facility and prescribe alternative layouts and adjustments for the safe, sustainable and efficient use of the facility.
5008.D5.3	Analyze the use of modern equipment, technology and handling facility procedures and

Next Level Programs of Study

Review Document

	determine if they enhance the safe, economic, and sustainable production of animals.
5008.D5.4	Analyze animal facilities to determine if standards have been met.
5008.D5.5	Analyze the structure of laws pertaining to animal systems.
Domain	Anatomy and Physiology
5008.D6.1	Classify animals according to taxonomic classification systems and use (e.g., agricultural, companion, etc.).
5008.D6.2	Explain how animals are classified using a taxonomic classification system.
5008.D6.3	Appraise and evaluate the economic value of animals for various applications in the agriculture industry.
5008.D6.4	Analyze the visual characteristics of an animal or animal product and select correct classification terminology when referring to companion and production animals.
5008.D6.5	Apply principles of comparative anatomy and physiology to uses within various animal systems.
5008.D6.6	Analyze the functions of each animal cell structure.
5008.D6.7	Analyze the processes of meiosis and mitosis in animal growth, development, health, and reproduction.
5008.D6.8	Compare and contrast animal cells, tissues, organs, body system types and functions among animal species.
5008.D6.9	Select and train animals for specific purposes and maximum performance based on anatomy and physiology.
5008.D6.10	Compare and contrast desirable anatomical and physiological characteristics of animals within and between species.
5008.D6.11	Compare and contrast procedures to sustainably and efficiently develop an animal to reach its highest performance potential with respect to its anatomical and physiological characteristics.
5008.D6.12	Evaluate and select products from animals based on industry standards.
Domain	Animal Health and Safety
5008.D7.1	Students design programs to prevent animal diseases, parasites and other disorders and analyze biosecurity measures utilized to ensure animal welfare.
5008.D7.2	Describe and demonstrate the proper use and function of specific tools and technology related to animal health management.
5008.D7.3	Perform simple health-check evaluations on animals and practice basic emergency response procedures related to animals.
5008.D7.4	Identify and describe common illnesses and disorders of animals based on symptoms and problems caused by wounds, diseases, parasites and physiological disorders.
5008.D7.5	Research and analyze data to evaluate preventive measures for controlling and limiting the spread of diseases, parasites, and disorders among animals.
5008.D7.6	Assess the safety and effectiveness of facilities and equipment used for surgical and nonsurgical veterinary treatments and procedures.
5008.D7.7	Analyze procedures at the local, state, and national levels to ensure biosecurity of the animal industry.
5008.D7.8	Analyze the health risk of different zoonotic diseases to humans and identify prevention methods.
Domain	Environmental Impacts of Animal Agriculture
5008.D8.1	Students design and evaluate environments for animals to promote animal health and husbandry.

Next Level Programs of Study

Review Document

5008.D8.2	Assess the effectiveness of methods of reducing the effects of animal agriculture on the environment.
5008.D8.3	Critique the reliability and validity of evidence presented to support claims regarding the effects of environmental conditions on animal populations and performance (e.g., population changes, emerging species, extinction, etc.).
5008.D8.4	Implement and evaluate the effectiveness of methods to ensure optimal environmental conditions for animals.
Domain	Biotechnology in Animal Agriculture
5008.D9.1	Investigate and explain the roles and issues of biotechnology in animal agriculture.
5008.D9.2	Research and summarize the evolution of biotechnology in animal agriculture.
5008.D9.3	Assess and summarize current work in biotechnology being done to add value to animal agriculture and society.
5008.D9.4	Distinguish between current and emerging applications of biotechnology in agriculture.
5008.D9.5	Compare and contrast the benefits and risks of biotechnology compared with alternative approaches to improving agriculture.
5008.D9.6	Assess and summarize the role and scope of agencies that regulate biotechnology.
5008.D9.7	Research and summarize public perceptions of biotechnology in agriculture.
5008.D9.8	Assess and argue the pros and cons of transgenic species.
5008.D9.9	Research genetic engineering and CRISPR procedures used in production of animal species.
5008.D9.10	Assess the benefits, risks, and opportunities associated with using biotechnology to promote animal health.
Domain	Careers
5008.D10.1	Students examine the scope of career opportunities in and the importance of agriculture to the economy.
5008.D10.2	Evaluate the nature and scope of animal sciences in agriculture, society, and the economy
5008.D10.3	Describe career opportunities and means to achieve those opportunities in animal sciences
5008.D10.4	Identify how key organizational structures and processes affect organizational performance and the quality of products and services
5008.D10.5	Demonstrate those qualities, attributes, and skills necessary to succeed in, or further prepare for, a chosen career while effectively contributing to society
Domain	Leadership
5008.D11.1	Students validate the necessity of leadership skills development in conjunction with participation in The National FFA Organization (FFA) as a critical component to a well-rounded agricultural education.
5008.D11.2	Communicate clearly, effectively, and with reason through speaking, writing, visuals, and active listening in formal and informal settings
5008.D11.3	Recognize and explain the role of the FFA in the development of leadership, education, employability, communications, and human relations skills
5008.D11.4	Examine roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment
5008.D11.5	Acquire the skills necessary to positively influence others
5008.D11.6	Develop a skill set to enhance the positive evolution of the whole person
Domain	Supervised Agriculture Experience
5008.D12.1	Students validate the necessity of a Supervised Agricultural Experience (SAE) program as a

Next Level Programs of Study

Review Document

	critical component to a well-rounded agricultural education.
5008.D12.2	Explain the nature of and become familiar with those terms related to an SAE program
5008.D12.3	Explore the numerous possibilities for an SAE program which a student might develop
5008.D12.4	Develop an individual SAE program and implementation plan for record keeping skills

Plant and Soil Science	
Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Agri-Science – Plants or Animals
NLPS Sequence	B
Course Code	5170
Course Description	<i>Plant and Soil Science a two semester course that provides students with opportunities to participate in a variety of activities including laboratory and field work. Coursework includes hands-on learning activities that encourage students to investigate areas of plant and soil science. Students are introduced to the following areas of plant and soil science: plant growth, reproduction and propagation, photosynthesis and respiration, diseases and pests of plants and their management, biotechnology, the basic components and types of soil, soil tillage, and conservation.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Agriculture
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas Fulfills a science course requirement for all diplomas Fulfills a Physical Science requirement for the general diploma
Dual Credit Status	X (PCL/CTE)

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Classifying
5170.D1.1	Students classify agricultural plants according to taxonomy systems.
5170.D1.2	Explain systems used to classify plants
5170.D1.3	Compare, contrast, and classify agricultural plants according to the hierarchical classification system, life cycles, plant use and as monocotyledons or dicotyledons
5170.D1.4	Describe the morphological characteristics used to identify agricultural plants
Domain	Plant Reproduction
5170.D2.1	Students analyze the germination of seeds and plant reproduction to successfully grow and propagate plants.
5170.D2.2	Explain pollination, cross-pollination and self-pollination of flowering plants
5170.D2.3	Diagram the process of plant fertilization
5170.D2.4	Design and implement a plan to control the pollination of plants
5170.D2.5	Demonstrate planting techniques and provide favorable conditions for seed germination
5170.D2.6	Conduct tests associated with seed germination rates, viability, and vigor
Domain	Environmental Factors
5170.D3.1	Students evaluate the environmental factors affecting plant growth to productively cultivate plants.
5170.D3.2	Describe the effects air, temperature, and water have on plant metabolism and growth
5170.D3.3	Determine the optimal air, temperature and water conditions for plant growth
5170.D3.4	Design, implement and evaluate a plan to maintain optimal conditions for plant growth
5170.D3.5	Describe the qualities of light that affect plant growth
5170.D3.6	Describe and evaluate plant responses to light color, intensity, and duration
5170.D3.7	Students differentiate plant cell parts and functions as they apply to cell physiology and reproduction.
5170.D3.8	Identify structures in a typical plant cell and summarize the function of plant cell organelles
5170.D3.9	Diagram a typical plant cell and identify plant cell organelles and their functions
5170.D3.10	Compare and contrast mitosis and meiosis
Domain	Plant Structure and Function
5170.D4.1	Students establish knowledge of plant parts and functions to successfully cultivate plants for

Next Level Programs of Study

Review Document

	the food, fiber, and natural resource industry.
5170.D4.2	Identify the components, types, and functions of plant roots
5170.D4.3	Identify the components and the functions of plant stems
5170.D4.4	Describe the processes of translocation
5170.D4.5	Discuss external leaf morphology and the functions of leaves
5170.D4.6	Explain how leaves capture light energy and allow for the exchange of gases
Domain	Energy Synthesis
5170.D5.1	Students apply and adapt photosynthesis and respiration in plants to make decisions on plant production.
5170.D5.2	Explain the basic process of photosynthesis and its importance to life on Earth
5170.D5.3	Explain requirements necessary for photosynthesis to occur and identify the products and byproducts of photosynthesis
5170.D5.4	Distinguish between the light-dependent and light-independent reactions that occur during photosynthesis and apply the knowledge to plant management
5170.D5.5	Explain cellular respiration and its importance to plant life
5170.D5.6	Explain factors that affect cellular respiration and identify the products and byproducts of cellular respiration
Domain	Plant Pests
5170.D6.1	Identify types of plant pests and disorders
5170.D6.2	Identify major local weeds, insect pests and infectious and noninfectious plant diseases
5170.D6.3	Describe damage caused by plant pests and diseases
5170.D6.4	Diagram the life cycles of major plant pests and diseases
5170.D6.5	Describe pest control strategies associated with integrated pest management
5170.D6.6	Describe types of pesticide controls and modes of action
5170.D6.7	Employ pest management strategies to manage pest populations, assess the effectiveness of the plan and adjust the plan as needed
5170.D6.8	Explain risks and benefits associated with the materials and methods used in plant pest management
5170.D6.9	Evaluate environmental and consumer concerns regarding pest management strategies
Domain	Sustainable Agriculture Systems
5170.D7.1	Students apply principles and practices of cropping systems to plant production to recommend the ideal system for their local community.
5170.D7.2	Identify the current topics in crop production and the role those topics play in the management & production of agronomic crops
5170.D7.3	Assess the importance of long-term impacts on sustainable agriculture systems in relation to global food security
5170.D7.4	Evaluate the various methods of land preparation and seeding based on soil and plant characteristics
5170.D7.5	Research and summarize production methods focused on soil management (e.g., crop rotation, cover crops, etc.)
5170.D7.6	Analyze the alignment of modern technologies used in production systems (e.g., precision agriculture, gene editing technologies, etc.)
5170.D7.7	Describe sustainable agriculture practices and how they relate to conventional agricultural practices
5170.D7.8	Compare and contrast the differing management techniques related to environmental factors

Next Level Programs of Study

Review Document

	& their effect on plants.
5170.D7.9	Evaluate practices in support of sustainable agriculture
Domain	Crop Fertilization
5170.D8.1	Students connect soil nutrients and soil management to promote healthy plant growth.
5170.D8.2	Identify the essential nutrients in the soil for plant growth and development and their major functions
5170.D8.3	Calculate the content of N-P-K in a fertilizer container from information on the package and calculate the amount of nitrogen needed for an acre of a crop using a selected nitrogen source
5170.D8.4	Describe nutrient deficiency symptoms and recognize environmental causes of nutrient deficiencies
Domain	Soil Properties
5170.D9.1	Students analyze the physical properties of soil to determine crop selection, cropping drainage, and soil conservation.
5170.D9.2	Explain the process of soil formation through weathering
5170.D9.3	Demonstrate techniques used to identify soil types
5170.D9.4	Report examples of how humans are dependent upon soil, directly or indirectly, for their food, clothing, and shelter
5170.D9.5	Describe how the basic components and physical qualities of a soil influence its possible uses
Domain	Soil Water
5170.D10.1	Students evaluate soil and water relationships to encourage optimum plant growth.
5170.D10.2	Identify the categories of soil water
5170.D10.3	Discuss how soil drainage and water holding capacity can be improved
5170.D10.4	Assess the physical qualities of the soil that determine its potential for filtration of groundwater supplies and the likelihood of flooding
5170.D10.5	Describe properties of watersheds and identify the boundaries of local watersheds
Domain	Soil Conservation Practices
5170.D11.1	Students apply and adapt the soil conservation practices necessary to keep soil productive.
5170.D11.2	Propose management practices and cropping systems when given features and land capabilities that would help improve the usefulness of the land
5170.D11.3	Analyze effects of water and mechanical practices on erosion
5170.D11.4	Explain how the programs and services provided by conservation agencies contribute to successful soil management
5170.D11.5	Calculate soil loss using current models
5170.D11.6	Measure slope and explain the relationship between steepness of slope and erosion
Domain	Soil Fertility and Health
5170.D12.1	Students will connect physical, chemical, and biological properties that make up soil health to impacts on yield and water quality.
5170.D12.2	Assess and describe the short- and long- term effects production methods have on soil
5170.D12.3	Identify key indicators of soil health
5170.D12.4	Describe the biodiversity (earthworms, nematodes, and microorganisms) found in soil and the contribution to soil health
5170.D12.5	Describe factors that contribute to soil compaction and its effects on plants and productivity
5170.D12.6	Contrast pH and cation exchange capacity between different soil types
Domain	Careers

Next Level Programs of Study

Review Document

5170.D13.1	Students examine the scope of career opportunities in, and the importance of, agriculture to the economy.
5170.D13.2	Evaluate the nature and scope of plant and soil sciences in agriculture, society, and the economy
5170.D13.3	Describe career opportunities and means to achieve those opportunities in plant and soil sciences
5170.D13.4	Identify how key organizational structures and processes affect organizational performance and the quality of products and services
5170.D13.5	Demonstrate those qualities, attributes, and skills necessary to succeed in, or further prepare for, a chosen career while effectively contributing to society
Domain	Leadership
5170.D14.1	Students validate the necessity of leadership skills development in conjunction with participation in The National FFA Organization (FFA) as a critical component to a well-rounded agricultural education.
5170.D14.2	Communicate clearly, effectively, and with reason through speaking, writing, visuals, and active listening in formal and informal settings
5170.D14.3	Recognize and explain the role of the FFA in the development of leadership, education, employability, communications, and human relations skills
5170.D14.4	Examine roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment
5170.D14.5	Acquire the skills necessary to positively influence others
5170.D14.6	Develop a skill set to enhance the positive evolution of the whole person
Domain	Supervised Agriculture Experience
5170.D15.1	Students validate the necessity of a Supervised Agricultural Experience (SAE) program as a critical component to a well-rounded agricultural education.
5170.D15.2	Explain the nature of and become familiar with those terms related to an SAE program
5170.D15.3	Explore the numerous possibilities for an SAE program which a student might develop
5170.D15.4	Develop an individual SAE program and implementation plan for record keeping skills

Advanced Life Science, Plants and Soils (L)	
Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Agri-Science – Plants or Animals
NLPS Sequence	C
Course Code	5074
Course Description	<i>Advanced Life Science: Plants and Soils is a two semester course that provides students with opportunities to participate in a variety of activities including laboratory work. Students study concepts, principles, and theories associated with plants and soils. Knowledge gained enables them to better understand the workings of agricultural and horticultural practices. They recognize how plants are classified, grow, function, and reproduce. Students explore plant genetics and the use of plants by humans. They examine plant evolution and the role of plants in ecology. Students investigate, through laboratories and fieldwork, how plants function and</i>

Review Document

Domain	Taxonomy and Classification
5074.D1.1	Students analyze the classification of organisms to understand diversity and the roles of each plant organism.
5074.D1.2	Explain the classification of organisms based on a hierarchical taxonomy
5074.D1.3	Distinguish the five kingdoms of organisms, and more specific taxonomy of agricultural species of plants
5074.D1.4	Identify plants using a taxonomic key
5074.D1.5	Develop a detailed knowledge base in plant biology (this includes cell biology, physiology, morphology, anatomy, genetics, classification, evolution and ecology of plants)
Domain	Molecules and Plant Cells
5074.D2.1	Students connect basic concepts of chemistry, biochemistry, and biological functions as they relate to the field of agriculture science.
5074.D2.2	Compare and contrast molecules
5074.D2.3	Explain the concepts of monomers and polymers
5074.D2.4	Compare and contrast the different types of chemical bonds
5074.D2.5	Identify and differentiate between common groups of molecules
5074.D2.6	Compare and contrast animal, plant, and bacterial cells at the biological and chemical levels
5074.D2.7	Describe biochemistry and functions of plant cells, membranes, organelles, and cell walls
5074.D2.8	Identify and demonstrate the principles of genetic expression within a genome
5074.D2.9	Describe and compare cellular respiration in plants and animals
5074.D2.10	Evaluate the impact of photosynthesis and cellular respiration and the factors that affect them on plant management, culture and production problems.
Domain	Development and Function of Plant Systems
5074.D3.1	Students confirm that plants have a variety of cells and tissues with specific functions and systems to illustrate the relationship between certain specific chemicals in their processes.
5074.D3.2	Apply the knowledge of cell differentiation and the functions of the major types of cells to plant systems
5074.D3.3	Define primary and secondary growth and the role of the apical meristem on regulating growth.
5074.D3.4	Relate the active and passive transport of minerals into and through the root system to plant nutrition
5074.D3.5	Devise plans for plant management that applies knowledge of transpiration, translocation, and assimilation on plant growth.
5074.D3.6	Explain how leaves capture light energy and allow for the exchange of gases
5074.D3.7	Identify the different types of flowers, the components of a flower, the functions of a flower and the functions of lower components
5074.D3.8	Identify the macro and micronutrients essential for plant growth and describe some of their functions in plants
5074.D3.9	Select and defend the use of specific plant growth regulators to produce desired responses from plants
Domain	Plant Genetics – Chemistry, Expression, and Modification
5074.D4.1	Students apply concepts of the roles of t-RNA, m-RNA, DNA, other chemistry of genes and genomes, and a plant's environment in reproduction and expression to understand how plants reproduce and can be modified genetically.
5074.D4.2	Explain the structures of DNA and RNA

Next Level Programs of Study

Review Document

5074.D4.3	Explain the molecular basis for heredity and the tools and techniques used in DNA and RNA manipulations
5074.D4.4	Analyze factors that influence gene expression
5074.D4.5	Validate how genotype influences phenotype
5074.D4.6	Research the term genome
5074.D4.7	Compare and contrast DNA replication in mitosis and meiosis
5074.D4.8	Compare the different methods of genetic modification of crops throughout the history of domestication.
5074.D4.9	Evaluate the impact of plant breeding and other forms of genetic modification of crops on production practices, both locally and globally.
5074.D4.10	Evaluate and explain how scientists use the scientific method to develop new plant crop varieties
5074.D4.11	Evaluate methods of genetic modification for their short- and long-term benefits and risks
5074.D4.12	Devise and support an argument in favor of or against an ethical issue associated with biotechnology in agriculture
Domain	<i>Evolutionary Trends and Ecology</i>
5074.D5.1	Students evaluate a variety of environmental factors to understand how they contribute to the development and survival of plant species.
5074.D5.2	Explain the significance of genetic diversity to evolution.
5074.D5.3	Compare and contrast natural selection with artificial selection
5074.D5.4	Compare and contrast adaptations of plants for survival and seed dispersal in different environmental conditions
5074.D5.5	Explain how climate is a factor in the selection of both crop and ornamental plants
5074.D5.6	Define hybridization, and describe how it can lead to the development of unique species and varieties
5074.D5.7	Describe methods of producing transgenic plants and ways in which they are used
5074.D5.8	Explain the roles of plants in the global carbon cycle
5074.D5.9	Describe the nitrogen and phosphorus cycles
5074.D5.10	Describe various approaches to control plant and animal pests
5074.D5.11	Explain how plants sense changes in their environment and respond
5074.D5.12	Develop a familiarity with plants and sharpen observational skills and appreciate their role in human affairs.
Domain	<i>Physical Environment: Soils – Formation, Nutrients, and Chemistry</i>
5074.D6.1	Students evaluate different soil types to understand how they are formed, determined and how they compare to each other.
5074.D6.2	Define and describe the role of water holding capacity and hydraulic conductivity for and how that influences irrigation and drainage practices.
5074.D6.3	Describe how decomposers affect organic material formation
5074.D6.4	Describe the inverse relationship between drainage and oxygen availability
5074.D6.5	Compare and contrast ion exchange capacity in natural soils and artificial media
5074.D6.6	Define anion and cation, and describe their roles in soil science
5074.D6.7	Describe the physical and chemical structures and functions of soil components including sand, silt, clay, and organic matter
5074.D6.8	Identify and describe the various soil horizons and their roles
5074.D6.9	Explain the physical, chemical, geological, and biological processes of soil formation

Next Level Programs of Study

Review Document

5074.D6.10	Discuss the effects of soil pH on mineral availability and toxicity and apply necessary changes for maximum fertility.
5074.D6.11	Interpret laboratory analyses of soil and tissue samples and prescribe applications based on the results.
5074.D6.12	Identify, calculate, and calibrate appropriate fertilizer applications to meet plant nutrient needs.
Domain	Careers
5074.D7.1	Students examine the scope of career opportunities in, and the importance of, agriculture to the economy.
5074.D7.2	Evaluate the nature and scope of animal sciences in agriculture, society, and the economy
5074.D7.3	Describe career opportunities and means to achieve those opportunities in plant and soil sciences
5074.D7.4	Identify how key organizational structures and processes affect organizational performance and the quality of products and services
5074.D7.5	Demonstrate those qualities, attributes, and skills necessary to succeed in, or further prepare for a chosen career while effectively contributing to society
Domain	Leadership
5074.D8.1	Students validate the necessity of leadership skills development in conjunction with participation in The National FFA Organization (FFA) as a critical component to a well-rounded agricultural education.
5074.D8.2	Communicate clearly, effectively, and with reason through speaking, writing, visuals, and active listening in formal and informal settings
5074.D8.3	Recognize and explain the role of the FFA in the development of leadership, education, employability, communications, and human relations skills
5074.D8.4	Examine roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment
5074.D8.5	Acquire the skills necessary to positively influence others
5074.D8.6	Develop a skill set to enhance the positive evolution of the whole person
Domain	Supervised Agriculture Experience
5074.D9.1	Students validate the necessity of a Supervised Agricultural Experience (SAE) program as a critical component to a well-rounded agricultural education.
5074.D9.2	Explain the nature of and become familiar with those terms related to an SAE program
5074.D9.3	Explore the numerous possibilities for an SAE program which a student might develop
5074.D9.4	Develop an individual SAE program and implementation plan for record keeping skills

Advanced Life Science: Foods	
Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Agri-Science – Plants or Animals
NLPS Sequence	C
Course Code	5072
Course Description	<i>Advanced Life Science: Foods is a course that provides students with opportunities to participate in a variety of activities including laboratory work. This is a standards-based,</i>

Next Level Programs of Study

Review Document

	<i>interdisciplinary science course that integrates biology, chemistry, and microbiology in the context of foods and the global food industry. Students enrolled in this course formulate, design, and carry out food-base laboratory and field investigations as an essential course component. Students understand how biology, chemistry, and physics principles apply to the composition of foods, the nutrition of foods, food and food product development, food processing, food safety and sanitation, food packaging, and food storage. Students completing this course will be able to apply the principles of scientific inquiry to solve problems related to biology, physics, and chemistry in the context of highly advanced industry applications of foods.</i>	
Prerequisite(s)/ Corequisite(s)	Principles of Agriculture	
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum	
Counts Toward	Counts as an elective or directed elective for all diplomas Fulfills a science requirement for all diplomas Counts as a quantitative reasoning course	
Dual Credit Status	X (PCL/CTE)

Credential	
Liberal Arts/Sciences Requirements	
Promoted Certifications	
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Safety, Sanitation, and Quality of Food</i>
5072.D1.1	Students analyze and manage operational and safety procedures in food product and processing facilities.
5072.D1.2	Construct plans that ensure implementation of safety programs for food products, processing facilities, and the environment.
5072.D1.3	Devise and implement strategies to maintain equipment and facilities for food products and processing systems.
5072.D1.4	Describe the importance of performing quality-assurance tests on food products and applying corrective procedures as needed.
5072.D1.5	Demonstrate procedures for safe handling of food products.
5072.D1.6	Develop and implement operating procedures aligned with current industry regulations.
5072.D1.7	Students apply food safety and sanitation procedures in the handling and processing of food products to ensure food quality.
5072.D1.8	Identify sources of contamination in food products and/or processing facilities and develop ways to eliminate contamination
5072.D1.9	Examine, interpret, and report outcomes from safe handling procedures and results from quality assurance tests.
5072.D1.10	Interpret and evaluate results of quality assurance tests on food products and examine steps to implement corrective procedures.
5072.D1.11	Conduct and interpret microbiological tests for food-borne pathogens.
5072.D1.12	Characterize, identify, and research the physical, chemical, and biological properties of microbes as they pertain to food spoilage and foodborne illness.
5072.D1.13	Students apply food safety procedures when storing food products to ensure food quality.
5072.D1.14	Prepare plans that ensure implementation of proper food storage procedures.
5072.D1.15	Implement and evaluate the effectiveness of a documented procedure used within a food product and processing facility and recommend improvements.
Domain	<i>Nutrition, Biology, Microbiology, and Chemistry of Food Products</i>
5072.D2.1	Students apply principles of nutrition, biology, microbiology, and chemistry to develop food products that provide a safe, wholesome, and nutritious food supply for local and global food systems.
5072.D2.2	Analyze the physical, chemical, and biological properties of food products (e.g. oxidation, rancidity, hydrogenation, enzymatic browning, structures of essential nutrients, etc.) to evaluate nutritional value.
5072.D2.3	Construct methods to design a healthy daily food guide for a variety of nutritional value.
5072.D2.4	Design and conduct experiments to determine the chemical and physical properties of food products.

Next Level Programs of Study

Review Document

5072.D2.5	Devise and apply strategies to determine what additives are utilized and why they are included in a variety of food products (artificial sweeteners, preservatives, color, etc.).
5072.D2.6	Develop and implement plans to engineer new food items using biochemistry concepts.
5072.D2.7	Describe enzymes, the changes they cause in foods, and the physical and chemical parameters that affect enzymatic reactions.
5072.D2.8	Analyze digestion and absorption of essential nutrients.
5072.D2.9	Describe enzymes, the changes they cause in foods, and the physical and chemical parameters that affect enzymatic reactions.
5072.D2.10	Students apply principles of human behavior to develop food products to provide a safe, wholesome and nutritious food supply for local and global food systems.
5072.D2.11	Determine a strategy to prepare and label foods according to the established standards of regulatory agencies.
5072.D2.12	Design new food products that meet a variety of goals (e.g., consumer preferences, market, nutritional needs, regulatory requirements, etc.).
5072.D2.13	Perform sensory-testing and marketing functions to characterize and determine consumer preference and marketing potential.
Domain	Storage, Distribution, and Consumption of Food
5072.D3.1	Implement selection, evaluation, and inspection techniques to ensure safe and quality food products.
5072.D3.2	Outline procedures to assign quality and yield grades to food products according to industry standards.
5072.D3.3	Develop, apply, and evaluate care and handling procedures to maintain original food quality and yield.
5072.D3.4	Examine and respond to consumer concerns about the inspection and harvesting techniques of animals using accurate information based on regulatory, agency approved or industry-approved techniques.
5072.D3.5	Evaluate and grade food products from different classifications of food products.
5072.D3.6	Students design and apply techniques of food processing, preservation, packaging, and presentation for distribution and consumption of food products.
5072.D3.7	Design plans to formulate and package food products using a variety of weights and measures.
5072.D3.8	Evaluate food quality factors on foods prepared for different markets (e.g., shelf life, shrinkage, appearance, weight, etc.).
5072.D3.9	Devise and apply strategies to preserve different foods using various methods and techniques.
5072.D3.10	Construct and implement methods of selecting packaging materials to store a variety of food products.
5072.D3.11	Students create food distribution plans and procedures to ensure safe delivery of food products.
5072.D3.12	Devise and defend a strategy to determine ways for food distribution to reduce environmental impacts.
5072.D3.13	Make recommendations to improve safety procedures used in food distribution scenarios to ensure a safe product is being delivered to consumers.
5072.D3.14	Propose distribution plans for food products that meet specific market demands.
Domain	History and Current Development of the Food Industry

Next Level Programs of Study

Review Document

5072.D4.1	Students examine the scope of the food industry by evaluating local and global policies, trends, and customs for food production.
5072.D4.2	Articulate and defend a personal point of view on policies and legislation that affect the food products and processing system in the US or around the world.
5072.D4.3	Devise and implement a strategy to create food products that meet a specific consumer trend in a specific market.
5072.D4.4	Propose and implement culturally sensitive food processing and distribution practices.
5072.D4.5	Predict and defend upcoming changes and trends in the food products and processing industry.
5072.D4.6	Examine and respond to consumer concerns about the environment and safety of the food supply using accurate information regarding food products and processing systems and practices.
5072.D4.7	Research and evaluate the feasibility of implementing current or emerging technology to improve a current food product or process used in a facility.
5072.D4.8	Demonstrate an ability to critically evaluate the validity of information that commonly appears in newspapers, magazines, radio, and television (e.g., food recalls)
5072.D4.9	Students identify and explain the purpose of industry organizations, groups, and regulatory agencies that influence the local and global food systems.
5072.D4.10	Construct and implement methods to obtain data about organizations, groups, and regulatory agencies that affect the food products and processing industry.
5072.D4.11	Construct and implement plans that ensure adherence to industry standards for food products and processing facilities.
5072.D4.12	Analyze current government regulations.
5072.D4.13	Research and evaluate the impact of supplemental government programs (e.g., SNAP, Free & Reduced meals, WIC, etc.).
Domain	Careers
5072.D5.1	Students examine the scope of career opportunities in, and the importance of, food science to the economy.
5072.D5.2	Evaluate the nature and scope of animal sciences in agriculture, society, and the economy
5072.D5.3	Describe career opportunities and means to achieve those opportunities in plant and soil sciences
5072.D5.4	Identify how key organizational structures and processes affect organizational performance and the quality of products and services
5072.D5.5	Demonstrate those qualities, attributes, and skills necessary to succeed in, or further prepare for, a chosen career while effectively contributing to society
Domain	Leadership
5072.D6.1	Students validate the necessity of leadership skills development in conjunction with participation in the national FFA Organization (FFA) and/or Family, Career and Community Leaders of America (FCCLA) as a critical component of the course.
5072.D6.2	Communicate clearly, effectively, and with reason through speaking, writing, visuals, and active listening in formal and informal settings
5072.D6.3	Recognize and explain the role of the CTSO in the development of leadership, education, employability, communications, and human relations skills
5072.D6.4	Examine roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment

Next Level Programs of Study

Review Document

5072.D6.5	Acquire the skills necessary to positively influence others
5072.D6.6	Develop a skill set to enhance the positive evolution of the whole person

Advanced Life Science, Animals (L)

Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Agri-Science – Plants or Animals; Veterinary Science
NLPS Sequence	C; B
Course Code	5070
Course Description	<i>Advanced Life Science: Animals is a two-semester course that provides students with opportunities to participate in a variety of activities including laboratory work. Students will explore concepts related to history and trends in animal agriculture as related to animal welfare, husbandry, diseases and parasites, laws and practices relating to handling, housing, environmental impact, global sustainable practices of animal agriculture, genetics, breeding practices, biotechnology uses, and comparative knowledge of anatomy and physiology of animals used in animal agriculture.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Agriculture; or Principles of Veterinary Science
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as an elective or directed elective for all diplomas Fulfills a science requirement for all diplomas Counts as a quantitative reasoning course
Dual Credit Status	X (PCL/CTE)

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Historic and Current Trends Impacting the Animal Systems Industry</i>
5070.D1.1	Evaluate the development and implications of animal origin, domestication and distribution and assess animal production methods for use in animal systems based on effectiveness.
5070.D1.2	Evaluate the implications of animal adaptations on production practices and the environment.
5070.D1.3	Predict trends and implications of future developments within different animal industries on production practices and the environment.
5070.D1.4	Evaluate the effectiveness of different production methods and defend the use of selected methods using data and evidence.
5070.D1.5	Devise and evaluate marketing plans for an animal agriculture product or service.
5070.D1.6	Select and defend the use of a specific record management system based upon its effectiveness for a business related to animal systems.
5070.D1.7	Devise and evaluate plans to manage wildlife populations to achieve optimal ecological health.
Domain	<i>Global Perspective of Laws and Sustainability</i>
5070.D2.1	Analyze and apply laws and sustainable practices to animal agriculture from a global perspective.
5070.D2.2	Evaluate the impact of laws pertaining to animal agriculture (e.g., pros, cons, effect on individuals, effect on businesses, etc.) and assess the compliance of production practices with established regulations.
5070.D2.3	Select, evaluate, and defend the use of sustainable practices in animal agriculture.
Domain	<i>Animal Husbandry and Welfare</i>

Next Level Programs of Study

Review Document

5070.D3.1	Demonstrate management techniques that ensure animal welfare and analyze procedures to ensure safety of animal products.
5070.D3.2	Implement and evaluate quality-assurance programs and procedures for animal production.
5070.D3.3	Devise, implement and evaluate safety procedures and plans for working with animals by species using information based on animal behavior and responses.
5070.D3.4	Devise economical recommendations to increase the welfare of animals in animal systems.
5070.D3.5	Select, evaluate, and defend the use of specific tools, technology or equipment used to perform animal husbandry and welfare tasks.
5070.D3.6	Research and evaluate programs to assure the safety of animal products for consumption.
5070.D3.7	Evaluate the effectiveness of animal and/or premise identification programs for a given species.
Domain	Animal Nutrition
5070.D4.1	Analyze the nutritional requirements of animals and analyze feed rations to assess their effectiveness
5070.D4.2	Assess nutritional needs for an individual animal based on its growth stage and production system.
5070.D4.3	Design and defend the use of a nutritional program by demonstrating the relationship between the nutrient requirements and the feedstuffs provided.
5070.D4.4	Identify essential and non-essential nutrients. In addition, describe the relationship between amino acids, vitamins, and minerals in the health of cells and organs.
5070.D4.5	Select appropriate feedstuffs for animals based on a variety of factors (e.g., economics, digestive system and nutritional needs, etc.).
5070.D4.6	Select and utilize animal feeds based on nutritional requirements, using rations for maximum nutrition and optimal economic production.
5070.D4.7	Make and defend decisions regarding whether to use feed additives and growth promotants after researching and considering scientific evidence, production system needs and goals, and input from industry professionals.
5070.D4.8	Select, evaluate, and defend the use of specific tools or equipment used to perform animal nutrition tasks.
5070.D4.9	Evaluate and summarize the potential impacts, positive and negative, of compliance and/or noncompliance with a feed label and feeding directions.
5070.D4.10	Research and recommend technological improvements to provide proper nutrition to animals.
Domain	Animal Reproduction
5070.D5.1	Students evaluate animals for breeding readiness and soundness and apply scientific principles to select and care for breeding animals.
5070.D5.2	Select breeding animals based on characteristics of the reproductive organs.
5070.D5.3	Evaluate and select animals for reproductive readiness.
5070.D5.4	Treat or cull animals with reproductive problems.
5070.D5.5	Summarize the process of sexual maturation
5070.D5.6	Identify and discuss various breeding systems in domesticated animals

Next Level Programs of Study

Review Document

5070.D5.7	Describe the function of the animal/host defense mechanism
5070.D5.8	Discuss the direct and indirect impact of disease on animal health
5070.D5.9	Compare and contrast the reproductive organs for male and female domesticated animal species.
5070.D5.10	Describe ectoderm, endoderm, and mesoderm as three germ layers that give rise to tissues and organs. Describe blastula and gastrula formation, and the function of morphogens, and recognize their importance in the developmental processes of vertebrates.
5070.D5.11	Define and describe estrous cycle(s). Describe how hormones act during the estrous cycle and how they are used to suppress it.
5070.D5.12	Discuss the social implications of reproductive and genetic technologies used in animal husbandry (e.g., embryo transfer, artificial insemination, gene transfer, cloning).
5070.D5.13	Describe spermatogenesis and sperm motility. List and explain factors that affect both.
5070.D5.14	Describe the steps in lactation.
5070.D5.15	Describe parturition and the method(s) used to predict when it occurs.
5070.D5.16	Select and evaluate a breeding system based on the principles of genetics.
5070.D5.17	Select and evaluate breeding animals and determine the probability of a given trait in their offspring.
5070.D5.18	Perform a DNA analysis and use the data to make and defend breeding decisions.
5070.D5.19	Create a plan to differentiate care of a species of breeding animals throughout their growth stages.
5070.D5.20	Describe ways that animals prevent inbreeding and discuss genetic diversity.
5070.D5.21	Compare and contrast natural selection with artificial selection, as used by humans to domesticate animals and breed improved varieties.
5070.D5.22	Compare and contrast adaptations of animals for survival in different environmental conditions.
5070.D5.23	Describe the role of biotechnology in the process of selection.
5070.D5.24	Explain the science behind mammalian cloning. Compare and contrast cloning a gene and an animal.
5070.D5.25	Describe the relationship between genotype and phenotype.
5070.D5.26	Select animal breeding methods based on reproductive and economic efficiency.
5070.D5.27	Evaluate the implementation and effectiveness of artificial insemination techniques.
5070.D5.28	Create and evaluate plans and procedures for estrous synchronization, superovulation, flushing, embryo transfer and other reproductive management practices.
5070.D5.29	Select and assess animal performance based on quantitative breeding values for specific characteristics.
Domain	Animal Environmental Considerations
5070.D6.1	Students design animal housing, equipment, and handling facilities for the major systems of animal production that comply with government regulations and safety standards.
5070.D6.2	Design an animal facility focusing on animal requirements, economic efficiency, sustainability, safety, and ease of handling.

Next Level Programs of Study

Review Document

5070.D6.3	Select, use, and evaluate equipment, technology, and handling procedures to enhance sustainability and production efficiency.
5070.D6.4	Evaluate facility designs and make recommendations to ensure that it meets standards for the legal, safe, ethical, economical, and efficient production of animals.
5070.D6.5	Evaluate the impact of laws pertaining to animal systems.
Domain	Animal Classification, Anatomy, & Physiology
5070.D7.1	Students classify animals according to taxonomic classification systems and use (e.g., agricultural, companion, etc.).
5070.D7.2	Assess taxonomic characteristics and classify animals according to the taxonomic classification system.
5070.D7.3	Recommend different uses for an animal species based upon an analysis of local market needs.
5070.D7.4	Apply knowledge of classification terms to communicate with others about animal systems in an effective and accurate manner.
5070.D7.5	Define the terms hypertonic, hypotonic, and isotonic. Describe the phenomena of osmosis, and predict the direction that water will move given the concentrations of solutes in adjacent cells.
5070.D7.6	Describe the biochemistry and functions of animal cell membranes. In doing so, describe the fluid mosaic model of the membrane and the role of the cell membrane proteins in transporting materials in and out of cells.
5070.D7.7	Describe cellular respiration. Recognize that animals perform only respiration, while plants perform both photosynthesis and respiration. Also, describe the transformation of energy during respiration, and the role of ATP produced in respiration for other metabolic processes.
5070.D7.8	Students apply principles of comparative anatomy and physiology to uses within various animal systems.
5070.D7.9	Correlate the functions of animal cell structures to animal growth, development, health, and reproduction.
5070.D7.10	Apply the processes of meiosis and mitosis to solve animal growth, development, health and reproductive problems.
5070.D7.11	Apply knowledge of anatomical and physiological characteristics of animals to make production and management decisions.
5070.D7.12	Compare and contrast muscle function under anaerobic and aerobic conditions
5070.D7.13	Identify and explain the major organ systems found in vertebrate systems (Muscular, Skeletal, Circulatory, Respiratory, Digestive, Nervous, Endocrine, Integumentary, Excretory, Urinary, Immune)
5070.D7.14	Describe the organization of the animal body, cells, tissues, organs, and organ systems
5070.D7.15	Discuss four basic tissue types: epithelial, connective, muscle, and nervous
5070.D7.16	Students select and train animals for specific purposes and maximum performance based on anatomy and physiology.
5070.D7.17	Evaluate and select animals to maximize performance based on anatomical and physiological characteristics that affect health, growth, and reproduction
5070.D7.18	Choose, implement, and evaluate sustainable and efficient procedures (e.g., selection,

Next Level Programs of Study

Review Document

	housing, nutrition, and management) to produce consistently high-quality animals that are well suited for their intended purposes.
5070.D7.19	Evaluate and select animals to produce superior animal products based on industry standards.
Domain	Animal Health
5070.D8.1	Students design programs to prevent animal diseases, parasites and other disorders and ensure animal welfare.
5070.D8.2	Select and use tools and technology to meet specific animal health management goals.
5070.D8.3	Determine when an animal health concern needs to be referred to an animal health professional.
5070.D8.4	Treat common diseases, parasites, and physiological disorders of animals according to directions prescribed by an animal health professional.
5070.D8.5	Design and implement a health maintenance and a disease and disorder prevention plan for animals in their natural and/or confined environments.
5070.D8.6	Identify and describe surgical and nonsurgical veterinary treatments and procedures to meet specific animal health care objectives.
5070.D8.7	Describe the function of the animal/host defense mechanism
5070.D8.8	Describe the use of antibiotics in animal health and describe how antibiotics work. Discuss the impact improper use of antibiotics has on antibiotic resistance.
5070.D8.9	Discuss the role of blood in host defense
5070.D8.10	Discuss the impact of disease on animal health.
5070.D8.11	Describe the various parasites and their impact on organ systems. Discuss host specificity and the importance of it.
5070.D8.12	Students analyze biosecurity measures utilized to protect the welfare of animals on a local, state, national, and global level.
5070.D8.13	Design and evaluate a biosecurity plan for an animal production operation.
5070.D8.14	Research and evaluate the effectiveness of zoonotic disease prevention methods and procedures to identify those that are best suited to ensure public safety and animal welfare.
Domain	Environmental Impacts of Animal Production
5070.D9.1	Design and implement methods to reduce the effects of animal production on the environment.
5070.D9.2	Devise a plan that includes measures to reduce the impact of animal agriculture on the environment.
5070.D9.3	Apply valid and reliable research evidence to predict the potential effects of different environmental conditions for an animal population.
5070.D9.4	Devise and improve plans to establish favorable environmental conditions for animal growth and performance based on a variety of factors (e.g., economic feasibility, environmental sustainability, impact on animals, etc.).
Domain	Leadership
5070.D10.1	Students validate the necessity of leadership skills development in conjunction with participation in The National FFA Organization (FFA) as a critical component to a well-rounded agricultural education.

Next Level Programs of Study

Review Document

5070.D10.2	Communicate clearly, effectively, and with reason through speaking, writing, visuals, and active listening in formal and informal settings
5070.D10.3	Recognize and explain the role of the FFA in the development of leadership, education, employability, communications, and human relations skills
5070.D10.4	Examine roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment
5070.D10.5	Acquire the skills necessary to positively influence others
5070.D10.6	Develop a skill set to enhance the positive evolution of the whole person
Domain	Supervised Agriculture Experience
5070.D11.1	Students validate the necessity of a Supervised Agricultural Experience (SAE) program as a critical component to a well-rounded agricultural education.
5070.D11.2	Explain the nature of and become familiar with those terms related to an SAE program
5070.D11.3	Explore the numerous possibilities for an SAE program which a student might develop
5070.D11.4	Develop an individual SAE program and implementation plan for record keeping skills
Domain	Careers
5070.D12.1	Students examine the scope of career opportunities in, and the importance of, agriculture to the economy.
5070.D12.2	Evaluate the nature and scope of animal sciences in agriculture, society, and the economy
5070.D12.3	Describe career opportunities and means to achieve those opportunities in animal science
5070.D12.4	Explain the nature of and become familiar with those terms related to an SAE program
5070.D12.5	Explore the numerous possibilities for an SAE program which a student might develop

Food Science	
Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Agri-Science – Plants or Animals
NLPS Sequence	C
Course Code	5102
Course Description	<i>Food Science is a two semester course that provides students with an overview of food science and the role it plays in the securing of a safe, nutritious, and adequate food supply. A project-based approach is utilized in this course, along with laboratory, team building, and problem solving activities to enhance student learning. Students are introduced to the following areas of food science: food processing, food chemistry and physics, nutrition, food microbiology, preservation, packaging and labeling, food commodities, food regulations, issues and careers in the food science industry.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Agriculture
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum

Domain	<i>History and Current Trends of the Food Industry</i>	
5102.D1.1	Explain the scope of the food industry and the historical and current developments of food products and processing.	
5102.D1.2	Discuss the history and current trends to describe and explain the components (e.g., processing, distribution, byproducts) of the food products and processing industry.	
5102.D1.3	Analyze the similarities and differences amongst policies and legislation that affect the food products, processing systems, and supply in the U.S. or around the world.	

Next Level Programs of Study

Review Document

5102.D1.4	Analyze food production and distribution outcomes based on cultural customs.
5102.D1.5	Discuss the issues of safety and environmental concerns about foods and food processing (e.g., Genetically Modified Organisms, organics, microorganisms, contamination, irradiation).
5102.D1.6	Identify and explain the purpose of industry organizations, groups, and regulatory agencies that influence the local and global food systems.
5102.D1.7	Evaluate the purposes and changes in the food products and processing industry brought about by industry organizations or regulatory agencies
5102.D1.8	Explain the importance, application, and usage of industry standards in food products and processing
5102.D1.9	Prepare an implementation plan for industry standards in food products and processing systems
Domain	<i>Food Safety Principles and Processing Systems</i>
5102.D2.1	Students develop and implement procedures to ensure safety, sanitation, and quality in food product and processing facilities.
5102.D2.2	Describe contamination hazards (physical, chemical, and biological) associated with food products and processing
5102.D2.3	Outline procedures to eliminate possible contamination hazards associated with food products and processing
5102.D2.4	Analyze the effectiveness of a food product and processing company's Critical Control Point (CCP) procedures
5102.D2.5	Analyze and document attributes and procedures of current safety programs in food products and processing facilities.
5102.D2.6	Assess specifications and maintenance needs for equipment and processing systems (e.g., specifications for machines, sanitation procedures, repair protocol, etc.)
5102.D2.7	Students apply safety and sanitation procedures to understand the handling, processing, and storing of food products.
5102.D2.8	Explain and demonstrate techniques and procedures for the safe handling of food products
5102.D2.9	Describe the importance of and perform quality-assurance tests on food products
5102.D2.10	Describe the effects food-borne pathogens have on food products and humans
5102.D2.11	Conduct and interpret microbiological tests for food-borne pathogens and implement corrective procedures
5102.D2.12	Discuss documentation procedures in a food products and processing system
5102.D2.13	Explain safety standards that must be observed in facility design and equipment use
5102.D2.14	Outline guidelines for personnel safety in the food products and processing industry
5102.D2.15	Evaluate a facility to determine the implementation of safety procedures
Domain	<i>The Science and Nutrition of Food Products and The Processing Industry</i>
5102.D3.1	Students apply principles of nutrition, biology, microbiology, chemistry, and human behavior to make healthy food selections.
5102.D3.2	Discuss essential nutrients (proteins, carbohydrates, fats, vitamins, minerals, and water).
5102.D3.3	Explain the application of chemistry and physics to food science.
5102.D3.4	Explain the MyPlate recommendations in relation to essential nutrients for the human diet.
5102.D3.5	Identify common food additives (e.g., preservatives, antioxidants, buffers, stabilizers, colors, flavors).
5102.D3.6	Identify the key components of a food label and their significance to create an informed

	consumer.
Domain	Processing, Preservation, Quality Control, and Packaging of Food Products
5102.D4.1	Design and apply techniques of food processing, preservation, packaging, and presentation for distribution and consumption of food products.
5102.D4.2	Identify and assign quality and yield grades to meat, poultry, fish, dairy, fruits, vegetables, grains, legumes, and oilseeds.
5102.D4.3	Select raw food products based on yield grades, quality grades and related selection criteria.
5102.D4.4	Perform quality-control inspections of raw food products for processing.
5102.D4.5	Identify and describe acceptable animal treatment and processing techniques.
5102.D4.6	Explain desirable and undesirable characteristics of both pre-mortem and post-mortem animals in relation to the inspection and production of food products.
5102.D4.7	Students will apply processes, preservation, packaging, and food presentation to food products for sale and distribution to understand product development.
5102.D4.8	Compare weights and measurements of products and perform conversions between units of measure.
5102.D4.9	Outline appropriate methods and prepare foods for sale and distribution for different markets.
5102.D4.10	Analyze and document food preservation processes and methods on a variety of food products.
5102.D4.11	Analyze the degree of desirable food qualities of foods stored in various packaging.
5102.D4.12	Explain materials and methods of food packaging and presentation.
5102.D4.13	Describe factors in planning and developing a new food product.
Domain	Careers
5102.D5.1	Students examine the scope of career opportunities in, and the importance, of agriculture to the economy.
5102.D5.2	Evaluate the nature and scope of natural resources in agriculture, society, and the economy
5102.D5.3	Describe career opportunities and means to achieve those opportunities in natural resources
5102.D5.4	Identify how key organizational structures and processes affect organizational performance and the quality of products and services.
5102.D5.5	Demonstrate those qualities, attributes, and skills necessary to succeed in, or further prepare for, a chosen career while effectively contributing to society.
Domain	Leadership
5102.D6.1	Students validate the necessity of leadership skills development in conjunction with participation in The National FFA Organization (FFA) as a critical component to a well-rounded agricultural education.
5102.D6.2	Communicate clearly, effectively, and with reason through speaking, writing, visuals, and active listening in formal and informal settings
5102.D6.3	Recognize and explain the role of the FFA in the development of leadership, education, employability, communications, and human relations skills.
5102.D6.4	Examine roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment.
5102.D6.5	Acquire the skills necessary to positively influence others.
5102.D6.6	Develop a skill set to enhance the positive evolution of the whole person.
Domain	Supervised Agriculture Experience

5102.D7.1	Students validate the necessity of a Supervised Agricultural Experience (SAE) program as a critical component to a well-rounded agricultural education.
5102.D7.2	Explain the nature of and become familiar with those terms related to an SAE program.
5102.D7.3	Explore the numerous possibilities for an SAE program which a student might develop.
5102.D7.4	Develop an individual SAE program and implement record keeping skills.

Agriculture Biotechnology Capstone	
Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Agri-Science – Plants or Animals
NLPS Sequence	D
Course Code	7230
Course Description	<i>Ag Biotechnology is a two-semester course that concentrates on the applications of biotechnology in the agricultural industry. Students enrolled in this course will apply the use of living organisms to solve problems or make useful products. Students will become familiar with laboratory procedures such as cell/tissue culture, micropropagation, electrophoresis, etc. Students enrolled in this course will be required to use data and scientific techniques to solve problems concerning living organisms and will demonstrate competence in the application of principles and techniques for the development, application and management of biotechnology within the agriculture industry. As a capstone course, students should have the opportunity to apply their knowledge and use skills through an intensive work-based learning experience.</i>
Prerequisite(s)/ Corequisite(s)	Agriscience Concentrator Sequence
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits max
Counts Toward	Counts as a directed elective or elective for all diploma types Fulfills a science requirement for all diploma types

Competency #	Competency
7230.D1.1	Investigate and explain the relationship between past, current and emerging applications of biotechnology in agriculture
7230.D1.2	Research and summarize the evolution of biotechnology in agriculture.
7230.D1.3	Examine and categorize current applications and gains achieved in applying biotechnology to agriculture.
7230.D1.4	Distinguish between current and emerging applications of biotechnology in agriculture.
7230.D1.5	Compare and contrast the benefits and risks of biotechnology compared with alternative approaches to improving agriculture.
7230.D1.6	Evaluate the scope and implications of regulatory agencies on applications of biotechnology in agriculture and protection of public interests
7230.D1.7	Compare and contrast differences between regulatory systems worldwide.
7230.D1.8	Research and document major regulatory issues related to biotechnology in agriculture.
7230.D1.9	Explain the relationship between regulatory agencies and the protection of public interests such as health, safety and the environment.
7230.D1.10	Analyze the relationship and implications of bioethics, laws, and public perceptions on applications of biotechnology in agriculture.
7230.D1.11	Research and summarize the emergence, evolution and implications of bioethics associated with biotechnology in agriculture.
7230.D1.12	Research and summarize legal issues related to biotechnology in agriculture (e.g., protection of intellectual property through patents, copyright, trademarks, etc.).
7230.D1.13	Research and summarize public perceptions of biotechnology in agriculture (e.g., social, and cultural issues).
7230.D2.1	Read, document, evaluate and secure accurate laboratory records of experimental protocols, observations, and results.

Next Level Programs of Study

Review Document

7230.D2.2	Maintain and interpret laboratory records documented in a laboratory to ensure data accuracy and integrity (e.g., avoid bias, record any conflicts of interest, avoid misinterpreted results, etc.).
7230.D2.3	Research and summarize the need for data and information security in a laboratory and demonstrate best practices.
7230.D2.4	Evaluate the role of bioinformatics in agriculture and summarize the types of databases that are available (e.g., genomic, transcriptomics, etc.).
7230.D2.5	Implement standard operating procedures for the proper maintenance, use and sterilization of equipment in a laboratory.
7230.D2.6	Identify, interpret, and implement standard operating procedures for laboratory equipment.
7230.D2.7	Manipulate basic laboratory equipment and measurement devices (e.g., water bath, electrophoresis equipment, micropipettes, laminar flow hood, etc.).
7230.D2.8	Perform sterilization techniques for equipment in a laboratory using standard operating procedures.
7230.D2.9	Apply standard operating procedures for the safe handling of biological and chemical materials in a laboratory.
7230.D2.10	Demonstrate advanced aseptic techniques in the laboratory (e.g., sterile work area, sterile handling, personal hygiene, etc.).
7230.D2.11	Examine and implement standard operating procedures for the use of biological materials according to directions and their classification (e.g., proper handling of bacteria or DNA before, during and after use).
7230.D2.12	Formulate and prepare solutions using standard operating procedures (e.g., proper labeling, storage, etc.).
7230.D2.13	Examine and perform scientific procedures using microbes, DNA, RNA, and proteins in a laboratory.
7230.D2.14	Characterize the physical and biological properties of organisms.
7230.D2.15	Compare and contrast the structures of DNA and RNA and investigate how genotype influences phenotype.
7230.D2.16	Perform electrophoretic techniques and interpret electrophoresis fragmentation patterns (e.g., gel electrophoresis, southern blotting, etc.).
7230.D2.17	Examine and document the role and applications of proteins in agricultural biotechnology.
7230.D2.18	Synthesize the relationship between proteins, enzymes, and antibodies.
7230.D3.1	Apply biotechnology principles, techniques, and processes to create transgenic species through genetic engineering.
7230.D3.2	Summarize biological, social, agronomic, and economic reasons for genetic modification of eukaryotes.
7230.D3.3	Summarize the process of transformation of eukaryotic cells with transgenic DNA.
7230.D3.4	Analyze the benefits and risks associated with the use of biotechnology to increase productivity and improve quality of living species (e.g., plants, animals such as aquatic species, etc.).
7230.D3.5	Define and summarize epigenetics and synthesize the relationship between mutation, migration and evolution of transgenes in the environment.
7230.D3.6	Apply biotechnology principles, techniques, and processes to enhance the production of food using microorganisms and enzymes.
7230.D3.7	Summarize reasons for detecting microbes and identify sources of microbes.

Next Level Programs of Study

Review Document

7230.D3.8	Examine enzymes, the changes they cause and the physical and chemical parameters that affect enzymatic reactions (e.g., food, cellulosic bioenergy, etc.).
7230.D3.9	Identify and categorize foods produced using biotechnology (e.g., fermentation, etc.) to change the chemical properties of food for an intended purpose (e.g., create desirable nutritional profile, preservation, flavor, etc.)
7230.D3.10	Apply biotechnology principles, techniques, and processes to protect the environment and maximize use of natural resources (e.g., biomass, bioprospecting, industrial biotechnology, etc.).
7230.D3.11	Examine the consequences of agricultural practices on natural populations.
7230.D3.12	Define and summarize industrial biotechnology and categorize the benefits and risks associated with its use in manufacturing (e.g., fabrics, plastics, etc.).
7230.D3.13	Research and summarize the potential applications of bioprospecting in biotechnology and agriculture.
7230.D3.14	Apply biotechnology principles, techniques, and processes to enhance plant and animal care and production
7230.D3.15	Research and describe the aims and techniques involved in selective plant-breeding process.
7230.D3.16	Examine and classify biotechnology processes applicable to animal health (e.g., genetic testing, etc.).
7230.D3.17	Research and categorize the types of pharmaceuticals developed for animals and humans through biotechnology
7230.D3.18	Summarize the need for global biodiversity and applications of biotechnology to reduce threats to biodiversity.
7230.D3.19	Apply biotechnology principles, techniques, and processes to produce biofuels (e.g., fermentation, transesterification, methanogenesis, etc.).
7230.D3.20	Examine and synthesize the need for biofuels (e.g., cellulosic bioenergy, etc.).
7230.D3.21	Differentiate between biomass and sources of biomass.
7230.D3.22	Research and explain the process of fermentation and its potential applications.
7230.D3.23	Define and summarize the process of transesterification and its potential applications.
7230.D3.24	Examine the process of methanogenesis and its potential applications.
7230.D3.25	Apply biotechnology principles, techniques, and processes to improve waste management (e.g., genetically modified organisms, bioremediation, etc.).
7230.D3.26	Compare and contrast the use of natural organisms and genetically engineered organisms in the treatment of wastes.
7230.D3.27	Summarize the purpose of microorganisms in biological waste management.
7230.D3.28	Analyze the role of microorganisms in industrial chemical waste treatment.
7230.D3.29	Provide examples of instances in which bioremediation can be applied to clean up environmental contaminants.

Competency #	Competency
7262.D1.1	Examine historical and current data to identify issues impacting AFNR systems.
7262.D1.2	Evaluate and explain emerging trends and the opportunities they may create within the AFNR systems.
7262.D1.3	Evaluate and explain how scientists use the scientific method to build upon previous findings in current and emerging research.
7262.D1.4	Solve problems in AFNR workplaces or scenarios using technology.
7262.D1.5	Evaluate the importance of technology use and how it impacts AFNR systems.
7262.D1.6	Analyze and assess at least two public policies that impact each AFNR system.
7262.D1.7	Create and propose a hypothetical policy that will impact current AFNR systems.
7262.D1.8	Evaluate geographic data and select necessary data sets to solve problems within AFNR systems.
7262.D1.9	Devise a strategy to solve a problem in an AFNR system using a set of economic data.
7262.D2.1	Execute health, safety, and environmental procedures to comply with regulatory and safety standards.
7262.D2.2	Construct and implement methods to evaluate compliance with required safety, health, and environmental management regulations.
7262.D2.3	Create and implement a health and safety policy plan for AFNR workplaces.
7262.D2.4	Assess various emergency response plan requirements for an AFNR workplaces and/or facility.
7262.D2.5	Examine and categorize examples of how to avoid health or safety risks in AFNR workplaces.
7262.D2.6	Create a plan to mitigate the level of contamination or injury identified as a risk in the workplace.
7262.D2.7	Design and implement plans to ensure the use of appropriate protective equipment when using various AFNR tools and equipment.
7262.D2.8	Evaluate and select appropriate tools and equipment to complete AFNR tasks.
7262.D2.9	Assess and demonstrate appropriate operation, storage, and maintenance techniques for AFNR tools and equipment.
7262.D3.1	Maintain and interpret laboratory records documented in a laboratory to ensure data accuracy and integrity (e.g., avoid bias, record any conflicts of interest, avoid misinterpreted results, etc.).
7262.D3.2	Devise a strategy for ensuring the security of data and information collected in a laboratory
7262.D3.3	Assess the need for personal protective equipment in a variety of situations and select the appropriate equipment to wear when working with biological and chemical materials.
7262.D3.4	Perform waste disposal according to the standard operating procedures.
7262.D3.5	Perform ongoing maintenance of laboratory equipment according to the standard operating procedures (e.g., calibration, testing, etc.).
7262.D3.6	Operate advanced laboratory equipment and measurement devices.
7262.D4.1	Evaluate progress toward AFNR career goals and identify opportunities for improvement and necessary adjustments to one's plan of action

Next Level Programs of Study

Review Document

7262.D4.2	Implement one's personal plan of action for obtaining the required education, training and experiences and evaluate progress to identify opportunities for improvement and necessary adjustments.
7262.D4.3	Evaluate, update, and improve a set of personal tools to reflect current skills, experiences, education, goals, etc. and complete the processes needed to pursue and obtain a career in an AFNR pathway.
7262.D4.4	Assess personal skills and align them with potential career opportunities in AFNR pathways.

NLPS Sequence	A
Course Code	7117
Course Description	<i>Principles of Agriculture is a two-semester course that will cover the diversity of the agricultural industry and agribusiness concepts. Students will develop an understanding of the role of agriculture in the United States and globally. Students will explore Agriculture, Food, and Natural Resource (AFNR) systems related to the production of food, fiber and fuel and the associated health, safety and environmental management systems. Topics covered in the course range from animals, plants, food, natural resources, ag power, structures and technology, and agribusiness. Participation in FFA and Supervised Agricultural Experiences (SAE) will be an integral part of this course in order to develop leadership and career ready skills.</i>

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	AFNR Systems
7117.D1.1	Describe the role of agriculture in US and global societies through the domestication and distribution of the world's important crop and livestock species.
7117.D1.2	Recognize the diversity of AFNR systems in the US and the world.
7117.D1.3	Understand the size and productivity of farms and ranches in the US and around the world.
7117.D1.4	Understand US production systems for major grain crops, including Crop Rotation Systems, Tillage Systems, Variety Selection, and Harvest and grain storage technology.
7117.D1.5	Understand US production systems for major livestock animals.
7117.D1.6	Research, examine, and discuss issues and trends that impact AFNR systems on local, state, national and global levels.
7117.D1.7	Examine technologies and analyze their impact on AFNR systems.
Domain	Agribusiness
7117.D2.1	To have students develop an understanding of how economics relates to agriculture, and how economic principles are used to analyze and solve problems in agriculture and agribusiness.
7117.D2.2	To have students understand the structure of the U.S. Agriculture and how agriculture interacts with the aggregate economic system.
7117.D2.3	To have students recognize the role of producers, input suppliers, food marketing organizations, and consumers in the U.S. Agricultural economy.

Next Level Programs of Study

Review Document

7117.D2.4	Help students understand the qualities and characteristics employers in agribusiness expect in prospective employees and how students can develop those qualities and characteristics.
7117.D2.5	Describe the diversity of jobs and careers in agricultural industries in Indiana and the US.
Domain	<i>Safety, Health, and Environment Management Systems</i>
7117.D3.1	Identify and explain the implications of required regulations to maintain and improve safety, health and environmental management systems.
7117.D3.2	Summarize the importance of safety, health, and environmental management in the workplace.
7117.D3.3	Use appropriate protective equipment and demonstrate safe and proper use of AFNR tools and equipment.
Domain	<i>Careers</i>
7117.D4.1	Evaluate the nature and scope of AFNR systems in society and the economy
7117.D4.2	Describe career opportunities and means to achieve those opportunities in AFNR systems
7117.D4.3	Identify how key organizational structures and processes affect organizational performance and the quality of products and services
7117.D4.4	Demonstrate those qualities, attributes, and skills necessary to succeed in, or further prepare for, a chosen career while effectively contributing to society.
Domain	<i>Leadership</i>
7117.D5.1	Communicate clearly, effectively, and with reason through speaking, writing, visuals, and active listening in formal and informal settings
7117.D5.2	Recognize and explain the role of the FFA in the development of leadership, education, employability, communications, and human relations skills
7117.D5.3	Examine roles within teams, work units, departments, organizations, interorganizational systems, and the larger environment
7117.D5.4	Acquire the skills necessary to positively influence others
7117.D5.5	Develop a skill set to enhance the positive evolution of the whole person
Domain	<i>Supervised Agriculture Experience (SAE)</i>
7117.D6.1	Explain the nature of and become familiar with those terms related to an SAE program.
7117.D6.2	Explore the numerous possibilities for an SAE program which a student might develop.
7117.D6.3	Develop an individual SAE program and implementation plan for record keeping skills.
Domain	<i>Agricultural Business and Farm Management</i>
7117.D7.1	Discuss the basic principles of management and decision-making as related to both farm and non-farm agribusiness.
7117.D7.2	Apply economic principles to case studies in farm and agribusiness.
7117.D7.3	Understand the major financial statements: what they report, how to interpret and use the data and how they are connected
7117.D7.4	Know the alternatives to meeting needs when resource analysis indicates the labor input in a business needs altered. Includes review of resume, interviewing and other job application skills.
7117.D7.5	Identify the best combination of resources to use relative to the enterprises selected for the operation including; crop inputs, livestock inputs, machinery and equipment, and farmstead and buildings.
7117.D7.6	Know the alternatives for farm recordkeeping and analysis
7117.D7.7	The student will learn to work with others in a management team to combine a limited

Horticultural Science	
Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Horticulture
NLPS Sequence	B
Course Code	5132
Course Description	<i>Horticulture Science is a two semester course that provides students with a background in the field of horticulture. Coursework includes hands-on activities that encourage students to investigate areas of horticulture as it relates to the biology and technology involved in the production, processing, and marketing of horticultural plants and products. Students are introduced to the following areas of horticulture science: reproduction and propagation of plants, plant growth, growth-media, management practices for field and greenhouse production, marketing concepts, production of plants of local interest, greenhouse management, floral design, and pest management. Students participate in a variety of activities including extensive laboratory work usually in a school greenhouse.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Agriculture
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas. Fulfills a Life Science or Physical Science requirement for the General Diploma
Dual Credit Status	X (PCL/CTE)
Additional Notes	

ADDITIONAL COURSE INFO	
Funding	Less than Moderate Value Level I
Bulletin 400	<ul style="list-style-type: none"> ● Vocational Agriculture K-12

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Survey of Horticulture
5132.D1.1	Differentiate between the major groups of horticultural plants: herbaceous and woody, annual and perennial, temperate, and tropical.
5132.D1.2	Identify the common plant species used in horticulture.
5132.D1.3	Describe the basic functions of plants parts and how plants adapt to the environment.
5132.D1.4	Explain modern plant propagation techniques and how they are applied to different plant groups.
5132.D1.5	Describe the fundamentals of plant breeding and how it applies to ornamental plants.
5132.D1.6	Characterize the types of environments involved in horticulture: landscape, greenhouse, and indoor environments.
5132.D1.7	Demonstrate knowledge of the environmental factors involved in ornamental plant production including soils, water and pests.
Domain	Soil Science
5132.D2.1	Understanding applied chemical, physical, and biological concepts related to soil.
5132.D2.2	Understanding of the origin, classification, and distribution of soils and their relationship to people and food production.
5132.D2.3	Understanding of the fertility management and conservation of soils.
5132.D2.4	Understand the environmental impact of soil use.
5132.D3.1	Establish production and maintenance practices for field and greenhouse production

Greenhouse and Soilless Production

Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Horticulture
NLPS Sequence	C
Course Code	7114

Next Level Programs of Study

Review Document

Course Description	<i>Greenhouse and Soilless Production is a two-semester course that provides an overview of structural designs and uses of enclosed structures (greenhouses) to grow various plants and food. The course will focus on discussing different types of enclosed structures, management systems, and growing systems used to produce plants and food. The course will also present an overview of soilless growing systems such as hydroponics, aquaponics, aeroponics and fogponics. Students will utilize the school greenhouse as part of this course.</i>

Review Document

7114.D1.1	Identify different types of greenhouse structures and relate why that system is utilized.
7114.D1.2	Demonstrate basic greenhouse operational/management procedures (day to day events)
7114.D1.3	Develop management strategies for different types of greenhouses
7114.D1.4	Perform identification, care, and maintenance for a specific set of plants/food grown in an enclosed structure
7114.D1.5	Classify different types of growing systems that can be used in greenhouses.
Domain	Soilless Production
7114.D2.1	Analyze the basic construction and use of various soilless growing systems.
7114.D2.2	Recognize terminology used in alternative growing methods systems.
7114.D2.3	Design and create soilless growing systems (to take home if desired).
7114.D2.4	Troubleshoot issues that arise in soilless growing systems.
7114.D2.5	Construct and operate various soilless growing systems.
7114.D2.6	Describe the types of plants and foods (and plant requirements) that can be grown in soilless systems.

Horticulture Capstone	
Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Horticulture
NLPS Sequence	D
Course Code	7232
Course Description	<i>The Horticulture Capstone course builds upon the knowledge and skills developed in the Principles, Horticultural Science, and Greenhouse and Soilless Production courses by developing advanced skills that students can apply to the field. As a capstone course, students should have the opportunity to apply their knowledge and use skills through an intensive work-based learning experience.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Agriculture; Horticultural Science; Greenhouse and Soilless Production
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits max
Counts Toward	Counts as a directed elective or elective credits for all diplomas Fulfills a science requirement for all diploma types
Dual Credit Status	X (PCL/CTE)

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Vegetable Production</i>
7232.D1.1	Describe current vegetable production systems and where those systems are utilized.
7232.D1.2	Analyze markets for vegetables with an emphasis on Indiana.
7232.D1.3	Explain the principles of growing in soil versus water.
7232.D1.4	Investigate how soil type affects vegetable plant production.
7232.D1.5	Analyze the differences in management when growing in open fields and high tunnels.
7232.D1.6	Analyze the differences in management when growing in aquaponic and hydroponic systems
7232.D1.7	Investigate which species and cultivars are best adapted to different growing systems.
7232.D1.8	Describe harvest methods for vegetables in different growing systems.
7232.D1.9	Explain best practices in handling produce to minimize spoilage and the spread of foodborne pathogens.
7232.D1.10	Examine and prepare students for GAPS and Serve Safe certification.
7232.D1.11	Explain the pros and cons of large- and small-scale vegetable production.
Domain	<i>Urban Food Production</i>
7232.D2.1	Describe the types of urban food and agriculture production utilized in society.
7232.D2.2	Research the history and need for urban food production in the United States.
7232.D2.3	Analyze the importance of space conservation in urban environments.
7232.D2.4	Recognize key terminology, methods, regulations, and marketing strategies utilized in urban farming.
7232.D2.5	Create an urban farm business plan.

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	AFNR Systems
7117.D1.1	Describe the role of agriculture in US and global societies through the domestication and distribution of the world's important crop and livestock species.
7117.D1.2	Recognize the diversity of AFNR systems in the US and the world.
7117.D1.3	Understand the size and productivity of farms and ranches in the US and around the world.
7117.D1.4	Understand US production systems for major grain crops, including Crop Rotation Systems, Tillage Systems, Variety Selection, and Harvest and grain storage technology.
7117.D1.5	Understand US production systems for major livestock animals.
7117.D1.6	Research, examine, and discuss issues and trends that impact AFNR systems on local, state, national and global levels.
7117.D1.7	Examine technologies and analyze their impact on AFNR systems.
Domain	Agribusiness
7117.D2.1	To have students develop an understanding of how economics relates to agriculture, and how economic principles are used to analyze and solve problems in agriculture and agribusiness.
7117.D2.2	To have students understand the structure of the U.S. Agriculture and how agriculture interacts with the aggregate economic system.

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Landscape Management
7115.D1.1	Describe the elements of a practical landscape design given the function and location of the site.
7115.D1.2	Identify the trees, shrubs, perennials, annuals, groundcovers, and turf that best meet the needs of the landscape design.
7115.D1.3	Identify the hard-scape elements that are required for a landscape design.
7115.D1.4	Identify the site requirements such as grading, mounding and irrigation that are required for a landscape design.
7115.D1.5	Demonstrate the skills necessary to draw manually and electronically a comprehensive landscape design based on site and utilization criteria.
7115.D1.6	Identify pests commonly found in landscaped areas and explain their control.
Domain	Turf Management
7115.D2.1	Identify major turf grass species and describe their advantages in turf applications.
7115.D2.2	Identify the pests of lawns, athletic fields and golf courses and explain their control.
7115.D2.3	Describe the soil and site conditions that promote healthy turf.
7115.D2.4	Explain the major techniques involved in establishing turf.
7115.D2.5	Explain the basic characteristics of irrigation systems and their use in turf maintenance.
7115.D2.6	Demonstrate skills necessary to install and maintain turf in the landscape.
Domain	Safety, Health, and Environment Management Systems
7115.D3.1	Identify and explain the implications of required regulations to maintain and improve safety, health and environmental management systems.
7115.D3.2	Summarize the importance of safety, health, and environmental management in the workplace.
7115.D3.3	Use appropriate protective equipment and demonstrate safe and proper use of AFNR tools and equipment.

Landscape Management Capstone	
Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Landscaping
NLPS Sequence	D
Course Code	7234
Course Description	<i>The Landscape Capstone course builds upon the knowledge and skills developed in the Principles, Horticultural Science and Landscape and Turf Management courses by developing advanced skills that students can apply to the field. As a capstone course, students should have the opportunity to apply their knowledge and use skills through an intensive work-based learning experience.</i>

Principles of Agriculture	
Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Ag Mechanical and Engineering, Agri-Science – Plants or Animals, Horticulture, Landscaping, Natural Resources, Precision Agriculture
NLPS Sequence	A
Course Code	7117
Course Description	<i>Principles of Agriculture is a two-semester course that will cover the diversity of the agricultural industry and agribusiness concepts. Students will develop an understanding of the role of agriculture in the United States and globally. Students will explore Agriculture, Food, and Natural Resource (AFNR) systems related to the production of food, fiber and fuel and the associated health, safety and environmental management systems. Topics covered in the course range from animals, plants, food, natural resources, ag power, structures and technology, and agribusiness. Participation in FFA and Supervised Agricultural Experiences (SAE) will be an integral part of this course in order to develop leadership and career ready skills.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective credits for all diplomas
Dual Credit Status	X (PCL/CTE)

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	AFNR Systems
7117.D1.1	Describe the role of agriculture in US and global societies through the domestication and distribution of the world's important crop and livestock species.
7117.D1.2	Recognize the diversity of AFNR systems in the US and the world.
7117.D1.3	Understand the size and productivity of farms and ranches in the US and around the world.
7117.D1.4	Understand US production systems for major grain crops, including Crop Rotation Systems, Tillage Systems, Variety Selection, and Harvest and grain storage technology.
7117.D1.5	Understand US production systems for major livestock animals.
7117.D1.6	Research, examine, and discuss issues and trends that impact AFNR systems on local, state, national and global levels.
7117.D1.7	Examine technologies and analyze their impact on AFNR systems.
Domain	Agribusiness
7117.D2.1	To have students develop an understanding of how economics relates to agriculture, and how economic principles are used to analyze and solve problems in agriculture and agribusiness.
7117.D2.2	To have students understand the structure of the U.S. Agriculture and how agriculture

Next Level Programs of Study

Review Document

	interacts with the aggregate economic system.
7117.D2.3	To have students recognize the role of producers, input suppliers, food marketing organizations, and consumers in the U.S. Agricultural economy.
7117.D2.4	Help students understand the qualities and characteristics employers in agribusiness expect in prospective employees and how students can develop those qualities and characteristics.
7117.D2.5	Describe the diversity of jobs and careers in agricultural industries in Indiana and the US.
Domain	Safety, Health, and Environment Management Systems
7117.D3.1	Identify and explain the implications of required regulations to maintain and improve safety, health and environmental management systems.
7117.D3.2	Summarize the importance of safety, health, and environmental management in the workplace.
7117.D3.3	Use appropriate protective equipment and demonstrate safe and proper use of AFNR tools and equipment.
Domain	Careers
7117.D4.1	Evaluate the nature and scope of AFNR systems in society and the economy
7117.D4.2	Describe career opportunities and means to achieve those opportunities in AFNR systems
7117.D4.3	Identify how key organizational structures and processes affect organizational performance and the quality of products and services
7117.D4.4	Demonstrate those qualities, attributes, and skills necessary to succeed in, or further prepare for, a chosen career while effectively contributing to society.
Domain	Leadership
7117.D5.1	Communicate clearly, effectively, and with reason through speaking, writing, visuals, and active listening in formal and informal settings
7117.D5.2	Recognize and explain the role of the FFA in the development of leadership, education, employability, communications, and human relations skills
7117.D5.3	Examine roles within teams, work units, departments, organizations, interorganizational systems, and the larger environment
7117.D5.4	Acquire the skills necessary to positively influence others
7117.D5.5	Develop a skill set to enhance the positive evolution of the whole person
Domain	Supervised Agriculture Experience (SAE)
7117.D6.1	Explain the nature of and become familiar with those terms related to an SAE program.
7117.D6.2	Explore the numerous possibilities for an SAE program which a student might develop.
7117.D6.3	Develop an individual SAE program and implementation plan for record keeping skills.
Domain	Agricultural Business and Farm Management
7117.D7.1	Discuss the basic principles of management and decision-making as related to both farm and non-farm agribusiness.
7117.D7.2	Apply economic principles to case studies in farm and agribusiness.
7117.D7.3	Understand the major financial statements: what they report, how to interpret and use the data and how they are connected
7117.D7.4	Know the alternatives to meeting needs when resource analysis indicates the labor input in a business needs altered. Includes review of resume, interviewing and other job application skills.
7117.D7.5	Identify the best combination of resources to use relative to the enterprises selected for the operation including; crop inputs, livestock inputs, machinery and equipment, and farmstead

Next Level Programs of Study

Review Document

	and buildings.
7117.D7.6	Know the alternatives for farm recordkeeping and analysis
7117.D7.7	The student will learn to work with others in a management team to combine a limited number of inputs (price, credit policy, advertising dollars, and quantity ordered) within given parameters to experience the outcomes (profits). Emphasis is placed on the practical application of financial statements for analysis.

Precision Agriculture	
Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Precision Agriculture
NLPS Sequence	B
Course Code	7116
Course Description	<i>Precision Agriculture describes the purpose and concepts of precision agriculture and precision farming through classroom and lab-based instruction. It involves understanding and operation of the various precision agriculture tools including GPS, GIS, and VRT. Students will learn how to collect data, analyze data and use the information to make decisions. Provides an understanding and justifications that demonstrate the economic and environmental benefits of precision agriculture. The Precision Agriculture course also incorporates the use of UAVs. Students will demonstrate UAV competency and handling in order to achieve the Part 107 UAS certification.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Agriculture
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective credits for all diplomas Counts as a quantitative reasoning course*
Dual Credit Status	X (PCL/CTE)

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Precision Agriculture
7116.D1.1	Describe the basic purpose and concepts of precision agriculture.
7116.D1.2	Determine basic principles of the various tools of precision agriculture including GPS, GIS and VRT.
7116.D1.3	Recall basic knowledge of GPS and how it works.
7116.D1.4	Recognize the use of these tools to collect data, analyze data and use the information to make a decision.
7116.D1.5	Describe justifications that demonstrate the economic or environmental benefits of precision agriculture.
7116.D1.6	Locate support resources for the systems
7116.D1.7	Demonstrate proper setup and operation of guidance and documentation systems.
Domain	Unmanned Aerial Systems
7116.D2.1	Describe the benefits of UAVs operation in the Precision Agriculture industry.
7116.D2.2	Differentiate between multi-rotor and fixed wing aircraft and determine flight operating characteristics.
7116.D2.3	Demonstrate safe flight operation of an UAV.
7116.D2.4	Understand the rules and regulations of operating a drone/UAS
7116.D2.5	Understand sensors and data used in various industry monitoring (RGB, NIR, NDVI and Contour Mapping)
7116.D2.6	Decipher lighting conditions for best sensor imaging results

Next Level Programs of Study

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Soil Science
7113.D1.1	Understanding applied chemical, physical, and biological concepts related to soil.
7113.D1.2	Understanding of the origin, classification, and distribution of soils and their relationship to people and food production.
7113.D1.3	Understanding of the fertility management and conservation of soils.
7113.D1.4	Understand the environmental impact of soil use.
Domain	Nutrient Management
7113.D2.1	Understanding plant nutrient requirements and how to provide for those needs to achieve efficient crop production.
7113.D2.2	Use concepts and principles to calculate nutrient needs of the soil and the proposed crop
7113.D2.3	Analyze the soil pH and calculate the lime needs of the soil and proposed crop
7113.D2.4	Calculate the various decision impacts on profits
7113.D2.5	Know common fertilizer materials.
7113.D2.6	Understand proper fertilizer application methods and techniques.
7113.D2.7	Create fertility plans for corn, soybean, wheat, and alfalfa production.
7113.D2.8	Recognize the 17 chemical elements
7113.D2.9	Read and interpret soil analysis
7113.D2.10	Explain and demonstrate proper techniques for taking soil test
Domain	Pest Management
7113.D3.1	Apply the fundamentals of plant identification as they relate to weeds, diseases, and insects.
7113.D3.2	Identify the most prevalent weeds found in Indiana.
7113.D3.3	Identify the most prevalent insects in Indiana.
7113.D3.4	Identify the most prevalent plant disease in Indiana.
7113.D3.5	Categorize pesticides and growth regulators according to their toxicity to warm blooded animals, fish, and bees.
7113.D3.6	Use chemical information to evaluate the various controls of pests with minimal impact on the environment and beneficial insects, pathogens, and animals present.
7113.D3.7	Outline a schedule of safety procedures to be followed when using pesticides.

Next Level Programs of Study

Review Document

7113.D3.8	Identify the pests associated with crop loss
7113.D3.9	Determine when plant pest control measures are necessary.
7113.D3.10	Estimate the proportion of the crop affected.
7113.D3.11	Estimate the economic losses to be expected if control measures are not used.
7113.D3.12	Estimate cost of control measures. Describe the nature of concepts of working capital, analysis of cash, and cash flow from operations.

Precision Agriculture Capstone	
Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Precision Agriculture
NLPS Sequence	D
Course Code	7236
Course Description	<i>The Precision Agriculture Capstone course builds upon the knowledge and skills developed in the Principles, Precision Agriculture and Crop Management by developing advanced skills that students can apply to the field. As a capstone course, students should have the opportunity to apply their knowledge and use skills through an intensive work-based learning experience.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Agriculture; Precision Agriculture; Crop Management
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits max
Counts Toward	Counts as a directed elective or elective credits for all diplomas

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Crop Production
7236.D1.1	Explain aspects of U.S. agricultural production.
7236.D1.2	Describe major types of cropping systems.
7236.D1.3	Explain how soils influence crop production.
7236.D1.4	Explain hybrid and variety development, and influence of GM technology on crop production.
7236.D1.5	Formulate crop fertilizer recommendations based on soil test results, and design appropriate application techniques including correct timing and placement
7236.D1.6	Describe field crop physiology, growth, and development.
7236.D1.7	Develop tillage and crop management systems.
7236.D1.8	List characteristics of sustainable agriculture systems.
7236.D1.9	Learn about interaction between common crop production practices and environmental quality
7236.D1.10	Understand how crop fertilizer recommendations are generated
7236.D1.11	Learn about appropriate application of technological advances in agronomy to current crop production systems
7236.D1.12	Understand the interaction among common crop production practices, agricultural sustainability, and environmental quality
7236.D1.13	Employ scientific concepts to address issues facing the food, agriculture, and natural resource system
Domain	GPS Guidance Systems
7236.D2.1	Demonstrate competency in GPS constellation and signal frequency
7236.D2.2	Differentiate between communication protocols
7236.D2.3	Describe the level of accuracy necessary for different GPS-controlled guidance systems
7236.D2.4	Differentiate between RTK, CORS, and virtual reference stations
7236.D2.5	Demonstrate competency in installation, setup, and troubleshooting of assisted steering components

Next Level Programs of Study

Review Document

7236.D2.6	Demonstrate competency in installation, setup, and troubleshooting integrated steering systems
Domain	Application Controls
7236.D3.1	Demonstrate the use and functionality of rate controllers
7236.D3.2	Demonstrate the use and functionality of overlap control
7236.D3.3	Identify pumps, valves, and solenoids
7236.D3.4	Demonstrate competency in sprayer nozzle selection
7236.D3.5	Describe the equipment used in precision planting systems
7236.D3.6	Describe the equipment used in precision harvesting systems
Domain	Ag Application of GIS
7236.D4.1	Outline the objectives of using a geographic information system.
7236.D4.2	Explain the special GIS considerations of precision agriculture data and processing, such as encoding and import/export.
7236.D4.3	Demonstrate the ability to develop and manipulate a database.

Agribusiness Capstone	
Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Precision Agriculture
NLPS Sequence	D
Course Code	7238
Course Description	<i>Agribusiness Management Capstone course is a two semester course that introduces students to the Principles of agribusiness management and leadership from a local and global perspective, with the utilization of technology. The course will help students build a strong knowledge base of the agribusiness industry as they study agribusiness types, communications, agricultural law, leadership, and teamwork, ethics, and agricultural economics. Additionally, students will understand the role of selling in the agricultural economy, stressing the points and terminology necessary in today's agriculture. Students will demonstrate principles and techniques for planning, development, application and management of agribusiness systems through project-based learning and a supervised agriculture experience (work-based learning) programs.</i>
Prerequisite(s)/ Corequisite(s)	Any Agriculture Concentrator Sequence
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits max
Counts Toward	Counts as a directed elective or elective for all diplomas Counts as a quantitative reasoning course*

POSTSECONDARY AND CREDENTIAL INFORMATION

ITCC Course Alignment	AGRI 100: Introduction to Agriculture; AGRI 102: Agricultural Business and Farm Management
VU Course Alignment	AGBS 101: Introduction to Agribusiness Management
Four Yr. Course Alignment	
Postsecondary Credential	ITCC - CT Urban Horticulture (1.0601), CT Landscaping Technician (1.0605), TC Precision Agriculture Specialist (1.0201) VU - CG Agribusiness (1.0101)
Liberal Arts/Sciences Requirements	
Promoted Certifications	

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	AFNR Systems
7117.D1.1	Describe the role of agriculture in US and global societies through the domestication and distribution of the world's important crop and livestock species.
7117.D1.2	Recognize the diversity of AFNR systems in the US and the world.
7117.D1.3	Understand the size and productivity of farms and ranches in the US and around the world.
7117.D1.4	Understand US production systems for major grain crops, including Crop Rotation Systems, Tillage Systems, Variety Selection, and Harvest and grain storage technology.
7117.D1.5	Understand US production systems for major livestock animals.
7117.D1.6	Research, examine, and discuss issues and trends that impact AFNR systems on local, state, national and global levels.
7117.D1.7	Examine technologies and analyze their impact on AFNR systems.
Domain	Agribusiness

Next Level Programs of Study

Review Document

7117.D2.1	To have students develop an understanding of how economics relates to agriculture, and how economic principles are used to analyze and solve problems in agriculture and agribusiness.
7117.D2.2	To have students understand the structure of the U.S. Agriculture and how agriculture interacts with the aggregate economic system.
7117.D2.3	To have students recognize the role of producers, input suppliers, food marketing organizations, and consumers in the U.S. Agricultural economy.
7117.D2.4	Help students understand the qualities and characteristics employers in agribusiness expect in prospective employees and how students can develop those qualities and characteristics.
7117.D2.5	Describe the diversity of jobs and careers in agricultural industries in Indiana and the US.
Domain	Safety, Health, and Environment Management Systems
7117.D3.1	Identify and explain the implications of required regulations to maintain and improve safety, health, and environmental management systems.
7117.D3.2	Summarize the importance of safety, health, and environmental management in the workplace.
7117.D3.3	Use appropriate protective equipment and demonstrate safe and proper use of AFNR tools and equipment.
Domain	Careers
7117.D4.1	Evaluate the nature and scope of AFNR systems in society and the economy
7117.D4.2	Describe career opportunities and means to achieve those opportunities in AFNR systems
7117.D4.3	Identify how key organizational structures and processes affect organizational performance and the quality of products and services
7117.D4.4	Demonstrate those qualities, attributes, and skills necessary to succeed in, or further prepare for, a chosen career while effectively contributing to society.
Domain	Leadership
7117.D5.1	Communicate clearly, effectively, and with reason through speaking, writing, visuals, and active listening in formal and informal settings
7117.D5.2	Recognize and explain the role of the FFA in the development of leadership, education, employability, communications, and human relations skills
7117.D5.3	Examine roles within teams, work units, departments, organizations, interorganizational systems, and the larger environment
7117.D5.4	Acquire the skills necessary to positively influence others
7117.D5.5	Develop a skill set to enhance the positive evolution of the whole person
Domain	Supervised Agriculture Experience (SAE)
7117.D6.1	Explain the nature of and become familiar with those terms related to an SAE program.
7117.D6.2	Explore the numerous possibilities for an SAE program which a student might develop.
7117.D6.3	Develop an individual SAE program and implementation plan for record keeping skills.
Domain	Agricultural Business and Farm Management
7117.D7.1	Discuss the basic principles of management and decision-making as related to both farm and non-farm agribusiness.
7117.D7.2	Apply economic principles to case studies in farm and agribusiness.
7117.D7.3	Understand the major financial statements: what they report, how to interpret and use the data and how they are connected
7117.D7.4	Know the alternatives to meeting needs when resource analysis indicates the labor input in a business needs altered. Includes review of resume, interviewing and other job application

Next Level Programs of Study

Review Document

	skills.
7117.D7.5	Identify the best combination of resources to use relative to the enterprises selected for the operation including; crop inputs, livestock inputs, machinery and equipment, and farmstead and buildings.
7117.D7.6	Know the alternatives for farm recordkeeping and analysis
7117.D7.7	The student will learn to work with others in a management team to combine a limited number of inputs (price, credit policy, advertising dollars, and quantity ordered) within given parameters to experience the outcomes (profits). Emphasis is placed on the practical application of financial statements for analysis.

Natural Resources	
Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Natural Resources
NLPS Sequence	B
Course Code	5180
Course Description	<i>Natural Resources is a two semester course that provides students with a background in environmental science and conservation. Course work includes hands-on learning activities that encourage students to investigate areas of environmental concern. Students are introduced to the following areas of natural resources: soils, the water cycle, air quality, outdoor recreation, forestry, minerals, interrelationships between humans and natural systems, wetlands, wildlife, safety, careers, leadership, and supervised agricultural experience programs.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Agriculture
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as an elective or directed elective for all diplomas Fulfills a science requirement for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	
ADDITIONAL COURSE INFO	
Funding	Moderate Value Level I

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Safety
5180.D1.1	Demonstrate safety practices when working in an outdoor environment
5180.D1.2	Use proper safety practices/personal protective equipment when working with natural resources for work and recreation
5180.D1.3	Identify and utilize proper safety practices and personal protective equipment in laboratory settings
Domain	Natural Resources Management
5180.D2.1	Analyze the interdependence of organisms within an ecosystem (e.g., food webs, niches, impact of keystone species, etc.) and assess the dependence of organisms on non-living components (climate, geography, energy flow, nutrient cycling, etc.)
5180.D2.2	Evaluate biodiversity in ecosystems and devise strategies to enhance the function of an ecosystem and the availability of natural resources by increasing the level of biodiversity
5180.D2.3	Identify different types of biotic (e.g., plants, animals, etc.) and abiotic (e.g., minerals, soil, wind, solar, water, air, etc.) natural resources to protect, conserve, manage, and understand their role in a healthy ecosystem
5180.D2.4	Identify invasive species and understand their impact on the environment
Domain	Ecology
5180.D3.1	Assess the role that the atmosphere plays in the regulation of natural cycles (nitrogen, water, carbon, etc.)
5180.D3.2	Assess the causes (e.g., human, natural, etc.) and impacts of climate change, and discuss strategies to lessen its impact on natural resource systems
5180.D3.3	Identify aquatic systems (e.g., wetlands, watersheds, riparian zones, etc.) and evaluate their role in ecosystem function
5180.D3.4	Analyze how ground and surface water quality and quantity affect ecosystem function
5180.D3.5	Describe the stages of ecological succession

Next Level Programs of Study

Review Document

5180.D3.6	Analyze and summarize examples of habitat disturbances and habitat resilience
5180.D3.7	Compare and contrast techniques associated with sustainable forestry (e.g., timber stand improvement, diversity improvement, reforestation, etc.) to develop a management plan
5180.D3.8	Compare and contrast techniques associated with soil management (e.g., soil survey and interpretation, erosion control, etc.) to develop a management plan (e.g., erosion control, maximizing biodiversity, plant productivity, soil health, etc.)
5180.D3.9	Comprehend and apply ecological concepts (e.g., population ecology, population density and population dispersion, etc.) to living organisms in natural resource systems
5180.D3.10	Analyze factors that influence the establishment and spread of invasive species, evaluate their impact, and determine the appropriate steps to prevent or minimize the impact of invasive species
Domain	Humans and Natural Resources
5180.D4.1	Identify the history and specific purpose of agencies (e.g., SWCD, NRCS, USDA, FSA, etc.) and laws associated with natural resources systems on local, state, and national levels (e.g., water regulations, game laws, historic preservation laws, environmental policy, etc.)
5180.D4.2	Evaluate the impact and effectiveness of agencies associated with natural resources systems
5180.D4.3	Assess and explain how different kinds of human activity (e.g., agriculture, industry, transportation, etc.) affect the use and availability of natural resources (soil, minerals, wildlife, water, etc.)
5180.D4.4	Discuss causes and solutions of species extinction and the importance of biodiversity
5180.D4.5	Analyze how social considerations can affect the use and sustainability of natural resources such as wind turbines, solar panel farms, and hydro-electric dams
5180.D4.6	Examine and explain how economics affect the exploitation, conservation, and preservation of natural resources
5180.D4.7	Develop strategies and materials to communicate information to the public regarding topics related to the management, protection, enhancement, and improvement of natural resources
5180.D4.8	Assess the sustainable production, harvesting, processing and use of plant, animal, and aquatic wildlife species
5180.D4.9	Assess the sustainable extraction, processing and use of minerals and fossil fuels
5180.D4.10	Identify, assess, and apply the uses of natural resources for outdoor recreation opportunities
Domain	Maintenance and Protection
5180.D5.1	Identify and assess methods (e.g., fire, grazing, harvesting, plantings, etc.) used to manage and improve forests, rangeland, wildlife habitat, and the biological health of streams
5180.D5.2	Identify and assess management techniques for improving outdoor recreation opportunities
5180.D5.3	Identify, assess, and apply the uses of natural resources for outdoor recreation opportunities
5180.D5.4	Demonstrate geospatial skills, tools, and technologies to aid in developing, implementing, and evaluating natural resource management plans (land surveys, geographic coordinate systems, GIS data, etc.)

Next Level Programs of Study

Review Document

5180.D5.5	Identify and discuss ecologically harmful species and diseases

Forestry and Wildlife Management	
Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Natural Resources
NLPS Sequence	C
Course Code	7270
Course Description	<i>Forestry and Wildlife Management is a two semester course that provides students with opportunities to participate in a variety of activities including laboratory work. Students will explore concepts related to environmental and ecological impacts, forestry management, timber harvesting, tree production, and wood utilization, as well as environmental issues and career exploration</i>
Prerequisite(s)/ Corequisite(s)	Principles of Agriculture
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas Fulfills a science requirement for all diploma types
Dual Credit Status	X (PCL/CTE)
Additional Notes

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
7270.D1.1	Define forestry and explain the importance of forestry and forestry management
7270.D1.2	Identify the role of government and private organizations in managing forestry resources
7270.D1.3	Analyze historic and current trends in the forestry industry
7270.D1.4	Evaluate and analyze the interrelationships between forestry and humans.
7270.D1.5	Compare and contrast techniques associated with sustainable forestry (e.g., timber stand improvement, diversity improvement, reforestation, etc.).
7270.D1.6	Analyze a forest to determine which forestry techniques would improve that habitat.
7270.D1.7	Devise a forest management plan that improves the habitat while sustainably maximizing the amount of timber that can be harvested.
7270.D1.8	Define forest ecology, structure, and types of forest classifications
7270.D1.9	Investigate physical characteristics of trees, plant processes, growth, and taxonomy.
7270.D1.10	Explain the environmental and economic impact of deciduous and coniferous trees native to Indiana
7270.D1.11	Distinguish wood characteristics including wood properties, products, wood identification, and physiology.
7270.D1.12	Identify and safely utilize forestry tools and equipment.
7270.D1.13	Survey land and cruise timber.
7270.D1.14	Recommend management practices including genetic potential, reforestation, timber stand improvement, and harvesting.
7270.D1.15	Evaluate methods for forest protection from insect, disease, and other destructive agents.
7270.D2.1	Analyze the dynamics of an ecosystem.
7270.D2.2	Examine the diverse components of habitat and its relation to wildlife.
7270.D2.3	Calculate the population dynamics that relate to wildlife.
7270.D2.4	Identify the human role in wildlife and habitat management as it applies to historic, social, political, and economic concerns.
7270.D2.5	Examine the human impact on wildlife resources.
7270.D2.6	Examine the federal and state laws and regulations that pertain to the conservation and preservation of wildlife.

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
7271.D1.1	Use analytical procedures and instruments to manage environmental service systems within soil and water
7271.D1.2	Analyze and interpret laboratory and field samples in soil and water service systems.
7271.D1.3	Collect and prepare sample measurements using appropriate data collection techniques.
7271.D1.4	Utilize data analysis to identify trends in a data sample and assess the confidence that can be drawn from those conclusions.
7271.D1.5	Properly utilize scientific instruments in soil and water monitoring situations (e.g., laboratory equipment, environmental monitoring instruments, etc.).
7271.D1.6	Calibrate and use laboratory equipment according to standard operating procedures.
7271.D1.7	Calibrate and use environmental monitoring instruments according to standard operating procedures.
7271.D1.8	Evaluate the impact of public policies and regulations on soil and water service system operations.
7271.D1.9	Interpret and evaluate the impact of laws, agencies, policies, and practices affecting soil and water service systems.
7271.D1.10	Analyze the structure of laws associated with soil and water service systems.
7271.D1.11	Analyze the specific purpose of government agencies associated with soil and water service systems.
7271.D1.12	Assess the intent, feasibility and effectiveness of policies, practices, and initiatives common in business and advocacy groups associated with soil and water systems.
7271.D1.13	Compare and contrast the impact of current trends on regulation of soil and water service systems (e.g., climate change, population growth, international trade, etc.).
7271.D1.14	Develop proposed solutions to environmental issues, problems and applications using scientific principles of soil science, hydrology, microbiology, chemistry, and ecology.
7271.D1.15	Apply soil science and hydrology principles to environmental service systems.
7271.D1.16	Use a soil survey to determine the land capability classes for different parcels of land in an area.
7271.D1.17	Evaluate the soil composition in order to predict the impact of that soil on environmental service systems.
7271.D1.18	Conduct tests of soil to determine its potential for filtration of groundwater supplies and likelihood for flooding.
7271.D1.19	Assess the effectiveness of precautions taken to prevent or reduce contamination of groundwater supplies.
7271.D1.20	Apply chemistry principles to environmental service systems.
7271.D1.21	Evaluate a sample's soil chemistry and assess how the results may impact considerations in environmental service systems.
7271.D1.22	Evaluate a sample's water chemistry and assess how the results may impact considerations in environmental service systems.
7271.D1.23	Apply microbiology principles to environmental service systems.
7271.D1.24	Assess how the activities of microorganisms in soil affect environmental service systems and ecosystem biodiversity.

Next Level Programs of Study

Review Document

7271.D1.25	Analyze the microbial populations present in an area and assess how carbon cycling is affected.
7271.D1.26	Use pollution control measures to maintain a safe/ healthy soil and water systems.
7271.D1.27	Identify and distinguish types of pollution and distinguish between point source and nonpoint source pollution.
7271.D1.28	Research ways in which pollution can be managed and prevented and propose solutions to meet the needs of local systems.
7271.D1.29	Use tools, equipment, machinery, and technology common to tasks in soil and water service systems.
7271.D1.30	Use technological and mathematical tools to map land, facilities and infrastructure for soil and water service systems.
7271.D1.31	Demonstrate surveying and cartographic skills to make site measurements to address concerns and needs within soil and water service systems situation.
7271.D1.32	Interpret and evaluate GIS data to conclude about a scenario specific to soil and water service systems.
7271.D1.33	Analyze and document examples of utilization of breaking technology in soil and water systems.
7271.D1.34	Perform assessments of soil and water conditions using equipment, machinery, and technology.
7271.D1.35	Evaluate a sample of water to determine its quality and if it has been contaminated.
7271.D1.36	Evaluate a sample of soil to determine its quality and if it has been contaminated.

Sustainable Energy Alternatives	
Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Natural Resources
NLPS Sequence	C
Course Code	5229
Course Description	<i>Sustainable Energy Alternatives broadens a student's understanding of environmentally friendly energies. In this course students will use a combination of classroom, laboratory, and field experiences to analyze, critique, and design alternative energy systems. Class content and activities center on renewability and sustainability for our planet. Topics covered in this course include the following types of alternative energies: solar, wind, geothermal, biomass and emerging technologies. Leadership development, supervised agricultural experiences, and career exploration opportunities are explored in the field. Sustainable energy is also included.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Agriculture
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Fulfills a science course requirement for all diplomas Counts as a directed elective or elective for all diplomas

CONTENT STANDARDS AND COMPETENCIES		
Competency #	Competency	
Domain	Renewable Energy	
5229.D1.1	Students apply knowledge of renewable resources to the management of those resources.	
5229.D1.2	Differentiate renewable fuels and renewable energy	
5229.D1.3	Differentiate renewable, non-renewable, sustainable, and exhaustible	
5229.D1.4	Identify natural sources of kinetic, thermal, and light energy	
5229.D1.5	Evaluate the impact of alternative energy sources on the environment.	
5229.D1.6	Explain the “green” movement	
5229.D1.7	Compare appropriate energy sources per setting	
5229.D1.8	Identify advantages and disadvantages to alternative energy sources	
5229.D1.9	Evaluate the impact of alternative energy sources on the environment	
5229.D1.10	Identify and describe various forms of energy	
5229.D1.11	Explain how converting to green energy would affect the agriculture industry	
5229.D1.12	Explain how converting to green energy would affect costs to producers and consumers	
Domain	Solar Energy	
5229.D2.1	Students apply concepts of renewable resources to solar energy.	

5229.D2.2	Investigate passive environmental systems
5229.D2.3	Contrast photovoltaic system performances
5229.D2.4	Monitor a photovoltaic system output to effective lumen ratio
5229.D2.5	Demonstrate solar heat systems performance
5229.D2.6	Describe solar energy and how it is harnessed
5229.D2.7	Explain the difference between passive solar and active solar
5229.D2.8	Evaluate the advantages and disadvantages of using solar energy
5229.D2.9	Describe basic solar movement and effect of the Earth's tilt
5229.D2.10	Predict solar position using solar path diagrams
5229.D2.11	Describe how a photovoltaic solar cell works
5229.D2.12	Identify factors that reduce/enhance solar irradiation
Domain	Wind Energy
5229.D3.1	Students apply concepts of alternative energy resources to wind energy.
5229.D3.2	Research varying wind energy systems
5229.D3.3	Design small wind blades using common materials
5229.D3.4	Investigate site issues for wind energy system
5229.D3.5	Describe wind energy and the way it is harnessed
5229.D3.6	Explain why farmers and ranchers are amenable to wind technology
5229.D3.7	Evaluate the advantages and disadvantages to wind technology
5229.D3.8	Compare topography of different quadrangles and geographical features that could affect wind conditions
5229.D3.9	Evaluate short term weather conditions and their implications on wind turbines
Domain	Geothermal Energy
5229.D4.1	Students discover geothermal energy as an alternative energy resource.
5229.D4.2	Differentiate geothermal power and geothermal heat
5229.D4.3	Describe geothermal heat set-up parameters
5229.D4.4	Describe geothermal energy and the way it is harnessed
5229.D4.5	Evaluate the advantages and disadvantages of using geothermal energy
5229.D4.6	Analyze a diagram of a geothermal power plant
Domain	Biomass Systems
5229.D5.1	Students evaluate various aspects of biomass systems as alternative energy resources.
5229.D5.2	Compare potential biomass feedstock
5229.D5.3	Identify limiting factors of the use of biomass for energy
5229.D5.4	Describe anaerobic digestion
5229.D5.5	Model a small scale Anaerobic Digestion closed-loop system
5229.D5.6	Describe the process used in producing alcohol from biomass
5229.D5.7	Produce alcohol and co-products from biomass
5229.D5.8	Explain the process of transesterification
5229.D5.9	Diagram the process used in producing biodiesel from biomass
5229.D5.10	Explain the process of fermentation
5229.D5.11	Explain the process of methanogenesis
5229.D5.12	Illustrate the process used in producing methane from biomass
5229.D5.13	Produce methane and co-products from biomass
5229.D5.14	Describe the scientific principles related to composting
5229.D5.15	Explain biomass and sources of biomass

Next Level Programs of Study

Review Document

5229.D5.16	Assess the characteristics of biomass that make it useful for biofuels production
5229.D5.17	Evaluate the technologies used to create biofuels from biomass
Domain	Energy Technologies
5229.D6.1	Students research emerging renewable energy resource technologies.
5229.D6.2	Research other renewable sources of energy
5229.D6.3	Critique viability of other systems
5229.D6.4	Research storage issues and possibilities
5229.D6.5	Describe hydroelectric generation techniques and procedures
5229.D6.6	Discuss the feasibility of new and emerging energy resources
5229.D6.7	Discuss emerging and alternative electric power generation technologies and fuel sources
5229.D6.8	Diagram biogeochemical cycles and explain the processes
Domain	Careers
5229.D7.1	Students examine the scope of career opportunities in, and the importance of, agriculture to the economy.
5229.D7.2	Define and explore environmental and natural resource agriculture and environmental and natural resource agribusiness and their role in the economy
5229.D7.3	Evaluate and explore the environmental and natural resource career opportunities in agriculture
5229.D7.4	Identify how key organizational structures and processes affect organizational performance and the quality of products and services
5229.D7.5	Demonstrate those qualities, attributes, and skills necessary to succeed in, or further prepare for, a chosen career while effectively contributing to society
Domain	Leadership
5229.D8.1	Students validate the necessity of leadership skills development in conjunction with participation in The National FFA Organization (FFA) as a critical component to a well-rounded agricultural education.
5229.D8.2	Acquire and demonstrate communication skills such as writing, public speaking, and listening while refining oral, written, and verbal skills
5229.D8.3	Recognize and explain the role of the FFA in the development of leadership, education, employability, communications, and human relations skills
5229.D8.4	Examine roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment
5229.D8.5	Acquire the skills necessary to positively influence others
5229.D8.6	Develop a skill set to enhance the positive evolution of the whole person
Domain	Supervised Agriculture Experience
5229.D9.1	Students validate the necessity of a Supervised Agricultural Experience (SAE) program as a critical component to a well-rounded agricultural education.
5229.D9.2	Explain the nature of and become familiar with those terms related to an SAE program
5229.D9.3	Explore the numerous possibilities for an SAE program which a student might develop
5229.D9.4	Develop an individual SAE program and implement record keeping skills

Agricultural Research Capstone

Career Cluster	Agriculture, Food and Natural Resources

Next Level Programs of Study

Review Document

Program of Study	Agri-Science – Plants or Animals; Ag Mechanical and Engineering	
NLPS Sequence	D	
Course Code	7262	
Course Description	<i>Agricultural Research Capstone course includes extended laboratory, field, and literature investigations in one or more specialized agricultural science disciplines, such as animal, plant, food, natural resources, biotechnology, engineering, etc. Students enrolled in this course will apply scientific applications, concepts, principles, and design process to solve complex, real-world issues in agriculture. Students will become familiar with laboratory procedures used in an educational, research, or industrial setting. Students will complete an end-of-course project and presentation, such as a scientific research paper, agriscience fair project, or some other suitable presentation of their findings.</i>	
Prerequisite(s)/ Corequisite(s)	Any Agriculture Concentrator Sequence	
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits max	
Counts Toward	Counts as a directed elective or elective credits for all diplomas Counts as a quantitative reasoning course	
Dual Credit Status	X (PCL/CTE)	
Additional Notes

Arts/Sciences Requirements	
Promoted Certifications	
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
7262.D1.1	Examine historical and current data to identify issues impacting AFNR systems.
7262.D1.2	Evaluate and explain emerging trends and the opportunities they may create within the AFNR systems.
7262.D1.3	Evaluate and explain how scientists use the scientific method to build upon previous findings in current and emerging research.
7262.D1.4	Solve problems in AFNR workplaces or scenarios using technology.
7262.D1.5	Evaluate the importance of technology use and how it impacts AFNR systems.
7262.D1.6	Analyze and assess at least two public policies that impact each AFNR system.
7262.D1.7	Create and propose a hypothetical policy that will impact current AFNR systems.
7262.D1.8	Evaluate geographic data and select necessary data sets to solve problems within AFNR systems.
7262.D1.9	Devise a strategy to solve a problem in an AFNR system using a set of economic data.
7262.D2.1	Execute health, safety, and environmental procedures to comply with regulatory and safety standards.
7262.D2.2	Construct and implement methods to evaluate compliance with required safety, health, and environmental management regulations.
7262.D2.3	Create and implement a health and safety policy plan for AFNR workplaces.
7262.D2.4	Assess various emergency response plan requirements for an AFNR workplaces and/or facility.
7262.D2.5	Examine and categorize examples of how to avoid health or safety risks in AFNR workplaces.
7262.D2.6	Create a plan to mitigate the level of contamination or injury identified as a risk in the workplace.
7262.D2.7	Design and implement plans to ensure the use of appropriate protective equipment when using various AFNR tools and equipment.
7262.D2.8	Evaluate and select appropriate tools and equipment to complete AFNR tasks.
7262.D2.9	Assess and demonstrate appropriate operation, storage, and maintenance techniques for AFNR tools and equipment.
7262.D3.1	Maintain and interpret laboratory records documented in a laboratory to ensure data accuracy and integrity (e.g., avoid bias, record any conflicts of interest, avoid misinterpreted results, etc.).
7262.D3.2	Devise a strategy for ensuring the security of data and information collected in a laboratory
7262.D3.3	Assess the need for personal protective equipment in a variety of situations and select the appropriate equipment to wear when working with biological and chemical materials.
7262.D3.4	Perform waste disposal according to the standard operating procedures.
7262.D3.5	Perform ongoing maintenance of laboratory equipment according to the standard operating procedures (e.g., calibration, testing, etc.).
7262.D3.6	Operate advanced laboratory equipment and measurement devices.

Next Level Programs of Study

Review Document

7262.D4.1	Evaluate progress toward AFNR career goals and identify opportunities for improvement and necessary adjustments to one's plan of action
7262.D4.2	Implement one's personal plan of action for obtaining the required education, training and experiences and evaluate progress to identify opportunities for improvement and necessary adjustments.
7262.D4.3	Evaluate, update, and improve a set of personal tools to reflect current skills, experiences, education, goals, etc. and complete the processes needed to pursue and obtain a career in an AFNR pathway.
7262.D4.4	Assess personal skills and align them with potential career opportunities in AFNR pathways.

Principles of Veterinary Science	
Career Cluster	Agriculture, Food and Natural Resources
Program of Study	Veterinary Science
NLPS Sequence	A
Course Code	7280
Course Description	<i>Principles of Veterinary Science is a two-semester course that provides students with an overview of the small and large animal veterinary industry which includes companion, food, and exotic animals. Principles of Veterinary Science will cover skills common to specific veterinary career topics such as animal care, veterinary assistant, veterinary technician, and veterinarian. Students will learn foundational veterinary knowledge for large and small animals which includes practical lab skills and common office practices.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas
Dual Credit Status	X (PCL/CTE)

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Foundational Vet Knowledge</i>
7280.D1.1	Identify the basic anatomy and physiology of animals
7280.D1.2	Understand what normal physiology is including theriogenology (reproduction)
7280.D1.3	Analyze veterinary terms as to their meanings and recognize common prefixes, suffixes, and roots
7280.D1.4	Know the medical terminology relating to the organism and the position
7280.D1.5	Develop appropriate use of directional terms
7280.D1.6	Describe anatomical structures and body systems by using appropriate medical terminology
7280.D1.7	Recognize, pronounce, spell, and define medical terms relating to diagnosis, pathology, and treatment of animals
7280.D1.8	Demonstrate mathematical skills for client assessment and treatment
7280.D1.9	Convert, calculate, and analyze problems as it relates to veterinary medicine
7280.D1.10	Interpret data such as tables, charts, and graphs
7280.D1.11	Recognize the importance of animals in our society and explain the human-animal bond
7280.D1.12	Identify trends, issues, and historical events that have influenced animal use and care
7280.D1.13	Describe the legal aspects of animal welfare and animal rights; in addition, evaluate the principles of veterinary medical ethics
7280.D1.14	Develop knowledge and practical skills in the area of animal behavior and communication
7280.D1.15	Recognize behaviors and communications related to illness and reproduction
Domain	<i>Basic Office and Hospital Procedures</i>
7280.D2.1	Practice techniques for communicating with the veterinary medical team and client
7280.D2.2	Understand ethical conduct in relationship to the day-to-day operations of a vet hospital
7280.D2.3	Demonstrate knowledge of basic cleaning techniques of animal kennels and bedding, examination rooms, hospital facilities, and surgical suites
7280.D2.4	Practice procedures for care, maintenance, and use of diagnostic, therapeutic, surgical, and anesthetic equipment, and supplies
7280.D2.5	Determine and record temperature, pulse, respiration, body condition score, and weight of patients
7280.D2.6	Demonstrate knowledge of basic normal and abnormal animal behavior and describe the characteristics and signs of a healthy animal

Next Level Programs of Study

Review Document

7280.D2.7	Utilize patient & personnel safety measures and discuss emergency procedures
7280.D2.8	Be familiar with OSHA regulations and understand the types of hazards common in the veterinary practice
7280.D2.9	Place and remove small animals from cages and place and restrain small animals on tables and floor <ul style="list-style-type: none"> • Apply dog and cat safety muzzle • Apply Elizabethan collar • Apply restraint pole • Demonstrate standing, sitting, and lateral restraint positions • Recognize when to alter normal restraint for compromised patients in the exam room (i.e., Ringworm, Contagious diseases, Ectoparasite infestation) and describe appropriate action or personnel to notify
7280.D2.10	Restrain birds, rabbits, pocket pets, and exotics (Optional)
7280.D2.11	Restrain large animals (Optional) <ul style="list-style-type: none"> • Halter, tie, and lead horses • Restrain cattle & horses • Apply twitch • Apply nose tongs/ leads • Restraint of sheep & swine • Load large animals

CONTENT STANDARDS AND COMPETENCIES		
Competency #	Competency	
Domain	Pharmacy and Pharmacology	
7281.D1.1	Know the Legal requirements and procedures for preparing, storing, and dispensing pharmacological and biological agents	
7281.D1.2	Classify the common drugs used in veterinary medicine know the toxicology of the commonly used drugs and identify the contraindications, side effects, and normal and abnormal drug reactions and interactions	
7281.D1.3	Use basic medical terminology and be able to simplify the terminology for the client	
7281.D1.4	Understand the various routes of administration of pharmacological and biological agents (including vaccines) and identify the equipment used to administer medications, including restraints	
7281.D1.5	Label and package dispensed drugs correctly	
7281.D1.6	Store, safely handle and dispose of biological and therapeutic agents, pesticides, and hazardous waste	
7281.D1.7	Explain the proper methods of disposal for syringe, needles, and other sharp objects	
7281.D1.8	Perform inventory control procedures including restocking supplies and checking expiration dates	
Domain	Exam Room Procedures	
7281.D2.1	Express anal sacs using the external method	
7281.D2.2	Identify external parasites: mites, lice, fleas, and ticks	

Next Level Programs of Study

Review Document

7281.D2.3	Recognize AKC dog breeds and CFA cat breeds
7281.D2.4	Be able to properly identify the gender of small animal species, particularly felines
7281.D2.5	Perform exam room grooming (i.e., trimming nails, external ear canal cleaning, etc.)
Domain	Small Animal Nursing
7281.D3.1	Define zoonosis and identify potential zoonotic diseases
7281.D3.2	Practice isolation procedures
7281.D3.3	Define the process of hazardous waste disposal
7281.D3.4	Describe and perform basic sanitation
7281.D3.5	<p>Perform and document initial and ongoing evaluations of physical, behavioral, nutritional, and environmental status of animals to provide for optimal animal/client safety and health</p> <ul style="list-style-type: none"> • Animal assessment and monitoring techniques, including but not limited to surgery, hospitalization, physical exam, and excluding anesthetic monitoring • Understand the principles of animal behavior • Demonstrate a basic understanding of common diseases and medical conditions and recognize signs and symptoms that may indicate disease or illness
7281.D3.6	<p>Perform animal nursing and clinical diagnostic procedures (including but not limited to post-operative care, catheterization, wound management, blood pressure measurement, electrocardiography) to aid in diagnosis, prognosis, and implementation of prescribed treatments Clinical diagnostic procedures, including but not limited to blood pressure measurement, electrocardiography, tonometry</p> <ul style="list-style-type: none"> • Monitor/restrain patients for fluid therapy and record observations • Demonstrate understanding of treatment plan
7281.D3.7	<p>Animal nursing procedures including but not limited to pre/post-operative care technique, casting, bandaging.</p> <ul style="list-style-type: none"> • Apply and remove bandages to healthy animals - (equine leg and tail wraps - optional) • Perform hand pilling (dog, cat) • Perform therapeutic bathing, basic grooming, and dipping of small animals • Clean external ear canals • Prepare food & prescription diets - be aware of any special dietary needs
7281.D3.8	Practice animal first aid, triage, and emergency/critical care techniques
7281.D3.9	<p>Provide a safe, sanitary, and comfortable environment for animals to ensure optimal healthcare and client/personnel safety.</p> <ul style="list-style-type: none"> • Animal handling and restraint techniques • Animal husbandry • Disease control and prevention techniques (including but not limited to vaccination, wellness care, herd health) • Facility cleaning and disinfection techniques
7281.D3.10	Demonstrate an understanding of the euthanasia and postmortem care

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Historic and Current Trends Impacting the Animal Systems Industry</i>
5070.D1.1	Evaluate the development and implications of animal origin, domestication and distribution and assess animal production methods for use in animal systems based on effectiveness.
5070.D1.2	Evaluate the implications of animal adaptations on production practices and the environment.
5070.D1.3	Predict trends and implications of future developments within different animal industries on production practices and the environment.
5070.D1.4	Evaluate the effectiveness of different production methods and defend the use of selected methods using data and evidence.
5070.D1.5	Devise and evaluate marketing plans for an animal agriculture product or service.
5070.D1.6	Select and defend the use of a specific record management system based upon its effectiveness for a business related to animal systems.
5070.D1.7	Devise and evaluate plans to manage wildlife populations to achieve optimal ecological health.
Domain	<i>Global Perspective of Laws and Sustainability</i>
5070.D2.1	Analyze and apply laws and sustainable practices to animal agriculture from a global perspective.
5070.D2.2	Evaluate the impact of laws pertaining to animal agriculture (e.g., pros, cons, effect on individuals, effect on businesses, etc.) and assess the compliance of production practices with established regulations.
5070.D2.3	Select, evaluate, and defend the use of sustainable practices in animal agriculture.
Domain	<i>Animal Husbandry and Welfare</i>
5070.D3.1	Demonstrate management techniques that ensure animal welfare and analyze procedures to ensure safety of animal products.
5070.D3.2	Implement and evaluate quality-assurance programs and procedures for animal production.
5070.D3.3	Devise, implement and evaluate safety procedures and plans for working with animals by species using information based on animal behavior and responses.
5070.D3.4	Devise economical recommendations to increase the welfare of animals in animal systems.

Next Level Programs of Study

Review Document

5070.D3.5	Select, evaluate, and defend the use of specific tools, technology or equipment used to perform animal husbandry and welfare tasks.
5070.D3.6	Research and evaluate programs to assure the safety of animal products for consumption.
5070.D3.7	Evaluate the effectiveness of animal and/or premise identification programs for a given species.
Domain	Animal Nutrition
5070.D4.1	Analyze the nutritional requirements of animals and analyze feed rations to assess their effectiveness
5070.D4.2	Assess nutritional needs for an individual animal based on its growth stage and production system.
5070.D4.3	Design and defend the use of a nutritional program by demonstrating the relationship between the nutrient requirements and the feedstuffs provided.
5070.D4.4	Identify essential and non-essential nutrients. In addition, describe the relationship between amino acids, vitamins, and minerals in the health of cells and organs.
5070.D4.5	Select appropriate feedstuffs for animals based on a variety of factors (e.g., economics, digestive system and nutritional needs, etc.).
5070.D4.6	Select and utilize animal feeds based on nutritional requirements, using rations for maximum nutrition and optimal economic production.
5070.D4.7	Make and defend decisions regarding whether to use feed additives and growth promotions after researching and considering scientific evidence, production system needs and goals, and input from industry professionals.
5070.D4.8	Select, evaluate, and defend the use of specific tools or equipment used to perform animal nutrition tasks.
5070.D4.9	Evaluate and summarize the potential impacts, positive and negative, of compliance and/or noncompliance with a feed label and feeding directions.
5070.D4.10	Research and recommend technological improvements to provide proper nutrition to animals.
Domain	Animal Reproduction
5070.D5.1	Students evaluate animals for breeding readiness and soundness and apply scientific principles to select and care for breeding animals.
5070.D5.2	Select breeding animals based on characteristics of the reproductive organs.
5070.D5.3	Evaluate and select animals for reproductive readiness.
5070.D5.4	Treat or cull animals with reproductive problems.
5070.D5.5	Summarize the process of sexual maturation
5070.D5.6	Identify and discuss various breeding systems in domesticated animals
5070.D5.7	Describe the function of the animal/host defense mechanism
5070.D5.8	Discuss the direct and indirect impact of disease on animal health
5070.D5.9	Compare and contrast the reproductive organs for male and female domesticated animal species.
5070.D5.10	Describe ectoderm, endoderm, and mesoderm as three germ layers that give rise to tissues and organs. Describe blastula and gastrula formation, and the function of morphogens, and recognize their importance in the developmental processes of vertebrates.
5070.D5.11	Define and describe estrous cycle(s). Describe how hormones act during the estrous cycle and how they are used to suppress it.
5070.D5.12	Discuss the social implications of reproductive and genetic technologies used in

	animal husbandry (e.g., embryo transfer, artificial insemination, gene transfer, cloning).
5070.D5.13	Describe spermatogenesis and sperm motility. List and explain factors that affect both.
5070.D5.14	Describe the steps in lactation.
5070.D5.15	Describe parturition and the method(s) used to predict when it occurs.
5070.D5.16	Select and evaluate a breeding system based on the principles of genetics.
5070.D5.17	Select and evaluate breeding animals and determine the probability of a given trait in their offspring.
5070.D5.18	Perform a DNA analysis and use the data to make and defend breeding decisions.
5070.D5.19	Create a plan to differentiate care of a species of breeding animals throughout their growth stages.
5070.D5.20	Describe ways that animals prevent inbreeding and discuss genetic diversity.
5070.D5.21	Compare and contrast natural selection with artificial selection, as used by humans to domesticate animals and breed improved varieties.
5070.D5.22	Compare and contrast adaptations of animals for survival in different environmental conditions.
5070.D5.23	Describe the role of biotechnology in the process of selection.
5070.D5.24	Explain the science behind mammalian cloning. Compare and contrast cloning a gene and an animal.
5070.D5.25	Describe the relationship between genotype and phenotype.
5070.D5.26	Select animal breeding methods based on reproductive and economic efficiency.
5070.D5.27	Evaluate the implementation and effectiveness of artificial insemination techniques.
5070.D5.28	Create and evaluate plans and procedures for estrous synchronization, superovulation, flushing, embryo transfer and other reproductive management practices.
5070.D5.29	Select and assess animal performance based on quantitative breeding values for specific characteristics.
Domain	Animal Environmental Considerations
5070.D6.1	Students design animal housing, equipment, and handling facilities for the major systems of animal production that comply with government regulations and safety standards.
5070.D6.2	Design an animal facility focusing on animal requirements, economic efficiency, sustainability, safety, and ease of handling.
5070.D6.3	Select, use, and evaluate equipment, technology, and handling procedures to enhance sustainability and production efficiency.
5070.D6.4	Evaluate facility designs and make recommendations to ensure that it meets standards for the legal, safe, ethical, economical, and efficient production of animals.
5070.D6.5	Evaluate the impact of laws pertaining to animal systems.
Domain	Animal Classification, Anatomy, & Physiology
5070.D7.1	Students classify animals according to taxonomic classification systems and use (e.g., agricultural, companion, etc.).
5070.D7.2	Assess taxonomic characteristics and classify animals according to the taxonomic classification system.
5070.D7.3	Recommend different uses for an animal species based upon an analysis of local market needs.
5070.D7.4	Apply knowledge of classification terms to communicate with others about animal systems in an effective and accurate manner.
5070.D7.5	Define the terms hypertonic, hypotonic, and isotonic. Describe the phenomena of osmosis,

	and predict the direction that water will move given the concentrations of solutes in adjacent cells.
5070.D7.6	Describe the biochemistry and functions of animal cell membranes. In doing so, describe the fluid mosaic model of the membrane and the role of the cell membrane proteins in transporting materials in and out of cells.
5070.D7.7	Describe cellular respiration. Recognize that animals perform only respiration, while plants perform both photosynthesis and respiration. Also, describe the transformation of energy during respiration, and the role of ATP produced in respiration for other metabolic processes.
5070.D7.8	Students apply principles of comparative anatomy and physiology to uses within various animal systems.
5070.D7.9	Correlate the functions of animal cell structures to animal growth, development, health, and reproduction.
5070.D7.10	Apply the processes of meiosis and mitosis to solve animal growth, development, health and reproductive problems.
5070.D7.11	Apply knowledge of anatomical and physiological characteristics of animals to make production and management decisions.
5070.D7.12	Compare and contrast muscle function under anaerobic and aerobic conditions
5070.D7.13	Identify and explain the major organ systems found in vertebrae systems (Muscular, Skeletal, Circulatory, Respiratory, Digestive, Nervous, Endocrine, Integumentary, Excretory, Urinary, Immune)
5070.D7.14	Describe the organization of the animal body, cells, tissues, organs, and organ systems
5070.D7.15	Discuss four basic tissue types: epithelial, connective, muscle, and nervous
5070.D7.16	Students select and train animals for specific purposes and maximum performance based on anatomy and physiology.
5070.D7.17	Evaluate and select animals to maximize performance based on anatomical and physiological characteristics that affect health, growth, and reproduction
5070.D7.18	Choose, implement, and evaluate sustainable and efficient procedures (e.g., selection, housing, nutrition, and management) to produce consistently high-quality animals that are well suited for their intended purposes.
5070.D7.19	Evaluate and select animals to produce superior animal products based on industry standards.
Domain	Animal Health
5070.D8.1	Students design programs to prevent animal diseases, parasites and other disorders and ensure animal welfare.
5070.D8.2	Select and use tools and technology to meet specific animal health management goals.
5070.D8.3	Determine when an animal health concern needs to be referred to an animal health professional.
5070.D8.4	Treat common diseases, parasites, and physiological disorders of animals according to directions prescribed by an animal health professional.
5070.D8.5	Design and implement a health maintenance and a disease and disorder prevention plan for animals in their natural and/or confined environments.
5070.D8.6	Identify and describe surgical and nonsurgical veterinary treatments and procedures to meet specific animal health care objectives.
5070.D8.7	Describe the function of the animal/host defense mechanism
5070.D8.8	Describe the use of antibiotics in animal health and describe how antibiotics work. Discuss the impact improper use of antibiotics has on antibiotic resistance.

Next Level Programs of Study

Review Document

5070.D8.9	Discuss the role of blood in host defense
5070.D8.10	Discuss the impact of disease on animal health.
5070.D8.11	Describe the various parasites and their impact on organ systems. Discuss host specificity and the importance of it.
5070.D8.12	Students analyze biosecurity measures utilized to protect the welfare of animals on a local, state, national, and global level.
5070.D8.13	Design and evaluate a biosecurity plan for an animal production operation.
5070.D8.14	Research and evaluate the effectiveness of zoonotic disease prevention methods and procedures to identify those that are best suited to ensure public safety and animal welfare.
Domain	Environmental Impacts of Animal Production
5070.D9.1	Design and implement methods to reduce the effects of animal production on the environment.
5070.D9.2	Devise a plan that includes measures to reduce the impact of animal agriculture on the environment.
5070.D9.3	Apply valid and reliable research evidence to predict the potential effects of different environmental conditions for an animal population.
5070.D9.4	Devise and improve plans to establish favorable environmental conditions for animal growth and performance based on a variety of factors (e.g., economic feasibility, environmental sustainability, impact on animals, etc.).
Domain	Leadership
5070.D10.1	Students validate the necessity of leadership skills development in conjunction with participation in The National FFA Organization (FFA) as a critical component to a well-rounded agricultural education.
5070.D10.2	Communicate clearly, effectively, and with reason through speaking, writing, visuals, and active listening in formal and informal settings
5070.D10.3	Recognize and explain the role of the FFA in the development of leadership, education, employability, communications, and human relations skills
5070.D10.4	Examine roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment
5070.D10.5	Acquire the skills necessary to positively influence others
5070.D10.6	Develop a skill set to enhance the positive evolution of the whole person
Domain	Supervised Agriculture Experience
5070.D11.1	Students validate the necessity of a Supervised Agricultural Experience (SAE) program as a critical component to a well-rounded agricultural education.
5070.D11.2	Explain the nature of and become familiar with those terms related to an SAE program
5070.D11.3	Explore the numerous possibilities for an SAE program which a student might develop
5070.D11.4	Develop an individual SAE program and implementation plan for record keeping skills
Domain	Careers
5070.D12.1	Students examine the scope of career opportunities in and the importance of agriculture to the economy.
5070.D12.2	Evaluate the nature and scope of animal sciences in agriculture, society, and the economy
5070.D12.3	Describe career opportunities and means to achieve those opportunities in animal science
5070.D12.4	Explain the nature of and become familiar with those terms related to an SAE program
5070.D12.5	Explore the numerous possibilities for an SAE program which a student might develop

Veterinary Science Capstone	
Career Cluster	Agriculture
Program of Study	Veterinary Science
NLPS Sequence	D
Course Code	7282
Course Description	<i>Veterinary Science Capstone is a two-semester course that builds upon the knowledge and skills developed in the animal and veterinary courses by developing advanced skills that students can apply to the field. As a capstone course, students should have the opportunity to apply their knowledge and use skills through an intensive work-based learning experience. Students will explore concepts related to pharmacy and pharmacology, medical math, animal nursing, radiology and ultrasound imaging, surgical preparation and assisting</i>
Prerequisite(s)/ Corequisite(s)	Principles of Veterinary Science; Advanced Life Science: Animals; Veterinary Science
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	
ADDITIONAL COURSE INFO	
Funding	Moderate Value Level II
Bulletin 400	● No license available
Rules 46-47	● No license available

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Vet Office and Hospital Procedures</i>
7282.D1.1	Greet Clients and demonstrate proper appointment scheduling and make appointments
7282.D1.2	Prepare appropriate certificates for client' signature and perform basic veterinary medical record keeping procedures
7282.D1.3	Admit patient following the established policies of the veterinary setting
7282.D1.4	Demonstrate proficiency with typing and computer skills
7282.D1.5	Utilize basic medical terminology
7282.D1.6	Perform basic invoicing, billing, and payment on account procedures
7282.D1.7	Inventory supplies on a regular schedule and restock shelves
7282.D1.8	Maintain x-ray, surgery, and laboratory logs
7282.D1.9	Perform basic filing and retrieving of medical records, radiographs, lab reports, etc.
Domain	<i>Surgical Preparation and Assisting</i>
7282.D2.1	Prepare and maintain the surgical environment, equipment, instruments, and supplies to meet the needs of the surgical team and patient. <ul style="list-style-type: none"> • Practice sterilization techniques and quality assurance for equipment and supplies
7282.D2.2	Prepare patient for procedure, including surgical site scrub and patient positioning <ul style="list-style-type: none"> • Perform patient positioning techniques including but not limited to diagnostic imaging, surgery
7282.D2.3	Function as a sterile surgical assistant, including but not limited to aiding in tissue handling, suturing, instrument handling, to ensure patient safety and procedural efficiency <ul style="list-style-type: none"> • Practice aseptic technique • Understand and perform basic surgical procedures • Recognize suturing methods and techniques • Maintain fluid balance and therapy
7282.D2.4	Function as a circulating (non-sterile) surgical assistant to ensure patient safety and procedural efficiency. <ul style="list-style-type: none"> • Practice sterile and circulating (non-sterile) surgical assisting procedures and instrumentation
7282.D2.5	Maintain proper operating room conduct and asepsis
7282.D2.6	Perform post-surgical clean up
7282.D2.7	Fold surgical gowns and drapes
7282.D2.8	Have knowledge of: <ul style="list-style-type: none"> • Surgical equipment • Surgical room and prep area • Instrument cleaning and care

Introduction to Construction	
Career Cluster	Architecture and Construction
Program of Study	
NLPS Sequence	Introductory Course
Course Code	4792
Course Description	<i>Introduction to Construction is a course that will offer hands-on activities and real-world experiences related to the skills essential in residential, commercial and civil building construction. During the course students will be introduced to the history and traditions of construction trades. The student will also learn and apply knowledge of the care and safe use of hand and power tools as related to each trade. In addition, students are introduced to blueprint reading, applied math, basic tools and equipment, and safety. Students will demonstrate building construction techniques, including concrete and masonry, framing, electrical, plumbing, dry walling, HVAC, and painting as developed locally in accordance with available space and technologies. Students learn how architectural ideas are converted into projects and how projects are managed during a construction project in this course. Students study construction technology topics such as preparing a site, doing earthwork, setting footings and foundations, building the superstructure, enclosing the structure, installing systems, finishing the structure, and completing the site. Students also investigate topics related to the purchasing and maintenance of structures, special purpose facilities, green construction and construction careers.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 or 2 semester course, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	
Additional Notes	Note: This course qualifies for funding at the 8 th grade level

Architecture and Construction: Special Topics	
Career Cluster	Architecture and Construction
Program of Study	
NLPS Sequence	
Course Code	5654
Course Description	<p><i>Architecture and Construction: Special Topics is an extended learning experience designed to address the advancement and specialization of careers within the career cluster through the provision of a specialized course for a specific workforce need in the school's region. The learning experience is at a qualified site, and is designed to give the student the opportunity to learn and practice technical skills; while working under the direction of the appropriately licensed professional. Throughout the course, students will focus on learning about employment opportunities and obtaining the knowledge, skills and attitudes essential for success in specific occupations. Course standards and curriculum must be tailored to the specific profession, preparing students to advance in this career field, and where applicable, provide students with opportunities for certification or dual credit. Participation in a related CTSO encourages the development of leadership, communication and career related skills, and opportunities for community service.</i></p>
Prerequisite(s)/ Corequisite(s)	None

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Construction Trades
7130.D1.1	Comply with OSHA-10 training requirements. Explain the safety obligations of workers, supervisors, and managers to ensure a safe workplace.
7130.D1.2	Review basic mathematical functions and explain their applications to the construction trades.
7130.D1.3	Identify and explain specific applications of hand tools that are widely used in the construction industry, such as hammers, saws, levels, pullers, and clamps.
7130.D1.4	Provide detailed descriptions of commonly used power tools, such as drills, saws, grinders, and sanders. Review applications, proper use, safety, and maintenance. Demonstrate power tool use in on-the-job settings.
7130.D1.5	Discuss basic terms for construction drawings, components, and symbols. Explain the different types of drawings and interpret and use drawing dimensions.
7130.D1.6	Explain how ropes, chains, hoists, loaders, and cranes are used to move material and equipment from one location to another on a job site.
7130.D1.7	Identify the roles of individuals and companies in the construction industry.
7130.D1.8	Recognize hazards associated with materials handling and explain proper materials handling techniques and procedures.
Domain	Construction Industry
7130.D2.1	Recognize direct job opportunities in the - construction field.
7130.D2.2	Recognize indirect job opportunities in the -construction field.

Review Document

7130.D2.3	Become familiar with new residential building products.
7130.D2.4	Understand the connection between residential construction and related fields.
7130.D2.5	Understand the importance of safety training and education in the construction industry.
7130.D2.6	Understand the relationship between worker's compensation insurance and safety record.
7130.D2.7	Understand and appreciate the roles that OSHA and INSafe play in the construction industry.
7130.D2.8	Understand the hazards involved in the residential construction industry.
7130.D2.9	Understand basic drafting/drawing techniques and how to apply them to - working drawings.
7130.D2.10	Understand the relationship between individual building components and a structure as a whole.
7130.D2.11	Utilize different resources to understand building component's applications and their limitations.
7130.D2.12	Understand basic print reading for the construction industry.

Construction Trades: General Carpentry	
Career Cluster	Architecture and Construction
Program of Study	Construction Trades - Carpentry
NLPS Sequence	B
Course Code	7123
Course Description	<i>Construction Trades: General Carpentry builds upon the skills learned in the Principles of Construction Trades and examines the basics of framing. This includes studying the procedures for laying out and constructing floor systems, wall systems, ceiling joist and roof framing, and basic stair layout. Additionally, students will be introduced to building envelope systems.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Construction Trades or Principles of Architecture; Engineering and Construction
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Introduction to Carpentry</i>
7123.D1.1	Review the history of the trade, describe the apprentice program, identify career opportunities for carpentry and construction workers, and list the skills, responsibilities, and characteristics a worker should possess. Discuss the importance of safety in the construction industry.
7123.D1.2	Categorize the building materials used in construction work, including lumber, sheet materials, engineered wood products, structural concrete, and structural steel. Describe the fasteners and adhesives used in construction work. Discuss the methods of squaring a building.
7123.D1.3	Provide descriptions of hand tools and power tools used by carpenters. Demonstrate safe and proper operation, as well as care and maintenance.
7123.D1.4	Apply the techniques for reading and using construction drawings and specifications with an emphasis on drawings and information relevant to the carpentry trade. Generate quantity takeoffs.
7123.D1.5	Examine framing basics and the procedures for laying out and constructing a wood floor using common lumber, as well as engineered building materials.
Domain	<i>Carpentry Basics</i>
7123.D2.1	Describe procedures for laying out and framing walls, including roughing-in door and window openings, constructing corners, partition Ts, and bracing walls. Follow the procedure to estimate the materials required to frame walls.

Next Level Programs of Study

Review Document

7123.D2.2	Describe types of roofs and list instructions for laying out rafters for gable roofs, hip roofs, and valley intersections. Compare stick-built and truss-built roofs. List the basics of roof sheathing installation.
7123.D2.3	Investigate the concept of the building envelope and explain its components. Describe types of windows, skylights, and exterior doors, and list instructions for installation.
7123.D2.4	Compare types of stairs and common building code requirements related to stairs. Examine techniques for measuring and calculating rise, run, and stairwell openings, laying out stringers, and fabricating basic stairways.
7123.D2.5	Attain readiness to take NCCER Carpentry Level I certification exams.
7123.D3.1	Understand the application of conventional fiberglass/asphalt roof shingles.
7123.D3.2	Apply carpentry skills, methods, and techniques to lab and/or on-the-job settings.

Construction Trades: Framing and Finishing

NLPS Sequence	C
Course Code	7390
Course Description	<i>The Masonry Fundamentals course covers foundations of completing masonry work including safety, tools, and the basics of brick and block construction. After mastering the basics, students will be introduced to advanced masonry techniques including control and expansion joints, corners, and intersections. Students will also understand the impacts of climate on masonry work and how to inspect masonry work for quality control.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Construction Trades; Construction Trades: General Carpentry
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes

POSTSECONDARY AND CREDENTIAL INFORMATION	
ITCC Course Alignment	BCTI 140: Introduction to Masonry*
VU Course Alignment	CNST 160/L (LAB): Finish Carpentry*
Four Yr. Course Alignment	
Postsecondary Credential	VU - CG Construction Carpenter Assistant (46.0000)
Liberal Arts/Sciences Requirements	ITCC - MATH 122: Applied Technical Mathematics, COMM 104: Workplace Communications, IVYT 113: Student Success in Technology VU - ENGL 101: English Composition I, MATH 100+ level or higher
Promoted Certifications	NCCER - Masonry - Level 1
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Introduction to Masonry</i>
7390.D1.1	Examine information about basic masonry materials, tools, techniques, and safety precautions.
7390.D1.2	Explain how to mix mortar by hand and lay masonry units.
7390.D1.3	Describe the skills, attitudes, and abilities of successful masons.
Domain	<i>Masonry Safety</i>
7390.D2.1	Describe how to identify the common causes of accidents and the hazards associated with masonry tools, equipment, mortar, and concrete.
7390.D2.2	Discuss use of personal protective equipment, working safely from elevated surfaces, properly using masonry tools and equipment, and handling masonry materials safely.
Domain	<i>Masonry Tools & Equipment</i>
7390.D3.1	Describe a variety of hand tools, measuring tools, mortar equipment, power tools and equipment, and lifting equipment masons use on the job.
7390.D3.2	List instructions for assembling and disassembling scaffolds.
Domain	<i>Measurements, Drawings, and Specifications</i>
7390.D4.1	Review the calculation of distances and areas common in masonry work.
7390.D4.2	Describe the information found on residential construction drawings.
7390.D4.3	Explain the role of specifications, standards, and codes.
Domain	<i>Mortar</i>

Next Level Programs of Study

Review Document

7390.D5.1	Explain the types and properties of mortar and the materials used in the mixture, including admixtures.
7390.D5.2	List instructions for mixing mortar by machine.
7390.D5.3	Describe how to properly apply and store mortar.
Domain	Masonry Units and Installation Techniques
7390.D6.1	Describe characteristics of block and brick and how to set up, lay out, bond, cut, lay and tool, and how to clean block and brick once they have been laid.
7390.D6.2	Examine masonry reinforcements and accessories used to lay block and brick professionally and safely.
Domain	Certification
7390.D7.1	Attain readiness to take NCCER Masonry Level 1 certification exams.

Construction Trades Capstone	
Career Cluster	Architecture and Construction
Program of Study	Construction Trades - Carpentry
NLPS Sequence	D
Course Code	7242
Course Description	<i>The Construction Trades Capstone course covers the basics of electricity and working with concrete. Electrical topics include the National Electric Code, electrical safety, electrical circuits, basic electrical construction drawings, and residential electrical services. Students may also gain an understanding of concrete properties, foundations, slab-on-grades, and vertical and horizontal formwork. The course prepares students for the NCCER Carpentry Forms Level 3 and Electrical Level 1 certificates.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Construction Trades; Construction Trades: General Carpentry; and Construction Trades: Framing and Finishing
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas Counts as a quantitative reasoning course
Dual Credit Status	X (PCL/CTE)
Additional Notes	
ADDITIONAL COURSE INFO	
Funding	Moderate Value Level II

Promoted Certifications	
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Introduction to Electrical</i>
7242.D1.1	Describe the electrical trade and discuss the career paths available to electricians.
7242.D1.2	Discuss safety rules and regulations for electricians, including precautions for electrical hazards found on the job. Examine the OSHA-mandated lockout/tagout procedure.
7242.D1.3	Explain electrical concepts used in Ohm’s law applied to DC series circuits. Discuss atomic theory, electromotive force, resistance, and electric power equations.
7242.D1.4	Analyze series, parallel, and series-parallel circuits. Examine resistive circuits, Kirchhoff’s voltage and current laws, and circuit analysis.

Next Level Programs of Study

Review Document

7242.D1.5	Examine and use the NEC®. Describe the layout and the types of information found within the code book. Practice finding information using easy-to-follow procedures.
7242.D1.6	Identify the hardware and systems used by an electrician to mount and support boxes, receptacles, and other electrical components. Examine NEC® fill and pull requirements for device, pull, and junction boxes under 100 cubic inches.
7242.D1.7	Describe conduit bending and installation. Demonstrate the techniques for using hand operated and step conduit benders, as well as cutting, reaming, and threading conduit. 8. List the types and applications of raceways, wireways, and ducts. Investigate the appropriate NEC® requirements.
7242.D1.8	Describe the types and applications of conductors and demonstrate proper wiring techniques. Investigate the appropriate NEC® requirements.
7242.D1.9	Examine electrical prints, drawings, and symbols, and the types of information that can be found on schematics, one-lines, and wiring diagrams
7242.D1.10	Investigate the electrical devices and wiring techniques common to residential construction and maintenance. Perform service calculations. Investigate the appropriate NEC® requirements.
7242.D1.11	Demonstrate proper selection, inspection, and use of common electrical test equipment, including voltage testers, clamp-on ammeters, ohmmeters, multimeters, phase/motor rotation testers, and data recording equipment. Describe safety precautions and meter category ratings.
Domain	Carpentry Forms
7242.D2.1	Describe the properties, characteristics, and uses of cement, aggregates, and other materials used in different types of concrete. Discuss procedures for estimating concrete volume and testing freshly mixed concrete, as well as methods and materials for curing concrete.
7242.D2.2	Explain how ropes, chains, hoists, loaders, and cranes are used to move material and equipment from one location to another on a job site. Describe inspection techniques and load-handling safety practices. Demonstrate American National Standards Institute (ANSI) hand signals.
7242.D2.3	Examine working in and around excavations, particularly in preparing building foundations. Describe types and bearing capacities of soils; procedures used in shoring, shielding, and sloping trenches and excavations; trenching safety requirements, including recognition of unsafe conditions; and mitigation of groundwater and rock when excavating foundations.
7242.D2.4	Explain the selection and uses of different types of reinforcing materials. Describe requirements for bending, cutting, splicing, and tying reinforcing steel and the placement of steel in footings and foundations, walls, columns, and beams and girders.
7242.D2.5	Discuss basic site layout safety, tools, and methods; layout and construction of deep and shallow foundations; types of foundation forms; layout and formation of slabs-on-grade; and forms used for curbing and paving.
7242.D2.6	Discuss the applications and construction methods for types of forming and form hardware systems for walls, columns, and stairs, as well as slip and climbing forms. Describe the assembly, erection, and stripping of gang forms.
7242.D2.7	Describe elevated decks and formwork systems and methods used in their construction. Examine joist, pan, beam and slab, flat slab, composite slab, and specialty form systems and discuss instructions for the use of flying decks, as well as shoring and reshoring systems.
7242.D2.8	Examine tools, equipment, and procedures for safely handling, placing, and finishing concrete. Describe joints made in concrete structures and the use of joint sealants.

Next Level Programs of Study

Review Document

7242.D2.9	Describe how tilt-up concrete construction is used and how tilt-up panels are formed, erected, and braced. Discuss the installation of rebar and types of embedment used to lift and brace the panels. Investigate methods used to create architectural and decorative treatments.
7242.D2.10	Attain readiness to take the second half of NCCER Carpentry Forms Level 3 certification exams.
Domain	WBL
7242.D3.1	Gain practical experience on the job.
7242.D3.2	Think critically and independently analyze, synthesize, and evaluate technical problems and information.
7242.D3.3	Identify and interpret health, safety, and welfare standards as dictated by local, state or federal agencies.
7242.D4.1	Understand residential code and how to utilize a code manual.
7242.D4.2	Understand residential electrical principles and terminology.
7242.D4.3	Understand common and complex residential wiring diagrams and their applications.
7242.D4.4	Interpret and apply the National Electrical Code (NEC) to residential electrical applications.
7242.D4.5	Understand the connection between wire types and wire sizes and how it relates to residential electrical safety.
7242.D4.6	Diagnose and troubleshoot residential electrical problems using critical and creative thinking skills.
7242.D4.7	Utilize proper planning techniques when designing a residential electrical plan for remodeling or new construction.
7242.D4.8	Attain readiness to take NCCER Electrical Level I certification exams.

Masonry Capstone	
Career Cluster	Architecture and Construction
Program of Study	Construction Trades - Carpentry
NLPS Sequence	D
Course Code	7391
Course Description	<i>The Masonry Capstone course covers the basics of brick and block construction. The course is aligned to an entry level apprenticeship program through the International Union of Bricklayers & Allied Craftworkers Indiana/Kentucky. The program includes approximately 300 hours of instruction with on-the-job training.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Construction Trades; Construction Trades: General Carpentry; and Construction Trades: Masonry Fundamentals
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas Counts as a quantitative reasoning course*
Dual Credit Status	X (PCL/CTE)

Principles of Construction Trades	
Career Cluster	Architecture and Construction
Program of Study	Building and Facilities Management, Civil Construction (Heavy Highway), Construction Trades – Carpentry, Construction Trades – Electrical, Heavy Equipment Operations
NLPS Sequence	A
Course Code	7130
Course Description	<i>Principles of Construction Trades prepares students with the basic skills needed to continue in a construction trade field. Topics will include an introduction to the types and uses for common hand and power tools, learn the types and basic terminology associated with construction drawings, and basic safety. Additionally students will study the roles of individuals and companies within the construction industry and reinforce mathematical and communication skills necessary to be successful in the construction field.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)

Promoted Certifications	NCCER Core Certification
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Introduction to Construction Trades</i>
7130.D1.1	Comply with OSHA-10 training requirements. Explain the safety obligations of workers, supervisors, and managers to ensure a safe workplace.
7130.D1.2	Review basic mathematical functions and explain their applications to the construction trades.
7130.D1.3	Identify and explain specific applications of hand tools that are widely used in the construction industry, such as hammers, saws, levels, pullers, and clamps.
7130.D1.4	Provide detailed descriptions of commonly used power tools, such as drills, saws, grinders, and sanders. Review applications, proper use, safety, and maintenance. Demonstrate power tool use in on-the-job settings.
7130.D1.5	Discuss basic terms for construction drawings, components, and symbols. Explain the different types of drawings and interpret and use drawing dimensions.
7130.D1.6	Explain how ropes, chains, hoists, loaders, and cranes are used to move material and equipment from one location to another on a job site.
7130.D1.7	Identify the roles of individuals and companies in the construction industry.
7130.D1.8	Recognize hazards associated with materials handling and explain proper materials handling techniques and procedures.
Domain	<i>Construction Industry</i>
7130.D2.1	Recognize direct job opportunities in the - construction field.
7130.D2.2	Recognize indirect job opportunities in the -construction field.
7130.D2.3	Become familiar with new residential building products.
7130.D2.4	Understand the connection between residential construction and related fields.

Next Level Programs of Study

Review Document

7130.D2.5	Understand the importance of safety training and education in the construction industry.
7130.D2.6	Understand the relationship between worker's compensation insurance and safety record.
7130.D2.7	Understand and appreciate the roles that OSHA and INSafe play in the construction industry.
7130.D2.8	Understand the hazards involved in the residential construction industry.
7130.D2.9	Understand basic drafting/drawing techniques and how to apply them to - working drawings.
7130.D2.10	Understand the relationship between individual building components and a structure as a whole.
7130.D2.11	Utilize different resources to understand building component's applications and their limitations.
7130.D2.12	Understand basic print reading for the construction industry.

Electrical Fundamentals	
Career Cluster	Architecture and Construction
Program of Study	Construction Trades - Electrical
NLPS Sequence	B
Course Code	7124
Course Description	<i>This course covers NCCER Electrical Level 1. Its modules cover topics such as orientation to the electrical trade, electrical safety, introduction to electrical circuits, electrical theory, introduction to the National Electrical Code, device boxes, hand bending, raceways and fittings, conductors and cables, basic electrical construction drawings, residential electrical services, and electrical test equipment. The NCCER Electrical Level 1 certificate and wallet card will also be awarded upon successful completion of this course.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Construction Trades
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	<i>Intermediate Electrical</i>
7263.D1.1	Explain how to calculate branch circuit and feeder loads for residential and commercial applications.
7263.D1.2	Discuss the factors involved in conductor selection, including insulation types, current-carrying capacity, temperature ratings, and voltage drop.
7263.D1.3	Describe specific types of incandescent, fluorescent, and HID lamps, as well as ballasts. Examine troubleshooting and various types of lighting controls.
7263.D1.4	Investigate the NEC® requirements for equipment installed in hazardous locations.
7263.D1.5	Explain how to size and select circuit breakers and fuses for various applications. Discuss short circuit calculations and troubleshooting.
7263.D1.6	Discuss switchboards and switchgear, including installation, grounding, and maintenance requirements. Examine electrical blueprints.
7263.D1.7	Discuss transformer types, construction, connections, protection, and grounding.
7263.D1.8	Describe the components, installation considerations, and NEC® requirements for commercial services.
7263.D1.9	Examine calculations required to size conductors and overcurrent protection for motor applications.
7263.D1.10	Demonstrate installation, termination, and testing of voice, data, and video cabling systems.

Next Level Programs of Study

Review Document

7263.D1.11	Explain the selecting, sizing, and installing motor controllers. Investigate control circuit pilot devices and basic relay logic.
7263.D1.12	Attain readiness to take the second half of NCCER Electrical Level 3 certifications exams.
Domain	Basic Carpentry
7263.D2.1	Review the history of the trade, describe the apprentice program, identify career opportunities for carpentry and construction workers, and list the skills, responsibilities, and characteristics a worker should possess. Discuss the importance of safety in the construction industry.
7263.D2.2	Categorize the building materials used in construction work, including lumber, sheet materials, engineered wood products, structural concrete, and structural steel. Describe the fasteners and adhesives used in construction work. Discuss the methods of squaring a building.
7263.D2.3	Provide descriptions of hand tools and power tools used by carpenters. Demonstrate safe and proper operation, as well as care and maintenance.
7263.D2.4	Apply the techniques for reading and using construction drawings and specifications with an emphasis on drawings and information relevant to the carpentry trade. Generate quantity takeoffs.
7263.D2.5	Examine framing basics and the procedures for laying out and constructing a wood floor using common lumber, as well as engineered building materials.
7263.D2.6	Describe procedures for laying out and framing walls, including roughing-in door and window openings, constructing corners, partition Ts, and bracing walls. Follow the procedure to estimate the materials required to frame walls.
7263.D2.7	Describe types of roofs and list instructions for laying out rafters for gable roofs, hip roofs, and valley intersections. Compare stick-built and truss-built roofs. List the basics of roof sheathing installation.
7263.D2.8	Investigate the concept of the building envelope and explain its components. Describe types of windows, skylights, and exterior doors, and list instructions for installation.
7263.D2.9	Compare types of stairs and common building code requirements related to stairs. Examine techniques for measuring and calculating rise, run, and stairwell openings, laying out stringers, and fabricating basic stairways.
7263.D2.10	Attain readiness to take NCCER Carpentry Level I certification exams.
7263.D2.11	Understand the application of conventional fiberglass/asphalt roof shingles.
7263.D2.12	Apply carpentry skills, methods, and techniques to lab and/or on-the-job settings.

Domain	Construction Trades
7130.D1.1	Comply with OSHA-10 training requirements. Explain the safety obligations of workers, supervisors, and managers to ensure a safe workplace.
7130.D1.2	Review basic mathematical functions and explain their applications to the construction trades.
7130.D1.3	Identify and explain specific applications of hand tools that are widely used in the construction industry, such as hammers, saws, levels, pullers, and clamps.
7130.D1.4	Provide detailed descriptions of commonly used power tools, such as drills, saws, grinders, and sanders. Review applications, proper use, safety, and maintenance. Demonstrate power tool use in on-the-job settings.

Next Level Programs of Study

Review Document

7130.D1.5	Discuss basic terms for construction drawings, components, and symbols. Explain the different types of drawings and interpret and use drawing dimensions.
7130.D1.6	Explain how ropes, chains, hoists, loaders, and cranes are used to move material and equipment from one location to another on a job site.
7130.D1.7	Identify the roles of individuals and companies in the construction industry.
7130.D1.8	Recognize hazards associated with materials handling and explain proper materials handling techniques and procedures.
Domain	Construction Industry
7130.D2.1	Recognize direct job opportunities in the - construction field.
7130.D2.2	Recognize indirect job opportunities in the -construction field.
7130.D2.3	Become familiar with new residential building products.
7130.D2.4	Understand the connection between residential construction and related fields.
7130.D2.5	Understand the importance of safety training and education in the construction industry.
7130.D2.6	Understand the relationship between worker's compensation insurance and safety record.
7130.D2.7	Understand and appreciate the roles that OSHA and INSafe play in the construction industry.
7130.D2.8	Understand the hazards involved in the residential construction industry.
7130.D2.9	Understand basic drafting/drawing techniques and how to apply them to - working drawings.
7130.D2.10	Understand the relationship between individual building components and a structure as a whole.
7130.D2.11	Utilize different resources to understand building component's applications and their limitations.
7130.D2.12	Understand basic print reading for the construction industry.

Building and Facilities Maintenance Fundamentals	
Career Cluster	Architecture and Construction
Program of Study	Building and Facilities Maintenance
NLPS Sequence	B
Course Code	7285
Course Description	<i>Building and Facilities Maintenance Fundamentals prepares students to complete basic maintenance tasks like minor construction repairs and be able to repair and/or replace various building materials including flooring, wall covering, hardware, lighting, and plumbing fixtures.</i>

Domain	Safety	
7285.D1.1	Know and understand applicable local, state, and federal statutes and regulations	

Next Level Programs of Study

Review Document

7285.D1.2	Demonstrate proper use and storing of chemicals safely and in accordance with manufacturer's recommendations
7285.D1.3	Demonstrate proper use and care for personal protective equipment (PPE)
7285.D1.4	Know and demonstrate proper safety practices for working with electricity including shutting down utility and power sources
Domain	Painting
7285.D2.1	Commonly used personal protective equipment (PPE - gloves, eye protection, respirator)
7285.D2.2	Safety regulations overview regarding lead, mold, and asbestos (information only, not a certification program)
7285.D2.3	Proper preparation techniques, including wall texture, dust removal, priming and painting
7285.D2.4	Texturing methods including smooth, orange peel, knock down, stipple, and popcorn
7285.D2.5	Paint types, including differences between interior and exterior paints as well as sheen and gloss types (flat, satin, semi-gloss, gloss)
7285.D2.6	Identify, define, and demonstrate basic painting techniques including cutting in and coverage techniques using both brush and roller
7285.D2.7	Repairing damaged areas and matching textures
7285.D2.8	Estimate the cost of painting a room
7285.D2.9	Understand the differences between painting and staining and appropriate usage of each
7285.D2.10	Understand and demonstrate the proper surface preparation and proper staining techniques
Domain	Construction Repairs
7285.D3.1	Commonly used safety equipment, including equipment for lock-out tag-out and personal protective equipment (PPE - gloves, eye protection)
7285.D3.2	Caulking (latex, silicone)
7285.D3.3	Backing materials, including drywall, tile backer (durock, hardibacker, green board etc.), and caulking rod
7285.D3.4	Drywall patching techniques, including paper tape, mesh tapes, adhesive patch (metal), and scab patches
7285.D3.5	Mudding techniques (skimming, finishing), tools, and materials (joint compound and spackle)
7285.D3.6	Performing common drywall repairs including dent/gouge repair, nail pop secure and repair, doorknob/fist hole repair, and larger (stud to stud) repair
7285.D3.7	Identify and demonstrate proper techniques for measuring, cutting, installing, and finishing trims.
7285.D3.8	Identify tiling terminology and different types of tiles used in and around residential and commercial buildings
7285.D3.9	Identify various tools used for tiling and demonstrate their proper procedures for using tiling tools

Next Level Programs of Study

Review Document

7285.D3.10	Perform common tile repairs including grout and install tile (floor and wall)
7285.D3.11	Define flooring terminology and different types of flooring.
7285.D3.12	Identify various tools used for flooring and demonstrate the proper procedures for using
7285.D3.13	Perform common flooring installation, repair, and care techniques.
Domain	Security
7285.D4.1	Parts identification and usage, including deadbolt, entry knob, passage knob, privacy knob and lock, and amenity/stockroom knob
7285.D4.2	Investigate key security access features (coded keys, records, locking standards for key box and key access)
7285.D4.3	Identify different types of doors and perform common door frame repair techniques
7285.D4.4	Install common doorknobs and locks
Domain	Exterior Maintenance and Repair
7285.D5.1	Inspection protocols, including slip, trip and fall, lighting, liability, landscaping, parking lot and property
7285.D5.2	Students will investigate and demonstrate basic landscaping maintenance tasks such as mowing, mulching, turf management, and planting trees, shrubs, and flowers.
7285.D5.3	Identify various types of windows and common repairs.
7285.D5.4	Identify common roofing materials, tools, and perform minor repairs
7285.D5.5	Identify common siding materials, tools, and perform minor repairs
7285.D5.6	Identify common masonry projects, materials, tools, and perform minor repairs

Advanced Building and Facilities Maintenance	
Career Cluster	Architecture and Construction
Program of Study	Building and Facilities Maintenance
NLPS Sequence	C
Course Code	7286
Course Description	<i>Advanced Building and Facilities Maintenance prepares students to complete more advanced repairs involving a building's mechanical system including electrical, HVAC, and plumbing.</i>
Prereq(s)/CoReq(s)	Principles of Construction Trades; Building and Facilities Maintenance Fundamentals
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas
Dual Credit Status

Domain	Electricity
7286.D1.1	Understand and apply Ohm's Law (Watt's law) and common terms
7286.D1.2	Common electrical principals and usage of common devices
7286.D1.3	Introduction to schematics and commonly used symbols
7286.D1.4	Usage of lock-out tag-out and personal protective equipment
7286.D1.5	Fixture use and operation of incandescent, fluorescent, and LED lights
7286.D1.6	Applicable National Electrical Code Regulations
7286.D1.7	Using meter to measure Volts, Amps, Ohm's and Continuity
7286.D1.8	Diagnosing and troubleshooting residential circuits including outlet (switched and direct), switch (single and three way), ground fault circuit interrupter (GFCI), and common safety devices (e.g., smoke detector, CO detector)

Next Level Programs of Study

Review Document

7286.D1.9	Performing proper electrical connections and repairs per National Electric Code (NEC) including terminal connections, lugs, wire to wire (wire nuts), and covered boxes
Domain	Plumbing
7286.D2.1	Plumbing construction, including supply side common connections and repair techniques, drain side common connection and repair techniques, and venting issues
7286.D2.2	Proper use of tools, including the toilet plunger (Sink and toilet), snake and auger (hand crank; not powered)
7286.D2.3	Common fixture repairs and replacements, including toilet, faucet, sink, tub drain, and overflow
7286.D2.4	Proper installation of caulking and plumbing chemicals including caulk, plumber's grease, thread seal, and plumber's putty
7286.D2.5	Repairing common pipe leaks using the appropriate fitting (threaded, barbed (e.g., shark bite), compression, flare, solvent weld (glue and primer), solder)
7286.D2.6	Clearing drains without the use of chemical drain opener
7286.D2.7	Diagnosing and repairing all toilet components from flange repair up, including wax ring and bolts, toilet bowl, tank, fill valve, and flush valve
7286.D2.8	Diagnosing and replacing fixtures from the supply line in, including angle stop and supply line, faucet leak at counter, faucet underbody, faucet control (valve control adjust and replace), and aerator.
Domain	Mechanical
7286.D3.1	Commonly used safety equipment, including equipment for lock-out tag-out and personal protective equipment (PPE) (gloves, eye protection)
7286.D3.2	Preventative maintenance techniques for HVAC systems (filter, motor lubrication, coil cleaning) and water heaters (flush and fill)
7286.D3.3	Correcting common service issues including clogged filters and clogged/obstructed coils (Evap and Condenser).
7286.D3.4	Circulation pumps
Domain	Appliance Repair
7286.D4.1	Commonly used safety equipment, including equipment for lock-out tag-out and personal protective equipment (PPE) (gloves, eye protection, insulated tools) 010701
7286.D4.2	Proper operation of refrigerator, dishwasher, garbage disposal, gas range (oven and cooktop), electric range (oven and cooktop), clothes washer (top loading), clothes dryer (electric only)
7286.D4.3	Common service requests for refrigerator, dishwasher, garbage disposal, gas range (oven and cooktop), electric range (oven and cooktop), clothes washer (top loading), clothes dryer (electric only)
7286.D4.4	Explaining different methods for troubleshooting, including using meter and schematics and experience- based troubleshooting
7286.D4.5	Properly moving/removing appliances

Next Level Programs of Study

Review Document

7286.D4.6	Properly accessing common panels and control components on each appliance

Domain	Heavy Highway Construction
7121.D1.1	Investigate careers, equipment, and processes used in the construction of highways and bridges.
7121.D1.2	Identify the types of heavy equipment, utility equipment, and cranes used in the construction of bridges and highways.
7121.D1.3	Examine the safety hazards and precautions associated with construction of highways and bridges with emphasis on the importance of following safety procedures to prevent accidents and injuries associated with working in hazardous places/conditions.
7121.D1.4	Analyze the signs, signals, and barricades found on various job sites including highway work-zone safety requirements.
7121.D1.5	Describe soil classification systems and explain how shrink and swell factors affect equipment selection; also discuss how soil conditions affect equipment performance and explain techniques for working with various types of soils.
7121.D1.6	Examine the methods used to set and interpret grade stakes.
7121.D1.7	List methods for controlling surface water and ground water on a job site, as well as the layout of foundations and laying of pipe.
7121.D1.8	Apply basic math skills required for site excavation work including methods and practice in calculating the areas and volumes of various geometric shapes, as well as formulas and methods used to calculate cut and fill requirements of a job.
7121.D1.9	Explain how to read site plans to calculate cut and fill requirements; interpret both roadway and construction site drawings used for excavation and grading work.
7121.D1.10	Attain readiness to take the first half of the NCCER Heavy Highway Construction Level 1 certification exams.
Domain	Concrete Finishing

Next Level Programs of Study

Review Document

7121.D2.1	Describe the methods and procedures used in concrete finishing. Identify terms of the trade and tools and equipment used to place, finish, and cure concrete. Explain methods and techniques for constructing concrete structures.
7121.D2.2	Explain safety requirements for concrete construction and finishing. Investigate information on OSHA requirements regarding hazard communication, fall protection, and use of personal protective equipment. Examine topics such as general work site safety, use of chemicals, and safe use of hand and power tools.
7121.D2.3	Analyze the properties of concrete and the components that make up the concrete mixture. Describe chemical and physical properties of cement, aggregate, and admixtures. Explain basic tests used to determine properties such as slump and ultimate strength.
7121.D2.4	Describe tools and equipment used in the production, placing, and curing of concrete. Explain safe operation and maintenance requirements. Demonstrate proper use of each hand tool and larger pieces of power equipment.
7121.D2.5	Investigate the methods and procedures used in preparing for placing concrete. Assess background information about site layout, forms requirements, and subgrade preparation. Describe requirements for various types of joints and reinforcement. Discuss the ordering of concrete from a mixing or batch plant.
7121.D2.6	Examine requirements and methods for properly placing concrete. Describe how to convey and place fresh concrete using various types of equipment, such as wheelbarrows, pumps and conveyors. Demonstrate techniques for spreading, consolidating, and striking off concrete.
7121.D2.7	Describe basic finishing techniques for slabs and other horizontal structures. Explain proper use of floats, trowels, edgers, and groovers and demonstrate their uses. Discuss requirements for cutting joints using different types of saws.
7121.D2.8	Compare the methods and procedures used in curing and protecting concrete. Discuss the types of curing commonly performed for both horizontal and vertical placement. Describe techniques for protecting concrete during hot and cold weather.
7121.D2.9	Describe basic problems for the processes of placing, finishing, and curing. Define symptoms of each type of problem and discuss their causes. Examine ways to reduce or eliminate these problems.
7121.D2.10	Attain readiness to take the NCCER Concrete Finishing Level I certification exams.

Advanced Civil Construction	
Career Cluster	Architecture and Construction
Program of Study	Civil Construction
NLPS Sequence	C
Course Code	7118
Course Description	<i>Advanced Civil Construction builds upon the knowledge and skills learned in the fundamentals course and covers the second half of NCCER Heavy Highway Construction Level 1. Its modules cover topics such as rigging practices, crane safety and emergency procedures, basic principles of cranes, and crane communications. The NCCER Heavy Highway Construction Level 1 certificate and wallet card will also be awarded upon successful completion of this course.</i>

Competency #	Competency	
Domain	Basic Rigging	
7118.D1.1	Describe basic rigging and safety practices related to rigging activities, the use and inspection of equipment and hardware used in rigging, jacks, and hoisting equipment, and how to apply common hitches.	

Next Level Programs of Study

Review Document

7118.D1.2	Apply safety standards and best safety practices relevant to the operation of cranes, and describe safety considerations related to power lines, weather conditions, and specific crane functions.
7118.D1.3	Examine mobile crane equipment with an in-depth discussion of terminology and nomenclature, and explain the basic scientific principles associated with mobile crane operation.
7118.D1.4	Demonstrate the proper communication process between the signal person and the crane operator, including electronic communications and the standard hand signals.
7118.D1.5	Attain readiness to take the second half of the NCCER Heavy Highway Construction Level 1 certification exams.
7118.D1.6	Inspect various types of rigging components and report on the condition and suitability for a task.
7118.D1.7	Configure a sling to produce a single-wrap basket hitch, double-wrap basket hitch, single wrap choker hitch, and double-wrap choker hitch.
7118.D1.8	Select the correct tagline for a specified application.
7118.D1.9	Tie specific instructor-selected knots.
7118.D1.10	Select, inspect, and demonstrate the safe use of a block and tackle, chain hoist, ratchet-lever hoist, and jack.
7118.D1.11	Verify the boom length and operating radius of a telescopic and/or lattice-boom crane using
7118.D1.12	manufacturer's data or a measuring tape.
7118.D1.13	Calculate the amount of blocking needed for the outrigger of a specific crane.
7118.D1.14	Verify that a crane is level.
7118.D1.15	Demonstrate proper crane-communication techniques using a handheld radio or another acceptable verbal-signaling device.
7118.D1.16	Demonstrate each standard hand signal depicted in 29 CFR 1926.1400, Subpart CC, Appendix A.
7118.D1.17	Direct an operator to move and place a load using the appropriate hand signals and voice communication.

Civil Construction Capstone	
Career Cluster	Architecture and Construction
Program of Study	Civil Construction
NLPS Sequence	D
Course Code	7240
Course Description	<i>The Heavy Highway Capstone course covers topics such as introduction to earthmoving, finishing and grading, trenching and excavating, plant operations, paving, horizontal formwork, and vertical formwork. Additionally, students will learn skills associated with working with concrete and bridge construction. The course prepares students for the NCCER Level 2 certificate.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Construction Trades; Civil Construction Fundamentals; and Advanced Civil Construction

CONTENT STANDARDS AND COMPETENCIES		
Competency #	Competency	
Domain	<i>Earthmoving, Finishing, and Grading</i>	
7240.D1.1	Discuss the process of planning and executing earthmoving activities on various types of construction projects. Explain the use of heavy equipment such as bulldozers, scrapers, excavators, and loaders.	
7240.D1.2	Examine common types of equipment and instruments used for finish grading; materials and methods used to stabilize soils and control soil erosion; and finishing and grading methods used for various applications.	

Next Level Programs of Study

Review Document

7240.D1.3	Examine working in and around excavations, particularly in preparing building foundations.
7240.D1.4	Describe types and bearing capacities of soils; procedures used in shoring, shielding, and sloping trenches and excavations; trenching safety requirements, including recognition of unsafe conditions; and mitigation of groundwater and rock when excavating foundations.
7240.D1.5	Describe the operation of plants used to manufacture concrete and asphalt paving and discuss the different types of aggregates.
7240.D1.6	Analyze paving operations, paving equipment, recycling processes, and quality control requirements for both concrete and hot-mix asphalt paving.
7240.D1.7	Describe elevated decks and formwork systems and methods used in their construction.
7240.D1.8	Examine joist, pan, beam and slab, flat slab, composite slab, and specialty form systems and discuss instructions for the use of flying decks, as well as shoring and reshoring systems.
7240.D1.9	Discuss the applications and construction methods for types of forming and form hardware systems for walls, columns, and stairs, as well as slip and climbing forms. Describe the assembly, erection, and stripping of gang forms.
7240.D1.10	Draw a plan for basic earthmoving operations and include clearing and grubbing, excavating the foundation, constructing embankments, backfilling, and compacting.
7240.D1.11	Lay out a basic earthmoving operation.
7240.D1.12	Identify and select the proper equipment for a given earthmoving operation.
7240.D1.13	Establish fine grade after a rough grade has been performed, according to instructions.
7240.D1.14	Draft a job hazard/safety analysis for an excavation according to instructor's specifications.
7240.D1.15	Demonstrate setting the stringline to establish the grade for concrete slipform paving, correctly set up the slipform paver for operation, perform slipform paving, and perform a concrete slump test.
7240.D1.16	At the discretion of the instructor, perform hot-mix asphalt paving, also perform a quantitative analysis on the segregation of stone.
7240.D1.17	Erect, plumb, brace, and level a hand-set deck form.
7240.D1.18	Install edge forms, including instructor-selected blockouts, embedments, and bulkheads.
7240.D1.19	Erect, plumb, and brace an instructor-selected wall form.
7240.D1.20	Erect, plumb, and brace a stair form.
Domain	Concrete, Ironwork, and Bridge Construction
7240.D2.1	Explain the selection and uses of different types of reinforcing materials. Describe requirements for bending, cutting, splicing, and tying reinforcing steel and the placement of steel in footings and foundations, walls, columns, and beams and girders.
7240.D2.2	Analyze the safety concerns associated with concrete, as well as concrete testing, concrete admixtures, and the proper procedures for placing concrete.
7240.D2.3	Identify the materials used in steel-framed structures and explain how to read basic structural blueprints.
7240.D2.4	Discuss the types of construction that utilize structural steel, the components of the structures, and the process involved in erecting a steel structure. Explain the principles of structural stresses and the requirements of bolted connections.
7240.D2.5	Describe the common types of bridges, along with the components that make up the substructure and superstructure of a bridge. Also discuss the types of materials used in bridge construction, basic surveying equipment and practices, and how to interpret bridge drawings.

Next Level Programs of Study

Review Document

7240.D2.6	Describe the types of footings used to support bridges, as well as various types of piles and pile-driving methods. Also discuss safety practices associated with pile driving on land and in marine environments, along with environmental protection issues.
7240.D2.7	Identify the forms used to fabricate concrete walls, columns, footings, pile caps, and other bridge structures. Also discuss site-built and manufactured forming systems along with instructions for cleaning and storing forms.
7240.D2.8	Attain readiness to take the NCCER Heavy Highway Construction Level 2 certification exams.
7240.D2.9	Use appropriate tools to cut and bend reinforcing bars.
7240.D2.10	Demonstrate five types of ties for reinforcing bars, along with proper lap splicing.
7240.D2.11	Demonstrate the proper placement, spacing, tying, and support for reinforcing bars.
7240.D2.12	Identify job plans and drawings used for ironworking jobs.
7240.D2.13	Identify ornamental ironwork, general symbols, and welding symbols and applications on ironworking job plans and drawings.
7240.D2.14	Describe different uses for structural steel.
7240.D2.15	Identify selected types, shapes, and grades of structural steel, including types of structural steel beams.
7240.D2.16	Make bolted connections on structural steel.
7240.D2.17	Use a bridge plan to explain the details of a project, and perform layout based on a plan sheet.
7240.D2.18	Lay out pile locations according to foundation drawings.
7240.D2.19	Create templates in accordance with provided drawings.
7240.D2.20	Perform a material takeoff for concrete formwork.
7240.D2.21	Build a small cap form at least 4' x 3' with headers, and include a beam seat, anchor bolts, and pipe blockout.

Promoted Certifications	NCCER Core Certification
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Construction Trades
7130.D1.1	Comply with OSHA-10 training requirements. Explain the safety obligations of workers, supervisors, and managers to ensure a safe workplace.
7130.D1.2	Review basic mathematical functions and explain their applications to the construction trades.
7130.D1.3	Identify and explain specific applications of hand tools that are widely used in the construction industry, such as hammers, saws, levels, pullers, and clamps.
7130.D1.4	Provide detailed descriptions of commonly used power tools, such as drills, saws, grinders, and sanders. Review applications, proper use, safety, and maintenance. Demonstrate power tool use in on-the-job settings.
7130.D1.5	Discuss basic terms for construction drawings, components, and symbols. Explain the different types of drawings and interpret and use drawing dimensions.
7130.D1.6	Explain how ropes, chains, hoists, loaders, and cranes are used to move material and equipment from one location to another on a job site.
7130.D1.7	Identify the roles of individuals and companies in the construction industry.
7130.D1.8	Recognize hazards associated with materials handling and explain proper materials handling techniques and procedures.
Domain	Construction Industry
7130.D2.1	Recognize direct job opportunities in the - construction field.
7130.D2.2	Recognize indirect job opportunities in the -construction field.
7130.D2.3	Become familiar with new residential building products.
7130.D2.4	Understand the connection between residential construction and related fields.
7130.D2.5	Understand the importance of safety training and education in the construction industry.
7130.D2.6	Understand the relationship between worker's compensation insurance and safety record.

Next Level Programs of Study

Review Document

7130.D2.7	Understand and appreciate the roles that OSHA and INSafe play in the construction industry.
7130.D2.8	Understand the hazards involved in the residential construction industry.
7130.D2.9	Understand basic drafting/drawing techniques and how to apply them to - working drawings.
7130.D2.10	Understand the relationship between individual building components and a structure as a whole.
7130.D2.11	Utilize different resources to understand building component's applications and their limitations.
7130.D2.12	Understand basic print reading for the construction industry.

Heavy Equipment Fundamentals	
Career Cluster	Architecture and Construction
Program of Study	Heavy Equipment Operations
NLPS Sequence	B
Course Code	7290
Course Description	<i>Heavy Equipment Fundamentals orients students to the Heavy Equipment industry and the basics operational techniques required to be a Heavy Equipment Operator. Topics include safety, identification of heavy equipment, utility tractors, earthmoving and grades. This course prepares students for the NCCER Heavy Equipment Level 1 certification.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Construction Trades

7291.D1.1	Identify and describe the components of a rough terrain forklift.
7291.D2.1	Describe the prestart inspection requirements for a rough terrain forklift.
7291.D3.1	Operate a forklift safely.
7291.D3.2	Perform preventive maintenance procedures and explain the operations of various components.
7291.D3.3	Demonstrate proper startup and operating procedures for forklift.
7291.D4.1	Review the various types of on-road dump trucks.
7291.D4.2	Review the requirements of a CDL for on road dump truck operation.
7291.D4.3	Understand the use of instruments and specialized control systems in dump trucks.
7291.D4.4	List the operator inspection and maintenance requirements for on road dump truck.
7291.D4.5	Demonstrate safe driving practices for dump trucks.
7291.D4.6	Perform basic operations using a dump truck.
7291.D5.1	Operate a skid loader safely.
7291.D5.2	Demonstrate the prestart inspection requirements for skid steer.
7291.D5.3	Describe the preventive maintenance requirements for a skid steer.
7291.D5.4	Demonstrate startup, shutdown, and operations procedures for a skid steer

Next Level Programs of Study

Review Document

7291.D6.1	Explain and demonstrate the correct use of formulas for site layout.
7291.D6.2	Understand the proper sequence of operations in a formula.
7291.D6.3	Demonstrate understanding of different types of angles.
7291.D6.4	Explain how math is used to calculate how math is used to solve right triangles.
7291.D6.5	Demonstrate how to calculate/estimate area and volume.
7291.D7.1	Analyze types of drawings and prints used in equipment operations.
7291.D7.2	Demonstrate the ability to read and interpret drawing.
7291.D7.3	Define common abbreviations.
7291.D7.4	Explain the purpose of the plan specifications for projects.
7291.D7.5	Describe how as-built drawings are prepared.
7291.D8.1	Explain the purpose of site safety associated with grading work.
7291.D8.2	Understand the different types of sites and conditions (e.g., building site, highway site, etc.) and how they differ.
7291.D8.3	Describe methods used to control water on job sites.
7291.D8.4	Explain how grades are established on a job site.
7291.D8.5	Describe types of drawings and prints used in equipment operations.
7291.D8.6	Read and interpret drawings.
7291.D8.7	Define common abbreviations.
7291.D8.8	Describe how as-built drawings are prepared.

Heavy Equipment Capstone	
Career Cluster	Architecture and Construction
Program of Study	Heavy Equipment Operations
NLPS Sequence	D
Course Code	7292
Course Description	<i>Heavy Equipment Capstone will cover the second part of NCCER Heavy Equipment Level 2 and all of Level 3. Students will learn to operate Loaders, Skid Steers, Rough Terrain Forklifts, Backhoes and Dozers.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Construction Trades; Heavy Equipment Fundamentals; Advanced Heavy Equipment Operations
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	
ADDITIONAL COURSE INFO	
Funding	High Value Level II

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
7292.D1.1	Describe grading and installation practices for pipe laying operations.
7292.D1.2	Describe the different types and characteristics of soils.
7292.D1.3	Describe the factors that affect soil excavation.
7292.D1.4	Describe working in various soil conditions.
7292.D1.5	Identify and describe components of a loader.
7292.D1.6	Describe the prestart inspection and preventive maintenance requirements for a loader.
7292.D1.7	Describe the startup, shutdown, and operating procedures for a loader.
7292.D1.8	Identify and describe components of a scraper.
7292.D1.9	Describe the prestart inspection and preventive maintenance requirements for a scraper.
7292.D1.10	Describe the startup, shutdown, and operating procedures for a scraper.
7292.D1.11	Describe the types of equipment used for finish grading.
7292.D1.12	Explain methods used to stabilize soils and control soil erosion.

Next Level Programs of Study

Review Document

7292.D1.13	Describe finish grading methods.
7292.D1.14	Identify and describe types of compaction equipment.
7292.D1.15	Identify and describe the components, controls, and attachments on a typical compactor.
7292.D1.16	Describe safety guidelines and basic preventive maintenance requirements associated with compaction equipment.
7292.D1.17	Describe basic procedures for operating a compactor.
7292.D1.18	Describe factors involved in work activities associated with a compactor.
7292.D1.19	Identify and describe common uses and types of backhoes.
7292.D1.20	Identify and describe the components, controls, and attachments on a typical backhoe.
7292.D1.21	Identify and describe safety, inspection, and service guidelines associated with a backhoe.
7292.D1.22	Describe basic operating procedures for a backhoe.
7292.D1.23	Identify and describe common work activities for a backhoe.
7292.D1.24	Perform basic backhoe maneuvers and setting up a backhoe using stabilizers
7292.D1.25	Identify and describe basic types, uses, and components of off-road dump trucks.
7292.D1.26	Identify and describe safety, inspection, and service guidelines associated with off-road dump trucks
7292.D1.27	Describe and complete basic startup and operating procedures for off-road dump trucks.
7292.D1.28	Identify and describe basic types, uses, and components of a dozer.
7292.D1.29	Identify and describe safety, inspection, and service guidelines associated with a dozer.
7292.D1.30	Describe and complete basic startup and operating procedures for a dozer.
7292.D1.31	Identify and describe basic types, uses, and components of excavators.
7292.D1.32	Identify and describe safety, inspection, and service guidelines associated with an excavator.
7292.D1.33	Describe and complete basic startup and operating procedures for track mounted hydraulic excavator.

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	HVAC Basics
7131.D1.1	Investigate the earliest uses of refrigeration and heating equipment and the inventors that developed them.
7131.D1.2	Discuss current employment opportunities in the mechanical construction industry and understand the qualifications required for employment.
7131.D1.3	Comply with OSHA-10 training requirements and understand the safety obligations of workers, supervisors, and managers to ensure a safe workplace.
7131.D1.4	Discuss the causes and results of accidents and the impact of accident costs.
7131.D1.5	Define safe work procedures, proper use of personal protective equipment, and working with hazardous chemicals.
7131.D1.6	Demonstrate ability to understand various elements used in commercial and residential blueprints.
7131.D1.7	Identify the types of architectural lines, symbols, notations, and abbreviations used in print reading.
7131.D1.8	Identify types of drawings such as elevation views, section views, detail views, and construction materials.
7131.D1.9	Practice techniques for communicating effectively with customers, co-workers and supervisors.
7131.D1.10	List examples that emphasize the importance of verbal and written information and instructions on the job.
7131.D1.11	Attain readiness to take the OSHA 10 Certification exam.
Domain	Basic Electrical
7131.D2.1	Describe the electrical trade and discuss the career paths available to electricians.
7131.D2.2	Discuss safety rules and regulations for electricians, including precautions for electrical hazards found on the job. Examine the OSHA-mandated lockout/tagout procedure.

Next Level Programs of Study

Review Document

7131.D2.3	Explain electrical concepts used in Ohm's law applied to DC series circuits. Discuss atomic theory, electromotive force, resistance, and electric power equations.
7131.D2.4	Analyze series, parallel, and series-parallel circuits. Examine resistive circuits, Kirchhoff's voltage and current laws, and circuit analysis.
7131.D2.5	Examine and use the NEC®. Describe the layout and the types of information
7131.D2.6	found within the code book. Practice finding information using easy-to-follow procedures.
7131.D2.7	Identify the hardware and systems used by an electrician to mount and support boxes, receptacles, and other electrical components. Examine NEC® fill and pull requirements for device, pull, and junction boxes under 100 cubic inches.
7131.D2.8	Describe conduit bending and installation. Demonstrate the techniques for using hand-operated and step conduit benders, as well as cutting, reaming, and threading conduit.
7131.D2.9	List the types and applications of raceways, wireways, and ducts. Investigate the appropriate NEC® requirements.
7131.D2.10	Describe the types and applications of conductors and demonstrate proper wiring techniques. Investigate the appropriate NEC® requirements.
7131.D2.11	Examine electrical prints, drawings, and symbols, and the types of information that can be found on schematics, one-lines, and wiring diagrams.
7131.D2.12	Investigate the electrical devices and wiring techniques common to residential construction and maintenance. Perform service calculations. Investigate the appropriate NEC® requirements.
7131.D2.13	Demonstrate proper selection, inspection, and use of common electrical test equipment, including voltage testers, clamp-on ammeters, ohmmeters, multimeters, phase/motor rotation testers, and data recording equipment. Describe safety precautions and meter category ratings.
7131.D2.14	Attain readiness to take NCCER Electrical Level I certification exams.

HVAC Fundamentals	
Career Cluster	Architecture and Construction
Program of Study	HVAC
NLPS Sequence	B
Course Code	7125
Course Description	<i>HVAC Fundamentals introduces fundamentals applicable to the heating and refrigeration phases of air conditioning. Includes types of units, parts, basic controls, functions, and applications. Emphasizes practices, tool and meter use, temperature measurement, heat flow, the combustion process and piping installation practices. Covers the basic sequence of operation for gas, oil and electric furnaces. Introduction to compression systems used in mechanical refrigeration including the refrigeration cycle and system components. Introduces safety procedures, proper use of tools used to install and service refrigeration equipment, refrigerant charging and recovery, system evacuation, calculating superheat and subcooling and using a refrigerant temperature/pressure chart. This course will use lecture, lab and online simulation to prepare students for the nationally recognized certification exam as part of the outcome assessment learning objectives.</i>

7125.D1.2	Define and properly use the terminology of the heating industry.	

Next Level Programs of Study

Review Document

7125.D1.3	Identify and explain the operation of safety devices and components used on heating equipment that were covered in the course.
7125.D1.4	Explain the combustion and heating process of a fossil fuel furnace.
7125.D1.5	Describe the sequence of operation for the furnace types covered in the course.
7125.D1.6	Demonstrate the use of the tools, test equipment and materials used in heating equipment installation and service that were covered in this course.
7125.D1.7	Explain the basics concepts of low voltage thermostatic control.
7125.D1.8	Discuss the characteristics of fuels and the safety precautions for working with those fuels.
7125.D1.9	Measure the temperature rise across a furnace's heat exchanger.
7125.D1.10	Identify common electrical schematic symbols used in furnace schematics.
7125.D1.11	Identify the different ignition systems used on gas furnaces.
7125.D1.12	Explain how to measure manifold gas pressure.
7125.D1.13	Describe the various methods of proving flames used on gas and oil furnaces that were covered in the course.
Domain	Refrigeration Fundamentals
7125.D2.1	Demonstrate safe practices and procedures with tools, refrigerants, torches, and test equipment covered in the course.
7125.D2.2	Define key terms associated with refrigeration such as superheated refrigerant, sub cooled refrigerant, and saturated refrigerant.
7125.D2.3	Identify the basic components of mechanical refrigeration systems that were covered in the course.
7125.D2.4	Describe the basic refrigeration cycle identifying where the refrigerant is superheated, subcooled, saturated, under high pressure, and under low pressure.
7125.D2.5	Use a temperature/pressure chart to determine saturation temperatures and pressures.
7125.D2.6	Using data supplied, calculate/determine superheat, subcooling, evaporator coil TD, evaporator coil, T condenser split, saturated suction temperature and condensing temperature. [TD = EAT – BP where EAT is evaporator entering air temperature and BP is refrigerant boiling point temperature in the evaporator; T = EAT – LAT where EAT is the evaporator's entering air temperature and LAT is the evaporator's leaving air temperature].
7125.D2.7	Explain the basic principles of heat transfer.
7125.D2.8	Demonstrate the proper use of refrigeration tools introduced in the course.
7125.D2.9	Demonstrate the fluxing, brazing, and/or soldering, flaring and swaging techniques introduced in the course.
7125.D2.10	Describe the operation/function of compressors, metering devices, condensers, and evaporators.
7125.D2.11	Describe the use of vacuum pumps, manifold gauges, and refrigerant recovery/recycling equipment.
7125.D2.12	Explain the basics of ozone depletion, the link between refrigerants and ozone depletion and the effects of ozone depletion.
7125.D2.13	Attain readiness to take the Esco EPA 608 Reclamation Certification exam.
7125.D3.1	Demonstrate how to pressurize a system with nitrogen, install gauges, properly evacuate a system, and read a micron gauge.

HVAC Service	
Career Cluster	Architecture and Construction
Program of Study	HVAC
NLPS Sequence	C
Course Code	7126
Course Description	<i>HVAC Service continues the study of air conditioning and refrigeration along with the procedures used to analyze mechanical and electrical problems encountered when servicing heating systems. Students will better understand compressors, metering devices, system recharging, refrigerant recovery, basics of motor types, equipment installation and troubleshooting practices as they apply to air conditioning and refrigeration systems. Additionally, students will be able to understand electrical schematics and connection diagrams, combustion testing, venting and combustion air requirements, sequence of operation, heating controls, troubleshooting techniques, installation practices, basic codes applying to furnace codes, and service procedures. This course will use lecture, lab and online simulation to prepare students for the nationally recognized certification exam as part of the outcome assessment learning objectives.</i>
Prerequisite(s)/ Corequisite(s)	Principles of HVAC; HVAC Fundamentals

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Electrical Circuits and Controls</i>
7126.D1.1	Demonstrate safe practices and procedures.
7126.D1.2	Describe the operation of the individual controls identified in the course and explain how they are typically used in control systems.
7126.D1.3	Effectively read and use schematic and pictorial wiring diagrams commonly found on residential and light commercial heating, air conditioning equipment.
7126.D1.4	Wire a simple control system for a residential or light commercial heating and/or air conditioning system while using the appropriate wiring diagrams.
7126.D1.5	Draw pictorial and schematic wiring diagrams for equipment.
7126.D1.6	Troubleshoot electrical control systems.
7126.D1.7	Perform tasks as assigned in a professional manner.
7126.D1.8	Program basic electronic heating/cooling thermostats.
7126.D1.9	Install field control wiring for typical residential and light commercial HVAC systems.
7126.D1.10	Explain the difference between pilot duty and line duty controls.
7126.D1.11	Recognize common controls used on residential and light commercial HVAC equipment covered in the class.
7126.D1.12	Draw the typical schematic symbols used in HVAC/R work.
7126.D1.13	Attain readiness to take the ESCO HVAC Excellence Employment Ready Exam.
Domain	<i>Refrigeration Service</i>
7126.D2.1	Identify and correctly locate on a system the air conditioning and refrigeration system components normally found in residential and light commercial A/C systems.
7126.D2.2	Describe the proper operation and function of system components covered in the course.
7126.D2.3	Identify the most common types of system component failure and the effect each has on the performance of the system.
7126.D2.4	Using manifold gauges, pressure/temperature charts, and thermometers, determine the following for a refrigeration system: superheat, subcooling, evaporator coil TD, evaporator coil DT, condensing temperature, saturated suction temperature and condenser split.
7126.D2.5	Apply the basic refrigeration cycle and a refrigerant temperature/pressure chart to analyze and troubleshoot A/C and/or refrigeration systems.

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Heating Service
7244.D1.1	Demonstrate safe practices and procedures.
7244.D1.2	Find pertinent installation information in a furnace installation manual.
7244.D1.3	Adjust blower speed to meet manufacturer’s specifications for temperature rise across the furnace’s heat exchanger.
7244.D1.4	Describe fuel piping, combustion air and venting requirements for gas and oil furnaces.
7244.D1.5	Identify the common controls used on heating appliances covered in the course.
7244.D1.6	Explain the function of the common heating controls covered in the course.
7244.D1.7	Explain how the different gas and oil ignition systems work.
7244.D1.8	Perform basic troubleshooting tests on a furnace.
7244.D1.9	Demonstrate the use of common test equipment required in heating service work.
7244.D1.10	Read an electrical schematic for a furnace.
7244.D1.11	List basic code requirements pertaining to furnace installations covered in the course.

Next Level Programs of Study

Review Document

7244.D1.12	Describe the different venting requirements between atmospheric furnaces, 78-80% fan assisted furnaces, and 90% induced draft furnaces.
7244.D1.13	Outline typical sequences of operation for furnace types covered in the course.
7244.D1.14	Formulate a “clean and check” preventative maintenance procedure for furnace.
7244.D1.15	Attain readiness to take the ESCO HVAC Excellence Employment Ready Exam.
Domain	Duct Fabrication
7244.D2.1	Demonstrate safe practices and procedures.
7244.D2.2	Develop neat and clean shop drawings to scale.
7244.D2.3	Read and interpret schedules, drawings and specifications shown on construction drawings to formulate a material list.
7244.D2.4	Layout and calculate measurements for duct work used in heating and air conditioning using mechanical drawings.
7244.D2.5	Demonstrate the use of hand tools used in sheet metal fabrication and duct installation.
7244.D2.6	Demonstrate use of sheet metal shop equipment.
7244.D2.7	Demonstrate proper installation practices.
Domain	Heat Pump Systems
7244.D3.1	Demonstrate safe practices and procedures.
7244.D3.2	Interpret and utilize pictorial and schematic diagrams.
7244.D3.3	Identify different types of heat pumps in relation to their source of heat.
7244.D3.4	Diagram refrigerant flows through a heat pump in both the heating and cooling mode identifying refrigerant condition and pressures.
7244.D3.5	Explain in detail the defrost cycle of the air-to-air heat pump.
7244.D3.6	Identify and troubleshoot electrical control system components covered in this course.
7244.D3.7	Identify and troubleshoot common refrigeration system components covered in this course.
7244.D3.8	Explain the different methods for checking refrigerant charge and charging heat pumps covered in this course.
7244.D3.9	Describe the typical thermostats used with heat pumps.
7244.D3.10	Explain the need and types of auxiliary heat.
7244.D3.11	Given the heat loss and heat gain of a structure, size a heat pump and back-up electric heat.
7244.D3.12	Outline typical heat pump control technique.
7244.D3.13	Compare and contrast the different types of heat pumps: air-to-air, ground source and closed-loop water source heat pumps.
7244.D3.14	Attain readiness to take the ESCO HVAC Excellence Employment Ready Exam.

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Introduction to Plumbing Part 1</i>
7133.D1.1	Examine the many career options available in today's plumbing profession. Investigate the history of plumbing and discuss the current technology, industries, and associations that make up the modern plumbing profession. Review human relations and safety skills.
7133.D1.2	Discuss the causes of accidents and their consequences and repercussions in terms of delays, increased expenses, injury, and loss of life. Review the types and proper use of personal protective equipment (PPE). Describe the use of critical safety information conveyed in hazard communication (HazCom), safety signs, signals, lockout/tagout, and emergency response. Explain confined-space safety, and review safety issues related to hand and power tools.
7133.D1.3	Demonstrate the care and use of the different types of hand and power tools used on the job. Select the appropriate tools for different tasks, and review tool maintenance and safety issues.
7133.D1.4	Discuss basic math concepts, such as whole numbers, fractions, decimals, and squares, and demonstrate how they apply to on-the-job situations. Describe how to measure pipe using fitting tables and framing squares and how to calculate 45-degree offsets.
7133.D1.5	Navigate the different types of plumbing drawings encountered on the job and discuss how to interpret and apply them when laying out and installing plumbing systems. Discuss the symbols used in plumbing and mechanical drawings and review isometric, oblique, orthographic, as well as schematic drawings. Render plumbing drawings and recognize how code requirements apply to plumbing drawings.
7133.D1.6	Describe the different types of plastic pipe and fittings used in plumbing applications, including ABS, PVC, CPVC, PE, PEX, and PB. Demonstrate how to measure, cut, join, and support plastic pipe according to manufacturer's instructions and applicable codes. Discuss pressure testing of plastic pipe once installed.
7133.D1.7	Attain readiness to take the first half of NCCER Plumbing Level I certification exams.

Next Level Programs of Study

Review Document

Domain	Introduction to Plumbing Part 2
7133.D2.1	Discuss sizing, labeling, and applications of copper pipe and fittings and review the types of valves that can be used on copper pipe systems. Explain proper methods for cutting, joining, and installing copper pipe. Examine insulation, pressure testing, seismic codes, and handling and storage requirements.
7133.D2.2	Examine hub-and-spigot and no-hub cast-iron pipe and fittings and their applications in DWV systems. Discuss material properties, storage and handling requirements, and fittings and valves. Demonstrate joining methods, installation, and testing.
7133.D2.3	Discuss threading, labeling, and sizing of steel pipe and compare the differences between domestic and imported pipe. Demonstrate the proper techniques for measuring, cutting, threading, joining, and hanging steel pipe. Examine corrugated stainless-steel tubing.
7133.D2.4	Discuss the proper applications of code-approved fixtures in plumbing installations. Examine the different types of fixtures and the materials used in them. Investigate storage, handling, and code requirements.
7133.D2.5	Describe how DWV systems remove waste safely and effectively. Discuss how system components, such as pipe, drains, traps, and vents work. Explain drain and vent sizing, grade, and waste treatment. Discuss how building sewers and sewer drains connect the DWV system to the public sewer system.
7133.D2.6	Identify the major components of water distribution systems and describe their functions. Describe water sources and treatment methods and examine supply and distribution for the different types of systems installed on jobs.
7133.D2.7	Attain readiness to take the second half of NCCER Plumbing Level I certification exams.

Plumbing and Pipefitting Fundamentals	
Career Cluster	Architecture and Construction
Program of Study	Plumbing and Pipefitting
NLPS Sequence	B
Course Code	7129
Course Description	<i>Plumbing and Pipefitting Fundamentals will build on the knowledge and skills developed in the principles course. Students will gain a better understanding of a variety of plumbing materials and fittings. As well as focus on common plumbing installations including piping, drains, fixtures and valves.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Plumbing and Pipefitting
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes

Competency #	Competency
7120.D1.1	Produce a square corner using the 3-4-5 ratio
7120.D1.2	Determine the run, travel, and rise of an offset.
7120.D1.3	Interpret information from given site plans.
7120.D1.4	Verify the information on commercial drawings.
7120.D1.5	Lay out plumbing systems and fixture rough-ins.
7120.D1.6	Complete a material takeoff for drainage, waste, and vent (DWV) and water supply systems from information shown on drawings.
7120.D1.7	Cut, bore, and sleeve structural members using the appropriate tools.
7120.D1.8	Identify insulating materials and their properties.
7120.D1.9	Identify and install common types of firestopping materials and assemblies.
7120.D1.10	Develop a material takeoff from a given set of plans.
7120.D1.11	Correctly set up levels.
7120.D1.12	Identify the building sewer and building drain location.
7120.D1.13	Determine the location of fixtures and the route of the aboveground plumbing, using plans and fixture rough-in sheets.
7120.D1.14	Locate fixture rough ins using submittals.
7120.D1.15	Test the underground and aboveground DWV systems.
7120.D1.16	Set an elevation using a builder's or laser level.
7120.D1.17	Install floor drains, area drains, and floor sinks.

Next Level Programs of Study

Review Document

7120.D1.18	Install primary and secondary roof drains.
7120.D1.19	Install waterproof membranes and flashing for a shower pan.
7120.D1.20	Install a trap primer.
7120.D1.21	Evaluate the domestic water distribution system using plans and fixture rough-in sheets.
7120.D1.22	Install water service and a water distribution system.
7120.D1.23	Test a water supply system.
7120.D1.24	Identify the basic types of valves.
7120.D1.25	Select a valve for a specific application.
7120.D1.26	Install and service various types of valves.
7120.D1.27	Identify the pre-installation techniques to follow when installing fixtures and valves.
7120.D1.28	Install fixtures and valves at rough-in.
7120.D1.29	Install fixtures and valves at trim-out.
7120.D1.30	Identify connection procedures for various appliances.
7120.D1.31	Identify the basic operation and components of various water heaters.
7120.D1.32	Identify the safety hazards associated with water heaters.
7120.D1.33	Install water heaters.
7120.D1.34	Identify the safety precautions that must be followed when working on electrical equipment.
7120.D1.35	Identify how voltage, current, resistance, and power are related.
7120.D1.36	Identify the purpose and operation of the various electrical components used in plumbing equipment.
7120.D1.37	Identify the safety precautions and potential hazards associated with fuel systems
7120.D1.38	Identify the major components of fuel systems:
7120.D1.39	Apply local codes to various fuel gas systems.

Plumbing and Pipefitting Capstone	
Career Cluster	Architecture and Construction
Program of Study	Plumbing and Pipefitting
NLPS Sequence	D
Course Code	7264
Course Description	<i>The Plumbing and Pipefitting Capstone course competencies will be developed on an as needed basis beginning with the 2023-24 school year. The goal for this course will be to enable a student to earn at least level 3 certification or to complete one full years worth of an apprenticeship.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Construction Trades; Plumbing and Pipefitting Fundamentals; Advanced Plumbing and Pipefitting
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum

7264.D1.1	Identify the weights and measures used in the English and metric systems.	
7264.D1.2	Describe how to measure area and volume.	
7264.D1.3	Describe the practical applications of area and volume in plumbing.	
7264.D1.4	Explain the concepts of temperature and pressure and how they apply to plumbing installations.	

Next Level Programs of Study

Review Document

7264.D1.5	Explain the functions and applications of six simple machines: inclined plane, lever, pulley, wedge, screw, and wheel and axle.
7264.D1.6	Determine the factors that affect the sizing of water supply systems.
7264.D1.7	Size a given water supply system for different acceptable flow rates and calculate pressure drops in a given water system.
7264.D1.8	Describe the six basic backflow-prevention devices and the hazards they are designed to prevent.
7264.D1.9	Identify the methods for disinfecting the water supply and determine the sources of contamination they address.
7264.D1.10	Identify the methods for filtering and softening the water supply and determine the sources of contamination they address.
7264.D1.11	Determine how to troubleshoot water supply problems caused by contamination.
7264.D1.12	Describe the principles and components of vent systems and their code requirements.
7264.D1.13	Describe the different types of vent systems that plumbers install.
7264.D1.14	Describe how to size drain, waste, and vent systems.
7264.D1.15	Describe how to size storm drainage systems.
7264.D1.16	Describe the components of sewage and stormwater removal systems and explain how to size and install them.
7264.D1.17	Explain how to troubleshoot and repair sewage and stormwater removal systems.
7264.D1.18	Identify corrosive wastes and handle them safely
7264.D1.19	Explain how to join and install different types of corrosive-resistant waste piping.
7264.D1.20	Explain the types, functions, and capacities of different compressed-air systems.
7264.D1.21	Identify the different methods of conditioning compressed air.
7264.D1.22	Identify the safety issues related to compressed-air systems.
7264.D1.23	Explain the safety issues related to installing, repairing, and servicing compressed-air systems.
7264.D1.24	Explain how to install a basic compressed-air system.
7264.D1.25	Recognize and observe standards of safety and etiquette when making service calls to residential and commercial facilities.
7264.D1.26	Explain how to troubleshoot and repair problems with water supply systems.
7264.D1.27	Explain how to troubleshoot and repair problems with fixtures and appliances.
7264.D1.28	Explain how to troubleshoot and repair problems with DWV systems.

Arts, AV Tech and Communication: Special Topics	
Career Cluster	Arts, AV Tech and Comm
Program of Study	
NLPS Sequence	
Course Code	4576
Course Description	<i>Arts, AV Tech and Communication: Special Topics is an extended learning experience designed to address the advancement and specialization of careers within the career cluster through the provision of a specialized course for a specific workforce need in the school's region. The learning experience is at a qualified site, and is designed to give the student the opportunity to learn and practice technical skills; while working under the direction of the appropriately licensed professional. Throughout the course, students will focus on learning about employment opportunities and obtaining the knowledge, skills and attitudes essential for success in specific occupations. Course standards and curriculum must be tailored to the specific profession, preparing students to advance in this career field, and where applicable, provide students with opportunities for certification or dual credit. Participation in a related CTSO encourages the development of leadership, communication and career related skills, and opportunities for community service.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 semester course, up to 3 credits per semester, May be offered for successive semesters up to 12 credits
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X
Additional Notes	Schools must have an approved Nonstandard Course Waiver on file to be eligible for CTE Funding.

Introduction to Communications	
Career Cluster	Arts, AV Tech and Comm
Program of Study	
NLPS Sequence	Introductory
Course Code	4790
Course Description	<i>Introduction to Communications is a course designed to provide a foundational knowledge of identifying and using modern communication to exchange messages and information. This course explores the application of the tools, materials, and techniques used to design, produce, use, and assess systems of communication. Students will produce graphic and electronic media as they apply communication technologies. This course will also explore the various technical processes used to link ideas and people through the use of electronic and graphic media. Major goals of this course include an overview of communication technology; the way it has evolved, how messages are designed and produced, and how people may profit from creating information services and products. Students will explore mass media communication processes including radio and television broadcasting, publishing and printing activities, telecommunication networks, recording services, computer and data processing networks, and other related systems. Students will use the design process to solve design projects in each communication area.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 or 2 semester course, 1 credit per semester, 2 credits maximum

Competency #	Competency	
Domain	<i>Design Concepts of Communication Fundamentals</i>	
Core Standard 1	Students integrate design concepts within project solutions.	
ICOM-1.1	Relate a communication model to any communication systems	

Next Level Programs of Study

Review Document

ICOM-1.2	Assess and understand the impacts of a communication product on individuals, society, and the environment
ICOM-1.3	Design media following common rules for “good” visual layout
ICOM-1.4	Describe the design principles and processes used to generate graphic media
ICOM-1.5	Utilize design elements in projects
Domain	Systems Model
Core Standard 2	Students analyze the communication systems model and evaluate the need of a system or product.
ICOM-2.1	Define and describe communication systems
ICOM-2.2	Describe and define sending messages in the communication processes
ICOM-2.3	Describe the major technological actions (developing, producing, using, and assessing) that people participate in as related to communication systems
ICOM-2.4	Explain familiar electronic communication devices or networks using a systems model
ICOM-2.5	Discuss the common techniques in transmission of messages
ICOM-2.6	Describe the nature of messages and information signals
Domain	Problem-Solving Approach
Core Standard 3	Students select the problem-solving process to develop the solution to a given project.
ICOM-3.1	List the steps in the problem-solving approach
ICOM-3.2	Develop a statement that defines a problem or opportunity that could be addressed by a communication product
ICOM-3.3	Develop and refine solutions to a communication problem or opportunity
ICOM-3.4	Select and produce a communication product that meets a problem or opportunity
Domain	Historical Impacts/Achievements of Communication Fundamentals
Core Standard 4	Students analyze the historical impacts of the past, and how communication technology is utilized today.
ICOM-4.1	List several stages in the development of the computer and explain their significance
ICOM-4.2	Analyze the historical development of the computer and its peripheral components
ICOM-4.3	List and describe the important events in the evolution of communications technologies
ICOM-4.4	Describe the importance of design in the development of the evolution of communication media and systems
ICOM-4.5	Define communication and communication technology here today and in the past
Domain	Careers in Communications
Core Standard 5	Students connect communication careers and future job outlook research.
ICOM-5.1	Identify and describe careers in communications
ICOM-5.2	Research college/technical schools for class requirements for a communications career major
ICOM-5.3	Find communication career income information
ICOM-5.4	Research current future job outlook
Domain	Utilization of Technical Graphics

Next Level Programs of Study

Review Document

Core Standard 6	Students create technical drawings using appropriate technology.
ICOM-6.1	Describe technical graphics and their use in communications
ICOM-6.2	Identify and describe the major types of technical drawing
ICOM-6.3	Prepare pictorial drawings of simple objects
ICOM-6.4	Sketch and draw Multiview drawings of simple objects
ICOM-6.5	Describe and prepare simple oblique, isometric, perspective, and Multiview drawings
ICOM-6.6	Use CAD or graphics software to prepare a simple drawing
Domain	<i>Producing Printed and Photographic Media</i>
Core Standard 7	Students create printed and photographic media using the design principles.
ICOM-7.1	Briefly describe the various graphic, photographic, and printing processes
ICOM-7.2	Generate, prepare, and print images for various printing processes
ICOM-7.3	Develop sufficient proficiency to enter, manipulate, save, recall, and print a file using word processing, spread sheet, and technical graphic software
ICOM-7.4	Given the target audience, the student will be able to show the importance of assessment in the advertising media industry
ICOM-7.5	Explain the elements of visual design unique to the photographic system
ICOM-7.6	Plan and present a photographic communication message
ICOM-7.7	Describe and develop an assessment for photographic messages
ICOM-7.8	Describe the steps of photographic systems
ICOM-7.9	Describe the essential parts and functions of cameras and scanners
ICOM-7.10	Utilize software for print correction, proofing, and output of digital media
Domain	<i>Developing and Using Electronic Media</i>
Core Standard 8	Students apply concepts of the design process utilizing various forms of electronic media applications.
ICOM-8.1	Identify how electronic media is regulated at the local, federal, and international levels
ICOM-8.2	Describe various classifications of electronic media
ICOM-8.3	Describe the application of electronics in modern communication
ICOM-8.4	Create a storyboard to produce a script for an electronic media production
ICOM-8.5	List and explain the major steps in producing both print and electronic messages
ICOM-8.6	Describe the action required to produce and communicate an electronic media message
ICOM-8.7	Describe the types of products that are produced by the graphic and electronic communications industry
ICOM-8.8	Explain how audible messages are converted into signals for transmission of information and data
ICOM-8.9	Describe communications systems and relate a model of the communication process various graphic and electronic media
ICOM-8.10	Record and store an electronic media message in different file formats (i.e., vector, raster, bmp, & PDF)

Next Level Programs of Study

Review Document

ICOM-8.11	Using desktop publishing software, prepare a layout for a newsletter or other publication
ICOM-8.12	List and describe the steps used to prepare for a video production
ICOM-8.13	Evaluate a given message and determine the materials and props needed for production
ICOM-8.14	Discuss the criteria used for talent and script selection
ICOM-8.15	Discuss the impacts of electronic communication systems on individuals, communities, and the environment
ICOM-8.16	Describe the difference between audio media and other forms of communication technology
ICOM-8.17	Describe the importance of proper direction in electronic communication production activities
ICOM-8.18	Plan and produce a radio commercial or podcast
ICOM-8.19	List and describe examples of audio devices, systems, and technologies
ICOM-8.20	Record, edit, save, and publish audio files
ICOM-8.21	Identify and describe various computer input and output devices
ICOM-8.22	Explain the advantages and disadvantages of global information networks
ICOM-8.23	Utilization of government, public, and educational websites
ICOM-8.24	Identify the steps in establishing a website

Design Fundamentals	
Career Cluster	Arts, AV Tech and Comm
Program of Study	
NLPS Sequence	Introductory
Course Code	4834
Course Description	<i>Design Fundamentals introduces students to fundamental design theory. Investigations into design theory and color dynamics will provide experiences in applying design theory, ideas and creative problem solving in the area of communication technology. Student learning experiences encompass art history, art criticism, aesthetics, and production, which lead to the creation of portfolio-quality works. Students reflect upon and refine their work; explore cultural and historical connections; analyze, interpret, theorize, and make informed judgments about artwork and the nature of art in areas of communication; relate art to other disciplines and discover opportunities for integration; and incorporate literacy and presentational skills.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 or 2 semester course, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas Fulfills a Fine Arts requirement for the Core 40 Academic Honors Diploma
Dual Credit Status	X

Competency #	Competency
Domain	<i>Foundations of Design</i>
4834.D1.1	Students evaluate the historical foundation of design to gain background knowledge for designing communication products.
4834.D1.2	Review the historical foundations of design in art

Next Level Programs of Study

Review Document

4834.D1.3	Incorporate styles and mannerisms of past art and design into works
4834.D1.4	Identify and discuss important eras, designers, genres, and techniques in 20th and 21st century graphic design
4834.D1.5	Examine how historical artists can influence design and illustration.
4834.D1.6	Identify and describe emerging trends and technologies in the Graphic Design Fields
Domain	Graphic Design
4834.D2.1	Students generate solutions to visual design problems that combine art and technology to communicate ideas.
4834.D2.2	Identify the different areas of graphic design
4834.D2.3	Analyze different types of media for graphic arts
4834.D2.4	Identify and describe different printmaking processes
4834.D2.5	Describe the applications of graphic design
4834.D2.6	Demonstrate and discuss work developed as part of a design team
4834.D2.7	Discuss how symbols and logos represent ideas or identity
Domain	Principles and Elements of Design
4834.D3.1	Students utilized the Elements and Principles of Design in visual design solutions to enhance the communication of an idea.
4834.D3.2	Define basic terminology related to the elements and principles of design
4834.D3.3	Identify the utilization of the five elements of line, shapes, mass, texture, and color as they apply to basic design
4834.D3.4	Study composition principles
4834.D3.5	Recognize and employ color theory and color perception
Domain	The Design Process & Concept Development
4834.D4.1	Students demonstrate creative and visual problem solving using the design process for optimal design quality.
4834.D4.2	Plan the use of the elements principles of design to solve a visual art problem
4834.D4.3	Identify the customers wants and need for the design
4834.D4.4	Research ideas and company profile
4834.D4.5	Evaluate Target market
4834.D4.6	Draw and refine designs from thumbnails to final design
4834.D4.7	Prepare designs for presentation
4834.D4.8	Describe the job flow from initial customer contact to collection of payment
4834.D4.9	Produce drawings for communicating and presenting a concept visually
Domain	Page Layout
4834.D5.1	Students design products using basic page layout techniques to enhance overall visual appeal and communication.
4834.D5.2	Proportions and White space
4834.D5.3	Apply the rules of effective typography using hand and/or computer skills

Next Level Programs of Study

Review Document

4834.D5.4	Compare and contrast the use of images in projects (Illustration verses Photo)
4834.D5.5	Discern the differences between Text and Typography
4834.D5.6	Interpret appropriate Copyrights on text and images
4834.D5.7	Demonstrate how to place scanned graphics/photos into existing page layout
4834.D5.8	Demonstrate text alignment, element positioning, and rules of page design for printed matter
4834.D5.9	Examine and construct documents with multiple measurement systems used in the field
Domain	Career Opportunities
4834.D6.1	Students apply and adapt career resources to evaluate career opportunities in design.
4834.D6.2	Explore career opportunities in graphic design
4834.D6.3	Identify different artistic and professional disciplines in visual communications
4834.D6.4	Explore opportunities in a post-secondary educational program
4834.D6.5	Compare and contrast careers in graphics and design, along with their education, training requirements, and salary ranges
4834.D6.6	Identify gender and diversity related issues in graphics and/or design
Domain	Portfolio and Presentation
4834.D7.1	Students demonstrate the development of a professional portfolio for future career development.
4834.D7.2	List the criteria for selecting artwork
4834.D7.3	Collect and refine all previous graphic design projects-- Select and organize content
4834.D7.4	Giving and receiving constructive criticism of portfolios
4834.D7.5	List common types of portfolios and their uses

Introduction to Housing and Interior Design	
Career Cluster	Arts, AV Tech and Comm
Program of Study	
NLPS Sequence	Introductory
Course Code	5350
Course Description	<i>Introduction to Housing and Interior Design is an introductory course essential for those students interested in academic enrichment or a career within the housing, interior design, or furnishings industry. This course addresses the selection and planning of designed spaces to meet the needs, wants, values and lifestyles of individuals, families, clients, and communities. Housing decisions, resources and options will be explored including factors affecting housing choices and the types of housing available. Developmental influences on housing and interior environments will also be considered. Basic historical architectural styling and basic furniture styles will be explored as well as basic identification of the elements and principles of design. Design and space planning involve evaluating floor plans and reading construction documents while learning to create safe, functional, and aesthetic spaces. Presentation techniques will be</i>

	<p><i>practiced to thoroughly communicate design ideas. Visual arts concepts including aesthetics, criticism, history and production, are addressed. Direct, concrete mathematics proficiencies will be applied. A project-based approach will be utilized requiring higher order thinking, communication, leadership and management processes as housing and interior design content is integrated into the design of interior spaces while meeting specific project criteria. This course provides the foundation for further study and careers in the architecture, construction, housing, interior design, and furnishings industries.</i></p>	
Prerequisite(s)/ Corequisite(s)	None	
Credits	1 or 2 semester course, 1 credit per semester, 2 credits maximum	
Counts Toward	Counts as a directed elective or elective for all diplomas Fulfills a Fine Arts requirement for the Core 40 Academic Honors Diploma	
Dual Credit Status

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Personal, Academic, and Career Success</i>
5350.D1.1	Integrate processes of thinking, communication, leadership, and management in order to apply housing and interior design knowledge and skills.
5350.D1.2	Demonstrate components of critical thinking, creative thinking, and reasoning
5350.D1.3	Evaluate effective communication processes in school, family, career, and community settings
5350.D1.4	Demonstrate leadership that encourages participation and respect for the ideas, perspectives, and contributions of group members
5350.D1.5	Apply management, decision-making, and problem-solving processes to accomplish tasks and fulfill responsibilities
5350.D1.6	Examine the interrelationships among thinking, communication, leadership, and management processes to address housing, interior design, and furnishings issues
5350.D1.7	Identify fundamentals to career success (e.g., time-management, strong work ethic, positive attitude, adaptability/flexibility, stress resilience, accountability, self-discipline, resourcefulness, cooperation, self-assessment)
Domain	<i>Careers in Housing, Interior Design, and Interior Furnishings</i>
5350.D2.1	Investigate career pathways, education, and training in the housing, interior design and furnishings industry.
5350.D2.2	Examine potential career paths, opportunities and trends in the housing, interior design, and furnishings industry
5350.D2.3	Determine roles and functions; knowledge, skills, and attitudes; and rewards and demands associated with careers and levels of employment in the housing, interior design, and furnishings industry
5350.D2.4	Identify education and training requirements in the housing profession that enhance career advancement and promote lifelong learning
5350.D2.5	Identify volunteer roles, part-time jobs, and entry-level positions that offer opportunities to explore the housing, interior design, and furnishings industry
5350.D2.6	Identify opportunities, benefits, and risks of entrepreneurial career pathways in the housing, interior design, and furnishings industry
5350.D2.7	Practice technical skills required of professionals in the housing, interior design, and furnishings industry
Domain	<i>Housing Decisions, Resources, and Options</i>
5350.D3.1	Evaluate housing decisions in relation to available resources and options.

Next Level Programs of Study

Review Document

5350.D3.2	Examine factors affecting housing choices and types of available housing related to satisfying needs, wants, values and lifestyles of individuals, families, clients, and communities
5350.D3.3	Assess individual, family, client and community needs, goals, and resources in planning for housing, interiors, and furnishings
5350.D3.4	Analyze geographic locations, safety and security, energy-efficiency, aesthetic preferences, and required maintenance to make housing choices that meet the needs of individuals, families, clients, and communities
5350.D3.5	Evaluate the impact of zoning regulations, restrictions, and ownership options on housing choices
5350.D3.6	Examine processes and costs for acquiring and maintaining a residence or business
Domain	<i>Space Planning of Housing and Interior Environments</i>
5350.D4.1	Develop space planning skills used in housing, interior design, and furnishings careers.
5350.D4.2	Interpret and evaluate floor plans and scaled drawings
5350.D4.3	Analyze activity zones, traffic patterns, and storage systems of floor plans for safety, efficiency, and adequacy
5350.D4.4	Create floor/space plans that meet the needs of individuals, families, and clients
5350.D4.5	Apply universal and accessibility guidelines and regulations to floor/space planning and furniture arrangement of living/sleeping, service/work, and kitchen/bath areas
5350.D4.6	Prepare interior floor/space plans using standard industry scales and symbols
5350.D4.7	Describe industry standards for measuring, estimating, purchasing, and pricing
5350.D4.8	Examine aesthetics, function, and psychological impacts of design plans that address individual, family, client, and/or community needs, goals, and resources
Domain	<i>Communications and Marketing</i>
5350.D5.1	Integrate processes of communication in the creation, expression, and interpretation of design information and ideas.
5350.D5.2	Devise and write a design plan identifying design phases and processes, client needs and consultations, and project management skills
5350.D5.3	Demonstrate professional lettering and labeling, creation of legends, keys, and information boxes, etc. to communicate design ideas
5350.D5.4	Design and illustrate the foundational elements of marketing a professional identity
5350.D5.5	Practice various methods of interior design presentation using available information technology, presentation media, and other resources in client presentations and additional communication processes
5350.D5.6	Create presentation boards utilizing professional mounting techniques and arrangement of items to communicate to a client all aspects of design plans/ideas
Domain	<i>Design Concepts of Housing, Interiors, and Furnishings</i>
5350.D6.1	Practice and analyze technical design and space planning skills related to the function of housing, interior spaces, and furnishings.
5350.D6.2	Identify and apply architectural symbols in the design of housing and interior spaces
5350.D6.3	Interpret and evaluate a variety of construction drawings and documents

Next Level Programs of Study

Review Document

5350.D6.4	Identify the elements and principles of design
5350.D6.5	Analyze floor plans for arrangement of furniture and furnishings considering architectural features, usable space, circulation/traffic patterns, clearance spaces, and the elements and principles of design
5350.D6.6	Draw interior space plans and design living, sleeping, service, and/or work areas to scale using architectural symbols
5350.D6.7	Demonstrate mathematical applications in the creation of scaled plans, measuring and calculation of square footage, volume of interior space, and cost per square foot
5350.D6.8	Select and arrange suitable furnishings and accessories for a given space using industry scaled templates
5350.D6.9	Apply color theory, design elements and design principles in planning and selection of furnishings and appropriate interior background treatments for floors, walls, and windows of living and work environments
5350.D6.10	Compare and contrast functionality and aesthetics of interior space designs, furniture arrangement, and common architectural features
Domain	<i>Developmental Influences on Housing and Interior Environments</i>
5350.D7.1	Assess factors that influence design and development in housing and interiors.
5350.D7.2	Identify ways that historical and contemporary societal aspects, as well as emerging trends, affect the design of housing and interior environments and the space needs of individuals, families, clients, and communities
5350.D7.3	Identify design concepts of interior environments to accommodate universal design, accessibility, and other needs of the physically challenged and elderly
5350.D7.4	Identify features of basic architecture and furniture styles
5350.D7.5	Describe how features of architecture, furniture, and furnishings have been influenced by technology and mass production through various historical periods
5350.D7.6	Identify environmental factors and emerging trends related to master planning of communities and the design of sustainable and “green” housing and furnishings

Introduction to Fashion & Textiles

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Personal, Academic, and Career Success</i>
5380.D1.1	Integrate processes of thinking, communication, leadership, and management in order to apply fashion and textiles knowledge and skills.
5380.D1.2	Demonstrate components of critical thinking, creative thinking, and reasoning
5380.D1.3	Evaluate effective communication processes in school, family, career, and community settings
5380.D1.4	Demonstrate leadership that encourages participation and respect for the ideas, perspectives, and contributions of group members
5380.D1.5	Apply management, decision-making, and problem-solving processes to accomplish tasks and fulfill responsibilities
5380.D1.6	Examine interrelationships among thinking, communication, leadership, and management processes to address family, community, and workplace issues
5380.D1.7	Demonstrate fundamentals to career success (e.g., strong work ethic, time- management, positive attitude, adaptability/flexibility, stress resilience, accountability, self-discipline, resourcefulness, cooperation, self-assessment)
Domain	<i>Careers in Fashion, Textiles, and Apparel</i>
5380.D2.1	Investigate career pathways, education and training in the fashion, textiles, and apparel industry.
5380.D2.2	Examine potential career paths, opportunities and trends in the fashion, textile, and apparel industry
5380.D2.3	Determine roles and functions; knowledge, skills, and attitudes; and rewards and demands associated with various careers and levels of employment in the fashion, textile, and apparel industry
5380.D2.4	Identify education and training requirements in fashion, textile, and apparel professions that enhance career advancement and promote lifelong learning
5380.D2.5	Identify volunteer roles, part-time jobs, and entry-level positions that offer opportunities to explore the fashion, textile, and apparel industry
5380.D2.6	Identify opportunities, benefits, and risks of entrepreneurial career pathways in the fashion, textile, and apparel industry
5380.D2.7	Practice technical skills required of professionals in the fashion, textile, and apparel industry
Domain	<i>Properties of Fashion, Textiles, and Apparel Products</i>
5380.D3.1	Evaluate properties of fashion, textile, and apparel products to determine performance and functionality in a variety of end uses.
5380.D3.2	Identify and categorize common textile fibers
5380.D3.3	Explain properties and performance characteristics of fibers, yarns, woven fabrics, knit fabrics, and non-woven textile products
5380.D3.4	Analyze effects of textile characteristics on design, construction, care, use, and maintenance of fashion and apparel products
5380.D3.5	Apply appropriate procedures for care of fashion, textile, and apparel products

Next Level Programs of Study

Review Document

Domain	Design Skills
5380.D4.1	Describe relationships and applications of elements and principles of design in fashion, apparel, and textile design.
5380.D4.2	Identify the elements and principles of design in designing, constructing, and/or altering fashion, textile, and apparel products
5380.D4.3	Explain ways in which fibers, fabrics, textures, patterns, and finishes can affect visual appearance
5380.D4.4	Apply basic color theory to develop and enhance visual effects of fashion, textile, and apparel products
5380.D4.5	Explore designs and clothing styles considering individual, family, and community needs, and fashion, textile, and apparel trends
5380.D4.6	Describe social, religious, historical, political, economic, and technological influences on fashion, textile, and apparel design
Domain	Fashion, Textile, and Apparel Production
5380.D5.1	Demonstrate skills necessary for the production, alteration, and repair of fashion, textile, and apparel products.
5380.D5.2	Use appropriate industry products and materials for cleaning, pressing, and finishing fashion, textile, and apparel products
5380.D5.3	Demonstrate basic skills of pattern selection, alteration, and layout of fashion, textile, and apparel products
5380.D5.4	Demonstrate basic techniques for constructing, altering, and repairing fashion, textile, and apparel products
5380.D5.5	Select appropriate tools and equipment for specific applications in fashion, textile, and apparel construction, alteration, or repair
5380.D5.6	Demonstrate technical skills required of industry professionals in the use, inventory, and maintenance of equipment, tools, and supplies for fashion, textile, and apparel construction, alteration, or repair
5380.D5.7	Explore current trends and demonstrate use of available technology for fashion, textile, and apparel design and production
5380.D5.8	Demonstrate mathematical applications in constructing, altering, and repairing fashion, textile, and apparel products
Domain	Consumer Skills and Fashion Merchandising
5380.D6.1	Analyze factors that affect merchandising and selection of fashion, textile, and apparel products in the local and global community.
5380.D6.2	Use consumer skills to evaluate the quality of fashion, textile, and apparel products
5380.D6.3	Analyze factors that influence selection of fashion, textile, and apparel products
5380.D6.4	Compare and contrast criteria for maintaining standards of personal appearance and selecting attire appropriate for specific settings
5380.D6.5	Analyze costs of constructing, manufacturing, altering, or repairing fashion, textile, and apparel products

Next Level Programs of Study

Review Document

5380.D6.6	Explore textile legislation, standards, and labeling in the global economy
5380.D6.7	Analyze consumer and industry responsibilities regarding safety, security, ethical, and environmental factors in the textile and apparel industry
5380.D6.8	Explain the purposes of government rules and regulations in fashion, textile and apparel construction, alteration, or repair (e.g., Occupational Safety and Health Administration [OSHA], Consumer Product Safety Commission [CPSC])
5380.D6.9	Describe the impact of various factors, including societal trends, aesthetics, and availability of resources, on the fashion, textile, and apparel industry
5380.D6.10	Investigate the physical, psychological, and social functions of clothing influencing fashion, textile, and apparel merchandising
5380.D6.11	Apply merchandising and marketing strategies for fashion, textile, and apparel products
5380.D6.12	Practice various methods of fashion, textile, and apparel presentation using available information technology, presentation media, and other resources

Advanced Career & Technical Education, College Credit: Arts, AV Tech and Comm	
Career Cluster	Arts, AV Tech and Comm
Program of Study	
NLPS Sequence	
Course Code	6134
Course Description	<i>Advanced Career and Technical Education, College Credit is a course title covering any CTE advanced course offered for credit by an accredited post-secondary institution through an adjunct agreement with a secondary school. The intent of this course is to allow students to earn college credit for courses with content that goes beyond that currently approved for high school credit. This course may be used for any dual enrollment course, including a joint program of study involving a postsecondary partnership.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 semester course, up to 3 credits per semester, May be offered for successive semesters up to 12 credits
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	A student should earn at least 3 postsecondary credits for each high school credit. Schools must have an approved Nonstandard Course Waiver on file to be eligible for CTE Funding.

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Design Fundamentals
7140.D1.1	Define and apply design process theory.
7140.D1.2	Create compositions, artwork, illustrations, layouts, designs, etc. that demonstrate the effective use of the elements and principles of design.
7140.D1.3	Demonstrate creative and visual problem-solving skills through exercises and/or projects utilizing vector/raster-based graphics programs and/or other traditional processes.
7140.D1.4	Generate ideas, notes and thumbnails manually or digitally.
7140.D1.5	Create oral or written justification using appropriate design vocabulary.

Next Level Programs of Study

Review Document

7140.D1.6	Engage in critical peer evaluation.
Domain	Photography
7140.D2.1	Demonstrate an ability to operate a camera using manual controls.
7140.D2.2	Measure incidental and reflective light for a subject and determine the proper camera settings.
7140.D2.3	Demonstrate printing equipment to produce properly exposed and processed prints.
7140.D2.4	Learn and employ methods of image correction.
7140.D2.5	Produce photographs which demonstrate an ability to control focus in a variety of situations.
7140.D2.6	Demonstrate an understanding of depth of field.
7140.D2.7	Demonstrate an understanding of capturing and freezing motion.
7140.D2.8	Understand how to apply the theory of equivalent exposures and bracketing.
7140.D2.9	Demonstrate the effects of time of day on the qualities and direction of available light.
7140.D2.10	Demonstrate an understanding of photographic filters and how they work.
7140.D2.11	Demonstrate an understanding of photographic composition and design.
7140.D2.12	Produce photographs that exhibit conceptual thinking ability.

Digital Design Graphics	
Career Cluster	Arts, AV Tech, and Communications
Program of Study	Digital Design
NLPS Sequence	B
Course Code	7141
Course Description	<i>Digital Design Graphics will help students to understand and create the most common types of computer graphics used in visual communications. Skills are developed through work with professional vector-based and page layout software used in the industry. Additionally, students will be introduced to a full range of image input technology and manipulation including conventional photography, digital imaging, and computer scanners. Students will learn to communicate concepts and ideas through various imaging devices.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Digital Design

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Vector Graphics and Publication Design</i>
7141.D1.1	Navigate within the computer’s operating environment.
7141.D1.2	Demonstrate a working knowledge of the hardware components and peripherals.

Next Level Programs of Study

Review Document

7141.D1.3	Execute fundamental type formatting and editing.
7141.D1.4	Develop the critical basics of effective page layout software operation.
7141.D1.5	Utilize illustration tools to manipulate paths and anchor points.
7141.D1.6	Recognize graphic file formats and appropriate uses.
Domain	Raster Graphics
7141.D2.1	Operate image input devices.
7141.D2.2	Explain the physical properties of light and the basic laws of photographic optics (how light behaves).
7141.D2.3	Explain the differences between various graphic file formats, image resolution, and proper light levels.
7141.D2.4	Create images that use the principles/fundamentals of design.
7141.D2.5	Demonstrate the ability to solve communication design problems using imaging.
7141.D2.6	Develop hand/computer-imaging skills.
7141.D2.7	Apply the rules of effective typography using hand and/or computer skills.
7141.D2.8	Demonstrate a variety of imaging methods in application to class projects.
7141.D2.9	Be able to assess your work and others constructively and effectively.

Graphic Design and Layout	
Career Cluster	Arts, AV Tech, and Communications
Program of Study	Digital Design
NLPS Sequence	C
Course Code	5550
Course Description	<i>Graphic Design and Layout teaches design process and the proper and creative use of type as a means to develop effective communications for global, corporate and social application. Students will create samples for a portfolio, which may include elements or comprehensive projects in logo, stationery, posters, newspaper, magazine, billboard, and interface design.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Digital Design; Digital Design Graphics
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	Principles course is not required until 24-25 school year because this course is included in Perkins V pathways. Schools wishing to offer this course for multiple credits should utilize Next Level Programs of Study courses.

Competency #	Competency
Domain	Typography
5550.D1.1	Describe, appreciate, and apply the history and development of type and typefaces.
5550.D1.2	Describe and use typographic terminology.
5550.D1.3	Create various design projects/layouts that demonstrate the ability to solve communication design problems using typography.
5550.D1.4	Be aware of the design (typefaces, hand lettering, font creation) options available, and fully utilize the unique potential of the typography.
5550.D1.5	Develop an attention to detail to recognize typographic rules and aesthetics.
5550.D1.6	Evaluate your and peer work critically.
Domain	Graphic Design and Layout
5550.D2.1	Create portfolio quality projects by applying the design process.
5550.D2.2	Develop marketing concepts by completing creative briefs based on global, corporate, and social applications and target audience.
5550.D2.3	Visualize ideas by means of research, thumbnail sketches, and developmental drafts.
5550.D2.4	Identify print reproduction criteria necessary for various media.
5550.D2.5	Adhere to a production schedule to meet deadlines in an efficient and professional manner.
5550.D2.6	Present and provide feedback to peers, clients, faculty, or advisors.

Interactive Media Design	
Career Cluster	Arts, AV Tech and Comm
Program of Study	Digital Design
NLPS Sequence	C
Course Code	7138
Course Description	<i>Interactive Media Design focuses on the tools, strategies, and techniques for interactive design and emerging technologies, like web and social media. Students will learn the basics of planning, shooting, editing and post-producing video and sound. Additionally, students will explore the process of integrating text, graphics, audio and video for effective communication of information.</i>

	communication and visual appeal.
7246.D1.8	Evaluate your peer and professional work critically.
Domain	Production Editing I
7246.D2.1	Ingest digital footage into an editing system.
7246.D2.2	Explore various aspects for the editing process.
7246.D2.3	Understand and use appropriate editing styles.
7246.D2.4	Create and refine a rough cut.
7246.D2.5	Produce projects using a non-linear editing system.
7246.D2.6	Integrate audio and video within a project.
7246.D2.7	Synchronize multiple concurrent video angles taken from a multi-camera shoot.
7246.D2.8	Experiment with special effects, masking, and matting.
7246.D2.9	Produce projects of varying lengths and output mediums.
7246.D2.10	Edit projects down to a specific time frame.
7246.D2.11	Present orally a project to your peers, clients, faculty, or advisors
Domain	Motion Graphics
7246.D3.1	Develop advanced creative interfaces for use in multimedia projects.
7246.D3.2	Integrate the principles of good multimedia design with a strong focus on the aesthetic component including research, brainstorming, and storyboarding.
7246.D3.3	Synchronize animation and sound.
7246.D3.4	Incorporate various mediums, including sound, images, audio, etc.
7246.D3.5	Describe the different roles of a multimedia producer within the industry.
7246.D3.6	Analyze the use of multimedia as a marketing tool.
7246.D3.7	Appraise and integrate different content and software to achieve one product.
7246.D3.8	Use basic programming skills to add functionality to a project.
7246.D3.9	Implement usability and functionality testing processes.
Domain	3D Rendering and Animation
7246.D4.1	Apply the ability to employ available 3D rendering and animation software packages.
7246.D4.2	Construct and render 3D models and textures for use in static and dynamic simulated environments.
7246.D4.3	Utilize constructed environments and models in various animations techniques.
7246.D4.4	Explain the history of computer animation.
7246.D4.5	Evaluate the possibilities of computer animation and how it is utilized in a variety of industries today.
Domain	Web Design
7246.D5.1	Explain Information Architecture (IA) how interactive media design affects user experience (UX), and how that translates to a successful user interface (UI).
7246.D5.2	Describe and apply effective interactive media design processes—including research, web project definition, organization, structure, process, and interaction.

Next Level Programs of Study

Review Document

7246.D5.3	Identify and apply effective design solutions based on content.
7246.D5.4	Discuss the importance of proper research, brainstorming and thumbnails, and wireframing.
7246.D5.5	Evaluate the aesthetics of interactive design pertaining to emerging trends.
7246.D5.6	Discuss the history of interactive design and the relationship they have with interactive design today
7246.D5.7	Discuss design principles (color, layout, typography) as they apply to interactive design.
7246.D5.8	Construct web pages using standards- compliant HTML5 and CSS3 that successfully passes validation tests of theW3C.
7246.D5.9	Discuss the use of helper technologies such as CSS frameworks, and when and why to use them.
7246.D5.10	Implement a simple JavaScript plugin to add dynamics to a website. W311. Create a final static website meeting the needs of a client.

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Fundamentals of Apparel*</i>
7301.D1.1	Identify, apply, and demonstrate skills for operating domestic sewing machines and overlock machines for beginning fashion design production.
7301.D1.2	Develop and demonstrate basic sewing techniques using commercial pattern standards and constructing garments from commercial patterns.
7301.D1.3	Evaluate and select appropriate sewing tools, pressing tools, and notions for fashion industry production.
7301.D1.4	Apply knowledge of appropriate woven fabric selection to construct beginning fashion products.
7301.D1.5	Gain knowledge of body and pattern measurements and the use of them in the selection process for garment fit and construction.
7301.D1.6	Demonstrate the ability to master and apply basic sewing skills and production principles.
Domain	<i>Dimensions of Clothing</i>
7301.D2.1	Students analyze dress and adornment emphasizing dimensions that affect the design and end uses of textiles and clothing.
7301.D2.2	Explain the relationship between the sociological environment and the development of patterns of dress and adornment
7301.D2.3	Analyze the importance of clothing in the context of its cultural, social, and psychological implications
7301.D2.4	Explain the relationship between clothing and self
7301.D2.5	Recognize design elements and principles
7301.D2.6	Explain the utilitarian role of clothing and its relationship to fashion
Domain	<i>Textile and Apparel Industry Core</i>
7301.D3.1	Students evaluate the textile and apparel industry processes leading to product development.
7301.D3.2	Examine the manufacturing processes for today's clothing.

Next Level Programs of Study

Review Document

7301.D3.3	Describe purposes of and techniques for assessing textile products and construction.
7301.D3.4	Examine forecasting and trending in the textile and apparel industry.
7301.D3.5	Investigate fashion designers and the steps in the design process
7301.D3.6	Evaluate and apply clothing construction methods.

Competency #	Competency
Domain	Customer Relations Core
7302.D1.1	Students will analyze customer service procedures and results.
7302.D1.2	Evaluate the components of quality customer service.
7302.D1.3	Analyze factors that contribute to quality customer relations.
7302.D1.4	Analyze the influences of cultural diversity as a factor in customer relations.
7302.D1.5	Demonstrate the skills necessary for quality customer service.
7302.D1.6	Create solutions to address customer concerns
7302.D1.7	Understand how customer feedback and trends guide fashion.
Domain	Fashion Merchandising
7302.D2.1	Students will examine key components of fashion merchandising.
7302.D2.2	Demonstrate general operational procedures required for business profitability and career success.
7302.D2.3	Apply the retail merchandising techniques, principles and procedures employed in the buying and merchandising of fashion goods
7302.D2.4	Examine ways the fashion industry is impacted by economic principles.
7302.D2.5	Analyze the impact of social media on fashion merchandising and marketing.
Domain	Textile, Apparel and Merchandising
7302.D3.1	Describe the changing nature and principles that govern fashion including social, economic, and psychological elements
7302.D3.2	Distinguish between the various types of designers, product developers, and marketing strategies related to fashion fibers, fabrics, and apparels.
7302.D3.3	Explain the varying roles in textile and apparel industry
7302.D3.4	Interpret the interrelationships between designers, fiber, fabric and apparel manufacturers, retailers, and customers.
7302.D3.5	Explain the auxiliary fashion enterprise services.
7302.D3.6	Identify trade periodicals and other media sources relevant to the apparel industry
7302.D3.7	Identify past, present and potential future practices, and trends
7302.D3.8	Identify career paths and opportunities in the fashion industry.
7302.D3.9	Create oral and visual presentations, utilizing professional presentation techniques

Competency #	Competency
Domain	Textiles
7303.D1.1	Analyze the physical and chemical structure of fibers as a basis for determining the performance characteristics of textile products used by consumers.
7303.D1.2	Identify and evaluate characteristics of the major generic classifications of fibers that relate to the aesthetics, durability, comfort, and care of textile products as they relate to consumer use.
7303.D1.3	Identify and assess the value of legislation relating to the labeling of textile products as it impacts the consumer.
7303.D1.4	Identify and evaluate types and characteristics of yarns and evaluate their effect on the appearance, performance, and care of textile products.
7303.D1.5	Identify and evaluate fabric construction methods and evaluate their appearance and performance in textile products.
7303.D1.6	Identify and evaluate methods of coloring textiles and evaluate their use in textile products.
7303.D1.7	Identify and evaluate basic, surface, functional finishes in relation to the end use of textiles products as they impact consumer use.
7303.D1.8	Identify textile categories and fiber through visual inspection, burning tests, and microscopic examination.
7303.D1.9	Analyze textiles to identify fiber length, yarn characteristics, fabric construction, coloring processes, and finishing processes.
Domain	Fashion Design
7303.D2.1	Students will analyze design elements in the applied setting.
7303.D2.2	Explain the relationship between the culture, environment, location, and available resources on fashion design
7303.D2.3	Analyze examples of fashion and the use of design elements and principles
7303.D2.4	Demonstrate elements and principles of fashion design
7303.D2.5	Evaluate the business of fashion designers
7303.D2.6	Compare and contrast haute couture, runway fashion, and ready-to-wear
Domain	Manufacturing and Distribution
7303.D3.1	Students will evaluate the manufacturing process and distribution of goods.
7303.D3.2	Examine the manufacturing processes for production of fabrics, textiles, and garments
7303.D3.3	Assess textile products and construction of goods
7303.D3.4	Compare and contrast global manufacturing processes and costs
7303.D3.5	Investigate distribution systems
7303.D3.6	Evaluate garment cost based on manufacturing and distribution processes
Domain	Fashion Promotion
7303.D4.1	Students will explain the use of fashion promotion in the fashion industry.
7303.D4.2	Examine the areas of the fashion business and explain their interrelationships
7303.D4.3	Analyze factors that contribute to quality customer relations

Next Level Programs of Study

Review Document

7303.D4.4	Demonstrate the principles, dynamics and nature of fashion and consumer fashion demand
7303.D4.5	Utilize correct fashion terminology for the written and oral communication of fashion ideas and information
7303.D4.6	Apply the retail merchandising techniques, principles and procedures employed in the buying and merchandising of fashion goods
7303.D4.7	Evaluate promotional strategies
7303.D4.8	Analyze operational costs such as mark ups, mark downs, cash flow, POS (point of sale), and other factors affecting profit
Domain	Research and Sustainability
7303.D5.1	Students will examine current research and sustainability practices and trends.
7303.D5.2	Summarize current research trends in the fashion industry
7303.D5.3	Apply appropriate research methodologies in investigating the textile, apparel, and fashion industry
7303.D5.4	Examine ways the fashion industry is impacted by research in the fibers, yarns, fabrics, and finishes industries
7303.D5.5	Analyze the impact of sustainability practices on the fashion industry

Fashion and Textiles Capstone	
Career Cluster	Arts, AV Tech, and Communications
Program of Study	Fashion & Textile
NLPS Sequence	D
Course Code	7304
Course Description	<i>Fashion Textile Capstone studies the evolution of Western dress from ancient times to the twentieth century. Emphasis on representative style and change over time. Additionally, this course will focus on the Identification of physical features which affect apparel quality. Analysis of ready-to-wear apparel to identify features which produce desirable aesthetic and functional performance is also covered.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Fashion and Textiles; Textiles, Apparel, and Merchandising; Advanced Textiles
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas
Dual Credit Status

Competency #	Competency
Domain	<i>Evolution of Costume</i>
7304.D1.1	Identify the distinguishing characteristics of a piece of apparel or silhouette
7304.D1.2	Identify by name, items of dress or aspects of appearance
7304.D1.3	Associate distinguishing features of apparel and appearance with a particular period or style name
7304.D1.4	Recognize a style or period by vocabulary, description, slide, line drawing, etc.
7304.D1.5	Describe the evolution of costume for men and women for a given period
7304.D1.6	Identify the first appearance of a particular aspect of dress
7304.D1.7	Identify elements, styles, or influences in current fashion that represent revivals or interpretations of the past
7304.D1.8	Analyze and interpret the change in apparel as it relates to change in culture over time
Domain	<i>Career Exploration and Experience</i>
7304.D2.1	Students will apply career skills to the fashion industry.
7304.D2.2	Create the materials needed for development of portfolio/resume/etc. to successfully acquire a job in the fashion industry.
7304.D2.3	Implement customer service practices in the real-world setting
7304.D2.4	Analyze the effects of security and inventory control strategies, cash and credit transaction

Next Level Programs of Study

Competency #	Competency
Domain	<i>Interior Design Fundamentals</i>
7132.D1.1	Develop and demonstrate a working design vocabulary.
7132.D1.2	Define and apply design process theory.
7132.D1.3	Communicate specific design concepts.
7132.D1.4	Recognize and employ the elements and principles of design.
7132.D1.5	Recognize and employ color theory and color perception.
7132.D1.6	Demonstrate creative and visual problem-solving skills through exercises and/or projects utilizing vector/raster-based graphics programs and/or other traditional processes.
7132.D1.7	Generate ideas notes and thumbnails manually.
7132.D1.8	Review and discuss the historical foundation of design in art.
7132.D1.9	Engage in critical peer evaluation.
Domain	<i>Design Fundamentals for Space</i>
7132.D2.1	Utilize the principles of color mixing, color properties, schemes, and harmonies.
7132.D2.2	Integrate color psychology into environmental applications.
7132.D2.3	Identify, describe, and apply the design elements.

Next Level Programs of Study

Review Document

7132.D2.4	Identify, describe, and apply the design principles.
7132.D2.5	Create 3-D models analyzing space, form, pattern, light and shadow.
7132.D2.6	Utilize spatial organization techniques when creating designs.
7132.D2.7	Demonstrate an understanding of human behavior and how space can impact and influence the users.
7132.D2.8	Present design solutions through preparation models and oral justification.
7132.D2.9	Evaluate compositions using critical thought processes.

Interior Design Fundamentals	
Career Cluster	Arts, AV Tech, and Communications
Program of Study	Interior Design
NLPS Sequence	B
Course Code	7127
Course Description	<i>Interior Design Fundamentals provides students with an overview of the field of interior (environmental) design, including an understanding of fundamental construction knowledge and skills needed in the field. Exercises include small scale space analysis and functional planning based on user needs, furniture arrangement and selection, materials and finishes considerations and presentation techniques. Students will also learn basics regarding building practices, building structures, residential construction techniques, building materials and plan reading. Includes building codes, sustainable design practices, and the preparation of site and construction plans, elevations, sections, three-dimensional drawings details and hand renderings as they relate to construction and presentation drawings.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Interior Design
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)

Competency #	Competency
Domain	<i>Interior Design</i>
7127.D1.1	Coordinate the elements and principles of design into a harmonious space.
7127.D1.2	Demonstrate basic client interviewing skills.
7127.D1.3	Demonstrate a competency of furniture and fixture selection and arrangement through projects involving living areas, kitchens and support space, bedrooms, and bathrooms.
7127.D1.4	Develop project solutions with concern for function, lifestyle, sustainability, and aesthetics.
7127.D1.5	Utilize appropriate space allowances with concern for proxemics and human factors.
7127.D1.6	Demonstrate basic drafting skills.
7127.D1.7	Prepare client presentation: a. Select materials. b. Layout and compose presentation c. Use appropriate equipment and mounting materials d. Include color rendering of floor plan utilizing various media
7127.D1.8	Prepare an oral presentation to include a. Appropriate use of interior design vocabulary b. Justification of design solution

Next Level Programs of Study

Review Document

Domain	Design and Construction
7127.D2.1	Demonstrate accurate reading of construction documents and understanding of drawing sequencing.
7127.D2.2	Identify basic architectural styles.
7127.D2.3	Illustrate proficiency in basic drafting skills: architectural lettering, use of scale, architectural symbols, legends, and labeling.
7127.D2.4	Apply technical drafting skills using exercises to create construction documents including dimensioned floor plans, accurate line weights and lettering, foundation and framing plans, interior and exterior elevations, working section detail drawings, cross sections, and floor and window schedules.
7127.D2.5	Formulate building and structural solutions based on considerations such as sustainable strategies, orientation and climate, economics and building codes.
7127.D2.6	Create representational drawings illustrating contour, shade, and shadow techniques, and rendered floor plans, site plans, elevations and pictorial drawings, using appropriate drafting techniques.
7127.D2.7	Critique construction documents to include appropriate use of structural/architectural nomenclature.

Materials, Finishes, and Design	
Career Cluster	Arts, AV Tech, and Communications
Program of Study	Interior Design
NLPS Sequence	C
Course Code	7128
Course Description	<i>Materials, Finishes, and Design examines the physical properties and characteristics of furniture, materials, finishes, and architectural detailing. The course includes an intensive study of textiles, including fiber sources, identification and classification to finish and sustainable qualities. Students will apply textile knowledge to interior textile fabrications including window treatments, upholstery, carpet and wall coverings. Content addresses environmental issues and problems in specifying, estimating, and installing these materials.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Interior Design; Interior Design Fundamentals
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	<i>Textile for Interiors</i>
7128.D1.1	Use correct textile vocabulary & terminology
7128.D1.2	Identify and describe the characteristics of textiles, including fiber names, yarn types, construction methods, finishing, dyeing, and printing techniques
7128.D1.3	Interpret fabric care and labeling information
7128.D1.4	Identify the legal, sustainability, and environmental issues related to textile production

Next Level Programs of Study

Review Document

7128.D1.5	Select appropriate textiles based on code requirements, test results, environmental impact, end use suitability and consumer satisfaction
7128.D1.6	Calculate the appropriate yardage needed for window treatments
Domain	Materials and Finishes
7128.D2.1	Research and find information sources for varying project considerations.
7128.D2.2	Identify appropriate materials selection for a variety of client needs.
7128.D2.3	Recognize the installation requirements of various materials.
7128.D2.4	Utilize proper finish selections based on accurate knowledge of product properties, use, specification liabilities, building codes and fire safety criteria.
7128.D2.5	Accurately specify, measure, cost, order and oversee installation of various materials.
7128.D2.6	Specify appropriate interior components such as moldings, doors, hardware, fireplaces, and architectural details.
7128.D2.7	Specify appropriate ceiling treatments, window coverings, floor coverings, wall coverings, upholstery, and a variety of building materials and finishes.
7128.D2.8	Measure and figure quantities and pricing for window treatments, wall coverings, floor coverings, and upholstery.
7128.D2.9	Coordinate guidelines for contract documents and specifications.
7128.D2.10	Demonstrate an understanding of how to use the sweets catalogs.
7128.D2.11	Understanding of cabinet construction including joinery, materials of construction, hardware, etc.
7128.D2.12	Write accurate specifications for architectural detailing including commercial floor and wall systems, interior finishes, doors, windows, trim and moldings, hardware, and custom case goods.
7128.D2.13	Prepare contract documents to include typed finish schedules, control sheets or purchase requisitions; Floor plans keyed to schedule.
7128.D2.14	Prepare work orders to communicate to the craftsperson the fabrication concept and pricing.
7128.D2.15	Prepare an oral presentation for project critique to include appropriate use of interior finishes vocabulary; justification of design solution.

Interior Design Capstone	
Career Cluster	Arts, AV Tech, and Communications
Program of Study	Interior Design
NLPS Sequence	D
Course Code	7248
Course Description	<i>The Interior Design Capstone course is designed to provide students a chance to extend their knowledge and skills through additional course work and a work-based learning experience.</i>
Prerequisite(s)/	Principles of Interior Design; Interior Design Fundamentals; Materials, Finishes, and Design

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Environmental Design and Space Planning</i>
7248.D1.1	Demonstrate understanding of space planning through: Accurate furniture and equipment arrangements to facilitate specific tasks, social gatherings, conferring, etc.; Appropriate furnishings based upon global human factors and ergonomics; Provisions for adequate traffic allowances.
7248.D1.2	Apply universal design principles.
7248.D1.3	Prepare a pre-design program including interview questionnaires or information sheets utilized to obtain research data.
7248.D1.4	Prepare an appropriate and accurate written design concept for a variety of design projects.
7248.D1.5	Prepare an oral presentation for class critique to include appropriate use of environmental vocabulary; justification of design solutions; awareness of sustainable design practices and materials.
Domain	<i>Basic CAD for Environmental Designers</i>
7248.D2.1	Identify CAD hardware and software.
7248.D2.2	Review the basic commands for file handling, formatting, and editing.
7248.D2.3	Demonstrate the ability to use the main drawing and editing commands to create architectural working drawings.
7248.D2.4	Demonstrate ability to create site plans, floor plans, elevations, sections, and detail drawings with the following layers: Furniture, fixtures, and equipment layout; Reflected ceiling/lighting plan; Electrical, plumbing, and HVAC plans; Dimensioning and labeling.
7248.D2.5	Demonstrate proper layer management utilizing paper space to create a set of complete drawings.
7248.D2.6	Establish text styles and dimension styles.
7248.D2.7	Utilize manufacturer's reference/block libraries and demonstrate their use in architectural exterior and interior drawings: Create a library of furniture/elements; Create symbols to be used in a symbol's library.
7248.D3.1	Prepare a portfolio of work related to interior design concepts

Domain	<i>Introduction to Audio/Video Production</i>
7139.D1.1	Students will be introduced to hardware and software used in the audio and video industry.
7139.D1.2	Students will be able to identify, and become familiarized with, hardware and software used in the audio and video industry.
7139.D1.3	Students will demonstrate how the hardware and software operates.
7139.D1.4	Students will gain knowledge in the theory of mass media (print, radio, television, digital) and its uses in modern society.
7139.D1.5	Students will gain an appreciation of the industry as well as have a deeper understanding of careers in modern society.
Domain	<i>Additional</i>
7139.D2.1	Demonstrate general safety rules for equipment operation and lab
7139.D2.2	Perform safe practices when operating equipment
7139.D2.3	Demonstrate proper equipment storage for safe transportation
7139.D2.4	Determine proper cables for set-up and operation of production equipment
7139.D2.5	Use standard safety practices for all classroom laboratory and field investigations

Next Level Programs of Study

Review Document

7139.D2.6	Identify and describe stages of the scripting process
7139.D2.7	Construct scripts using established formats
7139.D2.8	Define terminology used in broadcast scriptwriting
7139.D2.9	Apply concepts of stages of production
7139.D2.10	Explain the history and development of the audio and video industry and its impact on today's media
7139.D2.11	Explain how audible messages are converted into signals for transmission of information and data
7139.D2.12	Explain camera functions and how electrical signals are converted into images on a screen

Audio and Video Production Essentials	
Career Cluster	Arts, AV Tech, and Communications
Program of Study	Radio & TV
NLPS Sequence	B
Course Code	7306
Course Description	<i>Audio and Video Production Essentials provides an in-depth study on audio and video production techniques for radio, television, and digital technologies. Students will learn skills necessary for audio production and on-air work used in radio and other digital formats. Additionally, experience will be gained in the development of the video production process; including skills in message development, directing, camera, video switcher, and character generator operations.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Broadcasting
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	
ADDITIONAL COURSE INFO	
Funding	Less than Moderate Value Level I

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Audio Production
7306.D1.1	Gain knowledge on microphone types, construction, and their usages
7306.D1.2	Understand audio recording/editing equipment and its purpose
7306.D1.3	Knowledge of Scripting Formats for audio production
7306.D1.4	Knowledge of audio editing software for industry standards
7306.D1.5	Demonstrate knowledge of Television Production process and component of the Television production team
Domain	TV Production I
7306.D2.1	Knowledge of Camera Framing and Composition
7306.D2.2	Knowledge of Scripting Formats for video production
7306.D2.3	Television Studio and Field Operations

Next Level Programs of Study

Review Document

7306.D2.4	Demonstrate different editing methods, equipment, and techniques in the production of a story
7306.D2.5	Demonstrate the use of a computer in broadcast/video production applications
7306.D2.6	Demonstrate basic lighting techniques
7306.D2.7	Design video projects incorporating professional video principles
7306.D2.8	Demonstrate proper use of audio equipment to record quality audio track
7306.D2.9	Design audio projects incorporating professional audio principles
7306.D2.10	Demonstrate proper use and operation of studio equipment and production techniques while working as part of a production team
7306.D2.11	Identify elements of set design and aesthetics
7306.D2.12	Reinforce professionalism in verbal, nonverbal, and written communication.
7306.D2.13	Introduce and incorporate ethics and media literacy

Mass Media Production	
Career Cluster	Arts, AV Tech, and Communications
Program of Study	Radio & TV
NLPS Sequence	C
Course Code	7307
Course Description	<i>Mass Media Production will focus on the study of theory and practice in the voice and visual aspects of radio and television performance. In addition, this course introduces the skills used to acquire and deliver news stories in a digital media format. Students will learn how to research issues and events, interview news sources, interact with law enforcement and government officials, along with learning to write in a comprehensive news style.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Broadcasting; Audio and Video Production Essentials
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas
Dual Credit Status	X (PCL/CTE)

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Media Performance
7307.D1.1	Understand the role and responsibilities of the announcer/newscaster in broadcast, cable, and film media
7307.D1.2	Understand the specialized skills and requirements needed for a career in announcing
7307.D1.3	Analyze broadcast copy for key points, meaning, and emphasis
7307.D1.4	Demonstrate a working knowledge of the physiology of speech, voice technique and proper pronunciation
7307.D1.5	Demonstrate the ability to announce for radio, audio recording, and voice-over work according to accepted professional standards
7307.D1.6	Demonstrate the ability to announce on camera for television, with an emphasis placed on news delivery.
Domain	News Gathering & Storytelling
7307.D2.1	Demonstrate an understanding of how to research news stories

Next Level Programs of Study

Review Document

7307.D2.2	Develop skills to write short and long-form broadcast style news stories
7307.D2.3	Acquire basic understanding of software used in a newsroom
7307.D2.4	Develop an understanding of how a newsroom operates
7307.D2.5	Acquire experience in interviewing subjects for news stories
7307.D2.6	Demonstrate the ability to create news stories using video and audio
7307.D2.7	Demonstrate the ability to meet news deadlines
7307.D2.8	Demonstrate proper use and operation of studio equipment and production techniques while working as part of a production team
7307.D2.9	Demonstrate proficiency in on-air performance
7307.D2.10	Apply and adapt programming elements using audience analysis
7307.D2.11	Students integrate concepts of programming
7307.D2.12	Demonstrate practices of delivery or performance while on-air
7307.D2.13	Recommend technically acceptable visual components for on-air talent
7307.D2.14	Use different internet platforms to tell stories and produce content

Radio & TV Broadcasting Capstone	
Career Cluster	Arts, AV Tech, and Communications
Program of Study	Radio & TV
NLPS Sequence	D
Course Code	7308
Course Description	<i>This course will cover a variety of domains further building on skills in video production, and broadcast industry practices specific to radio, television, and digital media. Attention will be given to cross-industry synergies, emerging technologies, and the global market for media. Students are highly encouraged to do a video newscast or radio practicum to gain real world experience. In most cases this practicum may be completed through a school-based enterprise.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Broadcasting; Audio and Video Production Essentials; Mass Media Production
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes

CONTENT STANDARDS AND COMPETENCIES

Competency	Competency
Domain	Mass Communications
7308.D1.1	Define the concept of media literacy
7308.D1.2	Define the concept of media convergence
7308.D1.3	Interpret the historical significance of traditional mass mediums
7308.D1.4	Analyze how traditionally separate forms of mass media interact in a modern, interconnected, diverse society
7308.D1.5	Apply ethical thinking to critical issues in mass media
Domain	TV Production II - Field Production

Next Level Programs of Study

Review Document

7308.D2.1	Demonstrate the proper set up and use professional field video production equipment including, camera, tripod, microphones, cables, and lighting
7308.D2.2	Understand the different roles of a production crew in field production
7308.D2.3	Edit digital media for field production
7308.D2.4	Understand media formats and digital process used in the production of media
Domain	Lighting Principles
7308.D3.1	Identify the components needed for basic lighting
7308.D3.2	Construct a lighting design for a basic interview
7308.D3.3	Construct a lighting design that conveys a specific mood
Domain	Set Design Principles
7308.D4.1	Identify elements of set design and aesthetics
7308.D4.2	Apply design principles to a field location taping
7308.D4.3	Apply design principles to a specified studio taping
Domain	Storytelling
7308.D5.1	Recognize and explain storytelling elements as presented in video and film
7308.D5.2	Formulate script ideas utilizing storytelling principles
7308.D5.3	Evaluate effectiveness of storytelling
Domain	Law and Ethics
7308.D6.1	Identify and evaluate communication law issues
7308.D6.2	Apply communication law to broadcasts and projects
Domain	Career Opportunities and Employment Skills
7308.D7.1	Identify careers available in digital communications and the entertainment media
7308.D7.2	Investigate careers available by conducting job searches in digital communications and the entertainment media
7308.D7.3	Construct a professional resume
7308.D7.4	Produce a professional portfolio that demonstrates abilities
7308.D7.5	Recognize and apply industry standard terminology
7308.D7.6	Recognize the organizational structure of the industry
7308.D7.7	Recognize and demonstrate preparation for and performance in professional interviews

Technical/Business Communication	
Career Cluster	Business Management, Marketing and Finance
Program of Study	
NLPS Sequence	Introductory
Course Code	4508
Course Description	<i>Technical/Business Communications provides students with the communication and problem-solving skills to function effectively in the workplace. Areas studied include written/oral/visual communication, listening, informational reading, Internet research/analysis, and electronic communication. Concepts addressed will included adapting communication to the situation, purpose, and audience. Students produce related documents such as employee handbooks, instructional manuals, employment communication, organizational communication, business reports, and social/professional situations using word processing, presentation, multimedia, and desktop publishing software.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)

Four Yr. Course Alignment	
Postsecondary Credential	
Liberal Arts/Sciences Requirements	
Promoted Certifications	
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Introduction
4508.D1.1	Students understand the nature of oral, visual, and written communication in the workplace.
4508.D1.2	Identify Who, What, why, and How in Technical/Business Communication
4508.D1.3	Understand the importance of technical/business communication in the workplace
4508.D1.4	Introduce concepts of situation, purpose, and audience
4508.D1.5	Understand that workplace communication is always situational (that it always has a reason or is a response) and is always part of a complex communication network
4508.D1.6	Recognize that technical/business documents include but are not limited to proposals, technical articles, abstracts, reports, letters, memos, e-mail, manuals, outlines, flyers
Domain	Gathering and Assessing Information/Resources
4508.D2.1	Students locate, assess, and use information from a variety of print and online sources.
4508.D2.2	Locate print and online information to aid in decision making and strengthening arguments
4508.D2.3	Determine authority and validity of sources/resources
4508.D2.4	Understand how statistics can be interpreted and manipulated
4508.D2.5	Identify and assess common logical fallacies, such as over-generalization and distorted data
4508.D2.6	Understand ethical issues involved in gathering, displaying, and interpreting data
4508.D2.7	Identify content and design errors in visual displays of data such as tables, graphs, and charts
4508.D2.8	Use research strategies to confirm accuracy of information in technical/business communication
Domain	Informational Reading
4508.D3.1	Students read and analyze content, interpretation, and inference.
4508.D3.2	Identify and analyze the situation, purpose, and audience when reading print and online material
4508.D3.3	Apply reading skills to gather information from print and online material
4508.D3.4	Analyze the integrity of printed and online material
4508.D3.5	Use context clues to recognize word meaning
4508.D3.6	Select appropriate reading method for a particular situation (e.g., skimming, scanning, speed reading, and in-depth reading)

Next Level Programs of Study

Review Document

4508.D3.7	Distinguish between literal and inferential statements
4508.D3.8	Discuss print and online persuasive information and its impact on decision making
4508.D3.9	Interpret technical/business correspondence, professional articles, and supporting graphic materials
4508.D3.10	Interpret and use information from manuals, computer printouts, and electronic sources
4508.D3.11	Explain career-specific terminology
4508.D3.12	Analyze and synthesize information from print and electronic sources to create a group project or product
Domain	Written Communication
4508.D4.1	Students plan and write documents that are appropriate for the situation, purpose, and audience.
4508.D4.2	Analyze the situation, purpose, and audience to guide the planning, writing, and revising of written material
4508.D4.3	Develop and use a writing process appropriate to the situation
4508.D4.4	Design letters, memos, and reports that conform to workplace standards and conventions
4508.D4.5	Demonstrate and understand effective layout, design, and typography
4508.D4.6	Create technical/business documents and presentations that are informational, persuasive, and analytical
4508.D4.7	Avoid biased language (e.g., sex, gender, race, etc.)
4508.D4.8	Revise and edit documents to improve content and effectiveness
4508.D4.9	Prepare industry-specific technical reports that incorporate graphic aids
4508.D4.10	Analyze and respond to complex business case studies
4508.D4.11	Research, analyze, and prepare collaboratively a written response to a complex business project
Domain	Oral Communication
4508.D5.1	Students communicate in a clear, courteous, concise, and appropriate manner.
4508.D5.2	Analyze the situation, purpose, and audience to guide the planning and presentation of oral communication
4508.D5.3	Select language, visuals, and method of delivery appropriate to the situation
4508.D5.4	Use proper telephone techniques and etiquette
4508.D5.5	Ask questions with confidence to elicit general and specific information
4508.D5.6	Respond to questions directly and appropriately
4508.D5.7	Organize thoughts to reflect logical thinking before speaking
4508.D5.8	Identify regional and cultural differences in spoken communication; use oral language that is comprehensible to the audience
4508.D5.9	Plan and present short presentations individually and as a member of a group
4508.D5.10	Interact effectively with people from varying international, cultural, ethnic, and racial backgrounds
4508.D5.11	Function as a team member to identify and solve several problems inherent in a capstone

Next Level Programs of Study

Review Document

	project
4508.D5.12	Present findings of capstone projects in a formal presentation using appropriate graphics, media, and support materials
4508.D5.13	Deliver impromptu and planned speeches with confidence
4508.D5.14	Advocate a specific cause
4508.D5.15	Serve effectively as an interviewer or interviewee in public relations, civic, media, and community situations
Domain	Listening
4508.D6.1	Students listen discriminately and respond appropriately to oral communication.
4508.D6.2	Analyze the situation, purpose, and audience of an oral message
4508.D6.3	Listen discriminately to separate verifiable information from opinion
4508.D6.4	Critique media and oral presentations analytically and critically
4508.D6.5	Assess and respond to a speaker's nonverbal messages
4508.D6.6	Identify and overcome major barriers to enhance active listening
4508.D6.7	Direct courteous attention to multiple speakers within a group to obtain key facts
Domain	Communication Through Technology
4508.D7.1	Students enhance the effectiveness of communication using technology.
4508.D7.2	Analyze the situation, purpose, and audience when using technology to communicate
4508.D7.3	Operate electronic message technologies to include facsimile machines, voice mail, conference calls, pagers, and e-mail
4508.D7.4	Use computer networks (e.g., communicating computers, Internet, or on-line databases) to facilitate collaborative or individual learning and communicating
4508.D7.5	Discuss the use of the following communicating systems: WATS lines, LAN system, cellular technology, and voice recognition dictation
4508.D7.6	Enhance documents using advanced layout, design, and graphics production software and scanning hardware
4508.D7.7	Address the ethical issues regarding intellectual property and dissemination of information generated electronically
4508.D7.8	Apply the rules of electronic messaging etiquette
4508.D7.9	Evaluate and select messages that may be addressed best by electronic media
4508.D7.10	Incorporate the use of international electronic resources such as Internet in complex projects
Domain	Employment Communication
4508.D8.1	Students integrate communication in the pursuit of employability.
4508.D8.2	Research the job market and specific potential employers using personal and electronic networks
4508.D8.3	Write a formal application letter, print and scannable versions of a resume, and a follow-up (thank you) letter for job opportunities
4508.D8.4	Develop an employment portfolio

Next Level Programs of Study

Review Document

4508.D8.5	Demonstrate proper business and dining etiquette
4508.D8.6	Complete employment application forms
4508.D8.7	Demonstrate appropriate interviewing techniques (dress, questions, etc.)
4508.D8.8	Understand employer expectations (punctuality, dependability, willingness to learn, cooperation, etc.)
4508.D8.9	Identify employee expectations (health and safety, evaluations, fairness, pay, benefits, rights, labor/management relations, etc.)

Business Math (Applied Business Math)	
Career Cluster	Business Management, Marketing and Finance
Program of Study	
NLPS Sequence	Introductory
Course Code	4512
Course Description	<i>Business Math is a course designed to prepare students for roles as entrepreneurs, producers, and business leaders by developing abilities and skills that are part of any business environment. A solid understanding of math including algebra, basic geometry, statistics, and probability provides the necessary foundation for students interested in careers in business and skilled trade areas. The content includes mathematical operations related to accounting, banking and finance, marketing, and management. Instructional strategies should include simulations, guest speakers, tours, Internet research, and business experiences.</i>
Prerequisite(s)/ Corequisite(s)	Algebra I
Credits	1 to 2 semester course, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as an elective or directed elective for all diplomas Fulfills a Mathematics requirement for the General Diploma or Certificate of Completion only Counts as a quantitative reasoning course
Dual Credit Status	
Additional Notes	May be offered as an applied course.
ADDITIONAL COURSE INFO	
Funding

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Math Concepts
4512.D1.1	Students demonstrate the knowledge and skills necessary to determine the correct algebraic process to solve problems for a variety of business situations.
4512.D1.2	Reinforce basic math skills, such as but not limited to percents, decimals, and fractions, and algebraic skills of solving equations with one or two variables
4512.D1.3	Select and use appropriate formulas to solve problems
4512.D1.4	Construct and solve an equation for a given problem using units
4512.D1.5	Determine if a solution to an algebraic computation is reasonable
4512.D1.6	Use algebraic graphs in real world situations
4512.D1.7	Apply complex functions to business financials
4512.D1.8	Students apply geometry principles to solve problems for a variety of business situations.
4512.D1.9	Demonstrate ability to take measurements and convert as needed
4512.D1.10	Use formulas and geometric reasoning necessary for area, perimeter, circumference, diameter, and volume

Next Level Programs of Study

Review Document

4512.D1.11	Determine if a solution to a geometry computation is reasonable
4512.D1.12	Students analyze and interpret data using common probability and statistical procedures to solve problems for a variety of business situations.
4512.D1.13	Construct, read, and interpret tables, charts, and graphs
4512.D1.14	Use probability concepts to predict events
4512.D1.15	Construct and interpret frequency distribution
4512.D1.16	Calculate measures of range and central tendency (e.g., mean, median, mode)
4512.D1.17	Determine if a solution to probability and statistical computation is reasonable
Domain	Accounting Principles
4512.D2.1	Students apply math concepts to analyze and solve problems related to accounting principles for business.
4512.D2.2	Calculate equity using the accounting equation
4512.D2.3	Calculate and plan for taxes including sales, income, and property
4512.D2.4	Calculate cost of goods sold, gross profit, operating expenses, and net profit
4512.D2.5	Determine cost of goods sold using different inventory valuation methods (e.g., LIFO, FIFO)
4512.D2.6	Calculate manufacturing costs and break-even point
4512.D2.7	Calculate and plan for a variety of expenses
4512.D2.8	Calculate company or department overhead based on various situations (e.g., sales or floor space)
4512.D2.9	Calculate depreciation of assets using various methods (e.g., declining-balance method, sum-of-the-years method)
4512.D2.10	Compare the costs of renting, leasing, or buying plant or current assets
4512.D2.11	Students apply math concepts to analyze and solve problems related to payroll for business.
4512.D2.12	Calculate and maintain employee payroll records
4512.D2.13	Calculate employee and employer taxes and prepare related reports
4512.D2.14	Calculate fringe benefits and analyze their effect on the total wage package
4512.D2.15	Analyze costs of recruiting, placing, and training employees
Domain	Banking and Financial Services
4512.D3.1	Maintain checking account records (e.g., checks, check register, and deposit slips)
4512.D3.2	Show a reconciliation of a bank statement
4512.D3.3	Compare and contrast different financial institutions and their services
4512.D3.4	Assess data from the stock markets used in making investment decisions
4512.D3.5	Students apply math concepts to analyze and solve problems related to the principles of business finance.
4512.D3.6	Calculate various types of interest, (e.g., simple, compound, variable, exact, or ordinary)
4512.D3.7	Calculate the costs associated with installment purchases
4512.D3.8	Compare cash price to installment price in order to make a purchasing decision
4512.D3.9	Compute the monthly payment, interest, and total amount required to amortize a loan (e.g.,

	mortgage)
4512.D3.10	Compare and contrast benefits and cost of long-term debt options for promissory notes and bonds
4512.D3.11	Compare and contrast benefits and costs of investment options (e.g., money-markets, CD's, stocks, bonds)
4512.D3.12	Understand and calculate present value and future value
4512.D3.13	Determine the finance charges on credit card balances
4512.D3.14	Compare and contrast the advantages and disadvantages of employee credit card use for business expenses
4512.D3.15	Compare and contrast the advantages and disadvantages of offering credit to customers
Domain	Marketing Principles
4512.D4.1	Students apply math concepts to analyze and solve problems related to marketing principles for business.
4512.D4.2	Compare and contrast expenses associated with various advertising mediums
4512.D4.3	Compute extensions, subtotals, sales tax, and sales totals for a sales transaction
4512.D4.4	Compute markup or markdown
4512.D4.5	Calculate and analyze different types of trade discounts
4512.D4.6	Calculate the response rate and results of surveys
4512.D4.7	Analyze demographic information to make sound marketing decisions
4512.D4.8	Using trend data and forecasting models, calculate future sales
4512.D4.9	Calculate and analyze market share
4512.D4.10	Plan and design various displays for products with different size and shape requirements
Domain	Management Principles
4512.D5.1	Students apply math concepts to analyze and solve problems related to management principles.
4512.D5.2	Interpret financial statements to make sound managerial decisions
4512.D5.3	Create and analyze budgets
4512.D5.4	Calculate inventory balances and stock reorder points
4512.D5.5	Calculate necessary ratios to make sound managerial decisions
4512.D5.6	Calculate the cost of full-time versus part-time employees
4512.D5.7	Compare and contrast the different types and costs relating to insurance (e.g. property, automobile, bonding)
Domain	Communication
4512.D6.1	Students develop skills to create and present accurate and effective communication for specific business-related purposes and audiences.
4512.D6.2	Use clear and legible handwriting in all written work and communication
4512.D6.3	Demonstrate active listening skills
4512.D6.4	Use discussion skills to assume leadership and participant roles

Next Level Programs of Study

Domain	Entrepreneurship
4518.D3.1	Students apply concepts of economic conditions, market competitions, financing strategies, innovation and opportunity recognition while integrating their knowledge of business management and marketing principles to design and develop a successful new venture.
4518.D3.2	Define entrepreneurship
4518.D3.3	List the characteristics of a successful entrepreneurship
4518.D3.4	Define the role of a business plan
4518.D3.5	Identify the various methods of financing a business
4518.D3.6	Identify the methods of entering an entrepreneurial venture to include starting a new business, buying an existing business, becoming a franchisee, and forms of ownership
4518.D3.7	Describe the impact of the local economy on the establishment of a new business
4518.D3.8	Describe the impact of the national economy on the establishment of a new business
4518.D3.9	Describe the impact of the international economy on the establishment of a new business
4518.D3.10	Appraise the contribution of entrepreneurship to the economy
4518.D3.11	Recognize and explain the influence of demographics on business development
4518.D3.12	Understand and respond to customer demands for business development strategies
4518.D3.13	Examine elements of competition in the market
4518.D3.14	Analyze creative elements in opportunity recognition to start a new enterprise
4518.D3.15	Demonstrate examples of creativity and innovation in new business development

Entrepreneurship and New Ventures Capstone	
Career Cluster	Business Management, Marketing and Finance
Program of Study	
NLPS Sequence	
Course Code	5966
Course Description	<i>Entrepreneurship and New Ventures Capstone introduces entrepreneurship and develops skills and tools critical for starting and succeeding in a new venture. The entrepreneurial process of opportunity recognition, innovation, value proposition, competitive advantage, venture concept, feasibility analysis, and “go to” market strategies will be explored through mini-case studies of successful and unsuccessful entrepreneurial start-ups. Additionally, topics of government and legal restrictions, intellectual property, franchising location, basic business accounting, raising startup funding, sales and revenue forecasting, and business plan development will be presented through extensive use of word processing, spreadsheet and presentation software.</i>
Prerequisite(s)/	Any CTE Concentrator Sequence except Entrepreneurship

Domain	Entrepreneurial Concepts
7154.D1.1	Identify current trends in entrepreneurship and the many paths one can take to be an entrepreneur (side hustle, freelancer, franchise owner, high growth startup, small business owner, purchasing an existing business, etc.).
7154.D1.2	Identify and understand steps in the Entrepreneurial process or a startup model like RISE (Regional Innovation & Startup Education) or Lean Startup.
7154.D1.3	Identify entrepreneurial concepts, including ideation, prototyping, opportunity evaluation, launch.
7154.D1.4	Identify the management, financial, marketing, and legal skills necessary to operate and grow an entrepreneurial business venture.
7154.D1.5	Describe issues regarding the operation of an entrepreneurial business.
7154.D1.6	Identify global aspects of an entrepreneurial business.
7154.D1.7	Conduct background research on economic conditions, market trends, competitive factors and consumer behavior using higher order thinking methods.
7154.D1.8	Build and apply professional skills in oral and written communication, critical thinking, self-evaluation.
7154.D1.9	Conduct a personal inventory, including mapping your network, resources (both local and state), and the time you are willing to give to pursue your entrepreneurial endeavor.
7154.D1.10	Identify problems and opportunities after completing your personal inventory and assess next steps in validating the problem you would like to solve. Identify who has the problem (target market), how big the problem is (market size) and who you will need to enroll or what will you need to do to begin solving the problem.
7154.D1.11	Create a problem statement and elevator pitch for the problem you would like to solve.
7154.D1.12	Create several business model canvases for local or state businesses to learn how to use and apply the tool to your own idea.
7154.D1.13	Understand how different types of businesses are funded and which tools support funding different types of businesses (pitching to investors for high growth, writing traditional business plan for bank loans, bootstrapping through friends and family, or creating a campaign using tools like GoFundMe or Kickstarter)
Domain	Entrepreneurial Mindset
7154.D2.1	Understand all the pathways to being an entrepreneur.
7154.D2.2	Identify all the ways having an entrepreneurial mindset can help anyone in any field.
7154.D2.3	Analyze the common characteristics, habits, and mindset of successful entrepreneurs from different industries.
7154.D2.4	Apply the concept of fail fast, fail forward, and maximizing resiliency by understanding how to accept feedback and being vulnerable to pursue your entrepreneurial endeavors.
7154.D2.5	Recognize the role of leadership, ethics, and diversity in entrepreneurial ventures.
7154.D2.6	Understand the importance and strategies for creating a long-term vision to navigate the numerous obstacles in the entrepreneurship journey.
7154.D2.7	Write a personal vision and mission statement.
7154.D2.8	Create and start a personal and professional development plan, based on an understanding of strengths and limiting beliefs, to achieve desired goals.
7154.D2.9	Understand the art of building effective teams and cultures within the startup space.
Domain	New Venture Development
7148.D1.1	Apply problem and customer validation processes.

Next Level Programs of Study

Review Document

7148.D1.2	Identify and refine ideas for possible solutions based on research, resources, capabilities, and team.
7148.D1.3	Create a prototype/minimum viable product and test it through customer validation.
7148.D1.4	Communicate problems and solutions effectively, clearly, and concisely to proper audiences.
7148.D1.5	Identify Total Available Market (TAM)
7148.D1.6	Identify Serviceable Available Market (SAM)
7148.D1.7	Identify Serviceable Obtainable Market (SOM)
7148.D1.8	Identify and research competition and identify your value proposition against the competition.
7148.D1.9	Execute plan and launch startup.
Domain	Business Plan
7148.D2.1	Understand and build the framework of a business model canvas or business plan depending on the type of business you are starting, and the funding needs you will have.
7148.D2.2	Evaluate market entry strategies like starting a new business, buying an existing business, franchising, and other forms of ownership.
7148.D2.3	Formulate a marketing strategy that connects the product, price, promotion, and location of a new venture.
7148.D2.4	Understand and read the story that numbers can tell us for a business.
7148.D2.5	Understand and calculate unit economics.
7148.D2.6	Create financial statements for your business.
7148.D2.7	Calculate return on investment and break-even points.

Business, Marketing and Entrepreneurship: Special Topics	
Career Cluster	Business Management, Marketing and Finance
Program of Study	
NLPS Sequence	
Course Code	5968
Course Description	<i>Business, Marketing, and Entrepreneurship: Special Topics is an extended learning experience designed to address the advancement and specialization of careers within the career cluster through the provision of a specialized course for a specific workforce need in the school's region. The learning experience is at a qualified site, and is designed to give the student the opportunity to learn and practice technical skills; while working under the direction of the appropriately licensed professional. Throughout the course, students will focus on learning about employment opportunities and obtaining the knowledge, skills and attitudes essential for success in specific occupations. Course standards and curriculum must be tailored to the specific profession, preparing students to advance in this career field, and where applicable, provide students with opportunities for certification or dual credit. Participation in a related CTSO encourages the development of leadership, communication and career related skills, and opportunities for community service.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 semester course, up to 3 credits per semester, May be offered for successive semesters up to 12 credits
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X
Additional Notes	Schools must have an approved Nonstandard Course Waiver on file to be eligible for CTE Funding.

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	International Business
7256.D1.1	Discuss the basic framework of international trade, including importing, exporting comparative advantage, balance of trade and exchange rates.
7256.D1.2	Explain the different ways a purely domestic business can become an international operation.
7256.D1.3	Define multinational enterprise and discuss its impact on the world economy.
7256.D1.4	Discuss how a company's decision-making process in different areas of the world may be affected by the cultures, the political systems, and the economic systems of those areas.
7256.D1.5	Recognize the different trading zones of the world (Pacific Rim, European Community, etc.).
7256.D1.6	Analyze problems encountered in international business negotiations and communications.
Domain	Business Communications
7256.D2.1	Utilize critical thinking, decision-making, and problem-solving techniques to promote sound, effective business communications.
7256.D2.2	Analyze audience to determine appropriate language, tone, style, and format for specific communications.
7256.D2.3	Compose routine and specific-purpose business letters including inquiry.
7256.D2.4	Compose memorandums, reports, and telecommunications.
7256.D2.5	Apply accepted rules of grammar, punctuation, capitalization, and spelling when composing and editing documents for accuracy, coherence, continuity, clarity, and format.
7256.D2.6	Appraise and assess interactive listening techniques and nonverbal communications.
7256.D2.7	Evaluate and discuss technical, legal, ethical, and global issues related to business communications.
7256.D2.8	Examine and apply team skills in a classroom environment.
7256.D2.9	Assess and edit written material in a team setting.
7256.D2.10	Summarize material to prepare an effective document.
7256.D2.11	Apply electronic and/or print research skills in assignments and special projects.
7256.D2.12	Utilize computer skills to produce written business communications.
7256.D2.13	Illustrate research findings in a written report using appropriate graphics, charts, and support materials.
7256.D2.14	Utilize social media tools and applications.
Domain	Managerial Accounting
7256.D3.1	Discuss the difference between financial and managerial accounting and identify the characteristics, process, organization, and the profession of managerial accounting.
7256.D3.2	Define and discuss the concepts, procedures, and characteristics of a manufacturing process with a job order cost system.
7256.D3.3	Distinguish between the process cost system and the job-order cost system and describe and illustrate a process cost accounting system.
7256.D3.4	Describe the nature and objectives of budgeting, including procedures and various reports.
7256.D3.5	Describe and illustrate methods used for evaluation of capital investment proposals, capital rationing and planning, and controlling capital investment expenditures.

Next Level Programs of Study

Review Document

7256.D3.6	Describe and explain the nature and types of decentralization.
7256.D3.7	Define and discuss responsibility accounting for investment centers and transfer pricing.
7256.D3.8	Describe and illustrate inventory control, quantitative techniques for estimating costs, and the learning effect in estimating costs.
7256.D3.9	Define and explain the managerial use of expected value concept, variance analysis using expected value, and maximum concepts of decision-making policies.
7256.D3.10	Define and illustrate the usefulness of financial statement analysis, types of analysis, basic analytical procedures, solving analysis, profitability analysis, and selection of analytical procedures.
7256.D3.11	Describe the nature of concepts of working capital, analysis of cash, and cash flow from operations.
7256.D3.12	Identify and illustrate the characteristics of other selected topics.
Domain	Human Resources
7256.D4.1	Define the human resource management functions and how they contribute to achievement of organizational objectives.
7256.D4.2	Discuss how the changing global environment and multicultural society affect human resource management.
7256.D4.3	Examine job analysis methods.
7256.D4.4	Describe the staffing process.
7256.D4.5	Identify the different approaches to performance appraisals.
7256.D4.6	Explain the components of motivation and communication and their effect on the work environment.
7256.D4.7	Analyze the objectives and policies of an organization's total compensation program.
7256.D4.8	Explain the use of audit findings to improve human resource management.
7256.D4.9	Discuss cultural differences as they relate to human resources management.
7256.D4.10	Analyze the legal environment as it relates to human resource management.
7256.D4.11	Identify the different roles that labor unions play in domestic and international business organizations.

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Payroll Accounting
4522.D1.1	Understand and apply the Fair Labor Standards Act, Social Security, Federal Income Tax Withholding, Unemployment tax, and other laws and acts that affect payroll.
4522.D1.2	Calculate gross pay, regular pay, overtime pay, and overtime premium pay.
4522.D1.3	Calculate the following withholdings from gross pay: FICA, Federal Income Tax, State Income Tax, County Income Tax, and other deductions.
4522.D1.4	Calculate employer taxes and other employee benefits (paid by the employer): FICA, FUTA, SUTA, workers' compensation, and other benefits paid by employer.
4522.D1.5	Record payroll data using the double-entry accounting method of recording, classifying, summarizing, and reporting transactions.

Next Level Programs of Study

Review Document

4522.D1.6	Prepare appropriate payroll tax forms: withholding tax (Federal and State), unemployment tax, (Federal and State), payroll register, employee's earnings record, other appropriate forms or schedules.
4522.D1.7	Demonstrated project or a series of learning problems.
Domain	Accounting Systems Application
4522.D2.1	Use accounting software to set up a company's General Ledger Chart of Accounts and needed subsidiary ledgers including but not limited to Accounts Receivable, Accounts Payable, Inventory, Fixed Assets, and Payroll.
4522.D2.2	Use accounting software to perform the complete accounting cycle to analyze, to record in the most appropriate module, to adjust, to report and to perform periodic closing of financial information.
4522.D2.3	Analyze data and reports generated by accounting software.
4522.D2.4	Communicate effectively using correct Standard English, both orally and in writing by completion of papers, projects and/or presentations. Input numeric data using proper keying techniques.
4522.D2.5	Think critically and independently analyze to solve accounting problems.

Accounting Capstone	
Career Cluster	Business Management, Marketing and Finance
Program of Study	Accounting
NLPS Sequence	D
Course Code	7252
Course Description	<i>The Accounting Capstone course will emphasize Managerial Accounting concepts and Income Tax Accounting for individuals and sole proprietorships. Topics include general versus cost accounting systems, cost behavior, cost-volume profit analysis, budgeting, standard cost systems, responsibility accounting, incremental analysis, and capital investment analysis. Offers an overview of federal and state income tax law for individuals including taxable income, capital gains and losses, adjustments, standard and itemized deductions, tax credits and appropriate tax forms. When offered for multiple credits per semester, the Accounting Capstone may be used to provide students the opportunity to participate in an intensive work-based learning experience and/or to complete additional coursework in using spreadsheets to solve accounting cases and to complete a postsecondary credential from ITCC or VU.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Business Management; Accounting Fundamentals; Advanced Accounting
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas Qualifies as a quantitative reasoning course
Dual Credit Status	X

CONTENT STANDARDS AND COMPETENCIES		
Competency #	Competency	
Domain	<i>Managerial Accounting</i>	
7252.D1.1	Discuss the difference between financial and managerial accounting and identify the characteristics, process, organization, and the profession of managerial accounting.	
7252.D1.2	Define and discuss the concepts, procedures, and characteristics of a manufacturing process with a job order cost system.	

Next Level Programs of Study

Review Document

7252.D1.3	Distinguish between the process cost system and the job-order cost system and describe and illustrate a process cost accounting system.
7252.D1.4	Describe the nature and objectives of budgeting, including procedures and various reports.
7252.D1.5	Describe and illustrate methods used for evaluation of capital investment proposals, capital rationing and planning, and controlling capital investment expenditures.
7252.D1.6	Describe and explain the nature and types of decentralization.
7252.D1.7	Define and discuss responsibility accounting for investment centers and transfer pricing.
7252.D1.8	Describe and illustrate inventory control, quantitative techniques for estimating costs, and the learning effect in estimating costs.
7252.D1.9	Define and explain the managerial use of expected value concept, variance analysis using expected value, and maximum concepts of decision-making policies.
7252.D1.10	Define and illustrate the usefulness of financial statement analysis, types of analysis, basic analytical procedures, solving analysis, profitability analysis, and selection of analytical procedures.
7252.D1.11	Describe the nature of concepts of working capital, analysis of cash, and cash flow from operations.
7252.D1.12	Identify and illustrate the characteristics of other selected topics.
Domain	Income Tax
7252.D2.1	Utilize a tax vocabulary to discuss general concepts of U.S. income tax law for various taxable entities and to carefully read forms and instructions.
7252.D2.2	Define the general tax formula or structure and place concepts as they are covered in the course within that framework.
7252.D2.3	Discuss components of gross income, identifying whether these are excluded or included for federal income tax purposes.
7252.D2.4	Discuss adjustments to gross income and calculate adjusted gross income (AGI).
7252.D2.5	Discuss the standard deduction or itemized deductions and the deduction for exemptions to arrive at taxable income.
7252.D2.6	Determine federal income tax less appropriate credits to arrive at tax due or to be refunded.
7252.D2.7	Complete a tax return for an individual using the appropriate form 1040 and necessary schedules.
7252.D2.8	Describe acceptable accounting methods for income tax purposes.
7252.D2.9	Prepare a schedule C and/or schedule F (including depreciation schedules) with an accompanying schedule SE using the appropriate tax method.
7252.D2.10	Discuss the rules for deducting IRAs and other retirement plans.
7252.D2.11	Define a capital asset, contrast accounting vs. tax methods, explain the tax treatment of such assets, prepare a schedule D, and describe the tax treatment of sale of business assets including the filing of form 4797.
7252.D2.12	Discuss the requirements of a tax preparer and explain the rules of tax compliance and the role and procedures of the IRS.
7252.D2.13	Identify various tax planning techniques such as deferral or acceleration of income.
7252.D2.14	Communicate effectively using correct standard English, both orally and in writing by completion of papers, projects and/or presentations.
Domain	Spreadsheets
7252.D3.1	Create worksheets and workbooks.
7252.D3.2	Navigate through worksheets and workbooks.

Next Level Programs of Study

Review Document

7252.D3.3	Format worksheets and workbooks.
7252.D3.4	Customize options and views for worksheets and workbooks.
7252.D3.5	Configure worksheets and workbooks to print or save.
7252.D3.6	Insert data in cells and ranges.
7252.D3.7	Format cells and ranges.
7252.D3.8	Order and group cells and ranges.
7252.D3.9	Create a table.
7252.D3.10	Modify a table.
7252.D3.11	Filter and sort a table.
7252.D3.12	Utilize cell ranges and references in formulas and functions.
7252.D3.13	Summarize data with functions.
7252.D3.14	Utilize conditional logic in functions.
7252.D3.15	Format and modify text with functions.
7252.D3.16	Create a chart.
7252.D3.17	Format a chart.
7252.D3.18	Insert and format an object.
7252.D3.19	Recognize special and/or advanced software features as they relate to software certifications.

Review Document

Domain	Management
7201.D1.1	Define management, managers, and the basic management functions.
7201.D1.2	Evaluate classical, behavioral, quantitative, and contemporary management theories regarding process, motivation, and expected outcomes. Distinguish between the external, task, and internal environments of organizations.
7201.D1.3	Discuss social responsibility, the meaning of ethics in the business setting, and social audit.
7201.D1.4	Assess the roles of goals and goal setting in the planning process and identify barriers that may interfere with goal setting.
7201.D1.5	Appraise the strategic planning process and the process of strategy implementation.
7201.D1.6	Structure and support the steps in the decision-making process.
7201.D1.7	Identify and describe the major purposes for and types of forecasting techniques.
7201.D1.8	Discuss the nature of work specialization, departmentalization, and scheduling within the scope of management.
7201.D1.9	Discuss how organizational activities are coordinated and describe the management of organizational conflict.
7201.D1.10	Appraise international business practices and evaluate against cultural and political values.
Domain	Business Law
7201.D2.1	Discuss state and federal judicial systems and jurisdictions.
7201.D2.2	Identify the sources of laws as applied to business.
7201.D2.3	Apply appropriate legal principles to contractual obligations.
7201.D2.4	Understand the parameters of the various business structures.
7201.D2.5	Apply the laws of agency and debt adjustment to factual situations.
7201.D2.6	Recognize the obligations and rights of parties to negotiate instruments.
7201.D2.7	Recognize the rights and obligations of parties as regards personal and real property.
7201.D2.8	Recognize the rights and obligations of the parties to sales and lease of goods contracts.
7201.D2.9	Apply the Uniform Commercial Code to sales contracts and differentiate common law and Uniform Commercial Code situations.
7201.D2.10	Understand the application of consumer protection laws.
7201.D2.11	Recognize the importance of both Federal and State employment laws to effective organizational leadership.
7201.D2.12	Understand the importance of protecting intellectual property rights.
Domain	Accounting
7201.D3.1	Recognize the meaning and function of accounting, its importance, and basic US accounting rules and the body most responsible for their development.
7201.D3.2	Use the accounting cycle, including analyzing and recording transactions and preparing basic financial statements in accordance with accrual accounting principles.
7201.D3.3	Account for buying and selling merchandise, including using LIFO, FIFO, and weighted average to assign values to cost of goods sold and ending inventory.
7201.D3.4	Recognize the purpose, advantages, disadvantages, and limitations of internal controls. Prepare a bank reconciliation.
7201.D3.5	Account for uncollectible accounts receivable using the allowance method.

Competency #	Competency
Domain	Introduction to Business
4562.D1.1	Identify the social, legal, economic, and ethical challenges of the business environment.
4562.D1.2	Identify management and leadership functions, and the relationship to operations and supply chain management.
4562.D1.3	Relate the characteristics of organizational structures to legal forms of business ownership including small business and entrepreneurship.
4562.D1.4	Examine the principles of short- and long-range financial planning, as well as the role of stock exchanges in the financial markets.

Next Level Programs of Study

Review Document

4562.D1.5	Analyze business issues and events related to strategic decision-making in an international and global context.
4562.D1.6	Describe the marketing mix/marketing concept and its relationship to purchasing, production, distribution, and quality.
4562.D1.7	Interpret the importance of communication and technology to the success of the organization.
4562.D1.8	List and describe the human resource functions in business.
4562.D1.9	Examine career opportunities in business.
Domain	Business Software Applications
4562.D2.1	Explain the purpose of information systems to support organizations and enhance productivity.
4562.D2.2	Explain the physical components and operation of microcomputers.
4562.D2.3	Use word processing, spreadsheet, database, and presentation applications to perform key business tasks.
4562.D2.4	Explain the difference between computer operating systems and user software programs.
4562.D2.5	Identify when to use appropriate features within a software application.
4562.D2.6	Utilize internet applications and “cloud” technologies in business situations.
4562.D2.7	Utilize collaboration technologies.
4562.D2.8	Explain security goals, response to threats, and safeguards.
4562.D2.9	Discuss issues related to the ethical use of information technology.

Logistics Management	
Career Cluster	Business Management, Marketing and Finance
Program of Study	Supply Chain
NLPS Sequence	B
Course Code	7155
Course Description	<i>Logistics Management provides students the opportunity to explore how essential managerial functions relate to the various components of a logistics operation. Logistics concepts are approached from a manufacturing perspective with a focus on system integration and automation and lean manufacturing operations. Topics will include logistics systems, supply chain management, order, demand inventory and warehouse management, and automated components of a logistics system. Students will be prepared for the MSSC Certified Logistics Associate (CLA) and MSSC Certified Logistics Technician (CLT) certifications.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Business Management
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Introduction to Business
4562.D1.1	Identify the social, legal, economic, and ethical challenges of the business environment.
4562.D1.2	Identify management and leadership functions, and the relationship to operations and supply chain management.
4562.D1.3	Relate the characteristics of organizational structures to legal forms of business ownership including small business and entrepreneurship.
4562.D1.4	Examine the principles of short- and long-range financial planning, as well as the role of stock exchanges in the financial markets.
4562.D1.5	Analyze business issues and events related to strategic decision-making in an international and global context.

Next Level Programs of Study

Review Document

4562.D1.6	Describe the marketing mix/marketing concept and its relationship to purchasing, production, distribution, and quality.
4562.D1.7	Interpret the importance of communication and technology to the success of the organization.
4562.D1.8	List and describe the human resource functions in business.
4562.D1.9	Examine career opportunities in business.
Domain	Business Software Applications
4562.D2.1	Explain the purpose of information systems to support organizations and enhance productivity.
4562.D2.2	Explain the physical components and operation of microcomputers.
4562.D2.3	Use word processing, spreadsheet, database, and presentation applications to perform key business tasks.
4562.D2.4	Explain the difference between computer operating systems and user software programs.
4562.D2.5	Identify when to use appropriate features within a software application.
4562.D2.6	Utilize internet applications and “cloud” technologies in business situations.
4562.D2.7	Utilize collaboration technologies.
4562.D2.8	Explain security goals, response to threats, and safeguards.
4562.D2.9	Discuss issues related to the ethical use of information technology.

Insurance Fundamentals	
Career Cluster	Business Management, Marketing and Finance
Program of Study	Insurance
NLPS Sequence	B
Course Code	7149
Course Description	<i>Insurance Fundamentals presents an introduction to professions within the insurance industry. The course includes an overview of the insurance industry, types of coverage that exist, insurance processes and expected outcomes. Students will also gain an understanding of the selling process including the psychology of selling and will develop skills through a series of selling situations.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Business Management
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes

7151.D1.1	Describe and analyze the property loss exposures that individuals and families might face regarding the property exposed to loss and the causes of loss affecting property, and the financial consequences of property losses.	
7151.D1.2	Describe and analyze the liability loss exposures that individuals and families might face regarding the possibility of a claim for money damages and the financial consequences of liability losses.	

Next Level Programs of Study

Review Document

7151.D1.3	Describe and analyze the risk management process that can be used by individuals and families regarding the steps in the risk management process, insurance as a risk management technique, and other techniques to treat loss exposures.
7151.D1.4	Describe the various problems associated with automobile insurance which include the high frequency of automobile accidents, the high costs of automobile accidents. The substantial underwriting losses incurred by insurers, irresponsible drivers, and the availability and affordability of automobile insurance.
7151.D1.5	Describe, analyze, and explain the major functions of the personal auto policy which include personal automobile insurance and personal loss exposures, liability coverage, medical payment coverage, and the uninsured motorist's coverage.
7151.D1.6	Describe, analyze, and explain the major functions of the personal auto policy which include physical damage insurance for the damage or theft of a covered auto, the duties imposed on an insured after an accident or loss, bankruptcy of the insured, changes in the policy, fraud, legal action against the insurer, and the various endorsements that can be added to the personal auto policy.
7151.D1.7	Describe and explain the homeowner's policy series which includes the homeowner's declarations, insuring agreement, definitions, and Section I of the HO-3 policy.
Domain	Commercial Insurance
7151.D2.1	Demonstrate knowledge of commercial loss exposures, the risk management process, and the basic nature of the various lines of insurance.
7151.D2.2	Explain the advantages of package policies, describe the components for a commercial package policy, and explain how the excess and surplus (E&S) market provides coverage for many unique exposures.
7151.D2.3	Demonstrate knowledge of the various documents that form the commercial property coverage part, the coverages and conditions included in the building and personal property coverage form, methods for insuring fluctuating values, and the difference between blanket and specific insurance.
7151.D2.4	Distinguish between the four causes-of-loss forms and describe and discuss the nine conditions in the commercial property conditions form.
7151.D2.5	Describe the factors and approaches used in rating commercial property coverage.
7151.D2.6	Demonstrate uses of the business income loss exposure, the business income coverage forms, various business income endorsements, and how business income is rated.
7151.D2.7	Describe the various crime coverage forms as well as the boiler and machinery coverage form and demonstrate knowledge of loss exposures involved in both crime and boiler and machinery coverages.
7151.D2.8	Describe and explain inland and ocean marine exposures, the types of coverage provided by various filed and non-filed inland marine policies, and the basic types of ocean marine insurance coverages.
7151.D2.9	Describe various liability loss exposures and the coverages included in and excluded from Coverages A, B, and C of the commercial general liability (CGL) coverage form.
7151.D2.10	Describe and discuss the types of persons and organizations covered under a CGL policy; the application of limits, aggregate limits, and sub limits in commercial general liability policies; CGL conditions, endorsements, and rating; the difference between the claims-made version of the CGL and the occurrence version; and miscellaneous liability coverage forms.
7151.D2.11	Describe the coverages provided by the business auto coverage form, the garage coverage form, and the motor carrier coverage form, including endorsements.

Next Level Programs of Study

Review Document

7151.D2.12	Demonstrate knowledge of the coverages provided by the Insurance Service Office (ISO) property and liability forms.
7151.D2.13	Discuss and describe workers compensations laws, including requirements for benefits, benefits typically provided, persons and employments covered, and methods for meeting employer’s obligations; the workers compensation and employers’ liability policy and endorsements; and the procedures for rating workers compensation insurance, including merit rating plans.
7151.D2.14	Describe various types of professional liability policies, excess and umbrella liability policies, surety bonds, and miscellaneous policies.

Business Management Capstone	
Career Cluster	Business Management, Marketing and Finance
Program of Study	Entrepreneurship
NLPS Sequence	D
Course Code	7201
Course Description	<i>The Business Management Capstone is designed to provide any student with the Business Management skills necessary to run their own business or to serve in upper level management. Students will explore Management Theory, Accounting, and Business Law. The Business Management Capstone can be used with any career pathway except Business Administration. Completion of the course may allow students the opportunity to earn a CT or TC through ITCC.</i>
Prerequisite(s)/ Corequisite(s)	Any CTE Business Concentrator Sequence except Business Administration
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	Recommended Capstone course for Entrepreneurship, Insurance, and Marketing Programs of Study

Competency #	Competency
Domain	Management
7201.D1.1	Define management, managers, and the basic management functions.
7201.D1.2	Evaluate classical, behavioral, quantitative, and contemporary management theories regarding process, motivation, and expected outcomes. Distinguish between the external, task, and internal environments of organizations.
7201.D1.3	Discuss social responsibility, the meaning of ethics in the business setting, and the social audit.
7201.D1.4	Assess the roles of goals and goal setting in the planning process and identify barriers that may interfere with goal setting.
7201.D1.5	Appraise the strategic planning process and the process of strategy implementation.
7201.D1.6	Structure and support the steps in the decision-making process.
7201.D1.7	Identify and describe the major purposes for and types of forecasting techniques.
7201.D1.8	Discuss the nature of work specialization, departmentalization, and scheduling within the scope of management.
7201.D1.9	Discuss how organizational activities are coordinated and describe the management of organizational conflict.
7201.D1.10	Appraise international business practices and evaluate against cultural and political values.

Next Level Programs of Study

Review Document

Domain	Business Law
7201.D2.1	Discuss state and federal judicial systems and jurisdictions.
7201.D2.2	Identify the sources of laws as applied to business.
7201.D2.3	Apply appropriate legal principles to contractual obligations.
7201.D2.4	Understand the parameters of the various business structures.
7201.D2.5	Apply the laws of agency and debt adjustment to factual situations.
7201.D2.6	Recognize the obligations and rights of parties to negotiate instruments.
7201.D2.7	Recognize the rights and obligations of parties as regards personal and real property.
7201.D2.8	Recognize the rights and obligations of the parties to sales and lease of goods contracts.
7201.D2.9	Apply the Uniform Commercial Code to sales contracts and differentiate common law and Uniform Commercial Code situations.
7201.D2.10	Understand the application of consumer protection laws.
7201.D2.11	Recognize the importance of both Federal and State employment laws to effective organizational leadership.
7201.D2.12	Understand the importance of protecting intellectual property rights.
Domain	Accounting
7201.D3.1	Recognize the meaning and function of accounting, its importance, and basic US accounting rules and the body most responsible for their development.
7201.D3.2	Use the accounting cycle, including analyzing and recording transactions and preparing basic financial statements in accordance with accrual accounting principles.
7201.D3.3	Account for buying and selling merchandise, including using LIFO, FIFO, and weighted average to assign values to cost of goods sold and ending inventory.
7201.D3.4	Recognize the purpose, advantages, disadvantages, and limitations of internal controls. Prepare a bank reconciliation.
7201.D3.5	Account for uncollectible accounts receivable using the allowance method.
7201.D3.6	Account for notes receivable, including interest accruals.
7201.D3.7	Account for notes payable, including interest accruals. Recognize acceptable accounting for basic payroll and other short-term liabilities.
7201.D3.8	Recognize the cost of a plant asset and use accepted method(s) to depreciate a plant asset. Account for the disposal of plant assets. Recognize acceptable accounting for other non-current assets.
7201.D3.9	Calculate the present value of bonds at issuance and account for borrowing by issuing bonds.
7201.D3.10	Account for issuing common and preferred stock, treasury stock transactions, and for dividends.
7201.D3.11	Prepare a multi-step income statement and a classified balance sheet. Given cash pieces, prepare a statement of cash flows
7201.D3.12	Analyze a set of financial statements for profitability and liquidity.
7201.D3.13	Communicate effectively both orally and in writing, using professional, business English.

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Entrepreneurial Concepts
7154.D1.1	Identify current trends in entrepreneurship and the many paths one can take to be an entrepreneur (side hustle, freelancer, franchise owner, high growth startup, small business owner, purchasing an existing business, etc.).
7154.D1.2	Identify and understand steps in the Entrepreneurial process or a startup model like RISE (Regional Innovation & Startup Education) or Lean Startup.
7154.D1.3	Identify entrepreneurial concepts, including ideation, prototyping, opportunity evaluation, launch.
7154.D1.4	Identify the management, financial, marketing, and legal skills necessary to operate and grow an entrepreneurial business venture.
7154.D1.5	Describe issues regarding the operation of an entrepreneurial business.
7154.D1.6	Identify global aspects of an entrepreneurial business.
7154.D1.7	Conduct background research on economic conditions, market trends, competitive factors and consumer behavior using higher order thinking methods.
7154.D1.8	Build and apply professional skills in oral and written communication, critical thinking, self-evaluation.

Next Level Programs of Study

Review Document

7154.D1.9	Conduct a personal inventory, including mapping your network, resources (both local and state), and the time you are willing to give to pursue your entrepreneurial endeavor.
7154.D1.10	Identify problems and opportunities after completing your personal inventory and assess next steps in validating the problem you would like to solve. Identify who has the problem (target market), how big the problem is (market size) and who you will need to enroll or what will you need to do to begin solving the problem.
7154.D1.11	Create a problem statement and elevator pitch for the problem you would like to solve.
7154.D1.12	Create several business model canvases for local or state businesses to learn how to use and apply the tool to your own idea.
7154.D1.13	Understand how different types of businesses are funded and which tools support funding different types of businesses (pitching to investors for high growth, writing traditional business plan for bank loans, bootstrapping through friends and family, or creating a campaign using tools like GoFundMe or Kickstarter)
Domain	Entrepreneurial Mindset
7154.D2.1	Understand all the pathways to being an entrepreneur.
7154.D2.2	Identify all the ways having an entrepreneurial mindset can help anyone in any field.
7154.D2.3	Analyze the common characteristics, habits, and mindset of successful entrepreneurs from different industries.
7154.D2.4	Apply the concept of fail fast, fail forward, and maximizing resiliency by understanding how to accept feedback and being vulnerable to pursue your entrepreneurial endeavors.
7154.D2.5	Recognize the role of leadership, ethics, and diversity in entrepreneurial ventures.
7154.D2.6	Understand the importance and strategies for creating a long-term vision to navigate the numerous obstacles in the entrepreneurship journey.
7154.D2.7	Write a personal vision and mission statement.
7154.D2.8	Create and start a personal and professional development plan, based on an understanding of strengths and limiting beliefs, to achieve desired goals.
7154.D2.9	Understand the art of building effective teams and cultures within the startup space.

New Venture Development	
Career Cluster	Business Management, Marketing and Finance
Program of Study	Entrepreneurship
NLPS Sequence	B
Course Code	7148
Course Description	<i>New Venture Development is targeted to students interested in creating and growing their own businesses. The course will focus on key marketing strategies particularly relevant for new ventures. Students will apply marketing concepts to entrepreneurial company challenges, which include creating and nurturing relationships with new customers, suppliers, distributors, employees and investors; and understand the special challenges and opportunities involved in developing marketing strategies "from the ground up."</i>

Personal Financial Responsibility (Applied Personal Financial Responsibility)	
Career Cluster	CTE
Program of Study	
NLPS Sequence	
Course Code	4540
Course Description	<i>Personal Financial Responsibility addresses the identification and management of personal financial resources to meet the financial needs and wants of individuals and families, considering a broad range of economic, social, cultural, technological, environmental, and maintenance factors. This course helps students build skills in financial responsibility and decision making; analyze personal standards, needs, wants, and goals, identifying sources of income, savings, and investing; understand banking, budgeting, record-keeping and managing risk, insurance and credit card debt. A project based approach and applications through authentic settings such as work based observations and service learning experiences are appropriate. Direct, concrete applications of mathematics proficiencies in projects are encouraged.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 credit per semester, 1 credit maximum
Counts Toward	Counts as a directed elective or elective for all diplomas Counts as a quantitative reasoning course
Dual Credit Status	
Additional Notes	When offered as applied: 2 units maximum; counts as an employability applied unit for alternate diploma

	goals
4540.D2.2	Describe how personal factors, career choices, and economic conditions affect income a. Analyze ways economic, social, cultural, educational, and political conditions can affect income and career potential b. Analyze the financial risks and benefits of entrepreneurship as a career choice
4540.D2.3	Identify sources of personal income a. Compare and contrast wage, gift, rent, interest, dividend, capital gain, tip, commission, and business profit as sources of personal income b. Analyze the advantages and disadvantages of participation in government assistance programs
4540.D2.4	Explain how taxes and employee benefits relate to disposable income a. Analyze typical employee benefits and explain why they are a form of compensation b. Describe benefits of employer sponsored savings plans and other personal options for shifting current income to the future
Domain	Planning and Managing Money
4540.D3.1	Students manage money effectively by developing financial goals and budgets
4540.D3.2	Develop a personal financial plan to demonstrate the ability to use money management skills and strategies a. Create a basic budget with categories for income, taxes, planned savings, and fixed and variable expenses b. Analyze and adjust budget categories to manage spending and achieve financial goals c. Develop a personal financial plan that shows allocation of income, spending, saving, investing and sharing/giving over a year-long time span d. Analyze a plan to secure funding for a financial goal (such as college, major consumer purchases, etc.)
4540.D3.3	Develop a system for keeping and using financial records a. Utilize a system to record income and spending for categories such as purchases, services, and taxes b. Demonstrate recordkeeping that utilizes digital financial management systems
4540.D3.4	Analyze services of financial institutions a. Evaluate different payment methods, including cash, checks, stored-value cards, debit cards, credit cards, and electronic or online payment systems b. Demonstrate skill in basic financial tasks (such as bill payments, check writing, reconciling checking and debit account statements, and monitoring printed and online account statements for accuracy) c. Investigate and demonstrate ability to apply for financial assistance (such as FAFSA, 21st Century Scholars, scholarships, grants, and aid from colleges and universities) for post-secondary education
4540.D3.5	Apply consumer skills to purchase decisions a. Evaluate impact of external factors (such as marketing, advertising and the economy) on spending decisions b. Justify consumer buying decisions by evaluating external factors c. Evaluate opportunity costs (such as owning versus renting a house, purchasing or leasing an auto)

Next Level Programs of Study

Review Document

	d. Recognize potential threats (such as identity fraud, scams, theft, phishing, spam, unethical internet practices) to sound financial decisions
4540.D3.6	Connect the role of charitable giving, volunteer service, and philanthropy to community development and quality of life a. Demonstrate budgeting financial and other resources to make contributions to a charitable organization
4540.D3.7	Examine the purpose and value of estate planning a. Contrast wills, "living wills," trusts and other ways estates can be transferred b. Evaluate estate planning tools (such as pensions, retirements, social security, trusts, and annuities)
Domain	Managing Credit and Debt
4540.D4.1	Students manage credit and debt to remain both creditworthy and financially secure
4540.D4.2	Analyze the costs and benefits of using various types of credit such as student loans, home and automotive loans, and credit cards a. Evaluate the cost of borrowing a set amount of money using various types of credit b. Explain how grace periods, methods of calculating interest, and fees affect borrowing costs c. Apply systematic decision making to identify the most cost-effective option for making a purchase
4540.D4.3	Analyze factors that influence establishing and maintaining a good credit rating a. Analyze the effect of positive and negative credit reports on credit worthiness b. Illustrate steps to overcome a negative credit report and improve a personal financial future
4540.D4.4	Analyze methods and benefits of avoiding or correcting credit and debt problems a. Evaluate the effect of living beyond one's financial resources b. Analyze actions that a consumer can take to reduce or better manage excessive debt
4540.D4.5	Analyze major consumer credit laws and the changing nature of these laws. a. Analyze online and printed resources for up-to-date information about consumer credit rights b. Describe debtors' and creditors' rights related to debt that is not paid
Domain	Risk Management and Investment
4540.D5.1	Students analyze the features of insurance, its role in balancing risk and benefit in financial planning
4540.D5.2	Examine various types of financial risk and risk management strategies a. Describe ways people can manage risk through avoidance, reduction, retention, assumption, and transfer of risk
4540.D5.3	Examine the purposes, types, and costs associated with insurance a. Analyze the types and amounts of coverage, and features needed, for various stages of life for health, property, life, disability, and liability insurance b. Analyze factors that can reduce or increase the amount and type of insurance coverage needed. c. Analyze factors that affect cost of insurance for various types of insurance
Domain	Saving and Investing
4540.D6.1	Students analyze saving and investing to build long-term financial security and wealth

Next Level Programs of Study

Review Document

4540.D6.2	Evaluate how saving contributes to financial wellbeing a. Analyze effect of saving strategies, including "pay yourself first," payroll deduction, automatic savings options, and reflective spending practices on financial well-being b. Compare the interest generated by simple and compound interest at various rates
4540.D6.3	Apply strategies for creating wealth and building assets a. Compare various investing strategies for their potential to build wealth b. Analyze investment possibilities utilizing the principles of time value of money and opportunity costs c. Calculate the end value of lump sum and periodic investments
4540.D6.4	Compare saving and investment alternatives a. Analyze the characteristics (such as earnings, risks, liquidity) and benefits of various saving and investment options in the current economy b. Analyze investment alternatives utilizing principles of inflation and other economic factors
4540.D6.5	Describe how to buy and sell investments a. Compare advantages and disadvantages of buying and selling investments through various channels, including financial advisors, investment clubs, and online brokers b. Compare the investment objectives and historical rates of return of various Investment options
4540.D6.6	Analyze factors that affect the rate of return on investments a. Analyze the rate of return on investments using time value of money and economic conditions as factors b. Calculate the amount of taxes on investments and income tax-free earnings
4540.D6.7	Analyze how agencies that regulate financial markets protect investors a. Explain how federal and state financial regulatory agencies decrease savings and investing risks b. Identify additional services and benefits of the Indiana Securities Division and other federal and state regulators

Adult Roles and Responsibilities (Applied Adult Roles and Responsibilities)	
Career Cluster	CTE
Program of Study	
NLPS Sequence	
Course Code	5330
Course Description	<i>Adult Roles and Responsibilities is recommended for all students as life foundations and academic enrichment, and as a career sequence course for students with interest in family and community services, personal and family finance, and similar areas. This course builds knowledge, skills, attitudes, and behaviors that students will need as they complete high school and prepare to take the next steps toward adulthood in today's society. The course includes the study of interpersonal standards, lifespan roles and responsibilities, individual and family resource management, and financial responsibility and resources. A project-based</i>

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Personal, Academic, and Career Success
5330.D1.1	Students integrate processes of thinking, communication, leadership, and management in order to apply knowledge and skills for adult roles and responsibilities
5330.D1.2	Demonstrate components of critical thinking, creative thinking, and reasoning
5330.D1.3	Evaluate effective communication processes in school, family, career, and community settings
5330.D1.4	Demonstrate leadership that encourages participation and respect for the ideas, perspectives, and contributions of group members
5330.D1.5	Apply management, decision-making, and problem-solving processes to accomplish tasks and fulfill responsibilities
5330.D1.6	Examine the interrelationships among thinking, communication, leadership, and management processes to address family, community, and workplace issues
5330.D1.7	Demonstrate fundamentals to career success (e.g. strong work ethic, time- management, positive attitude, adaptability/flexibility, stress resilience, accountability, self-discipline, resourcefulness, cooperation, self-assessment)
Domain	Interpersonal Standards
5330.D2.1	Analyze personal standards, needs, aptitudes, and goals and their impact on family, career, and community interactions
5330.D2.2	Examine effects of self-esteem and self-image on family relationships, community service, success in the workplace, and personal fulfillment
5330.D2.3	Determine personal standards and their effects on life choices
5330.D2.4	Examine impacts of needs and aptitudes on family and community interactions, choices, and personal fulfillment
5330.D2.5	Demonstrate strategies for goal setting and goal achievement
Domain	Lifespan Roles and Responsibilities
5330.D3.1	Integrate multiple lifespan roles and responsibilities in family, career, and community settings
5330.D3.2	Analyze interrelationships and determine strategies for managing multiple roles and responsibilities in family, career, and community
5330.D3.3	Evaluate positive and productive ways of behaving and relating to others in family, career, and community settings
5330.D3.4	Analyze and promote parenting roles, responsibilities, and practices that maximize human growth and development
5330.D3.5	Develop a life plan, including means for acquiring the knowledge and skills needed to achieve individual, family, and career goals
Domain	Individual and Family Resource Management
5330.D4.1	Demonstrate management of individual and family resources, including food, clothing, shelter,

Next Level Programs of Study

Review Document

	and transportation
5330.D4.2	Demonstrate processes used to set standards, make choices, and satisfy needs and wants in areas such as nutrition, wellness, clothing, housing, and transportation
5330.D4.3	Demonstrate skills in seeking consumer information, taking consumer responsibility, and exercising consumer rights
5330.D4.4	Determine individual and family responsibilities in conserving, reusing, and recycling resources to maintain the environment
5330.D4.5	Apply technology and examine its impact on quality of life and family resources
Domain	Financial Responsibility and Decision Making
5330.D5.1	Demonstrate management of individual and family finances by applying reliable information and systematic decision making
5330.D5.2	Demonstrate taking responsibility for personal financial decisions
5330.D5.3	Analyze financial information from a variety of reliable and questionable sources
5330.D5.4	Utilize consumer protection laws and resources
5330.D5.5	Manage credit and debt to remain both creditworthy and financially secure
5330.D5.6	Analyze the features of insurance, its role in balancing risk and benefits in financial planning
5330.D5.7	Analyze saving and investing to build long-term financial security and wealth
Domain	Relating Income and Careers
5330.D6.1	Analyze how education, income, career, and life choices relate to achieving financial goals
5330.D6.2	Describe how personal factors, career choices, and economic conditions affect income
5330.D6.3	Identify sources of personal income
5330.D6.4	Explain how taxes and employee benefits relate to disposable income
Domain	Planning and Managing Money
5330.D7.1	Manage money effectively by developing financial goals and budgets
5330.D7.2	Develop a personal financial plan to demonstrate the ability to use money management skills and strategies
5330.D7.3	Develop a system for keeping and using financial records
5330.D7.4	Analyze services of financial institutions
5330.D7.5	Apply consumer skills to purchase decisions
5330.D7.6	Connect the role of charitable giving, volunteer service, and philanthropy to community development and quality of life
5330.D7.7	Examine the purpose and value of estate planning
Domain	Managing Credit and Debt
5330.D8.1	Manage credit and debt to remain both creditworthy and financially secure
5330.D8.2	Analyze the costs and benefits of using various types of credit such as student loans, home and automotive loans, and credit cards
5330.D8.3	Analyze factors that influence establishing and maintaining a good credit rating
5330.D8.4	Analyze methods and benefits of avoiding or correcting credit and debt problems

Next Level Programs of Study

5330.D8.5	Analyze major consumer credit laws and the changing nature of these laws
Domain	Risk Management and Insurance
5330.D9.1	Analyze the features of insurance, its role in balancing risk and benefits in financial planning
5330.D9.2	Examine various types of financial risk and risk management strategies
5330.D9.3	Examine the purposes, types, and costs associated with insurance
Domain	Saving and Investing
5330.D10.1	Analyze saving and investing to build long-term financial security and wealth
5330.D10.2	Evaluate how saving contributes to financial wellbeing
5330.D10.3	Apply strategies for creating wealth and building assets
5330.D10.4	Compare saving and investment alternatives
5330.D10.5	Describe how to buy and sell investments
5330.D10.6	Analyze factors that affect the rate of return on investments
5330.D10.7	Analyze how agencies that regulate financial markets protect investors

Consumer Economics (Applied Consumer Economics)	
Career Cluster	CTE
Program of Study	
NLPS Sequence	
Course Code	5334
Course Description	<i>Consumer Economics enables students to achieve high standards and competencies in economic principles in contexts of high relevancy and applicability to their individual, family, workplace, and community lives. A project-based approach that utilizes higher order thinking, communication, leadership, and management processes is recommended in order to integrate suggested topics into the study of consumer economics issues. The course focuses on interrelationships among economic principles and individual and family roles of exchanger, consumer, producer, saver, investor, and citizen. Economic principles to be studied include scarcity, supply and demand, market structure, the role of government, money and the role of financial institutions, labor productivity, economic stabilization, and trade. Depending on needs and resources, this course may be taught in a local program. In schools where it is taught, it is recommended for all students regardless of their career pathway, in order to build basic economics proficiencies.</i>

	management in order to apply family and consumer sciences knowledge and skills.
5334.D1.2	Demonstrate components of critical thinking, creative thinking, and reasoning.
5334.D1.3	Evaluate effective communication processes in school, family, career, and community settings.
5334.D1.4	Demonstrate leadership that encourages participation and respect for the ideas, perspectives, and contributions of group members.
5334.D1.5	Apply management, decision-making, and problem-solving processes to accomplish tasks and fulfill responsibilities.
5334.D1.6	Examine the interrelationships among thinking, communication, leadership, and management processes to address family, community, and workplace issues.
Domain	Individual and Family Economic Roles
5334.D2.1	Analyze economic actions and responsibilities of individuals and families in their roles as exchanger, consumer, investor, saver, producer, and citizen.
5334.D2.2	Examine interrelationships among standards, needs, wants, and goals of individuals and families and their economic roles as exchanger, consumer, investor, saver, producer, and citizen.
5334.D2.3	Assess and gain control of economic roles considering personal standards, wants, needs, and goals.
5334.D2.4	Assess the power of individuals and families to proactively choose how, when and in what ways they develop and exchange their human resources for money, goods, and services.
5334.D2.5	Examine interrelationships of standards, wants, needs, goals, and consumer satisfaction.
5334.D2.6	Analyze activities and institutions used to satisfy the consumer needs and wants of individuals and families.
5334.D2.7	Determine advantages and disadvantages of investing and saving for individuals, families, and society.
5334.D2.8	Examine investment and saving activities, institutions, and alternatives.
5334.D2.9	Investigate resources and activities used by families and individuals as producers to transform human and nonhuman resources into goods and services.
5334.D2.10	Demonstrate responsible citizenship and leadership in allocating individual, family, and community resources.
Domain	Scarcity
5334.D3.1	Explain that because of scarcity (unlimited wants and limited resources), economics systems must be developed by individuals, families, communities, and societies in order to determine how goods and services will be produced and distributed.
5334.D3.2	Appraise how consumers and producers confront the concepts of scarcity, choice, and opportunity cost.
5334.D3.3	Define each of the productive resources (natural, human, capital) and identify the returns on each for individuals, families, and communities.
5334.D3.4	Identify the characteristics of traditional, market, command, and mixed economies in families, communities, and societies.
5334.D3.5	Compare, contrast, and examine impacts on individuals, families, and communities as to how the traditional, market, command, and mixed economic systems answer the questions: What

Review Document

	to produce? How to produce it? For whom to produce it?
5334.D3.6	Use a production possibilities curve to explain the concepts of choice, scarcity, opportunity cost, tradeoffs, unemployment, productivity, and growth, as applied to individual, family, and community economic roles.
5334.D3.7	Identify and explain how individuals and families practice and are affected by the basic economic goals of freedom, efficiency, equity, security, and growth.
5334.D3.8	Develop and apply a decision-making model to solve economic problems in individual, family, and community settings.
Domain	Supply and Demand
5334.D4.1	Analyze the role that supply, and demand, prices, and profits play in determining what individuals, families, businesses, communities, and societies produce and distribute in a market economy.
5334.D4.2	Demonstrate how supply and demand determine equilibrium price and quantity in the product, resource, and financial markets.
5334.D4.3	Predict factors that would cause changes in market supply and demand and their impacts on individuals, families, businesses, and communities.
5334.D4.4	Apply the laws of supply and demand in individual, family, and community situations.
5334.D4.5	Demonstrate how government wage and price controls create shortages and surpluses for individuals, families, communities, and society.
5334.D4.6	Explain the functions of profit in a market economy.
5334.D4.7	Use the concepts of price elasticity of demand and supply to explain and predict changes in quantity as price changes.
5334.D4.8	Explain how consumers ultimately determine what is produced in a market economy (consumer sovereignty).
Domain	Market Structure
5334.D5.1	Describe the organization and role of the firm, analyze the various types of market structures in the United States economy, and assess their impacts on individuals, families, businesses, communities, and society.
5334.D5.2	Compare and contrast the following forms of business organization: sole proprietorship, partnership, and corporation.
5334.D5.3	Identify the three basic ways that firms finance operations (retained earnings, stock issues, and borrowing), and explain the advantages and disadvantages of each.
5334.D5.4	Explain ways that firms engage in price and non-price competition and how this affects individuals, families, and communities.
5334.D5.5	Identify laws and regulations adopted in the United States to promote competition among firms. Explain how the effects of these laws have sometimes reduced competition and the impacts of this on individuals, families, and communities.
5334.D5.6	Describe the benefits of natural monopolies (economies of scale) and the purposes of government regulation of these monopolies (such as utilities).
5334.D5.7	Define cartels and explain how cartel collusion affects product price and output.
Domain	Role of Government

Next Level Programs of Study

Review Document

5334.D6.1	Examine government roles and actions in a market economy and their effects on individuals, families, businesses, communities, and society.
5334.D6.2	List and explain the basic functions of government in a market economy.
5334.D6.3	Identify categories of goods and services provided by various levels of government and the roles of individuals, families, and communities in selecting, supporting, producing, and using these goods and services.
5334.D6.4	Explain how government responds to positive and negative externalities in the economy.
5334.D6.5	Describe major expense and income categories and their respective proportions of state and federal budgets.
5334.D6.6	Describe different types of taxes including income, sales, property, and social security, and determine whether they are progressive, proportional, or regressive.
5334.D6.7	Assess the impact of specific progressive, proportional, and regressive taxes on individuals, families, and communities with different economic characteristics.
5334.D6.8	Assess current and future impacts of recent trends in the federal budget deficit and the national debt on individuals, families, and the national economy.
5334.D6.9	Appraise recent trends in state and federal spending and taxation and analyze the cause of recent federal budget deficits.
Domain	<i>Money and the Role of Financial Institutions</i>
5334.D7.1	Examine the role of money and financial institutions in a market economy and their impacts on individuals, families, businesses, communities, and society.
5334.D7.2	Analyze and explain the basic functions of money for individuals, families, communities, and society.
5334.D7.3	Identify the composition of the money supply in the United States.
5334.D7.4	Explain the role of banks and other financial institutions in the economy of the United States and in the day-to-day activities of individuals, families, and communities.
5334.D7.5	Describe the organization, functions, and impacts of the Federal Reserve System.
5334.D7.6	Demonstrate how banks create money through the principle of fractional reserve banking, and explain the impacts of this practice on individuals, families, and communities.
5334.D7.7	Identify different causes of inflation. Determine who gains and losses by inflation using individual, family, and community examples.
5334.D7.8	Compare and contrast services available to individuals and families from financial institutions (e.g. credit, savings, and investment).
Domain	<i>Labor Productivity</i>
5334.D8.1	Explain the importance of labor productivity to individuals, families, communities, firms, and nations by explaining how labor productivity affects income, production, costs, and standard of living.
5334.D8.2	Define labor productivity; identify basic factors (technology, education and training, specialization) which affect productivity.
5334.D8.3	Explain how increases in labor productivity improve wages and standards of living for individuals, families, communities, and society.
5334.D8.4	Explain how individual and family decisions to create and purchase new capital goods or to

Next Level Programs of Study

Review Document

	invest in education and training involves a trade-off of fewer consumer goods or services in the present in return for higher future labor productivity.
5334.D8.5	Explain and give individual, family, community, and society examples of economies of scale.
5334.D8.6	Explain ways that employers and employees have worked together to improve business productivity.
5334.D8.7	Compare and contrast labor productivity trends in the United States and other developed countries.
5334.D8.8	Demonstrate how government expenditures, regulations, and tax policy can influence labor productivity.
5334.D8.9	Compare and contrast how market and nonmarket forces (such as union activity, family friendly policies) influence wage rates and labor productivity.
Domain	Economic Stabilization
5334.D9.1	Describe economic stabilization policies, how they impact the economy, and how they influence and are influenced by individuals, families, businesses, communities, and society.
5334.D9.2	Define/explain the following concepts and their interrelationships with the economic roles and activities of individuals, families, and communities: fiscal policy, monetary policy, aggregate supply and demand, unemployment, gross domestic product.
5334.D9.3	Explain the four phases of the business cycle: expansion, peak, contraction, and recession.
5334.D9.4	Explain how the relationship between aggregate supply and aggregate demand is an important determinant of the levels of unemployment and inflation in an economy.
5334.D9.5	Explain how the government uses taxing and spending decision (fiscal policy) to promote price stability, maximum employment, and economic growth.
5334.D9.6	Explain the limitations of using Gross Domestic Product (GDP) to measure economic welfare.
5334.D9.7	Explain how the Federal Reserve uses monetary tools to promote price stability, maximum employment, and economic growth.
5334.D9.8	Explain how monetary policy affects the level of inflation in the economy.
Domain	Trade
5334.D10.1	Explain why nations trade goods and services and explain the impact of trade on the economies of the nations involved.
5334.D10.2	Define/explain the following concepts, with an emphasis on individual, family, and community applications and impacts: absolute advantage, comparative advantage, quotas, tariffs, exchange rates, balance of payments, balance of trade, trade deficit.
5334.D10.3	Explain the benefits of trade among individuals, families, businesses, communities, regions, and nations.
5334.D10.4	Explain why countries sometimes erect barriers to trade.
5334.D10.5	Summarize the arguments for and against free trade.
5334.D10.6	Explain the difference between balance of trade and balance of payments.
5334.D10.7	Explain fluctuations in currency exchange rates and how these fluctuations affect trade.
5334.D10.8	Describe impacts of trade agreements such as the North Atlantic Free Trade Agreement (NAFTA) and the General Agreement on Tariffs and Trade (GATT) on individuals, families,

Advanced Nutrition and Wellness	
Career Cluster	CTE
Program of Study	
NLPS Sequence	Introductory
Course Code	5340
Course Description	<i>Advanced Nutrition and Wellness is a course which provides an extensive study of nutrition. This course is recommended for all students wanting to improve their nutrition and learn how nutrition affects the body across the lifespan. Advanced Nutrition and Wellness is an especially appropriate course for students interested in careers in the medical field, athletic training and dietetics. This course builds on the foundation established in Nutrition and Wellness, which is a required prerequisite. This is a project-based course utilizing higher-order thinking, communication, leadership and management processes. Topics include extensive study of major nutrients, nutritional standards across the lifespan, influences on nutrition/food choices, technological and scientific influences, and career exploration in this field. Laboratory experiences will be utilized to develop food handling and preparation skills; attention will be given to nutrition, food safety, and sanitation. This course is the second in a sequence of courses that provide a foundation for continuing and postsecondary education in all career areas related to nutrition, food, and wellness.</i>
Prerequisite(s)/ Corequisite(s)	None Recommended: Nutrition and Wellness

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Personal, Academic, and Career Success
5340.D1.1	Integrate processes of thinking, communication, leadership, and management in order to apply knowledge and skills for nutrition, food, and wellness.
5340.D1.2	Demonstrate components of critical thinking, creative thinking, and reasoning.
5340.D1.3	Evaluate effective communication processes in school, family, career, and community settings.
5340.D1.4	Demonstrate leadership that encourages participation and respect for the ideas, perspectives, and contributions of group members.
5340.D1.5	Apply management, decision-making, and problem-solving processes to accomplish tasks and fulfill responsibilities.
5340.D1.6	Examine the interrelationships among thinking, communication, leadership, and management processes to address family, community, and workplace issues.
5340.D1.7	Demonstrate fundamentals to career success (e.g. strong work ethic, time- management, positive attitude, adaptability/flexibility, stress resilience, accountability, self-discipline, resourcefulness, cooperation, self-assessment).
Domain	Nutrition Principles
5340.D2.1	Synthesize physiological functions, requirements, and food sources for each of the major nutrients (protein, carbohydrates, fats, vitamins, minerals, and water).
5340.D2.2	Research the physiological functions of the major nutrients for the body (protein, carbohydrates, fats, vitamins, minerals, and water).
5340.D2.3	Recommend food sources following dietary guidelines for each of the major nutrients.
5340.D2.4	Analyze variations in daily dietary requirements of each nutrient in order to meet nutrition needs across the life span and for special dietary needs.
5340.D2.5	Predict the physiological consequences of an excessive or an insufficient amount of each nutrient in the diet.

Next Level Programs of Study

Review Document

5340.D2.6	Develop and create meals and snacks offering a variety of foods which supply each major nutrient.
Domain	<i>Nutrition Applications Across the Lifespan</i>
5340.D3.1	Analyze different ways that nutrition affects the body across the lifespan.
5340.D3.2	Evaluate standards for maintaining healthy nutrition across the life span (e.g., Choose YourPlate.gov, dietary guidelines, portion/serving sizes, nutrition labels).
5340.D3.3	Differentiate among various nutrition guidelines for different age groups and dietary needs (e.g., children, elderly, pregnant women, athletes, diabetics; individuals who are lactose-intolerant, require a gluten free diet, and/or have food allergies).
5340.D3.4	Develop and create healthy meals and snacks address individual and family resources, activities, and preferences (e.g., time constraints, financial and equipment limitations, extent of physical activity, dietary preferences such as vegetarian).
5340.D3.5	Develop individual nutrition and physical activity goals, reevaluating those goals and modifying them across the lifespan as needed.
5340.D3.6	Predict outcomes to nutrition challenges related to eating disorders, fad diets, and other factors relating to nutrition.
Domain	<i>Influences on Nutrition and Wellness</i>
5340.D4.1	Explore ways that families, culture, communities, and governments influence nutrition and health of individuals.
5340.D4.2	Examine cultural and ethnical influences on individual food choices, dietary patterns, and practices.
5340.D4.3	Determine economic and governmental influences on food choices/availability and nutritional practices through legislation and regulations.
5340.D4.4	Discover various international cuisines and their influence on eating patterns.
5340.D4.5	Demonstrate appropriate etiquette for business and social situations.
5340.D4.6	Research government and community programs that support nutritional needs of individuals and families (e.g., Family Nutrition Program [FNP]; food co-ops; food pantries; Supplemental Nutrition and Purchasing [SNAP]; Women, Infants, and Children program [WIC]).
Domain	<i>Food Preparation, Safety, and Handling</i>
5340.D5.1	Implement principles of food acquisition, handling, and preparation.
5340.D5.2	Select, adapt, and prepare recipes to increase healthy aspects and accommodate specific dietary needs (e.g., energy needs, diabetes, lactose intolerance, celiac disease, food allergies).
5340.D5.3	Demonstrate proper food preparation skills, selection, and storage of food.
5340.D5.4	Select and apply safety and sanitation practices that promote personal safety, food safety, and prevention of food borne illnesses.
Domain	<i>Science and Technology in Foods and Nutrition</i>
5340.D6.1	Explore impacts of science and technology on nutrition and foods.
5340.D6.2	Determine impacts of technology, Internet, and social media as related to food choices, nutrient content, availability, and safety of food supply.
5340.D6.3	Apply information about current nutrition and food trends and issues, such as “farm to table,”

	food availability, organic food, and holistic eating practices.
5340.D6.4	Utilize available technological tools that support healthy nutrition practices (e.g., online programs and applications to calculate calories, dietary exchanges, and physical activity; www.ChooseMyPlate.gov ; and others).
5340.D6.5	Examine and propose marketing practices that promote food production, choice/availability, and purchasing.
Domain	Career Exploration in Nutrition, Food, and Wellness
5340.D7.1	Investigate career pathways, education, and training in areas related to nutrition, food, and wellness.
5340.D7.2	Examine potential career paths, trends, and job market opportunities related to nutrition, food, and wellness.
5340.D7.3	Determine roles and functions; knowledge, skills, and attitudes; and rewards and demands associated with various careers and levels of employment related to nutrition, food, and wellness.
5340.D7.4	Analyze personal qualifications, interests, values, and educational preparation required for careers and employment in nutrition, food, and wellness-related industries.
5340.D7.5	Identify volunteer roles, part-time jobs, and entry-level positions that offer opportunities to explore careers related to nutrition, food, and wellness.

Nutrition and Wellness (Applied Nutrition and Wellness)	
Career Cluster	CTE
Program of Study	
NLPS Sequence	Introductory
Course Code	5342
Course Description	<i>Nutrition and Wellness is an introductory course valuable for all students as a life foundation and academic enrichment; it is especially relevant for students interested in careers related to nutrition, food, and wellness. This is a nutrition class that introduces students to only the basics of food preparation so they can become self-sufficient in accessing healthy and nutritious foods. Major course topics include nutrition principles and applications; influences on nutrition and wellness; food preparation, safety, and sanitation; and science, technology, and careers in nutrition and wellness. A project-based approach that utilizes higher order thinking, communication, leadership, management processes, and fundamentals to college and career success is recommended in order to integrate these topics into the study of nutrition, food, and wellness. Food preparation experiences are a required component. Direct, concrete mathematics and language arts proficiencies will be applied. This course is the first in a sequence of courses that provide a foundation for continuing and postsecondary education in all career areas related to nutrition, food, and wellness.</i>
Prerequisite(s)/ Corequisite(s)	None

Credits	1 credit per semester, 1 credit maximum
Counts Toward	<ul style="list-style-type: none"> Counts as a directed elective or elective for all diplomas Qualifies as one of the FACS courses a student can take to waive the Health & Wellness graduation requirement. To qualify for the Health and Wellness waiver, a student must take three of the approved courses. For more information, see 511 IAC 6-7.1-4(c)(6). Local programs have the option of offering a second version of the course that is focused more on the fitness aspects of wellness and nutrition. This version may be taught within the family and consumer sciences department, or it may be interdisciplinary, and team taught or co-taught with a teacher licensed in physical education. Such a course may be differentiated from the regular course offering by using subtitles in addition to Nutrition and Wellness. A student may earn credits for multiple versions of the course. No waiver is required in this instance.
Dual Credit Status

5342.D1.4	Demonstrate leadership that encourages participation and respect for the ideas, perspectives, and contributions of group members
5342.D1.5	Apply management, decision-making, and problem-solving processes to accomplish tasks and fulfill responsibilities
5342.D1.6	Examine the interrelationships among thinking, communication, leadership, and management processes to address family, community, and workplace issues
5342.D1.7	Demonstrate fundamentals to career success (e.g. strong work ethic, goal setting, time-management, positive attitude, adaptability/flexibility, stress resilience, accountability, self-discipline, resourcefulness, cooperation, self-assessment)
5342.D1.8	Demonstrate etiquette skills for business and social situations
5342.D1.9	Apply knowledge gained through research to solve problems and communicate ideas in the fields of food, fitness, nutrition, and wellness
Domain	<i>Nutrition Principles and Applications</i>
5342.D2.1	Apply nutrition principles to health and wellness choices across the life span
5342.D2.2	Analyze food and nutrition information, including USDA Dietary guidelines and MY Plate, to meet nutrition and wellness goals across the lifespan
5342.D2.3	Demonstrate proper portion sizes from each of the food groups to meet nutrition and wellness needs of individuals across the lifespan
5342.D2.4	Describe the six classes/groups of nutrients, explain their functions to meet health and nutrition requirements of individuals and families, and classify food sources
5342.D2.5	Compare food label information to make health and wellness choices

Next Level Programs of Study

Review Document

5342.D2.6	Analyze and assess wellness goals across the lifespan, particularly for teenagers (e.g., food fads and fallacies, extreme procedures for weight management, sports supplements, nutritional supplements)
Domain	<i>Influences on Nutrition and Wellness</i>
5342.D3.1	Analyze factors that influence nutrition and wellness practices
5342.D3.2	Assess physical, emotional, social, intellectual, cultural, and ethnic components of individual and family wellness
5342.D3.3	Explain how geographical location and climate location affects food selection and availability
5342.D3.4	Examine how economic factors affect food selection and availability
5342.D3.5	Identify legislation and regulations related to food, nutrition, and wellness issues
5342.D3.6	Evaluate the nutritive value and costs of snacks, fast foods, and balanced meals
Domain	<i>Food Preparation, Safety, and Handling</i>
5342.D4.1	Demonstrate abilities to prepare and serve safe, nutritious foods
5342.D4.2	Define and explain food borne illness and demonstrate how to prevent them by applying the concepts of “clean, separate, cook, and chill”
5342.D4.3	Demonstrate basic abilities to safely use and maintain equipment within a kitchen setting, including large and small appliances, small kitchen tools, measuring tools, and knives
5342.D4.4	Demonstrate abilities to prepare nutritious foods using a variety of basic methods and techniques
5342.D4.5	Apply basic principles of resource management when planning, preparing, and serving nutritious food, including food costs and availability, work plans and timetables, efficient work methods, and collaboration with others
5342.D4.6	Demonstrate abilities to increase and decrease recipe measurements based on desired yield
Domain	<i>Science, Technology, and Careers in Nutrition and Wellness</i>
5342.D5.1	Analyze impacts of science, technology, and careers on nutrition and wellness
5342.D5.2	Discuss current technology and techniques used to develop, produce, process, and store foods and their impacts on food safety, nutrition, and wellness (e.g., organic, holistic, genetics, hormones)
5342.D5.3	Explore technological tools and advancements used to track nutrition and wellness goals and progress
5342.D5.4	Examine developments and trends in food marketing, and their impacts on family and consumer choices
5342.D5.5	Discuss trends, employment opportunities, and preparation requirements for careers related to nutrition, food, and wellness

Advanced Child Development

5360.D1.1	Students will integrate processes of thinking, communication, leadership, and management to apply child development knowledge and skills.
5360.D1.2	Demonstrate components of critical thinking, creative thinking, and reasoning.
5360.D1.3	Evaluate effective communication processes in school, family, career, and community setting.
5360.D1.4	Demonstrate leadership that encourages participation and respect for the ideas, perspectives, and contributions of group members.
5360.D1.5	Apply management, decision-making, and problem-solving processes to accomplish tasks and fulfill responsibilities.
5360.D1.6	Examine the interrelationships among thinking, communication, leadership, and management processes to address family, community, and workplace issues.
5360.D1.7	Demonstrate fundamentals to college and career success (e.g. strong work ethic, time-management, positive attitude, adaptability/flexibility, stress resilience, accountability, self-discipline, resourcefulness, cooperation, self-assessment).
Domain	<i>Professional and Ethical Issues in Child Development</i>
5360.D2.1	Incorporate established professional and ethical standards related to working with children and their families to promote optimum development in safe and healthy environments.
5360.D2.2	Utilize emerging technologies responsibly to enhance child-related interactions and careers.
5360.D2.3	Apply professional codes of conduct for interacting with children, their families, and co-workers (i.e., the NAEYC Code of Ethical Conduct).
5360.D2.4	Devise standards and demonstrate techniques for positive, collaborative relationships with children, their families, and co-workers.
Domain	<i>Child Growth and Development</i>
5360.D3.1	Analyze human growth and development of children ages four to eight.

Next Level Programs of Study

Review Document

5360.D3.2	Examine physical, intellectual, emotional, social, and moral s domains of human growth and development, ages four to eight.
5360.D3.3	Investigate impacts of heredity and environment on growth and development of children, ages four to eight.
5360.D3.4	Assess effects of nutrition on the growth and development of children, ages four to eight.
5360.D3.5	Examine how gender, ethnicity, and life events relate to the child’s development, ages four to eight.
Domain	<i>Child Development Theories, Research, and Best Practices</i>
5360.D4.1	Choose positive approaches for creating a nurturing environment for children ages four to eight based on accepted child development theories, research, and best practices.
5360.D4.2	Examine roles and responsibilities of the family unit, caregivers, and educators for nurturing children, providing children with a stimulating environment, and transmitting societal expectations, culture, and traditions to children.
5360.D4.3	Examine policies, issues, and trends in the workplace, community, nation, and world that impact children and child nurturing practices.
5360.D4.4	Analyze impacts of social, economic, technological, and environmental forces, including media and marketing, on adult actions related to children and on child growth and development.
5360.D4.5	Examine laws and legal issues that impact children, parents, care givers, child educators, and child nurturing practices.
5360.D4.6	Determine strategies for advocating on behalf of children and families in areas such as childcare, prevention of child abuse and neglect, and parental support.
Domain	<i>Child Health and Wellness</i>
5360.D5.1	Demonstrate practices, including resource management processes, which promote the well-being and development of children ages four to eight.
5360.D5.2	Examine the use of family resources in making choices that satisfy the needs and wants of children.
5360.D5.3	Design strategies to meet nutrition requirements and provide safe and nutritious food for children.
5360.D5.4	Provide a safe and supportive environment through developmentally appropriate clothing, housing, furnishings, toys, equipment, and modes of transportation.
5360.D5.5	Examine information and analyze options for health and wellness practices to enhance long-term well-being and development of children.
5360.D5.6	Identify available community services and resources, including financial resources that contribute to the long-term well-being and development of children.
Domain	<i>Teaching and Guiding Children</i>
5360.D6.1	Evaluate and implement developmentally appropriate teaching practices and guidance to enhance children’s growth and development ages four to eight.
5360.D6.2	Assess strategies that promote physical, emotional, social, intellectual, cultural, and moral development of children.
5360.D6.3	Analyze components of an integrated curriculum that incorporate a child's language, learning styles, home experiences, and cultural values.

Next Level Programs of Study

Review Document

5360.D6.4	Demonstrate respect for diversity with sensitivity to anti-bias, gender equity, age, culture, and ethnicity related to children, parenting, and child nurturing practices.
5360.D6.5	Choose positive guidance and discipline practices that promote child growth and development.
5360.D6.6	Formulate nonviolent, proactive strategies to prevent and manage conflict between children and between adults and children, including bullying.
5360.D6.7	Access, evaluate, and utilize current and emerging research related to child growth and development related to early childhood practices and procedures.
Domain	<i>Special Conditions Affecting Children</i>
5360.D7.1	Explore factors affecting children and families with a variety of special (economic, physical, emotional, intellectual, and societal) conditions and the resources available to children and families dealing with these factors.
5360.D7.2	Examine characteristics, needs, and interventions related to children with special needs, such as those who are academically gifted; have learning, emotional, and physical difficulties; and experience developmental delays
5360.D7.3	Investigate inherited and environmental conditions which adversely affect children and determine interventions to provide a safe and secure environment for children.
5360.D7.4	Determine situations that require crisis intervention and community services available to provide this intervention.
5360.D7.5	Identify support services and referral processes for children and families, including those from friends, family, community, and social agencies.
Domain	<i>Career Exploration in Child Development and Nurturing</i>
5360.D8.1	Investigate career pathways, education, and training in areas related to children, child development, and nurturing of children.
5360.D8.2	Examine potential career paths, trends, and job market opportunities in areas related to children, child development, and nurturing of children.
5360.D8.3	Determine roles and functions; knowledge, skills, and attitudes; and rewards and demands associated with various careers and levels of employment in areas related to children, child development, and nurturing of children.
5360.D8.4	Analyze personal qualifications, interests, values, and educational preparation required for careers and employment in areas related to children, child development, and nurturing of children.
5360.D8.5	Identify volunteer roles, part-time jobs, and entry-level positions that offer opportunities to explore careers related to children, child development, and nurturing of children.

5362.D1.4	Demonstrate leadership that encourages participation and respect for the ideas, perspectives, and contributions of group members.
5362.D1.5	Apply management, decision-making, and problem-solving processes to accomplish tasks and fulfill responsibilities.
5362.D1.6	Examine the interrelationships among thinking, communication, leadership, and management processes to address family, community, and workplace issues.
5362.D1.7	Demonstrate fundamentals to college and career success (e.g. strong work ethic, time-management, positive attitude, adaptability/flexibility, stress resilience, accountability, self-discipline, resourcefulness, cooperation, self-assessment).

Next Level Programs of Study

Review Document

5362.D1.8	Apply knowledge gained through research to solve problems and communicate ideas in fields related to child development.
Domain	<i>Conception, Prenatal Development, and Birth</i>
5362.D2.1	Analyze factors related to preparing for the birth of a child.
5362.D2.2	Examine biological processes related to conception, prenatal development, birth, and health of child and mother.
5362.D2.3	Evaluate physical, emotional, and environmental factors of prenatal development and birth in relation to the health of the parents and child.
5362.D2.4	Analyze legal, moral, and ethical impacts of technology related to the birth of a child (e.g., infertility issues, surrogacy, selective abortion due to health of unborn child or multiple births, stem cell usage, and others).
Domain	<i>Growth and Development of Children</i>
5362.D3.1	Analyze human growth and development from prenatal through age three.
5362.D3.2	Survey the history of child development, including prominent theorists.
5362.D3.3	Examine physical, intellectual, emotional, social, and moral domains of human growth and development of children across a range of birth through age three.
5362.D3.4	Investigate impacts and relationships of heredity and environment on prenatal and early childhood human growth and development.
5362.D3.5	Assess effects of pre-pregnancy, prenatal, and postnatal nutrition on health and wellness of mother and child.
5362.D3.6	Examine how gender, ethnicity, culture, and life events impact child development.
Domain	<i>Childcare Giving and Nurturing Practices</i>
5362.D4.1	Choose care giving practices and nurturing strategies that maximize growth and development of children.
5362.D4.2	Apply current and emerging research on human growth and development, including brain research, to assess nurturing practices.
5362.D4.3	Evaluate communication strategies that promote positive self-esteem in children.
5362.D4.4	Implement nurturing practices that support human growth and development of young children.
5362.D4.5	Analyze impacts of abuse and neglect on children and families and identify methods of prevention.
5362.D4.6	Examine nurturing practices unique to infants and young children with special needs.
Domain	<i>Support Systems for Parents and Caregivers</i>
5362.D5.1	Evaluate support systems that provide services for parents and caregivers.
5362.D5.2	Evaluate criteria for selecting and providing care and services, including preventative health care, for children.
5362.D5.3	Explain the importance of friends, family, and community relationships in supporting parents and caregivers.
5362.D5.4	Describe community resources, services, and opportunities that support parenting and nurturing.

Next Level Programs of Study

Review Document

5362.D5.5	Analyze current laws, regulations, and policies related to parenting and care giving.
5362.D5.6	Discuss careers that draw on knowledge of children, child development, and nurturing of children.

Course Description	<i>Human Development and Wellness is valuable for all students as a life foundation and academic enrichment. It is especially relevant for students interested in careers impacted by individuals' physical, social, emotional, and moral development and wellness across the lifespan. Major topics include principles of human development and wellness, impacts of family on human development and wellness, factors that affect human development and wellness, practices that promote human development and wellness, managing resources and services related to human development and wellness, and career exploration in human development and wellness. Life events and contemporary issues addressed in this course include (but are not limited to) change, stress, abuse, personal safety, and relationships among lifestyle choices, health and wellness conditions, and diseases. A project-based approach that utilizes higher order thinking, communication, leadership, and management processes is recommended in order to integrate the study of these topics. Authentic applications through service learning are encouraged.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 to 2 semester course, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas Qualifies as one of the FACS courses a student can take to waive the Health & Wellness graduation requirement. To qualify for the Health and Wellness waiver, a student must take three of the approved courses. For more information, see 511 IAC 6-7.1-4(c)(6).
Dual Credit Status	
Additional Notes	When offered as applied: 2 units maximum; counts as an employability applied unit for alternate diploma

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Personal, Academic, and Career Success</i>
5364.D1.1	Integrate processes of thinking, communication, leadership, and management to apply interpersonal relationships knowledge and skills.
5364.D1.2	Evaluate effective communication processes in school, family, career, and community settings.
5364.D1.3	Demonstrate leadership that encourages participation and respect for the ideas, perspectives, and contributions of group members.
5364.D1.4	Apply management, decision-making, and problem-solving processes to accomplish tasks and fulfill responsibilities.
5364.D1.5	Examine interrelationships among thinking, communication, leadership, and management processes to address individual, family, community, and workplace issues.
5364.D1.6	Demonstrate fundamentals to college and career success (e.g. strong work ethic, time-management, positive attitude, adaptability/flexibility, stress resilience, accountability, self-discipline, resourcefulness, cooperation, self-assessment).
5364.D1.7	Apply standards of ethical behavior when making judgments or taking personal actions.
5364.D1.8	Apply knowledge gained through research to solve problems and communicate ideas in fields related to interpersonal relationships.
Domain	<i>Building and Maintaining Relationships</i>
5364.D2.1	Examine processes for building and maintaining various types of relationships in career, community, and family settings.

Next Level Programs of Study

Review Document

5364.D2.2	Analyze purposes and expectations of various types of relationships in career, community, and family settings.
5364.D2.3	Explore impacts of multiple life roles and responsibilities on relationships.
5364.D2.4	Examine and contrast characteristics and consequences of healthy and unhealthy relationships in career, community, and family settings.
5364.D2.5	Distinguish codes of conduct and their impacts on relationships in career, community, and family settings
5364.D2.6	Discuss careers that draw on knowledge and skills for interacting with people.
Domain	Impacts of Individual Needs and Personal Characteristics
5364.D3.1	Evaluate individual needs and personal characteristics and their impacts on interpersonal relationships.
5364.D3.2	Examine ways relationships are influenced by personal characteristics and stages of physical, intellectual, emotional, social, and moral development.
5364.D3.3	Evaluate influences of personal needs and wants and on relationships in career, community, and family settings.
5364.D3.4	Consider effects of self-esteem and self-image on relationships in career, community, and family settings.
5364.D3.5	Analyze impacts of personal standards and behaviors on relationships in career, community, and family settings.
5364.D3.6	Examine impacts of stress management on relationships in career, community, and family settings.
Domain	Communication Skills
5364.D4.1	Demonstrate communication skills that contribute to relationships in career, community, and family settings.
5364.D4.2	Describe basic components of the communication process (i.e., source, encoding, channel, decoding, receiver, feedback, context).
5364.D4.3	Evaluate and apply attitudes that contribute to effective communication in career, community, and family settings.
5364.D4.4	Demonstrate effective listening and feedback techniques and assess their influences on relationships in career, community, and family settings.
5364.D4.5	Analyze strategies to overcome communication barriers in career, community, and family settings.
5364.D4.6	Analyze principles of ethical communication in career, community, and family settings.
5364.D4.7	Assess impacts of selection and use of communication technologies on relationships in career, community, and family settings.
5364.D4.8	Choose appropriate communication methods and styles for business and social situations.
Domain	Conflict Prevention, Resolution, and Management
5364.D5.1	Evaluate effective conflict prevention, resolution, and management techniques.
5364.D5.2	Describe key components of preventing, resolving, and managing conflicts in career, community, and family settings.

Next Level Programs of Study

Review Document

5364.D5.3	Demonstrate effective responses to conflict and harassment in career, community, and family settings.
5364.D5.4	Implement strategies to increase tolerance of individual or group differences; prevent bullying, violence, and abuse; and encourage peaceful resolution of conflict in career, community, and family settings.
5364.D5.5	Assess community resources, services, and agencies that support conflict prevention, resolution, and management.
Domain	Leadership, Teamwork, and Collaboration
5364.D6.1	Demonstrate leadership, teamwork, and collaboration in career, community, and family settings.
5364.D6.2	Evaluate leadership styles and techniques, including democratic/collaborative and authoritarian, as used in career, community, and family settings.
5364.D6.3	Create an environment that encourages and respects the ideas, perspectives, and contributions of all group members in career, community, and family settings.
5364.D6.4	Demonstrate strategies to motivate, encourage, and build trust among group members in career, community, and family settings.
5364.D6.5	Demonstrate ways to organize and delegate responsibilities in career, community, and family settings.
5364.D6.6	Create strategies to integrate new members into the team in career, community, and family settings.
5364.D6.7	Demonstrate processes for cooperating, compromising, and collaborating in career, community, and family settings.

5366.D1.5	Apply management, decision-making, and problem-solving processes to accomplish tasks and fulfill responsibilities
5366.D1.6	Examine interrelationships among thinking, communication, leadership, and management processes to address family, community, and workplace issues
5366.D1.7	Demonstrate fundamentals to career success (e.g. strong work ethic, time- management, positive attitude, adaptability/flexibility, stress resilience, accountability, self-discipline, resourcefulness, cooperation, self-assessment)
Domain	<i>Principles of Human Development and Wellness</i>
5366.D2.1	Analyze principles and relationships among human development and wellness across the lifespan
5366.D2.2	Describe general patterns of physical, social, emotional, and moral development across the lifespan
5366.D2.3	Describe key developmental tasks of infancy, early childhood, middle childhood, adolescence, and early, middle, and late adulthood
5366.D2.4	Relate individual goals with developmental tasks across the lifespan, particularly during adolescence and adulthood
5366.D2.5	Identify and describe the basic components of wellness
Domain	<i>Impacts of Family on Human Development and Wellness</i>
5366.D3.1	Analyze principles of family development and wellness across the lifespan
5366.D3.2	Describe characteristics, advantages, concerns, and functions of various family structures in a diverse society
5366.D3.3	Describe characteristics and needs of individuals and families during various stages of the family life cycle
5366.D3.4	Analyze the effects of family as a system on the well-being of individuals and society
Domain	<i>Factors that Affect Human Development and Wellness</i>
5366.D4.1	Analyze factors that affect human development and wellness across the lifespan and evaluate one's own health and risk factors
5366.D4.2	Investigate impacts of hereditary, physical, psychological, biological, environmental, and social factors that influence human development and wellness across the lifespan, including intergenerational aspects
5366.D4.3	Examine connections among physical, emotional, social, and intellectual aspects of human development and wellness, including consequences of risky behaviors
5366.D4.4	Investigate effects of life events and contemporary issues on human development and wellness across the lifespan and stage of family life (i.e., unemployment, death, divorce, addictions, disorders, family violence, chronic illnesses, depression, stress, and other challenging issues)
5366.D4.5	Identify common defense mechanisms and patterns of reaction used by individuals and

	families in times of crisis (e.g., divorce, death, illness, unemployment, etc.)
5366.D4.6	Describe coping strategies that promote individual and family wellness in times of crisis
Domain	Practices that Promote Human Development and Wellness
5366.D5.1	Recommend and apply practices that promote human development and wellness throughout the lifespan
5366.D5.2	Demonstrate techniques for prevention and management of illness and disease, including healthy weight management
5366.D5.3	Demonstrate ways to handle stress and depression
5366.D5.4	Create plans for individual and family safety and for emergency response
5366.D5.5	Compare normal and abnormal conditions by identifying key components of assessments for wellness, including pulse and blood pressure measures; general, head- to-toe and 3-point assessments; and medical and health history
5366.D5.6	Recommend actions to take in cases of addictions, violence toward self and others, and other destructive actions
5366.D5.7	Establish and implement goals for individual wellness
Domain	Managing Health-Related Resources and Services
5366.D6.1	Investigate and evaluate external support systems that promote wellness practices
5366.D6.2	Evaluate current and emerging information related to human development and wellness
5366.D6.3	Survey and assess community resources, services, support groups, and opportunities that support human development and wellness when in a crisis situation (suicide, domestic violence, dating violence, bullying, death, chronic illness, etc.)
5366.D6.4	Describe the roles of social and medical support professionals, including mental health
Domain	Career Exploration in Human Development and Wellness
5366.D7.1	Investigate career pathways, education, and training in areas related to human development and wellness
5366.D7.2	Examine potential career paths, trends, and job market opportunities related to human development and wellness
5366.D7.3	Determine roles and functions; knowledge, skills, and attitudes; and rewards and demands associated with various careers and levels of employment related to human development and wellness
5366.D7.4	Analyze personal qualifications, interests, values, and educational preparation required for careers and employment in human development and wellness-related industries
5366.D7.5	Identify volunteer roles, part-time jobs, and entry-level positions that offer opportunities to explore careers related to human development and wellness

Preparing for College and Careers (PCC) (Applied Preparing for College and Careers)	
Career Cluster	CTE
Program of Study	
NLPS Sequence	
Course Code	5394
Course Description	<i>Preparing for College and Careers addresses the knowledge, skills, and behaviors all students need to be prepared for success in college, career, and life. The focus of the course is the impact of today's choices on tomorrow's possibilities. Topics to be addressed include twenty-first century life and career skills; higher order thinking, communication, leadership, and management processes; exploration of personal aptitudes, interests, values, and goals; examining multiple life roles and responsibilities as individuals and family members; planning and building employability skills; transferring school skills to life and work; and managing personal resources. This course includes reviewing the 16 national career clusters and Indiana's College and Career Pathways, in-depth investigation of one or more pathways, reviewing graduation plans, developing career plans, and developing personal and career portfolios. A project based approach, including computer and technology applications, cooperative ventures between school and community, simulations, and real world experiences is recommended.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 to 2 semester course, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas Qualifies as one of the FACS courses a student can take to waive the Heath & Wellness graduation requirement. CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Exploring self
5394.D1.1	Students evaluate personal characteristics to develop and refine a personal profile.
5394.D1.2	Identify and examine personal strengths, interests, mindsets and values about careers and work including personal motivation for work
5394.D1.3	Analyze personal aptitudes, traits, interests, attitudes, and skills and how these correlate to potential careers utilizing career exploration and research
5394.D1.4	Establish personal priorities and initial goals for life and career with attention to desired work environment, time commitment of careers of interest, etc.
5394.D1.5	Determine learning style preferences and how to apply these to lifelong learning
Domain	Exploring Careers
5394.D2.1	Students investigate one or more Career Clusters and Indiana’s College and Career Pathways, based on individual interests, to further define career goals.
5394.D2.2	Identify high wage, high demand industries in the state of Indiana and use technology and resources to research and organize information about why these careers are categorized as high wage, high demand
5394.D2.3	Determine roles, functions, education, and training requirements of various career options within one or more careers
5394.D2.4	Describe the various reasons people seek employment
5394.D2.5	Use appropriate technology and resources to research and organize information about careers
5394.D2.6	Analyze trends, job outlook, options, and entrepreneurial endeavors for selected careers
5394.D2.7	Evaluate careers of interest for education requirements, working conditions, benefits, and opportunities for growth and change
5394.D2.8	Use appropriate technology and resources to research and organize information about career pathways in current and emerging sectors including relevant education and training needed to pursue those careers

Next Level Programs of Study

Review Document

Domain	Exploring Postsecondary Options
5394.D3.1	Students analyze high school and postsecondary options to know what educational opportunities are available.
5394.D3.2	Understand high school credits, GPA calculations, and how these apply to postsecondary entrance/acceptance requirements
5394.D3.3	Examine available high school programs of study aligned to career interests
5394.D3.4	Demonstrate knowledge of available opportunities to earn college credits and industry credentials in high school
5394.D3.5	Understand what work-based learning is and the advantage of participating in high school
5394.D3.6	Demonstrate understanding of multiple postsecondary educational options including on-the-job training, short- and long-term technical certificate programs, apprenticeship, military and two- and four-year college programs, both public and private
5394.D3.7	Demonstrate knowledge of resources available to further explore various postsecondary opportunities
5394.D3.8	Demonstrate knowledge of the cost of postsecondary educational options and various financial aid options including career scholarship accounts
Domain	Making a Plan
5394.D4.1	Students create flexible plans of action for achieving personal goals for high school and postsecondary.
5394.D4.2	Analyze choices, options, and the impact of life and career decisions, acknowledging that decisions made at this grade level are not permanent
5394.D4.3	Apply a decision-making process to identify short- and long-term life and career goals
5394.D4.4	Apply knowledge of high school graduation requirements to create a 4-year high school graduation plan aligned to career goals
5394.D4.5	Apply knowledge from career and education research to create an individualized career plan that incorporates career opportunities, education and/or training requirements, and financial aid support
Domain	Success Skills
5394.D5.1	Students demonstrate skills needed for success in personal, family, community, and career aspects of life.
5394.D5.2	Describe what it means to be career ready (ready to be successful in a college level 1 st year course and ability to complete education and training to help you advance in a career)
5394.D5.3	Describe the key skills and traits needed for success in high school and beyond such as communication, collaboration, and work ethic and demonstrate these skills through various group projects and class presentations
5394.D5.4	Develop basic financial literacy skills such as saving, spending, budgets, interest, taxes, wages, salary, etc.
5394.D5.5	Understand how standards for attire, grooming, and etiquette shift depending on the setting you are in (home, school, work, etc.) and identify standards of attire in career fields of interest
5394.D5.6	Support communication and collaboration skills by incorporating diverse perspectives and experiences to meet project goals
5394.D5.7	Demonstrate fundamental skills using various technology resources and platforms when completing projects or delivering presentations (e.g., internet research, online career platforms, Microsoft Office Suite, Google Suite, Email, etc.)

Next Level Programs of Study

Review Document

5394.D5.8	Understand that digital literacy is a requirement of many careers and exhibit digital literacy skills through class projects, presentations, etc.
5394.D5.9	Understand that social media and other online platforms create a permanent digital footprint and use resources to determine consequences of digital footprints and how to use social media responsibly to limit negative consequences to future goals

Technical Math	
Career Cluster	CTE
Program of Study	
NLPS Sequence	Introductory
Course Code	7218
Course Description	<i>Technical Math is designed to help students develop mathematical reasoning and real-world skills in analyzing verbal and written descriptions, translating them into algebraic, geometric, trigonometric, and statistical statements and applying them to solve problems in fabrication, manufacturing, and business. The course will include at least six lab activities or projects to allow faculty and students to apply mathematics principles to work-related situations.</i>
Prerequisite(s)/ Corequisite(s)	Algebra I
Credits	1 or 2 semester course, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	When offered as applied: 2 units maximum; counts as an employability applied unit for alternate diploma

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Numerical and Proportional Reasoning</i>
7218.D1.1	Students will use number sense and proportional reasoning in real-world scenarios to make and communicate decisions in order to draw conclusions.
7218.D1.2	Use estimation to identify the most reasonable mathematical solution.
7218.D1.3	Use estimation and precision in real-world scenarios - know when, know how, (e.g., use benchmarks for estimating), know why.
7218.D1.4	Solve real-world problems and interpret results involving calculations with percentages, decimals, and fractions - conversions (e.g., percent to fraction or decimal, fraction to decimal or percent, decimal to fraction or percent), percent change, percent of quantities.
7218.D1.5	Recognize, set up, and solve proportions from real-world scenarios.
7218.D1.6	Utilize real-world scenarios requiring interpretation and comparison of various representations of rates, ratios, and proportions including scale drawings.
7218.D1.7	Compare magnitudes of numbers in context in different forms (e.g., place value, Richter scale, scientific notation, powers of 10)
7218.D1.8	Use dimensional analysis to solve problems involving multiple units of measurement (e.g., convert between and within the metric system and the U.S. customary system, determine miles per gallon, appropriate dosages of medicine).
Domain	<i>Mathematical Processes and Models</i>
7218.D2.1	Students will use mathematical processes and models to acquire, demonstrate, and communicate mathematical understanding in real-world scenarios.
7218.D2.2	Apply mathematics to problems arising in everyday live, workplace, and society.
7218.D2.3	Use mathematical processes with algebraic formulas (e.g., literal equations, numerical techniques, and graphs to solve real-world scenarios.
7218.D2.4	Create mathematical models and use problem-solving skills, independently and as a collaborative team, for real-world scenarios to analyze given information or data, identify

Review Document

	patterns or relationships, formulate a plan or strategy, estimate solutions, determine a solution, justify a solution and its reasonableness, describe limitations, identify how results are affected by changing parameters, (e.g., cost of materials, cost of labor, work time required to improve the overall cost of a project), and suggest improvements.
7218.D2.5	Select appropriate tools (e.g., real objects, manipulatives, paper and pencil, technology) and techniques (e.g., mental math, estimation, number sense) to solve problems.
7218.D2.6	Demonstrate effective use of resources (e.g., faculty, other students, reference materials, industry resources, the internet).
7218.D2.7	Use precise mathematical language and multiple representations (e.g., symbols, diagrams, graphs, written language) to communicate, independently and as a collaborative team, written or orally (e.g., reports, presentations, demonstrations), mathematical ideas or solutions to real-world scenarios.
Domain	Algebraic Relationships
7218.D3.1	Students will use mathematical concepts to algebra to explain linear and non-linear applications in real-world scenarios.
7218.D3.2	Analyze and apply rate of change in terms of real-world scenarios (e.g., rise and run of stair stringers, roof pitch).
7218.D3.3	Use concepts of systems of equations and inequalities (e.g., tables, graphs, matrix operations, pictorial representations, or algebraic properties) to model and solve real-world scenarios (e.g., compare 'best deal opportunities' with profit and expenses in business).
7218.D3.4	Use linear programming with or without the use of technology to maximize or minimize (optimize) linear objective function in real-world scenarios and determine the reasonableness of solutions.
7218.D3.5	Collect and organize data, independently and as a collaborative team, to create appropriate graphical representations (e.g., scatterplots, histograms, box plots, circle graphs) or real-world scenarios - interpret graphical representation, make predictions and decisions based on representations, and analyze results based on representations.
7218.D3.6	Create, interpret, and analyze best-fit models of linear, exponential, and quadratic functions to solve real-world scenarios - interpret the constants, coefficients, and bases in the context of data; check the model for best fit and use of the model, where appropriate, to draw conclusions of make predictions.
Domain	Measurement
7218.D4.1	Students will apply measurement and use measurement tools in real-world scenarios.
7218.D4.2	Convert between and within the metric system and the U.S. customary system in real-world scenarios.
7218.D4.3	Apply accurate readings of both metric and the U.S. customary measuring devices to a problem situation.
7218.D4.4	Select and use appropriate measuring devices (e.g., rules, tape measures, calipers, gauges) and understand the limitations of such devices (e.g., flat surfaces, curved surfaces) for real-world scenarios.
7218.D4.5	Determine and use appropriate unit labels (e.g., length, distance, area, surface area, volume, weight, voltage, resistance, pressure, density) for real-world scenarios.

Next Level Programs of Study

Review Document

Domain	Geometry
7218.D5.1	Students will apply geometric concepts to real-world scenarios.
7218.D5.2	Identify various geometric figures in order to identify what formulas are needed to solve situational problems (e.g., decompose and arrange geometric figures).
7218.D5.3	Compute measurements of geometric figures such as area, surface area (including area of sectors), volume perimeter, and circumference (including arc length) for real-world scenarios.
7218.D5.4	Use trigonometric ratios (e.g., sine, cosine, tangent) to calculate angles and lengths of sides in real-world scenarios.
7218.D5.5	Analyze how changing dimensions will affect the perimeter, circumference, area, surface area, or volume in real-world scenarios.
7218.D5.6	Determine the role angles play in a situational problem (e.g., structural strength and stability, angle straps for lifting, angles used to cut hair).
7218.D5.7	Apply right-triangle relationships using Pythagorean Theorem, special right triangles, and trigonometry in real-world scenarios (e.g., roof construction, building the frame of a car, calculating machined parts).
7218.D5.8	Draw and interpret with or without the use of technology - auxiliary views, orthographic views, isometric views (e.g., house plans, engineering drawings, fashion design).
7218.D5.9	Use cross-sections of three-dimensional shapes to relate to two-dimensional figures.
7218.D5.10	Describe the transformation of polygons in the coordinate plane as they relate to real-world scenarios (e.g., cookie cutting, fabric cutting, machine dies) - translation, reflection, rotation, dilation.

Review Document

	community agencies, or organizations are appropriate approaches. Instructor must be a current chapter advisor of an Indiana-recognized CTSO. State and national membership in an Indiana recognized CTSO is required of any student enrolled in this course. Service learning experiences are highly recommended. Achievement of applicable Career and Technical Education (CTE), academic, and employability standards will be documented through a required student portfolio.
Prerequisite(s)/ Corequisite(s)	None Recommended: Preparing for College and Careers; sequence of courses relevant to the student’s CTSO and area of concentration; or permission of instructor through an application process
Credits	1 credit per semester, up to 6 semesters, 6 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X
Additional Notes	Note: Can only be offered at schools with officially registered CTSO chapters and must be taught by the registered Advisor of that CTSO Chapter. Students MUST be members of the state and national CTSO.

Work-Based Learning

Work Based Learning Capstone (Applied Work-Based Learning Capstone)	
Career Cluster	CTE WBL
Program of Study	
NLPS Sequence	
Course Code	5974
Course Description	<i>Work-Based Learning Capstone is a stand-alone course that prepares students for college and/or a career. Work-Based Learning Capstone experiences occur in workplaces and involve an employer assigning a student meaningful job tasks to develop his or her skills, knowledge, and readiness for work. A clear partnership agreement and training plan is developed by the student, teacher, and workplace mentor/supervisor to guide the student's Work-Based Learning experiences and assist in evaluating achievement and performance. Although related classroom instruction is encouraged, it is not a requirement for this course since the course's main purpose is to provide students an opportunity to apply skills that they have already learned in the classroom.</i>
Prerequisite(s)/ Corequisite(s)	Complete at least one advanced career and technical education course from a program or program of study. Worksite placement must align to the student pathway.
Credits	1 semester course, 1-3 credits per semester, 6 credits maximum. A minimum of 75 hours of workplace activities are required for one credit; 150 hours are required for the two credits. Time spent on workplace activities must be related to the student's program of study. Additional time spent on related instruction is not required, but it is encouraged.
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	
Additional Notes	Course is funded at a flat rate of \$500; No longer counts toward concentrator status. When offered as applied: 6 units maximum; counts as an employability applied unit, capstone course, or elective for alternate diploma

Apprenticeship	
Career Cluster	CTE WBL
Program of Study	
NLPS Sequence	
Course Code	6148
Course Description	<p><i>Apprenticeships are defined as intensive work-based learning opportunities that generally last from one to six years and provide a combination of on-the-job training and formal classroom instruction. They are intended to support progressive skill acquisition and lead to postsecondary credentials and, in some cases, degrees. Apprenticeships often involve 2,000 to 10,000 on-the-job hours. Students 16-years-old or older may qualify for an apprenticeship. Per the Indiana General Assembly, any apprenticeship program must be registered under the federal National Apprenticeship Act (29 U.S.C. 50 et seq.) or another federal apprenticeship program.</i></p>
Prerequisite(s)/ Corequisite(s)	Dependent on program requirements
Credits	1 semester course, may be taken for successive semesters (12 credits maximum). A minimum of 75 hours of workplace and classroom activities are required for one credit; 150 hours are required for two credits.

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Career Exploration and Development</i>
6162.D1.1	Assess personal skills, abilities, aptitudes, strengths, and weaknesses as they relate to career exploration and development.
6162.D1.2	Explore and research multiple career pathways related to a field of interest and set career goals.
6162.D1.3	Analyze personal characteristics, abilities, knowledge, and skills needed for career success in chosen career pathway.
6162.D1.4	Engage in a continuous learning process related to career goals while actively seeking out and participating in a work-, service-, or project-based learning experience.
6162.D1.5	Acquire occupational-related skills through work-, service-, or project-based learning experiences.
6162.D1.6	Evaluate how personal attitudes and values integrate into career choices.
Domain	<i>Personal Qualities of Success</i>
6162.D2.1	Understand and apply the personal qualities that affect success.
6162.D2.2	Continue to practice responsible and ethical decision-making affecting personal and professional relationships and consider the consequences of unethical decision-making.
6162.D2.3	Demonstrate integrity and self-control in work-, service-, or project-based learning experiences.
6162.D2.4	Complete tasks or activities with no prompting and minimal guidance.
6162.D2.5	Demonstrate perseverance through work-, service-, or project-based learning experiences.
6162.D2.6	Clarify goals, develop a timeline, and determine most effective strategies to complete goals on time.
6162.D2.7	Apply coping strategies to mitigate stressful change while continuing to meet expectations at home, school, and in workplace.
6162.D2.8	Demonstrate an eagerness to learn new responsibilities or improve in current responsibilities.
6162.D2.9	Demonstrate personal accountability and work productivity.
6162.D2.10	Exhibit initiative in learning new skills and improving workplace skills.
6162.D2.11	Examine personal, wellness, and stress management strategies.
6162.D2.12	Show professionalism by meeting expectations of promptness, attendance, being prepared, completing tasks, following policies, rules and regulations, and taking responsibility for creating a safe, positive work environment.

Next Level Programs of Study

Review Document

6162.D2.13	Exhibit leadership and responsibility in the professional setting.
6162.D2.14	Demonstrate confidence by taking risks to introduce new ideas or processes for work.
6162.D2.15	Evaluate feedback to improve job performance.
6162.D2.16	Demonstrate a positive customer/client attitude.
6162.D2.17	Utilize appropriate etiquette for various occasions.
Domain	Employability and Professional Skills
6162.D3.1	Utilize effective communication and interpersonal skills.
6162.D3.2	Write a well-organized document using supporting data to clarify complex ideas, raise relevant questions, or solve problems using varied media formats.
6162.D3.3	Apply effective speaking and listening to foster positive relationships and communicate key concepts to a variety of audiences.
6162.D3.4	Deliver oral presentations using technology and professional etiquette to a variety of audiences.
6162.D3.5	Demonstrate information, communications, and technology literacy.
6162.D3.6	Collaborate effectively with team members (classroom or the workplace).
6162.D3.7	Demonstrate critical thinking and problem solving in the professional setting.
6162.D3.8	Develop skills to give and receive constructive criticism.
6162.D3.9	Evaluate feedback to improve job performance and create professional work habits.
6162.D3.10	Generate solutions critiqued with reason, logic, and inferences about alternatives.
6162.D3.11	Analyze potential solutions with a set of criteria including the goal, previous knowledge and experience, diverse perspectives, and data.
Domain	Workplace Safety and Practices
6162.D4.1	Understand workplace safety and workplace practices.
6162.D4.2	Identify causes of accidents and apply safety procedures to prevent accidents.
6162.D4.3	Analyze discrimination and harassment laws and give examples of each.
6162.D4.4	Maintain confidentiality and integrity.
6162.D4.5	Summarize emergency preparedness plans for chosen career pathway.
6162.D4.6	Examine workplace regulations, health and safety guidelines, and inspections for chosen career pathway.
6162.D4.7	Analyze licensure requirements for facilities and employees in chosen career pathway.
Domain	Transitioning to Career
6162.D5.1	Develop strategies for effective transition from high school to career.
6162.D5.2	Explore and understand a variety of postsecondary education and training options, including transfer opportunities, and how they support future plans.
6162.D5.3	Re-evaluate career pathway plan to determine appropriate postsecondary educational options.
6162.D5.4	Demonstrate skills in revising and extending career plans to meet postsecondary goals.
6162.D5.5	Develop skills to assess career goals in terms of work conditions, benefits, and opportunities

Next Level Programs of Study

Review Document

	for advancement.
6162.D5.6	Prepare a formal search, application, and interview using the latest trends.
6162.D5.7	Understand the employment application and interviewing process and develop effective interviewing techniques.
6162.D5.8	Prepare and update a career portfolio based on a career pathway plan, which includes a resume, sample cover letters, letters of recommendation, examples of work and technical skills, internship or work experience summaries, validation of work/internship experience, industry certifications, documentation of extracurricular and community service activities, and awards.
6162.D5.9	Understand the importance of networking for enhancing achievement of education and career goals.
6162.D5.10	Understand and be able to complete employment documents – W2, proof of eligibility to work, benefits packages.
6162.D5.11	Research and evaluate options for covering the costs of education and training.
6162.D5.12	Create a comprehensive five-year career goal plan utilizing the skills developed in this course.
Domain	Personal Financial Responsibility
6162.D6.1	Develop understanding of relationship between income, benefits, and tax calculations on pay stub.
6162.D6.2	Planning and managing money – create a budget, system for keeping and using financial records.
6162.D6.3	Identify strategies and considerations for making purchasing decisions.
6162.D6.4	Identify and utilize best practices for managing credit and debt of personal accounting.
6162.D6.5	Explore and identify factors to consider when balancing risk management and insurance costs.
6162.D6.6	Identify and explore different avenues for saving and investing and how they impact short- and long-term income.

Career Exploration Internship (Applied Career Exploration Internship)	
Career Cluster	CTE WBL
Program of Study	
NLPS Sequence	
Course Code	0530
Course Description	<i>The Career Exploration Internship course consists of paid or unpaid work experience in the public or private sector that provides workplace learning in an area of student career interest. Unlike the Work-Based Learning Capstone course (5974) in which students gain expertise in a specific occupation, the Career Exploration Internship (0530) is intended to expose students to broad aspects of a particular industry or career cluster area by rotating through a variety of work sites or departments. In addition to their workplace learning activities, students participate in (1) regularly scheduled meetings with their classroom teacher, or (2) a regularly scheduled seminar with the teacher for the purpose of helping students make the connection between academic learning and their work-related learning experiences. Specific instructional standards tied to their career cluster or pathway and learning objectives for the internship must be written to clarify the expectations of all parties -- the student, parent, employer, and instructor.</i>
Prerequisite(s)/ Corequisite(s)	None Recommended: Preparing for College and Careers; Career Information and Exploration
Credits	1 semester course, 1-3 credits per semester, 6 credits maximum. A minimum of 75 hours of workplace and classroom activities are required for one credit; 150 hours are required for two credits. Of the 75 hours, 15 must be related to classroom instruction (or 30 of the 150 hours if doing two credits).
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	
Additional Notes	Note: This course is funded at a flat rate of \$500 When offered as applied: 4 units maximum; counts as an employability applied unit for alternate diploma

Exploring Education Professions	
Career Cluster	Education and Training
Program of Study	
NLPS Sequence	Introductory
Course Code	5415
Course Description	<i>Exploring Education Professions is for those students interested in a career in (or exploring possibilities in) education. This course is an introduction to the education field and does not have prerequisites. Exploring Education Professions includes the history of education, an introduction to education professions, qualities and responsibilities of effective teachers, and student evaluation of aptitudes. The course will include exploration of the early childhood, elementary, and secondary fields. A project-based approach that utilizes higher order thinking, communication, leadership, management, and fundamentals to college and career success is recommended. Direct, concrete mathematics and language arts proficiencies will be applied. Service learning, introductory laboratory/field experiences in a variety of education settings, and other authentic applications are strongly recommended. This course provides a foundation for continuing and post-secondary education in all career areas related to children, child development, and nurturing of children.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 or 2 semester course, 1 credit per semester, 2 credits max
Counts Toward	Counts as a directed elective for all diplomas
Dual Credit Status	
Additional Notes	When offered as applied: 2 units maximum; counts as an employability applied unit for alternate diploma Note: This course qualifies for funding at the 8 th grade level
ADDITIONAL COURSE INFO	
Funding	Introductory Available for 8 th grade

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Personal, Academic, and Career Success</i>
5415.D1.1	Students will integrate processes of thinking, communications, leadership, and management to apply child development knowledge and skills.
5415.D1.2	Demonstrate components of critical thinking, creative thinking, and reasoning.
5415.D1.3	Evaluate effective communication processes in school, family, career, and community setting.
5415.D1.4	Demonstrate leadership that encourages participation and respect for the ideas, perspectives, and contributions of group members.
5415.D1.5	Apply management, decision-making, and problem-solving processes to accomplish tasks and fulfill responsibilities.
5415.D1.6	Examine the interrelationships among thinking, communication, leadership, and management processes to address family, community, and workplace issues.
5415.D1.7	Demonstrate fundamentals to college and career success (e.g. strong work ethic, time-management, positive attitude, adaptability/flexibility, stress resilience, accountability, self-discipline, resourcefulness, cooperation, self-assessment).
Domain	<i>Foundations of Education</i>
5415.D2.1	Identify significant events in the history of U.S. public education.
5415.D2.2	Assess the impact of important cultural and social events on the evolution of the U.S. education system. Examples of events include but are not limited to the establishment of the first public school, major U.S. Supreme Court cases (<i>Brown v. Board</i>), the Vocational Rehabilitation Act, desegregation, Title IX, and No Child Left Behind, Civil Rights Act, the development of the internet and virtual instruction, use of technology in classrooms, COVID-19, and the importance of early learning (birth – age 5).
5415.D2.3	Research and summarize in a clear and coherent narrative, the influences of major educational theorists' philosophies.
5415.D2.4	Evaluate the validity theories by assessing the extent to which the reasoning and evidence of each theorist support their claims. Examples of theorists include but are not limited to John Dewey, Maria Montessori, Benjamin Bloom, Jean Piaget, Lev Vygotsky, Loris Malaguzzi.
Domain	<i>Careers in Education</i>
5415.D3.1	Identify and analyze career pathways within the Education and Training cluster.
5415.D3.2	Use supporting evidence from multiple sources, such as local job postings and workforce data,

Next Level Programs of Study

Review Document

	to describe the essential knowledge and skills required for these careers.
5415.D3.3	Complete one or more career cluster aptitude surveys, analyze the results, and examine how personal career aptitudes align with careers in education. Careers may include the following: teacher – early childhood, elementary, secondary, special education, EL; librarian; administrator; counselor; interpreter; speech pathologist, occupational and physical therapist; psychologist
5415.D3.4	Compile and analyze real-time labor market data including economic and demographic trends and compare authentic vacancy announcements on local and national job boards. Use this information to compare occupations by education requirements, job availability, salaries, and benefits.
5415.D3.5	Discuss the education pathways (education and early childhood). Include information about apprenticeships, dual credit, and degrees/licensure available on the pathways (child development associates through bachelor's).
Domain	Educator Responsibilities
5415.D4.1	Through a pre-recorded lesson, in-class presentation, or interview of professionals in the education field, gather information about their roles and responsibilities.
5415.D4.2	Categorize the range of tasks that different educators are responsible for and estimate the time spent on each one.
5415.D4.3	Explore multiple facets of common teaching activities such as planning effective instruction, facilitating instruction by using multiple teaching methods, assessing student learning, non-instruction tasks (e.g. parent communication, building activities, etc.).
5415.D4.4	Describe the aptitudes, including 21 st century skills, needed by education professionals.
5415.D4.5	Self-assess 21 st century skills including the ability to communicate verbally and nonverbally in a respectful manner, work effectively in teams and resolve conflicts when necessary, demonstrate a positive work ethic, understand different cultural perspectives and their impact in the classroom, use technology, adapt to changes, manage time wisely.
5415.D4.6	Using the 21 st century skills self-assessment, establish a baseline evaluation of 21 st century skills, attitudes, and work habits. Create a growth plan promoting advancement of skills and abilities.
Domain	Project-based Learning
5415.D5.1	Through a pre-recorded or live class, observe a teacher in an early childhood, elementary, and secondary setting.
5415.D5.2	As a course culmination, create a project to illustrate a preferred education career.

Education and Training: Special Topics	
Career Cluster	Education and Training
Program of Study	
NLPS Sequence	
Course Code	5976
Course Description	<p><i>Education and Training: Special Topics is an extended learning experience designed to address the advancement and specialization of careers within the career cluster through the provision of a specialized course for a specific workforce need in the school's region. The learning experience is at a qualified site, and is designed to give the student the opportunity to practice technical skills previously learned in the classroom while working under the direction of the appropriately licensed professional. Throughout the course, students will focus on learning about employment opportunities at a variety of entry levels, an overview of the career cluster, teams, and legal and ethical considerations; and obtaining the knowledge, skills and attitudes essential for success in specific occupations. Course standards and curriculum must be tailored to the specific profession, preparing students to advance in this career field, and where applicable, provide students with opportunities for certification or dual credit. This course also provides students with the knowledge, attitudes, and skills needed to make the transition from high school, to postsecondary opportunities, and to work in a variety of careers. Students are encouraged to focus on self-analysis to aid in their career selection. Job seeking and job maintenance skills, personal management skills, and completion of the application process for admission into a postsecondary program are also areas of focus. Participation in a related CTSO encourages the development of leadership, communication and career related skills, and opportunities for community service.</i></p>
Prerequisite(s)/ Corequisite(s)	<p>None Recommended: CTE courses that would help prepare the student for success in this area</p>
Credits	1 semester course, up to 3 credits per semester, may be offered for successive semesters up to 12 credits
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X

Advanced Career & Technical Education, College Credit: Education and Training	
Career Cluster	Education and Training
Program of Study	
NLPS Sequence	
Course Code	6140
Course Description	<i>Advanced Career and Technical Education, College Credit is a course title covering any CTE advanced course offered for credit by an accredited postsecondary institution through an adjunct agreement with a secondary school. The intent of this course is to allow students to earn college credit for courses with content that goes beyond that currently approved for high school credit. This course may be used for any dual enrollment course, including a joint program of study involving a postsecondary partnership.</i>
Prerequisite(s)/ Corequisite(s)	None

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	<i>Introduction to Early Childhood</i>
7160.D1.1	Recognize the value of developing positive communication strategies and establishing beneficial relationships within an early childhood facility.
7160.D1.2	Implement skills to build positive relationships with families.
7160.D1.3	Study the history, theories, and foundations of early childhood education
7160.D1.4	Recognize and explore various curriculums and settings for early childhood education programs.
7160.D1.5	Identify effective, quality programs for young children in various settings.
7160.D1.6	Identify and organize resources within the community to enhance family wellbeing.
7160.D1.7	Evaluate present and determine future professional goals while exploring opportunities in the field of early childhood, advocacy, organizations, and resources.
7160.D1.8	Identify and practice appreciation for diversity.
7160.D1.9	Identify and practice various observation/recording methods.
7160.D1.10	Explore the role of technology in programs for young children.
7160.D1.11	Examine the NAEYC Code of Ethics, CDA, NAEYC Accreditation standards, state licensing regulations, and membership in professional organizations.
7160.D1.12	Complete Indiana ILEAD webinar trainings for Child Abuse Prevention and Detection, and Health and Safety Modules 1.4.
7160.D1.13	Begin their own Professional Program Portfolio based on local campus guidelines (contact

Competency #	Competency
Domain	Early Childhood Guidance
7159.D1.1	Identify, define, and evaluate developmentally appropriate practices in early childhood multicultural curriculum in terms of gender, culture and ability.
7159.D1.2	Describe the social foundations and theory of anti-bias issues in the early childhood profession.
7159.D1.3	Examine multicultural issues in the early childhood field including guidance, basic routines, communication, play and socialization.
7159.D1.4	Obtain and use resources for an anti-bias curriculum.
7159.D1.5	Design anti-bias activities for young children and implement activities in an early care setting.
7159.D1.6	Define and demonstrate positive child guidance strategies and the influence of culture on behavior.
7159.D1.7	Design an environment conducive to both short term and long-term goals in relation to individual needs.
7159.D1.8	Identify the elements of prosocial behavior and develop culturally sensitive strategies for individual children in the early childhood setting.
7159.D1.9	Identify and evaluate how personal biases impact effective interactions between children and their families and assessments of young children.
7159.D1.10	Observe, practice and critique positive guidance techniques, which are culturally sensitive and consider the needs of individual children.
Domain	Child Growth and Development
7159.D2.1	Identify and define the sequence and process underlying physical, cognitive, social, emotional, and moral characteristics and needs of development from conception to twelve years.
7159.D2.2	Recognize the impact of culture and society on the child's development including support systems in various countries.
7159.D2.3	Identify and explore ways to support children in their growth and development process related to early brain development, learning, self-concept, and their relationship with others.
7159.D2.4	Identify the content knowledge of major theories of early child growth and development and the strengths and challenges of each.
7159.D2.5	Identify and discuss appropriate environments that promote healthy development of children from a variety of cultural and ethnic backgrounds.
7159.D2.6	Review and critique topical literature and other professional resources in early childhood education, to integrate knowledgeable, critical and reflective perspective.
7159.D2.7	Survey observational methods used by early care and educational professionals.
7159.D2.8	Conduct a research project related to child development utilizing common information gathering methods.

Course Description	<p><i>This course will prepare students to complete the application, CDA exam, and verification process for the Child Development Associate (CDA) credential. Students may also study the physical, social, emotional, cognitive, and moral development of children from conception to age twelve. Theories of child development, biological and environmental foundations, prenatal development, the birth process, and the newborn baby will be discussed. Additionally, students will explore the aspects of early literacy skill development in young children from birth through third grade. Students will explore techniques, technological tools and other learning opportunities that encourage positive attitudes in children regarding listening, speaking, reading and writing activities. In the course, students will research, examine and explore the use of observation in screening and assessment to promote healthy literacy development in early childhood education. Finally, students will be provided an introduction to caring for each exceptional child. This includes theories and practices for producing optimal developmental growth. Students may be required to complete observations and field experiences with children as part of this course.</i></p>

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Introduction to Teaching
7161.D1.1	Identify and appreciate the essential qualifications and personal demands of teaching as a profession.
7161.D1.2	Define and evaluate his/her own teaching dispositions and learning style.
7161.D1.3	Recognize the essential function of professional ethics, personal morals, and a strong value system in the role of the teacher, including the importance of confidentiality and liability issues pertaining to family/school relationships.
7161.D1.4	Reflect on personal reasons for entering the teaching profession and write an initial statement of educational philosophy.
7161.D1.5	Review current teacher licensure laws in the State of Indiana. Compare this licensure process with requirements for teaching in a variety of global locations.
7161.D1.6	Recognize and identify strategies to support the family’s role as the child’s first teacher and to support the family/teacher partnership in a culturally competent manner.
7161.D1.7	Identify career choices within the field of education, including opportunities to teach abroad. Explore programs for professional preparation.
7161.D1.9	Define and describe the nature, purpose, and responsibilities of the public education system in a democratic society. Compare and contrast with the role of public education in other countries.
7161.D1.10	Review the history of American education and identify the philosophical foundations of education and their global roots.
7161.D1.11	Identify and observe in the classroom various elements of diversity that affect K-12 student

	learning and accomplishment.
7161.D1.12	Recognize and examine the diversity in schools in the United States and globally.
7161.D1.13	Identify and observe in the classroom the cultural, family, and environmental factors that affect students in schools.
7161.D1.14	Complete a minimum of twenty (20) hours of supervised service learning/field work experience in a classroom and reflect on the experience in relation to personal skills, dispositions, and future professional decisions.
Domain	Teaching and Learning Concepts
7161.D2.1	Explain how schedules, activities, routines, and transitions promote learning
7161.D2.2	Describe curriculum and instruction models
7161.D2.3	Examine ways student learning is influenced by teaching strategies.
7161.D2.4	Assess the structure of school governance
7161.D2.5	Differentiate between various types of assessments including formative, summative, traditional, and authentic.
7161.D2.6	Analyze relevant standards in instructional planning and assessment.
Domain	Introduction to Special Education
7161.D3.1	Explain the significance of the research and rationale for inclusive education.
7161.D3.2	Demonstrate an understanding of differentiated instruction and heterogeneous grouping to meet the needs of diverse learners.
7161.D3.3	Demonstrate an understanding of appropriate instructional materials and methods for learners with high and low incidence disabilities and the accommodations that can be made for them in inclusive settings.

Child and Adolescent Development	
Career Cluster	Education and Training
Program of Study	Education Professions
NLPS Sequence	B
Course Code	7157
Course Description	<i>Child and Adolescent Development examines the physical, social, emotional, cognitive, and moral development of the child from birth through adolescence with a focus on the middle years through adolescence. Basic theories of child development, biological and environmental foundations of development, and the study of children through observation and interviewing techniques are explored. The influence of parents, peers, the school environment, culture, and the media are discussed. An observation experience up to 20 hours may be required for completion of this course. This course has been approved to be offered for dual credit. Students pursuing this course for dual credit are still required to meet the minimum prerequisites for the course and pass the course with a C or better in order for dual credit to be awarded.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Teaching

	appropriate and challenging instructional materials and learning environments.
7162.D2.5	Apply technology to the creation of effective assessment and evaluation strategies.
7162.D2.6	Use technology to enhance the teacher's productivity, efficiency, and professional practice.
7162.D2.7	Analyze the social, ethical, legal, and human issues surrounding the use of technology in the classroom.
7162.D2.8	Explore the availability and use of assistive technologies for students with special needs.
7162.D2.9	Analyze and utilize the standards presented in the NETS and InNTASC consortia.

Education Professions Capstone	
Career Cluster	Education and Training
Program of Study	Education Professions
NLPS Sequence	D
Course Code	7267
Course Description	<i>The Education Professions Capstone provides an extended opportunity for field experience to further apply concepts that have been presented throughout the pathway. Students will also have the opportunity to explore the topics of the exceptional child and literacy development through children's literature. Students will gain a deeper understanding of inclusive teaching techniques along with policies, theories, and laws related to special education. Students interested in pursuing a career in Elementary Education are encouraged to also study the benefits of using children's literature in the classroom. This course may be further developed to include specific content for students interested in pursuing a career in secondary education. The course should include a significant classroom observation and assisting experience.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Teaching; Child and Adolescent Development; Teaching and Learning

Differentiate methods of controlling the spread and growth of pathogens –</p> <ul style="list-style-type: none"> -Asepsis – antisepsis, disinfection, sanitization, sterile technique, sterilization -Standard precautions – environmental cleaning, gloving, handwashing, Personal Protective Equipment (PPE) -Isolation precautions – transmission-based contact -Bloodborne pathogen precautions -Vaccinations
5272.D7.3	Apply personal safety procedures based on Occupational Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations
5272.D7.4	Demonstrate and apply the use of Personal Protective Equipment (PPE)
5272.D7.5	Comply with safety signs, symbols, and labels
Domain	Healthcare Teamwork
5272.D8.1	Evaluate roles and responsibilities of healthcare team members
5272.D8.2	Recognize methods of building positive team relationships
5272.D8.3	Evaluate why teamwork is an important part of healthcare and how it improves patient care
Domain	Health Maintenance Practices
5272.D9.1	Differentiate between wellness and disease
5272.D9.2	<p>Promote disease prevention and model health behaviors</p> <p>A. Promote self-care behaviors of health and wellness – exercise, nutrition, relationships, sleep habits, stress management</p> <p>B. Examine various aspects of behavioral health – anxiety, depressions, substance abuse, suicide</p> <p>C. Describe public health strategies for prevention of disease – community health education outreach programs; immunizations; medical, dental, and mental health screenings; routine physical exams; self-care behaviors</p>
5272.D9.3	Discuss physical, mental, social, and behavioral development and its impact on healthcare across the lifespan
5272.D9.4	Identify socioeconomic determinants of health and wellness
Domain	Technical Skills
5272.D10.1	Demonstrate procedures for measuring and recording vital signs in both normal and abnormal ranges including but not limited to – blood pressure, height and weight, oxygen saturation, pain, pulse, respirations, temperature

Next Level Programs of Study

Review Document

Domain	Information Technology in Healthcare
5272.D11.1	Identify components of an electronic health record (EHR) and/or electronic medical record (EMR) – diagnostic tests, history and physical, medications, patient demographics, progress notes, treatment plan
5272.D11.2	Explore different types of health data collection tools – medical wearable devices, patient monitoring equipment, phone apps
5272.D11.3	Create electronic documentation that reflects timeliness, completeness, and accuracy
5272.D11.4	Examine information systems policies, procedures, and regulations as required by nationals, state, and local entities – facility policies, HIPAA, medical coding, social media

Health Science Education: Special Topics	
Career Cluster	Health Science
Program of Study	
NLPS Sequence	
Course Code	5286
Course Description	<p><i>Health Science Education: Special Topics is an extended laboratory experience designed to address the advancement and specialization of healthcare careers through the provision of a specialized course for a specific healthcare workforce need in the school's region. Practicum is at a qualified clinical site, and is designed to give the student the opportunity to practice technical skills previously learned in the classroom while working under the direction of an appropriately licensed healthcare professional. Throughout the course students will focus on learning about the healthcare system and employment opportunities at a variety of entry levels, an overview of the healthcare delivery systems, healthcare teams, and legal and ethical considerations, and obtaining the knowledge, skills, and attitudes essential for providing basic care in a variety of healthcare settings. Additionally, students will build their essential job related skills for providing basic care appropriate for their healthcare setting and audience. Course standards and curriculum must be tailored to the specific healthcare profession, preparing students to advance in this career field, and where applicable, provide students with opportunities for certification or dual credit. This course also provides students with the knowledge, attitudes, and skills needed to make the transition from high school to postsecondary opportunities, and to work in a variety of health science careers. Students are encouraged to focus on self-analysis to aid in their career selection. Job seeking and job maintenance skills, personal management skills, and completion of the application process for admission into a postsecondary program are also areas of focus. Participation in HOSA encourages the development of leadership, communication and career related skills, and opportunities for community service.</i></p>
Prerequisite(s)/ Corequisite(s)	<p>None Recommended: CTE courses that would help prepare the student for success in this area</p>

Course Code	6138
Course Description	<i>Advanced Career and Technical Education, College Credit is a course title covering any CTE advanced course offered for credit by an accredited postsecondary institution through an adjunct agreement with a secondary school. The intent of this course is to allow students to earn college credit for courses with content that goes beyond that currently approved for high school credit. This course may be used for any dual enrollment course, including a joint program of study involving a postsecondary partnership.</i>
Prerequisite(s)/ Corequisite(s)	None Recommended: CTE courses that would help prepare the student for success in this area
Credits	1 semester course, up to 3 credits per semester, May be offered for successive semesters up to 12 credits
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	A student should earn at least 3 postsecondary credits for each high school credit. Schools must have an approved Nonstandard Course Waiver on file to be eligible for CTE funding.

Principles of Biomedical Sciences	
Career Cluster	Health Science
Program of Study	Biomedical Sciences
NLPS Sequence	A
Course Code	5218
Course Description	<i>Principles of Biomedical Sciences provides an introduction to this field through “hands-on” projects and problems. Student work involves the study of human medicine, research processes, and an introduction to bioinformatics. Students investigate the human body systems and various health conditions including heart disease, diabetes, hypercholesterolemia, and infectious diseases. A theme through the course is determining factors that led to the death of a fictional person. After determining the factors responsible for the death, the students investigate lifestyle choices and medical treatments that might have prolonged the person’s life. Key biological concepts included in the curriculum are: homeostasis, metabolism, inheritance of traits, feedback systems, and defense against disease. Engineering principles such as the design process, feedback loops, fluid dynamics, and the relationship of structure to function will be included where appropriate. The course is designed to provide an overview of all courses in the Biomedical Sciences program and to lay the scientific foundation necessary for student success in the subsequent courses. NOTE: This course aligns with the PLTW Principles of Biomedical Sciences curriculum. Use of the PLTW Curriculum may require additional training and membership in the PLTW network.</i>
Prerequisite(s)/ Corequisite(s)	Biology I or concurrent enrollment in Biology I is required
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas Fulfills a science requirement for all diplomas
Dual Credit Status	X (PCL/CTE)

CONTENT STANDARDS AND COMPETENCIES		
Competency #	Competency	
Domain	Human Body Systems	
5218.D1.1	Students investigate the six major human body systems. Students explore what it means to be a system, relate principles of engineering to systems, and investigate the interrelatedness of human body systems. Students learn about the role of medical examination in determining unknown causes of death.	
5218.D1.2	Identify the six major human body systems and their functions. Understand that these systems work together to maintain good health.	
5218.D1.3	Identify and locate specific organs that comprise the six major human body systems. Describe the function of each organ.	
5218.D1.4	Recognize that organs are composed of specific types of tissues, which are composed of specific cells that operate both independently and interdependently of each other. Know that these cells are the fundamental functional units within all living organisms.	
5218.D1.5	Define the terms mechanical engineering, bioengineering, fluid mechanics and materials	

	science. Describe how these fields of engineering apply to human body systems.
5218.D1.6	Demonstrate how parts of human body systems work together to perform the job of the entire system.
5218.D1.7	Identify diseases and conditions that can disrupt the functioning of cells, tissues and organs within a human body system. Understand that evidence can be seen post-mortem through medical examination.
5218.D1.8	Describe the aspects involved in determining cause of death, including the medical condition of a victim, in-depth scientific research, the use of medical technology and the involvement of multiple medical professionals.
5218.D1.9	Discuss the role of a coroner, a medical examiner, and an emergency medical technician in determining the cause of a death.
Domain	Heart Attack
5218.D2.1	Students focus on the circulatory system and its role in maintaining homeostasis by examining the structure and function of the heart. Students are introduced to experimental design and software (i.e., EKG, stress test) to collect and analyze heart data including heart rate, blood pressure and heart function.
5218.D2.2	Describe the characteristics of a simple pump.
5218.D2.3	Demonstrate how a two-chambered pump works.
5218.D2.4	Recognize that the human heart is a four-chambered living pump that provides the force needed to transport blood throughout the body.
5218.D2.5	Identify the structures and functions of the heart.
5218.D2.6	Compare and contrast the characteristics and functions of the different cardiac tissue types including striated muscle tissue, veins, arteries, and capillaries.
5218.D2.7	Describe how the heart operates using basic principles of engineering, such as those found in fluid mechanics.
5218.D2.8	Explain how heartbeat is caused by the contraction of cardiac muscle cells because of electrical activity signaled by the autonomic nervous system. Describe how this results in the movement of blood from the heart to the arteries and the rest of the body.
5218.D2.9	Calculate heart rate as the number of heart contractions per unit of time (usually one minute). Recognize that heart rate is used by physicians as one indicator of a person's medical condition.
5218.D2.10	Describe blood pressure as a measure of the force put on the vascular walls by the blood as it is pushed by the cardiac muscles through the vascular system. Recognize that this is one indicator of the overall medical condition of the cardiovascular system.
5218.D2.11	Investigate the internal and external factors that can impact heart function including heart rate and blood pressure. Use experimental design to create and carry out experiments on blood pressure and heart rate.
5218.D2.12	Demonstrate the importance of technology in the biomedical sciences by using software and equipment to collect and analyze cardiovascular data.
5218.D2.13	Recognize that blood is a liquid connective tissue composed of red cells, white cells and platelets suspended in liquid plasma.

5218.D2.14	Recognize that blood is the major transport mechanism for substances that must be distributed throughout the body and must be replenished throughout life.
5218.D2.15	Describe the functions of red cells, white cells, and platelets.
5218.D2.16	Use experimental procedures to investigate and explain the limits of the size of cells.
Domain	Diabetes
5218.D3.1	Students investigate how a disease (diabetes) in one system can have serious effects on homeostasis throughout the body. Students are introduced to basic chemistry, the biochemistry of macromolecules, and the relationship of these molecules to metabolic function. The causes, symptoms, treatments, and effects of diabetes are studied as well as the lifestyle implications associated with this disease. Students discuss engineering principles involved in feedback loops as related to insulin and glucose.
5218.D3.2	Recognize that the cells in living tissue are composed of molecules. Build and analyze models for molecules, simple compounds, and macromolecules.
5218.D3.3	Explain that food is composed of molecules and compounds. Describe how energy is stored and released in chemical bonds of molecules and compounds.
5218.D3.4	Distinguish among the structures and functions of carbohydrates, proteins, and lipids. Provide evidence that these organic molecules come from food (i.e., recommended daily allowance on food labels, chemical indicators).
5218.D3.5	Describe how homeostasis depends upon many different chemical reactions and large organic molecules.
5218.D3.6	Recognize that enzymes are proteins that regulate reaction rates and that many metabolic processes depend upon enzymes to function properly. Explain the importance of enzymes on maintaining homeostasis in the human body.
5218.D3.7	Demonstrate that enzymes are highly specific, using both lock and key models and induced fit models of enzyme function.
5218.D3.8	Recognize that many systems, living or non-living, operate using feedback mechanisms and that information put into a system causes a reaction within the system. Explain the difference between negative and positive feedback.
5218.D3.9	Describe how Insulin regulates the transfer of glucose into cells.
5218.D3.10	Explain the cause, symptoms, effects and treatments of both Type I and Type II diabetes.
5218.D3.11	Demonstrate an understanding of the dietary requirements and restrictions of people who have diabetes and the ways in which diabetes can impact one's daily life.
5218.D3.12	Describe behaviors that could help prevent the onset of Type II diabetes.
5218.D3.13	Describe the four main areas of diabetes research: new technology in equipment, stem cell research, improved drug therapy and organ transplants.
Domain	Sickle Cell Disease
5218.D4.1	Students investigate sickle cell disease to learn the principles of genetics. Students are introduced to bioinformatics and build models of DNA and the beta-globin protein as they study the structure and function of and the relationship between nucleic acids and proteins. To study the impact of mutations, students analyze karyograms and explore the effects of single base-pair mutations.

5218.D4.2	Describe the structure and role of hemoglobin in red blood cells.
5218.D4.3	Recognize that changes to the structure of a protein can change its ability to function properly. Describe how changes in the structure of hemoglobin can result in structural changes in red blood cells.
5218.D4.4	Distinguish between normal and sickle red blood cells.
5218.D4.5	Summarize the symptoms and complications of sickle cell disease.
5218.D4.6	Describe the structure and function of deoxyribonucleic acid (DNA).
5218.D4.7	Explain the structure and function of genes by identifying the exons and introns.
5218.D4.8	Demonstrate how the genetic information in DNA molecules provides instructions for assembling protein molecules and that this is virtually the same mechanism for all life forms.
5218.D4.9	Distinguish among the multiple structural levels of proteins. Understand that a protein's shape is not constant; it changes depending on its environment.
5218.D4.10	Illustrate how the sequence of amino acids in a protein determines the protein's structure.
5218.D4.11	Understand that chromosomes carry numerous genes that are passed from parents to offspring in the reproductive cells.
5218.D4.12	Identify some chromosomal abnormalities and describe the syndromes associated with them.
5218.D4.13	Distinguish between chromosomal and gene mutations.
5218.D4.14	Describe the possible outcomes of different types of gene mutations and the corresponding effects on the properties of the resulting protein.
5218.D4.15	Compare the symptoms and complications of sickle cell trait to sickle cell disease.
5218.D4.16	Explain the relationship between the symptoms of anemia and cell energetics.
5218.D4.17	Identify countries with higher incidences of sickle cell disease and investigate the reasons for these occurrences.
5218.D4.18	Create and analyze pedigree charts to illustrate passage of a trait through at least three generations. Calculate the probability of a trait appearing in offspring.
Domain	Hypercholesterolemia
5218.D5.1	Students look at the function of cholesterol in the body and its role in heart disease. Students are introduced to a variety of DNA technologies as they learn about familial hypercholesterolemia genes.
5218.D5.2	Recognize that the type of bond between the carbon atoms in a fatty acid determines whether it is saturated or unsaturated with hydrogen atoms.
5218.D5.3	Compare and contrast the structures and functions of stearic acid, oleic acid, linoleic acid, stearidonic acid and cholesterol.
5218.D5.4	Describe the role of high-density lipoprotein (HDL) and low-density lipoprotein (LDL) in the transport of cholesterol in the blood. Predict how the ratio of these complexes indicates a person's risk for heart disease.
5218.D5.5	Explain the processes of polymerase chain reaction (PCR), restriction fragment length polymorphism, single nucleotide polymorphisms (SNP), and DNA gel electrophoresis in the diagnosis of genetic diseases and disorders such as the familial hypercholesterolemia.

Next Level Programs of Study

Review Document

Domain	Infectious Diseases
5218.D6.1	Students study bacteria and viruses as the causative agents of infectious diseases. Students examine the structural differences between these organisms through Gram staining and producing models. Students investigate the differences in treatment protocols for bacterial and viral diseases. Students learn about public health campaigns that aim to educate individuals about the dangers and preventions of infectious diseases.
5218.D6.2	Distinguish among the different types of bacteria and recognize that only a few causes disease.
5218.D6.3	Classify bacteria by shape, metabolism, and reaction to Gram staining.
5218.D6.4	Understand that the efficacy of an antibiotic depends on the type of bacteria causing the infection.
5218.D6.5	Analyze the cause and implications of antibiotic resistance.
5218.D6.6	Describe the structure and role of viruses.
5218.D6.7	Describe the reproductive cycles of viruses.
5218.D6.8	Describe effective and ineffective treatments for viral infections.
5218.D6.9	Summarize the symptoms, prevalence, prevention, treatment, and the global economic and social impact of an infectious disease caused by a virus.
5218.D6.10	Describe various ways in which infectious diseases can be spread
5218.D6.11	Understand how public education can help prevent the spread of some diseases through the promotion of basic personal preventive measures including hand washing, surface cleaning, and using tissues.

Human Body Systems	
Career Cluster	Health Science
Program of Study	Biomedical Sciences
NLPS Sequence	B
Course Code	5216
Course Description	<i>Human Body Systems is a course designed to engage students in the study of basic human physiology and the care and maintenance required to support the complex systems. Using a focus on human health, students will employ a variety of monitors to examine body systems (respiratory, circulatory, and nervous) at rest and under stress, and observe the interactions between the various body systems. Students will use appropriate software to design and build systems to monitor body functions. NOTE: This course aligns with the PLTW Human Body Systems curriculum. Use of the PLTW Curriculum may require additional training and membership in the PLTW network.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Biomedical Sciences
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum

CONTENT STANDARDS AND COMPETENCIES		
Competency #	Competency	
Domain	Identity	
5216.D1.1	Students investigate the body systems and functions that all humans have in common, and then examine differences between tissues, such as bone and muscle, and in molecules, such as DNA, to pinpoint unique identity.	
5216.D1.2	Understand the hierarchical structure and organization of the human body in terms of body systems, organs, and tissues.	
5216.D1.3	Explain the functions of the human body systems and describe how multiple body systems are interconnected. Indicate how damage to one system can impact other functions in other	

	systems.
5216.D1.4	Identify the main types of tissue that comprise the organs and relate the structure of a tissue to its function.
Domain	Communication
5216.D2.1	Students investigate modes of communication within the human body as well as the ways humans communicate with the outside world. Students investigate the roles of electrical and chemical signals in communication and response in the human body.
5216.D2.2	Describe the structure and function of the central nervous system.
5216.D2.3	Describe how brain functions are mapped onto physical locations within the brain (brain mapping) and determine the regions of the brain responsible for specific human actions and emotions.
5216.D2.4	Describe the relationship between neuron structure and function, including an understanding of how signals are created, transmitted, and received in the human body.
5216.D2.5	Describe ways that communication could be disrupted and how that would impact the function of the human body.
5216.D2.6	Compare reflex and reaction times and relate to processing in the brain.
5216.D2.7	Distinguish between various nervous system disorders and describe their impact on quality of life.
5216.D2.8	Identify the endocrine and exocrine glands and their functions within the human body.
5216.D2.9	Describe how hormones interact with target cells in the human body.
5216.D2.10	Demonstrate use of negative feedback in the endocrine system to control body functions.
5216.D2.11	Explain how stimulus in the form of light is processed by the eye and interpreted by the brain.
5216.D2.12	Describe the structures within the human eye that work to focus and process light.
5216.D2.13	Identify diseases and dysfunction within the eye and how these are related to the functioning of the eye.
Domain	Flow of Energy and Matter/Resources to Sustain Life
5216.D3.1	Students investigate the human body systems that work to obtain, distribute, or process the body's primary resources for energy and power—food, oxygen, and water.
5216.D3.2	Describe the relationship between the body systems that process and distribute food, water and oxygen.
5216.D3.3	Describe the structure and function of the organs in the digestive system.
5216.D3.4	Describe the mechanical and chemical activity of the digestive organs, including the action of accessory organs.
5216.D3.5	Describe the effects of temperature, pH, and enzyme concentration on enzyme activity.
5216.D3.6	Explain how energy is stored and released from ATP. Describe how ATP is recycled in cells.
5216.D3.7	Describe the relationship between calorie consumption, expenditure, and overall health.
5216.D3.8	Describe the structure of the respiratory system, the mechanics of breathing and how the structure of the lungs facilitates gas exchange.
5216.D3.9	Describe how oxygen transport is facilitated between the respiratory and cardiovascular systems and determine the effect of a variety of diseases on oxygen transport.

Next Level Programs of Study

Review Document

5216.D3.10	Analyze lung volume and oxygen absorption data at rest and after exercise to understand lung efficiency and capacity.
5216.D3.11	Describe the structure and function of the component parts of the urinary system.
5216.D3.12	Describe the normal composition of blood and urine and how this composition is affected by disease states.
5216.D3.13	Explain how the body uses hormones to maintain water balance and interpret the effect of two different hormones on the nephron and overall water balance.
5216.D3.14	Describe fluid and ion movement in the various sections of the nephron.
5216.D3.15	Explain the relationship between the heart and lungs; trace the path of major circulatory routes.
5216.D3.16	Describe the structure of blood vessels and identify the major arteries and veins; name the body region supplied by each.
5216.D3.17	Describe the major circulatory routes.
5216.D3.18	Describe the conduction system of the heart and identify the pathway of impulses through this system.
5216.D3.19	Describe how to measure blood pressure and understand the relationship between blood pressure and pulse points. Use this information to recognize disease states.
5216.D3.20	Apply knowledge of heart rate to calculate and interpret cardiac output values; relate cardiac output values to the health of other body systems.
Domain	Musculoskeletal System
5216.D4.1	Students investigate the movement of the human body. Students will examine bones and joints and how muscles and bones work together to move the body. Students will combine information about power and movement to describe how the body fuels and responds to exercise.
5216.D4.2	Describe the structure and function of the skeletal system and the main bones of the human skeleton.
5216.D4.3	Compare the structure and function of compact and spongy bone.
5216.D4.4	Describe the changes in bone structure as we age.
5216.D4.5	Describe the types of bone fractures; interpret X--rays to determine fracture types and possible damage to organs.
5216.D4.6	Describe bone remodeling and distinguish between each stage of this process. Understand the role of hormones (e.g., calcitonin and parathyroid hormone) and calcium balance in this process.
5216.D4.7	Apply knowledge of bone markings, landmarks, and bone measurements to human identification.
5216.D4.8	Describe the structure and function of the different types of joints in the human body.
5216.D4.9	Describe the range of motion for different joints and determine ways to improve joint flexibility.
5216.D4.10	Describe the structure and function of the different types of muscle tissue in the human body. Describe how the structure of muscles can differ between individuals and how this contributes to human identity.

Next Level Programs of Study

Review Document

5216.D4.11	Identify the requirements for muscle contraction and explain the sliding filament mechanism.
5216.D4.12	Describe how different muscles work together in a group.
5216.D4.13	Understand the role of nerves in the functioning of muscles
5216.D4.14	Describe the role of exercise on skeletal muscle tissue.
5216.D4.15	Understand how to measure muscle fatigue and how feedback, competition and coaching affect an athlete's ability to overcome muscle fatigue.
5216.D4.16	Describe how the body responds to the physical stress of an athletic event and how an athlete prepares to overcome this.
Domain	Skin
5216.D5.1	Students will identify key layers of tissues as well as the epithelial and connective tissue at the core of human skin. They will relate the tissues and the accessory organs such as sweat glands and hair follicles to the many functions of the skin. Students will be able to discuss how damage to the skin can affect the function of the skin and of other body systems.
5216.D5.2	Describe the structure and function of human skin.
5216.D5.3	Explain how the human body senses and processes signals of pain.
5216.D5.4	Explain why pain can be considered a protective mechanism.
5216.D5.5	Distinguish between different degrees of burns and relate to damage in skin layers.
5216.D5.6	Interpret how burn damage to the skin will affect the function of the organ and overall homeostasis in the body.
5216.D5.7	Describe how burn damage to skin can affect quality of life.
Domain	Lymphatic and Immune Systems
5216.D6.1	Students will research the structure and function of the lymphatic and immune system. Students will understand lymphatic and immune system functions to drain and distribute fluid in the body as well as protect the human body against specific invaders.
5216.D6.2	Describe the structures and functions of the lymphatic and immune systems.
5216.D6.3	Describe the interaction between antigens and antibodies.
5216.D6.4	Explain how blood cells are involved in specific immunity; apply knowledge of specific immunity to describe how vaccines work.
5216.D6.5	Interpret a pedigree to determine blood types; apply knowledge of antigen--antibody interactions to determine potential blood donors for a transfusion.
5216.D6.6	Describe how antibody concentrations are affected by infection.
5216.D6.7	Relate knowledge of antibody response to specific actions of cell types in the immune system.
Domain	Investigating Medical Data
5216.D7.1	Students use medical data to investigate human body systems. Students use current techniques in biotechnology to unlock the clues of identity found in DNA.
5216.D7.2	Evaluate medical data and use this information to build a unique case study and design a medical intervention.
5216.D7.3	Use current biotechnology processes and techniques to compare similarities and differences in DNA samples from different individuals.

Anatomy and Physiology	
Career Cluster	Health Science
Program of Study	Biomedical Sciences
NLPS Sequence	B
Course Code	5276
Course Description	<i>Anatomy & Physiology is a course in which students investigate concepts related to Health Science, with emphasis on interdependence of systems and contributions of each system to the maintenance of a healthy body. It introduces students to the cell, which is the basic structural and functional unit of all organisms, and covers tissues, integument, skeletal, muscular and nervous systems as an integrated unit. Through instruction, including laboratory activities, students apply concepts associated with Human Anatomy & Physiology. Students will understand the structure, organization and function of the various components of the healthy body in order to apply this knowledge in all health related fields.</i>
Prerequisite(s)/ Corequisite(s)	None Recommended: Biology
Credits	1 to 2 semester course, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas Fulfills a Core 40 Science course requirement for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes

Liberal Arts/Sciences Requirements	
Promoted Certifications	
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Levels of Organization in the Human Body: Cellular</i>
5276.D1.1	Students confirm the different forms of cellular transport within the cell and across the plasma membrane.
5276.D1.2	Verify anatomy and physiology and describe their subdivisions
5276.D1.3	Analyze the functions of the organelles of the cell
5276.D1.4	Evaluate the plasma membrane structure to active passive transport mechanisms
5276.D1.5	Connect the difference between the transport processes relative to energy source, substances transported, direction, and mechanism
5276.D1.6	Analyze the parts of a cell and their basic functions
5276.D1.7	Students synthesize stages and processes of somatic cell division and investigate cellular differentiation during development and in the adult body.
5276.D1.8	Analyze the functions of the parts of a microscope
5276.D1.9	Analyze the phases of the cell cycle using models and a microscope
5276.D1.10	Evaluate the key phases of the cell cycle and describe the key events in each phase, including cytokinesis
5276.D1.11	Evaluate the process of cell division and why cells are considered living
5276.D1.12	Connect transcription and translation
5276.D1.13	Analyze the functions of the parts of a microscope
Domain	<i>Levels of Organization in the Human Body: Tissue and Organs</i>
5276.D2.1	Students apply and adapt the role of adhesion molecules and how these contribute to tissue formation.
5276.D2.2	Verify homeostasis and explain its significance
5276.D2.3	Recommend the 11 organ systems of the body and identify their components
5276.D2.4	Analyze common body movements
5276.D2.5	Evaluate the anatomical position
5276.D2.6	Choose the correct anatomical terms to describe body directions, regions, and body planes

5276.D2.7	Evaluate the importance of water in the human body
5276.D2.8	Connect the relationship between homeostasis imbalance and disease
5276.D2.9	Verify anatomy and physiology and describe their subdivisions
5276.D2.10	Choose the different levels of structural organization that make up the human body, and explain their relationship
5276.D2.11	Choose and name the major body cavities and their subdivisions and list the major organs contained within them
5276.D2.12	Students analyze the relationships between, and the histology and physiological functions of tissues and their cellular and biochemical composition.
5276.D2.13	Choose the nine regions and four quadrants of the abdominopelvic cavity and list organs the contain
5276.D2.14	Synthesize chemical element and list the elements that form the bulk of body matter
5276.D2.15	Choose the different levels of structural organization that make up the human body, and explain their relationships
5276.D2.16	Confirm how negative and positive feedback maintain body homeostasis
5276.D2.17	Name the different levels of structural organization that make up the human body
5276.D2.18	Evaluate and locate the four basic tissue types of the body and explain their functions
5276.D2.19	Verify atomic number, atomic mass, atomic weight, isotope, and radioisotope
5276.D2.20	Verify the three types of chemical reactions: synthesis, decomposition, and exchange
5276.D2.21	Verify acid and base, and explain the concept of pH
5276.D2.22	Establish and compare the building blocks, general structures, and biological functions of carbohydrates, proteins, lipids, and nucleic acids
Domain	<i>Movement and Support in the Human Body: The Integumentary System</i>
5276.D3.1	Students analyze the structure of the skin, including layers as well as accessory structures such as hair follicles, glands, and nails.
5276.D3.2	Identify the microscopic anatomy, location, and roles of the four basic tissue types
5276.D3.3	Identify mucous, serous, and synovial membranes
5276.D3.4	Students connect the function of the Integumentary system and the cause and effect of diseases associated with the integumentary system.
5276.D3.5	Verify the functions of the skin
5276.D3.6	Analyze the roles of the specific layers of the skin
5276.D3.7	Describe the structure and functions of the accessory structures of the skin
5276.D3.8	Identify the gross anatomy of the skin and the accessory structures
Domain	<i>Movement and Support in the Human Body: Skeletal System</i>
5276.D4.1	Students evaluate the structure, development, growth, and functions of bones.
5276.D4.2	Analyze the major regions of the skeleton and describe their relative functions
5276.D4.3	Select and describe common body movements
5276.D4.4	Select and provide examples of the types of synovial joints
5276.D4.5	Synthesize the structure and function of the gross and microscopic structures of skeletal

Next Level Programs of Study

Review Document

	muscle
5276.D4.6	Select the four bone classes and provide examples of each
5276.D4.7	Choose and describe the functions of the bone
5276.D4.8	Evaluate the gross anatomy of a typical long bone
5276.D4.9	Analyze the histology of compact and cancellous bone
5276.D4.10	Verify inorganic and organic portions of the bone
5276.D4.11	Verify intramembranous and endochondral ossification
5276.D4.12	Verify the role of osteoblasts, osteocytes, and osteoclasts
5276.D4.13	Connect how hormones and stress regulate bone remodeling
5276.D4.14	Verify the steps in fracture repair
5276.D4.15	Analyze microscopic structures of bone
5276.D4.16	Analyze the major parts of the axial and appendicular skeleton
5276.D4.17	Evaluate the structures of a typical vertebrae and identify regional features of cervical, thoracic, and lumbar vertebrae
5276.D4.18	Evaluate the skull bones and their major features
5276.D4.19	Analyze bones of the thoracic cage
5276.D4.20	Evaluate bones forming the pectoral girdle and their major features
5276.D4.21	Analyze the bones of the upper limbs and their major features
5276.D4.22	Evaluate the bones of the lower limb and their major features
5276.D4.23	Choose characteristics of the fetal skull
5276.D4.24	Select the bones of the os coxae and their major features
Domain	<i>Movement and Support of the Human Body: The Muscular System</i>
5276.D5.1	Students connect physiology and structure of skeletal, smooth, and cardiac muscle as they interact to provide movement and support of the human body.
5276.D5.2	Analyze the sliding filament model of muscle contraction
5276.D5.3	Evaluate the methods that are used to produce ATP for muscle contraction
5276.D5.4	Select the different types of muscle contraction
5276.D5.5	Establish four important functions of muscle tissue
5276.D5.6	Verify microscopic anatomy of skeletal muscle
5276.D5.7	Select the location of the major skeletal muscles
5276.D5.8	Evaluate the definition of origin, insertion and action of a muscle and identify the O, I, A of one muscle from each region of the body
5276.D5.9	Students evaluate the microscopic structure, organization, functions, and molecular basis of contraction in skeletal, smooth, and cardiac muscle.
5276.D5.10	Choose the types of skeletal muscle fibers (fast-twitch, slow twitch)
5276.D5.11	Choose muscle twitch, tetanus, and motor unit
5276.D5.12	Connect the gross, microscopic anatomy, contractile mechanisms of smooth muscle and cardiac muscle to skeletal muscle

Next Level Programs of Study

Review Document

5276.D5.13	Describe the structure and function of the gross and microscopic structures of skeletal muscle
5276.D5.14	Choose characteristics of the three major types of levers
Domain	<i>Integration and Coordination in the Human Body: The Nervous System</i>
5276.D6.1	Students establish the nervous system consists of two parts: the peripheral nervous system and the central nervous system and understand the structure and function of each.
5276.D6.2	Describe the basic functions of the nervous system
5276.D6.3	Explain the basic functions of the nervous system
5276.D6.4	Describe functions and differences in the parts of the autonomic nervous system
5276.D6.5	Describe in the parts of the autonomic nervous system
5276.D6.6	Identify characteristics of sensory receptors
5276.D6.7	Describe olfactory receptors and their role in the physiology of smell
5276.D6.8	Describe gustatory receptors and their role in the physiology of taste
5276.D6.9	Describe neurotransmitters and explain their roles in synaptic transmission
5276.D6.10	Name the components of a reflex arc and identify their roles in nervous system function
5276.D6.11	Identify the component of parts of the brain and spinal cord
5276.D6.12	Students apply concepts of contemporary electrophysiological technologies such as (for example) electroencephalogram (EEG), electrocardiogram (ECG), transcutaneous electrical nerve stimulation (TENS) and cardioversion.
5276.D6.13	Define resting membrane potential and describe its electrochemical basis
5276.D6.14	Compare and contrast action and graded potentials
5276.D6.15	Explain how action potentials are generated and propagated along neurons
5276.D6.16	Identify gross and microscopic anatomy of nervous tissue
5276.D6.17	Identify the protective roles of the cranial bones, meninges, and cerebrospinal fluid
5276.D6.18	Identify the component parts of a reflex arc
5276.D6.19	Identify the gross and microscopic anatomy of the eye
5276.D6.20	Identify the gross and microscopic anatomy of the ear
Domain	<i>Integration and Coordination in the Human Body: Somatic and Special Senses</i>
5276.D7.1	Students connect somatic senses and special senses and classify sensory receptors according to the types of stimuli that activate them.
5276.D7.2	Verify the division, origin, and function of component parts of the brain
5276.D7.3	Evaluate the functions of the cranial nerves
5276.D7.4	Analyze the gross and microscopic structure of the spinal cord
5276.D7.5	Connect the anatomy and physiology of sensory and motor pathways in the brain and spinal cord
Domain	<i>Integration and Coordination in the Human Body: The Endocrine System</i>
5276.D8.1	Students apply and adapt the structure and function of the endocrine system in relation to homeostasis, including a discussion of the specific role of hormones and distinguishing between endocrine glands and endocrine cells found in other organs.

Next Level Programs of Study

Review Document

5276.D8.2	Establish the general function of the endocrine system
5276.D8.3	Verify gland and differentiate between endocrine glands
Domain	<i>Absorption and Excretion in the Human Body: The Respiratory System</i>
5276.D9.1	Students verify and locate major organs of the respiratory system and discuss their functions.
5276.D9.2	Confirm the general functions of the respiratory system
5276.D9.3	Choose the mechanisms of gas exchange in the lungs and tissues
5276.D9.4	Students evaluate the breathing processes (i.e., inspiration, expiration, respiratory volumes, and capacities).
5276.D9.5	Connect how oxygen is carried in the blood and what influences oxygen loading and unloading
5276.D9.6	Establish the processes of internal and external respiration
Domain	<i>Absorption and Excretion in the Human Body: The Urinary System</i>
5276.D10.1	Students evaluate and locate major organs of the urinary system and discuss their functions.
5276.D10.2	Establish the general functions of the urinary system
5276.D10.3	Apply and adapt the regulation of water intake and output
5276.D10.4	Integrate the major fluid compartments including intracellular, intravascular, and interstitial
5276.D10.5	Students analyze the function of the kidneys in relation to homeostatic control of bodily fluids, blood pressure and erythrocyte production.
5276.D10.6	Analyze the functional process of urine formation, including filtration, re--absorption, and secretion.
5276.D10.7	Select factors that regulate urine volume and composition
5276.D10.8	Evaluate buffer systems and their role in acid/base balance
Domain	<i>Transport in the Human Body: The Blood</i>
5276.D11.1	Students evaluate the process of homeostasis and how it is achieved.
5276.D11.2	Evaluate the process of homeostasis, including coagulation
5276.D11.3	Students analyze the functions of the blood including its role in responding to invading microorganisms, its defense mechanisms (e.g., acute inflammation), and the immune response.
5276.D11.4	Analyze the general functions of the blood
5276.D11.5	Evaluate the composition and function of plasma
5276.D11.6	Analyze the composition and function of the formed elements of the blood
5276.D11.7	Evaluate the functional roles and characteristics of the different types of blood vessels
5276.D11.8	Verify how carbon dioxide is carried in the blood
5276.D11.9	Connect the regulation of blood volume, heart rate, stroke, volume, cardiac output and blood pressure
Domain	<i>Transport in the Human Body: The Cardiovascular System</i>
5276.D12.1	Students apply concepts and locate the organs of the cardiovascular system and discuss their functions.
5276.D12.2	Select the general functions of the cardiovascular system

Next Level Programs of Study

Review Document

5276.D12.3	Verify the physiology of cardiac muscle contraction
5276.D12.4	Students manage the cardiac cycle and explain how it is controlled.
5276.D12.5	Integrate the cardiac cycle, including basic rhythm of heartbeat, and pressure and volume changes
5276.D12.6	Connect control of pulmonary ventilation
Domain	<i>Transport in the Human Body: The Lymphatic System and Immune Mechanisms</i>
5276.D13.1	Students select the major organs of the lymphatic system and discuss their functions.
5276.D13.2	Analyze the general functions of the lymphatic system
5276.D13.3	Students establish the lines of defense including the cellular and non--cellular components of the immune system.
5276.D13.4	Evaluate the pattern of lymph circulation
Domain	<i>Absorption and Excretion in the Human Body: The Digestive System</i>
5276.D14.1	Students synthesize and locate major and accessory organs of the digestive system and discuss their functions.
5276.D14.2	Verify the mechanical and chemical processes of digestion and absorption
5276.D14.3	Confirm hormonal and neural regulation of digestive processes
5276.D14.4	Students evaluate the digestive processes from ingestion to defecation.
5276.D14.5	Choose the functions of the different organs of the gastrointestinal tract and the accessory organs of digestion
Domain	<i>The Life Cycle in the Human Body: The Reproductive System</i>
5276.D15.1	Students analyze and locate major and accessory organs of the female reproductive systems and discuss their functions including oogenesis and spermatogenesis.
5276.D15.2	Evaluate the general functions of the reproductive system
5276.D15.3	Select the specific roles of the ovaries, fallopian tubes, uterus, and vagina
5276.D15.4	Integrate the developmental highlights of an embryo and fetus
5276.D15.5	Design the birth process
5276.D15.6	Students connect the role of hormones in the reproductive system.
5276.D15.7	Establish the specific roles of the testes, epididymis vas deferens, seminal vesicles, prostate, bulbourethral glands, and urethra
5276.D15.8	Analyze the hormonal changes during the menstrual cycle
5276.D15.9	Verify the hormonal changes that occur during pregnancy
5276.D15.10	Describe sex determination

Course Code	5217	
Course Description	<p><i>Medical Interventions is a course that studies medical practices, including interventions, to support humans in treating disease and maintaining health. Using a project-based learning approach, students will investigate various medical interventions that extend and improve quality of life, including gene therapy, pharmacology, surgery, prosthetics, rehabilitation, and supportive care. Students will also study the design and development of various interventions. Lessons will cover the history of organ transplants and gene therapy with additional readings from current scientific literature addressing cutting edge developments. NOTE: This course aligns with the PLTW Medical Interventions curriculum. Use of the PLTW Curriculum may require additional training and membership in the PLTW network.</i></p>	
Prerequisite(s)/ Corequisite(s)	Principles of Biomedical Sciences

Review Document

Arts/Sciences Requirements	
Promoted Certifications	
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Medical Interventions</i>
5217.D1.1	Students investigate the variety of interventions involved in the prevention, diagnosis, and treatment of disease.
5217.D1.2	Identify and describe the main categories of medical interventions and when they are necessary to maintain human health.
5217.D1.3	Describe how scientists gather evidence about a disease or disorder to determine if a medical intervention is necessary.
5217.D1.4	Describe the steps that scientists take to diagnose, treat, and prevent diseases and disorders.
5217.D1.5	Understand the difference between chronic and acute inherited and non-inherited disorders and communicable diseases.
Domain	<i>Infectious Diseases, Treatments and Preventions</i>
5217.D2.1	Students explore the diagnostic process used to identify an unknown infection, the use of antibiotics as a treatment, how bacteria develop antibiotic resistance, and how vaccinations are developed and used to prevent infection.
5217.D2.2	Describe how infectious diseases are spread throughout a population.
5217.D2.3	Compare and contrast bacterial and viral infections regarding their diagnosis, treatment and outcome.
5217.D2.4	Describe how antibiotics disrupt the functioning of bacteria to stop a bacterial infection.
5217.D2.5	Understand how bacteria can develop resistance to antibiotics.
5217.D2.6	Explain human behaviors that promote the development of antibiotic resistant bacteria in our population.
5217.D2.7	Understand the role of vaccination in the prevention and treatment of disease and how this has impacted disease trends.
5217.D2.8	Describe the molecular tools and recombinant DNA technologies used to produce vaccines.
5217.D2.9	Describe how vaccines activate the body's immune system.
Domain	<i>The Ear and Hearing Loss</i>
5217.D3.1	Students investigate the physics of sound as well as learn how hearing works and will conduct a variety of hearing assessments. Students will explore how damage to the outer, middle, and/or inner ear results in hearing loss. Students will learn how to interpret audiograms and match up their patient case study with the corresponding audiogram.
5217.D3.2	Describe the three--dimensional structure of the human ear and how the structure relates to its function.
5217.D3.3	Understand how diseases can affect the functioning of the ear.
5217.D3.4	Describe how auditory function is measured and used to diagnose hearing problems.

Next Level Programs of Study

Review Document

5217.D3.5	Understand the treatments for hearing loss and the bioethical concerns related to cochlear implants.
Domain	Genetic Screening
5217.D4.1	Students explore how to screen and evaluate the code in our DNA. Students will examine the available types of genetic testing and screening and discuss ethical implications of these tests. Students will focus on prenatal testing, newborn testing, and carrier screening; however, the use of genetic testing to screen for disease risk will also be addressed. Students will examine how the study of genetics will alter the way doctors and scientists treat disease, as well as the way humans reproduce. Students will learn about gene therapy, a potentially life--saving treatment for many debilitating genetic disorders.
5217.D4.2	Describe the different biotechnologies that are used in genetic testing.
5217.D4.3	Describe how genetic testing is used to screen for disease risk.
5217.D4.4	Describe the types of prenatal and newborn testing and screening that are available, the information they provide, their limitations, risks, and ethical implications.
5217.D4.5	Understand the role of gene therapy in treating genetically inherited diseases.
5217.D4.6	Describe how vectors are engineered to transfer DNA to human cells.
Domain	Cancer
5217.D5.1	Students explore the diagnostic process used to determine the presence of cancerous cells, the risk factors and prevention of cancer, rehabilitation after disease or injury, and the design process for new medications, prosthetics, and nanotechnology.
5217.D5.2	Describe the different agents that cause changes in genetic material resulting in cancer.
5217.D5.3	Describe the fundamental characteristics that all cancers have in common.
5217.D5.4	Describe the different types of diagnostic imaging techniques that are currently used to detect and diagnose different forms of cancer.
5217.D5.5	Describe the microscopic differences between cancer cells and normal cells.
5217.D5.6	Understand that the sequence of an individual's DNA is the same in every cell and when compared with individuals of the same species will be mostly identical. Recognize that there are differences in how genes are expressed in tissues within an individual and between individuals of the same species.
5217.D5.7	Describe how microarray technology is used to detect changes in gene expression from the same tissue types of different individuals.
5217.D5.8	Describe the molecular tests that are used to detect inherited cancers.
5217.D5.9	Describe ways in which individuals can reduce their risk for developing cancer.
5217.D5.10	Describe the most common cancer treatments and how these affect cancerous and noncancerous tissues.
5217.D5.11	Describe how new cancer treatments are being developed and tailored to an individual's genetic profile.
Domain	Synthesizing Proteins to Treat Human Disease
5217.D6.1	Students learn how to produce and purify a protein in a laboratory setting to understand how human insulin is produced to treat diabetics.

Next Level Programs of Study

Review Document

5217.D6.2	Demonstrate how amino acid sequence determines protein shape.
5217.D6.3	Explain how bacterial plasmids are used to produce human proteins.
5217.D6.4	Describe current techniques in biotechnology that are employed for large scale production of transgenic human proteins.
5217.D6.5	Describe the role of insulin and its large-scale production in the treatment of diabetes.
Domain	Organ Failure
5217.D7.1	Students investigate current organ transplant technologies and construct an argument from the perspective of different stakeholders.
5217.D7.2	Describe how organ failure is diagnosed, what the available treatment options are and how a determination is made regarding organ transplant.
5217.D7.3	Describe how organs are matched using blood typing and HLA typing.
5217.D7.4	Describe general surgical techniques employed in live organ donor transplant.
5217.D7.5	Identify which human organs can be replaced and explain why other organs cannot.
5217.D7.6	Describe the benefits and risks of using xenotransplantation and tissue engineering for replacement.

Biomedical Innovations	
Career Cluster	Health Science
Program of Study	Biomedical Sciences
NLPS Sequence	D
Course Code	5219
Course Description	<i>Biomedical Innovations is a capstone course designed to give students the opportunity to design innovative solutions for the health challenges of the 21st century as they work through progressively challenging open-ended problems, addressing topics such as clinical medicine, physiology, biomedical engineering, and public health. Students have the opportunity to work on an independent project and may work with a mentor or advisor from a healthcare or postsecondary industry. Throughout the course, students are expected to present their work to an adult audience that may include representatives from the local business and healthcare community. NOTE: This course aligns with the PLTW Biomedical Innovations curriculum. Use of the PLTW Curriculum may require additional training and membership in the PLTW network.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Biomedical Sciences; Human Body Systems or Anatomy and Physiology; Medical Interventions
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Design and Effective Emergency Room</i>
5219.D1.1	Use knowledge of emergency medical careers, diagnostic testing and patient evaluation, human body systems, and medical interventions to analyze the working of an emergency room.
5219.D1.2	Discuss inefficiencies in emergency rooms.
5219.D1.3	Design a more efficient emergency medicine delivery system.
Domain	<i>Exploring Human Physiology</i>
5219.D2.1	Investigate research study methods.
5219.D2.2	Research how to set up and conduct valid and reliable studies.
5219.D2.3	Investigate ways in which data can be manipulated and explore what to look for when evaluating data presented by others.
5219.D2.4	Critique scientific data presented in popular media and compare such data to scientific data

Next Level Programs of Study

Review Document

	presented in scientific journals.
5219.D2.5	Use scientific data analysis to analyze the results of a scientific investigation.
5219.D2.6	Choose a question relating to one or more body systems then design, conduct, and analyze an experimental study to answer the question.
Domain	Design a Medical Innovation
5219.D3.1	Investigate the evolution of various biomedical products.
5219.D3.2	Brainstorm ideas for a new biomedical product or for a way to improve an existing product.
5219.D3.3	Evaluate biomedical solutions of the past and present.
5219.D3.4	Explore possible biomedical design solutions, select the best approach, and develop a design proposal for a new or improved biomedical product.
5219.D3.5	Create and build a model, prototype, or schematic and create a marketing plan to pitch product to potential investors.
Domain	Investigating Environmental Health
5219.D4.1	Investigate various aspects of environmental health.
5219.D4.2	Explore and analyze case studies to identify environmental health concerns and toxins and identify potential exposures in students' own daily lives.
5219.D4.3	Test local water samples as well as simulated well water for presence of coliforms and E. coli.
5219.D4.4	Isolate DNA from three different bacterial cultures and perform PCR to detect hazardous bacterial strains that may cause various symptoms.
5219.D4.5	Study the relationship between exposure and illness using a case study involving lead poisoning.
5219.D4.6	Design an experiment to test the effects of particular chemicals and doses on plant growth.
5219.D4.7	Use results to produce a dose-response curve and relate graph to overall effect of selected chemical.
5219.D4.8	Compile a comprehensive environmental health profile of students' local area using publicly available databases, as well as personal contacts and visits, to uncover people, wildlife, and environmental resources.
5219.D4.9	Use compiled information to design an action plan to increase awareness, monitor resources or individuals in the community, improve conditions, and ensure a clean and safe environment.
Domain	Combating a Public Health Issue
5219.D5.1	Evaluate patient diagnostic test results to identify illness.
5219.D5.2	Assess evidence to deduce source of illness.
5219.D5.3	Design and analyze an epidemiological study to test proposed source.
5219.D5.4	Plan control and prevention efforts to limit future cases of illness.
5219.D5.5	Investigate major health issues in students' local area, across the United States, and around the globe.
5219.D5.6	Evaluate what types of interventions would address various health issues and begin to identify where a comprehensive public health plan would have the greatest impact.

Next Level Programs of Study

Review Document

5219.D5.7	Propose an intervention plan that targets an infectious disease, a chronic illness, a specific injury or set of injuries, a mental illness, or any other pressing health concern with focus on treatment, prevention, research, or education efforts surrounding the chosen health issue.

Healthcare Specialist Capstone	
Career Cluster	Health Science
Program of Study	Biomedical Sciences, Pre-Nursing
NLPS Sequence	D
Course Code	7255
Course Description	<i>The Healthcare Specialist Capstone course will facilitate healthcare students' acquisition of additional knowledge and skills necessary to work in a variety of healthcare settings beyond a long term care facility including hospitals, doctors' offices, and clinics. Students can accomplish this goal by completing coursework that will cover topics such as Medical Law and Ethics, Electronic Health Records, and/or Behavioral Health. Schools may offer additional healthcare certifications such as the Certified Clinical Medical Assistant (CCMA) or Phlebotomy along with the coursework or in place of the coursework.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Healthcare; Medical Terminology; Healthcare Specialist: CNA, EMT or Certified Clinical Medical Assistant (CCMA)
Credits	2 semester course, 2 semester required, 1-3 credits per semester, 6 credits max
Counts Toward	Counts as a Directed Elective or Elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	
ADDITIONAL COURSE INFO	
Funding	High Value Level II

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Medical Law and Ethics
7255.D1.1	Explain how professional standards, laws, and ethics guide behavior for health care professionals in medical practices, hospitals, long term care facilities, clinics, and in emergency service settings.
7255.D1.2	Compare and contrast concepts related to ethics, bioethics, and law.
7255.D1.3	Discuss the United States legal system and processes as they relate to medical practice.
7255.D1.4	Describe the current health care environment including types of practices, licensing, and certification of health care professionals.
7255.D1.5	Defend the right of physicians and their patients as protected by federal and state laws.
7255.D1.6	Detail federal and state statutes pertinent to health care professionals in the areas of hiring and employment, safety, patient privacy and confidentiality, consumer protection, and public records/reporting.
7255.D1.7	Outline the public duties expected of physicians in the areas of reporting, legal records, management of controlled substances, and the Good Samaritan laws.
7255.D1.8	Outline appropriate risk management procedures regarding minimizing litigation and practicing within legal boundaries.
Domain	Electronic Health Records
7255.D2.1	Describe accepted processes for handling medical records and for medical documentation.
7255.D2.2	Apply course concepts to discussions of bioethical dilemmas.
7255.D2.3	Describe the process, principles, and issues of risk management.
7255.D2.4	Describe the transaction, privacy and security standards as related to HIPAA.
7255.D2.5	Acquire, store and retrieve patient information from the EHR database.
7255.D2.6	Execute, manage EHR database and maintain software and hardware including updates and file maintenance (e.g., purging, archiving).
7255.D2.7	Operate integrated devices with EHR software (e.g., scanners, fax machine, signature pads, and cameras) to transmit patient data for external use (e.g., insurance, pharmacies, and other providers).
7255.D2.8	Access clinical vocabularies in a health information system when appropriate and comply with patient safety standards regarding abbreviations in the health information system.
7255.D2.9	Generate Insurance verifications, patient statements, encounter forms/super bills, and face/admission sheets.
7255.D2.10	Retrieve diagnosis and procedural descriptions from medical records, enter codes and billing

Next Level Programs of Study

Review Document

	information into the EHR, and post payments to patient accounts at the time of visit.
7255.D2.11	Understand how to find codes in the ICD, CPT and HCPCS manuals.
7255.D2.12	Review charts to ensure compliance of proper charting, report to the proper enforcement office, and document the link between effective charting and reimbursement for procedures performed by clinicians.
7255.D2.13	Adhere to professional standards of care, including HIPAA Privacy & Security Rules and facility policy, as they pertain to medical records.
7255.D2.14	Generate reports for clinical and financial resources (e.g., aging report and financial analysis).
7255.D2.15	Compile and maintain medical care and census data for continuity of care records (e.g., reports on diseases treated, surgery performed, and use of hospital beds for clinical audits).
7255.D2.16	Provide ongoing end-user training and technical support of EHR software.
7255.D2.17	Execute EHR workflow, patient flow within the office (e.g., scheduling, patient registration and verification, patient referrals).
7255.D2.18	Use proper privileges and develop clinical templates from existing searchable databases.
Domain	Behavioral Health
7255.D3.1	Identify theories and demonstrate fundamental knowledge of biological, sociological, cultural, psychological, and spiritual development across the adult lifespan.
7255.D3.2	Define and discuss the impact of culture, diversity, and social justice as they pertain to perception and treatment of behavioral health concerns and aging.
7255.D3.3	Examine lifestyle behaviors associated with the development of chronic behavioral health illnesses.
7255.D3.4	Discuss and identify treatment options, pharmacological and non-pharmacological interventions of psychological and behavioral disorders for the following: Anxiety, Stress Disorders, Disorders of Mood, Eating Disorders, Substance Use and Addictive Disorders, Disorders of Aging and Cognition, exhibiting expression or indications of distress (i.e., anxiety, striking out, self-isolating, etc.)
7255.D3.5	Identify types and classes of drugs related to the treatment of selected behaviors and abnormal behaviors, including potential complications from drug interactions.
7255.D3.6	Discuss and define parameters of therapeutic touch and communication.
7255.D3.7	Demonstrate general and specific verbal interventions used to support patient treatment and recovery.
7255.D3.8	Demonstrate understanding of caregiver behaviors which support low conflict interactions with patients.
7255.D3.9	Identify strategies for behavioral health promotion and interprofessional collaborative practice when interacting with patients with behavioral health issues.
7255.D3.10	Describe and discuss the dying process, the definition of death, and the stages of grief as they apply to caregivers.
Domain	Healthcare Specialist Certifications
7255.D4.1	Certified Nursing Assistant (CNA)
7255.D4.2	Emergency Medical Technician (EMT)
7255.D4.3	Certified Clinical Medical Assistant (CCMA)
7255.D4.4	Phlebotomy (dual enrollment only)
7255.D4.5	Electrocardiography (dual enrollment only)

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Healthcare Systems
7168.D1.1	Describe how health care is developed, delivered, and organized.
7168.D1.2	Discuss health care delivery systems and trends.
7168.D1.3	Identify ethical and legal issues in health care.
7168.D1.4	Apply basic medical terminology principles.
7168.D1.5	Identify the basic organization of the human body, the body systems, and the stages of growth and development.
7168.D1.6	Analyze behaviors for success in the health care field, including lifestyles management, professionalism, and lifelong learning.
7168.D1.7	Describe personal and workplace safety measures including body mechanics, infection control, and environmental safety.
7168.D1.8	Discuss principles of communication in a health care setting including treating the patient with respect as an individual, accommodation of cultural diversity, identifying and providing for patient needs.
7168.D1.9	Identify the purposes and procedures for medical documentation.
7168.D1.10	Compare various health care occupations, including education requirements, credentialing or licensing, scope of practice, and workforce data.
Domain	CPR / Basic Life Support
7168.D2.1	Recognize cardiac vascular emergencies and/or respiratory arrest and take appropriate action.
7168.D2.2	Establish an airway and initiate ventilation.
7168.D2.3	Manage obstructed airway in adult, child, and infant.
7168.D2.4	Perform one and two-person adult, child and infant CPR using universal precautions.
7168.D2.5	Demonstrate the use of an Automated External Defibrillator (AED)

Medical Terminology	
Career Cluster	Health Science
Program of Study	Central Service Technician, Certified Clinical Medical Assistant, Emergency Medical Services, Pharmacy, Pre-Nursing
NLPS Sequence	B
Course Code	5274
Course Description	<i>Medical Terminology prepares students with language skills necessary for effective, independent use of health and medical reference materials. It includes the study of health and medical abbreviations, symbols, and Greek and Latin word part meanings, all taught within the context of body systems. This course builds skills in pronouncing, spelling, and defining new words encountered in verbal and written information in the healthcare industry. Students have the opportunity to acquire essential skills for accurate and logical communication, and interpretation of medical records. Emphasis is on forming a foundation of a medical vocabulary including appropriate and accurate meaning, spelling, and pronunciation of medical terms, abbreviations, signs, and symbols.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Healthcare or Principles of Pharmacy Tech
Credits	2 semester course, 2 semesters required, 1 credit per semester, maximum of 2 credits

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Medical Terminology
5274.D1.1	Demonstrate the use of a medical dictionary.
5274.D1.2	Define and properly use prefixes and suffixes with word roots and combining forms to build medical terms.
5274.D1.3	Define medical terms.
5274.D1.4	Locate and identify the organs within body systems and define their basic functions.
5274.D1.5	Define and use medical abbreviations, signs, and symbols accurately.
5274.D1.6	Define common diseases and conditions.
5274.D1.7	Identify selected procedures, treatments, and diagnostic tests.
5274.D1.8	Spell medical terms correctly.
5274.D1.9	Pronounce medical terms.
Domain	Essential Anatomy and Physiology
5274.D2.1	Apply basic knowledge of chemistry as pertinent to the human body.
5274.D2.2	Identify the major body systems and the organs which comprise each of them.
5274.D2.3	Summarize and define the basic structure and function of each of the body systems.
5274.D2.4	Demonstrate the ability to utilize a microscope to examine prepared slides and apply to physiological conditions and body systems.
5274.D2.5	Adapt the structural and functional aspects of cell organization to the body systems.
5274.D2.6	Classify the types and composition of the 4 basic types of body tissues.
5274.D2.7	Discuss and identify disease states in relation to body systems.

Domain	CNA Skills
7166.D1.1	Demonstrate an understanding of the role of the nursing assistant in health care.
7166.D1.2	Identify and demonstrate beginning nursing assistant knowledge, skills and attitudes for the provision of quality nursing care.
7166.D1.3	Demonstrate communication techniques appropriate to a nursing assistant.
7166.D1.4	Perform resident care procedures according to the Indiana State Department of Health standards.
7166.D1.5	Utilize knowledge of the legal and ethical aspects of health care related to the responsibilities as a nursing assistant and member of the health care team.
7166.D1.6	Apply basic math skills to patient care situations.
7166.D1.7	Apply knowledge of Infection Control Standard Operating Procedures, visitation guidelines for Long-term Care Facilities and proper use of PPE in the practice of skills and during supervised clinical experience.
Domain	Dementia Care
7166.D2.1	Identify the major components of the dementia disease process and its treatment.
7166.D2.2	Discuss how dementia affects patient behavior.
7166.D2.3	Define different types of communication and why each type is important.
7166.D2.4	Identify the key issues of keeping the environment safe for a person with dementia.
7166.D2.5	Identify methods of involving the family in the care of a patient with dementia.
7166.D2.6	Identify the components of planning care and activities that are meaningful to the client with dementia.
7166.D2.7	Discuss appropriate communication techniques in dealing with a resident with dementia.
7166.D2.8	Discuss the impact of the death of a patient/resident.

	striking out, self-isolating, etc.)
7255.D3.5	Identify types and classes of drugs related to the treatment of selected behaviors and abnormal behaviors, including potential complications from drug interactions.
7255.D3.6	Discuss and define parameters of therapeutic touch and communication.
7255.D3.7	Demonstrate general and specific verbal interventions used to support patient treatment and recovery.
7255.D3.8	Demonstrate understanding of caregiver behaviors which support low conflict interactions with patients.
7255.D3.9	Identify strategies for behavioral health promotion and interprofessional collaborative practice when interacting with patients with behavioral health issues.
7255.D3.10	Describe and discuss the dying process, the definition of death, and the stages of grief as they apply to caregivers.
Domain	Healthcare Specialist Certifications
7255.D4.1	Certified Nursing Assistant (CNA)
7255.D4.2	Emergency Medical Technician (EMT)
7255.D4.3	Certified Clinical Medical Assistant (CCMA)
7255.D4.4	Phlebotomy (dual enrollment only)
7255.D4.5	Electrocardiography (dual enrollment only)

Competency #	Competency
Domain	Healthcare Systems
7168.D1.1	Describe how health care is developed, delivered, and organized.
7168.D1.2	Discuss health care delivery systems and trends.
7168.D1.3	Identify ethical and legal issues in health care.
7168.D1.4	Apply basic medical terminology principles.
7168.D1.5	Identify the basic organization of the human body, the body systems, and the stages of growth and development.
7168.D1.6	Analyze behaviors for success in the health care field, including lifestyles management, professionalism, and lifelong learning.
7168.D1.7	Describe personal and workplace safety measures including body mechanics, infection control, and environmental safety.
7168.D1.8	Discuss principles of communication in a health care setting including treating the patient with respect as an individual, accommodation of cultural diversity, identifying and providing for patient needs.
7168.D1.9	Identify the purposes and procedures for medical documentation.
7168.D1.10	Compare various health care occupations, including education requirements, credentialing or licensing, scope of practice, and workforce data.
Domain	CPR / Basic Life Support
7168.D2.1	Recognize cardiac vascular emergencies and/or respiratory arrest and take appropriate action.
7168.D2.2	Establish an airway and initiate ventilation.
7168.D2.3	Manage obstructed airway in adult, child, and infant.
7168.D2.4	Perform one and two-person adult, child and infant CPR using universal precautions.
7168.D2.5	Demonstrate the use of an Automated External Defibrillator (AED)

Medical Terminology	
Career Cluster	Health Science
Program of Study	Central Service Technician, Certified Clinical Medical Assistant, Emergency Medical Services, Pharmacy, Pre-Nursing
NLPS Sequence	B
Course Code	5274
Course Description	<i>Medical Terminology prepares students with language skills necessary for effective, independent use of health and medical reference materials. It includes the study of health and medical abbreviations, symbols, and Greek and Latin word part meanings, all taught within the context of body systems. This course builds skills in pronouncing, spelling, and defining new words encountered in verbal and written information in the healthcare industry. Students have the opportunity to acquire essential skills for accurate and logical communication, and interpretation of medical records. Emphasis is on forming a foundation of a medical vocabulary including appropriate and accurate meaning, spelling, and pronunciation of medical terms, abbreviations, signs, and symbols.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Healthcare or Principles of Pharmacy Tech
Credits	2 semester course, 2 semesters required, 1 credit per semester, maximum of 2 credits

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Medical Terminology
5274.D1.1	Demonstrate the use of a medical dictionary.
5274.D1.2	Define and properly use prefixes and suffixes with word roots and combining forms to build medical terms.
5274.D1.3	Define medical terms.
5274.D1.4	Locate and identify the organs within body systems and define their basic functions.
5274.D1.5	Define and use medical abbreviations, signs, and symbols accurately.
5274.D1.6	Define common diseases and conditions.
5274.D1.7	Identify selected procedures, treatments, and diagnostic tests.
5274.D1.8	Spell medical terms correctly.
5274.D1.9	Pronounce medical terms.
Domain	Essential Anatomy and Physiology
5274.D2.1	Apply basic knowledge of chemistry as pertinent to the human body.
5274.D2.2	Identify the major body systems and the organs which comprise each of them.
5274.D2.3	Summarize and define the basic structure and function of each of the body systems.
5274.D2.4	Demonstrate the ability to utilize a microscope to examine prepared slides and apply to physiological conditions and body systems.
5274.D2.5	Adapt the structural and functional aspects of cell organization to the body systems.
5274.D2.6	Classify the types and composition of the 4 basic types of body tissues.
5274.D2.7	Discuss and identify disease states in relation to body systems.

Program of Study	Certified Clinical Medical Assistant
NLPS Sequence	C
Course Code	7164
Course	<i>The Certified Clinical Medical Assistant (CCMA) course will prepare students for the National</i>

Next Level Programs of Study

Review Document

Description	<i>Healthcare Association CCMA exam. Instruction includes taking and recording vital signs, preparing patients for examination, patient education, and assisting the physician during the exam. The collecting and preparation of laboratory specimen and basic laboratory testing will be covered. The course prepares students for the administration of medication, venipuncture, ECG, and wound care and provides a basic understanding of the clinical and administrative duties and responsibilities pertinent to medical offices. Instruction in medical correspondence and records, case histories of patients, filing, telephone procedures, appointment scheduling, receptionist duties, and processing mail is also included. Written, verbal, and nonverbal communications according to patient needs are covered as well as documentation and associated legal and ethical boundaries.</i>	
Prerequisite(s)/ Corequisite(s)	Principles of Healthcare; Medical Terminology	
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum	
Counts Toward	Counts as a directed elective or elective for all diplomas	
Dual Credit Status	X (PCL/ CTE)	
Additional Notes	Schools are strongly encouraged to offer the CCMA course along with Principles of Healthcare and Medical Terminology as part of a 3 period block of time.

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Healthcare Systems
7164.D1.1	Identify the roles and responsibilities, scope of practice, titles and credentials, and the licensing and certification process of the Medical Assistant (MA), other healthcare providers, and allied health personnel
7164.D1.2	Describe the various healthcare delivery models (HMOs, PPOs, POS, PCMH, accountable care organizations/payment for performance (ACOs), hospice, and collaborative care models).
7164.D1.3	Describe the differences between general and specialty services, ancillary and alternative therapies that take place within the healthcare setting
7164.D1.4	Explain insurance fundamentals
Domain	Medical Terminology
7164.D2.1	Define and use common medical abbreviations, acronyms, and symbols accurately
7164.D2.2	Define and properly use prefixes and suffixes with word roots and combining forms to build medical terms
7164.D2.3	Define medical conditions, procedures, and instruments
7164.D2.4	Identify and use positional and directional terminology accurately
Domain	Basic Pharmacology
7164.D3.1	Identify commonly prescribed medications and approved abbreviations, forms of medication (pill, capsule, ointment), and discern between look alike/sound alike medications
7164.D3.2	Identify the classifications of medications including, side effects, adverse effects, indications, and contraindications
7164.D3.3	Calculate proper measurement (metric and household), mathematical conversions, and dosage calculations
7164.D3.4	Explain routes of administration
7164.D3.5	Describe the processes involved with Pharmacokinetics (absorption, distribution, metabolism, and excretion).
7164.D3.6	Demonstrate an understanding of the rights of drug/medication administrations.
7164.D3.7	Use the Physicians' Desk Reference and online resources
7164.D3.8	Describe the principles of proper storage and disposal of medications.
Domain	Nutrition
7164.D4.1	Identify the nutrients necessary for good nutrition (general and related to diseases and conditions)
7164.D4.2	Explain the role vitamins and supplements play in nutrition and health wellness.
7164.D4.3	Demonstrate how to read food labels
7164.D4.4	Discuss disease states and treatments related to nutritional health
Domain	Psychology
7164.D5.1	Describe the developmental states of an individual, including end-of-life and stages of grief
7164.D5.2	Describe the psychology the physically disabled, developmentally delayed, and those with diseases
7164.D5.3	Explain how environmental and socio-economic stressors impact psychology of an individual
7164.D5.4	Explain the role mental health screening can play on the health of an individual
7164.D5.5	Identify defense mechanisms that impact the psychology of an individual.

Next Level Programs of Study

Review Document

Domain	Essential Anatomy and Physiology
7164.D6.1	Identify the anatomical structures, locations, and positions of the body structures and organ systems
7164.D6.2	Explain the structure and function of major body systems, and the interactions between organ systems
7164.D6.3	Describe the signs, symptoms, and etiology of common diseases, conditions, and injuries due to pathophysiology and disease processes.
7164.D6.4	Explain diagnostic measures and treatment modalities
7164.D6.5	Describe incidence, prevalence, risk factors, and factors leading to high mortality and morbidity
7164.D6.6	Explain epidemics and pandemics
7164.D6.7	Identify cell structures, common pathogens and nonpathogens, organisms and microorganisms, and infectious agents, chain of infection, and conditions for growth.
Domain	Patient Care
7164.D7.1	Identify patient
7164.D7.2	Prepare examination/procedure room
7164.D7.3	Ensure patient safety within the clinical setting
7164.D7.4	Complete a comprehensive clinical intake process, including the purpose of the visit
7164.D7.5	Measure vital signs
7164.D7.6	Obtain anthropomorphic measurements
7164.D7.7	Identify/document/report abnormal signs and symptoms
7164.D7.8	Assist provider with general physical examination
7164.D7.9	Assist provider with specialty examinations
7164.D7.10	Prepare patient for procedures
7164.D7.11	Prepare and administer medications and/or injectables using non parenteral and parenteral routes (excluding IV) (for example, oral, buccal, sublingual, intramuscular, intradermal, subcutaneous, topical, transdermal, and inhalation)
7164.D7.12	Perform staple and suture removal
7164.D7.13	Administer eye, ear, and topical medications
7164.D7.14	Perform ear and eye irrigation
7164.D7.15	Administer first aid and basic wound care
7164.D7.16	Identify and respond to emergency/priority situations
7164.D7.17	Perform CPR
7164.D7.18	Assist provider with patients presenting with minor and traumatic injury
7164.D7.19	Assist with surgical interventions (for example, sebaceous cyst removal, toenail removal, colposcopy, cryosurgery)
7164.D7.20	Review provider's discharge instructions/plan of care with patients
7164.D7.21	Follow guidelines for sending orders for prescriptions and refills by telephone, fax, or email
7164.D7.22	Document relevant aspects of patient care in patient record
7164.D7.23	Operate basic functions of an EHR/EMR system
7164.D7.24	Enter orders into CPOE
7164.D7.25	Identify Patient identifiers and elements of a patient medical/surgical/family/social history
7164.D7.26	Perform various methods for obtaining vital signs (manual & electronic blood pressure;

Next Level Programs of Study

Review Document

	respiration, temperature, pulse, pulse oximetry)
7164.D7.27	Recognize normal and abnormal vital signs
7164.D7.28	Perform methods for measuring height, weight, BMI; special considerations related to age, health, status, disability; growth chart
7164.D7.29	Understand and demonstrate positioning and draping requirements for general and specialty examinations, procedures, and treatments
7164.D7.30	Use various equipment, instruments, and supplies necessary to prepare the examination or procedure room, required equipment, supplies and instruments related to general physical examinations, and required equipment, supplies, and instruments related to specialty examinations
7164.D7.31	Demonstrate an understanding of immunization schedules and requirements
7164.D7.32	Record allergies (for example, common drug and non-drug allergies such as latex, bee stings; type of reactions [mild, moderate, and severe] how to respond to allergic reactions or anaphylactic shock)
7164.D7.33	Recognize the signs of infection
7164.D7.34	Utilize sterile techniques related to examinations, procedures, injections, and medication administration
7164.D7.35	Calculate dosage measurements related to oral medications and injectables
7164.D7.36	Explain commonly used oral and parenteral medications, including forms, packaging, routes of administration; rights of medication administration, and demonstrate techniques of administration
7164.D7.37	Describe storage; labeling; and medication logs, supplies and equipment related to injections, and storage of injectables
7164.D7.38	Demonstrate techniques and use of instruments for suture and staple removal, types, and sizes of sutures
7164.D7.39	Demonstrate methods of administration, techniques, procedures, and supplies related to eye, ear, and topical medications
7164.D7.40	Demonstrate use of instruments, supplies, and techniques related to eye and ear irrigation
7164.D7.41	Identify commonly occurring types of injuries (for example, lacerations, abrasions, fractures, sprains) and demonstrate treatment for commonly occurring types of injuries, (for example, bandaging, ice, elevation)
7164.D7.42	Identify commonly occurring types of surgical interventions and the signs and symptoms related to urgent and emergency situations (for example, diabetic shock, heat stroke, allergic reactions, choking, syncope, seizure)
7164.D7.43	Explain emergency action plans (for example, crash cart, emergency injectables)
7164.D7.44	Demonstrate procedures to perform CPR, basic life support and AED
Domain	Infection Control
7164.D8.1	Adhere to regulations and guidelines related to infection control
7164.D8.2	Adhere to guidelines regarding hand hygiene
7164.D8.3	Perform disinfection/sanitization
7164.D8.4	Perform sterilization of medical equipment
7164.D8.5	Perform appropriate aseptic techniques for various clinical situations
7164.D8.6	Perform Universal precautions and demonstrate proper hand-washing techniques
7164.D8.7	Explain Alcohol-based rubs/sanitizer

Next Level Programs of Study

Review Document

7164.D8.8	Describe infectious agents, modes of transmission, precautions for bloodborne pathogens
7164.D8.9	Demonstrate understanding of personal protective equipment (PPE)
7164.D8.10	Demonstrate sterilization techniques (autoclave, instrument cleaner, germicidal disinfectants, disposables) and techniques for medical and surgical asepsis
7164.D8.11	Order of cleaning and types of cleaning products
7164.D8.12	Demonstrate an understanding of Safety Data Sheets (SDS), cautions related to chemicals, disposal methods, and exposure control plan
7164.D8.13	Calibration of equipment and maintain logs (for example, maintenance, equipment servicing, temperature (refrigerator), quality control)
Domain	Testing and Lab Procedures
7164.D9.1	Collect non-blood specimens (for example, urine, stool, cultures, sputum)
7164.D9.2	Perform CLIA-waived testing (labs)
7164.D9.3	Perform vision and hearing tests
7164.D9.4	Perform allergy testing
7164.D9.5	Perform spirometry/pulmonary function tests (electronic or manual)
7164.D9.6	Recognize, document, and report normal and abnormal laboratory and test values
7164.D9.7	Match and label specimen to patient and completed requisition
7164.D9.8	Process, handle, and transport collected specimens
7164.D9.9	Point of care testing and information required on provider request or requisition form
7164.D9.10	Demonstrate specimen collection techniques and requirements
7164.D9.11	Explain CLIA-waived testing regulations and COLA accreditation standards
7164.D9.12	Explain Controls/calibration/quality control
7164.D9.13	Recognize normal and abnormal lab values and test values
7164.D9.14	Describe the elements related to vision and hearing tests including color, acuity/distance, visual fields; tone, speech and word recognition, tympanometry
7164.D9.15	Identify peak flow rates
7164.D9.16	Identify common allergens and demonstrate understanding of scratch test and intradermal allergy test
7164.D9.17	Describe Requirements for transportation, diagnosis, storage, and disposal of specimens, including patient identifiers, site or test
7164.D9.18	Perform content of requisition, including date and time, and ICD-10
Domain	Phlebotomy
7164.D10.1	Verify order details
7164.D10.2	Select appropriate supplies for test(s) ordered
7164.D10.3	Determine venipuncture site accessibility based on patient age and condition
7164.D10.4	Prepare site for venipuncture
7164.D10.5	Perform venipuncture
7164.D10.6	Perform capillary puncture
7164.D10.7	Perform post-procedural care
7164.D10.8	Handle blood samples as required for diagnostic purposes
7164.D10.9	Process blood specimens for laboratory
7164.D10.10	Match and label specimen to patient and completed requisition
7164.D10.11	Recognize and respond to abnormal test results

7164.D10.12	Prepare samples for transportation to a reference (outside) laboratory
7164.D10.13	Follow guidelines in distributing laboratory results to ordering providers after matching patient to provider
7164.D10.14	Patient identifiers, including site or test; and content of requisition
7164.D10.15	Requirements related to patient preparation for phlebotomy, including fasting/non-fasting
7164.D10.16	Assessment of patient comfort/anxiety level with procedure
7164.D10.17	Blood vacuum tubes required for chemistry, hematology, and microbiology testing
7164.D10.18	Blood-borne pathogens
7164.D10.19	Medical conditions or history and medications impacting collection of blood order of draw for venipuncture
7164.D10.20	Anatomy, skin integrity, venous sufficiency, contra-indications
7164.D10.21	Phlebotomy site preparation including cleansing, wrapping, order of draw with micro-tubes
7164.D10.22	Insertion and removal techniques
7164.D10.23	Evacuated tube, syringe, and butterfly methods
7164.D10.24	Types of tubes, tube positions, number of tube inversions, and fill level/ratios
7164.D10.25	Additives and preservatives
7164.D10.26	Bandaging procedures, including allergies and skin types
7164.D10.27	Pre-analytical considerations pertaining to specimen quality and consistency
7164.D10.28	Special collections (for example, timed specimens, drug levels, blood cultures, fasting)
7164.D10.29	Centrifuge and aliquot
7164.D10.30	Normal and abnormal test values, control values
7164.D10.31	Equipment calibration
7164.D10.32	Storage conditions related to sensitivity to light and temperature
7164.D10.33	Requirements for transportation, diagnosis, storage, disposal
7164.D10.34	Processing and labeling requirements
7164.D10.35	External databases (for example, outside labs, reference sources)
Domain	<i>EKG and Cardiovascular Testing</i>
7164.D11.1	Prepare patients for procedure
7164.D11.2	Perform cardiac monitoring (EKG, ECG) tests
7164.D11.3	Ensure proper functioning of EKG equipment
7164.D11.4	Recognize abnormal or emergent EKG results (for example, dysrhythmia, arrhythmia, versus artifact)
7164.D11.5	Assist provider with non-invasive cardiovascular profiling (for example, stress test, Holter monitoring, event monitoring)
7164.D11.6	Transmit results or report to patient's EMR or paper chart, and provider
7164.D11.7	Procedures and instructions to minimize artifacts
7164.D11.8	Artifacts, signal distortions, and electrical interference (for example, fuzz and wandering baseline)
7164.D11.9	Preparation, positioning, and draping of patient
7164.D11.10	Supplies (paper, proper leads)
7164.D11.11	Placement of limb and chest electrodes
7164.D11.12	Techniques and methods for EKGs
7164.D11.13	Signs of adverse reaction during testing (for example, signs of distress, elevated BP and

Next Level Programs of Study

Review Document

	respiration)
7164.D11.14	Calibration of equipment
7164.D11.15	Abnormal rhythms or dysrhythmias associated with cardiovascular testing
7164.D11.16	Waveforms, intervals, segment
Domain	Patient Care Coordination
7164.D12.1	Review patient record prior to visit to ensure health care is comprehensively addressed
7164.D12.2	Collaborate with healthcare providers and community-based organizations
7164.D12.3	Assist providers in coordinating care with community agencies for clinical and non-clinical services
7164.D12.4	Facilitate patient compliance (for example, continuity of care, follow up, medication compliance) to optimize health outcomes
7164.D12.5	Participate in transition of care for patients
7164.D12.6	Participate in team-based patient care (for example, patient centered medical home [PCMH], Accountable Care Organization [ACO])
7164.D12.7	Preventive medicine and wellness
7164.D12.8	Demonstrate an understanding of education delivery methods and instructional techniques and learning styles
7164.D12.9	Utilize resources and procedures to coordinate care outpatient services
7164.D12.10	Access available resources for clinical services (for example, home health care), available community resources for non-clinical services (for example, adult day care, transportation vouchers), and specialty resources for patient/family medical and mental needs
7164.D12.11	Complete referral forms and processes
7164.D12.12	Recognize barriers to care (for example, socio-economic, cultural differences, language, education)
7164.D12.13	Utilize tracking and reporting technologies
7164.D12.14	Identify roles and responsibilities of team members involved in patient centered medical home
Domain	Administrative Assisting
7164.D13.1	Schedule and monitor patient appointments using electronic and paper-based systems
7164.D13.2	Verify insurance coverage/financial eligibility
7164.D13.3	Identify and check patients in/out
7164.D13.4	Verify diagnostic and procedural codes
7164.D13.5	Obtain and verify prior authorizations and pre-certifications
7164.D13.6	Prepare documentation and billing requests using current coding guidelines
7164.D13.7	Ensure that documentation complies with government and insurance requirements
7164.D13.8	Perform charge reconciliation (for example, correct use of EHR software, entering charges, making adjustments, accounts receivable procedures)
7164.D13.9	Bill patients, insurers, and third-party payers for services performed
7164.D13.10	Resolve billing issues with insurers and third-party payers, including appeals and denials
7164.D13.11	Manage electronic and paper medical records
7164.D13.12	Facilitate/generate referrals to other healthcare providers and allied healthcare professionals
7164.D13.13	Provide customer service and facilitate service recovery (for example, follow up patient calls, appointment confirmations, monitor patient flow sheets, collect on accounts, make up for poor customer service)

Next Level Programs of Study

Review Document

7164.D13.14	Enter information into databases or spreadsheets (for example, Excel, EHR & EMR, billing modules, scheduling systems)
7164.D13.15	Participate in safety evaluations and report safety concerns
7164.D13.16	Maintain inventory of clinical and administrative supplies
7164.D13.17	Demonstrate competency with filing systems, scheduling software, recognition of urgency of appointment needs, telephone etiquette, and records management systems and software (for example, manual filing systems – alphabetical, numeric, office storage for archived files, EMR/EHR software applications)
7164.D13.18	Process legal requirements related to maintenance, storage, and disposal of records
7164.D13.19	Identify categories of the medical record (for example, administrative, clinical, billing, procedural, notes, consents)
7164.D13.20	Complete required documentation for patient review and signature, chart review, E-referrals (for example, how they are created, required information, how they are sent), financial eligibility, sliding scales, and indigent programs
7164.D13.21	Demonstrate competency in government regulations (for example meaningful use, MACRA), CMS billing requirements, and Third-party payer billing requirements, Advanced beneficiary notice (ABN)
7164.D13.22	Specialty pharmacies (for example, compounding and nuclear pharmacies; forms of medication available such as liquid, elixir, balm, ointment)
7164.D13.23	Define insurance terminology (for example, co-pay, co-insurance, deductible, tier levels, explanation of benefits)
7164.D13.24	Process aging reports, collections due, adjustments and write-offs, online banking for deposits and electronic transfers, authorizations to approve payment processing, auditing methods, processes, and signoffs, and Data entry and data fields
7164.D13.25	Complete equipment inspection logs, required schedules, and compliance requirements, including inspection by medical equipment servicers
Domain	Communication and Customer Service
7164.D14.1	Modify verbal and non-verbal communication for diverse audiences (for example providers, coworkers, supervisors, patients and caregivers, external providers)
7164.D14.2	Modify verbal and non-verbal communications with patients and caregivers based on special considerations (for example pediatric, geriatric, hearing impaired, vision impaired, mentally handicapped or disabled)
7164.D14.3	Clarify and relay communications between patients and providers
7164.D14.4	Communicate on the telephone with patients and caregivers, providers, third party payers
7164.D14.5	Prepare written/electronic communications/business correspondence
7164.D14.6	Handle challenging/difficult customer service occurrences
7164.D14.7	Engage in crucial conversations (with patients and caregivers/healthcare surrogates, staff, and providers)
7164.D14.8	Facilitate and promote teamwork and team engagement
7164.D14.9	Recognize patient characteristics impacting communication (for example, cultural differences and language barriers, cognitive level, developmental stage; sensory and physical disabilities; age)
7164.D14.10	Define all medical terminology and jargon, layman's terms
7164.D14.11	Demonstrate proficiency in therapeutic communication, interviewing and questioning techniques, including screening questions, open-, closed-, probing questions, and scope of

Next Level Programs of Study

Review Document

	permitted questions and boundaries for questions, active listening, communication cycle (clear, concise message relay), coaching and feedback, positive reinforcement of effective behavior
7164.D14.12	Demonstrate professional presence (for example, appearance, demeanor, tone)
7164.D14.13	Process patient satisfaction surveys
7164.D14.14	Recognize when to escalate problem situations
7164.D14.15	Perform techniques to deal with patients (for example, irate clients, custody issues between parents, chain of command)
7164.D14.16	Prepare incident/event/unusual occurrence reports; documentation of event
7164.D14.17	Understand Cause-and-effect analysis (for example, anxiety increases blood pressure or heart rate; risk management related to patient and employee safety [reviewing the design, setting/population, protocols, measurements of a facility to ensure overall patient and employee safety])
7164.D14.18	Demonstrate Email etiquette and telephone etiquette
7164.D14.19	Utilize Business letter formats
Domain	Medical Law and Ethics
7164.D15.1	Comply with legal and regulatory requirements
7164.D15.2	Adhere to professional codes of ethics
7164.D15.3	Obtain, review, and comply with medical directives
7164.D15.4	Obtain and document healthcare proxies and agents
7164.D15.5	Provide, collect, and store MOLST forms (medical order for life sustaining treatment)
7164.D15.6	Protect patient privacy and confidentiality, including medical records
7164.D15.7	Adhere to legal requirements regarding reportable violations or incidents
7164.D15.8	Identify personal or religious beliefs and values and provide unbiased care
7164.D15.9	Process an informed consent, advanced directives (for example, living will, DNR/DNI), and power of attorney
7164.D15.10	Demonstrate proper storage of medical records
7164.D15.11	Demonstrate competency in the conditions for sharing information/release of information, criminal and civil acts, and medical malpractice, mandatory reporting laws, triggers for reporting and reporting agencies, and the Hippocratic Oath

Healthcare Specialist Capstone	
Career Cluster	Health Science
Program of Study	Certified Clinical Medical Assistant, Pre-Nursing
NLPS Sequence	D
Course Code	7255
Course Description	<i>The Healthcare Specialist Capstone course will facilitate healthcare students' acquisition of additional knowledge and skills necessary to work in a variety of healthcare settings beyond a long term care facility including hospitals, doctors' offices, and clinics. Students can accomplish this goal by completing coursework that will cover topics such as Medical Law and Ethics, Electronic Health Records, and/or Behavioral Health. Schools may offer additional</i>

CONTENT STANDARDS AND COMPETENCIES		
Competency #	Competency	
Domain	Medical Law and Ethics	
7255.D1.1	Explain how professional standards, laws, and ethics guide behavior for health care professionals in medical practices, hospitals, long term care facilities, clinics, and in emergency service settings.	
7255.D1.2	Compare and contrast concepts related to ethics, bioethics, and law.	
7255.D1.3	Discuss the United States legal system and processes as they relate to medical practice.	

Next Level Programs of Study

Review Document

7255.D1.4	Describe the current health care environment including types of practices, licensing, and certification of health care professionals.
7255.D1.5	Defend the right of physicians and their patients as protected by federal and state laws.
7255.D1.6	Detail federal and state statutes pertinent to health care professionals in the areas of hiring and employment, safety, patient privacy and confidentiality, consumer protection, and public records/reporting.
7255.D1.7	Outline the public duties expected of physicians in the areas of reporting, legal records, management of controlled substances, and the Good Samaritan laws.
7255.D1.8	Outline appropriate risk management procedures regarding minimizing litigation and practicing within legal boundaries.
Domain	Electronic Health Records
7255.D2.1	Describe accepted processes for handling medical records and for medical documentation.
7255.D2.2	Apply course concepts to discussions of bioethical dilemmas.
7255.D2.3	Describe the process, principles, and issues of risk management.
7255.D2.4	Describe the transaction, privacy and security standards as related to HIPAA.
7255.D2.5	Acquire, store, and retrieve patient information from the EHR database.
7255.D2.6	Execute, manage EHR database and maintain software and hardware including updates and file maintenance (e.g., purging, archiving).
7255.D2.7	Operate integrated devices with EHR software (e.g., scanners, fax machine, signature pads, and cameras) to transmit patient data for external use (e.g., insurance, pharmacies, and other providers).
7255.D2.8	Access clinical vocabularies in a health information system when appropriate and comply with patient safety standards regarding abbreviations in the health information system.
7255.D2.9	Generate Insurance verifications, patient statements, encounter forms/super bills, and face/admission sheets.
7255.D2.10	Retrieve diagnosis and procedural descriptions from medical records, enter codes and billing information into the EHR, and post payments to patient accounts at the time of visit.
7255.D2.11	Understand how to find codes in the ICD, CPT and HCPCS manuals.
7255.D2.12	Review charts to ensure compliance of proper charting, report to the proper enforcement office, and document the link between effective charting and reimbursement for procedures performed by clinicians.
7255.D2.13	Adhere to professional standards of care, including HIPAA Privacy & Security Rules and facility policy, as they pertain to medical records.
7255.D2.14	Generate reports for clinical and financial resources (e.g., aging report and financial analysis).
7255.D2.15	Compile and maintain medical care and census data for continuity of care records (e.g., reports on diseases treated, surgery performed, and use of hospital beds for clinical audits).
7255.D2.16	Provide ongoing end-user training and technical support of EHR software.
7255.D2.17	Execute EHR workflow, patient flow within the office (e.g., scheduling, patient registration and verification, patient referrals.
7255.D2.18	Use proper privileges and develop clinical templates from existing searchable databases.
Domain	Behavioral Health
7255.D3.1	Identify theories and demonstrate fundamental knowledge of biological, sociological, cultural, psychological, and spiritual development across the adult lifespan.
7255.D3.2	Define and discuss the impact of culture, diversity, and social justice as they pertain to perception and treatment of behavioral health concerns and aging.

Next Level Programs of Study

Review Document

7255.D3.3	Examine lifestyle behaviors associated with the development of chronic behavioral health illnesses.
7255.D3.4	Discuss and identify treatment options, pharmacological and non-pharmacological interventions of psychological and behavioral disorders for the following: Anxiety, Stress Disorders, Disorders of Mood, Eating Disorders, Substance Use and Addictive Disorders, Disorders of Aging and Cognition, exhibiting expression or indications of distress (i.e., anxiety, striking out, self-isolating, etc.)
7255.D3.5	Identify types and classes of drugs related to the treatment of selected behaviors and abnormal behaviors, including potential complications from drug interactions.
7255.D3.6	Discuss and define parameters of therapeutic touch and communication.
7255.D3.7	Demonstrate general and specific verbal interventions used to support patient treatment and recovery.
7255.D3.8	Demonstrate understanding of caregiver behaviors which support low conflict interactions with patients.
7255.D3.9	Identify strategies for behavioral health promotion and interprofessional collaborative practice when interacting with patients with behavioral health issues.
7255.D3.10	Describe and discuss the dying process, the definition of death, and the stages of grief as they apply to caregivers.
Domain	Healthcare Specialist Certifications
7255.D4.1	Certified Nursing Assistant (CNA)
7255.D4.2	Emergency Medical Technician (EMT)
7255.D4.3	Certified Clinical Medical Assistant (CCMA)
7255.D4.4	Phlebotomy (dual enrollment only)
7255.D4.5	Electrocardiography (dual enrollment only)

Medical Terminology	
Career Cluster	Health Science
Program of Study	Central Service Technician, Certified Clinical Medical Assistant, Emergency Medical Services, Pharmacy, Pre-Nursing
NLPS Sequence	B
Course Code	5274
Course Description	<i>Medical Terminology prepares students with language skills necessary for effective, independent use of health and medical reference materials. It includes the study of health and medical abbreviations, symbols, and Greek and Latin word part meanings, all taught within the context of body systems. This course builds skills in pronouncing, spelling, and defining new words encountered in verbal and written information in the healthcare industry. Students have the opportunity to acquire essential skills for accurate and logical communication, and interpretation of medical records. Emphasis is on forming a foundation of a medical vocabulary including appropriate and accurate meaning, spelling, and pronunciation of medical terms, abbreviations, signs, and symbols.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Healthcare or Principles of Pharmacy Tech

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Medical Terminology
5274.D1.1	Demonstrate the use of a medical dictionary.
5274.D1.2	Define and properly use prefixes and suffixes with word roots and combining forms to build medical terms.
5274.D1.3	Define medical terms.
5274.D1.4	Locate and identify the organs within body systems and define their basic functions.
5274.D1.5	Define and use medical abbreviations, signs, and symbols accurately.
5274.D1.6	Define common diseases and conditions.
5274.D1.7	Identify selected procedures, treatments, and diagnostic tests.
5274.D1.8	Spell medical terms correctly.
5274.D1.9	Pronounce medical terms.
Domain	Essential Anatomy and Physiology
5274.D2.1	Apply basic knowledge of chemistry as pertinent to the human body.
5274.D2.2	Identify the major body systems and the organs which comprise each of them.
5274.D2.3	Summarize and define the basic structure and function of each of the body systems.
5274.D2.4	Demonstrate the ability to utilize a microscope to examine prepared slides and apply to physiological conditions and body systems.
5274.D2.5	Adapt the structural and functional aspects of cell organization to the body systems.
5274.D2.6	Classify the types and composition of the 4 basic types of body tissues.
5274.D2.7	Discuss and identify disease states in relation to body systems.

Emergency Medical Tech

Career Cluster	Health Science

Review Document

7165.D1.1	Define key terms.
7165.D1.2	Give an overview of the historical events leading to the development of modern emergency medical services (EMS).
7165.D1.3	Describe the importance of each of the National Highway Traffic Safety Administration standards for assessing EMS systems.
7165.D1.4	Describe the components of EMS system that must be in place for a patient to receive emergency medical care.
7165.D1.5	Compare and contrast the training and responsibilities of EMRs, EMTs, AEMTs and Paramedics.
7165.D1.6	Explain each of the specific areas of responsibility for the EMT.
7165.D1.7	Give examples of the physical and personality traits that are desirable for EMTs.
7165.D1.8	Describe various job settings that may be available to EMTs.
7165.D1.9	Describe the purpose of the National Registry of Emergency Medical Technicians.
7165.D1.10	Explain the purpose of quality improvement programs in EMS programs.
7165.D1.11	Explain the role in the quality improvement process.
7165.D1.12	Explain medical direction as it relates to EMS systems.
7165.D1.13	List ways in which research may influence EMT practice.
7165.D1.14	Give examples of how EMS providers can play a role in public health.
7165.D1.15	Given scenarios, decide how an EMT may demonstrate professional behavior.
Domain	Preparation for EMT
7165.D2.1	Connect Emergency Medical Services (EMS) and know the roles, responsibilities, and characteristics of the EMT-Basic
7165.D2.2	Connect the reactions EMT-Basic and family may experience when facing trauma, illness and death and ways to recognize and protect oneself
7165.D2.3	Analyze the EMT scope of practice in dealing with DNR (do not resuscitate), expressed and implied consent, duty to act, confidentiality, and other related issues
7165.D2.4	Verify topographic terms such as medial, lateral, proximal, distal, superior, inferior, anterior, posterior, midline, right and left, mid-clavicular, bilateral, mid-axillary and know anatomy and function of the following major body systems: respiratory, circulatory, musculoskeletal, nervous, and endocrine
7165.D2.5	Verify the components of vital signs such as breathing, pulse rate, skin color, temperature, pupils, blood pressure and other vital signs
7165.D2.6	Evaluate the guidelines and safety precautions that need to be followed when lifting a patient and various patient carrying devices
7165.D2.7	Evaluate the components of vital signs such as breathing, pulse rate, skin color, temperature, pupils, blood pressure and other vital signs
Domain	Respiratory System
7165.D3.1	Establish the major structures of the respiratory system, signs of adequate and inadequate breathing, and multiple methods and techniques of improving breathing and ventilation
7165.D3.2	Select the following techniques including head-tilt chin lift, jaw thrust, suctioning, using a

Next Level Programs of Study

Review Document

	pocket mask and the bag-valve mask system, and a flow restricted, oxygen-powered ventilation device
7165.D3.3	Recommend the steps in performing the actions taken when providing mouth-to-mouth and mouth-to-stoma artificial ventilation
7165.D3.4	Verify how to measure and insert an oropharyngeal (oral) and nasopharyngeal (nasal) airway and the components of an oxygen delivery system
7165.D3.5	Choose a nonrebreather facemask and state the oxygen flow requirements needed for its use and indications for using a nasal cannula versus a nonrebreather facemask
7165.D3.6	Establish the rationale for basic life support artificial ventilation and airway protective skills taking priority over most other basic life support skills
Domain	Patient Assessment
7165.D4.1	Evaluate common hazards found at the scene of a trauma and a medical patient and how to evaluate the scene for safety and potential hazards
7165.D4.2	Integrate how to perform an initial assessment of an adult, child, or infant patient
7165.D4.3	Verify the methods and rationale of conducting a rapid trauma assessment and a focused history and physical exam
7165.D4.4	Diagnose individuals with specific chief complaints with known and not known prior history, unresponsive patients, and patients with an altered mental status
7165.D4.5	Verify the areas of the body that are evaluated during a detailed physical exam of both a trauma and medical patient
7165.D4.6	Establish the reasons and demonstrate the skills for repeating the initial assessment as part of the on-going assessment
7165.D4.7	Verify various methods of communicating with a patient and about a patient's condition including radio communications and patient reports on the scene or at a facility
7165.D4.8	Verify the components and related issues of the written patient report including a prehospital care report, patient refusal, legal implications, EMS gathering systems and proper use of medical terminology
Domain	General Pharmacology
7165.D5.1	Evaluate the medications with which the EMT-Basic may assist the patient with administering and know the generic names, medication forms and rationale for administering
7165.D5.2	Verify the structure and function of the respiratory system including signs, symptoms, and emergency care of patients with breathing difficulties
7165.D5.3	Verify the structure and function of the cardiovascular system including signs, symptoms, and emergency care of patients with various cardiac emergencies
7165.D5.4	Analyze and know the steps in the emergency medical care of the patient taking diabetic medicine with an altered mental status and a history of diabetes
7165.D5.5	Evaluate and know the emergency medical care of the patient with an allergic reaction
7165.D5.6	Analyze patients and know emergency medical care for the patient with possible overdose
7165.D5.7	Verify how to identify, assess, and provide emergency medical care to a patient experiencing an environmental emergency
7165.D5.8	Verify how to identify, assess, and provide emergency medical care to a patient with

Next Level Programs of Study

Review Document

	psychological, behavioral, and/or suicidal emergencies
7165.D5.9	Connect obstetrics and gynecology structures and techniques for providing emergency medical care in cases of delivery and birth
Domain	<i>EMT Basic / Trauma</i>
7165.D6.1	Connect the structure and function of the circulatory system and steps in the emergency medical care and transportation of the patient with shock and signs and symptoms of internal and/or external bleeding
7165.D6.2	Evaluate the major functions of the skin and the emergency medical care of a patient with open and closed soft tissue injuries, chest and abdomen injuries, amputations, and various burns
7165.D6.3	Analyze the functions of the muscular and skeletal systems and the emergency care of patients requiring splinting those with painful, swollen deformed extremities
7165.D6.4	Evaluate the functions of the nervous system and the emergency care and transportation of patients with spinal injuries
Domain	<i>Infants and Children</i>
7165.D7.1	Establish the developmental considerations of infants, toddlers, pre-school, school age and adolescent children
7165.D7.2	Verify the cognitive, affective, and psychomotor issues of emergency care of patients who are infants or children
Domain	<i>Ambulance Operations</i>
7165.D8.1	Apply and adapt the medical and non-medical equipment needed to respond to a call, laws related to ambulance operation, safety considerations, transportation of patients, cleaning, disinfection and sterilization, and the patient information report
7165.D8.2	Connect the fundamental components of extrication and patient access
7165.D8.3	Verify responsibilities and procedures, including triage, when responding to calls involving hazardous materials or conditions, multiple-causality situations, and disasters
Domain	<i>Hazardous Materials</i>
7165.D9.1	Connect and meet the competencies for First Responder Awareness and Operations Levels as set forth by OSHA 1910.120 and NFPA 472
7165.D9.2	Manage a hazardous materials incident to determine the magnitude of the problem
7165.D9.3	Establish how to plan an initial response within the capabilities and competencies of available personnel, personal protective equipment, and control equipment
7165.D9.4	Verify how to implement the planned response to favorably change the outcomes consistent with the local emergency response plan and the organization's standard operating procedures
7165.D9.5	Verify how to evaluate the progress of the actions taken to ensure that the response objectives are being met safely, effectively, and efficiently
Domain	<i>Response to Terrorism</i>
7165.D10.1	Select domestic and international terrorism per the current Department of Justice definition
7165.D10.2	Evaluate, through case histories, various types of potential incidents
7165.D10.3	Choose differences and similarities between responding to terrorist and non-terrorist

Next Level Programs of Study

Review Document

	incidents
7165.D10.4	Confirm suspicious circumstances which may indicate possible terrorism
7165.D10.5	Select the appropriate use of shielding at B-NICE incidents
7165.D10.6	Choose the use of time and distance as protective measures at B-NICE incidents
7165.D10.7	Choose the basic steps of emergency decontamination and routine post-exposure decontamination
7165.D10.8	Establish unique challenges that may confront responders when attempting to implement scene control
7165.D10.9	Connect what hazard and risk components influence public protection considerations
7165.D10.10	Recommend what resources should be utilized to maintain perimeter security at a terrorist incident
7165.D10.11	Verify outward warning signs of B-NICE incidents
7165.D10.12	Establish and explain tactical considerations associated with acts of terrorism involving biological, nuclear, incendiary, chemical, and explosive materials
7165.D10.13	Select and list specialized equipment needed to support tactical operations involving BNICE incidents
7165.D10.14	Given a case study, integrate tactical considerations for each incident category
7165.D10.15	Verify the authorities and responsibilities in Presidential Decision Directive 39
7165.D10.16	Analyze crime scene issues which must be addressed when managing an incident involving potential criminal activities
7165.D10.17	Select applicable resources referenced in the Federal Response Plan (FRP) and the FRP Terrorism Annex
7165.D10.18	Choose the preliminary indicators for transition from emergency phase to recovery and termination
7165.D10.19	Recommend unique debriefing and security issues

Healthcare Specialist Capstone	
Career Cluster	Health Science
Program of Study	Pre-Nursing, Emergency Medical Services
NLPS Sequence	D
Course Code	7255
Course Description	<i>The Healthcare Specialist Capstone course will facilitate healthcare students' acquisition of additional knowledge and skills necessary to work in a variety of healthcare settings beyond a long term care facility including hospitals, doctors' offices, and clinics. Students can accomplish this goal by completing coursework that will cover topics such as Medical Law and Ethics, Electronic Health Records, and/or Behavioral Health. Schools may offer additional healthcare certifications such as the Certified Clinical Medical Assistant (CCMA) or Phlebotomy along with the coursework or in place of the coursework.</i>

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Medical Law and Ethics
7255.D1.1	Explain how professional standards, laws, and ethics guide behavior for health care professionals in medical practices, hospitals, long term care facilities, clinics, and in emergency service settings.
7255.D1.2	Compare and contrast concepts related to ethics, bioethics, and law.
7255.D1.3	Discuss the United States legal system and processes as they relate to medical practice.
7255.D1.4	Describe the current health care environment including types of practices, licensing, and certification of health care professionals.

Next Level Programs of Study

Review Document

7255.D1.5	Defend the right of physicians and their patients as protected by federal and state laws.
7255.D1.6	Detail federal and state statutes pertinent to health care professionals in the areas of hiring and employment, safety, patient privacy and confidentiality, consumer protection, and public records/reporting.
7255.D1.7	Outline the public duties expected of physicians in the areas of reporting, legal records, management of controlled substances, and the Good Samaritan laws.
7255.D1.8	Outline appropriate risk management procedures regarding minimizing litigation and practicing within legal boundaries.
Domain	Electronic Health Records
7255.D2.1	Describe accepted processes for handling medical records and for medical documentation.
7255.D2.2	Apply course concepts to discussions of bioethical dilemmas.
7255.D2.3	Describe the process, principles, and issues of risk management.
7255.D2.4	Describe the transaction, privacy and security standards as related to HIPAA.
7255.D2.5	Acquire, store, and retrieve patient information from the EHR database.
7255.D2.6	Execute, manage EHR database and maintain software and hardware including updates and file maintenance (e.g., purging, archiving).
7255.D2.7	Operate integrated devices with EHR software (e.g., scanners, fax machine, signature pads, and cameras) to transmit patient data for external use (e.g., insurance, pharmacies, and other providers).
7255.D2.8	Access clinical vocabularies in a health information system when appropriate and comply with patient safety standards regarding abbreviations in the health information system.
7255.D2.9	Generate Insurance verifications, patient statements, encounter forms/super bills, and face/admission sheets.
7255.D2.10	Retrieve diagnosis and procedural descriptions from medical records, enter codes and billing information into the EHR, and post payments to patient accounts at the time of visit.
7255.D2.11	Understand how to find codes in the ICD, CPT and HCPCS manuals.
7255.D2.12	Review charts to ensure compliance of proper charting, report to the proper enforcement office, and document the link between effective charting and reimbursement for procedures performed by clinicians.
7255.D2.13	Adhere to professional standards of care, including HIPAA Privacy & Security Rules and facility policy, as they pertain to medical records.
7255.D2.14	Generate reports for clinical and financial resources (e.g., aging report and financial analysis).
7255.D2.15	Compile and maintain medical care and census data for continuity of care records (e.g., reports on diseases treated, surgery performed, and use of hospital beds for clinical audits).
7255.D2.16	Provide ongoing end-user training and technical support of EHR software.
7255.D2.17	Execute EHR workflow, patient flow within the office (e.g., scheduling, patient registration and verification, patient referrals).
7255.D2.18	Use proper privileges and develop clinical templates from existing searchable databases.
Domain	Behavioral Health
7255.D3.1	Identify theories and demonstrate fundamental knowledge of biological, sociological, cultural, psychological, and spiritual development across the adult lifespan.
7255.D3.2	Define and discuss the impact of culture, diversity, and social justice as they pertain to perception and treatment of behavioral health concerns and aging.
7255.D3.3	Examine lifestyle behaviors associated with the development of chronic behavioral health illnesses.

Next Level Programs of Study

Review Document

7255.D3.4	Discuss and identify treatment options, pharmacological and non-pharmacological interventions of psychological and behavioral disorders for the following: Anxiety, Stress Disorders, Disorders of Mood, Eating Disorders, Substance Use and Addictive Disorders, Disorders of Aging and Cognition, exhibiting expression or indications of distress (i.e., anxiety, striking out, self-isolating, etc.)
7255.D3.5	Identify types and classes of drugs related to the treatment of selected behaviors and abnormal behaviors, including potential complications from drug interactions.
7255.D3.6	Discuss and define parameters of therapeutic touch and communication.
7255.D3.7	Demonstrate general and specific verbal interventions used to support patient treatment and recovery.
7255.D3.8	Demonstrate understanding of caregiver behaviors which support low conflict interactions with patients.
7255.D3.9	Identify strategies for behavioral health promotion and interprofessional collaborative practice when interacting with patients with behavioral health issues.
7255.D3.10	Describe and discuss the dying process, the definition of death, and the stages of grief as they apply to caregivers.
Domain	Healthcare Specialist Certifications
7255.D4.1	Certified Nursing Assistant (CNA)
7255.D4.2	Emergency Medical Technician (EMT)
7255.D4.3	Certified Clinical Medical Assistant (CCMA)
7255.D4.4	Phlebotomy (dual enrollment only)
7255.D4.5	Electrocardiography (dual enrollment only)

Principles of Pharmacy Tech	
Career Cluster	Health Science
Program of Study	Pharmacy
NLPS Sequence	A
Course Code	7137
Course Description	<i>Principles of Pharmacy Tech is an introduction to the principles of pharmacotherapy including basic pharmacology, medication management, and safety. Students will be introduced to various systems of the human body and the most important drugs affecting these systems. Students will develop an understanding of drug classes and their mechanism of action when prescribed for a particular disease state. This course will also introduce the essential mathematical concepts and skills needed for pharmacy practice. Students will be introduced to metric, avoirdupois, and apothecary systems of measurements. Other calculation methods that will be studied are ratio and proportion, dimensional analysis, and calculations for compounded products.</i>
Prerequisite(s)/ Corequisite(s)	None

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Medical Terminology
5274.D1.1	Demonstrate the use of a medical dictionary.
5274.D1.2	Define and properly use prefixes and suffixes with word roots and combining forms to build medical terms.
5274.D1.3	Define medical terms.
5274.D1.4	Locate and identify the organs within body systems and define their basic functions.
5274.D1.5	Define and use medical abbreviations, signs, and symbols accurately.
5274.D1.6	Define common diseases and conditions.
5274.D1.7	Identify selected procedures, treatments, and diagnostic tests.
5274.D1.8	Spell medical terms correctly.
5274.D1.9	Pronounce medical terms.
Domain	Essential Anatomy and Physiology
5274.D2.1	Apply basic knowledge of chemistry as pertinent to the human body.
5274.D2.2	Identify the major body systems and the organs which comprise each of them.
5274.D2.3	Summarize and define the basic structure and function of each of the body systems.
5274.D2.4	Demonstrate the ability to utilize a microscope to examine prepared slides and apply to physiological conditions and body systems.
5274.D2.5	Adapt the structural and functional aspects of cell organization to the body systems.
5274.D2.6	Classify the types and composition of the 4 basic types of body tissues.
5274.D2.7	Discuss and identify disease states in relation to body systems.

Central Service Technician Fundamentals

Career Cluster	Health Science
Program of Study	Central Service Technician
NLPS Sequence	C
Course Code	7163
Course	<i>The Central Service Technician Fundamentals course introduces students to the field of central</i>

Next Level Programs of Study

Review Document

7163.D1.1	Describe the functions of the central supply department.
7163.D1.2	Differentiate between CST and CRCST
7163.D1.3	Trace the flow of materials
7163.D1.4	Examine environmental control factors
7163.D1.5	Use proper medical terminology
7163.D1.6	Practice total quality management
7163.D1.7	Practice safety and risk management
7163.D1.8	Practice inventory management
7163.D1.9	Apply information technology
7163.D1.10	Differentiate between management systems
7163.D1.11	Examine technology management
7163.D1.12	Analyze inventory methods
7163.D1.13	Discuss storage and inventory of sterile supplies
Domain	Surgical Instrumentation
7163.D2.1	Identify basic surgical instruments by type, function, and name.
7163.D2.2	Understand the importance of properly inspecting surgical instruments. Inspect surgical instruments.
7163.D2.3	Describe the use of surgical instruments.
7163.D2.4	Perform instrument sharpness testing.
7163.D2.5	Differentiate between reusable and discuss the reuse of single use medical devices.
7163.D2.6	Demonstrate the proper procedure for assembling instrument/procedure trays.
7163.D2.7	Differentiate between various types of specialty instrumentation utilized in operating rooms.

Central Service Technician Capstone	
Career Cluster	Health Science
Program of Study	Central Service Technician
NLPS Sequence	D
Course Code	7257
Course Description	<i>The Central Services Technician Capstone course emphasizes the practice of sterilization skills that have been learned in previous courses. Students will focus on high and low sterilization methods. Students will differentiate between the various sterilization methods. Students will learn the protocol for controlling infection and the spread of blood borne pathogens. Additionally, this course will provide students the opportunity to complete practical hours toward the hours required for the completion of the International Association of Healthcare Central Services Material Management Certification Exam.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Healthcare; Medical Terminology; Central Service Technician Fundamentals
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas

7257.D1.1	Differentiate between the various sterilization methods.	
7257.D1.2	Compare the different solutions used to sterilize.	
7257.D1.3	Identify the procedure for sterilizing instruments after exposure to infectious diseases.	
7257.D1.4	List steam, gas, and chemical sterilization components.	
7257.D1.5	Define accepted processes for disinfection of equipment.	
7257.D1.6	Differentiate between sterilization and disinfection.	
7257.D1.7	Recognize the importance of sterile technique in the OR.	
7257.D1.8	Discuss the procedure for loading and operating Washer /sterilizer.	
7257.D1.9	Analyze the effectiveness of various types of transfer systems used in central processing departments.	

Next Level Programs of Study

Review Document

7257.D1.10	Demonstrate the process of cleaning patient care equipment.
7257.D1.11	Demonstrate various techniques for wrapping packages.
7257.D1.12	Recognize the importance of microbiology for the central processing technician.
Domain	Clinical Experience
7257.D2.1	Discuss the responsibilities of the central process technician's management of patient care equipment
7257.D2.2	Understand the proper procedures for assembling and testing patient care equipment
7257.D2.3	Demonstrate proper cleaning of instruments and equipment by manual and mechanical processes.
7257.D2.4	Prepare equipment for terminal cleaning in a washer/sterilizer.
7257.D2.5	Demonstrate proper use of sterilizers including high temperature, low temperature, and point of use systems.
7257.D2.6	Wrap and package instrument trays
7257.D2.7	Demonstrate the proper handling of sterile supplies
7257.D2.8	Perform basic packaging procedures for peel pouches and flat wrapping materials Understand basic information about packaging and storage of sterile supplies.
7257.D2.9	Explain the various inventory replenishment systems used by central process. Define the term universal precautions and review its role in preventing the transmission of infectious organisms.
7257.D2.10	Discuss the advantages and disadvantages of purchase, rent, or loan options for patient care equipment.

Promoted Certifications	DANB Chairside
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Basic Tooth Anatomy
7315.D1.1	Students verify parts of the teeth to properly identify potential problem areas for patients.
7315.D1.2	Analyze the parts, surfaces, composition, types, function, and anatomical features of the teeth
7315.D1.3	Select location in the normal, complete permanent dentition, name all 32 teeth by dentition, arch, quadrant, class, and type
7315.D1.4	Evaluate the early development of the oral cavity and teeth
7315.D1.5	Establish the normal eruption dates for the permanent teeth.
7315.D1.6	Choose the function of the bones, muscles, sinuses, vascular and lymph supply, nerve supply and the surrounding supporting structures of the oral cavity that are of interest to the field of dentistry
7315.D1.7	Select the foramen of the nerves and arteries that supply the teeth and oral cavity
7315.D1.8	Choose five symptoms and means of treating patients with TMJ disorders
7315.D1.9	Evaluate various dental pathological conditions and anomalies development of the oral cavity and teeth
7315.D1.10	Review and identify primary and permanent tooth anatomy, morphology, and anomalies
7315.D2.1	Demonstrate use of a dental dictionary.
7315.D2.2	Properly use prefixes and suffixes with word roots/ combining forms to build medical/dental terms.
7315.D2.3	Define dental terms.
7315.D2.4	Define and use dental abbreviations, signs, and symbols accurately.
7315.D2.5	Define and correlate common diseases and conditions to appropriate procedures, treatments, and diagnostic tests.
7315.D2.6	Identify and correct misspelled dental terms.
7315.D2.7	Spell dental words correctly after hearing pronunciation.
7315.D2.8	Correctly enunciate dental terms
7315.D3.1	Students evaluate dental/laboratory materials and programs to determine a patient's needs.
7315.D3.2	Evaluate specific conditions within the oral cavity that make it such a demanding environment for the placement and long-term performance of dental materials
7315.D3.3	Analyze the programs that are in place to ensure that quality control is maintained during the manufacture of dental devices and those materials for intraoral use are safe and effective
7315.D3.4	Choose the types and uses of gypsum, impression materials, cements, resin and into metal

Next Level Programs of Study

Review Document

7315.D3.5	Connect preventive and restorative dental materials
7315.D3.6	Select the different types of liner and bases and explain the difference in intent when placing a liner rather than a base
7315.D3.7	Connect the composition, setting behavior, and uses of the various impression materials
7315.D3.8	Establish manipulation of impression materials, cements, gypsum materials, and resin materials that would be clinically useful to the dentist
7315.D3.9	Create impressions, trimmed casts, and quad-custom-made trays that are acceptable in a dentist office
7315.D3.10	Integrate the bite registrations technique on typodont using ZOE and elastomeric impression materials
7315.D3.11	Review tooth numbering systems including Universal and Palmer Systems
7315.D4.1	Students apply and adapt pre-clinical procedures to determine instruments needed to properly access patient needs
7315.D4.2	Connect the role of a modern dental assistant within the profession of dentistry
7315.D4.3	Select major historical events and changes within the profession of dentistry
7315.D4.4	Establish his or her personal conduct in accordance with the legal and ethical standards of the profession
7315.D4.5	Analyze psychological aspects of patient care in a variety of dental situations
7315.D4.6	Identify and choose instruments and equipment used in patient treatment
7315.D4.7	Apply and adapt general office maintenance and high-level sterilization and disinfection procedures
7315.D4.8	Select microorganisms and describe disease transmission and infection control guidelines
7315.D4.9	Integrate entry level clinical skills
7315.D4.10	Choose relevant terminology and acronyms as related to subject areas stressed in this course
7315.D4.11	Select the scope of the OSHA Blood borne/Hazardous Materials Standard
7315.D4.12	Verify the use of colors and numbers used for hazardous chemical identification
7315.D4.13	Verify the acquisition and use of information relative to a course objective
7315.D5.1	Students connect the importance of Diet & Nutrition in Preventative Dentistry to determine its role in patient care.
7315.D5.2	Evaluate dental plaque and cariogenic foods, and their relationship in dental disease
7315.D5.3	Analyze the use of disclosing tablets or solution, floss, brushing techniques and auxiliary dental aids
7315.D5.4	Connect personal oral hygiene and its role in patient care
7315.D5.5	Select the major factors that influence nutrition and dental health
7315.D5.6	Rate malnutrition, undernutrition, and dental health
7315.D5.7	Select dietary guidelines for each stage of life
7315.D5.8	Design and display components of the Food Guide Pyramid
7315.D5.9	Choose major functions of vitamins and minerals in human nutrition
7315.D5.10	Establish the major function of protein, fats and water, as they relate to total body wellness
7315.D5.11	Select the information gained about gingival health through periodontal examination

7316.D2.11	Locate and identify the organs within body systems and define their basic functions
7316.D2.12	Define and use medical abbreviations, signs, and symbols accurately.
7316.D2.13	Common diseases and conditions.
7316.D2.14	Identify selected procedures, treatments, and diagnostic tests.
7316.D2.15	Spell medical terms correctly.
7316.D2.16	Pronounce medical terms.
7316.D3.1	Students integrate clinical knowledge to determine patient outcomes.
7316.D3.2	Manage operator and patients for visual and restorative procedures
7316.D3.3	Synthesize with visual and restorative procedures on clinical patients
7316.D3.4	Recommend oral physiotherapy procedures on select clinical patients
7316.D3.5	Apply and adapt instruments, disinfect equipment, and utilize barrier per OSHA guidelines
7316.D4.1	Students evaluate dental techniques to determine the types of materials needed in a variety of office settings.

Next Level Programs of Study

Review Document

7316.D4.2	Choose different types of topical and local anesthetics
7316.D4.3	Verify the steps for preparing for the administration of local anesthetic
7316.D4.4	Validate the injection sites for the maxillary and mandibular arches
7316.D4.5	Verify the equipment and materials needed to administer local anesthetic
7316.D4.6	Establish supplemental techniques to administer local anesthetic
7316.D4.7	Identify the eight specialty fields recognized by the ADA
7316.D4.8	Recommend dental instruments and accessory items used in dental specialties
7316.D4.9	Manage all assigned laboratory procedures relevant to specific specialties
7316.D4.10	Recommend next steps with visual and restorative procedures on bench mannequin in preparation for clinical patients
7316.D5.1	Analyze patient needs and barriers to communication to include cultural and individual differences
7316.D5.2	Create a letter of application, resume, and other office correspondence used to enhance public relations with patient and professional colleagues
7316.D5.3	Connect non-verbal cues, and emphasize improving communication skills
7316.D5.4	Verify dental business office procedures and clinical records

Advanced Dental Careers

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
7317.D1.1	Students synthesize dental emergency procedures to ensure patient safety.
7317.D1.2	Choose medical conditions (or) health changes in the dental office setting
7317.D1.3	Verify the ABCs of Emergency Care
7317.D1.4	Apply and adapt the appropriate dental emergency management procedures via scenario role-play
7317.D1.5	Verify all aspects of cardiopulmonary resuscitation and automatic external defibrillation according to the guidelines of the American Heart Association/American Red Cross for the health care provider
7317.D1.6	Choose common pharmacological agents as they relate to dental practice
7317.D1.7	Describe the parts of prescription
7317.D1.8	Confirm the use of most common emergency drugs used in dental practice
7317.D1.9	Validate controlled substance laws
7317.D1.10	Apply and adapt appropriate airway obstruction management as it pertains to specific emergency situations
7317.D2.1	Students synthesize appropriate chair side, clinical support, and business procedures to further develop skills in a clinical setting
7317.D2.2	Establish an understanding of the role a practicing dental assistant plays as a part of the dental health team in providing dental care to members of the community as learned in the formal academic program
7317.D2.3	Apply and adapt the ability to apply good human relations when working with the patient and the dental health program

Next Level Programs of Study

Review Document

7317.D2.4	Connect the chair-side responsibilities
7317.D2.5	Verify, expose, process, and mount dental x-rays according to the standards acceptable to the supervising dentist
7317.D2.6	Validate the ability to perform business office procedures according to prescribed standards acceptable to the instructors and the cooperating dentist
7317.D2.7	Verify selected dental laboratory procedures taught in the formal program to the satisfaction of the instructors and cooperating dentist
7317.D2.8	Recommend professional conduct, attitude, attire and grooming according to the standards of the Dental Assisting Program's instructional staff as stated in course requirements
7317.D2.9	Apply and adapt emergency procedures as taught in the formal program according to standards acceptable to the instructors and cooperating dentist
7317.D3.1	Students analyze dental materials
7317.D3.2	Connect the relationship between components, properties and the clinical performance of amalgam, gold alloy, dental ceramics, base materials, solder, and dental implant metals
7317.D3.3	Evaluate the rationale for limiting the patients and dental personnel's exposure to mercury and cite the maximum vapor allowed by OSHA
7317.D3.4	Verify the types of silver alloy available for amalgam
7317.D3.5	Analyze the significance of gamma-2 to the clinical performance and physical properties of amalgam and cite how gamma-2 phase is controlled
7317.D3.6	Create the sequential steps for producing a finished cast restoration, starting with the wax pattern
7317.D3.7	Manage the finishing and polishing of common restorative materials and indicate precautions associated with these techniques
7317.D3.8	Connect the three different types of dental implants and compare their uses
7317.D3.9	Select restorative materials and cements
7317.D3.10	Choose full custom-made trays, mouth guard, temporary bridge, self-engaged bleaching tray and trimmed casts that are acceptable in a dental office
7317.D3.11	Apply concepts of restoration during a simulated dental procedure
7317.D4.1	Infection Control
7317.D4.2	Recognize infectious diseases and their relationship to patient and occupational risk
7317.D4.3	Demonstrate understanding of how to review a medical history to prevent adverse reactions during dental care
7317.D4.4	Demonstrate understanding of proper hand hygiene as performed before, during and after oral surgery and intraoral procedures
7317.D4.5	Describe how to protect the patient and operator by using personal protective equipment (PPE) (e.g., masks, gloves, eyewear, gowns)
7317.D4.6	Demonstrate understanding of how to protect the patient and operator through the reduction of aerosol, droplets, and spatter
7317.D4.7	Demonstrate understanding of how to maintain aseptic conditions to prevent cross-contamination for procedures and services
7317.D4.8	Demonstrate understanding of processing reusable dental instruments and devices
7317.D4.9	Demonstrate understanding of how to monitor and maintain processing equipment and sterilizers
7317.D4.10	Demonstrate understanding of occupational safety standards and guidelines for personnel

Dental Careers Capstone	
Career Cluster	Health Science
Program of Study	Dental Careers
NLPS Sequence	D
Course Code	7318
Course Description	<i>Dental Careers Capstone will provide the opportunity for increased skill development in clinical support through work-based learning experiences. Students will also prepare for Radiation, Health, and Safety which is third and final part of the NELDA certification. The capstone course may also provide the opportunity to review and prepare for the entire NELDA certification.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Dental Careers; Dental Careers Fundamentals; Advanced Dental Careers
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	
Additional Notes	
ADDITIONAL COURSE INFO	
Funding	Moderate Value Level II
Bulletin 400	<ul style="list-style-type: none"> • No License Available
Rules 46-47	<ul style="list-style-type: none"> • Any Standard Health Occupations License 9-12 • Any Occupational Specialist I, II or III in Health Occupation 9-12

Liberal Arts/Sciences Requirements	
Promoted Certifications	NELDA AMP / RHS (anatomy /morphology; radiology)
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
7318.D1.1	300 hours field experience for cert requirements.
Domain	Purpose and Technique
7318.D2.1	Identify and describe purpose of basic and advanced radiographic images.
7318.D2.2	Review and interpret patient medical and dental histories for all contraindications.
Domain	Safety
7318.D3.1	Identify, understand, and communicate sources of risk related to radiation including preventative techniques.
7318.D3.2	Identify, understand, and communicate procedures and practices related to safe x-radiation production, including informed consent.
Domain	Infection Control
7318.D3.1	Know and describe standard precautions for equipment and supplies according to ADA, CDC, and OSHA, including but not limited to breakdown and setup of treatment room; barriers; positioning devices; clinical contact surfaces; critical and semi-critical instrument sterilization; hand hygiene; PPE (donning, doffing); and cross contamination.
Domain	Head, Neck, and Oral Cavity
7318.D5.1	Review and understand the anatomy and pathology of hard and soft tissue.
7318.D5.2	Review and understand the circulatory and lymphatic system.
7318.D5.3	Review and understand various anatomical landmarks and how they relate to dental practice.
7318.D5.4	Review and identify the basic muscular and skeletal systems.
7318.D5.5	Review and identify the basic nervous system.
7318.D5.6	Review and identify the anatomy of the oral cavity.
7318.D5.7	Review and identify the salivary glands and sinuses.
7318.D6.1	Connect dental office business procedures using Eagle Software computerized system.
7318.D6.2	Apply and adapt dental business office procedures and clinical records in specialty practices.
7318.D6.3	Students adapt and apply business office skills to manage a dental office.
7318.D6.4	Evaluate and describe the business office manager's duties and those business transactions carried out in the dental office.
7318.D6.5	Integrate Eagle Soft computer program to establish patient accounts and records, file insurance, claims and daily patient schedules.
7318.D6.6	Recommend the record appointments from list of patients, allowing sufficient time for each function.

7320.D1.1	Describe the development of exercise science as a field of study from an historical perspective.
7320.D1.2	Describe the scientific method and its use in research in exercise science.
7320.D1.3	Recognize the role of sport from a societal perspective.
7320.D1.4	Identify and discuss the role of exercise science in sport and medical professions.
7320.D1.5	Examine career options in sport, health and wellness, education, and the medical fields for those who study exercise science.
7320.D1.6	Identify disciplines related to exercise science and examine each: A. Exercise physiology, B. Fitness, C. Sports medicine/athletic training/physical therapy, D. Nutrition, E. Biomechanics, F. Motor learning and motor control, G. Coaching, H. Sport psychology, I. Sport sociology
7320.D1.7	Examine and discuss current research topics in exercise science.
7320.D1.8	Identify and describe the basic components of wellness.
7320.D1.9	Identify and describe personal health assessment techniques.
7320.D1.10	Explain strategies for achieving wellness.
7320.D1.11	Identify and describe hereditary factors relating to wellness.
7320.D1.12	Identify and describe psychological factors relating to wellness.
7320.D1.13	Identify and explain biological factors as they relate to wellness.
7320.D1.14	Compare the components of wellness as they change in various stages of the life cycle.
7320.D1.15	Identify and describe a variety of health conditions and diseases.
7320.D1.16	Describe the relationship between lifestyle choices and a variety of health conditions and diseases.
7320.D1.17	Explain ways in which factors within society and diverse cultures may affect personal health.

Kinesiology	
Career Cluster	Health Science
Program of Study	Exercise Science
NLPS Sequence	B
Course Code	7321
Course Description	<i>Kinesiology students will study fundamental concepts concerning the interaction of biological and mechanical aspects of the musculoskeletal and neuromuscular structures. An emphasis on practical applications of the concepts will be accomplished through an introduction to fitness training methods and modalities for developing specific conditioning effects in individuals. Laboratory sessions focus on anatomy and physiology of the musculoskeletal and cardiovascular systems, theories on fitness programming, and injury avoidance in fitness environments.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Exercise Science Recommended: Anatomy and Physiology
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas Fulfills a science requirement for all diploma types
Dual Credit Status	X

Promoted Certifications	
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
7321.D1.1	Utilize appropriate anatomical terminology to describe the musculoskeletal structures of the body.
7321.D1.2	State the general architecture and functions of each type of joint of the body.
7321.D1.3	Identify the prominent bony sites that serve as anatomical landmarks and points of attachment.
7321.D1.4	Describe the articulating surfaces for each joint of the body.
7321.D1.5	Distinguish connective tissue structures associated with each joint.
7321.D1.6	Identify the movements possible at each joint and understand how joint architecture impacts range of motion.
7321.D1.7	Identify the muscles involved in common sport movements and activities of daily living.
7321.D1.8	Describe the origins, insertions, and actions for skeletal muscles involved in movements of the: A. Shoulder girdle, B. Shoulder joint, C. Elbow joint, D. Wrist and hand, E. Head and neck, F. Trunk/abdomen, G. Pelvic girdle, H. Hip joint, I. Knee joint, J. Ankle and foot
7321.D1.9	Explain common problems and injuries found at each joint.
7321.D1.10	Analyze human movement of the upper and lower extremities.
7321.D1.11	Identify and discuss the role of kinesiology in sport and medical professions.
7321.D1.12	Demonstrate knowledge of musculoskeletal anatomy through laboratory activities.
7321.D2.1	Explain the energy continuum (ATP, creatine phosphate, anaerobic glycolysis, and oxidative pathways) and how each relates to various forms of exercise performance and intensity.
7321.D2.2	Examine the acute physiological changes caused by physical activity
7321.D2.3	Distinguish the physiological adaptations to resistance, aerobic, and anaerobic training programs
7321.D2.4	Examine and explain the impact of environmental factors on sport performance, including temperature and altitude variations
7321.D2.5	Summarize physiological factors that affect athletic performance, including fatigue, energy metabolism, and fluid balance
7321.D2.6	Explore and describe normal respiratory, gas exchange, and acute response to exercise
7321.D2.7	Distinguish between aerobic and anaerobic metabolism
7321.D2.8	Describe the muscle fiber types and identify differences between them
7321.D2.9	Examine and understand the sliding filament theory of muscle contraction

Requirements	and Nursing
Promoted Certifications	NASM Cert Personal Trainer
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
7322.D1.1	Differentiate between different modes of exercise and outline the major functional properties of muscle contraction.
7322.D1.2	Demonstrate the importance of stretching, warm-up, and cool-down routines, and develop stretching and flexibility routines
7322.D1.3	Distinguish effects of free weight, machine-based, and body-weight resistance modalities on muscle strengthening programs
7322.D1.4	Identify muscle groups affected by common fitness center machines and chart out common exercises for strengthening major muscle groups
7322.D1.5	Differentiate between program variables for specific training outcomes
7322.D1.6	Recognize the signs of overtraining vs overreaching and describe techniques for overcoming strength plateaus.
7322.D1.7	Identify and describe the major components of a balanced and effective exercise program.
7322.D1.8	Outline markers for conditioning improvements, in cardiovascular, muscular, and flexibility components of fitness.
7322.D1.9	Explore general and specific conditioning exercises as well as performance enhancement techniques.
7322.D1.10	Measure, evaluate, and perform self-assessment techniques to improve personal fitness levels.
7322.D1.11	Evaluate various exercise progression levels.
7322.D1.12	Analyze the principles of sports training, including overload, specificity, and reversibility.
7322.D1.13	Define related terms hypertrophy, atrophy, and hyperplasia.
7322.D1.14	Create a personal workout program based upon standard assessment results utilizing all components of fitness.
7322.D1.15	Create a complete exercise program for general conditioning as well as performance enhancement in specific activities and sports based on specific exercise goals
7322.D1.16	Physically measure and evaluate personal fitness levels using standard group field fitness assessment techniques (Cardiovascular, muscular strength & endurance, flexibility).
7322.D1.17	Create and practice a complete personal physical conditioning exercise program utilizing standard fitness center equipment to improve personal assessed outcomes
7322.D1.18	Practice and perform various strength and flexibility exercises utilizing standard fitness center equipment
7322.D2.1	Develop methods for evaluating and improving group exercise participants' fitness and adherence to exercise.
7322.D2.2	Discuss injury prevention techniques.
7322.D2.3	Practice choreography for different modes of group fitness.
7322.D2.4	Practice cueing for different modes of group fitness.
7322.D2.5	Develop and demonstrate a variety of group exercise formats.
7322.D2.6	Discuss group program development for a variety of populations.

Next Level Programs of Study

Review Document

7322.D2.7	Discuss methods for music selection for different modes of group fitness.
7322.D2.8	Practice taking and interpreting heart rates after exercise segments.
7322.D2.9	Discuss liability concerns for leaders/facilities offering group fitness classes.
7322.D2.10	Develop and teach a group exercise class that includes a warm-up, cardio, strength, and a cool-down.

Physical Therapy Capstone	
Career Cluster	Health Science
Program of Study	Exercise Science
NLPS Sequence	D
Course Code	7323
Course Description	<i>The Physical Therapy Capstone course is designed to provide students the opportunity to explore the role of a physical therapy assistant and to practice technical skills previously learned in the classroom. It prepares students with the knowledge, skills, and attitudes essential for providing basic care in extended care facilities, hospitals, and home health agencies under the direction of licensed physical therapists. In addition, students will learn skills specific to physical therapy including observing patients' progress, helping patients do specific exercises, using massage and stretching for treatment, aiding patients with devices for movement, educating patients and families, and basic assisting in cleaning treatment areas and clerical work.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Exercise Science; Kinesiology; Human Performance; or Any Healthcare Specialist CTE Concentrator Sequence (EMT, CNA, CCMA)
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas Fulfills a science requirement for all diploma types
Dual Credit Status	X
Additional Notes

VU Course Alignment	
Four Yr. Course Alignment	
Postsecondary Credential	AS Physical Therapy Assistant
Liberal Arts/Sciences Requirements	ITCC - APHY 101: Anatomy and Physiology I, APHY 102: Anatomy and Physiology II, ENGL 111: English Composition
Promoted Certifications	
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
7323.D1.1	Student must possess basic knowledge of healthcare system and administration
7323.D1.2	Understand the variety of insurances and healthcare plans patients will use to receive services
7323.D1.3	Control the quality of care for patients including the regulations dictated by state federal: A. HIPAA, B. Health Insurance and Portability Accountability Act, C. Informed consent, D. Americans with Disabilities, E. Statutory Laws
7323.D1.4	Review ethical Issues, malpractice, and sexual harassment laws
7323.D2.1	Student must demonstrate basic knowledge and proficiency working with the musculoskeletal system
7323.D2.2	Know the components of the musculoskeletal system including but not limited to: Bones, Fascia, Tendon, Ligament, Muscle, Cartilage, Joint, and Joint Receptors
7323.D2.3	Identify specific joints and their component parts as well as the range of motion provided including the shoulder, elbow, wrist/hand, hip, knee, ankle/foot, craniovertebral, cervical, temporomandibular, thoracic, lumbar, sacroiliac
7323.D2.4	Study the kinesiology of the musculoskeletal system including directional terms, movements and body segments, levers, osteo-kinematics, degrees of freedom, arthrokinematics, close packed and open packed joint positions, capsular and non-capsular patterns of restriction
7323.D2.5	Review musculoskeletal injury and repair involving muscles, tendons, ligaments, tissue healing, articular cartilage injury and disease
7323.D2.6	Collect Data on the musculoskeletal system such as range of motion, end feels, leg length, manual muscle testing, deep tendon reflexes, upper/lower quarter screens, posture analysis, palpation, girth measurement, joint mobility, special tests
7323.D2.7	Identify the following musculoskeletal pathologies: fractures, bursitis, degenerative joint disease, rheumatoid arthritis, Lupus, ankylosing spondylitis, psoriatic arthritis, gout, fibromyalgia, tendonitis, ruptured Achilles, acromioclavicular injuries, adhesive capsulitis, sprains, ligament tears, bicipital tendonitis, carpal tunnel, De Quervain tenosynovitis, epicondylitis, finger injuries, groin pain, hallux valgus, herniated nucleus pulposus, iliotibial band friction syndrome, MCL sprain, meniscal injuries, osteoarthritis, patellofemoral

Next Level Programs of Study

Review Document

	dysfunction, plantar fasciitis, rotator cuff, scaphoid fracture, spinal stenosis, spondylolysis, thoracic outlet syndrome, wrist fractures
7323.D2.8	Recognize common orthopedic surgical repairs like spinal surgery and total joint replacement
7323.D2.9	Student must demonstrate basic knowledge and proficiency working with the neuromuscular system
7323.D2.10	Know the basic anatomy, physiology, organization of the nervous system, central nervous system, peripheral nervous system, and nerves of the somatic nervous system
7323.D2.11	Identify reflexes including monosynaptic, superficial, pathologic, patterned behavioral, supraspinal, protective, etc.
7323.D2.12	Distinguish proprioception, balance, and kinesthesia and understand how the body performs each
7323.D2.13	Perform neuromuscular examination including levels of consciousness, upper/lower quarter scanning examination, cranial nerve examination, and reflex testing PTA-3.5 Define the purpose of the following diagnostic procedures and know when each should be performed: cerebral angiography, computed tomography, electroencephalography, electromyogram, evoked potential, lumbar puncture, MRI and MRA, Myelography, PET, Ventriculography, Electronystagmography
7323.D2.14	Recognize common neurologic dysfunctions, infectious diseases, and neural injuries affecting the neuromuscular system: cerebrovascular accident, transient ischemic attack, aneurysm, traumatic brain injury, spinal cord injury, syringomyelia, cauda equina syndrome, neurodegenerative, idiopathic inflammatory myopathies, epilepsy, cerebellar disorders, vestibular disorders, basal ganglia disorders, cranial and peripheral disorders, herniated lumbar disc, herpes zoster
7323.D2.15	Compare and contrast motor learning and theories of neurological rehabilitation
7323.D2.16	Student must demonstrate basic knowledge and proficiency working with the Cardiovascular system
7323.D2.17	Identify and know the function of the various component parts of the cardiovascular system including peripheral circulation, lymphatic system, heart, veins, and arteries, etc.
7323.D2.18	Perform basic cardiovascular examinations such as blood pressure, pulse, examination of heart sounds and heart rhythm
7323.D2.19	Practice exercise tolerance testing using Borg Rating of Perceived Exertion scale PTA-4.4 Be able to execute basic life support (CPR) and understand the significance of diagnostic tests: coronary angiogram, duplex ultrasonography, magnetic resonance venography, physiologic tests of venous function, Doppler ultrasound, air plethysmography, chest radiograph, myocardial perfusion imaging, continuous hemodynamic monitoring, echocardiography
7323.D2.20	Comprehend the variety of laboratory tests including enzyme studies, lipid profile, cellular blood elements and make evaluations based on them
7323.D2.21	Identify common cardiovascular conditions, peripheral arterial disease, vascular diseases, congestive heart failure, cardiomyopathy, coronary artery diseases, inflammatory conditions of the heart
7323.D2.22	Recognize common surgical interventions and cardiac rehabilitation
7323.D2.23	Student must demonstrate basic knowledge and proficiency working with the Pulmonary system
7323.D2.24	Identify the anatomy and physiology of the pulmonary system including but not limited to ribs, lungs, pleurae, and muscles

Next Level Programs of Study

Review Document

7323.D2.25	Understand the significance of pulmonary pathology and the variety of procedures performed to diagnose and characterize diseases of the pulmonary system
7323.D2.26	Recognize pulmonary obstructive diseases, infectious and inflammatory diseases, restrictive lung disease, pulmonary oncology, pulmonary vascular disease, and pleural diseases and disorders
7323.D2.27	Perform physical therapy interventions, medical management, and medical interventions specific to the pulmonary system
7323.D2.28	Student must demonstrate basic knowledge and proficiency working with the Integumentary system
7323.D2.29	Identify the anatomy and physiology of the integumentary system including dermis, epidermis, hair, glands, etc.
7323.D2.30	Describe the various pathologies of skin including eczema, dermatitis, bacterial, fungal, and parasitic infections, melanin pigmentary disorders, benign dermatoses, autoimmune disorders, skin cancer, ulcers
7323.D2.31	Perform wound care and identify factors influencing wound healing, include various non-physical therapy interventions as well
7323.D2.32	Understand the complexity of burns and complications that result from burns, including burn healing management
7323.D3.1	Student must possess knowledge of basic pathology as it relates to physical therapy
7323.D3.2	Understand the role and importance of the immune system and identify its major organs and cells (e.g., antibodies, lymphocytes, etc.)
7323.D3.3	Identify various autoimmune and infectious diseases
7323.D3.4	Define the interconnectedness of various systems identified in previous standards with the immune system, in addition to including gastrointestinal system and genitourinary
7323.D3.5	Study hematologic blood disorders, endocrine and metabolic disorders
7323.D3.6	Examine various pathologies pertaining to obstetrics and gynecology
7323.D3.7	Review complex disorders such as chronic fatigue syndrome, fibromyalgia, myofascial complex regional pain and the role physical therapy may play with pain alleviation and maintenance
7323.D4.1	Student will understand the significance of pediatric physical therapy and the role it has in child development
7323.D4.2	Describe the various developmental milestones from birth to adolescence
7323.D4.3	Identify automatic postural responses, primitive reflexes, motor control, and motor development
7323.D4.4	Review the commonly accepted theories of child development
7323.D4.5	Understand prenatal development and the significance of infant screening
7323.D4.6	Perform comprehensive developmental assessments, motor assessments, and assessments for children with disabilities
7323.D4.7	Review various pediatric acquired conditions, traumatic brain injury, congenital conditions, and pediatric oncology
7323.D4.8	Student will understand the significance of geriatric physical therapy and the role it has with the aging process
7323.D4.9	Understand the process of aging process and the commonly accepted theories of aging
7323.D4.10	Recognize the physiological changes and adaptations that occur, and the pathological conditions associated with aging

Next Level Programs of Study

Review Document

7323.D4.11	Identify common functional problems arising from the aging process and how physical therapy can improve the quality of life associated with these problems
7323.D4.12	Know the principals of geriatric rehabilitation and ethical and legal issues associated with working with this population
7323.D5.1	Students will perform and be proficient in therapeutic exercise and modalities
7323.D5.2	Know the biomechanics of common exercises
7323.D5.3	Identify the physiology of muscles, muscle function and contraction
7323.D5.4	Create procedures and plans for improving strength, endurance, flexibility, balance, joint stabilization, and coordination within a variety of patients
7323.D5.5	Define modalities of therapeutic exercise including physical agents, hydrotherapy, electrotherapeutic modalities, mechanical modalities
7323.D5.6	Students will identify and understand the use of prosthetics and orthotics
7323.D5.7	Understand the levels of amputation
7323.D5.8	Perform activities to improve function and training of an amputee
7323.D5.9	Recognize lower limb and upper limb prosthetics and understand how they can replicate human movement
7323.D5.10	Identify various orthotics and the conditions they alleviate
7323.D5.11	Students will understand and practice basic pharmacology, gait, and functional training
7323.D5.12	Identify the role of pharmacotherapy and the most common pharmaceuticals used for patients
7323.D5.13	Define the temporal parameters and the gait cycle
7323.D5.14	Assist individuals with stair negotiation, wheelchairs, and bed mobility and transfers

Fitness Management Capstone	
Career Cluster	Health Science
Program of Study	Human Performance / Physical Therapy
NLPS Sequence	D
Course Code	7324
Course Description	<i>The Fitness Management Capstone course will focus on the knowledge and skills needed to be a personal trainer. This course will focus on the fundamental concepts in personal training for healthy general populations including topics of group fitness instruction and the principles and skills involved in management within the the health and fitness industry.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Exercise Science; Kinesiology; Human Performance
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X
Additional Notes

7324.D1.1	Explain the major findings behind landmark studies in the history of sport psychology	
7324.D1.2	Discuss and criticize major theories of mental performance in sport	
7324.D1.3	Evaluate the factors relating to highly successful athletic performances	
7324.D1.4	Explain strategies for enhancing motivation in trained athletes	
7324.D1.5	Apply strategies for controlling arousal and anxiety during performance	
7324.D1.6	Explore role of mental rehearsal, imagery, and visualization in athletic performance	
7324.D1.7	Describe strategies for controlling distractions during athletic events	
7324.D1.8	Describe strategies for recovering from poor athletic performance	
7324.D1.9	Discuss effective coach-athlete relationships	
7324.D1.10	Understand key aspects of successful team management	
7324.D1.11	Discuss methods for ensuring training program adherence in novice and advanced athletes	
7324.D1.12	Examine mental and emotional responses to injuries and rehabilitation	

Next Level Programs of Study

Review Document

7324.D1.13	Describe signs of overtraining, eating disorders, and other conditions adverse to effective athletic performance
7324.D2.1	Describe the organizational design of a fitness facility.
7324.D2.2	Identify standards and guidelines for fitness facility operating practices.
7324.D2.3	Determine and propose facility equipment needs, selection, and purchasing process for various fitness models.
7324.D2.4	Examine risk management and emergency procedure standards and guidelines.
7324.D2.5	Explore the financial performance and expectations of various fitness business models.
7324.D2.6	Identify and construct the components included in a sports facility budget.
7324.D2.7	Examine the value of profit centers and various exercise formats.
7324.D2.8	Evaluate the advantages and drawbacks of rental and lease contracts.
7324.D2.9	Construct a fitness facility layout and floor plan per operational guidelines.
7324.D2.10	Identify and construct a typical schedule for maintenance and operations at small and large facilities.
7324.D2.11	Research and identify methods for forecasting trends in sports participation, and the current potential for various sport and athletic market sectors.
7324.D2.12	Discuss the importance of developing relationships with various internal and external constituents.
7324.D2.13	Examine the importance of employee recruitment, staff development and compensation.
7324.D2.14	Construct job descriptions for various positions within a fitness facility.
7324.D2.15	Design a business model incorporating all organizational aspects and marketing of a fitness/wellness facility.
7324.D3.1	Screen and evaluate health history profiles for prospective clients
7324.D3.2	Demonstrate standard fitness assessment techniques
7324.D3.3	Design safe and effective exercise programs for apparently healthy clients
7324.D3.4	Apply scope of practice for the personal fitness trainer.
7324.D3.5	Respond to fitness and health questions that arise in a one-on-one setting
7324.D3.6	Recognize legal issues regarding fitness leadership
7324.D3.7	Demonstrate safe and effective exercise techniques in cardio, free weight, and body weight exercise to prevent injury
7324.D3.8	Recognize misleading and incorrect information concerning exercise principles and methodology
7324.D3.9	Develop strategies to motivate individuals to improve exercise program adherence
7324.D3.10	Observe and analyze exercise performance for correct technique
7324.D3.11	Demonstrate proper exercise techniques
7324.D3.12	Communicate effectively with clients
7324.D3.13	Identify and apply personal training marketing techniques for career growth
7324.D3.14	Calculate desired body weight from a given body fat percentage.
7324.D3.15	Measure and interpret standardized fitness assessments for apparently healthy clients.
7324.D3.16	Examine and interpret risk factors for disease.
7324.D4.1	Discuss the physiology behind nutrient needs and functions in the human body
7324.D4.2	Analyze the factors that determine body weight

Next Level Programs of Study

Review Document

7324.D4.3	Examine the relationship between nutrition, disease prevention, and weight management.
7324.D4.4	Analyze nutrition fads
7324.D4.5	Appraise nutritional supplements and scope of practice for the fitness professional.
7324.D4.6	Examine nutritional behavior modification techniques
7324.D4.7	Examine the relationship between nutrition and athletic performance to fuel physical activities.
7324.D4.8	Discuss healthy diet plans within scope of practice.
7324.D4.9	Examine the manipulation of macronutrient distribution range for physical activities.

Introduction to Culinary Arts and Hospitality	
Career Cluster	Hospitality and Tourism
Program of Study	
NLPS Sequence	Introductory
Course Code	5438
Course Description	<i>Introduction to Culinary Arts and Hospitality is recommended for all students regardless of their career cluster or pathway, in order to build basic culinary arts knowledge and skills. It is especially appropriate for students with an interest in careers related to Hospitality, Tourism, and Culinary Arts. A project-based approach that utilizes higher order thinking, communication, leadership, and management processes is recommended. Topics include basic culinary skills in the foodservice industry, safety and sanitation, nutrition, customer relations and career investigation. Students are able to explore this industry and examine their own career goals in light of their findings. Laboratory experiences that emphasize industry practices and develop basic skills are required components of this course.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1-2 semester course, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	
Additional Notes	
ADDITIONAL COURSE INFO	
Funding	Introductory

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Successful Customer Relations</i>
5438.D1.1	Students will analyze the importance of communication and customer service to promote success in the food service industry.
5438.D1.2	Explain the importance of customer service and satisfaction for culinary and hospitality industry success
5438.D1.3	Demonstrate basic table service techniques, including table setting, serving and removing food and beverage items, and delivering the check
5438.D1.4	Demonstrate ability to communicate effectively with customers and co-workers
5438.D1.5	Calculate sales-tax-tip totals, cash register and final receipts, and average sales per customer
Domain	<i>Preventing Accidents and Injuries</i>
5438.D2.1	Students will apply concepts of emergency procedures to develop a safe working environment.
5438.D2.2	Investigate the role of Occupational Safety and Health Administration (OSHA) regulations
5438.D2.3	Demonstrate ability to ensure electrical and fire safety when using food preparation and service equipment
5438.D2.4	Demonstrate accident prevention techniques when using food preparation and service equipment
5438.D2.5	Select and apply appropriate basic first aid procedures
Domain	<i>Preparing and Serving Safe Food</i>
5438.D3.1	Students will demonstrate appropriate sanitation techniques to ensure high quality food service.
5438.D3.2	Demonstrate good personal hygiene and evaluate its effects on food safety
5438.D3.3	Identify symptoms and prevention methods of foodborne illness.
5438.D3.4	Demonstrate procedures and conditions to control microorganisms that cause food borne illnesses
5438.D3.5	Explain the purpose and uses of the Hazard Analysis Critical Control Pont (HACCP) food safety system
5438.D3.6	Apply proper procedures for receiving, storing, preparing, cooking, holding, cooling, reheating, and serving food, including the proper use of appropriate tools and equipment to ensure that the five risk factors identified by the CDC are addressed
5438.D3.7	Demonstrate procedures for cleaning and sanitizing tools and equipment

Next Level Programs of Study

Review Document

Domain	Nutrition
5438.D4.1	Students will connect nutrition principles and their effect on menu planning for a variety of dietary needs.
5438.D4.2	Integrate the Dietary Guidelines, Recommended Dietary Allowances (RDAs) and other governmental resources to plan meals and determine portion sizes
5438.D4.3	Utilize nutrition labels and other information on food packaging to make decisions about ingredients used in food preparation
5438.D4.4	Adapt recipes for increased nutritional value and to accommodate special dietary needs
Domain	Culinary Skills
5438.D5.1	Students will apply concepts of basic culinary skills to successfully plan and prepare quality food products.
5438.D5.2	Investigate components, functions, and purposes of standardized recipes
5438.D5.3	Apply concepts of the recipe conversion factor for use in a variety of standardized recipes
5438.D5.4	Demonstrate correct use of common measurement tools, including scales, portioning scoops, and other tools used in the food service industry when weighing, measuring, and portioning food
5438.D5.5	Apply concepts of knife safety when demonstrating knife skill techniques, including precision cuts
5438.D5.6	Demonstrate effective <i>mise en place</i> to accomplish efficient preparation of food products
5438.D5.7	Demonstrate a variety of industry-accepted cooking methods, including roasting and baking, broiling, grilling, griddling, sautéing, frying, deep frying, braising, stewing, poaching, and steaming
5438.D5.8	Demonstrate industry-accepted food preparation methods and basic techniques when preparing stocks, soups, sauces, breakfast foods, sandwiches, canapés, appetizers, salads, dressings, and marinades
5438.D5.9	Investigate regional and ethnic influences when selecting and preparing a variety of cultural menus
5438.D5.10	Create professional plating utilizing garnishing and food presentation techniques
Domain	Hospitality Management Skills
5438.D6.1	Students will examine basic hospitality management skills.
5438.D6.2	Compare and contrast skills needed in the multiple avenues of the hospitality industry
5438.D6.3	Analyze the hospitality industry's impact on local economies
5438.D6.4	List examples of the kinds of businesses that make up the hospitality industry
5438.D6.5	Apply concepts of dollar value of inventory, food costs, and profit margins needed in hospitality management.
Domain	Career Opportunities
5438.D7.1	Students will analyze career pathways, education, and training in the culinary and hospitality industry to enhance knowledge of the many career opportunities available.
5438.D7.2	Investigate a variety of careers and career pathways in the culinary and hospitality industry

Next Level Programs of Study

Review Document

5438.D7.3	Analyze trends in labor and job supply and demand in the culinary and hospitality industry
5438.D7.4	Describe educational programs and training opportunities to prepare for careers in the culinary and hospitality industry
5438.D7.5	Explain opportunities, benefits, and risks of entrepreneurial career pathways in the culinary and hospitality industry

Advanced Career & Technical Education, College Credit: Hospitality and Human Services

Career Cluster	Hospitality and Tourism
Program of Study	
NLPS Sequence	
Course Code	6120
Course Description	<i>Advanced Career and Technical Education, College Credit is a course title covering any CTE advanced course offered for credit by an accredited post-secondary institution through an adjunct agreement with a secondary school. The intent of this course is to allow students to earn college credit for courses with content that goes beyond that currently approved for high school credit. This course may be used for any dual enrollment course, including a joint program of study involving a postsecondary partnership.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 semester course, up to 3 credits per semester, May be offered for successive semesters up to 12 credits
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	A student should earn at least 3 postsecondary credits for each high school credit. Schools must have an approved Nonstandard Course Waiver on file to be eligible for CTE Funding.

Hospitality and Human Services: Special Topics	
Career Cluster	Hospitality and Tourism
Program of Study	
NLPS Sequence	
Course Code	6152
Course Description	<i>Hospitality and Human Services: Special Topics is an extended learning experience designed to address the advancement and specialization of careers within the career cluster through the provision of a specialized course for a specific workforce need in the school's region. The learning experience is at a qualified site, and is designed to give the student the opportunity to learn and practice technical skills; while working under the direction of the appropriately licensed professional. Throughout the course, students will focus on learning about employment opportunities and obtaining the knowledge, skills and attitudes essential for success in specific occupations. Course standards and curriculum must be tailored to the specific profession, preparing students to advance in this career field, and where applicable, provide students with opportunities for certification or dual credit. Participation in a related CTSO encourages the development of leadership, communication and career related skills, and opportunities for community service.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 semester course, up to 3 credits per semester, May be offered for successive semesters up

Domain	Safety and Sanitation
7173.D2.1	Identify the critical control points during all food handling processes as a method for minimizing the risk of food borne illness (HACCP system).
7173.D2.2	Identify microorganisms, which are related to food spoilage and food borne illnesses; describe their requirements and methods for growth.
7173.D2.3	Recognize symptoms common to food borne illnesses and how these illnesses can be prevented.
7173.D2.4	Demonstrate knowledge of good personal hygiene and health habits.
7173.D2.5	Develop acceptable procedures when preparing potentially hazardous foods to include time/temperature principles.
7173.D2.6	Differentiate the major reasons for and recognize signs of food spoilage.
7173.D2.7	Describe the requirements for proper receiving and storage of both raw and prepared foods.
7173.D2.8	Recognize sanitary and safety design and construction features of food production equipment and facilities. (i.e., NSF, UL, OSHA, ADA, etc.).
7173.D2.9	Differentiate current types of cleaners and sanitizers and their proper use.
7173.D2.10	Review Material Safety Data Sheets (MSDS) and understand their requirements in handling hazardous materials. Discuss right-to-know laws.
7173.D2.11	Develop cleaning and sanitizing schedule and procedures for equipment and facilities.
7173.D2.12	Identify proper methods of waste disposal and recycling.
7173.D2.13	Differentiate signs of pest infestation and conclude appropriate measures for insects, rodents, and pest eradication appropriate measures for insects, rodents, and pest control eradication.
7173.D2.14	Understand steps of a sanitation self-inspection and identify modification necessary for compliance with standards.
7173.D2.15	Differentiate appropriate types and use of fire extinguishers used in the foodservice area.
7173.D2.16	Recall laws and rules of the regulatory agencies governing sanitation and safety in foodservice operation.
7173.D2.17	Demonstrate knowledge of how blood-borne pathogens can spread.
7173.D2.18	Demonstrate knowledge of basic first-aid techniques and CPR.

Nutrition	
Career Cluster	Hospitality and Tourism
Program of Study	Culinary Arts – Baking and Pastry
NLPS Sequence	B
Course Code	7171
Course Description	<i>Nutrition students will learn the characteristics, functions and food sources of the major nutrient groups and how to maximize nutrient retention in food preparation and storage. Students will be made aware of nutrient needs throughout the life cycle and to apply those principles to menu planning and food preparation. This course will engage students in hands-on learning of nutritional concepts such as preparing nutrient dense meals or examining nutritional needs of student athletes</i>

7169.D1.14	Outline the major classifications and uses of sauces.
7169.D1.15	Demonstrate food presentation techniques.
7169.D1.16	Discuss and demonstrate cooking techniques and storage principles for maximum retention of nutrients.
Domain	<i>Baking and Pastries</i>
7169.D2.1	Define baking terms.
7169.D2.2	Identify equipment and utensils used in baking and discuss proper use and care.
7169.D2.3	Demonstrate proper selection of equipment and utensils for specific application.
7169.D2.4	Identify ingredients used in baking.

Next Level Programs of Study

Review Document

7169.D2.5	Demonstrate proper scaling and measurement techniques.
7169.D2.6	Apply basic math skills to recipe conversions.
7169.D2.7	Describe properties and list function of various ingredients.
7169.D2.8	Prepare crusty, soft and specialty yeast products; observe reactions.
7169.D2.9	Prepare quick breads.
7169.D2.10	Produce a variety of types of pies and tarts.
7169.D2.11	Produce a variety of types of cookies.
7169.D2.12	Prepare laminated doughs such as puff pastry, croissant, and Danish pastry doughs.
7169.D2.13	Prepare creams, custards, puddings, and related sauces.
7169.D2.14	Discuss the application of mixes and other labor-saving products.
7169.D2.15	Discuss nutritional concerns as they apply to baking, including recipe modifications.
7169.D2.16	Prepare fritters, cobblers and crisps.
7169.D2.17	Prepare a variety of fillings and toppings for pastries and baked goods.

Baking and Pastry Capstone	
Career Cluster	Hospitality and Tourism
Program of Study	Culinary Arts – Baking and Pastry
NLPS Sequence	D
Course Code	7235
Course Description	<i>The objective of this course is to help students understand the science of baking and the different reactions that take place based on the ingredients, temperatures, and equipment in relation to the final product. The course requires students to produce and finish a variety of cakes. The course emphasizes application techniques, color coordination, and the flavor and texture of fillings. Students will practice the techniques of basic cake decorating. This course will also address classical French and European desserts, including the preparation of goods such as Napoleons, Gateau St. Honoré, petit fours and petit fours sec, ganaches, pastry creams and fillings, sauces, flans and tarts, and European sponges. The course also includes instruction in tempering of chocolates, molding, and chocolate plastique, preparation of truffles, pastillage and marzipan, short doughs, and meringues. The student will be instructed in the latest preparation methods, innovative ideas for impressive plate presentations, and techniques that utilize specialized equipment and tools to make high-tech, novel creations</i>
Prerequisite(s)/ Corequisite(s)	Principles of Culinary and Hospitality; Nutrition; Culinary Arts
Credits	2 semester course, 2 semester required, 1-3 credits per semester, 6 credits max
Counts Toward	Counts as a Directed Elective or Elective for all diplomas
Dual Credit Status	X (PLC/ CTE)
Additional Notes

Domain	Human Relations Management	
7235.D1.1	Describe the process of management through effective communication skills.	
7235.D1.2	Summarize leadership styles and analyze when each is most appropriate.	
7235.D1.3	Outline the supervisor's role in ethical decision-making, problem solving, and delegation of duties.	
7235.D1.4	Explain the role of job descriptions and specifications and develop written examples.	
7235.D1.5	Perform mock interviews; analyze results.	
7235.D1.6	Describe procedures of new employee orientation.	
7235.D1.7	Compare training methods; construct an effective employee-training program to include follow-up training and cross training.	
7235.D1.8	Analyze types and methods of employee evaluation.	
7235.D1.9	Describe necessity of change and ways of implementing change with the least employee resistance.	

Next Level Programs of Study

Review Document

7235.D1.10	Evaluate methods of conflict resolution.
7235.D1.11	Identify reasons for disciplinary problems and discuss the supervisor's role in handling them.
7235.D1.12	Describe the procedure for terminating employees.
7235.D1.13	Analyze motivational techniques/problems; discuss procedures for attitudinal changes.
7235.D1.14	Analyze ways of dealing with stress in the workplace.
7235.D1.15	Discuss time management and other organizational management techniques.
Domain	Cakes, Icing and Fillings
7235.D2.1	Identify, select, and use and care for tools and equipment used in baking and decorating cakes.
7235.D2.2	Prepare and describe techniques used in mixing, panning, and baking cakes.
7235.D2.3	Produce a variety of cakes including butter, sponge, high ratio, and other cake variations.
7235.D2.4	Understand how to correct cake failures and defects.
7235.D2.5	Produce a variety of icings used in cake assembly and production.
7235.D2.6	Prepare a variety of fillings and toppings.
7235.D2.7	Construct classical and special occasion cakes, including layer cakes and sheet cakes.
7235.D2.8	Develop and utilize different decorating techniques.
7235.D2.9	Identify and assess practical approaches to marketing.
Domain	Classical Pastries and Chocolates
7235.D3.1	Utilize proper cake mixing methods to produce quality scratch baked cakes, icings and fillings for classical cake formulas.
7235.D3.2	Develop basic icing, piping, decorating and finishing skills for cakes.
7235.D3.3	Produce pastry dough for tart crusts.
7235.D3.4	Produce fillings for pastry tarts with finishing techniques for proper presentation.
7235.D3.5	Prepare Choux pastries.
7235.D3.6	Prepare the three basic meringue types.
7235.D3.7	Prepare a variety of dessert sauces.
7235.D3.8	Discuss the application of mixes and other value-added products.
7235.D3.9	Identify types of chocolate and demonstrate proper technique in tempering chocolate and use chocolate effectively for garnishes.
7235.D3.10	Demonstrate proper technique in cooking sugar and producing basic sugar works.
7235.D3.11	Prepare ice creams, sorbets and other frozen desserts.
7235.D3.12	Prepare hot and cold soufflés.
7235.D3.13	Produce and prepare marzipan figurines.
Domain	Yeast Breads
7235.D4.1	Demonstrate intermediate knowledge of baking terms, ingredients, equipment and utensils.
7235.D4.2	Apply basic math skill to recipe conversions.
7235.D4.3	Demonstrate proper scaling and measurement techniques.
7235.D4.4	Demonstrate proper selection of equipment and utensils for specific application.
7235.D4.5	Demonstrate basic knowledge and proficiency in the production of principle yeast bread products: lean yeast doughs, crusty European-style hearth/artisan breads (French bread varieties), sourdough bread, rich yeast doughs, soft-roll yeast doughs, sweet yeast doughs, laminated yeast doughs (croissant & Danish), specialty yeast doughs (Baba & Savarin, pizza dough, focaccia), and yeast biscuits.
Domain	Baking Science
7235.D5.1	Understand the nature of the combination of ingredients in baking formulas.

Next Level Programs of Study

Review Document

7235.D5.2	Understand the methods of mixing and its importance in baking.
7235.D5.3	Understand the importance of standardized formulas and the science of substitutions.
7235.D5.4	Utilize basic mathematics in formulas to ensure the consistency of products.
Domain	Advanced Decorating Candies
7235.D6.1	Demonstrate knowledge of the science and art of classical and contemporary candies and confectionary decorating.
7235.D6.2	Develop a concise workable recipe repertoire with format and logical categorization
7235.D6.3	Demonstrate proficiency in the production of candy products.
7235.D6.4	Demonstrate proficiency in decorating confections and other patisserie.
7235.D6.5	Produce and merchandise confections and other patisserie.

Culinary Arts Capstone	
Career Cluster	Hospitality and Tourism
Program of Study	Culinary Arts – Baking and Pastry
NLPS Sequence	D
Course Code	7233
Course Description	<i>This course covers the techniques and skills needed in breakfast cookery as well as insight into the pantry department. Various methods of preparation of eggs, pancakes, waffles and cereals will be discussed. Students will receive instruction in salad preparation, salad dressing, hot and cold sandwich preparation, garnishes and appetizers. This course also covers the necessary skills for proper recruiting, staffing, training, and management of employees at various levels. The course will help prepare the student for the transition from employee to supervisor. Additionally, it will help the student evaluate styles of leadership, and develop skills in human relations and personnel management.</i>

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Human Relations Management</i>
7233.D1.1	Describe the process of management through effective communication skills.
7233.D1.2	Summarize leadership styles and analyze when each is most appropriate.
7233.D1.3	Outline the supervisor's role in ethical decision-making, problem solving, and delegation of duties.
7233.D1.4	Explain the role of job descriptions and specifications and develop written examples.
7233.D1.5	Perform mock interviews; analyze results.
7233.D1.6	Describe procedures of new employee orientation.
7233.D1.7	Compare training methods; construct an effective employee-training program to include follow-up training and cross training.
7233.D1.8	Analyze types and methods of employee evaluation.
7233.D1.9	Describe necessity of change and ways of implementing change with the least employee resistance.
7233.D1.10	Evaluate methods of conflict resolution.
7233.D1.11	Identify reasons for disciplinary problems and discuss the supervisor's role in handling them.
7233.D1.12	Describe the procedure for terminating employees.
7233.D1.13	Analyze motivational techniques/problems; discuss procedures for attitudinal changes.
7233.D1.14	Analyze ways of dealing with stress in the workplace.
7233.D1.15	Discuss time management and other organizational management techniques.

Domain	Pantry and Breakfast
7233.D2.1	Prepare quick breads and muffins.
7233.D2.2	Prepare laminated doughs.
7233.D2.3	Prepare crepe and appropriate application.
7233.D2.4	Identify the preparation, presentation, and service of a variety of beverages, including coffee and tea.
7233.D2.5	Identify and use herbs, spices, oils and vinegars.
7233.D2.6	Identify and prepare various salads, dressings (emulsions), and marinades.
7233.D2.7	Identify and prepare hot and cold sandwiches.
7233.D2.8	Identify and prepare canapés and hot and cold hors d’oeuvres.
7233.D2.9	Identify and prepare breakfast meats, eggs, cereals, and batter products.
7233.D2.10	Demonstrate food presentation techniques.
7233.D2.11	Identify and prepare different fruits and vegetables.
7233.D2.12	Demonstrate skills illustrating short order cooking techniques.
7233.D2.13	Illustrate appropriate garnishing techniques.
7233.D2.14	Plan a la carte, cycle, ethnic, banquet and buffet menu.
7233.D2.15	Prepare a variety of basic hot soufflés.
Domain	Meat and Seafood
7233.D3.1	Demonstrate knife skills, hand tools and equipment operation.
7233.D3.2	Understand the importance of proper sanitation procedures used during and after the butchery process.
7233.D3.3	Identify and select knives to be used in the butchering of meats, poultry, fish and seafood (scimitar, boning knife – stiff and flexible, slicer, utility knife, meat handsaw, and meat cleaver).
7233.D3.4	Describe the composition and structure of meat, poultry, fish, and seafood; explain how it relates to protein selection and cooking methods.
7233.D3.5	Use the federal meat inspection and grading system to select and purchase meats, poultry, fish, and seafood.
7233.D3.6	Explain proper purchasing, receiving, aging, storage and handling of meats, poultry, fish, and seafood.
7233.D3.7	Identify the primal cuts of beef, lamb, veal, and pork and list the major fabricated cuts obtained from each of them.
7233.D3.8	Demonstrate the various market cuts used in selling fish and seafood
7233.D3.9	Describe a variety of techniques used in merchandising seafood.
7233.D3.10	Explain the significance of aging meats.
7233.D3.11	Select appropriate cooking methods for the most important meat cuts, based on the meat’s tenderness and other characteristics.
7233.D3.12	Demonstrate food presentation techniques.
7233.D3.13	Wrap and store meats for maximum shelf life.
7233.D3.14	Tie meats – tie string to form a net around meats for roasting.
7233.D3.15	For poultry, explain the differences between “light meat” and “dark meat,” and describe how these differences affect cooking.
7233.D3.16	Identify any domestic poultry item with reference to its kind, class and style.
7233.D3.17	Cut chickens into halves, quarters and pieces of eight.
7233.D3.18	Store poultry items properly.

Next Level Programs of Study

Review Document

7233.D3.19	Define the concept of the “food mile.”
7233.D3.20	Discuss controlling the amount of food prepared to reduce waste; and what can be done with excess prepared food as an alternative to composting.
7233.D3.21	Identify a variety of protein products that can be purchased in your local area and describe how you would procure them.
7233.D3.22	Identify the pros and cons of purchasing locally produced (raised) proteins.
7233.D3.23	Explain the pros and cons of purchasing organic foods.
7233.D3.24	Research the different ways of raising sustainable proteins.
7233.D3.25	Define (10) terms used to describe “sustainable” foods (e.g., free range, organic, heritage, heirloom, rBGH-free, etc.)
7233.D3.26	Identify the pros and cons of purchasing locally.
7233.D3.27	Understand the concept of sustainable seafood, and list 10 fish that are on the red, yellow, and green lists.
7233.D3.28	Research the benefits and issues related to aquaculture and wild-caught fish, along with the different wild-caught fish methods.
7233.D3.29	List seafood that can be substituted for red-listed species, based on fish texture and flavor.
Domain	Customer Service
7233.D4.1	Demonstrate the general rules of table settings and service.
7233.D4.2	Demonstrate specific American, English, French and Russian service.
7233.D4.3	Discuss food delivery system such as banquets, buffets, and catering.
7233.D4.4	Describe the functions of dining service.
7233.D4.5	Discuss training procedures for processing guest checks.
7233.D4.6	Discuss procedures for processing guest checks.
7233.D4.7	Demonstrate and understanding of guest service and customer relations, including handling of difficult situations and accommodations for the disabled.
7233.D4.8	Explain interrelationships and workflow between dining room and kitchen operations.
7233.D4.9	Discuss sales techniques for service personnel, including menu knowledge and suggestive selling.
7233.D4.10	Evaluate the relationship of beverages to food.
7233.D4.11	Identify the preparation, presentation, and service of non-alcoholic and dealcoholized beverages to include coffees and teas.
7233.D4.12	Identify equipment and glassware used for beverage preparation and service.
7233.D4.13	Discuss opening and closing procedures of a beverage operation.
7233.D4.14	Explain procedures for implementing internal beverage controls.
7233.D4.15	Create menu item descriptions following established truth-in-menu guidelines.

	minimizing the risk of food borne illness (HACCP system).
7173.D2.2	Identify microorganisms, which are related to food spoilage and food borne illnesses; describe their requirements and methods for growth.
7173.D2.3	Recognize symptoms common to food borne illnesses and how these illnesses can be prevented.
7173.D2.4	Demonstrate knowledge of good personal hygiene and health habits.
7173.D2.5	Develop acceptable procedures when preparing potentially hazardous foods to include time/temperature principles.
7173.D2.6	Differentiate the major reasons for and recognize signs of food spoilage.
7173.D2.7	Describe the requirements for proper receiving and storage of both raw and prepared foods.
7173.D2.8	Recognize sanitary and safety design and construction features of food production equipment and facilities. (i.e., NSF, UL, OSHA, ADA, etc.).
7173.D2.9	Differentiate current types of cleaners and sanitizers and their proper use.
7173.D2.10	Review Material Safety Data Sheets (MSDS) and understand their requirements in handling hazardous materials. Discuss right-to-know laws.
7173.D2.11	Develop cleaning and sanitizing schedule and procedures for equipment and facilities.
7173.D2.12	Identify proper methods of waste disposal and recycling.
7173.D2.13	Differentiate signs of pest infestation and conclude appropriate measures for insects, rodents, and pest eradication appropriate measures for insects, rodents, and pest control eradication.
7173.D2.14	Understand steps of a sanitation self-inspection and identify modification necessary for compliance with standards.
7173.D2.15	Differentiate appropriate types and use of fire extinguishers used in the foodservice area.
7173.D2.16	Recall laws and rules of the regulatory agencies governing sanitation and safety in foodservice operation.
7173.D2.17	Demonstrate knowledge of how blood-borne pathogens can spread.
7173.D2.18	Demonstrate knowledge of basic first-aid techniques and CPR.

Nutrition	
Career Cluster	Hospitality and Tourism
Program of Study	Hospitality Management
NLPS Sequence	B
Course Code	7171
Course Description	<i>Nutrition students will learn the characteristics, functions and food sources of the major nutrient groups and how to maximize nutrient retention in food preparation and storage. Students will be made aware of nutrient needs throughout the life cycle and to apply those principles to menu planning and food preparation. This course will engage students in hands-on learning of nutritional concepts such as preparing nutrient dense meals or examining nutritional needs of student athletes</i>

Course Code	7172
Course Description	<i>Hospitality Management prepares students for employment in the hospitality industry. It provides the foundations for study in higher education that leads to a full spectrum of hospitality careers. This is a broad-based course that introduces students to all segments of hospitality, what it includes, and career opportunities that are available; provides a survey of management functions, highlighting basic theories and facts; and exposes students to current trends and current events within the industry. Three major goals of this course are for students to be able to identify current trends in hotel and restaurant management, distinguish the difference between hospitality and tourism, and state differences in front of the house versus back of the house.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Culinary and Hospitality
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PLC/ CTE)
Additional Notes

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Hospitality Management
7172.D1.1	Discuss different job placement techniques.
7172.D1.2	Discuss the function of service and its impact on hospitality operations.
7172.D1.3	Describe the management functions of planning, organizing, staffing, controlling, and leadership.
7172.D1.4	Discuss early contributors to the hospitality industry and their impact on management philosophy and leadership.
7172.D1.5	Evaluate various segments of the foodservice industry.
7172.D1.6	Discuss how supply, demand, labor, and competition affect the hospitality industry.
7172.D1.7	Identify major consumer concerns and how they impact the foodservice industry.
7172.D1.8	Identify and describe the principal types of lodging properties.
7172.D1.9	Discuss the major departments in a hotel and how they function.
7172.D1.10	Examine key features of hotels relating to competition.
7172.D1.11	Assess the impact tourism has on the economy.
7172.D1.12	Discuss destination mix activities.
7172.D1.13	Describe the various channels of distribution found in tourism.
7172.D1.14	Interact with guest speakers representing various hospitality industry segments.
Domain	
7172.D2.1	Appreciate how the hospitality management industry affects students
7172.D2.2	Understand how the hospitality management industry impacts others
7172.D2.3	Understand the basic demands of today's hospitality employees/managers
7172.D2.4	Appreciate the connectivity of hospitality departments

Next Level Programs of Study

Review Document

7172.D2.5	Understand fundamental hospitality terms
Domain	Convention and Meeting Management
7172.D3.1	Identify aspects of convention/meeting management.
7172.D3.2	Analyze the growth and coinciding changes that this industry has experienced and project trends for the industry.
7172.D3.3	Construct a basic framework for planning a meeting, convention, or exposition.
7172.D3.4	Demonstrate the skills necessary for interacting with various service providers involved in the industry.
7172.D3.5	Compare and contrast types of convention facilities.
7172.D3.6	Construct a space utilization plan.

Hospitality Management Capstone	
Career Cluster	Hospitality and Tourism
Program of Study	Hospitality Management
NLPS Sequence	D
Course Code	7237
Course Description	<i>This course presents the essentials of effective food and beverage control while establishing systems for sale values of food and beverages that are outlined. This course addresses the application of the four-step control process to the primary phases of foodservice operations: purchasing, receiving, storing, issuing and production. Labor costs and sales forecasting are analyzed. This course is also opportunity for the Intermediate Hospitality student to acquire valuable field experience by working the Hospitality Manager supervision. The student keeps a journal and prepares a report of their experience at the end of the course.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Culinary and Hospitality; Nutrition; Hospitality Management
Credits	2 semester course, 2 semester required, 1-3 credits per semester, 6 credits max
Counts Toward	Counts as a Directed Elective or Elective for all diplomas
Dual Credit Status	X (PLC/ CTE)

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Human Relations Management</i>
7237.D1.1	Describe the process of management through effective communication skills.
7237.D1.2	Summarize leadership styles and analyze when each is most appropriate.
7237.D1.3	Outline the supervisor's role in ethical decision-making, problem solving, and delegation of duties.
7237.D1.4	Explain the role of job descriptions and specifications and develop written examples.
7237.D1.5	Perform mock interviews; analyze results.
7237.D1.6	Describe procedures of new employee orientation.
7237.D1.7	Compare training methods; construct an effective employee-training program to include follow-up training and cross training.
7237.D1.8	Analyze types and methods of employee evaluation.
7237.D1.9	Describe necessity of change and ways of implementing change with the least employee resistance.
7237.D1.10	Evaluate methods of conflict resolution.
7237.D1.11	Identify reasons for disciplinary problems and discuss the supervisor's role in handling them.
7237.D1.12	Describe the procedure for terminating employees.
7237.D1.13	Analyze motivational techniques/problems; discuss procedures for attitudinal changes.
7237.D1.14	Analyze ways of dealing with stress in the workplace.
7237.D1.15	Discuss time management and other organizational management techniques.

Next Level Programs of Study

Review Document

Domain	Hospitality Purchasing and Control
7237.D2.1	Discuss the flow of goods in a foodservice operation.
7237.D2.2	Describe the various formal and informal purchasing methods. (i.e., bid, phone, etc.)
7237.D2.3	Research and analyze market fluctuations and product cost.
7237.D2.4	Discuss legal and ethical considerations of purchasing.
7237.D2.5	Explain regulations for inspecting and grading of meats, poultry, seafood, eggs, dairy products, fruits and vegetables. Explain quality and yield grades as directed by the National Association of Meat Purveyors (NAMP) and the International Association of Meat Purveyors (INAMP) specifications for meats.
7237.D2.6	Write a bid specification.
7237.D2.7	Explain proper receiving and storage of food and non-food items, comparing to product specifications.
7237.D2.8	Conduct yield and quality tests of canned, fresh, frozen, refrigerated, and staple goods.
7237.D2.9	Analyze the product costs and labor costs of prefabricated products and product produced on-premises.
7237.D2.10	Discuss inventory, rotation of stock, issuing, and current computerized systems for purchasing and inventory control.
7237.D2.11	Create sales forecasts.
7237.D2.12	Create labor schedules.
7237.D2.13	Calculate food, beverage and cost percentages, labor costs and percentages and other related costs.
7237.D2.14	Demonstrate process of recipe yield adjustment.
7237.D2.15	Demonstrate the process of recipe costing.
7237.D2.16	Determine selling price of menu items.
7237.D2.17	Identify environmentally friendly cleaning products and what common chemicals they can replace. Identify and compare costs.
7237.D2.18	Research/identify the benefits of using fiber textiles, including fiber textiles made from other recycled materials (e.g., carpet, clothing, seat covers, towels, napkins, curtains, etc.)
7237.D2.19	Identify regularly purchased products that could be replaced with recyclable, reusable or biodegradable items.
7237.D2.20	Identify local purchasing sources for produce and fruits.
7237.D2.21	Identify seasonally specific products. Discuss the pros and cons of menuing seasonal products.
7237.D2.22	Identify the benefits and challenges of stabling a facility garden to provide produce and herbs for your kitchen,
7237.D2.23	Compare the price of non-local to local food.
7237.D2.24	Identify local source(s) for recycling fats, oils, and grease.
7237.D2.25	Discuss the financial implications of recycling fats, oils, and grease from a restaurant's perspective,
7237.D2.26	Identify items that contain batteries that should be recycled.
7237.D2.27	Determine/research the cost benefit of recycling cardboard or another item.
7237.D2.28	Identify one organization in your area that will recycle glass.
7237.D2.29	List the post-consumer paper content in the paper products being used throughout the facility.
7237.D2.30	Research how alternatives to paper towels compare in terms of sustainability.
Domain	Special Event Management

Next Level Programs of Study

Review Document

7237.D3.1	Identify the historic roots of celebration.
7237.D3.2	Recognize the demographic changes affecting global event management growth.
7237.D3.3	Identify new and emerging career opportunities and industry certifications in event management.
7237.D3.4	Outline the stages of modern event management.
7237.D3.5	Identify key sources of information for planning.
7237.D3.6	Design and develop a strategic event and theme while managing a timeline and production schedule.
7237.D3.7	Develop policies, procedures and practices expected of event staff and volunteers.
7237.D3.8	Develop an event budget, correctly forecasting event revenue and expenses and report post-event financial results.
7237.D3.9	Identify communication styles and develop leadership and problem-solving abilities.
7237.D3.10	Conduct an event site inspection.
7237.D3.11	Recognize the importance of working effectively with third party suppliers and vendors.
7237.D3.12	Identify the five Ps in event management and successful sponsorship and advertising campaigns.
7237.D3.13	Explain how to comply with standard event regulations and evaluate legal event documents.
7237.D3.14	Demonstrate ability to use emerging technology within the event industry.
7237.D3.15	Describe opportunities available to advance an event management career.
Domain	Hospitality Sales and Marketing
7237.D4.1	Distinguish marketing from sales and identify trends that affect marketing and sales in the hospitality industry.
7237.D4.2	Identify and describe the key elements of a marketing plan.
7237.D4.3	Summarize the duties and responsibilities of positions typically found in a hotel marketing and sales office.
7237.D4.4	Describe the key components of a presentation sales call.
7237.D4.5	Explain the basics of effective telephone communication and describe various types of outgoing and incoming telephone calls related to the marketing and sales function.
7237.D4.6	Describe internal marketing and sales in a hospitality business environment.
7237.D4.7	Explain the role of advertising, public relations, and publicity in reaching prospective guests.
7237.D4.8	Summarize how hospitality properties are meeting the needs of business travelers.
7237.D4.9	Explain how hospitality properties are meeting the needs of leisure travelers.
7237.D4.10	Describe travel agencies and the travelers they serve.
7237.D4.11	Summarize how hotels market and sell to meeting planners.
7237.D4.12	Identify considerations for marketing hospitality products and services to international travelers and other special segments such as honeymooners, sports teams, and government travelers.
7237.D4.13	Summarize trends affecting the food and beverage industry and describe positioning strategies and techniques for restaurants and lounges.
7237.D4.14	Explain how hotels market and sell catered events and meeting rooms.
Domain	Quantity Food Purchasing
7237.D5.1	Student will be able to select appropriate vendors
7237.D5.2	Student will learn the procedures for, receiving, storage, and inventory control
7237.D5.3	Student will be aware of techniques of specification and bid purchasing
7237.D5.4	Student will learn economical use of product.

Competency #	Competency
Domain	Basic Food Theory and Skills
7173.D1.1	Define hospitality and the philosophy of the hospitality industry.
7173.D1.2	Trace the growth and development of the hospitality and tourism industry.
7173.D1.3	Describe the various cuisines and contributions of leading culinarians.
7173.D1.4	Identify professional organizations within the field; explain purposes and benefits.
7173.D1.5	Outline the organization, structure, and functional areas in various hospitality organizations as a perspective for later courses.
7173.D1.6	Discuss/evaluate industry trends as they relate to career opportunities and the future of the industry.
7173.D1.7	Discuss and evaluate industry trade periodicals and social media
7173.D1.8	Demonstrate how to read and follow a standard recipe.
7173.D1.9	Demonstrate knife skills, hand tools, and equipment operation, emphasizing proper safety and sanitation.
7173.D1.10	Identify and use utensils, pots and pans.
7173.D1.11	Utilize weights and measures to demonstrate proper scaling and measurement techniques.
7173.D1.12	Define, describe and demonstrate basic cooking methods to include boiling, steaming, poaching, roasting, pan frying, deep fat frying, sautéing, broiling, grilling, braising and sous vide.
7173.D1.13	Demonstrate process of recipe yield adjustment.
7173.D1.14	Identify and use herbs, spices, oils and vinegars.
7173.D1.15	Identify and prepare fruits, vegetables, starches and farinaceous items.
Domain	Safety and Sanitation

Next Level Programs of Study

Review Document

7173.D2.1	Identify the critical control points during all food handling processes as a method for minimizing the risk of food borne illness (HACCP system).
7173.D2.2	Identify microorganisms, which are related to food spoilage and food borne illnesses; describe their requirements and methods for growth.
7173.D2.3	Recognize symptoms common to food borne illnesses and how these illnesses can be prevented.
7173.D2.4	Demonstrate knowledge of good personal hygiene and health habits.
7173.D2.5	Develop acceptable procedures when preparing potentially hazardous foods to include time/temperature principles.
7173.D2.6	Differentiate the major reasons for and recognize signs of food spoilage.
7173.D2.7	Describe the requirements for proper receiving and storage of both raw and prepared foods.
7173.D2.8	Recognize sanitary and safety design and construction features of food production equipment and facilities. (i.e., NSF, UL, OSHA, ADA, etc.).
7173.D2.9	Differentiate current types of cleaners and sanitizers and their proper use.
7173.D2.10	Review Material Safety Data Sheets (MSDS) and understand their requirements in handling hazardous materials. Discuss right-to-know laws.
7173.D2.11	Develop cleaning and sanitizing schedule and procedures for equipment and facilities.
7173.D2.12	Identify proper methods of waste disposal and recycling.
7173.D2.13	Differentiate signs of pest infestation and conclude appropriate measures for insects, rodents, and pest eradication appropriate measures for insects, rodents, and pest control eradication.
7173.D2.14	Understand steps of a sanitation self-inspection and identify modification necessary for compliance with standards.
7173.D2.15	Differentiate appropriate types and use of fire extinguishers used in the foodservice area.
7173.D2.16	Recall laws and rules of the regulatory agencies governing sanitation and safety in foodservice operation.
7173.D2.17	Demonstrate knowledge of how blood-borne pathogens can spread.
7173.D2.18	Demonstrate knowledge of basic first-aid techniques and CPR.

Nutrition	
Career Cluster	Hospitality and Tourism
Program of Study	Nutrition Science
NLPS Sequence	B
Course Code	7171
Course Description	<i>Nutrition students will learn the characteristics, functions and food sources of the major nutrient groups and how to maximize nutrient retention in food preparation and storage. Students will be made aware of nutrient needs throughout the life cycle and to apply those principles to menu planning and food preparation. This course will engage students in hands-on learning of nutritional concepts such as preparing nutrient dense meals or examining nutritional needs of student athletes</i>

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Dietary Management and Supervision</i>
7239.D1.1	Explain management practices as they are used in foodservice operations.
7239.D1.2	Demonstrate leadership skills.
7239.D1.3	Understand the process of staffing, scheduling, and training of employees.
7239.D1.4	Explain the importance of effective communication skills within and outside the foodservice operation.
7239.D1.5	Practice accurate costing, budgeting, and inventory procedures.
7239.D1.6	Determine effective marketing techniques.
7239.D1.7	Implement cost effective financial procedures.
7239.D1.8	Learn the importance of professional development.
Domain	<i>Cost Controls</i>
7239.D2.1	Explain purchasing and receiving practices as they are used in foodservice operations.
7239.D2.2	Understand the terminology and practice of food production skills.
7239.D2.3	Identify equipment needs.
7239.D2.4	Supervise the production and service of food.
7239.D2.5	Write purchase specifications.
7239.D2.6	Write general and modified menus.
7239.D2.7	Implement cost effective procedures
Domain	<i>Resident Clinical Assessment and Documentation</i>
7239.D3.1	Understand and apply the principles of diet therapy.
7239.D3.2	Develop and implement care plans to meet nutritional goals.
7239.D3.3	Utilize nutritional information in care planning and evaluate the effectiveness of care plans.
7239.D3.4	Understand the Minimum Data Sets and Resident Assessment Protocols.
7239.D3.5	Work with an interdisciplinary health care team.
7239.D3.6	Recognize and understand drug and nutrient interaction.
7239.D3.7	Understand and comply with the policies and procedures developed by the Centers for Medicare and Medicaid Services (CMS).
Domain	<i>Dietary Management Internship</i>
7239.D4.1	Discuss and demonstrate how concepts and skills learned in the classroom apply to the health care environment in the field of patient dietary management.
7239.D4.2	Identify and apply requisite skills needed in the fulfillment of a job assignment.
7239.D4.3	Compare and contrast the student's expectations of the internship and actual experience derived.
7239.D4.4	Summarize and evaluate the knowledge, skills and experience gained on the internship to apply these to the next job obtained by the student.
7239.D4.5	Explain and demonstrate how to adapt to the work environment as appropriate.
7239.D4.6	Document 150 work hours in the field required before testing for the Dietary Management certification.

Next Level Programs of Study

Review Document

Domain	
7239.D5.1	List the benefits and nutritional components of regular physical activity.
7239.D5.2	State the basic ways in which to assess nutritional status and intervene effectively.
7239.D5.3	Discuss disease states and treatments related to nutritional health
7239.D5.4	Define a healthy body weight and explain methods used to assess body composition.
7239.D5.5	Explain the principles of weight management.
7239.D5.6	Recognize the importance of nutritional knowledge in a health care profession.

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	<i>Professionalism in the Cosmetology Field</i>
7330.D1.1	Explain the history of cosmetology and barbering
7330.D1.2	Understand the importance of Life Skills
7330.D1.3	Practice Professional Image
7330.D1.4	Evaluate the elements involved in presenting a professional image
7330.D1.5	Evaluate effective verbal and non-verbal communication techniques to successfully interact with clients and peers
7330.D1.6	Demonstrate a successful client consultation
7330.D1.7	Establish and practice the ergonomic posture steps to prevent injury while working
7330.D1.8	Communicate Effectively in the workplace for Success
Domain	<i>Sanitation, Bacteriology and Sterilization</i>
7330.D2.1	Discuss infectious materials transmission in the barbershop.
7330.D2.2	Understand reasons for maintaining MSDS notebooks.
7330.D2.3	Discuss federal and state agencies associated with infection control and safe work practices.
7330.D2.4	Define and discuss the three levels of decontamination. Identify commonly used chemical agents.
7330.D2.5	Demonstrate proper decontamination procedures for tools, equipment, and surfaces.
7330.D2.6	Discuss standard precautions and blood-spill disinfection.
7330.D2.7	Discuss disinfecting rules, decontamination safety precautions, and rules of sanitation. Define safe work practices.
7330.D2.8	Recognize potential safety hazards in the shop.
7330.D2.9	Practice Infection Control Procedures

Next Level Programs of Study

Review Document

7330.D2.10	Demonstrate appropriate sanitation precautions and first aid procedures to ensure proper salon standards
7330.D2.11	Apply sanitation procedures to maintain state health guidelines and a professional salon
7330.D2.12	Analyze the different parasites, bacteria and viruses and their relationship to the spread of infection in salons and clients
7330.D2.13	Demonstrate proper first aid techniques to use on cuts and burns
7330.D2.14	Apply safe handling techniques in the use of disinfectant products as a salon professional
7330.D2.15	Apply universal precautions and professional responsibilities as a salon professional
7330.D2.16	Identify potential hazards involving bloodborne pathogens.
Domain	Shampoo and Massage
7330.D3.1	Explore proper draping procedures for hair services
7330.D3.2	Practice the shampoo service.
7330.D3.3	Identify scalp massage techniques and treatments
7330.D3.4	Recognize incline method recline method of shampoo service.
7330.D3.5	Practice shampooing, rinsing, and conditioning of hair
7330.D3.6	Safely and effectively Shampoo, Rinse, and Condition hair of all types
7330.D3.7	Demonstrate basic knowledge of various classifications of products and cosmetics used in the industry
7330.D3.8	Evaluate draping and scalp massage as it relates to hair care
7330.D3.9	Explore the hair as it pertains to formation, growth, structure, behavior, and how hair gains color
Domain	Design Decisions
7330.D4.1	Learn the principals of hair design to create hair styles
7330.D4.2	Demonstrate mastery of the basic design elements and principles used to create design styles
7330.D4.3	Explore ways to design hair styles to enhance, or camouflage facial features
7330.D4.4	Explore different facial shapes and proportions and their role in hair design and facial hair design
7330.D4.5	Define the Elements of Hair Design
Domain	Haircutting
7330.D5.1	Demonstrate a basic understanding of haircutting techniques
7330.D5.2	Identify appropriate and essential hair cutting tools
7330.D5.3	Explore various haircuts including solid form, increased layered, graduated form, uniformed layer, combination, business, man, and clipper
7330.D5.4	Recognize and explore haircuts to understand the importance of the proper cut and its effect on the overall hair design
7330.D5.5	Understand the basic principles of Haircutting
7330.D5.6	Practice Effective Client Consultation for Haircutting

Next Level Programs of Study

Review Document

7330.D5.7	Effectively use Clippers and Trimmers
Domain	Chemical Texturizing
7330.D6.1	Define chemical texturizing of hair and its usage in the salon space
7330.D6.2	Explore hair analysis in order to perform appropriate chemical texturizing
7330.D6.3	Explore perm wrap techniques for creating hairstyles
7330.D6.4	Understand the chemical relaxing processes in creating hairstyles
7330.D6.5	Examine curl reforming in creating hairstyles
Domain	Hair Coloring
7330.D7.1	Demonstrate an understanding of hair coloring techniques
7330.D7.2	Explain color theory and the law of color as it relates to hair color
7330.D7.3	Understand existing hair color of a client as it relates to additional color considerations
7330.D7.4	Recognize the different types of Hair Color
7330.D7.5	Conduct a Hair color Consultation
7330.D7.6	Learn the Special Challenges in Hair color and Corrective Solutions
7330.D7.7	Understand Hair coloring Safety Precautions
Domain	Manicuring and Pedicuring
7330.D8.1	Understand nail structure and growth in fingernails and toenails
7330.D8.2	Discuss disorders, diseases, and irregularities of fingernails and toenails
7330.D8.3	Explain proper skills and procedures, and sanitary precautions for a manicure and pedicure
7330.D8.4	Understand basic procedures for applying artificial nails including tips, wraps, acrylic nails and gels
7330.D8.5	Discuss the Anatomy of the Hand and Arm and its impact on manicures
7330.D8.6	Practice Manicures and Pedicures and how to do them effectively and efficiently
7330.D8.7	Learn basic Nail Techniques

Barbering and Cosmetology Fundamentals	
Career Cluster	Human Services
Program of Study	Cosmetology and Barbering
NLPS Sequence	B
Course Code	7331
Course Description	<i>Barbering and Cosmetology Fundamentals focuses on the development of practical skills introduced in Principles of Barbering and Cosmetology. Clinical application and theory in the science of barbering and cosmetology are introduced. Successful completion of the course requires at least 375 Cosmetology studio hours.</i>
Prerequisite(s)/	Principles of Barbering and Cosmetology

Review Document

7331.D2.4	Uphold proper first aid techniques to use on cuts and burns
7331.D2.5	Practice safe handling techniques in the use of disinfectant products as a salon professional
7331.D2.6	Utilize universal precautions and professional responsibilities as a salon professional
7331.D2.7	Understand the potential hazards involving bloodborne pathogens.
Domain	Anatomy
7331.D2.1	Explain the importance of anatomy and physiology to the cosmetology/barbering profession. Describe the structure and reproduction of cells.
7331.D2.2	Describe the structure of the skull, face, and neck and their relationship to cosmetology/barbering.
7331.D2.3	Identify important muscles of the head, face, and neck related to barbering services.
7331.D2.4	Identify important nerves of the head, face, and neck related to barbering services.
7331.D2.5	Know the General Anatomy and Physiology to identify disorders and diseases.
7331.D2.6	Analyze the anatomy and physiology of the human body as it relates to the cosmetology and barbering professions.
7331.D2.7	Analyze systems and organs of the human body and their functions to understand how the body works
7331.D2.8	Analyze the structure and function of cells, tissues, organs, and body systems to understand the building blocks of the body
7331.D2.9	Evaluate the structure and functions of the skeletal, muscular, and nervous systems to understand the basic body systems
7331.D2.10	Compare the circulatory, digestive, excretory, and respiratory systems in relation to each other and their role in the human body
Domain	Electricity and Light Therapy
7331.D3.1	Identify and define common electrical terms.
7331.D3.2	Discuss and recognize electrical safety devices.
7331.D3.3	Explain different electrical modalities and their uses.
7331.D3.4	Explain the effects of ultraviolet and infrared light on the skin.
7331.D3.5	Evaluate the nature of electricity and its uses as it relates cosmetology and barbering.
7331.D3.6	Analyze electromagnetic radiation and the visible spectrum of light to understand light therapy treatments
Domain	Chemistry
7331.D4.1	Define organic and inorganic chemistry.
7331.D4.2	Define matter and its states.
7331.D4.3	Define pH and understand the pH scale.
7331.D4.4	Define organic and inorganic chemistry. Explain the characteristics of emulsions, suspensions, and solutions.
7331.D4.5	Understand how the pH levels of hair products affect the hair and scalp.

Next Level Programs of Study

Review Document

7331.D4.6	Discuss cosmetic preparations used in barbering including shampoos, conditioners, rinses, and tonics.
7331.D4.7	Recognize the basics of chemistry and electricity and how it influences cosmetology and barbering
7331.D4.8	Analyze principals of Chemistry and Electricity as they relate to cosmetology and barbering
7331.D4.9	Evaluate matter, the pH scale, and the chemistry of cosmetics to understand their relationship to cosmetology procedures
Domain	<i>Shampoo, Massage and Scalp</i>
7331.D5.1	Identify proper draping procedures for hair services
7331.D5.2	Practice scalp massage techniques and treatments
7331.D5.3	Demonstrate incline method recline method of shampoo service.
7331.D5.4	Illustrate skill mastery in shampooing, rinsing, and conditioning of hair
7331.D5.5	Demonstrate advanced knowledge of various classifications of products and cosmetics used in the industry
7331.D5.6	Practice draping and scalp massage as it relates to hair care
7331.D5.7	Appraise hair as it pertains to formation, growth, structure, behavior, and how hair gains color
7331.D5.8	Practice services associated with the treatment of the hair and scalp.
Domain	<i>Properties and Disorders of the Skin</i>
7331.D6.1	Describe the structure and divisions of the skin.
7331.D6.2	List the functions of the skin.
7331.D6.3	Identify recognizable skin disorders.
7331.D6.4	Evaluate skin disorders to understand how to handle them in relation to your role in cosmetology/barbering.
Domain	<i>Haircutting</i>
7331.D7.1	Identify the principal tools and implements used in the practice of barbering and cosmetology.
7331.D7.2	Identify the parts of the shears, clippers, and razors.
7331.D7.3	Demonstrate the correct techniques for holding combs, shears, clippers, and razors.
7331.D7.4	Demonstrate honing and stropping techniques.
Domain	<i>Properties of the Scalp and Hair</i>
7331.D8.1	Evaluate trichology as it relates to cosmetology and barbering
7331.D8.2	Evaluate the properties of the hair and scalp
7331.D8.3	Perform a thorough Hair and Scalp Analysis

7333.D2.10	Demonstrate the performance of the following cutting techniques: fingers-and-shear, shear-over comb, freehand shear cutting, freehand clipper cutting, clipper-over-comb, and razor cutting.
7333.D2.11	Demonstrate shaving the outline areas.
7333.D2.12	Demonstrate disinfection procedures.
7333.D2.13	Demonstrate basic hairstyling techniques.
Domain	Shaving and Facial Hair Design
7333.D3.1	Discuss safety precautions used in haircutting and styling.
7333.D3.2	Discuss sanitation and safety precautions associated with straight razor shaving.
7333.D3.4	Demonstrate the ability to perform straight razor positions and cutting strokes.
7333.D3.5	Identify the 14 shaving areas of the face.
7333.D3.6	Demonstrate a facial shave.
7333.D3.7	Demonstrate a neck shave.
7333.D3.8	Demonstrate a mustache and beard trim.
Domain	Hairstyling
7333.D4.1	Demonstrate mastery of hairstyling techniques
7333.D4.2	Learn the basics of wet Hairstyling
7333.D4.3	Master Comb-Out Techniques of Hairstyling
7333.D4.4	Perform Formal Styling
7333.D4.5	Understand the Principles of Hair Design
Domain	Design Decisions
7333.D5.1	Apply the principles of hair design to create hair styles
7333.D5.2	Demonstrate mastery of the design elements and principles used to create design styles
7333.D5.3	Demonstrate how to design hair styles to enhance, or camouflage facial features
7333.D5.4	Examine different facial shapes and proportions and their role in hair design and facial hair design
7333.D5.5	Define the Elements of Hair Design
Domain	Chemical Texturizing
7333.D6.1	Demonstrate mastery of chemical texturizing of hair
7333.D6.2	Demonstrate mastery of hair analysis to perform appropriate chemical texturizing
7333.D6.3	Demonstrate mastery of perm wrap techniques in creating hairstyles
7333.D6.4	Demonstrate mastery of chemical relaxing processes in creating hairstyles
7333.D6.5	Demonstrate mastery of curl reforming in creating hairstyles
Domain	Hair Coloring
7333.D7.1	Demonstrate mastery of hair coloring techniques
7333.D7.2	Evaluate color theory and the law of color as it relates to hair color
7333.D7.3	Evaluate existing hair color of a client as it relates to additional color considerations
7333.D7.4	Understand the type of Hair Color
7333.D7.5	Conduct an Effective Hair color Consultation

Next Level Programs of Study

Review Document

7333.D7.6	Understand the Special Challenges in Hair color and Corrective Solutions
7333.D7.7	Know Hair coloring Safety Precautions
Domain	Additional Standards
7333.D8.1	Demonstrate competency in braiding
7333.D8.2	Explain how to prepare the hair for braiding and cornrow
7333.D8.3	Explain the difference between human hair and synthetic hair
7333.D8.4	Describe the two basic categories of wigs
7333.D8.5	Describe several types of hairpieces and their uses
7333.D8.6	Explain several different methods of attaching hair extensions

Barbering and Cosmetology Capstone	
Career Cluster	Human Services
Program of Study	Cosmetology and Barbering
NLPS Sequence	D
Course Code	7334
Course Description	<i>Barbering and Cosmetology Capstone builds and improves previously developed skills with emphasis on developing individual techniques. Professionalism, shop management, psychology in relation to barbering and cosmetology, and preparation for state board examination are stressed. Successful completion of the course requires at least 375 studio hours.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Barbering and Cosmetology; Barbering and Cosmetology Fundamentals; Advanced Cosmetology or Advanced Barbering
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas
Dual Credit Status	X
Additional Notes	This course may require extended hours of participation in order to meet the 1500 hours required for the Cosmetology and Barbering exams.
ADDITIONAL COURSE INFO	
Funding	Less than Moderate Value Level II

Domain	Skin
7334.D1.1	Explain the Histology of the Skin
7334.D1.2	Conduct a consultation and skin Analysis
7334.D1.3	Categorize Skin Care Products
Domain	Makeup and Skin Procedures
7334.D2.1	Analyze and perform proper techniques and procedures of the skin
7334.D2.2	Evaluate and perform facials and facial manipulations
7334.D2.3	Demonstrate the application of makeup and artificial eyelashes
7334.D2.4	Describe Facial Makeup and their uses
7334.D2.5	Outline the steps for Basic Makeup Application
Domain	Hair Removal
7334.D3.1	Demonstrate basic waxing techniques and sanitation precautions for hair removal to the eyebrows, lips, and chin
7334.D3.2	Describe Permanent Hair Removal
7334.D3.3	Discuss Temporary Hair Removal
7334.D3.4	Adhere to State and Government Regulations
Domain	Manicuring and Pedicuring
7334.D4.1	Evaluate nail structure and growth in fingernails and toenails
7334.D4.2	Examine disorders, diseases, and irregularities of fingernails and toenails
7334.D4.3	Demonstrate proper skills and procedures, and sanitary precautions for a manicure and pedicure
7334.D4.4	Demonstrate basic procedures for applying artificial nails including tips, wraps, acrylic nails and gels

Next Level Programs of Study

Review Document

7334.D4.5	Understand the Anatomy of the Hand and Arm and its impact on manicures
7334.D4.6	Perform Manicures and Pedicures and how to do them effectively and efficiently
7334.D4.7	Learn Advanced Nail Techniques
Domain	<i>Properties and Disorders of the Skin</i>
7334.D5.1	Describe the structure and divisions of the skin.
7334.D5.2	List the functions of the skin.
7334.D5.3	Identify recognizable skin disorders.
Domain	<i>Properties and Disorders of Hair and Scalp</i>
7334.D6.1	Identify the principal tools and implements used in the practice of barbering.
7334.D6.2	Identify the parts of the shears, clippers, and razors.
7334.D6.3	Demonstrate the correct techniques for holding combs, shears, clippers, and razors.
7334.D6.4	Demonstrate honing and stropping techniques.
7334.D6.5	Barbering Specific Standards
	<i>Barbering Specific Standards</i>
Domain	<i>Men's Facial Massage and Treatments</i>
7334.D7.1	Describe the benefits of facial massage and treatments.
7334.D7.2	Discuss the location and stimulation of facial muscles and nerves.
7334.D7.3	Name and demonstrate massage manipulations.
7334.D7.4	Demonstrate the use of facial treatment equipment.
7334.D7.5	Discuss products used in facial treatments.
7334.D7.6	Identify skin types and appropriate facial treatments and products.
Domain	<i>Equipment Care</i>
7334.D8.1	Identify principal and advanced tools and implements used in the practice of barbering.
7334.D8.2	Identify the parts of the shears, clippers, and razors.
7334.D8.3	Demonstrate proper methods for maintaining shears, clippers, and razors.
7334.D8.4	Demonstrate the correct techniques for holding combs, shears, clippers, and razors.
Domain	<i>Honing and Stropping</i>
7334.D9.1	Demonstrate proper methods of razor preparation sharpening and care using various types of hones strop.
7334.D9.2	Demonstrate honing and stropping techniques.
Domain	<i>Hair Coloring and Lightening</i>
7334.D10.1	Discuss color theory and its importance to hair coloring.
7334.D10.2	Identify classifications of hair color products and explain their actions on hair. Explain the action of lighteners on hair.
7334.D10.3	Identify products used in hair coloring and lightening. Demonstrate hair color and lightener application procedures.
7334.D10.4	Identify products used to color facial hair.
7334.D10.5	Discuss hair coloring and lightening safety precautions.

Next Level Programs of Study

Domain	Permanent Waving & Chemical Relaxing Services
7334.D11.1	Explain the effects of chemical texture services on the hair.
7334.D11.2	Identify the similarities and differences between chemical texture services.
7334.D11.3	Discuss hair and scalp analysis for chemical texture services.
7334.D11.4	Perform a permanent wave service.
7334.D11.5	Perform a reformation curl service.
7334.D11.6	Perform a hair-relaxing service.
Domain	Women's Haircutting and Styling
7334.D12.1	Perform four basic women's haircuts.
7334.D12.2	Demonstrate mastery of texturizing techniques.
7334.D12.3	Perform basic wet styling techniques finger-waving.
7334.D12.4	Perform basic blow-dry styling techniques.
7334.D12.5	Identify thermal styling tools.
Domain	Men's Haircutting and Styling
7334.D13.1	Discuss the art and science of men's haircutting and styling.
7334.D13.2	Discuss envisioning and the client consultation.
7334.D13.3	Discuss the principles of facial shapes and anatomical features.
7334.D13.4	Identify and name the sections of the head as applied to haircutting.
7334.D13.5	Understand fundamental terms used in haircutting.
7334.D13.6	Demonstrate mastery in cutting techniques: Fingers-and-shear, shear-over-comb, freehand shear Freehand clipper cutting, clipper-over-comb Razor cutting
7334.D13.7	Demonstrate shaving the outline areas.
7334.D13.8	Demonstrate disinfection procedures.
7334.D13.9	Demonstrate basic hairstyling techniques including texturizing, finger styling, loc styling and maintenance, braiding, and blow dry styling.
7334.D13.10	Discuss safety precautions used in haircutting and styling.
Domain	Men's Hairpieces
7334.D14.1	Discuss reasons for purchasing hair replacements. Recognize supplies needed for servicing hair systems.
7334.D14.2	Demonstrate how to measure for a hair replacement. Explain how to create a hair replacement template.
7334.D14.3	Explain how to apply and remove hair replacement systems.
7334.D14.4	Describe how to fit and cut in a hair replacement system.
7334.D14.5	Describe how to clean and service a hair replacement.
7334.D14.6	Discuss selling hair replacement systems.
7334.D14.7	Discuss alternative hair replacement methods.
Domain	Cosmetology IV
7334.D15.1	Prepare for Licensure
7334.D15.2	Discuss how to prepare for written state board examinations.

Next Level Programs of Study

Review Document

7334.D15.3	Discuss barber board laws, rules, and regulations in your state. Discuss how to prepare for practical state board examinations.
7334.D15.4	Explain what information may be found in candidate information booklets or materials.
7334.D15.5	Identify the primary objectives of state barber board rules and regulations.
7334.D15.6	Understand the Salon Business and general business basics for cosmetology/barbering including business startup, structure, salaries, commission, booth rental, etc.
7334.D15.7	Understand the dynamics of the Barber Shop.
7334.D15.8	Develop professional practices and procedures in salon retailing and salon business to be successful in the industry.
7334.D15.9	Discuss different types of advertising.
7334.D15.10	Identify the types of records shop owners must maintain.
7334.D15.11	Demonstrate services and retail product sales techniques.
7334.D15.12	Discuss techniques on how to market yourself as a barber.
7334.D15.13	Create a business plan with short- and long-term goals to own or manage a salon
7334.D15.14	Discuss self-employment and barbershop ownership.
7334.D15.15	Understand responsibilities associated with business development and ownership.
7334.D15.16	Discuss types of business ownership.
7334.D15.17	Explain the differences of employment classifications.
7334.D15.18	Discuss the features of a business plan.
7334.D15.19	Design a floor plan.
7334.D15.20	Analyze the importance of building and maintaining professional relationships with clientele and peers
7334.D15.21	Explain the relationship between personality and attitudes and the demonstration of professional behavior.
7334.D15.22	List guidelines to maintaining personal and professional health.
7334.D15.23	Demonstrate understanding of human-relations and communication skills.
7334.D15.24	List the rules of professional ethics.
7334.D15.25	Discuss principles of personal and professional success.
7334.D15.26	Discuss the importance of continuing education.
7334.D15.27	Explain the concepts of motivation and self-management.
7334.D15.28	Create short-term and long-term goals.
7334.D15.29	Describe Personal hygiene and Public Hygiene.
7334.D15.30	Analyze selling methods including advertising and follow-up, in the salon retailing business
7334.D15.31	Be prepared to practice Indiana State Law pertaining to beauty culture.
7334.D15.32	Analyze state laws and regulations pertaining to employment in and operation of a cosmetology enterprise.
7334.D15.33	Apply employment seeking knowledge and skills to secure employment in the cosmetology industry
7334.D15.34	Discuss industry positions available for barbering students.

Domain	Substance Abuse	
7241.D1.1	Describe the nature of substance abuse and dependence.	
7241.D1.2	Understand the motivation for using alcohol and other drugs.	
7241.D1.3	Identify the major classifications of drugs and the physiological, psychological, and sociological effects of their use.	

Next Level Programs of Study

Review Document

7241.D1.4	Recognize the etiology, symptoms, and treatment models of chemical addiction.
7241.D1.5	Understand the effects of chemical dependence on the family.
7241.D1.6	Identify laws pertaining to the major classifications of drugs.
7241.D1.7	Recognize the effects of substance abuse on fetal development.
7241.D1.8	Identify the effects and patterns of substance abuse in different populations.
7241.D1.9	Examine the use of psychotherapeutic drugs in our culture and evaluate its impact on our society.
7241.D1.10	Assess the pharmacological effects of psychoactive drugs on the central nervous system.
7241.D1.11	Compare the CNS naturally occurring psychoactive chemicals with those used illicitly.
7241.D1.12	Determine the effects of illicit drug use on the various organs of the body.
Domain	Family and Community in Youth Work
7241.D2.1	Discuss the role of community in empowering children and youth.
7241.D2.2	Identify diverse family systems in the multicultural setting.
7241.D2.3	Identify and analyze the stages of the family life cycle.
7241.D2.4	Identify and analyze the child in the family from the family systems approach.
7241.D2.5	Identify the ecological systems affecting the family.
7241.D2.6	Discuss, demonstrate, and analyze principles and techniques of culturally sensitive interpersonal skills for working with families.
7241.D2.7	Identify community and professional resources needed to support youth and their families.
7241.D2.8	Analyze specific family challenges in various types of families and cultural/religious settings.
7241.D2.9	Identify and assess family support systems within the community.
7241.D2.10	Identify, describe, and discuss stressors and potential stressors that may affect children, youth, and families.
7241.D2.11	Describe and reflect on the family strengths model.
7241.D2.12	Define and discuss the meaning of culture and cultural diversity.
7241.D2.13	Examine the impact of cultural stereotypes and prejudice.
7241.D2.14	Analyze the cultural impact of socioeconomic class and the cultural influence on time and space orientation.
Domain	Introduction to Disabilities
7241.D3.1	Present historical information about the field of disabilities and its impact on current services and approaches.
7241.D3.2	Identify the living and learning environments of individuals with disabilities.
7241.D3.3	Describe the difference between biological/genetic disabilities and those disabilities occurring through circumstance or environment.
7241.D3.4	Determine the process by which an individual with disability seeks out a diagnosis and receives services.
7241.D3.5	Identify and explain the characteristics of today's most prevalent disabilities.
7241.D3.6	Demonstrate an awareness of the social, legal, and ethical issues pertaining to individuals with

	developmental disabilities.
7241.D3.7	Appraise community resources for individuals with disabilities and list services available.
7241.D3.8	Examine the problems and difficulties associated with developmental delays, developmental psychopathology, and dual diagnosis.
7241.D3.9	Analyze the difficulties experienced by those with disabilities in their process of active socialization in the community.
7241.D3.10	Examine and categorize the effects of stress on families living with an individual with a disability.
7241.D3.11	Diagram the socioeconomic status of families/individuals living with disabilities.
7241.D3.12	Construct a chart showing the major disorders included in developmental disabilities and populations comparing the major difficulties experienced by each.
7241.D3.13	Categorize the needs for the individual with an autism spectrum disorder.
7241.D3.14	Compare and contrast the differences between treatments for individuals with disabilities over the years.
7241.D3.15	Debate how legislation has affected the rights and lives of those with disabilities over the years.
7241.D3.16	Examine how social attitudes have changed toward disabilities and individuals with disabilities throughout history.
7241.D3.17	Identify opportunities for individuals with disabilities.
7241.D3.18	Categorize helping profession concepts and their practical application in the delivery of services for disabled populations.
7241.D3.19	Identify terminology and acronyms used in Human Services and Special Populations.
Domain	Additional
7241.D4.1	Examine the societal attitudes shaping personal and public responses to substance use disorders.
7241.D4.2	Understand the history of the addiction profession.
7241.D4.3	Describe classification models of psychoactive drugs.
7241.D4.4	Compare the effects of psychoactive drug use.
7241.D4.5	Explain the basic components of the theories and models utilized to explain substance use disorders.
Domain	
7241.D5.1	Compare differences between needs of an adult with disabilities to a youth with disabilities.
7241.D5.2	Understand financial needs and support for those with disabilities.
7241.D5.3	Collaborate with staff to determine appropriate resources available within agency
7241.D5.4	Collaborate with staff to determine appropriate resources from other area agencies
7241.D5.5	Communicate with client to emphasize the importance of friends, family, and community relationships

Principles of Human Services	
Career Cluster	Human Services
Program of Study	Social and Community Services
NLPS Sequence	A
Course Code	7176
Course Description	<i>Principles of Human Services explores the history of human services, career opportunities, and the role of the human service worker. Focuses on target populations and community agencies designed to meet the needs of various populations. The course includes a required job shadowing project in a Human Services setting (a suggested four-hour minimum to meet Ivy Tech requirements). This course will also encourage cultural awareness and appreciation of diversity. Focuses on cultural variations in attitudes, values, language, gestures, and customs. Includes information about major racial and ethnic groups in the United States.</i>
Prerequisite(s)/Co-Requisite(s)	None
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas

Digital Applications and Responsibility (Applied Digital Applications and Responsibility)	
Career Cluster	Information Technology
Program of Study	
NLPS Sequence	
Course Code	4528
Course Description	<i>Digital Applications and Responsibility prepares students to use technology in an effective and appropriate manner in school, a job, or everyday life. Students develop skills related to word processing, spreadsheets, presentations, and communications software. Students learn what it means to be a good digital citizen and how to use technology, including social media, responsibly. Students expand their knowledge of how to use digital devices and software to build decision-making and problem-solving skills. Students should be provided with the opportunity to seek industry-recognized digital literacy certifications.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Human Services
Credits	1 to 2 semester course, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Technology as a Planning and Productivity Tool</i>
4528.D1.1	Students integrate technology to arrange materials and solve problems efficiently
4528.D1.2	Apply technology to create business, industry, and professional tasks and develop strategies for solving problems
4528.D1.3	Use appropriate technology to plan, develop, edit, and present material to different types of audiences both in a group or individually (i.e., paper, web page, multimedia presentation, publications, speech, hypermedia, etc.)
4528.D1.4	Integrate information and communication technology to analyze a real-world problem, design and implement procedures to monitor information, set timelines, and evaluate progress toward the solution
4528.D1.5	Using appropriate handling and use of supplies and equipment, practice respectful and responsible use of technology through abiding by the professional practices
4528.D1.6	Apply an understanding of plagiarism and fair use; respect copyright laws of information producers such as authors and artists, including website developers
Domain	<i>Document Processing</i>
4528.D2.1	Students design documents by using complex features of software to develop advanced documents that are user-friendly
4528.D2.2	Create and manage master documents and subdocuments by using various edit tools, formatting tools, and templates
4528.D2.3	Use advanced features to create combo boxes, macros, newsletters with mastheads, multi-column brochures, multi-page books, forms wizards, composition, table of contents, and mail merge
4528.D2.4	Explain the use of various document types and how they related to different situations (school, work, home, etc.)
4528.D2.5	Demonstrate saving, opening, and finding files in various formats and the ability to follow instructions
Domain	<i>Spreadsheet Software</i>
4528.D3.1	Students apply concepts of spreadsheet software to organize and manipulate data

Next Level Programs of Study

Review Document

4528.D3.2	Use industry terminology when using spreadsheet software
4528.D3.3	Apply relative, absolute, mixed cell references and advanced features (i.e. naming ranges; track, accept and reject changes; formatting, filtering, and protection) in formulas and printing
4528.D3.4	Create and evaluate formulas and functions; customize formats; pivot tables and charts; and edit and run command buttons, macros, and macros with buttons
4528.D3.5	Edit and label chart components (i.e. axis, legends, titles, and databases)
4528.D3.6	Link and merge worksheets/workbooks; importing and exporting data to and from spreadsheets
Domain	Presentation Software
4528.D4.1	Students create a variety of multi-media presentations using appropriate design principles to communicate in a professional manner
4528.D4.2	Demonstrate how electronic presentations are created
4528.D4.3	Apply Industry design guidelines to create, manipulate and enhance visual presentations
4528.D4.4	Demonstrate presentation skills by creating well-organized, audience-appropriate presentations such as informative, entertaining, instructional, while using proper public speaking techniques
4528.D4.5	Create a stand-alone presentation with video, embedded objects, specialized features, by modifying and designing templates
Domain	Database Software
4528.D5.1	Students synthesize database management concepts to manage, evaluate, and organize information in an effective manner
4528.D5.2	Create database objects such as tables, forms, and queries
4528.D5.3	Use advanced functions to filter, extract, and split databases and cross reference
4528.D5.4	Use a database application software to create or modify a database structure, enter records in a database, create reports, sort, and index a database
Domain	Internet Tools
4528.D6.1	Students establish communication and collaboration skills using the internet and social media to increase global awareness
4528.D6.2	Construct basic HTML5 coding
4528.D6.3	Apply and adapt best practices for internet research
4528.D6.4	Investigate the effects of social media tools on society
4528.D6.5	Explain concepts of internet privacy and security
Domain	Technology Assessment
4528.D7.1	Students apply technology concepts to take industry standard certifications
4528.D7.2	Investigate industry-based certifications within the information technology industry
4528.D7.3	Take computer-based narrative tests and computer adaptive timed tests for topic remediation and support
Domain	Functions of Technology
4528.D8.1	Students connect functions of technology with computer hardware and software, so they

	make decisions about computer technology
4528.D8.2	Identify the principal hardware components of a microcomputer and describe their functions
4528.D8.3	Use operating system utilities to control the operation of the computer
4528.D8.4	Investigate security risks and how to prevent or resolve security issues
4528.D8.5	Recognize and explain compatibility issues and common errors
4528.D8.6	Assess the risk associated with upgrading technology
4528.D8.7	Identify preventative maintenance products and techniques
4528.D8.8	Establish knowledge of computer technology in relationship to networks

Information Technology: Special Topics	
Career Cluster	Information Technology
Program of Study	
NLPS Sequence	
Course Code	4578
Course Description	<i>Information Technology: Special Topics is an extended learning experience designed to address the advancement and specialization of careers within the career cluster through the provision of a specialized course for a specific workforce need in the school's region. The learning experience is at a qualified site, and is designed to give the student the opportunity to learn and practice technical skills; while working under the direction of the appropriately licensed professional. Throughout the course, students will focus on learning about employment opportunities and obtaining the knowledge, skills and attitudes essential for success in specific occupations. Course standards and curriculum must be tailored to the specific profession, preparing students to advance in this career field, and where applicable, provide students with opportunities for certification or dual credit. Participation in a related CTSO encourages the development of leadership, communication and career related skills, and opportunities for community service.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 semester course, up to 3 credits per semester, May be offered for successive semesters up to 12 credits
Counts Toward	Counts as a directed elective or elective for all diplomas

Principles of Computing	
Career Cluster	Information Technology
Program of Study	Computer Science, Cybersecurity, IT Operations, Networking, Software Development
NLPS Sequence	A
Course Code	7183
Course Description	<i>Principles of Computing provides students the opportunity to explore how computers can be used in a wide variety of settings. The course will begin by exploring trends of computing and the necessary skills to implement information systems. Topics include operating systems, database technology, cybersecurity, cloud implementations and other concepts associated with applying the principles of good information management to the organization. Students will also have the opportunity to utilize basic programming skills to develop scripts designed to solve problems. Students will learn about algorithms, logic development and flowcharting.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas Counts as a quantitative reasoning course Fulfills a science requirement for all diploma types
Dual Credit Status	X (PCL/CTE)
Additional Notes

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Computing Basics
7183.D1.1	Discuss different aspects of the nature of information from a human and mechanical standpoint.
7183.D1.2	Demonstrate awareness of the history of computing.

Next Level Programs of Study

Review Document

7183.D1.3	Demonstrate a working knowledge of computer hardware basics and the ability to use the available productivity software.
7183.D1.4	Demonstrate a knowledge of Software, different categories, and how it is developed.
7183.D1.5	Understand cloud computing, virtualization, and the Internet
7183.D1.6	Discuss the basic use of data visualization, statistics, and reporting within an organization.
7183.D1.7	Discuss the concepts of logical and physical data storage as they apply locally and, in the cloud, including the use of database structures and storage area network technology.
7183.D1.8	Explain the fundamental concepts of an information system, including the life cycle, components, and flow of information within an organization.
7183.D1.9	Summarize how informatics can support the organization, including general management, operations, human resources, and financial management.
7183.D1.10	Discuss the importance of security within informatics, including its application in various aspects of the computing disciplines.
7183.D1.11	Discuss the importance of ethics, bias, and effective dissemination of technological knowledge.
Domain	Programming Basics
7183.D2.1	Identify the standard documentation tools of displaying algorithms such as pseudocode, flowchart symbols and UML.
7183.D2.2	Apply basic logical structures, file handling, matrices, and arrays to program algorithms.
7183.D2.3	Apply truth tables, Boolean logic, control structures, relational and logical operators to program algorithms
7183.D2.4	Use set theory and logic gate theory to develop program algorithms.
7183.D2.5	Document and express code and algorithms in an easily understandable manner using tools such as data flow diagrams, flowcharts, use case diagrams, activity diagrams, and state tables.
7183.D2.6	Develop a simple program and/or script using a compiled, object-oriented scripting language like Python.
7183.D2.7	Compare key techniques to visually represent data such as graphs, charts and tables.
7183.D2.8	Create applications that interact with users, demonstrating proper formatting of data.
7183.D2.9	Apply base numbering systems techniques to convert numeric data to any base numbering format, including binary, decimal, and hexadecimal.
7183.D2.10	Identify the uses of various programming and scripting languages in computer systems.
7183.D2.11	Compare and Contrast software development methodologies as it pertains to software development and problem solving.
7183.D2.12	Discuss the concepts and justifications for using secure design techniques.
7183.D2.13	Demonstrate secure code by means of data validation.
7183.D2.14	Describe the different methods for encoding data such as BCD, 1's complement, 2's complement, ASCII, and Unicode.
7183.D2.15	Describe the components of a computer architecture.
7183.D2.16	Understand and implement the fundamentals of an Integrated Development Environment (IDE).
7183.D2.17	Successfully identify and debug errors in applications produced by themselves or others.
7183.D2.18	Use puzzles and games to enhance problem-solving skills.
7183.D2.19	Apply critical thinking and problem-solving methodologies.
7183.D2.20	Show the ability to delegate tasks into user defined procedures for the purpose of efficiency.

Information Technology Fundamentals	
Career Cluster	Information Technology
Program of Study	IT Operations, Networking
NLPS Sequence	B
Course Code	7180
Course Description	<i>Information Technology Fundamentals provides the necessary competencies required for an entry-level Information Technology professional. Students will have the knowledge required to assemble components based on customer requirements, install, configure and maintain devices/software for end users, understand the basics of networking and security, properly and safely diagnose, resolve and document common hardware and software issues while applying troubleshooting skills. Students will also learn appropriate customer support, understand the basics of virtualization, desktop imaging, and deployment. This course should also prepare students for the CompTia A+ Certification Exam.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Computing
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Mobile Devices
7180.D1.1	Apply appropriate installation and configuration of laptop hardware, accessories, ports, components and features.
7180.D1.2	Describe characteristics of various types of other mobile devices.
7180.D1.3	Confirm basic mobile device network connectivity, application support, and device synchronization.
Domain	Networking
7180.D2.1	Identify wired and wireless networking protocols, ports, services provided by network hosts and network configuration concepts.
7180.D2.2	Explain common networking hardware devices to include Routers, Switches, Wireless Access Points and Firewalls.
7180.D2.3	Build and configure a basic wired/wireless SOHO network.
7180.D2.4	Assess Internet connection types, network types, basic cable types, common connector types, and their features.
7180.D2.5	Examine the appropriate use of networking tools to include crimpers, cable strippers, multimeter, tone generator and probe, cable tester, loopback plug, punch down tool and Wi-Fi analyzer. Install SOHO multifunctional devices and/or printers and configure appropriate settings.
Domain	Hardware
7180.D3.1	Select the appropriate installation and configuration of various RAM types, storage devices, motherboards, CPUs, and add-on cards.
7180.D3.2	Explain the purposes and uses of various peripheral types and power supplies.
7180.D3.3	Devise a plan to select and configure appropriate components for a custom PC configuration to meet customer specifications or needs.
7180.D3.4	Apply appropriate installation and configuration of SOHO multifunction devices/printers and maintenance of various print technologies.
7180.D3.5	Analyze common mobile device and printer issues; and common wired and wireless network problems.
Domain	Virtualization and Cloud Computing

Next Level Programs of Study

Review Document

7180.D4.1	Investigate cloud computing concepts and the deployment and configuration of client-side virtualization.
Domain	Troubleshooting
7180.D5.1	Assess best practice methodologies to resolve problems related to network problems, motherboards, RAM, CPUs, power, hard drive, RAID arrays, video projector and display issues.
Domain	Operating Systems
7180.D6.1	Compare common operating system types and their purposes including Microsoft Windows, Mac OS and Linux.
7180.D6.2	Demonstrate general installation and configuration of common operating systems including upgrades.
7180.D6.3	Evaluate common operating system features and tools, including scripting techniques.
Domain	Security
7180.D7.1	Explain the importance of physical security measures, logical security concepts, wireless security protocols. and authentication methods.
7180.D7.2	Differentiate social engineering, threats, and vulnerabilities; and the procedures to detect, remove and prevent malware using appropriate tools.
7180.D7.3	Implement security best practices to secure a workstation, mobile devices, SOHO wired and wireless networks; and appropriate data destruction and disposal methods.
Domain	Hardware Issues
7180.D8.1	Examine Microsoft Windows OS problems and resolve PC security issues to include malware identification and removal.
7180.D8.2	Analyze mobile OS and application issues and mobile application security issues.
Domain	Operational Procedures
7180.D9.1	Explain best practices associated with types of documentation, basic change management, basic disaster prevention and recovery.
7180.D9.2	Identify common computing safety procedures, environmental impacts and appropriate controls.
7180.D9.3	Explain the processes for addressing prohibited content/activity, and privacy, licensing, and policy concepts.
7180.D9.4	Apply proper communication techniques and professionalism.
Domain	CompTIA A+ Certification
7180.D10.1	Apply skills necessary to prepare for workforce employment.
7180.D10.2	Examine the objectives of the certification objectives.
7180.D10.3	Plan the approach to certification exam taking skills.
7180.D10.4	Explore the skills required in preparation for the workforce and the certification exam.

Networking and Cybersecurity Operations	
Career Cluster	Information Technology
Program of Study	IT Operations
NLPS Sequence	C

Next Level Programs of Study

Review Document

Course Description	<i>Advanced Information Technology will provide students with the fundamental concepts in networking and cybersecurity. Students are introduced to the principles and concepts of computer networking, covering the architecture, components, and operations of routers and switches in a small network. Students learn how to configure a router and a switch for basic functionality. Students will be able to troubleshoot routers and switches and resolve common issues. The students will also explore the field of Cyber Security/Information Assurance focusing on the technical and managerial aspects of the discipline. Students will be introduced to the basic terminology, concepts, and best practices of computer/network security and the roles and responsibilities of management/security personnel. The students will learn the technologies used and techniques involved in creating a secure computer networking environment including authentication and the types of attacks against an organization.</i>

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Networking
7181.D1.1	Define the ISO OSI and TCP/IP network models, identifying applicable layers and their appropriate devices, protocols, services, and applications.
7181.D1.2	Explain the configuration, characterization, characteristics, and application of network topologies, types, and technologies.
7181.D1.3	Examine cloud computing concepts, purposes, and technologies.
7181.D1.4	Implement network services such as DNS and DHCP.
7181.D1.5	Determine the appropriate selection, cabling and/or wireless connection(s), and basic configuration solution(s) for applicable network implementations.
7181.D1.6	Design IPv4 and IPv6 addressing schemes. Assess appropriate documentation, diagrams, business continuity, and disaster recovery concepts for a given scenario or scenarios.
7181.D1.7	Identify appropriate network operations components such as use policies, best practices, remote access methods, scanning, monitoring, and patching.
7181.D1.8	Assess appropriate devices, authentication and access controls, and detection and mitigation techniques to provide adequate network security under various conditions.
7181.D1.9	Given a scenario, provide appropriate network troubleshooting and setup using industry standard tools for wired and wireless network devices and services.
Domain	Cybersecurity
7181.D2.1	Use virtual machine technology to test security tools in a sandbox environment.
7181.D2.2	Identify security threats to network services, devices, traffic, and data.
7181.D2.3	Use tools to secure network communications.
7181.D2.4	Monitor the security infrastructure with current industry standard utilities.
7181.D2.5	Discuss roles and responsibilities of information security personnel.
7181.D2.6	Use cryptography and public key infrastructures to secure remote access, wireless, and virtual private networks.
7181.D2.7	Implement “defense in depth” to shield against network attacks.
7181.D2.8	Discuss computer forensics and incident response.
7181.D2.9	Discuss basic characteristics of information.
7181.D2.10	Discuss information security as it applies to application guidance, and policies.
7181.D2.11	Describe the legal elements of investigative authorities in criminal prosecution, evidence collection, and evidence preservation.
7181.D2.12	Understand the concepts of trust through assurance, mechanism, and policy.

Next Level Programs of Study

Review Document

7181.D2.13	Understand the practical performance measures employed in designing security measures and programs.
7181.D2.14	Describe and discuss administrative security procedural controls.
7181.D2.15	Discuss the auditing and monitoring of security systems.

IT Operations: Cloud and Server Operations Capstone	
Career Cluster	Information Technology
Program of Study	IT Operations (Informatics)
NLPS Sequence	D
Course Code	7247
Course Description	<i>Cloud and Server Operations Capstone provides students with the general understanding of cloud computing concepts through a detailed overview of core services security architecture, pricing and support. Students will also learn to implement, administer, and troubleshoot Information systems using the Microsoft Windows clients and servers in an enterprise environment. Students will be introduced to managing applications, files, folders, and devices in a Windows active directory environment. Additionally students have the chance to understand and apply Linux and Virtualization concepts.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Computing; Information Technology Fundamentals; Networking and Cybersecurity Operations
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas

Competency #	Competency
Domain	Enterprise Computing
7247.D1.1	Perform and troubleshoot an unattended installation of Windows servers and clients.
7247.D1.2	Deploy service packs and other critical updates.
7247.D1.3	Configure, troubleshoot, and control access to system resources such as files, printers, and web sites.
7247.D1.4	Manage and troubleshoot the use and synchronization of offline files.
7247.D1.5	Monitor and optimize usage of system resources, disk performance, compression, and quotas.
7247.D1.6	Manage, recover, and optimize availability of processes, System State data, and user data.
7247.D1.7	Configure and manage user profiles.
7247.D1.8	Manage applications by using Windows Installer packages.
7247.D1.9	Install, configure, and troubleshoot shared and remote access, virtual private network (VPN), and network protocols.
7247.D1.10	Configure and troubleshoot accessibility services.
7247.D1.11	Configure and troubleshoot the TCP/IP protocol.
7247.D1.12	Encrypt data on a hard disk by using Encrypting File System (EFS).
7247.D1.13	Implement, configure, manage, and troubleshoot policies in a Windows environment, including auditing, local accounts, and security.
Domain	Linux and Virtualization Technologies Fundamentals
7247.D2.1	Use the command line for help, listing directories & files, and archiving files.
7247.D2.2	Write basic shell scripts using Linux commands.
7247.D2.3	Demonstrate knowledge of major operating systems and Linux distributions.
7247.D2.4	Determining the basic requirements for a computer on a Local Area Network (LAN) and
7247.D2.5	configure the network interface card (NIC).
7247.D2.6	Create user accounts and groups and configure user passwords and user and group

Next Level Programs of Study

Review Document

7247.D2.7	permissions.
7247.D2.8	Demonstrate knowledge of devices and how they interact with the system.
7247.D2.9	Configure devices using O.S. tools and commands.
7247.D2.10	Describe how virtualization software works.
7247.D2.11	Identify categories of virtualization software.
7247.D2.12	Select a virtualization software product based its features and system requirements.
7247.D2.13	Work with the administrative virtualization software consoles.
7247.D2.14	Use virtualization software to create and run virtual machines.
7247.D2.15	Install virtualization software.
7247.D2.16	Troubleshoot and repair systems using virtualization software.
Domain	
7247.D3.1	Describe cloud deployment models
7247.D3.2	Describe a cloud-based global infrastructure
7247.D3.3	Identify elements of the Total Cost of Ownership
7247.D3.4	Describe the Shared Responsibility model between the customer and cloud provider
7247.D3.5	Create and configure a virtual private cloud environment
7247.D3.6	Create and configure server instances and storage volumes
7247.D3.7	Discuss methods for implementing security in the cloud
7247.D3.8	Discuss different database solutions and discuss best use cases of each
7247.D3.9	Explain how load balancing and high availability are achieved in the cloud
7247.D3.10	List and explain the principles of a well-architected design

IT Operations: IT Support Capstone	
Career Cluster	Information Technology
Program of Study	IT Operations (Support)
NLPS Sequence	D
Course Code	7245
Course Description	<i>IT Support Capstone students will acquire the skills and knowledge needed to provide tier 1 technical support services. The student will learn troubleshooting and problem solving in working with end users using various digital tools such as helpdesk software, knowledge bases, ticket management systems, and other tier 1 computer related support services. Students will also learn to implement, administer, and troubleshoot Information systems using the Microsoft Windows clients and servers in an enterprise environment. Students will be introduced to managing applications, files, folders, and devices in a Windows active directory environment. Additionally students have the chance to understand and apply Linux and Virtualization concepts.</i>

7245.D2.2	Write basic shell scripts using Linux commands.
7245.D2.3	Demonstrate knowledge of major operating systems and Linux distributions.
7245.D2.4	Determining the basic requirements for a computer on a Local Area Network (LAN) and
7245.D2.5	configure the network interface card (NIC).
7245.D2.6	Create user accounts and groups and configure user passwords and user and group
7245.D2.7	permissions.
7245.D2.8	Demonstrate knowledge of devices and how they interact with the system.
7245.D2.9	Configure devices using O.S. tools and commands.
7245.D2.10	Describe how virtualization software works.
7245.D2.11	Identify categories of virtualization software.
7245.D2.12	Select a virtualization software product based on its features and system requirements.
7245.D2.13	Work with the administrative virtualization software consoles.
7245.D2.14	Use virtualization software to create and run virtual machines.
7245.D2.15	Install virtualization software.
7245.D2.16	Troubleshoot and repair systems using virtualization software.
Domain	
7245.D3.1	Explain the evolution of help desk technical support as a profession in the IT industry.
7245.D3.2	Describe the roles and operations of different levels of IT customer support agents.
7245.D3.3	Define responsibilities and skill sets required to support a customer service help desk.
7245.D3.4	Recognize the most common practices used in help desk operations and how their performance is measured to improve quality support.
7245.D3.5	Identify and explore the tools and technology used in an IT customer help desk environment including appropriate ticketing systems.
7245.D3.6	Exhibit proficiency using the features and functionality of a helpdesk ticketing system.
7245.D3.7	Demonstrate professionalism in working with end users.
7245.D3.8	Develop work habits that promote organization and personal success.
7245.D3.9	Exhibit proper written and oral documentation and communication skills required of a help desk technician including training users in both internal and external environments.
7245.D3.10	Demonstrate proper troubleshooting techniques using problem-solving and critical-thinking skills.

Next Level Programs of Study

Review Document

7245.D3.11	Investigate methods of user needs analysis and assessment to select appropriate customer solutions.
Domain	
7245.D4.1	Define data and evaluate its need for decision-making in a business setting.
7245.D4.2	Identify, define, or describe the types and nature of databases in a business setting.
7245.D4.3	Compare and contrast the general structure and organization of relational, hierarchical, and network database structures.
7245.D4.4	Demonstrate an understanding of the relational data model.
7245.D4.5	Given a scenario, plan, design, create and modify a database schema.
7245.D4.6	Document a database by creating entity-relationship diagrams (ERDs), describing the field names, field types, and relationships among tables.
7245.D4.7	Demonstrate an understanding of normalization techniques in the design of databases utilizing 1NF, 2NF, & 3NF.
7245.D4.8	Define and describe higher normal forms.
7245.D4.9	Discover unstructured data techniques including Key-pair and JSON.
7245.D4.10	Retrieve, insert, update, and manipulate data using SQL commands.
7245.D4.11	Define stored procedures, triggers, views and functions.
7245.D4.12	Identify data integrity and security requirements.
7245.D4.13	Discuss the concepts and use of big data, data warehousing, and data mining.
7245.D4.14	Discuss the use and implementation of distributed database systems.
7245.D4.15	Explore job opportunities in data analytics.

Principles of Computing	
Career Cluster	Information Technology
Program of Study	Computer Science, Cybersecurity, IT Operations, Networking, Software Development
NLPS Sequence	A
Course Code	7183
Course Description	<i>Principles of Computing provides students the opportunity to explore how computers can be used in a wide variety of settings. The course will begin by exploring trends of computing and the necessary skills to implement information systems. Topics include operating systems, database technology, cybersecurity, cloud implementations and other concepts associated with applying the principles of good information management to the organization. Students will also have the opportunity to utilize basic programming skills to develop scripts designed to solve problems. Students will learn about algorithms, logic development and flowcharting.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas Counts as a quantitative reasoning course Fulfills a science requirement for all diploma types
Dual Credit Status	X (PCL/CTE)

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Computing Basics
7183.D1.1	Discuss different aspects of the nature of information from a human and mechanical standpoint.
7183.D1.2	Demonstrate awareness of the history of computing.
7183.D1.3	Demonstrate a working knowledge of computer hardware basics and the ability to use the available productivity software.
7183.D1.4	Demonstrate a knowledge of Software, different categories, and how it is developed.
7183.D1.5	Understand cloud computing, virtualization, and the Internet

Next Level Programs of Study

Review Document

7183.D1.6	Discuss the basic use of data visualization, statistics, and reporting within an organization.
7183.D1.7	Discuss the concepts of logical and physical data storage as they apply locally and, in the cloud, including the use of database structures and storage area network technology.
7183.D1.8	Explain the fundamental concepts of an information system, including the life cycle, components, and flow of information within an organization.
7183.D1.9	Summarize how informatics can support the organization, including general management, operations, human resources, and financial management.
7183.D1.10	Discuss the importance of security within informatics, including its application in various aspects of the computing disciplines.
7183.D1.11	Discuss the importance of ethics, bias, and effective dissemination of technological knowledge.
Domain	Programming Basics
7183.D2.1	Identify the standard documentation tools of displaying algorithms such as pseudocode, flowchart symbols and UML.
7183.D2.2	Apply basic logical structures, file handling, matrices, and arrays to program algorithms.
7183.D2.3	Apply truth tables, Boolean logic, control structures, relational and logical operators to program algorithms
7183.D2.4	Use set theory and logic gate theory to develop program algorithms.
7183.D2.5	Document and express code and algorithms in an easily understandable manner using tools such as data flow diagrams, flowcharts, use case diagrams, activity diagrams, and state tables.
7183.D2.6	Develop a simple program and/or script using a compiled, object-oriented scripting language like Python.
7183.D2.7	Compare key techniques to visually represent data such as graphs, charts and tables.
7183.D2.8	Create applications that interact with users, demonstrating proper formatting of data.
7183.D2.9	Apply base numbering systems techniques to convert numeric data to any base numbering format, including binary, decimal, and hexadecimal.
7183.D2.10	Identify the uses of various programming and scripting languages in computer systems.
7183.D2.11	Compare and Contrast software development methodologies as it pertains to software development and problem solving.
7183.D2.12	Discuss the concepts and justifications for using secure design techniques.
7183.D2.13	Demonstrate secure code by means of data validation.
7183.D2.14	Describe the different methods for encoding data such as BCD, 1's complement, 2's complement, ASCII, and Unicode.
7183.D2.15	Describe the components of a computer architecture.
7183.D2.16	Understand and implement the fundamentals of an Integrated Development Environment (IDE).
7183.D2.17	Successfully identify and debug errors in applications produced by themselves or others.
7183.D2.18	Use puzzles and games to enhance problem-solving skills.
7183.D2.19	Apply critical thinking and problem-solving methodologies.
7183.D2.20	Show the ability to delegate tasks into user defined procedures for the purpose of efficiency.

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Mobile Devices
7180.D1.1	Apply appropriate installation and configuration of laptop hardware, accessories, ports, components and features.
7180.D1.2	Describe characteristics of various types of other mobile devices.
7180.D1.3	Confirm basic mobile device network connectivity, application support, and device synchronization.
Domain	Networking
7180.D2.1	Identify wired and wireless networking protocols, ports, services provided by network hosts and network configuration concepts.
7180.D2.2	Explain common networking hardware devices to include Routers, Switches, Wireless Access Points and Firewalls.
7180.D2.3	Build and configure a basic wired/wireless SOHO network.
7180.D2.4	Assess Internet connection types, network types, basic cable types, common connector types, and their features.
7180.D2.5	Examine the appropriate use of networking tools to include crimpers, cable strippers, multimeter, tone generator and probe, cable tester, loopback plug, punch down tool and Wi-Fi analyzer. Install SOHO multifunctional devices and/or printers and configure appropriate settings.
Domain	Hardware
7180.D3.1	Select the appropriate installation and configuration of various RAM types, storage devices, motherboards, CPUs, and add-on cards.
7180.D3.2	Explain the purposes and uses of various peripheral types and power supplies.
7180.D3.3	Devise a plan to select and configure appropriate components for a custom PC configuration to meet customer specifications or needs.
7180.D3.4	Apply appropriate installation and configuration of SOHO multifunction devices/printers and maintenance of various print technologies.
7180.D3.5	Analyze common mobile device and printer issues; and common wired and wireless network problems.
Domain	Virtualization and Cloud Computing
7180.D4.1	Investigate cloud computing concepts and the deployment and configuration of client-side virtualization.
Domain	Troubleshooting
7180.D5.1	Assess best practice methodologies to resolve problems related to network problems,

Review Document

	motherboards, RAM, CPUs, power, hard drive, RAID arrays, video projector and display issues.
Domain	Operating Systems
7180.D6.1	Compare common operating system types and their purposes including Microsoft Windows, Mac OS and Linux.
7180.D6.2	Demonstrate general installation and configuration of common operating systems including upgrades.
7180.D6.3	Evaluate common operating system features and tools, including scripting techniques.
Domain	Security
7180.D7.1	Explain the importance of physical security measures, logical security concepts, wireless security protocols, and authentication methods.
7180.D7.2	Differentiate social engineering, threats, and vulnerabilities; and the procedures to detect, remove and prevent malware using appropriate tools.
7180.D7.3	Implement security best practices to secure a workstation, mobile devices, SOHO wired and wireless networks; and appropriate data destruction and disposal methods.
Domain	Hardware Issues
7180.D8.1	Examine Microsoft Windows OS problems and resolve PC security issues to include malware identification and removal.
7180.D8.2	Analyze mobile OS and application issues and mobile application security issues.
Domain	Operational Procedures
7180.D9.1	Explain best practices associated with types of documentation, basic change management, basic disaster prevention and recovery.
7180.D9.2	Identify common computing safety procedures, environmental impacts and appropriate controls.
7180.D9.3	Explain the processes for addressing prohibited content/activity, and privacy, licensing, and policy concepts.
7180.D9.4	Apply proper communication techniques and professionalism.
Domain	CompTIA A+ Certification
7180.D10.1	Apply skills necessary to prepare for workforce employment.
7180.D10.2	Examine the objectives of the certification objectives.
7180.D10.3	Plan the approach to certification exam taking skills.
7180.D10.4	Explore the skills required in preparation for the workforce and the certification exam.

Networking and Cybersecurity Operations	
Career Cluster	Information Technology
Program of Study	IT Operations
NLPS Sequence	C
Course Code	7181
Course Description	<i>Advanced Information Technology will provide students with the fundamental concepts in networking and cybersecurity. Students are introduced to the principles and concepts of computer networking, covering the architecture, components, and operations of routers and switches in a small network. Students learn how to configure a router and a switch for basic</i>

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Networking
7181.D1.1	Define the ISO OSI and TCP/IP network models, identifying applicable layers and their appropriate devices, protocols, services, and applications.
7181.D1.2	Explain the configuration, characterization, characteristics, and application of network topologies, types, and technologies.
7181.D1.3	Examine cloud computing concepts, purposes, and technologies.
7181.D1.4	Implement network services such as DNS and DHCP.
7181.D1.5	Determine the appropriate selection, cabling and/or wireless connection(s), and basic configuration solution(s) for applicable network implementations.
7181.D1.6	Design IPv4 and IPv6 addressing schemes. Assess appropriate documentation, diagrams, business continuity, and disaster recovery concepts for a given scenario or scenarios.
7181.D1.7	Identify appropriate network operations components such as use policies, best practices, remote access methods, scanning, monitoring, and patching.
7181.D1.8	Assess appropriate devices, authentication and access controls, and detection and mitigation techniques to provide adequate network security under various conditions.
7181.D1.9	Given a scenario, provide appropriate network troubleshooting and setup using industry standard tools for wired and wireless network devices and services.
Domain	Cybersecurity
7181.D2.1	Use virtual machine technology to test security tools in a sandbox environment.
7181.D2.2	Identify security threats to network services, devices, traffic, and data.
7181.D2.3	Use tools to secure network communications.
7181.D2.4	Monitor the security infrastructure with current industry standard utilities.
7181.D2.5	Discuss roles and responsibilities of information security personnel.
7181.D2.6	Use cryptography and public key infrastructures to secure remote access, wireless, and virtual private networks.
7181.D2.7	Implement “defense in depth” to shield against network attacks.
7181.D2.8	Discuss computer forensics and incident response.
7181.D2.9	Discuss basic characteristics of information.
7181.D2.10	Discuss information security as it applies to application guidance, and policies.
7181.D2.11	Describe the legal elements of investigative authorities in criminal prosecution, evidence collection, and evidence preservation.
7181.D2.12	Understand the concepts of trust through assurance, mechanism, and policy.
7181.D2.13	Understand the practical performance measures employed in designing security measures and programs.
7181.D2.14	Describe and discuss administrative security procedural controls.
7181.D2.15	Discuss the auditing and monitoring of security systems.

IT Operations: Cybersecurity Operations Capstone	
Career Cluster	Information Technology
Program of Study	IT Operations (Cybersecurity)
NLPS Sequence	D
Course Code	7249
Course Description	<i>Cybersecurity Operations Capstone course introduces the core security concepts and skills needed to monitor, detect, analyze and respond to cybercrime, cyberespionage, insider threats, advanced persistent threats, regulatory requirements, and other cybersecurity issues facing organizations. It emphasizes the practical application of the skills needed to maintain and ensure security operational readiness of secure networked systems through an in-depth coverage of network protocols and ethical hacking. Through hands-on instruction students will be prepared to interact with TCP/IP on the vast majority of networks in use today and learn threats and defense mechanisms. The skills developed in the curriculum prepares students for a career in the rapidly growing area of cybersecurity operations.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Computing; Information Technology Fundamentals; Networking and Cybersecurity Operations
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Cybersecurity
7249.D1.1	Use the command line for help, listing directories & files, and archiving files.
7249.D1.2	Write basic shell scripts using Linux commands.
7249.D1.3	Demonstrate knowledge of major operating systems and Linux distributions.
7249.D1.4	Determining the basic requirements for a computer on a Local Area Network (LAN) and configure the network interface card (NIC).
7249.D1.5	Create user accounts and groups and configure user passwords and user and group permissions.
7249.D1.6	Demonstrate knowledge of devices and how they interact with the system.
7249.D1.7	Configure devices using O.S. tools and commands.
7249.D1.8	Describe how virtualization software works.
7249.D1.9	Identify categories of virtualization software.
7249.D1.10	Select a virtualization software product based its features and system requirements.
7249.D1.11	Work with the administrative virtualization software consoles.
7249.D1.12	Use virtualization software to create and run virtual machines.
7249.D1.13	Install virtualization software.
7249.D1.14	Troubleshoot and repair systems using virtualization software.
Domain	Cyber Operations
7249.D2.1	Explain role of Cybersecurity Operations Analyst.
7249.D2.2	Utilize Operating Systems features needed to support cybersecurity analyses.
7249.D2.3	Explain the operation of network infrastructure and classify the various network attacks.
7249.D2.4	Analyze the operation of network protocols and services and use monitoring tools to identify attacks.
7249.D2.5	Use various methods to prevent malicious access to computer hosts and data.
7249.D2.6	Explain the impact of cryptography on network security monitoring.
7249.D2.7	Explain how to investigate and evaluate endpoint vulnerabilities and network security alerts.
7249.D2.8	Use virtual machines to implement, evaluate, and analyze cybersecurity threat events.
7249.D2.9	Analyze network intrusion data to identify compromised hosts and vulnerabilities.

Next Level Programs of Study

Review Document

7249.D2.10	Apply incident response model (CSIRSTs and NIST) to manage security incidents.
7249.D2.11	Understand how a SOC team detects and responds to security incidents, and how they protect their organization's information from modern threats.
7249.D2.12	Understand further how modern organizations are dealing with detecting and responding to cybercrime, cyberespionage, insider threats, advanced persistent threats, regulatory requirements, and other cybersecurity issues facing their organizations and their customers.
Domain	Network Protocol
7249.D3.1	Develop an understanding of basic IP packet structures.
7249.D3.2	Explore and explain the Data Link and Network Layer Protocols examining packet/frame types, hardware addresses, and the Neighbor Discovery Protocol.
7249.D3.3	Analyze routing and routed protocols with considerations for both IPv4 and IPv6 protocols and behaviors.
7249.D3.4	Examine ICMP testing and troubleshooting methods, security issues, and ICMP message types and codes.
7249.D3.5	Explain how neighbor discovery works on IPv6 networks.
7249.D3.6	Describe various auto-addressing schemes and mechanisms used on IPv4 and IPv6 networks.
7249.D3.7	Explain key services used to resolve symbolic, human-readable network names, and addresses into machine-intelligible network addresses.
7249.D3.8	Examine the common and appropriate uses of the TCP and UDP protocols.
7249.D3.9	Describe issues and techniques that apply when IPv4 and IPv6 must coexist on the same networks.
7249.D3.10	Examine tunneling mechanisms and protocols.
7249.D3.11	Understand, plan, deploy, and use IPv6 on modern TCP/IP networks.
7249.D3.12	Appraise general network security basics with a particular emphasis on IP security topics.
7249.D3.13	Review key topics including perimeter security, infrastructure security, and host device security.
Domain	Ethical Hacking
7249.D4.1	Demonstrate use of resources to perform system foot printing and enumeration.
7249.D4.2	Discuss the characteristics of Trojans, Viruses and worms.
7249.D4.3	Use sniffing tools to glean information about a network and demonstrate how social engineering and phishing work.
7249.D4.4	Defend against denial-of-service attacks and vulnerabilities associated with buffer overflows.
7249.D4.5	Hack Web servers and database servers and use password-cracking techniques.
7249.D4.6	Identify and protect against Web application vulnerabilities.
7249.D4.7	Hack Linux, Macintosh, routers, cable modems, firewalls, mobile devices, Bluetooth devices, RFID and USB devices.
7249.D4.8	Determine security policies for Linux, Macintosh, routers, cable modems, firewalls, mobile devices, Bluetooth devices, RFID and USB devices
7249.D4.9	Hack wireless networks and discuss physical security.
7249.D4.10	Evade IDS and Firewalls and detect the existence of honey pots.
7249.D4.11	Apply data security and controls and use basic cryptography for secure communications.

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Computing Basics
7183.D1.1	Discuss different aspects of the nature of information from a human and mechanical standpoint.
7183.D1.2	Demonstrate awareness of the history of computing.
7183.D1.3	Demonstrate a working knowledge of computer hardware basics and the ability to use the available productivity software.
7183.D1.4	Demonstrate a knowledge of Software, different categories, and how it is developed.
7183.D1.5	Understand cloud computing, virtualization, and the Internet
7183.D1.6	Discuss the basic use of data visualization, statistics, and reporting within an organization.

Next Level Programs of Study

Review Document

7183.D1.7	Discuss the concepts of logical and physical data storage as they apply locally and, in the cloud, including the use of database structures and storage area network technology.
7183.D1.8	Explain the fundamental concepts of an information system, including the life cycle, components, and flow of information within an organization.
7183.D1.9	Summarize how informatics can support the organization, including general management, operations, human resources, and financial management.
7183.D1.10	Discuss the importance of security within informatics, including its application in various aspects of the computing disciplines.
7183.D1.11	Discuss the importance of ethics, bias, and effective dissemination of technological knowledge.
Domain	Programming Basics
7183.D2.1	Identify the standard documentation tools of displaying algorithms such as pseudocode, flowchart symbols and UML.
7183.D2.2	Apply basic logical structures, file handling, matrices, and arrays to program algorithms.
7183.D2.3	Apply truth tables, Boolean logic, control structures, relational and logical operators to program algorithms
7183.D2.4	Use set theory and logic gate theory to develop program algorithms.
7183.D2.5	Document and express code and algorithms in an easily understandable manner using tools such as data flow diagrams, flowcharts, use case diagrams, activity diagrams, and state tables.
7183.D2.6	Develop a simple program and/or script using a compiled, object-oriented scripting language like Python.
7183.D2.7	Compare key techniques to visually represent data such as graphs, charts and tables.
7183.D2.8	Create applications that interact with users, demonstrating proper formatting of data.
7183.D2.9	Apply base numbering systems techniques to convert numeric data to any base numbering format, including binary, decimal, and hexadecimal.
7183.D2.10	Identify the uses of various programming and scripting languages in computer systems.
7183.D2.11	Compare and Contrast software development methodologies as it pertains to software development and problem solving.
7183.D2.12	Discuss the concepts and justifications for using secure design techniques.
7183.D2.13	Demonstrate secure code by means of data validation.
7183.D2.14	Describe the different methods for encoding data such as BCD, 1's complement, 2's complement, ASCII, and Unicode.
7183.D2.15	Describe the components of a computer architecture.
7183.D2.16	Understand and implement the fundamentals of an Integrated Development Environment (IDE).
7183.D2.17	Successfully identify and debug errors in applications produced by themselves or others.
7183.D2.18	Use puzzles and games to enhance problem-solving skills.
7183.D2.19	Apply critical thinking and problem-solving methodologies.
7183.D2.20	Show the ability to delegate tasks into user defined procedures for the purpose of efficiency.

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Mobile Devices
7180.D1.1	Apply appropriate installation and configuration of laptop hardware, accessories, ports, components, and features.
7180.D1.2	Describe characteristics of various types of other mobile devices.
7180.D1.3	Confirm basic mobile device network connectivity, application support, and device synchronization.
Domain	Networking
7180.D2.1	Identify wired and wireless networking protocols, ports, services provided by network hosts and network configuration concepts.
7180.D2.2	Explain common networking hardware devices to include Routers, Switches, Wireless Access Points and Firewalls.
7180.D2.3	Build and configure a basic wired/wireless SOHO network.
7180.D2.4	Assess Internet connection types, network types, basic cable types, common connector types, and their features.
7180.D2.5	Examine the appropriate use of networking tools to include crimpers, cable strippers, multimeter, tone generator and probe, cable tester, loopback plug, punch down tool and Wi-Fi analyzer. Install SOHO multifunctional devices and/or printers and configure appropriate settings.
Domain	Hardware
7180.D3.1	Select the appropriate installation and configuration of various RAM types, storage devices, motherboards, CPUs, and add-on cards.
7180.D3.2	Explain the purposes and uses of various peripheral types and power supplies.
7180.D3.3	Devise a plan to select and configure appropriate components for a custom PC configuration to meet customer specifications or needs.
7180.D3.4	Apply appropriate installation and configuration of SOHO multifunction devices/printers and maintenance of various print technologies.
7180.D3.5	Analyze common mobile device and printer issues; and common wired and wireless network problems.
Domain	Virtualization and Cloud Computing
7180.D4.1	Investigate cloud computing concepts and the deployment and configuration of client-side

Next Level Programs of Study

Review Document

	virtualization.
Domain	Troubleshooting
7180.D5.1	Assess best practice methodologies to resolve problems related to network problems, motherboards, RAM, CPUs, power, hard drive, RAID arrays, video projector and display issues.
Domain	Operating Systems
7180.D6.1	Compare common operating system types and their purposes including Microsoft Windows, Mac OS and Linux.
7180.D6.2	Demonstrate general installation and configuration of common operating systems including upgrades.
7180.D6.3	Evaluate common operating system features and tools, including scripting techniques.
Domain	Security
7180.D7.1	Explain the importance of physical security measures, logical security concepts, wireless security protocols. and authentication methods.
7180.D7.2	Differentiate social engineering, threats, and vulnerabilities; and the procedures to detect, remove and prevent malware using appropriate tools.
7180.D7.3	Implement security best practices to secure a workstation, mobile devices, SOHO wired and wireless networks; and appropriate data destruction and disposal methods.
7180.D8.1	Examine Microsoft Windows OS problems and resolve PC security issues to include malware identification and removal.
7180.D8.2	Analyze mobile OS and application issues and mobile application security issues.
Domain	Operational Procedures
7180.D9.1	Explain best practices associated with types of documentation, basic change management, basic disaster prevention and recovery.
7180.D9.2	Identify common computing safety procedures, environmental impacts and appropriate controls.
7180.D9.3	Explain the processes for addressing prohibited content/activity, and privacy, licensing, and policy concepts.
7180.D9.4	Apply proper communication techniques and professionalism.
Domain	CompTIA A+ Certification
7180.D10.1	Apply skills necessary to prepare for workforce employment.
7180.D10.2	Examine the objectives of the certification objectives.
7180.D10.3	Plan the approach to certification exam taking skills.
7180.D10.4	Explore the skills required in preparation for the workforce and the certification exam.

NLPS Sequence	C	
Course Code	7182	
Course Description	<p><i>Networking Fundamentals describes, explores and demonstrates how a network operates in our everyday lives. The course covers the technical pieces and parts of a network and also societal implications such as security and data integrity. Using hands-on lab work, this course offers students the critical information needed for a role as an Information Technology professional who support computer networks. Concepts covered include the TCP/IP model, OS administration, designing a network topology, configuring the TCP/IP protocols, managing network devices and clients, configuring routers and switches, wireless technology and troubleshooting. Provides students the ability to implement, administer, and troubleshoot information systems that incorporate the Microsoft Windows clients and servers in an enterprise environment. Students will be introduced to managing applications, files, folders, and devices in a windows active directory environment.</i></p>

Competency #	Competency
Domain	Networking
7182.D1.1	Configure switches and end devices to provide access to local and remote network resources.
7182.D1.2	Explain how physical and data link layer protocols support the operation of Ethernet in a switched network.
7182.D1.3	Configure routers to enable end-to-end connectivity between remote devices.
7182.D1.4	Create IPv4 and IPv6 addressing schemes and verify network connectivity between devices.
7182.D1.5	Explain how the upper layers of the OSI model support network applications.
7182.D1.6	Configure a small network with security best practices.
7182.D1.7	Troubleshoot connectivity in a small network.
Domain	Enterprise Computing and Security
7182.D2.1	Perform and troubleshoot an unattended installation of Windows servers and clients.
7182.D2.2	Deploy service packs and other critical updates.
7182.D2.3	Configure, troubleshoot, and control access to system resources such as files, printers, and web sites.
7182.D2.4	Manage and troubleshoot the use and synchronization of offline files.
7182.D2.5	Monitor and optimize usage of system resources, disk performance, compression, and quotas.
7182.D2.6	Manage, recover, and optimize availability of processes, System State data, and user data.
7182.D2.7	Configure and manage user profiles.
7182.D2.8	Manage applications by using Windows Installer packages.
7182.D2.9	Install, configure, and troubleshoot shared and remote access, virtual private network (VPN), and network protocols.
7182.D2.10	Configure and troubleshoot accessibility services.
7182.D2.11	Configure and troubleshoot the TCP/IP protocol.
7182.D2.12	Encrypt data on a hard disk by using Encrypting File System (EFS).
7182.D2.13	Implement, configure, manage, and troubleshoot policies in a Windows environment, including auditing, local accounts, and security.

NLPS Sequence	D
Course Code	7251
Course Description	<i>Networking Capstone includes hands-on lab work, and a wide array of assessment types and tools. The course covers the architecture, components, and operations of routers and switches in small networks and introduces wireless local area networks (WLAN) and security concepts. Students learn how to configure and troubleshoot routers and switches for advanced functionality using security best practices and resolve common issues with protocols in both IPv4 and IPv6 networks. The course also emphasizes network security concepts and introduces network virtualization and automation. Students learn how to configure, troubleshoot, and secure enterprise network devices and understand how application programming interfaces (API) and configuration management tools enable network automation.</i>

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Advanced Networking
7251.D1.1	Configure VLANs and Inter-VLAN routing applying security best practices.
7251.D1.2	Troubleshoot inter-VLAN routing on Layer 3 devices.
7251.D1.3	Configure redundancy on a switched network using STP and EtherChannel.
7251.D1.4	Troubleshoot EtherChannel on switched networks.
7251.D1.5	Explain how to support available and reliable networks using dynamic addressing and first-hop redundancy protocols.
7251.D1.6	Configure dynamic address allocation in IPv6 networks.
7251.D1.7	Configure WLANs using a WLC and L2 security best practices.
7251.D1.8	Configure switch security to mitigate LAN attacks.
7251.D1.9	Configure IPv4 and IPv6 static routing on routers.
Domain	Advanced Networking
7251.D2.1	Configure single-area OSPFv2 in both point-to-point and multiaccess networks.
7251.D2.2	Explain how to mitigate threats and enhance network security using access control lists and security best practices.
7251.D2.3	Implement standard IPv4 ACLs to filter traffic and secure administrative access.
7251.D2.4	Configure NAT services on the edge router to provide IPv4 address scalability.
7251.D2.5	Explain techniques to provide address scalability and secure remote access for WANs.
7251.D2.6	Explain how to optimize, monitor, and troubleshoot scalable network architectures.
7251.D2.7	Explain how networking devices implement QoS
7251.D2.8	Implement protocols to manage the network.
7251.D2.9	Explain how technologies such as virtualization, software defined networking, and automation affect evolving networks.
Domain	Operating Systems
7251.D3.1	Use the command line for help, listing directories & files, and archiving files.
7251.D3.2	Write basic shell scripts using Linux commands.

Next Level Programs of Study

Review Document

7251.D3.3	Demonstrate knowledge of major operating systems and Linux distributions.
7251.D3.4	Determining the basic requirements for a computer on a Local Area Network (LAN) and configure the network interface card (NIC).
7251.D3.5	Create user accounts and groups and configure user passwords and user and group permissions.
7251.D3.6	Demonstrate knowledge of devices and how they interact with the system.
7251.D3.7	Configure devices using O.S. tools and commands.
7251.D3.8	Describe how virtualization software works.
7251.D3.9	Identify categories of virtualization software.
7251.D3.10	Select a virtualization software product based on its features and system requirements.
7251.D3.11	Work with the administrative virtualization software consoles.
7251.D3.12	Use virtualization software to create and run virtual machines.
7251.D3.13	Install virtualization software.
7251.D3.14	Troubleshoot and repair systems using virtualization software.

7183.D2.14	Describe the different methods for encoding data such as BCD, 1's complement, 2's complement, ASCII, and Unicode.
7183.D2.15	Describe the components of a computer architecture.
7183.D2.16	Understand and implement the fundamentals of an Integrated Development Environment (IDE).
7183.D2.17	Successfully identify and debug errors in applications produced by themselves or others.
7183.D2.18	Use puzzles and games to enhance problem-solving skills.
7183.D2.19	Apply critical thinking and problem-solving methodologies.
7183.D2.20	Show the ability to delegate tasks into user defined procedures for the purpose of efficiency.

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Intro to Network Operations and Security</i>
7179.D1.1	Define Information Communication Technology (ICT) and describe the concepts behind it.
7179.D1.2	Identify and explain various network topologies.
7179.D1.3	Apply the foundational building blocks of a network infrastructure.
7179.D1.4	Connect basic network infrastructure devices to create a limited functioning local network.
7179.D1.5	Understand and identify organizational digital assets.
7179.D1.6	Describe how to protect digital assets through secure network infrastructure configurations.
7179.D1.7	Design an organizational network infrastructure.
Domain	
7179.D2.1	Know the need for network security and security policies.
7179.D2.2	Explain the various types of network security technology & protocols available & the advantages/differences of each.
7179.D2.3	Demonstrate a knowledge & understanding of different types of security components such as routers, firewalls, & protocols & how they can be
7179.D2.4	implemented onto various network topologies.
7179.D2.5	Differentiate specific security protocols and their implementations.
7179.D2.6	Create a firewall & security policy that follows a strict set of guidelines for a network that the student will create.

Advanced Cybersecurity	
Career Cluster	Information Technology
Program of Study	Cybersecurity
NLPS Sequence	C
Course Code	7178
Course Description	<i>Students will acquire the fundamentals of information and data security and understand the vulnerability most organizations have in their security systems with an emphasis on firewalls, security plans and Virtual Private Networks (VPNs). Discussions will include data security methods, authentication, network attacks, malicious code and viruses, wireless security, e-mail and web security and disaster recovery. This course will also focus on the managerial aspects of information security and assurance. Topics covered include access control models, information security governance, and information security program assessment and metrics. Coverage on the foundational and technical components of information security is included to reinforce key concepts, such as security planning and contingencies, security policies, security</i>

Competency #	Competency
Domain	Basic Cyber Crime and Computer Forensics
7178.D1.1	Identification of the components & steps of computer and cyber investigations.
7178.D1.2	Demonstrate an understanding of legislation, (both Federal and State) and how they relate to cybercrime.
7178.D1.3	Gain an understanding of how to investigate cybercrime from a technical perspective.
7178.D1.4	Develop a comprehensive list of types of cybercrime and threats that exist in today's connected world.

Cybersecurity Capstone	
Career Cluster	Information Technology
Program of Study	Cybersecurity
NLPS Sequence	D
Course Code	7243
Course Description	<i>The Cybersecurity Capstone is designed to increase a student's ability to investigate advanced topics with a primary focus on computer forensics, cyber law, cybercrimes, and cyber forensics. Using Federal, State, and existing case laws, students will gain in-depth experience investigating and gathering evidence to prepare for a presentation in a court of law. This course will emphasize the need for structured investigation techniques and proper protocol for maintaining a chain of evidence. Students will learn to follow proper investigative procedures while using a variety of forensic software tools and techniques.</i>

Competency #	Competency
7243.D1.1	Know & understand the proper techniques of installation, configuration, error diagnosis, troubleshooting, & repairing of various operating systems.
7243.D1.2	Explain the requirements associated with the installations of each operating system.
7243.D1.3	Demonstrate the ability to install, configure, & repair an operating system created during class.
7243.D1.4	Analyze the skills required to be an operating system administrator.
Domain	
7243.D2.1	Identify trends in Information Communication Technology (ICT) for networking protocols.
7243.D2.2	Apply the foundational concepts of how data travels on a network infrastructure.
7243.D2.3	Securely configure access rights, and traffic on a network infrastructure.
7243.D2.4	Protect digital assets through network infrastructure configurations and monitoring.
7243.D2.5	Design and implement an organizational network infrastructure.
Domain	
7243.D3.1	Describe the key components of a security metrics program.
7243.D3.2	List the fundamental elements of key information security management practices.
7243.D3.3	Define various access control approaches, including authentication, authorization, and biometric access controls.
7243.D3.4	Explain popular approaches used in industry to manage risk
Domain	
7243.D4.1	Access and use provided forensic software to complete investigative research.
7243.D4.2	Complete Case Studies that require the use of inference and knowledge of cyber laws at the

Program of Study	Computer Science, Cybersecurity, IT Operations, Networking, Software Development
NLPS Sequence	A
Course Code	7183
Course Description	<i>Principles of Computing provides students the opportunity to explore how computers can be used in a wide variety of settings. The course will begin by exploring trends of computing and the necessary skills to implement information systems. Topics include operating systems, database technology, cybersecurity, cloud implementations and other concepts associated with applying the principles of good information management to the organization. Students will also have the opportunity to utilize basic programming skills to develop scripts designed to solve problems. Students will learn about algorithms, logic development and flowcharting.</i>

Competency #	Competency
Domain	Computing Basics
7183.D1.1	Discuss different aspects of the nature of information from a human and mechanical standpoint.
7183.D1.2	Demonstrate awareness of the history of computing.
7183.D1.3	Demonstrate a working knowledge of computer hardware basics and the ability to use the available productivity software.
7183.D1.4	Demonstrate a knowledge of Software, different categories, and how it is developed.
7183.D1.5	Understand cloud computing, virtualization, and the Internet

Next Level Programs of Study

Review Document

7183.D1.6	Discuss the basic use of data visualization, statistics, and reporting within an organization.
7183.D1.7	Discuss the concepts of logical and physical data storage as they apply locally and, in the cloud, including the use of database structures and storage area network technology.
7183.D1.8	Explain the fundamental concepts of an information system, including the life cycle, components, and flow of information within an organization.
7183.D1.9	Summarize how informatics can support the organization, including general management, operations, human resources, and financial management.
7183.D1.10	Discuss the importance of security within informatics, including its application in various aspects of the computing disciplines.
7183.D1.11	Discuss the importance of ethics, bias, and effective dissemination of technological knowledge.
Domain	Programming Basics
7183.D2.1	Identify the standard documentation tools of displaying algorithms such as pseudocode, flowchart symbols and UML.
7183.D2.2	Apply basic logical structures, file handling, matrices, and arrays to program algorithms.
7183.D2.3	Apply truth tables, Boolean logic, control structures, relational and logical operators to program algorithms
7183.D2.4	Use set theory and logic gate theory to develop program algorithms.
7183.D2.5	Document and express code and algorithms in an easily understandable manner using tools such as data flow diagrams, flowcharts, use case diagrams, activity diagrams, and state tables.
7183.D2.6	Develop a simple program and/or script using a compiled, object-oriented scripting language like Python.
7183.D2.7	Compare key techniques to visually represent data such as graphs, charts, and tables.
7183.D2.8	Create applications that interact with users, demonstrating proper formatting of data.
7183.D2.9	Apply base numbering systems techniques to convert numeric data to any base numbering format, including binary, decimal, and hexadecimal.
7183.D2.10	Identify the uses of various programming and scripting languages in computer systems.
7183.D2.11	Compare and Contrast software development methodologies as it pertains to software development and problem solving.
7183.D2.12	Discuss the concepts and justifications for using secure design techniques.
7183.D2.13	Demonstrate secure code by means of data validation.
7183.D2.14	Describe the different methods for encoding data such as BCD, 1's complement, 2's complement, ASCII, and Unicode.
7183.D2.15	Describe the components of a computer architecture.
7183.D2.16	Understand and implement the fundamentals of an Integrated Development Environment (IDE).
7183.D2.17	Successfully identify and debug errors in applications produced by themselves or others.
7183.D2.18	Use puzzles and games to enhance problem-solving skills.
7183.D2.19	Apply critical thinking and problem-solving methodologies.
7183.D2.20	Show the ability to delegate tasks into user defined procedures for the purpose of efficiency.

Review Document

7184.D1.5	Understand the fundamentals of programming using Object Oriented Programming Concepts.
7184.D1.6	Learn to use a current industry standard IDE.
7184.D1.7	Demonstrate the ability to pseudocode and use design logic for applications requiring end-user input.
7184.D1.8	Understand assignment operators, variables, string, and arithmetic operations.
7184.D1.9	Demonstrate the use of conditionals to logically program applications per provided specifications.
7184.D1.10	Explain abstraction, modularization, functions and parameter passing in programming.
7184.D1.11	Write, perform use-case testing, debug and document programs in an integrated development environment.
7184.D1.12	Develop competence in the techniques of systematic problem analysis, algorithm development, program construction and documentation.
7184.D1.13	Apply the phases and design concepts of software development life cycle (SDLC), including version controls.
7184.D1.14	Gain an understanding of the basic concepts of best practice user-interface design.
7184.D1.15	Understand industry-standard software engineering tools.
7184.D1.16	Understand social, legal and ethical issues in software engineering.
7184.D1.17	Examine basic concepts related to secure programming.
7184.D1.18	Examine the use of software repositories and collaboration tools in software development.

Software Development Capstone	
Career Cluster	Information Technology
Program of Study	Software Development
NLPS Sequence	D
Course Code	7253
Course Description	<i>Software Development Capstone provides a basic understanding of the fundamental concepts involved when using an object oriented programming language. The emphasis is on logical program design using a modular approach involving task-oriented program functions. Object-oriented concepts such as methods, attributes, inheritance, exception handling, and polymorphism are utilized. Applications are developed using these concepts and include developing a graphical user interface, selecting forms and controls, assigning properties and writing code. Students will also build upon their web design experiences in previous courses by taking an in-depth look into client- and server-side scripting aspects including Java Script and PHP: hypertext preprocessor along with other scripting tools.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Computing; Website and Database Development; Software Development
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas
Dual Credit Status	X (PCL/CTE)

Promoted Certifications		
CONTENT STANDARDS AND COMPETENCIES		
Competency #	Competency	
Domain	<i>Software Development Using Java</i>	
7253.D1.1	Identify key concepts of object-oriented programming.	

7253.D1.2	Program in Java-based classes, objects, and inheritance.
7253.D1.3	Create applets for Web applications.
7253.D1.4	Create applications for working with Web databases.
7253.D1.5	Understand the design and implementation of classes using inheritance and polymorphism.
7253.D1.6	Understand the use and implementation of interfaces.
7253.D1.7	Understand how to handle user and coding errors using expressions.
7253.D1.8	Understand and work with the implementation of Linked List data structures.
7253.D1.9	Be familiar with the Stack and Queue data structures.
7253.D1.10	Be exposed to the Java Collections interface.
Domain	Software Development using Visual Basic in the .Net Framework
7253.D2.1	Apply the Visual Studio Integrated development environment (IDE) functionality to create console, desktop, and web based (ASPX) software applications.
7253.D2.2	Explain the philosophy, structure, and foundations of the .NET framework.
7253.D2.3	Describe and create applications using factoring and object-oriented programming (OOP) concepts.
7253.D2.4	Implement projects that interact with Windows functionality.
7253.D2.5	Apply programming structures, data types, naming, and best practice concepts.
7253.D2.6	Apply methods and techniques to find (debug), prevent errors, and trap exceptions in projects.
7253.D2.7	Implement Visual Basic projects using various control objects in desktop and web-based projects.
7253.D2.8	Implement collection objects including arrays in projects.
7253.D2.9	Apply programming objects that interact with files, file systems, and the network.
7253.D2.10	Create projects that interact with databases objects including the LINQ class.
7253.D2.11	Implement projects using graphics and multimedia.
Domain	Software Development Using Python
7253.D3.1	Create programs using the basic structure of the Python language including variables, constants and character strings, arithmetic operators, expressions and control statements.
7253.D3.2	Create programs using Python-based classes, objects, and inheritance
7253.D3.3	Use functions in programs
7253.D3.4	Use lists, tuples, dictionaries and sets in programs.
7253.D3.5	Use searching, sorting, and complexity analysis in programs.
7253.D3.6	Evaluate the importance of using tools for design, documentation, and testing.
7253.D3.7	Demonstrate how to utilize collections, arrays, and linked structures such as stacks, queues, and lists.
7253.D3.8	Create applications using recursive functions.
7253.D3.9	Evaluate, test and debug Python programs.
7253.D3.10	Create applications using GUI Programming.
7253.D3.11	Discuss Linked lists, stacks, queues, binary search trees.
Domain	Software Development Using C++
7253.D4.1	Design programs utilizing class and data abstraction.
7253.D4.2	Understand and use the basic programming constructs of C++.
7253.D4.3	Describe the various classifications of I/O streams.
7253.D4.4	Manipulate various C++ datatypes, such as arrays, strings, and pointers.
7253.D4.5	Describe and utilize C++ searching and sorting techniques.
7253.D4.6	Isolate and fix common errors in C++ programs.

Next Level Programs of Study

Review Document

7253.D4.7	Demonstrate an understanding and proper use of exception handling and recursive functions.
7253.D4.8	Use memory appropriately, including proper allocation/deallocation procedures.
7253.D4.9	Apply object-oriented approaches to software problems in C++.
7253.D4.10	Demonstrate an understanding of linked lists, stacks, and queues.
7253.D4.11	Design programs showing an understanding of inheritance and composition.
7253.D4.12	Design, code, edit, compile, test, and debug advanced level C++ language programs or Software Design Using C#.
7253.D4.13	Construct proper C# programming statements correctly using variables, constants, character strings, arithmetic operators, expressions, and statements.
7253.D4.14	Use control structures and methods in programs.
7253.D4.15	Design and implement user defined methods for satisfying stated programming objectives.
7253.D4.16	Apply the use of variable pointers and array processing.
7253.D4.17	Create and access data files using sequential and random-access operation techniques.
7253.D4.18	Demonstrate how to create and utilize user defined data structures.
7253.D4.19	Demonstrate and use multi-dimensional arrays, array lists, queues, stacks, and other collection classes.
7253.D4.20	Design programs utilizing class and object definitions.
7253.D4.21	Utilize various I/O functions for performing random access file operations.
7253.D4.22	Setup and use the concepts of inheritance and polymorphism in an object-oriented program.
7253.D4.23	Demonstrate the use of exception handling.
7253.D4.24	Design, code, edit, compile, test, and debug C# language programs.
Domain	Advanced Web Page Design
7253.D5.1	Demonstrate the ability to develop advanced Cascading Style Sheets
7253.D5.2	Understand how to insert multimedia components into a Web page
7253.D5.3	Create dynamic Web pages and add functionality using JavaScript and the Document Object Model
7253.D5.4	Demonstrate the ability to validate Web forms
7253.D5.5	Understand the purpose and use of XML documents
Domain	Client-Side Scripting Languages
7253.D6.1	Understand the differences in the capabilities of a client-side scripting language and a server-side scripting language.
7253.D6.2	Understand the importance of Mobile First, responsive Web design (RWD), and progressive enhancement (PE) using the latest HTML standards and semantic elements.
7253.D6.3	Use the Document Object Model (DOM) to map and manipulate an HTML document.
7253.D6.4	Understand and explain the synchronous behavior of HTTP requests.
7253.D6.5	Understand and explain the use of Asynchronous JavaScript and XML (AJAX) as it is used to update part of a Web page without requiring a new HTTP request (page refresh).
7253.D6.6	Understand and demonstrate the different uses for GET and POST requests and queries.

Principles of Computing	
Career Cluster	Information Technology
Program of Study	Computer Science, Cybersecurity, IT Operations, Networking, Software Development
NLPS Sequence	A
Course Code	7183
Course Description	<i>Principles of Computing provides students the opportunity to explore how computers can be used in a wide variety of settings. The course will begin by exploring trends of computing and the necessary skills to implement information systems. Topics include operating systems, database technology, cybersecurity, cloud implementations and other concepts associated with applying the principles of good information management to the organization. Students will also have the opportunity to utilize basic programming skills to develop scripts designed to solve problems. Students will learn about algorithms, logic development and flowcharting.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas Counts as a quantitative reasoning course Fulfills a science requirement for all diploma types
Dual Credit Status	X (PCL/CTE)

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Computing Basics
7183.D1.1	Discuss different aspects of the nature of information from a human and mechanical standpoint.
7183.D1.2	Demonstrate awareness of the history of computing.
7183.D1.3	Demonstrate a working knowledge of computer hardware basics and the ability to use the available productivity software.
7183.D1.4	Demonstrate a knowledge of Software, different categories, and how it is developed.
7183.D1.5	Understand cloud computing, virtualization, and the Internet
7183.D1.6	Discuss the basic use of data visualization, statistics, and reporting within an organization.

Next Level Programs of Study

Review Document

7183.D1.7	Discuss the concepts of logical and physical data storage as they apply locally and, in the cloud, including the use of database structures and storage area network technology.
7183.D1.8	Explain the fundamental concepts of an information system, including the life cycle, components, and flow of information within an organization.
7183.D1.9	Summarize how informatics can support the organization, including general management, operations, human resources, and financial management.
7183.D1.10	Discuss the importance of security within informatics, including its application in various aspects of the computing disciplines.
7183.D1.11	Discuss the importance of ethics, bias, and effective dissemination of technological knowledge.
Domain	Programming Basics
7183.D2.1	Identify the standard documentation tools of displaying algorithms such as pseudocode, flowchart symbols and UML.
7183.D2.2	Apply basic logical structures, file handling, matrices, and arrays to program algorithms.
7183.D2.3	Apply truth tables, Boolean logic, control structures, relational and logical operators to program algorithms
7183.D2.4	Use set theory and logic gate theory to develop program algorithms.
7183.D2.5	Document and express code and algorithms in an easily understandable manner using tools such as data flow diagrams, flowcharts, use case diagrams, activity diagrams, and state tables.
7183.D2.6	Develop a simple program and/or script using a compiled, object-oriented scripting language like Python.
7183.D2.7	Compare key techniques to visually represent data such as graphs, charts and tables.
7183.D2.8	Create applications that interact with users, demonstrating proper formatting of data.
7183.D2.9	Apply base numbering systems techniques to convert numeric data to any base numbering format, including binary, decimal, and hexadecimal.
7183.D2.10	Identify the uses of various programming and scripting languages in computer systems.
7183.D2.11	Compare and Contrast software development methodologies as it pertains to software development and problem solving.
7183.D2.12	Discuss the concepts and justifications for using secure design techniques.
7183.D2.13	Demonstrate secure code by means of data validation.
7183.D2.14	Describe the different methods for encoding data such as BCD, 1's complement, 2's complement, ASCII, and Unicode.
7183.D2.15	Describe the components of a computer architecture.
7183.D2.16	Understand and implement the fundamentals of an Integrated Development Environment (IDE).
7183.D2.17	Successfully identify and debug errors in applications produced by themselves or others.
7183.D2.18	Use puzzles and games to enhance problem-solving skills.
7183.D2.19	Apply critical thinking and problem-solving methodologies.
7183.D2.20	Show the ability to delegate tasks into user defined procedures for the purpose of efficiency.

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Data Science
7351.D1.1	Define and discuss different examples of level-appropriate quantitative and qualitative data.
7351.D1.2	Evaluate the tradeoffs in how data elements are organized and where data is stored.
7351.D1.3	Analyze and interpret data by identifying patterns and consider limitations of data analysis (e.g., measurement error, sample selection).
7351.D1.4	Design and implement a plan using data collection tools and techniques to collect appropriate data to answer a relevant research question.
7351.D1.5	Create interactive data visualizations using software tools to help others better understand real-world phenomena.
Domain	Artificial Intelligence
7351.D2.1	Compare and contrast concepts and uses of machine learning, deep learning, general artificial intelligence, and narrow artificial intelligence.
7351.D2.2	Investigate imbalances in training data in terms of gender, age, ethnicity, or other demographic variables that could result in a biased model, by using a data visualization tool.
7351.D2.3	Research and describe the risks and risk mitigation strategies associated with the implementation of artificial intelligence and machine learning in the real world (e.g., biased decision making, lethal autonomous weapons, social media echo chambers, surveillance).
7351.D2.4	Evaluate a dataset used to train a real AI system by considering the size of the dataset, the way that the data were acquired and labeled, the storage required, and the estimated time to produce the dataset.
7351.D2.5	Select the appropriate type of machine learning algorithm (supervised, unsupervised, or reinforcement learning) to solve a reasoning problem.
7351.D2.6	Use a learning algorithm to train a model on data collected to answer a relevant research question, then evaluate the results.
Domain	App/Game Development
7351.D3.1	Analyze game elements of analog games (e.g., board, card, dice) and how those elements can be represented as algorithms for digital games.
7351.D3.2	Research and discuss best practices of user experience design for building video games and

	apps.
7351.D3.3	Document design decisions using text, graphics, presentations, and/or demonstrations in the development of games and applications.
7351.D3.4	Using the software application life cycle and prototype development model, develop a new application or game working in team roles using collaborative tools.
7351.D3.5	Develop and use a series of test cases to verify that a program performs according to its design specifications.
Domain	Security (Cybersecurity)
7351.D4.1	Examine the positive and negative impacts of a person/organization's digital footprint.
7351.D4.2	Analyze the motives of threat actors.
7351.D4.3	Discuss the role that cyber ethics plays in current society.
7351.D4.4	Research and describe common attacks on hardware, software, and networks and identify methods of mitigating risk associated with each.
7351.D4.5	Evaluate authentication and authorization methods and the risks associated with failure.
7351.D4.6	Analyze the vulnerabilities of Internet of Things devices.
7351.D4.7	Utilizing cybersecurity best practices and the software development life cycle, make appropriate updates to a game or application design to protect it from vulnerabilities.

Computer Science	
Career Cluster	STEM
Program of Study	Computer Science
NLPS Sequence	C
Course Code	7352
Course Description	<i>Computer Science introduces the fundamental concepts of procedural programming. Topics include data types, control structures, functions, arrays, files, and the mechanics of running, testing, and debugging. The course also offers an introduction to the historical and social context of computing and an overview of computer science as a discipline.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Computing

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Advanced Programming
7352.D1.1	Discuss software development methodology that include fundamental design concepts and principles, Structured and Iterative design, UML (Unified Modeling Language).
7352.D1.2	Demonstrate fundamental programming constructs such as understanding of language syntax,

	semantics and style standards including documentation and commenting, using IDEs to create, execute, test, and debug programs utilizing standard software development design and methodologies.
7352.D1.3	Analyze and explain the behavior of simple programs utilizing variables, expressions, assignments, I/O, control structures, functions, parameter passing, preconditions, postconditions, and invariants.
7352.D1.4	Utilize fundamental data types including Primitive types (Integers, Real Numbers, Booleans, and Characters), Pointers, Arrays, Records/Structures, Strings, Enumerations
7352.D1.5	Use the techniques of decomposition to modularize a program.
7352.D1.6	Apply a variety of strategies to the testing and debugging of simple programs including: <ul style="list-style-type: none"> ● Conduct code reviews (focused on common coding errors and the extent to which the code meets documentation and programming style standards) on program components. ● Differentiate between program validation and verification. ● Ensure programs use defensive programming techniques, including input validation, type checking, and protection against buffer overflow. ● Implement refactoring within given program components.
Domain	Computer Design and Function
7352.D2.1	Explain the role of algorithms in problem-solving including: <ul style="list-style-type: none"> ● Analyze and compare the best, average, and worst-case behaviors and performance of an algorithm for given problems with various input sizes ● Implement a basic numerical algorithm and apply to a given problem. ● Discuss the halting problem and why it has no algorithmic solution. ● Investigate factors other than computational efficiency that influence the choice of algorithms.
7352.D2.2	Analyze machine level representation of data including: <ul style="list-style-type: none"> ● Bits, bytes, and words ● Numeric data representation (Binary, Hexadecimal, BCD, 1's Complement, 2's Complement, and Floating-Point format) ● Non-numeric data (Characters, Images, Sounds, Video) ● Illustrate color models and their use in computer graphics. ● Conversion of numerical data from one format to another ● Effect of fixed-length number representations on accuracy and precision
7352.D2.3	Describe, compare, and contrast the components of Computer Architecture which include all portions of the Von Neumann machine as well as assembly/machine language. Explore the impact of memory latency on execution time (Von Neumann Bottleneck).
7352.D2.4	Examine major objectives, functions, features, and concepts of modern operating systems. <ul style="list-style-type: none"> ● Discuss the role, purpose of operating systems ● Compare prevailing types of operating systems. ● Discuss potential threats to operating systems and appropriate features used to provide protection and security. ● Diagram the interaction of an Application Programming Interface (API) with an operating system. ● Illustrate how applications use computing resources managed by the operating system and explain the need for concurrency and common methods to implement concurrency.

Next Level Programs of Study

Review Document

	<ul style="list-style-type: none"> ● Illustrate the principles of memory management including virtual memory, paging, thrashing, and partitioning. ● Diagram the physical hardware devices and the virtual devices maintained by an operating system.
7352.D2.5	<p>Investigate principles of secure design.</p> <ul style="list-style-type: none"> ● Analyze the tradeoffs associated with designing security into a product. ● Implement input validation in applications ● Discuss the security implications of relying on open design vs the secrecy of design. ● Explain the tradeoffs of developing a program in a type-safe language. ● Investigate potential errors detected from both strong-type and weak-type languages. ● Investigate potential vulnerabilities in provided programming code. ● Investigate common coding errors that introduce security vulnerabilities, such as buffer overflows, integer errors, and memory leaks.
7352.D2.6	Assess human-computer interaction and design issues that analyze the importance of human-centered software and then implement a simple usability test for an existing software application.

Computer Science Capstone	
Career Cluster	STEM
Program of Study	Computer Science
NLPS Sequence	D
Course Code	7353
Course Description	<i>Computer Science Capstone provides a working understanding of the fundamentals of procedural and object-oriented program development using structured, modular concepts and modern object-oriented programming languages. Reviews control structures, functions, data types, variables, arrays, and data file access methods. The course is a second level computer science course introducing object oriented computer programming, using a language such as Java or C++. Object-oriented concepts studied include classes, objects, inheritance, polymorphism, operator overloading, exception handling, recursion, abstract data types, streams and file I/O. Students will explore programming concepts such as software reuse, data abstraction and event-driven programming.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Computing; Topics in Computer Science; Computer Science
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Procedural Concepts
7353.D1.1	<p>Demonstrate the basic procedural concepts of computer programming through development of programs that utilize:</p> <ul style="list-style-type: none"> ● Arithmetic operators expressions and statements

	<ul style="list-style-type: none"> ● Reference data types ● Input/output ● Primitive and abstract data types ● Selection and repetition statements ● Investigate potential vulnerabilities in provided programming code. ● User defined methods and functions ● Collections including arrays, lists, vectors, stacks, and queues ● Streams to create and access data files ● Common/standard language libraries
Domain	Object-oriented Concepts
7353.D2.1	Demonstrate the basic object-oriented concepts of computer programming
7353.D2.2	Compare and contrast functional and object-oriented programming paradigms
7353.D2.3	Implement OOP constructs, including encapsulation, abstraction, inheritance, and polymorphism
7353.D2.4	Utilize immutable and mutable variables in class objects
7353.D2.5	Use access and visibility modifiers to secure class data and methods
7353.D2.6	Diagram control flow in a program using dynamic dispatch
7353.D2.7	Design and implement a simple class hierarchy using super classes, subclasses, and abstract classes
7353.D2.8	Overload functions and operators
7353.D2.9	Design and implement generic classes with templates
7353.D2.10	Identify the data components and behaviors of multiple abstract data types
7353.D2.11	Apply a variety of strategies to the testing and debugging of programs
Domain	Graphical User Interfaces/ Event Driven Programs
7353.D3.1	Develop Graphical User Interfaces/Event Driven Programs
7353.D3.2	Explain basic principles of computer graphics including 2D and 3D objects, transformations, clipping, windowing, rendering, lighting, and ray tracing
7353.D3.3	Illustrate color models and their use in computer graphics
7353.D3.4	Write a simple application that uses a modern graphical user interface
7353.D3.5	Create an interactive program using an event-driven style
7353.D3.6	Discuss the usage of information hiding through steganography in images, messages, videos, or other media files
Domain	Software Engineering, Maintenance, and Reuse
7353.D4.1	Discuss software engineering, software maintenance and software reuse
7353.D4.2	Illustrate the concepts of modeling and abstraction with respect to problem solving
7353.D4.3	Diagram the phases of the secure software development lifecycle (SecSDLC)
7353.D4.4	Describe the concept of finite state machines
7353.D4.5	Describe security as a continuous process of tradeoffs, balancing between protection mechanisms and availability

Next Level Programs of Study

Review Document

7353.D4.6	Illustrate the security implications of relying on open design vs the secrecy of design
7353.D4.7	Apply consistent documentation and program style standards
Domain	Networking and Data Communication
7353.D5.1	Demonstrate basic concepts of networking and data communications
7353.D5.2	Diagram the basic structure of the Internet
7353.D5.3	Diagram the layers of the OSI model, including associated protocols (TCP/UDP, Socket APIs, and Application Layer Protocols)
7353.D5.4	Categorize the principles used for naming schemes and resource location. NC
7353.D5.5	Implement a simple distributed network application
7353.D5.6	Describe security concerns in designing applications for use over wired and wireless networks
Domain	Secure Programming and Design
7353.D6.1	Demonstrate the principles of secure programming and design
7353.D6.2	Investigate potential vulnerabilities in provided programming code
7353.D6.3	Create programs which use defensive programming techniques, including input validation, type checking, exception handling and protection against buffer overflow
7353.D6.4	Analyze the interaction between a security mechanism and its usability
7353.D6.5	Investigate potential vulnerabilities in provided programming code
7353.D6.6	Investigate common coding errors that introduce security vulnerabilities, including buffer overflows, integer errors, and memory leaks
7353.D6.7	Discuss potential errors and security implications from both strong-type and weak-type languages
7353.D6.8	Evaluate the risks in using third-party applications, software tools, and libraries
7353.D6.9	Carry out a code review on a program component using a provided security checklist
7353.D6.10	Describe potential security vulnerabilities in event-driven GUI applications

Advanced Career & Technical Education, College Credit: Public Safety

Career Cluster	Law and Public Safety
Program of Study	
NLPS Sequence	
Course Code	6136
Course Description	<i>Advanced Career and Technical Education, College Credit is a course title covering any CTE advanced course offered for credit by an accredited postsecondary institution through an adjunct agreement with a secondary school. The intent of this course is to allow students to earn college credit for courses with content that goes beyond that currently approved for high school credit. This course may be used for any dual enrollment course, including a joint program of study involving a postsecondary partnership.</i>

Next Level Programs of Study

Review Document

Prerequisite(s)/ Corequisite(s)	None Recommended: CTE courses that would help prepare the student for success in this area
Credits	1 semester course, up to 3 credits per semester, may be offered for successive semesters up to 12 credits
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	A student should earn at least 3 postsecondary credits for each high school credit. Schools must have an approved Nonstandard Course Waiver on file to be eligible for CTE funding.

Public Safety: Special Topics	
Career Cluster	Law and Public Safety
Program of Study	
NLPS Sequence	
Course Code	6154
Course Description	<i>Public Safety: Special Topics is an extended learning experience designed to address the advancement and specialization of careers within the career cluster through the provision of a specialized course for a specific workforce need in the school's region. The learning experience is at a qualified site, and is designed to give the student the opportunity to learn and practice technical skills while working under the direction of an appropriately licensed professional. Throughout the course, students will focus on learning about employment opportunities and obtaining the knowledge, skills, and attitudes essential for success in specific occupations. Course standards and curriculum must be tailored to the specific profession, preparing students to advance in this career field, and where applicable, provide students with opportunities for certification or dual credit. Participation in a related CTSO encourages the development of leadership, communication and career related skills, and opportunities for community service.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 semester course, up to 3 credits per semester, may be offered for successive semesters up to 12 credits

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Career Preparation
7190.D1.1	Evaluate employment and career pathway opportunities related to established career interest(s) in the field of public safety.
7190.D1.2	Research the personal qualifications, interested, aptitudes, knowledge, and skills necessary to succeed in public safety careers.
7190.D1.3	Evaluate resources that keep workers current in the career field.
7190.D1.4	Describe the emerging healthcare jobs and industry needs.
7190.D1.5	Demonstrate skills and attitudes needed for lifelong learning.
7190.D1.6	Research local job postings to identify the types of businesses that advertise public safety positions.
7190.D1.7	Describe the entry level roles and responsibilities of jobs in public safety.
Domain	Public Safety Responsibilities
7190.D2.1	Investigate the interaction and interdependency of Police, Fire, Emergency Medical Services, and 911 Communication Systems.
7190.D2.2	Identify a variety of organizational structures in the law enforcement and corrections field (corrections, probation, courts, patrol, fish and wildlife, narcotics).
7190.D2.3	Identify a variety of organizational structures in fire services (fire fighter, fire medic).
7190.D2.4	Identify emergency medical services (EMT to paramedic careers, equipment, requirements).
Domain	Public Safety Requirements
7190.D3.1	Understand the common objectives and mission of public safety - solve problems, save lives, and protect property.
7190.D3.2	Demonstrate procedures to respond to emergency incidents on any scale, small to catastrophic through role play/case study scenarios.

Next Level Programs of Study

Review Document

7190.D3.3	Understand the appropriate level of nutrition, fitness, and agility required by public safety career fields by charting different agility assessments and techniques for preparing for exams.
7190.D3.4	Understand the skills and equipment needed to deal with the most protective service/public safety situations from local emergencies to area-wide incidents.
7190.D3.5	Demonstrate the skills and equipment needed to deal effectively with emergency situations my role playing a variety of emergency scenarios.

Principles of Fire and Rescue	
Career Cluster	Law, Public Safety, Corrections and Security
Program of Study	Fire and Rescue
NLPS Sequence	A
Course Code	7195
Course Description	<i>Principles of Fire and Rescue introduces students to the various roles that firefighters and emergency services workers play to protect the public from the loss of life and property. They are frequently the first emergency personnel at the scene of a traffic accident or medical emergency and may be called upon to put out a fire, treat injuries or perform other vital functions. This course will introduce students to the history, terminology, and basic firefighting skills needed for a beginning firefighter. Additionally, students will develop a career plan for a career in public safety including areas of Fire Science, Homeland Security, and Emergency Medical Services.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum

Fire Fighting Fundamentals	
Career Cluster	Law, Public Safety, Corrections and Security
Program of Study	Fire and Rescue
NLPS Sequence	B
Course Code	7189
Course Description	<i>Fire Fighting Fundamentals is for those students who are seeking certification as a firefighter. This course will prepare students for the Hazardous Materials Awareness and Operations certifications and will introduce students to NFPA 1001 which serves as the standard of measurement for all fire fighters in North America. Students will learn the knowledge and hands-on practical skills for managing and controlling a hazardous materials incident required for the certifications. Furthermore, students will study how a fire behaves and will learn the basic firefighting skills needed to extinguish a fire while protecting themselves and other firefighters.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Fire and Rescue
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Hazardous Materials
7189.D1.1	Identify hazardous materials regulations and definitions.
7189.D1.2	Identify hazardous materials properties and hazards.
7189.D1.3	Become familiar with the incident solving process.
7189.D1.4	Identify the seven clues that may be available to identify the presence of a hazardous material.
7189.D1.5	Become familiar with the incident management elements including incident priorities, management structure, and the problem-solving process.
7189.D1.6	Identify the various types of personal protective equipment (PPE) including respiratory protection and personal protective equipment for biological, chemical, radiological, nuclear, and explosive incidents. Become familiar with PPE in ensembles, classifications, and selection.
7189.D1.7	Identify contamination and decontamination methods and types.
7189.D1.8	Identify incident-specific strategies and tactics for the nine DOT hazard classes.
7189.D1.9	Define terrorism and identify the different types of terrorist attacks. Identify special operational considerations at terrorist or criminal incidents.
7189.D1.10	Have a working knowledge of various materials and equipment used in the mitigation of hazardous materials incidents.
7189.D1.11	Gain practical experience and pass the evaluation process associated with the hands-on use of the equipment and materials used in mitigation process.
Domain	Fire Fighting I
7189.D2.1	Relate the history of fire service through examination.
7189.D2.2	Discuss personal safety as related to all areas of NFPA 1500.
7189.D2.3	Demonstrate the use of all personal protective equipment.
7189.D2.4	Demonstrate the use of portable fire extinguishers.
7189.D2.5	Define fire behavior and how it relates to safety and extinguishment.
7189.D2.6	Demonstrate the proper use of portable ground ladders.
7189.D2.7	List ventilation types and demonstrate the proper use of ventilation equipment.
7189.D2.8	Demonstrate the proper care and use of nozzles and fittings.
7189.D2.9	Demonstrate tying of 6 special fire service knots.
7189.D2.10	Describe/demonstrate forcible entry techniques.
7189.D2.11	List and demonstrate salvage and overhaul techniques.
7189.D2.12	Describe and demonstrate the proper use of SCBA.
7189.D2.13	Discuss and describe building construction concepts as it relates to the fire service.
7189.D2.14	Demonstrate basic rescue and extrication techniques.
7189.D2.15	List the principles of a water supply system.
7189.D2.16	Demonstrate the proper care and use of selected fire hoses.

Next Level Programs of Study

Review Document

7189.D2.17	Demonstrate how to develop and use fire streams.
7189.D2.18	Demonstrate the ability to understand NIMS.
7189.D2.19	Describe communications with the public and within the fire service.

Advanced Fire Fighting	
Career Cluster	Law, Public Safety, Corrections and Security
Program of Study	Fire and Rescue
NLPS Sequence	C
Course Code	7186
Course Description	<i>Advanced Fire Fighting expands upon the principles and techniques of firefighting learned in Fire Fighting Fundamentals. Students will study fire protection systems, firefighter safety, and survival. Students will also learn what fire is, the chemical hazards of combustion, and related by-products of fire. Additionally, students will gain a better understanding of fire department organization, administration, operations, and basic strategies and tactics.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Fire and Rescue; Fire Fighting Fundamentals
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)

Domain	<i>Fire Fighting II</i>
7186.D1.1	Application of automatic sprinkler systems.
7186.D1.2	Discuss and demonstrate personal safety as related to all areas of NFPA 1500.
7186.D1.3	Demonstrate the use of all personal protective equipment in a timed manner.
7186.D1.4	Explain fire behavior and the chemical reaction of pyrolysis.
7186.D1.5	Describe/demonstrate forcible entry techniques.
7186.D1.6	Demonstrate the proper use of SCBA in a timed manner.
7186.D1.7	Crawl through maze under simulated fire conditions.
7186.D1.8	Discuss and describe building construction concepts as they relate to the fire service.
7186.D1.9	Demonstrate basic rescue and extrication techniques.
7186.D1.10	List the principles of water supply hydraulics.
7186.D1.11	Demonstrate the proper care and use of selected fire hoses.
7186.D1.12	Demonstrate how to develop and use fire streams.
7186.D1.13	Demonstrate the ability to understand NIMS.
7186.D1.14	Communications with the public and within the fire service.
7186.D1.15	Mount a ladder and ventilate a roof with selected tools.
7186.D1.16	Recognize and select tools related to the fire service.
Domain	<i>Basic First Aid / CPR</i>
7186.D2.1	Discuss the importance of body substance isolation.
7186.D2.2	Describe the components of personal protective equipment.
7186.D2.3	Discuss diseases of concern.
7186.D2.4	Describe laws that relate to infection control.
7186.D2.5	Explain the importance of immunizations.
7186.D2.6	Assess the causes, types, symptoms, and ways of dealing with stress.
7186.D2.7	Describe scene safety considerations at hazardous materials incidents and rescue operations.
7186.D2.8	Describe actions required when responding to scenes involving violent or dangerous situations.
7186.D2.9	Discuss the circulatory system.
7186.D2.10	List the links in the chain of survival.
7186.D2.11	Explain actions to be taken before resuscitation.
7186.D2.12	Discuss rescue breathing.
7186.D2.13	Describe the steps of cardiopulmonary resuscitation.
7186.D2.14	Describe CPR techniques for individuals ranging from infant to adult.

Next Level Programs of Study

Review Document

7186.D2.15	Discuss indications of effective CPR and when CPR may be interrupted.
7186.D2.16	Summarize when not to begin or to terminate.
7186.D2.17	Summarize actions taken when clearing an airway obstruction.
7186.D2.18	Describe the main components of the circulatory system.
7186.D2.19	Differentiate between arterial, venous, and capillary bleeding.
7186.D2.20	Describe the steps for controlling external bleeding.
7186.D2.21	Discuss internal bleeding.
7186.D2.22	Describe types and signs of shock.
7186.D2.23	Describe the steps for managing shock.

Fire and Rescue Capstone	
Career Cluster	Law, Public Safety, Corrections and Security
Program of Study	Fire and Rescue
NLPS Sequence	D
Course Code	7229
Course Description	<i>Fire and Rescue Capstone will prepare students to earn the EMT certification.</i>

VU Course Alignment	FIRE 156: Firefighter II; EMBT 212: Emergency Medical Technician
Four Yr. Course Alignment	
Postsecondary Credential	ITCC - CT Fire Fighter (43.0203) VU - A.S. Fire Science and Safety Technology (43.0203)
Liberal Arts/Sciences Requirements	
Promoted Certifications	Emergency Medical Responder, Emergency Medical Technician
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Emergency Medical Care
7165.D1.1	Define key terms.
7165.D1.2	Give an overview of the historical events leading to the development of modern emergency medical services (EMS).
7165.D1.3	Describe the importance of each of the National Highway Traffic Safety Administration standards for assessing EMS systems.
7165.D1.4	Describe the components of EMS system that must be in place for a patient to receive emergency medical care.
7165.D1.5	Compare and contrast the training and responsibilities of EMRs, EMTs, AEMTs and Paramedics.
7165.D1.6	Explain each of the specific areas of responsibility for the EMT.
7165.D1.7	Give examples of the physical and personality traits that are desirable for EMTs.
7165.D1.8	Describe various job settings that may be available to EMTs.
7165.D1.9	Describe the purpose of the National Registry of Emergency Medical Technicians.
7165.D1.10	Explain the purpose of quality improvement programs in EMS programs.
7165.D1.11	Explain the role in the quality improvement process.
7165.D1.12	Explain medical direction as it relates to EMS systems.
7165.D1.13	List ways in which research may influence EMT practice.
7165.D1.14	Give examples of how EMS providers can play a role in public health.
7165.D1.15	Given scenarios, decide how an EMT may demonstrate professional behavior.
Domain	Preparation for EMT
7165.D2.1	Connect Emergency Medical Services (EMS) and know the roles, responsibilities, and characteristics of the EMT-Basic
7165.D2.2	Connect the reactions EMT-Basic and family may experience when facing trauma, illness and death and ways to recognize and protect oneself
7165.D2.3	Analyze the EMT scope of practice in dealing with DNR (do not resuscitate), expressed and implied consent, duty to act, confidentiality, and other related issues
7165.D2.4	Verify topographic terms such as medial, lateral, proximal, distal, superior, inferior, anterior, posterior, midline, right and left, mid-clavicular, bilateral, mid-axillary and know anatomy and function of the following major body systems: respiratory, circulatory, musculoskeletal, nervous, and endocrine
7165.D2.5	Verify the components of vital signs such as breathing, pulse rate, skin color, temperature,

Next Level Programs of Study

Review Document

	pupils, blood pressure and other vital signs
7165.D2.6	Evaluate the guidelines and safety precautions that need to be followed when lifting a patient and various patient carrying devices
7165.D2.7	Evaluate the components of vital signs such as breathing, pulse rate, skin color, temperature, pupils, blood pressure and other vital signs
Domain	Respiratory System
7165.D3.1	Establish the major structures of the respiratory system, signs of adequate and inadequate breathing, and multiple methods and techniques of improving breathing and ventilation
7165.D3.2	Select the following techniques including head-tilt chin lift, jaw thrust, suctioning, using a pocket mask and the bag-valve mask system, and a flow restricted, oxygen-powered ventilation device
7165.D3.3	Recommend the steps in performing the actions taken when providing mouth-to-mouth and mouth-to-stoma artificial ventilation
7165.D3.4	Verify how to measure and insert an oropharyngeal (oral) and nasopharyngeal (nasal) airway and the components of an oxygen delivery system
7165.D3.5	Choose a nonrebreather facemask and state the oxygen flow requirements needed for its use and indications for using a nasal cannula versus a nonrebreather facemask
7165.D3.6	Establish the rationale for basic life support artificial ventilation and airway protective skills taking priority over most other basic life support skills
Domain	Patient Assessment
7165.D4.1	Evaluate common hazards found at the scene of a trauma and a medical patient and how to evaluate the scene for safety and potential hazards
7165.D4.2	Integrate how to perform an initial assessment of an adult, child or infant patient
7165.D4.3	Verify the methods and rationale of conducting a rapid trauma assessment and a focused history and physical exam
7165.D4.4	Diagnose individuals with specific chief complaints with known and not known prior history, unresponsive patients, and patients with an altered mental status
7165.D4.5	Verify the areas of the body that are evaluated during a detailed physical exam of both a trauma and medical patient
7165.D4.6	Establish the reasons and demonstrate the skills for repeating the initial assessment as part of the on-going assessment
7165.D4.7	Verify various methods of communicating with a patient and about a patient's condition including radio communications and patient reports on the scene or at a facility
7165.D4.8	Verify the components and related issues of the written patient report including a prehospital care report, patient refusal, legal implications, EMS gathering systems and proper use of medical terminology
Domain	General Pharmacology
7165.D5.1	Evaluate the medications with which the EMT-Basic may assist the patient with administering and know the generic names, medication forms and rationale for administering
7165.D5.2	Verify the structure and function of the respiratory system including signs, symptoms, and emergency care of patients with breathing difficulties
7165.D5.3	Verify the structure and function of the cardiovascular system including signs, symptoms, and emergency care of patients with various cardiac emergencies
7165.D5.4	Analyze and know the steps in the emergency medical care of the patient taking diabetic medicine with an altered mental status and a history of diabetes

Next Level Programs of Study

Review Document

7165.D5.5	Evaluate and know the emergency medical care of the patient with an allergic reaction
7165.D5.6	Analyze patients and know emergency medical care for the patient with possible overdose
7165.D5.7	Verify how to identify, assess, and provide emergency medical care to a patient experiencing an environmental emergency
7165.D5.8	Verify how to identify, assess, and provide emergency medical care to a patient with psychological, behavioral, and/or suicidal emergencies
7165.D5.9	Connect obstetrics and gynecology structures and techniques for providing emergency medical care in cases of delivery and birth
Domain	<i>EMT Basic / Trauma</i>
7165.D6.1	Connect the structure and function of the circulatory system and steps in the emergency medical care and transportation of the patient with shock and signs and symptoms of internal and/or external bleeding
7165.D6.2	Evaluate the major functions of the skin and the emergency medical care of a patient with open and closed soft tissue injuries, chest and abdomen injuries, amputations, and various burns
7165.D6.3	Analyze the functions of the muscular and skeletal systems and the emergency care of patients requiring splinting those with painful, swollen deformed extremities
7165.D6.4	Evaluate the functions of the nervous system and the emergency care and transportation of patients with spinal injuries
Domain	<i>Infants and Children</i>
7165.D7.1	Establish the developmental considerations of infants, toddlers, pre-school, school age and adolescent children
7165.D7.2	Verify the cognitive, affective, and psychomotor issues of emergency care of patients who are infants or children
Domain	<i>Ambulance Operations</i>
7165.D8.1	Apply and adapt the medical and non-medical equipment needed to respond to a call, laws related to ambulance operation, safety considerations, transportation of patients, cleaning, disinfection and sterilization, and the patient information report
7165.D8.2	Connect the fundamental components of extrication and patient access
7165.D8.3	Verify responsibilities and procedures, including triage, when responding to calls involving hazardous materials or conditions, multiple-causality situations, and disasters
Domain	<i>Hazardous Materials</i>
7165.D9.1	Connect and meet the competencies for First Responder Awareness and Operations Levels as set forth by OSHA 1910.120 and NFPA 472
7165.D9.2	Manage a hazardous materials incident to determine the magnitude of the problem
7165.D9.3	Establish how to plan an initial response within the capabilities and competencies of available personnel, personal protective equipment, and control equipment
7165.D9.4	Verify how to implement the planned response to favorably change the outcomes consistent with the local emergency response plan and the organization's standard operating procedures
7165.D9.5	Verify how to evaluate the progress of the actions taken to ensure that the response objectives are being met safely, effectively, and efficiently
Domain	<i>Response to Terrorism</i>
7165.D10.1	Select domestic and international terrorism per the current Department of Justice definition
7165.D10.2	Evaluate, through case histories, various types of potential incidents
7165.D10.3	Choose differences and similarities between responding to terrorist and non-terrorist

Next Level Programs of Study

Review Document

	incidents
7165.D10.4	Confirm suspicious circumstances which may indicate possible terrorism
7165.D10.5	Select the appropriate use of shielding at B-NICE incidents
7165.D10.6	Choose the use of time and distance as protective measures at B-NICE incidents
7165.D10.7	Choose the basic steps of emergency decontamination and routine post-exposure decontamination
7165.D10.8	Establish unique challenges that may confront responders when attempting to implement scene control
7165.D10.9	Connect what hazard and risk components influence public protection considerations
7165.D10.10	Recommend what resources should be utilized to maintain perimeter security at a terrorist incident
7165.D10.11	Verify outward warning signs of B-NICE incidents
7165.D10.12	Establish and explain tactical considerations associated with acts of terrorism involving biological, nuclear, incendiary, chemical, and explosive materials
7165.D10.13	Select and list specialized equipment needed to support tactical operations involving BNICE incidents
7165.D10.14	Given a case study, integrate tactical considerations for each incident category
7165.D10.15	Verify the authorities and responsibilities in Presidential Decision Directive 39
7165.D10.16	Analyze crime scene issues which must be addressed when managing an incident involving potential criminal activities
7165.D10.17	Select applicable resources referenced in the Federal Response Plan (FRP) and the FRP Terrorism Annex
7165.D10.18	Choose the preliminary indicators for transition from emergency phase to recovery and termination
7165.D10.19	Recommend unique debriefing and security issues

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	<i>Criminal Justice</i>
7193.D1.1	Demonstrate an understanding of the sources of American criminal law.
7193.D1.2	Explain how law defines the elements of a crime.
7193.D1.3	Discuss the correlates of crime.
7193.D1.4	Explain the biological, psychological, and sociological determinants of crime.
7193.D1.5	Analyze the defenses against criminal charges.
7193.D1.6	Discuss the evolution of the American system of law and justice.
7193.D1.7	Describe and explain the three major components of the criminal justice system.
7193.D1.8	Evaluate the various issues in law enforcement and police behavior.
7193.D1.9	Explain the process of adjudication from accusation through sentencing.
7193.D1.10	Discuss the elements of the correctional system drawing from the concepts of punishment, rehabilitation, and reform.
7193.D1.11	Demonstrate an understanding of the problems facing the American correctional system.
7193.D1.12	Evaluate the advantages and disadvantages of community correction measures.
7193.D1.13	Recognize the role of oneself and one's culture through multiple frames of reference, including the perception of others from around the world as it applies to law and crime.
7193.D1.14	Demonstrate aptitude to appropriately adapt one's own practices, values, and behaviors related to criminal justice when encountering diverse perspectives from around the world.

Law Enforcement Fundamentals

Career Cluster	Law, Public Safety, Corrections and Security
Program of Study	Criminal Justice
NLPS Sequence	B
Course Code	7191

Next Level Programs of Study

Review Document

Course Description	<i>Law Enforcement Fundamentals critically examines the history and nature of the major theoretical perspectives in criminology and the theories found within those perspectives. Students analyze the research support for such theories and perspectives and the connections between theory and criminal justice system practice within all the major components of the criminal justice system. The course will allow students to demonstrate the application of specific theories to explain violent and non-violent criminal behavior on both the micro and macro levels of analysis. Additionally, this course will introduce fundamental law enforcement operations and organization. This includes the evolution of law enforcement at federal, state, and local levels.</i>

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Law Enforcement
7191.D1.1	Discuss the history of policing.
7191.D1.2	Explain the role and function of policing in a democratic society as it pertains to the Constitution.
7191.D1.3	Develop a profile of the personality that is attracted to policing.
7191.D1.4	Demonstrate an understanding of the scope of administrative functions in a police department.
7191.D1.5	Discuss the various operations involved in police work including, but not limited to, line and support functions, crime control strategies, search and seizure, arrest, and interrogation.
7191.D1.6	Develop and demonstrate knowledge of special problems for police.
7191.D1.7	Explain the special problem of stress as it pertains to the work of policing.
7191.D1.8	Analyze the problem of deadly force and police brutality connected with police work.
7191.D1.9	Interpret the specific problems associated with police corruption and its impact on credibility.
7191.D1.10	Discuss the role and impact of the introduction of women into the police force.
7191.D1.11	Explain the importance of including minorities into the police force.
Domain	Criminology
7191.D2.1	Identify the major theoretical perspectives in criminology and understand their ideological basis.
7191.D2.2	Evaluate the connection between ideology, theory, and practice in the criminal justice system.
7191.D2.3	Discuss the role of criminological research within the broader context of social, political, and economic inequality in America.
7191.D2.4	Apply a specific criminological theory to explain a celebrated crime.
7191.D2.5	Discuss the effects of criminological theories on best practices in corrections and sentencing.
7191.D2.6	Critique the various rationales for punishment.
7191.D2.7	Discuss the policy implications of criminological theories on crime reduction consistent with available research.
7191.D3.1	Understand the Bill of Rights and how these are connected to the criminal justice system.

Corrections and Cultural Awareness	
Career Cluster	Law, Public Safety, Corrections and Security
Program of Study	Criminal Justice
NLPS Sequence	C
Course Code	7188
Course Description	<i>Corrections and Cultural Awareness emphasizes the study of American criminal justice problems and systems in historical and cultural perspectives, as well as discussing social and public policy factors affecting crime. Multidisciplinary and multicultural perspectives are stressed. Additionally, this course takes a further examination of the American correctional system and the study of administration of local, state, and federal correctional agencies. The</i>

Review Document

7188.D1.1	Discuss the origins and history of American corrections.
7188.D1.2	Understand the major purposes of corrections and how they influence correctional policies.
7188.D1.3	Analyze the nature of inmate behavior and the management of that behavior.
7188.D1.4	Understand the function of jails, prisons, community corrections, intermediate sanctions, probation, and parole.
7188.D1.5	Discuss the ethical issues surrounding such topics as the death penalty, race, and poverty.
7188.D1.6	Research the history and development of laws affecting correctional institutions and the applicability to inmates.
7188.D1.7	Understand the social and political context that shapes the American correctional system.
Domain	
7188.D2.1	Understand how once convicted, due process rights change.
7188.D2.2	Discuss multiculturalism and diversity in the Criminal Justice field.
7188.D2.3	Discuss the pendulum of change in corrections over time.
7188.D2.4	Understand the jurisdiction of various Law Enforcement Agencies including various levels of governments and how governmental branches work together
7188.D2.5	Understand the concept of reasonable person test and looking at the totality of the circumstances involved in an investigation
Domain	Cultural Awareness
7188.D3.1	Develop fundamental definitions and concepts of race, ethnic, discrimination, and minorities.
7188.D3.2	Analyze racial, cultural, and ethnic factors and perspectives in the demographics of victims, offenders, and statistical data related to crimes.
7188.D3.3	Interpret available empirical data related to crime and the criminal to determine the effect of bias or prejudice in the American system of justice and death penalty statutes.
7188.D3.4	Evaluate the American social structure on the basis of discrimination and social and economic inequality.
7188.D3.5	Analyze the relationship between law enforcement agencies and racial and/or ethnic minorities.
7188.D3.6	Analyze the relationship between the judicial system and racial and/or ethnic minorities in the pre-trial procedures, trial, and sentencing.
7188.D3.7	Evaluate the racial and ethnic composition of the offender population in the federal and state correctional systems.
7188.D3.8	Discuss the need for and/or the possibility for change in the criminal justice system for minorities at the local, state, and federal level.
7188.D3.9	Discuss what the goals and outcomes of the criminal justice system are and how success should be measured.
7188.D3.10	Discuss why various law enforcement systems exist.
7188.D3.11	Understand the history of Criminal Justice and current/modern Law Enforcement operations and practices.

Course Code	7194
Course Description	<i>Principles of Paralegal Studies introduces the student to a broad understanding of the American legal system. Students will engage with and learn about the various court structures, the key players within the system, and how our rules and laws are made, enforced, interpreted and applied. The course will cover substantive legal topics and provide hands-on learning regarding legal research, legal writing, case briefing, interviewing skills, and professional ethics. The course will examine the rules of professional conduct that apply to all legal professionals including the American Bar Association Model Rules of Professional Conduct, the Indiana Rules of Professional Conduct, the American Bar Association Guidelines for the Utilization of Legal Assistants, and various other sets of rules of conduct created by paralegal associations.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
7194.D1.1	Examine various levels of our court systems and how they differ from other systems around the world.
7194.D1.2	Demonstrate an understanding of jurisdiction and the concept of due process.
7194.D1.3	Identify the differences between civil and criminal law.
7194.D1.4	Discuss various skills needed in the legal profession, such as legal research, legal writing, interviewing and case briefing.
7194.D1.5	Know and situationally apply rules of professional responsibility and legal ethics.
7194.D1.6	Describe how attorneys are licensed and regulated.
7194.D1.7	Describe the role that the American Bar Association plays in the regulation of lawyers and paralegals.
7194.D1.8	Describe the role that national paralegal associations play in the promotion of professional rules of conduct for paralegals.
7194.D1.9	Distinguish between paralegal licensure and paralegal certification.
7194.D1.10	Demonstrate an understanding of the application of the primary rules of lawyer conduct that affect the performance of paralegals.
7194.D1.11	Distinguish between authorized tasks that paralegals can perform and the unauthorized practice of law.

Next Level Programs of Study

Review Document

7194.D1.12	Distinguish between the ethics doctrine of lawyer-client confidentiality and the discovery doctrines of attorney client privilege and the work product rule.
7194.D1.13	Demonstrate an understanding of the common conflicts of interest that are likely to arise in the law office.
7194.D1.14	Distinguish between the imputed disqualification rules that apply to lawyers and imputed disqualification rules that apply to paralegals.
7194.D1.15	Distinguish advertising from solicitation and demonstrate an awareness of how a paralegal's conduct is proscribed by the advertising and solicitation rules.
7194.D1.16	Distinguish the types of legal fees, and what makes a legal fee unreasonable.

Paralegal Fundamentals	
Career Cluster	Law, Public Safety, Corrections and Security
Program of Study	Paralegal Studies
NLPS Sequence	B
Course Code	7192
Course Description	<i>Paralegal Fundamentals introduces the student to legal research resources including constitutions, statutory codes and annotations, administrative encyclopedias, treatises, legal periodicals, practice manuals, and form books. Students are introduced to various finding tools for accessing information in these resources. Students will learn proper legal citation forms, citation services, and research strategy. Projects include a series of graded law library research assignments teaching the student how to use this variety of materials to research both primary and secondary legal authorities using methodologies for research in either print or online sources and updating material to insure the most up-to-date research possible. The course is designed to improve the student's ability to write at a professional level, with appropriate attention to grammar, sentence structure, and style. Students will become familiar with basic legal terminology. This course will also develop the student's legal writing skills, including how to write sharp, clear prose and become more proficient and efficient at composing, organizing, and summarizing a wide variety of legal written documents. The student will be exposed to various legal writing techniques that are used in drafting a wide variety of legal documents. A strong emphasis is placed on proper legal writing methodology and formatting.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Paralegal Studies

7192.D1.1	Identify and locate primary legal authority, including constitutions, statutes, administrative materials, and appellate court decisions
7192.D1.2	Explain and distinguish between primary and secondary authority.
7192.D1.3	Explain and distinguish between mandatory and persuasive authority and determine which legal material should be presented to a court.
7192.D1.4	Describe the relationship between trial and appellate courts and how precedent is used in deciding cases.
7192.D1.5	Locate statutes and their related case annotations in a federal annotated statutory set or an Indiana annotated code set.
7192.D1.6	Differentiate between official and unofficial publications of primary authority.
7192.D1.7	Formulate proper citation forms for primary and secondary authorities.

Next Level Programs of Study

Review Document

7192.D1.8	Validate legal authority through use of a citation service.
7192.D1.9	Identify and locate secondary legal sources such as legal encyclopedia, legal treatises, practice manuals, and form books
7192.D1.10	Discuss the role of free web-based sources of legal material and non-legal material
7192.D1.11	Integrate both free sources and subscription sources into the process of legal research.
7192.D1.12	Examine the role of a paralegal in legal research conforming to the Indiana rules of professional conduct.
7192.D1.13	Understand and apply the rules of English grammar and style. <ul style="list-style-type: none"> • Word usage, including common errors • Punctuation • Capitalization • Grammar • Rules of composition • Formal writing style • Sentence structure
7192.D1.14	Demonstrate familiarity with legal terminology.
7192.D1.15	Demonstrate the ability to write at a professional level.

Advanced Paralegal Studies	
Career Cluster	Law, Public Safety, Corrections and Security
Program of Study	Paralegal Studies
NLPS Sequence	C
Course Code	7187
Course Description	<i>Advanced Paralegal Studies introduces the student to the Indiana Trial Rules, court rules, local rules, and small claims, specifically knowing the Rules of Civil Procedure and how they apply to each part of a case. Topics include filing requirements, the rules regarding service of process, calculation of deadlines, motion practice, discovery, trials, and relief from judgements. This course will also develop the student's legal writing skills, including how to write sharp, clear prose and become more proficient and efficient at composing, organizing, and summarizing a wide variety of legal written documents. The student will be exposed to various legal writing techniques that are used in drafting a wide variety of legal documents. A strong emphasis is placed on proper legal writing methodology and formatting.</i>

7187.D1.10	Summarize the purpose of calendaring.
7187.D1.11	Explain the time limitation for the filing of and/or responding to various pleadings, motions, and requests.
7187.D1.12	Explain and justify the order of presentation of various witnesses
7187.D1.13	Explain and justify the order of presentation of various trial exhibits
7187.D1.14	Critique various types of technology available to assist with the litigation process

Paralegal Studies Capstone	
Career Cluster	Law, Public Safety, Corrections and Security
Program of Study	Paralegal Studies
NLPS Sequence	D
Course Code	7227
Course Description	<i>A core component of Paralegal Studies Capstone is a study of Indiana Trial Rules pertaining to an actual trial. Topics include the discovery process and discovery tools, litigation support – including organization and retrieval of trial documents – techniques in preparing witnesses for trial and preparing jury instructions. The main project is compiling a trial notebook. Students will also receive instruction regarding a variety of different hardware and software programs used in general office settings, as well as those used specifically in legal practice. Students will obtain an understanding of the sources of technology used in litigation in the courtroom.</i>

Engineering and Technology: Special Topics	
Career Cluster	STEM
Program of Study	
NLPS Sequence	
Course Code	4788
Course Description	<i>Engineering and Technology: Special Topics is an extended learning experience designed to address the advancement and specialization of careers within the career cluster through the provision of a specialized course for a specific workforce need in the school's region. The learning experience is at a qualified site, and is designed to give the student the opportunity to learn and practice technical skills; while working under the direction of the appropriately licensed professional. Throughout the course, students will focus on learning about employment opportunities and obtaining the knowledge, skills and attitudes essential for success in specific occupations. Course standards and curriculum must be tailored to the specific profession, preparing students to advance in this career field, and where applicable, provide students with opportunities for certification or dual credit. Participation in a related CTSO encourages the development of leadership, communication and career related skills, and opportunities for community service.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 semester course, up to 3 credits per semester, May be offered for successive semesters up to 12 credits
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X
Additional Notes	Schools must have an approved Nonstandard Course Waiver on file to be eligible for CTE Funding.

Introduction to Design Processes	
Career Cluster	STEM
Program of Study	
NLPS Sequence	
Course Code	4794
Course Description	<i>Introduction to Design Processes is a course that specializes in modern design and engineering processes with a focus on creative problem solving in developing, testing, communicating, and presenting post-evaluation of products. Students use the design process to analyze research, develop ideas, and produce products solutions. This process gives a framework through which they design, manufacture, test, and present their ideas. Students will demonstrate and utilize design principles and elements for visual presentation. Designing aspects will also cover aesthetics, ergonomics, the environment, safety, and production. The design process is a core-learning tool for many courses enabling the student to solve problems in a systematic, logical and creative manner. Students develop a good understanding of the way the process helps them think creatively and develop aesthetic ideas. The design process encourages the students to engage in higher level thinking to create solutions for many types of problems.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 or 2 semester course, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>The Design Process</i>
4794.D1.1	Core Standard 1 Students create solutions using the design process steps for solving problems.
4794.D1.2	Identify and describe the steps in the design process
4794.D1.3	Compare the design processes specific to the subject matter
4794.D1.4	Apply and adapt the design loop as a guide in problem solving
4794.D1.5	Discuss the importance of the design process and how the process affects the outcome
4794.D1.6	Discuss the impact technology and innovation has had on our world
Domain	<i>Problems and Opportunities</i>
4794.D2.1	Core Standard 2 Students examine problems to identify opportunities for innovative solutions.
4794.D2.2	Identify needs of human beings
4794.D2.3	Explain how problems can create opportunities
4794.D2.4	Describe and apply the faultfinding process

Next Level Programs of Study

Review Document

4794.D2.5	Create a design brief
4794.D2.6	Describe and apply scientific truth finding
4794.D2.7	Describe and apply problem solving techniques
Domain	Documenting Design Work
4794.D3.1	Students prepare organized and relative documentation of the design process for their solutions of final products.
4794.D3.2	Explain the importance of a portfolio
4794.D3.3	Develop sketching and principles of visualization skills to document work
4794.D3.4	Prepare working drawings including orthographic projections, isometrics, and perspective – using appropriate drawing styles and techniques
4794.D3.5	Use CAD workstations and appropriate software
4794.D3.6	Prepare graphs and explain how they relate information
4794.D3.7	Develop a portfolio
Domain	Investigation and Research
4794.D4.1	Students synthesize information obtained through appropriate resources that are in direct relation to the problem's solution.
4794.D4.2	Collect data and information to be used to solve a problem
4794.D4.3	Apply questions in a proper way to collect information
4794.D4.4	Describe and conduct an interview process
4794.D4.5	Apply appropriate investigative strategies
4794.D4.6	Identify and describe good sources for research and appropriately document all resources
4794.D4.7	Evaluate resources with regards to the identified problem
Domain	Designing Systems
4794.D5.1	Students design solutions using their knowledge of technological systems for developing innovative solutions.
4794.D5.2	Identify and describe the basic parts of a technological system
4794.D5.3	Describe and design a structural system
4794.D5.4	Describe and design a mechanical system
4794.D5.5	Describe and design an electronic system
4794.D5.6	Describe and design a pneumatic system
Domain	Generating and Developing Ideas
4794.D6.1	Students choose techniques to foster creative solutions to a design problem.
4794.D6.2	Define and describe types of cognitive thinking
4794.D6.3	Apply cognitive techniques of thinking to identified problems
4794.D6.4	Define and describe brainstorming techniques
4794.D6.5	Use research to formulate ideas
4794.D6.6	List and describe the components of a design
4794.D6.7	Apply brainstorming techniques to develop many possible solutions
4794.D6.8	Explain the human, social and environmental issues that affect the design solutions
4794.D6.9	Analyze ethical issues in choosing design solutions
4794.D6.10	Apply decision techniques to choose solutions based on appropriate criteria
Domain	Materials, Prototyping and Testing
4794.D7.1	Students validate solutions through material selection, modeling, prototyping and testing of their final product or system.

Next Level Programs of Study

Review Document

4794.D7.2	Differentiate the major physical properties of materials
4794.D7.3	Identify and describe the major classifications of materials
4794.D7.4	Define and illustrate modeling and prototyping
4794.D7.5	List five materials that can be used for modeling
4794.D7.6	Produce ways to present test results
4794.D7.7	Apply and adapt methods of evaluating design work
4794.D7.8	Conduct and document product tests
Domain	Presenting Design Solutions
4794.D8.1	Students prepare presentations of final design solutions to be critiqued by others.
4794.D8.2	Compare methods that are used to communicate a design solution
4794.D8.3	Create a presentation showing the steps used in the design process
4794.D8.4	Present a product for critique
4794.D8.5	Demonstrate professional presentation techniques
Domain	Aesthetic Design
4794.D9.1	Students demonstrate artistic fundamentals which are utilized throughout the design process to solve visual problems and communicate ideas for a product or system.
4794.D9.2	Identify the knowledge and skills gained in art experiences that transfer to the design process
4794.D9.3	Analyze the effective use of symbols, elements, principles, and media using appropriate terminology
4794.D9.4	Construct insightful, convincing interpretations of products or systems by identifying problematic features, forming theories, and evaluating alternative theories
4794.D9.5	Engage in critical reading, writing, and discourse to improve understanding of own work and that of others
4794.D9.6	Demonstrate skill in perception from real life to present convincing representation of objects or subject matter
4794.D9.7	Select subject matter, symbols, and ideas to communicate statements to the consumer
4794.D9.8	Engage in philosophical inquiry into the nature of aesthetic issues independently or with others
4794.D9.9	Make informed choices about specific subject matter or concepts and defend those choices when given a range of objects or spaces
4794.D9.10	Appropriate symbols and metaphors from art and design and describe their origin, function, and value in the solutions
4794.D9.11	Demonstrate thoughtful revision and refinement of original design solutions based upon reflection, critique, practice, and research
4794.D9.12	Examine and establish criteria for judging excellence in work and revise and refine work through analysis, synthesis, peer critique, and self-evaluation, utilizing established criteria for the purpose of creating portfolio level work
4794.D9.13	Evaluate the effectiveness of elements and principles in other design solutions and use this evaluation to inform personal work
4794.D9.14	Create multiple solutions in works that demonstrate competence in producing effective relationships between elements, media, and function
4794.D9.15	Create design solutions that use specific elements, principles, and functions to solve problems and communicate ideas
4794.D9.16	Create design solutions that demonstrate skill and understanding of different media, processes and communicate ideas

Next Level Programs of Study

Review Document

4794.D9.17	Begin, define, and solve challenging visual problems, demonstrating skill and in-depth understanding of media and processes

Computers in Design & Production	
Career Cluster	STEM
Program of Study	
NLPS Sequence	Introductory
Course Code	4800
Course Description	<i>Computers in Design and Production is a course that specializes in using modern technological processes, computers, design, and production systems in the production of products and structures through the use of automated production systems. Emphasis is placed on using modern technologies and on developing career related skills for electronics, manufacturing, precision machining, welding, and architecture career pathways. Students apply ingenuity using tools, materials, processes, and resources to create solutions as it applies in the electronics, manufacturing, precision machining, welding, and architecture. The content and activities should be developed locally in accordance with available advanced technologies in the school. Course content should address major technological content related to topics such as: Architectural drawing and print design, design documentation using CAD systems; assignments involving the interface of CAD, CNC, CAM, and CIM technologies; computer simulation of products and systems; publishing of various media; animation and related multimedia applications; 3-D modeling of products or structures; digital creation and editing of graphics and audio files; control technologies; and automation in the modern workplace.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 or 2 semester course, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Core Concepts
4800.D1.1	Students apply concepts of the design process using writing, math, and CAD skills for solving a design problem
4800.D1.2	Identify components related to the design process
4800.D1.3	Describe the steps in the design process
4800.D1.4	Describe the elements and principles of design.
4800.D1.5	Make and use measurements in both traditional and metric unit
4800.D1.6	Apply and adapt the design process from conception through verification of a simple component or system
4800.D1.7	Review CAD drawing design
4800.D1.8	Demonstrate drafting concepts and the use of drafting tools
4800.D1.9	Develop an understanding of geometry related to technical drawing and actual production objects
4800.D1.10	Apply concepts of 3D CAD drawing and animation during the design process.
4800.D1.11	Use “real world” measuring tools and teaming concepts to create production models.
4800.D1.12	Solve technical mathematical problems.
4800.D1.13	Create multi-view drawings using 2D and 3D CAD.
4800.D1.14	Develop 3-D product models using solid modeling and parametric CAD software.
4800.D1.15	Understand concept sketching.
4800.D1.16	Create a presentation of a design using various methods.
4800.D1.17	Utilize Computer Aided Drafting (CAD) skills to produce drawings.
4800.D1.18	Identify common terms and definitions relating to Computer Aided Drafting.
4800.D1.19	Write a descriptive report on some aspect of the design process and how it relates to a project.
Domain	Electronics
4800.D2.1	Students verify electronic concepts for use in electronic schematics.
4800.D2.2	Design basic electronic schematics.

Next Level Programs of Study

Review Document

4800.D2.3	Identify and describe basic electronic laws.
4800.D2.4	Describe AC/DC concepts.
4800.D2.5	Apply basic logic found in electronics.
4800.D2.6	Identify symbols used in creating schematics.
4800.D2.7	Recognize and explain the functions of electronic components.
Domain	Advanced Manufacturing
4800.D3.1	Students integrate advanced manufacturing concepts in the design process to develop projects.
4800.D3.2	Apply the principles of mold design for a variety of products.
4800.D3.3	Identify necessary mold materials, stress and strength calculations, machining, fabricating, and testing in processing equipment needed to produce a product.
4800.D3.4	Describe the design of the manufacturing process as required by product design specifications.
4800.D3.5	Identify the selection of processes, tooling, work-holding, gauging, routing, and material handling, as developed for a manufacturing production simulation.
4800.D3.6	Demonstrate process planning, cost and efficiency analysis.
4800.D3.7	Demonstrate planning for ergonomics, robotics, machine tools, coordinate-measuring machines, and custom automation for a product.
4800.D3.8	Use simulation software to design a factory layout and material-flow simulation.
4800.D3.9	Design for product-ability and manufacturing ease.
4800.D3.10	Understand how robots operate in a work cell.
4800.D3.11	Incorporate print reading for applications.
Domain	Precision Machining
4800.D4.1	Students choose precision machining concepts to use in creating a solution.
4800.D4.2	Explain the practical considerations associated with the use of FEA (Finite Element Analysis) with respect to product stress and strain analysis.
4800.D4.3	Identify geometric dimensioning and tolerancing, and surface texture specifications.
4800.D4.4	Identify a wide range of rapid prototyping technologies and materials.
4800.D4.5	Explain why rapid prototyping is a useful technique in designing a product.
4800.D4.6	Convert/create products using modeling software, convert drawings using appropriate software and produce a product using a rapid prototyping technique.
4800.D4.7	Demonstrate the ability to model/prototype to scale.
4800.D4.8	Understand and practice orthographic projection drawings as related to practical applications.
4800.D4.9	Understand and practice axonometric projection drawings related to practical applications.
4800.D4.10	Demonstrate robotics programming and CAD/CAM/CNC programming for producing the instruction codes necessary to manufacture parts with NC machine tools are emphasized.
4800.D4.11	Incorporate precision tool reading for applications.
4800.D4.12	Show understanding of coordinate systems.
Domain	Welding
4800.D5.1	Students recommend welding methods to be used on a particular type of material in accordance with the use of the product.
4800.D5.2	Identify welding types through finite/stress analysis.
4800.D5.3	Incorporate print reading for applications.
4800.D5.4	Identify welding symbols used in drawings.

Next Level Programs of Study

Review Document

4800.D5.5	Describe different types of welding.
Domain	Architecture
4800.D6.1	Students integrate architecture concepts in the design process to develop projects.
4800.D6.2	Demonstrate an understanding of various historical house styles.
4800.D6.3	Assess space planning for occupant use.
4800.D6.4	Recognize and explain how building codes and ordinances affect design.
4800.D6.5	Identify the drawings required for residential construction.
4800.D6.6	Create architectural blueprints.
4800.D6.7	Select the appropriate scale using an architect's scale.
4800.D6.8	Identify and apply architectural symbols used in drawings.
4800.D6.9	Identify the proper use of site analysis.
4800.D6.10	Demonstrate knowledge of roof systems, terminology, style, and construction.
4800.D6.11	Identify various styles of roof systems.
4800.D6.12	Explain the purpose of elevations.
4800.D6.13	Evaluate different foundation systems and terminology.
4800.D6.14	Analyze mechanical systems present in residential construction.
Domain	Careers in Electronics, Advanced Manufacturing, Precision Machining, Welding, and Architecture.
4800.D7.1	Students evaluate potential career opportunities in electronics, advanced manufacturing, precision machining, welding, and architecture.
4800.D7.2	Research electronics, advanced manufacturing, precision machining, welding, and architecture careers.
4800.D7.3	Find electronics, advanced manufacturing, precision machining, welding, and architecture opportunities offered by a technical school or college.
4800.D7.4	Determine electronics, advanced manufacturing, precision machining, welding, and architecture occupation wages/salaries.
4800.D7.5	Research electronics, advanced manufacturing, precision machining, welding, and architecture job outlook information.

Introduction to Computer Science	
Career Cluster	STEM
Program of Study	
NLPS Sequence	Introductory
Course Code	4803
Course Description	<i>Introduction to Computer Science allows students to explore the world of computer science. Students will gain a broad understanding of the areas composing computer science. Additionally, there is a focus on the areas of computer programming, gaming/mobile development, and artificial intelligence/robotics.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 to 2 semester course, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	
Additional Notes	Note: This course qualifies for funding at the 8 th grade level
ADDITIONAL COURSE INFO	
Funding	Introductory Available for 8 th grade

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Computer Science
4803.D1.1	Students create an understanding of computer science and explore how it impacts their everyday lives.
4803.D1.2	Create a definition of computer science and computational thinking.
4803.D1.3	Demonstrate awareness of the history of computing.
4803.D1.4	Investigate trends in computer science and their impact on society.
4803.D1.5	Summarize ethical issues within computer science.
Domain	Programming and Development
4803.D2.1	Students connect the process of developing a computing artifact (ex. computer application, web application, operating system, artificial intelligence) with the skills needed during the development process to have a better understanding of what it takes to build a computing artifact.
4803.D2.2	Use the design process to iteratively develop a computing artifact.
4803.D2.3	Demonstrate competencies of programming constructs, including use of data types and variables, control structures (sequencing, looping, branching), and modularity (such as a function).
4803.D2.4	Understand how abstractions hide implementation details when used in everyday objects.
4803.D2.5	Use abstraction to manage program complexity (such as a function to create callable code).
4803.D2.6	Formulate algorithms using programming structures to decompose a complex problem.
4803.D2.7	Assess a program by testing to verify correct behavior.
4803.D2.8	Construct a computing artifact that has a user interface.
4803.D2.9	Produce an artifact that includes rich media.

Next Level Programs of Study

Review Document

4803.D2.10	Illustrate knowledge of good programming practice including the use of conventional standards and comments.
Domain	Data
4803.D3.1	Students describe the types of data and how it is created, stored, and used by computers.
4803.D3.2	Understand how computers represent data, including: text, sound, images, and numbers.
4803.D3.3	Create data visualizations, models, and simulations.
4803.D3.4	Evaluate data to better understand the world.
4803.D3.5	Explore the relationship between information and data.
Domain	Computers, Devices, and Other Technologies
4803.D4.1	Students analyze computer devices and other technologies to build an understanding of their impact on society and how to use them appropriately.
4803.D4.2	Demonstrate understanding of the hardware and operating systems of computers.
4803.D4.3	Discuss the ethical and appropriate use of computer devices.
4803.D4.4	Explore the fundamental principles and components of computer networking.
4803.D4.5	Examine the impact of the Internet on society.
4803.D4.6	Investigate the use of artificial intelligence by individuals and society.
4803.D4.7	Investigate innovations in computing, including robotics.
Domain	Collaboration
4803.D5.1	Students collaborate to complete various tasks.
4803.D5.2	Design a solution to a problem by working in a team.
4803.D5.3	Explore technologies that can be used to collaborate with others of various cultures and career fields.
4803.D5.4	Utilize a problem-solving approach to develop a solution using technology.
4803.D5.5	Analyze the work of peers and provide feedback.
4803.D5.6	Program a solution to a problem using pair programming or other methods.
Domain	Security and Privacy
4803.D6.1	Examine the dynamic between privacy and security.
4803.D6.2	Explain the privacy concerns related to the collection and generation of data through implicit and explicit processes.
4803.D6.3	Evaluate the social and emotional implications of privacy in the context of safety, law, and ethics.
4803.D6.4	Give examples to illustrate how sensitive data can be affected by malware and other attacks.
4803.D6.5	Recommend security measures to address various scenarios based on factors such as efficiency, feasibility, and ethical implications.
4803.D6.6	Discuss the laws surrounding intellectual property.
Domain	Careers
4803.D7.1	Students will investigate various careers within the field of computer science.
4803.D7.2	Identify computer science occupations and the roles and responsibilities of each.

Next Level Programs of Study

Review Document

4803.D7.3	Report job outlook, demand, and projected wages for computer science careers.
4803.D7.4	Explore the job opportunities that are available in computer science.
4803.D7.5	Investigate post-secondary training opportunities and industry certifications that are available.

Computer Science: Special Topics	
Career Cluster	STEM
Program of Study	
NLPS Sequence	
Course Code	5252
Course Description	<i>Computer Science III: Special Topics is an extended experience designed to address the advancement and specialization of computer science careers allowing schools to provide a specialized course for a specific computer science workforce need in the school's region. It prepares students with the knowledge, skills and attitudes essential for working in the field of computer science. Course standards and curriculum must be tailored to the specific computer science specialization. This course must prepare students for advancement in this career field and should provide students with opportunities for certification or dual credit.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 semester course, up to 3 credits per semester, May be offered for successive semesters up to 12 credits
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X
Additional Notes	Schools must have an approved Nonstandard Course Waiver on file to be eligible for CTE Funding. Formerly Computer Science III: Special Topics

Introduction to Engineering Design	
Career Cluster	STEM
Program of Study	Design Technology, Electronics and Computer Technology, Engineering
NLPS Sequence	A
Course Code	4802
Course Description	<i>Introduction to Engineering Design is a fundamental pre-engineering course where students become familiar with the engineering design process. Students work both individually and in teams to design solutions to a variety of problems using industry standard sketches and current 3D design and modeling software to represent and communicate solutions. Students apply their knowledge through hands-on projects and document their work with the use of an engineering notebook. Students begin with completing structured activities and move to solving open-ended projects and problems that require them to develop planning, documentation, communication, and other professional skills. Ethical issues related to professional practice and product development are also presented. NOTE: This course aligns with the PLTW Introduction to Engineering Design curriculum. Use of the PLTW curriculum may require additional training and membership in the PLTW network.</i>

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Introduction to Design
4802.D1.1	Exercise file management and printing/plotting practices.
4802.D1.2	Understand the role of various types of drawings as applied to the design process.
4802.D1.3	Research potential career fields in Design Technology and Engineering.
4802.D1.4	Effectively communicate spatial visualizations with appropriate choices of technical drawings.
4802.D1.5	Demonstrate appropriate application of drawing standards to technical sketches and working drawings.
4802.D1.6	Collaborate in a studio setting.
4802.D1.7	Demonstrate relevant safety practices when using tools and equipment as determined by task, materials, environment, and protective attire.
4802.D1.8	Apply corrective action(s) to eliminate hazards.
4802.D1.9	Explain the importance of design documentation.
4802.D1.10	Apply sketching and annotation skills to document work.
4802.D1.11	Produce working drawings using appropriate drawing styles and techniques.
4802.D1.12	Formulate unbiased research questions to collect information/data and apply investigative strategies.
4802.D1.13	Select resources that are appropriate for academic research and relevant to the identified problem.
4802.D1.14	Discuss historical and current events related to engineering and technology and analyze the impact on society.
4802.D1.15	Discuss the importance of ethics in engineering design.
4802.D1.16	Synthesize information collected during the research process.
Domain	Design Process
4802.D2.1	Describe the steps in the design process.
4802.D2.2	Generate a valid and justifiable problem.
4802.D2.3	Create a design brief by constructing a problem and design statement and identifying problem constraints.
4802.D2.4	Apply the steps of the design process as they are used to solve the problem.
4802.D2.5	Describe the iterative nature of the design loop.
4802.D2.6	Discuss how the design process impacts the outcome when designing solutions to problems.
4802.D2.7	Implement design briefs in the problem-solving process.
4802.D2.8	Collaborate on engineering projects by working in design teams to solve valid problems.
4802.D2.9	Examine a design (product) with respect to its quality and usability.
4802.D2.10	Assess and refine original design solutions based upon reflection, critique, practice, and research.
Domain	2D Computer Aided Design
4802.D3.1	Create and use a template drawing.
4802.D3.2	Manipulate advanced dimensioning variables.
4802.D3.3	Use advanced editing commands.
4802.D3.4	Create blocks and form a symbol library.
4802.D3.5	Assign data/attributes to blocks.
4802.D3.6	Apply section lines to various types of drawing parts.

Next Level Programs of Study

Review Document

4802.D3.7	Create drawings using an isometric approach.
4802.D3.8	Share data utilizing external references.
4802.D3.9	Set up a plotter and plot a drawing.
Domain	Additional Technical Drawing
4802.D4.1	Distinguish between line types utilized on a technical drawing per industry standard (ANSI Line Conventions and Lettering Y14.2M-2008).
4802.D4.2	Interpret and develop appropriate annotations for technical drawings.
4802.D4.3	Differentiate between the various types of tolerances.
4802.D4.4	Analyze types of fits in relation to mating parts.
4802.D4.5	Collect and display data related to the sizes and shapes of objects utilizing various measuring tools.
4802.D4.6	Determine the appropriate number of views, including alternate views (auxiliary, section, detail), to fully document the details of a design.
4802.D4.7	Identify and produce various pictorial drawings including isometric, oblique, and perspective drawings for technical drawing representations.
4802.D4.8	Differentiate when the physical properties of geometric shapes can be utilized in order to optimize design solutions.
4802.D4.9	Apply industry accepted dimensioning practices to technical drawings to annotate design features.
4802.D4.10	Identify and produce multi-view drawings in proper orientation, scale, and proportion through methods of orthographic projection.
4802.D4.11	Illustrate and calculate mathematical problems related to real world situations involving characteristics of geometric shapes and solids.
Domain	Reverse Engineering
4802.D5.1	Identify visual, functional, and structural properties of a product.
4802.D5.2	Differentiate between invention and innovation.
4802.D5.3	Describe the relationship between reverse engineering and product/system improvement.
4802.D5.4	Create an innovation to a system or product using information obtained from a product analysis.
4802.D5.5	Evaluate the effectiveness of elements and principles in other design solutions and use analysis to revise original design.
4802.D5.6	Perform mathematical calculations to identify structural properties of a product.
Domain	Modeling
4802.D6.1	Formulate methods of communicating designs using various forms of modeling such as conceptual, graphical, mathematical, physical or computer modeling.
4802.D6.2	Utilize appropriate modeling materials to construct a physical model such as a prototype or mock-up.
4802.D6.3	Interpret the details of a sketch and generate physical or computer models using appropriate modeling materials and techniques.
4802.D6.4	Recognize and utilize constraints such as dimensional, geometric, assembly and parametric constraints in regard to modeling.
4802.D6.5	Identify the six degrees of freedom of a component floating in space in the context of an assembly.
4802.D6.6	Differentiate between assemblies and subassemblies and their appropriate use.
4802.D6.7	Use engineering design equipment (3D modeling software, 3D printer, etc.) to create 3D and

	2D models to document engineering design. (Move to modeling)
4802.D6.8	Analyze the remaining degrees of freedom of mating components after systematically applying assembly constraints until only desired components are allowed to move.
4802.D6.9	Apply visual design principles to enhance the aesthetic appeal of a design solution.
4802.D6.10	Analyze products or systems by identifying problematic features to generate potential solution(s).

Principles of Engineering	
Career Cluster	STEM
Program of Study	Engineering
NLPS Sequence	B
Course Code	5644
Course Description	<p><i>Principles of Engineering is a course that focuses on the process of applying engineering, technological, scientific and mathematical principles in the design, production, and operation of products, structures, and systems. This is a hands-on course designed to provide students interested in engineering careers to explore experiences related to specialized fields such as civil, mechanical, and materials engineering. Students will engage in research, development, planning, design, production, and project management to simulate a career in engineering. The topics of ethics and the impacts of engineering decisions are also addressed. Classroom activities are organized to allow students to work in teams and use modern technological processes, computers, CAD software, and production systems in developing and presenting solutions to engineering problems. Schools may use the PLTW curriculum to meet the standards for this course.</i></p> <p>NOTE: This course aligns with the PLTW Principles of Engineering curriculum. Use of the PLTW curriculum may require additional training and membership in the PLTW network.</p>
Prerequisite(s)/ Corequisite(s)	Introduction to Engineering Design
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas Fulfills a science course requirement for all diplomas Counts as a quantitative reasoning course
Dual Credit Status	X (PCL/CTE)

Competency #	Competency
Domain	<i>Project Management</i>
5644.D1.1	Students will exhibit appropriate safety practices while working with tools and equipment.
5644.D1.2	Demonstrate relevant safety practices when using tools and equipment as determined by task, materials, environment, and protective attire.
5644.D1.3	Apply corrective action(s) to eliminate hazards.
5644.D1.4	Understand the format and content of industry-based Material Safety Data Sheets (MSDS).
5644.D1.5	Students will investigate various careers within the fields of engineering and technology.
5644.D1.6	Identify engineering and technology occupations and the roles and responsibilities of each.
5644.D1.7	Report job outlook, demand, and projected wages for engineering and technology careers.
5644.D1.8	Explore job opportunities that are available in engineering and technology.
5644.D1.9	Investigate post-secondary training opportunities and industry certifications that are available.
5644.D1.10	Explore professional organizations related to engineering and technology.
5644.D1.11	Students will communicate the design process.
5644.D1.12	Explain the importance of documentation.
5644.D1.13	Apply sketching and annotation skills to document work.
5644.D1.14	Produce working drawings using appropriate drawing styles and techniques.

Next Level Programs of Study

Review Document

5644.D1.15	Construct design models or finish models to display concepts of design or theory investigated.
5644.D1.16	Document project components into an engineering notebook (digital or paper).
5644.D1.17	Communicate technical knowledge in a variety of formats.
5644.D1.18	Utilize presentation software to create a presentation that outlines team or individual priorities for design and share with peers.
5644.D1.19	Document best work in a portfolio (digital or paper).
5644.D1.20	Students will apply appropriate research techniques.
5644.D1.21	Formulate unbiased research questions to collect information/data.
5644.D1.22	Apply appropriate investigative strategies.
5644.D1.23	Evaluate sources appropriate for academic research.
5644.D1.24	Select resources relevant to the identified problem.
5644.D1.25	Synthesize information collected during the research process.
5644.D1.26	Generate a list of sources used to gather information using APA or MLA format.
Domain	Design and Documentation
5644.D2.1	Students will create solutions utilizing the design process.
5644.D2.2	Describe the steps in the design process.
5644.D2.3	Create a decision-making matrix for design problems.
5644.D2.4	Select an approach that meets or satisfies the constraints provided in a design brief.
5644.D2.5	Assess and refine original design solutions based upon reflection, critique, practice, and research.
5644.D2.6	Collaborate with team members to develop a design solution.
Domain	Energy and Power
5644.D3.1	Students adapt and apply energy and power concepts to develop an efficient system.
5644.D3.2	Categorize energy sources.
5644.D3.3	Analyze energy source processes.
5644.D3.4	Determine systems efficiency and energy use.
5644.D3.5	Identify and describe the possible types of power conversion.
5644.D3.6	Assess energy sources that can be combined to convert energy to useful forms.
5644.D3.7	Calculate circuit resistance, current, and voltage using Ohm's law.
5644.D3.8	Compare the advantages and disadvantages of parallel and series circuit design.
5644.D3.9	Analyze the relationships between voltage, current, and resistance.
5644.D3.10	Explore ways to produce mechanical power using alternative energy.
Domain	Statics
5644.D4.1	Students interpret science and math concepts to determine the effect of stresses placed on a structure and its components.
5644.D4.2	Classify different structural elements of a system.

Next Level Programs of Study

Review Document

5644.D4.3	Analyze forces acting upon an object in each situation.
5644.D4.4	Calculate the centroid location of simple and complex shapes.
5644.D4.5	Illustrate the moment of inertia of structural members.
5644.D4.6	Differentiate between scalar and vector.
5644.D4.7	Demonstrate appropriate scalar and vector calculations.
5644.D4.8	Calculate unknown forces using equations of equilibrium.
5644.D4.9	Determine forces acting on an object using the method of joints strategy.
Domain	Material Properties, Testing, and Structural Analysis
5644.D5.1	Students synthesize results of tested materials and structures to determine fitness of use.
5644.D5.2	Verify non-destructive/destructive material property tests on selected common products using measuring instruments, investigation methods of discovery, and assembly/disassembly of material components.
5644.D5.3	Analyze material properties used to create products.
5644.D5.4	Execute testing procedures to justify calculations of product mass properties in relation to various material properties.
5644.D5.5	Identify and describe the manufacturing processes used to create common products.
5644.D5.6	Describe the lifecycle of materials.
5644.D5.7	Identify common recycling symbols of materials and codes that regulate recycling.
Domain	Kinematics
5644.D6.1	Students apply the laws of motion as they apply to principles of engineering.
5644.D6.2	Demonstrate the calculation of projectile motion given parameters.
5644.D6.3	Examine the propulsion of an object.
5644.D6.4	Explain how gravity impacts motion.
5644.D6.5	Apply the laws of motion to solutions.
5644.D6.6	Analyze the forces acting on an object while in motion.
5644.D6.7	Describe the relationships among force, mass, and direction.
Domain	Simple Machines
5644.D7.1	Students evaluate simple machines for the purpose of solving a wide range of design and application problems.
5644.D7.2	Apply the six simple machines (lever, wheel and axle, pulley, inclined plane, wedge, and screw), their attributes, and components.
5644.D7.3	Calculate mechanical advantage of different mechanisms.
5644.D7.4	Design, create, and test gear, pulley, and sprocket systems.
5644.D7.5	Calculate work and power in mechanical systems.
5644.D7.6	Determine efficiency in a mechanical system.
5644.D7.7	Measure forces and distances related to mechanisms.
Domain	Statistics
5644.D8.1	Students apply basic statistical principles as it applies to project solutions.
5644.D8.2	Compare theoretical and experimental data

Next Level Programs of Study

Review Document

5644.D8.3	Use statistics to determine theoretical outcomes.
5644.D8.4	Illustrate the use of statistics in the engineering design process.
5644.D8.5	Determine probability and graph data and outcomes using software.
Domain	Hydraulics and Pneumatics
5644.D9.1	Students assess hydraulic and pneumatic systems for the purpose of use as a control system component.
5644.D9.2	Distinguish between hydrodynamic and hydrostatic systems.
5644.D9.3	Calculate values in a fluid power system (pneumatic and hydraulic).
5644.D9.4	Distinguish between the laws of fluid power to calculate pressure, temperature, and volume.
5644.D9.5	Differentiate between the characteristics of pneumatic and hydraulic systems.
5644.D9.6	Identify and explain basic components and functions of fluid power devices.
Domain	Control Systems
5644.D10.1	Students apply concepts of computer programming, logic, and fluid power to establish an automated control system.
5644.D10.2	Create control systems using computer software that optimizes hardware functionality.
5644.D10.3	Choose appropriate input and output devices based on the need of a technological system.
5644.D10.4	Differentiate between the characteristics of digital and analog devices.
5644.D10.5	Determine the most appropriate open and closed loop systems to solve a given technological problem.
5644.D10.6	Describe applications of process control and automation systems.
5644.D10.7	Apply design concepts to problems in process control and automations systems.

Aerospace Engineering	
Career Cluster	STEM
Program of Study	Engineering
NLPS Sequence	C
Course Code	5518
Course Description	<p><i>Aerospace Engineering should provide students with the fundamental knowledge and experience to apply mathematical, scientific, and engineering principles to the design, development, and evolution of aircraft, space vehicles and their operating systems. Emphasis should include investigation and research on flight characteristics, analysis of aerodynamic design, and impact of this technology on the environment. Classroom instruction should provide creative thinking and problem-solving activities using software that allows students to design, test, and evaluate a variety of air and space vehicles, their systems, and launching, guidance and control procedures.</i></p> <p>NOTE: This course aligns with the PLTW Aerospace Engineering curriculum. Use of the PLTW curriculum may require additional training and membership in the PLTW network.</p>

5518.D1.19	Document best work in a portfolio (digital or paper).
5518.D1.20	Students will apply appropriate research techniques.
5518.D1.21	Formulate unbiased research questions to collect information/data.
5518.D1.22	Apply appropriate investigative strategies.
5518.D1.23	Evaluate sources appropriate for academic research.
5518.D1.24	Select resources relevant to the identified problem.
5518.D1.25	Synthesize information collected during the research process.
5518.D1.26	Generate a list of sources used to gather information using APA or MLA format.
Domain	Basic Aerodynamics
5518.D2.1	Students evaluate the design of an airfoil to analyze aerodynamic forces.
5518.D2.2	Calculate associated forces and atmospheric conditions that affect flight.
5518.D2.3	Identify the control surfaces of an aircraft and the impact of each on the axis of rotation and motion.
5518.D2.4	Utilize information from avionics systems to provide stable and controlled flight.
5518.D2.5	Hypothesize the flight characteristics of an aerospace surface based on test data.
5518.D2.6	Investigate the historical impact of the design of aerospace technologies.
5518.D2.7	Compare and contrast the various methods by which different aerospace technologies achieve and maintain stable flight.
Domain	Aerospace Materials
5518.D3.1	Students validate the selection of materials and processes to produce cost-effective and structurally sound aerospace products.
5518.D3.2	Describe how various material types are used.
5518.D3.3	Analyze the impact of stress on the different material types to infer the best application.
5518.D3.4	Differentiate between proper and improper structural shapes within specific aerospace applications.

Next Level Programs of Study

Review Document

5518.D3.5	Design, construct, and test alternative aerospace material.
5518.D3.6	Predict the future of aerospace materials and their impact on air and space travel
Domain	Propulsion Systems
5518.D4.1	Students evaluate differing methods of propulsion to verify the proper application given a specific aerospace need.
5518.D4.2	Differentiate between the various types of propulsion systems in terms of structure, operation, placement, and specific use.
5518.D4.3	Predict and explain the flight path taken by a suborbital rocket.
5518.D4.4	Connect propulsion systems to the four forces of flight.
Domain	Avionics and Flight Systems
Core Standard 4	Students apply and adapt navigation tools and skills to demonstrate the rules of flight planning and navigation.
ASE-4.1	Cite evidence for the development of different navigational techniques.
ASE-4.2	Plan a successful flight using modern (GPS) and traditional (VOR and “dead-reckoning”) navigation aids.
ASE-4.3	Analyze the constraints that impact cost effective flight planning.
ASE-4.4	Assess the functionality of GPS in terms of accuracy and reliability.
Domain	Space Travel
5518.D5.1	Students investigate space systems to better understand the correlation between space travel and orbital mechanics.
5518.D5.2	Justify the regulation of the use of space.
5518.D5.3	Describe the history of space travel emphasizing the impact of the space race on society.
5518.D5.4	Utilize Kepler’s Laws to describe and predict the path of an orbiting satellite
Domain	Aerospace Physiology
5518.D6.1	Students understand the limitations of space travel due to human physiology.
5518.D6.2	Identify flight constraints based on the limitations of the human body.
5518.D6.3	Investigate human involvement in aerospace incidents.
5518.D6.4	Suggest modifications for flight control based upon structure and function of the human body.
5518.D6.5	Justify the use of unmanned aerial vehicles (UAVs) based on the limitations imposed on flight by humans.
5518.D6.6	Examine the effects of spaceflight on the human body.
5518.D6.7	Prescribe accommodations used during short-term and long-term space travel to maintain functioning body systems.
Domain	Alternative Applications of Aerospace Engineering
5518.D7.1	Students investigate non-flight applications of aerospace engineering concepts.
5518.D7.2	Correlate processes used in aerospace engineering design to profitability, cost effectiveness, and impact on the environment.
5518.D7.3	Develop a working system that can operate remotely and/or autonomously at a remote location.
5518.D7.4	Differentiate amongst the various control systems used in distant operations.
5518.D7.5	Determine the obstacles to delivering and operating a system at a remote location.
5518.D7.6	Justify the need for unmanned aerial and terrestrial vehicles for both military and civilian purposes.

Civil Engineering and Architecture	
Career Cluster	STEM
Program of Study	Engineering
NLPS Sequence	C
Course Code	5650
Course Description	<p><i>Civil Engineering and Architecture introduces students to the fundamental design and development aspects of civil engineering and architectural planning activities. Application and design principles will be used in conjunction with mathematical and scientific knowledge. Computer software programs should allow students opportunities to design, simulate, and evaluate the construction of buildings and communities. During the planning and design phases, instructional emphasis should be placed on related transportation, water resource, and environmental issues. Activities should include the preparation of cost estimates as well as a review of regulatory procedures that would affect the project design.</i></p> <p>NOTE: This course aligns with the PLTW Civil Engineering and Architecture curriculum. Use of the PLTW Curriculum may require additional training and membership in the PLTW network.</p>

5650.D1.22	Apply appropriate investigative strategies.
5650.D1.23	Evaluate sources appropriate for academic research.
5650.D1.24	Select resources relevant to the identified problem.
5650.D1.25	Synthesize information collected during the research process.
5650.D1.26	Generate a list of sources used to gather information using APA or MLA format.
Domain	<i>History in Architecture and Civil Engineering</i>
5650.D2.1	Students evaluate historical structures to understand the evolution of design elements, structural components and material used.
5650.D2.2	Identify and describe multiple architectural styles that are major milestones in the design and development of structures.
5650.D2.3	Analyze the influence technology innovations have had on the design and construction of structures.
5650.D2.4	Identify advancements related to architectural design, engineering, and technological advancements through history and how those innovations have changed the way structures are designed.
5650.D2.5	Compare modern structural and architectural design to historical designs.
Domain	<i>Architectural Design, Cost & Efficiency</i>
5650.D3.1	Students assess architectural design to incorporate the use of spatial relationships, building layout, and costs into a design project.
5650.D3.2	Describe connections between architectural disciplines and engineering disciplines and their roles in the design and construction process.
5650.D3.3	Demonstrate the importance of focusing on detail when executing the design process.
5650.D3.4	Examine concepts related to the Principles of Design and Elements of Design.
5650.D3.5	Apply the steps of the design process to solve a variety of architectural design problems.
5650.D3.6	Demonstrate the use of math skills to calculate material costs associated with the construction of commercial and residential structures.
5650.D3.7	Demonstrate how to calculate basic heat loss/heat gain of a structure.
5650.D3.8	Identify and describe common materials used in the construction of a building or residential structure.
5650.D3.9	Identify and implement the use of Universal Design principles as part of a design solution.
5650.D3.10	Analyze and incorporate sustainable building practices into a design solution.
5650.D3.11	Interpret and use an engineering and architectural scale to measure and determine sizes of elements on a printed drawing.
5650.D3.12	Recognize and distinguish the basic types of floor plans styles associated with architectural design.
Domain	<i>Residential Building Design</i>
5650.D4.1	Students establish a base knowledge of residential design concepts to develop a set of construction documents.
5650.D4.2	Develop a program and scope document to identify a client's needs for a residential structure.

Next Level Programs of Study

Review Document

5650.D4.3	Apply basic design guidelines and practices for the development of private, public and services spaces within a residential structure.
5650.D4.4	Develop and document a plot plan or site plan for a residence considering drainage, property improvements, utilities, and dwelling footprint.
5650.D4.5	Design and document footings and foundations for a residential structure.
5650.D4.6	Design and document a residential floor plan using the accepted industry standards related to drawing scale, symbols, annotation and drawing techniques.
5650.D4.7	Design and document exterior and interior elevations.
5650.D4.8	Identify the appropriate materials to be used in residential construction in accordance with geographical location, building codes, and style of dwelling.
5650.D4.9	Analyze and apply building codes and zoning codes for use in constructing a residential structure.
5650.D4.10	Identify components of residential framing systems.
5650.D4.11	Determine the advantages and disadvantages between different residential roof designs per geographical location and client design requirements.
5650.D4.12	Analyze a residential structure to identify how the implementation of green architecture in the design and construction impacts the environment.
5650.D4.13	Utilize computer-aided design (CAD) software to develop design and construction documentation for a residential structure.
5650.D4.14	Design and document required details and sections associated with residential structures.
Domain	Commercial Building Design
5650.D5.1	Students establish a base knowledge to identify commercial building materials, building codes, and design concepts to develop a set of construction documents.
5650.D5.2	Identify and compare the similarities and the differences between commercial and residential building systems.
5650.D5.3	Identify and compare the similarities and the differences between residential and commercial design related to local, state, and national building codes.
5650.D5.4	Evaluate zoning regulations for the allowable use of property.
5650.D5.5	Identify the appropriate materials and their assembly to create a wall system for a commercial structure in accordance with geographical location, building codes, and style of the structure.
Domain	Structural Components and Design
5650.D6.1	Students connect through terminology and mathematics the structural components of commercial and residential design to apply loads on a structure including beams, girders, columns, and footings.
5650.D6.2	Determine the appropriate roof beams to carry the calculated load able to support the design load of a structure.
5650.D6.3	Determine the design load conditions for beams and girders within a structure.
5650.D6.4	Construct free body diagramming to demonstrate the structural analysis of supported beams.
5650.D6.5	Determine required floor loading of a structure and determine how it affects support elements within a structure.

Next Level Programs of Study

Review Document

5650.D6.6	Identify and select the proper commercial foundation systems by material and use of the system.
5650.D6.7	Determine and analyze design loads transferred from the structure to the ground.
5650.D6.8	Use structural analysis software to verify determined analysis of supported beams and girders.
Domain	Building Systems
5650.D7.1	Students properly size and integrate building systems related to mechanical, electrical, and plumbing (MEP) disciplines while conserving natural resources for residential and commercial structures.
5650.D7.2	Identify code requirements for the installation of mechanical, electrical, and plumbing (MEP) disciplines for a structure.
5650.D7.3	Read and interpret mechanical, electrical, and plumbing (MEP) discipline construction drawings.
5650.D7.4	Realize the requirements by an architect to understand how mechanical, electrical, and plumbing (MEP) discipline designs are designed and constructed within a structure.
5650.D7.5	Describe and analyze the appropriate options for the management of wastewater for a structure.
5650.D7.6	Examine how the placement of utilities effect design of the structure.
5650.D7.7	Assess mechanical, electrical, and plumbing systems for energy conservation techniques determined by geographic location.
Domain	Surveying & Hydrology
5650.D8.1	Students connect land surveying equipment components and theory to architectural and civil engineering projects to evaluate how land surveying impacts design and construction.
5650.D8.2	Analyze a site by performing a level survey.
5650.D8.3	Classify soil samples relevant to structure designs and their effect on a foundation system.
5650.D8.4	Analyze pre and post development stormwater run-off and implement a design solution associated with the change in stormwater run-off.
5650.D8.5	Compare and contrast site design factors and the impacts on the environment and surrounding properties.
5650.D8.6	Demonstrate site planning with consideration of local, state, and national building codes and client program/scope requirements.
5650.D8.7	Analyze drainage patterns, vegetation, and construction materials to determine the impact of design elements and methods to modify the surrounding terrain.
5650.D8.8	Recognize and distinguish between the different types of surveying and key vocabulary associated with the survey discipline.
5650.D8.9	Calculate cut and fill operations for a requirement on a site for the acquisition or disposal of soil.

Computer Integrated Manufacturing	
Career Cluster	STEM
Program of Study	Engineering
NLPS Sequence	C
Course Code	5534
Course Description	<p><i>Computer Integrated Manufacturing is a course that applies principles of rapid prototyping, robotics, and automation. This course builds upon the computer solid modeling skills developed in Introduction of Engineering Design. Students will use computer controlled rapid prototyping and CNC equipment to solve problems by constructing actual models of their three-dimensional designs. Students will also be introduced to the fundamentals of robotics and how this equipment is used in an automated manufacturing environment. Students will evaluate their design solutions using various techniques of analysis and make appropriate modifications before producing their prototypes.</i></p> <p>NOTE: This course aligns with the PLTW Computer Integrated Manufacturing curriculum. Use of the PLTW curriculum may require additional training and membership in the PLTW network.</p>
Prerequisite(s)/ Corequisite(s)	Introduction to Engineering Design
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas Counts as a quantitative reasoning course
Dual Credit Status	X (PCL/CTE)

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Project Management</i>
5534.D1.1	Students will exhibit appropriate safety practices while working with tools and equipment.
5534.D1.2	Demonstrate relevant safety practices when using tools and equipment as determined by task, materials, environment, and protective attire.
5534.D1.3	Apply corrective action(s) to eliminate hazards.
5534.D1.4	Understand the format and content of industry-based Material Safety Data Sheets (MSDS).
5534.D1.5	Students will investigate various careers within the fields of engineering and technology.
5534.D1.6	Identify engineering and technology occupations and the roles and responsibilities of each.
5534.D1.7	Report job outlook, demand, and projected wages for engineering and technology careers.
5534.D1.8	Explore job opportunities that are available in engineering and technology.
5534.D1.9	Investigate post-secondary training opportunities and industry certifications that are available.
5534.D1.10	Explore student professional organizations related to engineering and technology.
5534.D1.11	Students will communicate the design process.
5534.D1.12	Explain the importance of documentation.
5534.D1.13	Apply sketching and annotation skills to document work.
5534.D1.14	Produce working drawings using appropriate drawing styles and techniques.
5534.D1.15	Construct design models or finish models to display concepts of design or theory investigated.
5534.D1.16	Document project components into an engineering notebook (digital or paper).
5534.D1.17	Communicate technical knowledge in a variety of formats.
5534.D1.18	Utilize presentation software to create a presentation that outlines team or individual priorities for design and share with peers.
5534.D1.19	Document best work in a portfolio (digital or paper).
5534.D1.20	Students will apply appropriate research techniques.
5534.D1.21	Formulate unbiased research questions to collect information/data.
5534.D1.22	Apply appropriate investigative strategies.
5534.D1.23	Evaluate sources appropriate for academic research.
5534.D1.24	Select resources relevant to the identified problem.
5534.D1.25	Synthesize information collected during the research process.

Next Level Programs of Study

Review Document

5534.D1.26	Generate a list of sources used to gather information using APA or MLA format.
Domain	Drawing Development and Communication in a Manufacturing Environment
5534.D2.1	Students demonstrate the use of computer-aided design (CAD) software to effectively integrate communication the design process, possible solution, and execution of a project skills to solve a problem.
5534.D2.2	Connect knowledge of diverse cultures, including global and historical perspectives, to the manufacturing environment.
5534.D2.3	Recognize the impact of manufacturing processes on the environment.
5534.D2.4	Demonstrate the ability to use CAD/CAM Systems.
5534.D2.5	Utilize computer software for 2D profiling sketching functions.
5534.D2.6	Define sketched objects with dimensions and geometric constraints.
5534.D2.7	Identify the fundamentals of creating assembly models.
5534.D2.8	Demonstrate the proper application of annotations and reference dimensions while conforming to established drafting standards.
5534.D2.9	Inspect drawings for industry associated geometric, dimensioning, and tolerance (GD&T) standards.
5534.D2.10	Update model and drawing views using revision specification sheets.
5534.D2.11	Generate an assembly drawing, which includes views, balloons, and bills of material.
5534.D2.12	Recognize the wide array of industry-wide prototyping methods in use.
5534.D2.13	Choose the appropriate manufacturing process for a prototype.
Domain	Robotics
5534.D3.1	Students evaluate the history and principles of robotics so they can determine a need for robots.
5534.D3.2	Discuss the chronological development of automation leading to robotics.
5534.D3.3	Identify the positive impact robots have on manufacturing.
5534.D3.4	Students establish knowledge of robotics so they can effectively select and manipulate the proper robot for the task.
5534.D3.5	Define a robot.
5534.D3.6	Describe the basic components of robots and their capabilities.
5534.D3.7	Classify different types of robots.
5534.D3.8	Compare and implement various robotics coordinate systems, paths and work envelopes and their uses.
5534.D3.9	Analyze and compare the various drive systems used in robotics.
5534.D3.10	Analyze the degrees of freedom and axis of motion in different types of robots.
5534.D3.11	Differentiate control techniques in real and in computer simulations.
5534.D3.12	Apply concepts of physics to an automated manufacturing environment.
5534.D3.13	Describe the necessity for specialty tooling applications in robotics.
5534.D3.14	Design, program, and troubleshoot robotics systems.
Domain	CNC
5534.D4.1	Students evaluate the history and principles of computer numeric control so they can determine the need for CNC equipment.
5534.D4.2	Explain the history of computer-controlled machines charting the growth of numerical control (NC) and how it has been implemented into private industry.
5534.D4.3	Explain how the application of CNC machines has impacted manufacturing.
5534.D4.4	Explain the advantages and disadvantages of CNC machining.

Next Level Programs of Study

Review Document

5534.D4.5	Students evaluate proper methods for the setup and execution of CNC machining.
5534.D4.6	Examine different types of tool-holding devices used in CNC machine tools.
5534.D4.7	Describe the difference between reference and position points.
5534.D4.8	Plot points using absolute, relative (incremental) and polar coordinates.
5534.D4.9	Identify the optimum location for the Point of Reference (PRZ).
5534.D4.10	Complete a preliminary planning sheet to identify necessary work holding devices, cutting tools, reference points, machining sequences and safe operation.
5534.D4.11	Compare and contrast shop floor programming with offline programming.
5534.D4.12	Demonstrate the ability to safely set up, maintain, and operate a CNC machine center using appropriate documentation and procedures.
5534.D4.13	Examine part geometry to select appropriate cutting tools and fixturing devices needed to create the part using a CNC machine.
5534.D4.14	Set up and edit the tool library of a CNC control program, providing offset values and tool geometry.
5534.D4.15	Calculate and verify appropriate spindle speeds and feed rates specific to each cutting tool utilized in an NC part program.
5534.D4.16	Verify NC part programs using simulation software before machining the part on a CNC device.
5534.D4.17	Follow a safety checklist before running an NC part program on a CNC machine.
5534.D4.18	Perform a dry run to verify the machine setup and program operation.
5534.D4.19	Students integrate computer aided manufacturing (CAM) systems to develop alpha-numeric codes.
5534.D4.20	Demonstrate the ability to operate the user interface with various CAM systems.
5534.D4.21	Demonstrate the ability to import and export CAD files using a CAM package.
5534.D4.22	Set up a CAM package by editing the material and tool libraries, defining stock sizes, selecting the appropriate post processor, and defining the units of measure to be used.
5534.D4.23	Define and apply the fundamental and advanced milling and turning procedures used in manufacturing processes.
Domain	Automation
5534.D5.1	Students evaluate the benefits of automated manufacturing.
5534.D5.2	Describe how the individual components of a flexible manufacturing system (FMS) are interrelated.
5534.D5.3	Recognize the benefits and problems associated with CIM technology and how they impact the manufacturing process.
5534.D5.4	Justify the need for computer integrated manufacturing within an organization.
5534.D5.5	Identify the typical components and subsystems that make up an automated machining, assembly, and process-type manufacturing operation.
5534.D5.6	Compare and contrast the benefits and drawbacks of the three categories of CIM systems.
5534.D5.7	Students apply concepts of machine communication to develop manufacturing processes.
5534.D5.8	Recognize the necessary safety precautions associated with a fully automated CIM system.
5534.D5.9	Develop machine order of operations.
5534.D5.10	Examine computer logic and scanning sequence in automated controls.
5534.D5.11	Describe the common parts of programmable logic controllers (PLC).
5534.D5.12	Design, program, and troubleshoot PLC systems.
5534.D5.13	Recognize the working relationship between the CNC mill and the robot.

Next Level Programs of Study

Review Document

5534.D5.14	Demonstrate how individual components work together to form a complete CIM system.

Digital Electronics	
Career Cluster	STEM
Program of Study	Engineering; Electronics and Computer Technology
NLPS Sequence	C
Course Code	5538
Course Description	<p><i>Digital Electronics is a course of study in applied digital logic that encompasses the design and application of electronic circuits and devices found in video games, watches, calculators, digital cameras, and thousands of other devices. Instruction includes the application of engineering and scientific principles as well as the use of Boolean algebra to solve design problems. Using computer software that reflects current industry standards, activities should provide opportunities for students to design, construct, test, and analyze simple and complex digital circuitry software will be used to develop and evaluate the product design. This course engages students in critical thinking and problem-solving skills, time management and teamwork skills.</i></p> <p>NOTE: This course aligns with the PLTW Digital Electronics curriculum. Use of the PLTW curriculum may require additional training and membership in the PLTW network.</p>

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Lab and Electrical Wiring Safety
5538.D1.1	Students apply concepts of lab and electrical wiring safety to ensure a safe work environment.
5538.D1.2	Demonstrate wearing safety attire and following all classroom procedures related to safety.
5538.D1.3	Demonstrate methods to avoid electric shock by identifying the causes.
5538.D1.4	Utilizing environmentally sustainable design principles, design electronic circuits that reduce the negative impact on the environment while maintaining functions and safety.
5538.D1.5	Students will establish a working and functional knowledge of the software and equipment used in designing and troubleshooting circuits.
5538.D1.6	Create and test circuits using circuit design software.
5538.D1.7	Determine values associated with resistance, voltage, current and continuity using a digital multimeter.
5538.D1.8	Demonstrate successful soldering and desoldering techniques.
5538.D1.9	Demonstrate breadboarding techniques to build a working circuit.
Domain	Basic Laws of Electricity
5538.D2.1	Distinguish the parts of the atomic structure and how it plays a part in determining what elements are good conductors, insulators, and semi-conductors.
5538.D2.2	Define and explain Alternating Current (AC) and Direct Current (DC).
5538.D2.3	Distinguish between conventional current flow versus electron current flow and how they apply to engineering and scientific disciplines.
5538.D2.4	Design circuit boards that demonstrate the theory and principles associated with that of a complex circuit.

Next Level Programs of Study

Review Document

5538.D2.5	Calculate resistance, current and voltage in simple series, parallel and complex circuits using Ohm's Law.
5538.D2.6	Demonstrate the use of Kirchhoff's Voltage Law applied to simple series and complex circuits.
5538.D2.7	Demonstrate the use of Kirchhoff's Current Law for simple parallel and complex series-parallel circuits.
Domain	Electrical Components
5538.D3.1	Students apply concepts of the basic electrical components to design and create circuits.
5538.D3.2	Identify resistors by determining their nominal value.
5538.D3.3	Describe the material makeup of resistors and their application to circuit design.
5538.D3.4	Recognize industry standard symbols associated with resistors and their operation in schematic design.
5538.D3.5	Compare and contrast the measured value of a resistor to the calculated tolerance.
5538.D3.6	Identify the component parts of a capacitor, the types of capacitors available, ability to capture and contain static charge and voltage polarity requirements.
5538.D3.7	Identify and describe the unit of measure for capacitors.
5538.D3.8	Calculate the nominal values of different capacitors and their voltage polarity requirements.
5538.D3.9	Investigate types, functions, and power requirements of integrated circuits (logic gates).
5538.D3.10	Demonstrate the differences between an analog and cathode seven segment display.
Domain	Combinational Logic
5538.D4.1	Students apply the laws of motion as they apply to principles of engineering.
5538.D4.2	Demonstrate the calculation of projectile motion given parameters.
5538.D4.3	Examine the propulsion of an object.
5538.D4.4	Explain how gravity impacts motion.
5538.D4.5	Apply the laws of motion to solutions.
5538.D4.6	Analyze the forces acting on an object while in motion.
5538.D4.7	Describe the relationships among force, mass, and direction.
Domain	Simple Machines
5538.D5.1	Students create, analyze, and simplify digital logic circuits utilizing combinational logic.
5538.D5.2	Create truth tables and Boolean expressions for basic logic gates.
5538.D5.3	Demonstrate the relationship between the Boolean expression, logic diagram, and the truth table.
5538.D5.4	Design Boolean expressions, logic circuit diagrams or truth tables from information provided in a design problem.
5538.D5.5	Select the Sum-of-Products (SOP) or the Products-of-Sums (POS) form of a Boolean expression to use in the solution of a design problem.
5538.D5.6	Apply the rules of Boolean algebra to logic diagrams and truth tables to minimize the circuit size necessary to solve a design problem.
5538.D5.7	Apply DeMorgan's theory to simplify a negated expression to reduce resources used in the design and production of circuits.
5538.D5.8	Formulate and employ a Karnaugh Map to reduce Boolean expressions and logic circuits to their simplest forms.

Next Level Programs of Study

Review Document

5538.D5.9	Create circuits to solve a problem using NAND or NOR gates to replicate all combinational logic functions.
5538.D5.10	Generate simplified schematics to design problems using logic gates and symbolic algebra.
Domain	AC/DC Current Waveform
5538.D6.1	Students analyze the characteristics of waveforms and voltage generation associated with AC and DC current.
5538.D6.2	Identify the anatomy of the waveform associated with AC and DC current.
5538.D6.3	Analyze both analog and digital waveforms
5538.D6.4	Differentiate between digital and analog signals when given a waveform.
5538.D6.5	Design, create and test circuits to calculate the output frequency of circuits using observations and the oscilloscope.
5538.D6.6	Calculate the duty cycle associated with a digital waveform using observations and the oscilloscope.
Domain	Sequential Logic (Flip-Flops)
5538.D7.1	Students create, analyze, and simplify digital logic circuits utilizing combinational and sequential logic.
5538.D7.2	Examine how to operate a circuit using sequential logic.
5538.D7.3	Compare and contrast between the different kinds of flip-flops.
5538.D7.4	Construct circuits and evaluate information about the various applications of flip-flops.
5538.D7.5	Demonstrate the differences associated with asynchronous and synchronous circuits.
5538.D7.6	Compare and evaluate how sequential logic determines the operation of a circuit waveform and how a truth table can be used to predict an outcome.
5538.D7.7	Use of flip-flops or latches to store data, act as a memory device or transfer data through a shift register.
5538.D7.8	Determine the proper selection and use of a small-scale integrated circuit (SSI) and medium scale integrated circuit (MSI).
Domain	Number Systems, Simplifying
5538.D8.1	Students convert and calculate number systems and sequences to simplify problems.
5538.D8.2	Convert numbers between the binary, hexadecimal, octal and decimal number systems.
5538.D8.3	Translate design specifications into truth tables using binary numbering system language.
5538.D8.4	Construct truth tables from logic expressions and vice versa.
5538.D8.5	Understand least significant bit and most significant bit numerical place value within a numbering system.
5538.D8.6	Use mathematical symbols to represent bases and communicate concepts using different number systems.
5538.D8.7	Demonstrate the relationship of binary and hexadecimal to bits and bytes of information used in computers.
5538.D8.8	Design, construct, and test adder circuits using both discrete and MSI gates to perform basic addition and subtraction using a binary numbering system.
5538.D8.9	Convert any number using appropriate SI unit prefixes.
Domain	Programmable Logic Devices, State Machines, and Microprocessors

Next Level Programs of Study

Review Document

5538.D9.1	Students design and create a microprocessor to understand the impact of design, creation, and implementation of a processor.
5538.D9.2	Understand how programmable logic devices (PLDs) are used to build and execute the operation of a circuit.
5538.D9.3	Develop an understanding of a state bubble and state diagram.
5538.D9.4	Construct a state transition table and derive equations for outputs at each state.
5538.D9.5	Construct a state machine circuit using multiple inputs and outputs.
5538.D9.6	Formulate a flowchart/pseudocode to correctly apply basic programming concepts in the planning of a project.
5538.D9.7	Execute a program using a microprocessor.

Environmental Sustainability	
Career Cluster	STEM
Program of Study	Engineering
NLPS Sequence	C
Course Code	4818
Course Description	<i>Environmental Sustainability is a specialization course that builds upon prior knowledge learned in previous engineering and science courses. Students investigate and design solutions in response to current challenges such as providing the world with clean and abundant drinking water, an adequate food supply, and renewable energy. Students are introduced to environmental issues and use the engineering design process to design, build, and test potential solutions. This course engages critical thinking and problem-solving skills as students apply and extend their knowledge through designing experiments, managing projects, conducting research, and creating presentations to communicate solutions.</i>
Prerequisite(s)/ Corequisite(s)	Introduction to Engineering Design
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas Fulfills a science course requirement for all diplomas If PLTW curriculum is used, PLTW training is required of the teacher
Dual Credit Status	X

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
4818.D1.1	Students consider systematic, ethical, and safe solutions to environmental problems.
4818.D1.2	Apply the steps of the design process to environmental sustainability problems.
4818.D1.3	Apply a professional code of ethics to environmentally sustainable solutions.
4818.D1.4	Apply safety practices when using materials, tools, and equipment.
4818.D1.5	Demonstrate proper use of aseptic techniques and containment measures.
4818.D1.6	Utilize specialized equipment appropriately.
4818.D1.7	Students will examine how engineering and technology can impact natural and engineered environments.
4818.D1.8	Investigate principles and practices of sustainability.
4818.D1.9	Analyze local and global impacts of engineered solutions on the environment, society, and the

Next Level Programs of Study

Review Document

	economy.
4818.D1.10	Identify examples of how biogeochemical processes inform and constrain engineered solutions.
4818.D1.11	Discuss examples of interconnectedness and interdependence of social, environmental, and economic systems.
4818.D1.12	Outline strategies that enable the identification and analysis of direct and indirect impacts of an engineered solution.
4818.D1.13	Students will explore and generate solutions to manage and protect water resources.
4818.D1.14	Evaluate case studies of shortages, contamination, and inadequate distribution of water supplies around the world.
4818.D1.15	Analyze direct and indirect use of water in our daily activities to determine the impact of lifestyle and diet on personal water usage.
4818.D1.16	Compare and contrast water usage from a personal and global perspective.
4818.D1.17	Evaluate water quality using biological and chemical methods to test for the presence of contaminants.
4818.D1.18	Design and construct a water purification device to remediate contaminated water.
4818.D1.19	Measure how effectively a water purification device removes contaminants.
4818.D1.20	Investigate how biological organisms can be used to accelerate water remediation.
4818.D1.21	Examine the effects of human activity on local and global water supplies.
4818.D1.22	Evaluate methods of remediation, purification, and treatment of water sources and wastewater.
4818.D1.23	Design and evaluate a system to remediate a local water supply after becoming polluted or contaminated.
4818.D1.24	Students will use biotechnology to investigate and propose solutions for world food security.
4818.D1.25	Examine threats to world food security.
4818.D1.26	Compare and contrast biotechnological and social solutions to world food security.
4818.D1.27	Analyze social, economic, and biological constraints and benefits to utilizing genetically modified organisms.
4818.D1.28	Extract and modify DNA from living cells to demonstrate application of the molecular biology principles required to perform this function.
4818.D1.29	Apply genetic engineering processes to modify an organism to solve a world food security problem.
4818.D1.30	Design a bio-engineered solution to a food security problem.
4818.D1.31	Students will explore, evaluate, and propose solutions to global energy demands using renewable energy sources.
4818.D1.32	Compare and contrast energy use from a personal and global perspective.
4818.D1.33	Analyze the types of energy systems used around the world.
4818.D1.34	Predict future energy needs in Indiana, the United States, and the world, based on current and historical data.
4818.D1.35	Use instrumentation to measure and quantify biological processes that generate biofuels.
4818.D1.36	Evaluate the role of renewable energy in a sustainable energy mix.
4818.D1.37	Describe processes used in industry to create biofuels.
4818.D1.38	Create a plan for an industrial scale application of a biofuel production process.
4818.D1.39	Produce precursors or biofuel products using living organisms such as algae and yeast.
4818.D1.40	Students will explore environmental science, engineering, and biotechnology related careers.

Next Level Programs of Study

Review Document

4818.D1.41	Investigate careers relating to environmental science, engineering, and biotechnology.
4818.D1.42	Analyze education and skill requirements for environmental science, engineering, and biotechnology professions.
4818.D1.43	Explore the outlook, demand, and projected wages for environmental science, engineering, and biotechnology careers.

Engineering Design and Development

Career Cluster	STEM
Program of Study	Engineering
NLPS Sequence	D
Course Code	5698
Course Description	<p><i>Engineering Design and Development is an engineering research course in which students work in teams to research, design, test, and construct a solution to an open-ended engineering problem. The product development life cycle and a design process are used to guide the team to reach a solution to the problem. The team and/or individual(s) communicates their solution to a panel of stakeholders at the conclusion of the course. As the capstone course in the Engineering Pathway, EDD engages students in critical thinking, problem-solving, time management, and teamwork skills.</i></p> <p>NOTE: This course aligns with the PLTW Engineering Design and Development curriculum. Use of the PLTW curriculum may require additional training and membership in the PLTW network.</p>
Prerequisite(s)/ Corequisite(s)	Introduction to Engineering Design; Principles of Engineering; and one pre-engineering specialty course
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas Counts as a quantitative reasoning course
Dual Credit Status	X (PCL/CTE)
Additional Notes

Introduction to Engineering Design	
Career Cluster	STEM
Program of Study	Design Technology, Electronics and Computer Technology, Engineering
NLPS Sequence	A
Course Code	4802
Course Description	<i>Introduction to Engineering Design is a fundamental pre-engineering course where students become familiar with the engineering design process. Students work both individually and in teams to design solutions to a variety of problems using industry standard sketches and current 3D design and modeling software to represent and communicate solutions. Students apply their knowledge through hands-on projects and document their work with the use of an engineering notebook. Students begin with completing structured activities and move to solving open-ended projects and problems that require them to develop planning, documentation, communication, and other professional skills. Ethical issues related to professional practice and product development are also presented. NOTE: This course aligns with the PLTW Introduction to Engineering Design curriculum. Use of the PLTW curriculum may require additional training and membership in the PLTW network.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	NOTE: Schools that have agreed to be part of the Project Lead the Way network must follow all training and data collection requirements.

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	<i>Intro to Design</i>
4802.D1.1	Exercise file management and printing/plotting practices.
4802.D1.2	Understand the role of various types of drawings as applied to the design process.
4802.D1.3	Research potential career fields in Design Technology and Engineering.
4802.D1.4	Effectively communicate spatial visualizations with appropriate choices of technical drawings.
4802.D1.5	Demonstrate appropriate application of drawing standards to technical sketches and working

Next Level Programs of Study

Review Document

	drawings.
4802.D1.6	Collaborate in a studio setting.
4802.D1.7	Demonstrate relevant safety practices when using tools and equipment as determined by task, materials, environment, and protective attire.
4802.D1.8	Apply corrective action(s) to eliminate hazards.
4802.D1.9	Explain the importance of design documentation.
4802.D1.10	Apply sketching and annotation skills to document work.
4802.D1.11	Produce working drawings using appropriate drawing styles and techniques.
4802.D1.12	Formulate unbiased research questions to collect information/data and apply investigative strategies.
4802.D1.13	Select resources that are appropriate for academic research and relevant to the identified problem.
4802.D1.14	Discuss historical and current events related to engineering and technology and analyze the impact on society.
4802.D1.15	Discuss the importance of ethics in engineering design.
4802.D1.16	Synthesize information collected during the research process.
Domain	Design Process
4802.D2.1	Describe the steps in the design process.
4802.D2.2	Generate a valid and justifiable problem.
4802.D2.3	Create a design brief by constructing a problem and design statement and identifying problem constraints.
4802.D2.4	Apply the steps of the design process as they are used to solve the problem.
4802.D2.5	Describe the iterative nature of the design loop.
4802.D2.6	Discuss how the design process impacts the outcome when designing solutions to problems.
4802.D2.7	Implement design briefs in the problem-solving process.
4802.D2.8	Collaborate on engineering projects by working in design teams to solve valid problems.
4802.D2.9	Examine a design (product) with respect to its quality and usability.
4802.D2.10	Assess and refine original design solutions based upon reflection, critique, practice, and research.
Domain	2D Computer Aided Design
4802.D3.1	Create and use a template drawing.
4802.D3.2	Manipulate advanced dimensioning variables.
4802.D3.3	Use advanced editing commands.
4802.D3.4	Create blocks and form a symbol library.
4802.D3.5	Assign data/attributes to blocks.
4802.D3.6	Apply section lines to various types of drawing parts.
4802.D3.7	Create drawings using an isometric approach.
4802.D3.8	Share data utilizing external references.
4802.D3.9	Set up a plotter and plot a drawing.
Domain	Additional Technical Drawing
4802.D4.1	Distinguish between line types utilized on a technical drawing per industry standard (ANSI Line Conventions and Lettering Y14.2M-2008).
4802.D4.2	Interpret and develop appropriate annotations for technical drawings.
4802.D4.3	Differentiate between the various types of tolerances.
4802.D4.4	Analyze types of fits in relation to mating parts.

Next Level Programs of Study

Review Document

4802.D4.5	Collect and display data related to the sizes and shapes of objects utilizing various measuring tools.
4802.D4.6	Determine the appropriate number of views, including alternate views (auxiliary, section, detail), to fully document the details of a design.
4802.D4.7	Identify and produce various pictorial drawings including isometric, oblique, and perspective drawings for technical drawing representations.
4802.D4.8	Differentiate when the physical properties of geometric shapes can be utilized to optimize design solutions.
4802.D4.9	Apply industry accepted dimensioning practices to technical drawings to annotate design features.
4802.D4.10	Identify and produce multi-view drawings in proper orientation, scale, and proportion through methods of orthographic projection.
4802.D4.11	Illustrate and calculate mathematical problems related to real world situations involving characteristics of geometric shapes and solids.
Domain	Reverse Engineering
4802.D5.1	Identify visual, functional, and structural properties of a product.
4802.D5.2	Differentiate between invention and innovation.
4802.D5.3	Describe the relationship between reverse engineering and product/system improvement.
4802.D5.4	Create an innovation to a system or product using information obtained from a product analysis.
4802.D5.5	Evaluate the effectiveness of elements and principles in other design solutions and use analysis to revise original design.
4802.D5.6	Perform mathematical calculations to identify structural properties of a product.
Domain	Modeling
4802.D6.1	Formulate methods of communicating designs using various forms of modeling such as conceptual, graphical, mathematical, physical or computer modeling.
4802.D6.2	Utilize appropriate modeling materials to construct a physical model such as a prototype or mock-up.
4802.D6.3	Interpret the details of a sketch and generate physical or computer models using appropriate modeling materials and techniques.
4802.D6.4	Recognize and utilize constraints such as dimensional, geometric, assembly and parametric constraints in regard to modeling.
4802.D6.5	Identify the six degrees of freedom of a component floating in space in the context of an assembly.
4802.D6.6	Differentiate between assemblies and subassemblies and their appropriate use.
4802.D6.7	Use engineering design equipment (3D modeling software, 3D printer, etc.) to create 3D and 2D models to document engineering design. (Move to modeling)
4802.D6.8	Analyze the remaining degrees of freedom of mating components after systematically applying assembly constraints until only desired components are allowed to move.
4802.D6.9	Apply visual design principles to enhance the aesthetic appeal of a design solution.
4802.D6.10	Analyze products or systems by identifying problematic features to generate potential solution(s).

Mechanical and Architectural Design	
Career Cluster	STEM
Program of Study	Design Technology
NLPS Sequence	B
Course Code	7196
Course Description	<i>Mechanical and Architectural Design provides students with a basic understanding of creating working drawings related to manufacturing detailing and assembly as well as a survey of Architectural design focused on the creative design of buildings. Topics include fastening devices, thread symbols and nomenclature, surface texture symbols, classes of fits, and the use of parts lists, title blocks and revision blocks. From an Architecture perspective, this course covers problems of site analysis, facilities programming, space planning, conceptual design, proper use of materials, and selection of structure and construction techniques.</i>
Prerequisite(s)/ Corequisite(s)	Introduction to Engineering Design
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)

Competency #	Competency
Domain	<i>Mechanical Graphics</i>
7196.D1.1	Identify and draw various fastening devices.
7196.D1.2	Draw thread symbols and understand thread nomenclature.
7196.D1.3	Develop proper surface texture symbols.
7196.D1.4	Calculate classes of fits.
7196.D1.5	Develop a parts list.
7196.D1.6	Complete accurate title and revision blocks.
7196.D1.7	Research and utilize various standard parts.
7196.D1.8	Develop detailed part and assembly drawings.
Domain	<i>Architectural Design</i>
7196.D2.1	Identify the distinguishable design characteristics of the significant architectural styles in the history of Western civilization.
7196.D2.2	Comprehend and discuss the purpose and need for "facilities programming."
7196.D2.3	Develop sketches and diagrams that demonstrate problem solving of programmatic issues i.e., traffic flow, and material handling concepts.
7196.D2.4	Create design studies and drawings utilizing the views known as the Plan, Section and Elevation of a building.
7196.D2.5	Utilize fundamentals of formal conceptual relationships, design methodology and design process.
7196.D2.6	Develop basic spatial and compositional ideas introduced through the study of typology, diagrams, and a process of conceptualization.
7196.D2.7	Demonstrate an ability to represent ideas in form and space, as a conceptual and cultural response to program, type, basic building construction, architectural language and design

Next Level Programs of Study

Review Document

7223.D1.2	Create sketch-based features.
7223.D1.3	Choose an appropriate modeling scheme based on design intent.
7223.D1.4	Apply constraints in a parametric model and assembly to capture and implement desired design intent.
7223.D1.5	Create part models.
7223.D1.6	Edit models.
7223.D1.7	Create reference geometry.
7223.D1.8	Managing parent/child relationships.
7223.D1.9	Assemble components with constraints.
7223.D1.10	Apply materials and extract basic engineering properties.
7223.D1.11	Create and modify views for design communication (exploded, cutaway, etc.).
7223.D1.12	Generate a complete set of working drawings.
7223.D1.13	Create photo-realistic rendering of parts and assemblies.
7223.D1.14	Apply aspects of color, lighting, and texture.
7223.D1.15	Generate an animation.
Domain	Geometric Dimensioning and Tolerances
7223.D2.1	Identify and apply Geometric Dimensioning and Tolerancing symbols on drawings.
7223.D2.2	Understand the similarities and differences between coordinate and geometric dimensioning and tolerancing.
7223.D2.3	Describe the three-plane concept.
7223.D2.4	Apply datums to appropriate surfaces.
7223.D2.5	Understand the uses of and apply: Tolerances of orientation, Location tolerances, Tolerances of run-out, Tolerances of profile
Domain	Introduction to SolidWorks
7223.D3.1	Understand the similarities and differences between 2D sketches and 3D models.
7223.D3.2	Perform parametric sketching using geometric and dimensional constraints.
7223.D3.3	Manage and navigate the 3D modeling environment.
7223.D3.4	Incorporate design intent to create robust, easily edited 3D models.
7223.D3.5	Create, modify, and use 3D solid models.
7223.D3.6	Create assembly models of 3D components.
7223.D3.7	Create production drawings based on solid models and solid assemblies.
Domain	Design for Additive Manufacturing
7223.D4.1	Demonstrate basic additive manufacturing concepts and skills to print a design.
7223.D4.2	Operate and maintain 3D printing devices in conjunction with CAD software to manipulate designs and print objects.
7223.D4.3	Operate and maintain 3D scanning devices and determine how scanning is utilized in association with additive manufacturing processes.
7223.D4.4	Identify and perform basic safety practices, preventative maintenance practices, and general cleanup of 3D printers and 3D scanners.
7223.D4.5	Determine and perform appropriate post-processing techniques for different 3D printers.

Architectural Design Capstone	
Career Cluster	STEM
Program of Study	Design Technology
NLPS Sequence	D
Course Code	7225
Course Description	<i>Architectural Design Capstone covers residential design and drafting. Topics include interior space planning, structural design and development of working drawings. The course provides opportunity for students to design a residence using accepted building standards and introduces various construction materials. Students will also learn advanced CAD design topics in architectural design. Completion of the entire course may also provide students the opportunity to understand basic surveying equipment and surveying techniques.</i>
Prerequisite(s)/ Corequisite(s)	Introduction to Engineering Design; Mechanical and Architectural Design Fundamentals; BIM Architecture
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas Counts as a quantitative reasoning course*
Dual Credit Status	X (PCL/CTE)
Additional Notes	
ADDITIONAL COURSE INFO	
Funding	Moderate Value Level II

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Architectural Design
7225.D1.1	Identify and use architectural symbols to create plans and details.
7225.D1.2	Lay out floor plans using application software.
7225.D1.3	Lay out foundation plans using application software.
7225.D1.4	Develop appropriate detail drawings.
7225.D1.5	Construct building elevations and sections according to the plans established.
7225.D1.6	Develop a site plan from surveying notes or given site data.
7225.D1.7	Generate appropriate schedules for doors, windows, hardware, room finish, etc.
Domain	Residential Design
7225.D2.1	Distinguish good planning concepts and use them to establish a floor plan.
7225.D2.2	Determine structural requirements for a residence.
7225.D2.3	Design and layout the residential heating, plumbing and electrical systems.
7225.D2.4	Create a set of residential construction and presentation drawings.
7225.D2.5	Identify historical architectural styles and identify distinct characteristics of each.
7225.D2.6	Gather information from a client that is needed to design an architectural project.
7225.D2.7	Design floor plans to accommodate the needs of persons with physical impairments.
7225.D2.8	Apply the principles and elements of design to creating elevation drawings.
7225.D2.9	Recognize different roof styles as options for roof design.
7225.D2.10	Draw sections, using correct codes and proper dimensioning.
7225.D2.11	Relate the development of materials and construction methods to residential design.
7225.D2.12	Analyze a building site and orient a house to take advantage of solar energy and lot features.
Domain	Architectural Rendering
7225.D3.1	Identify the 16 Divisions of the Construction Specifications Institute (CSI) Format.
7225.D3.2	Name the materials that are represented in each of the 16 Divisions of the CSI Format.
7225.D3.3	Recognize building materials and discuss their composition.
7225.D3.4	Calculate the volume requirements for structural materials including cubic yards, board feet, square feet, cubic feet, linear feet, and concrete block units.
7225.D3.5	Prepare materials lists for (given) construction phases of a small building.
7225.D3.6	Demonstrate knowledge of the legal aspects of contracts and bidding; types of construction documents including bonds; interpretation of technical building specifications and their

Review Document

	application to selection and installation of materials, equipment and systems.
7225.D3.7	Explain the design and construction process and the roles of the different participants in the process.
7225.D3.8	Read, write, and edit construction specifications.
7225.D4.1	Demonstrate the basics of scaled architectural perspective drawing using one-, two- and three-point methods.
7225.D4.2	Demonstrate competency in basic architectural rendering technique for textures, shade, and shadows.
7225.D4.3	Demonstrate competency in the composition and execution of a cohesive presentation using foreground, middle ground, background, and entourage.
7225.D4.4	Demonstrate the basics of color theory.

Competency #	Competency
Domain	<i>Biotechnology Foundations</i>
7340.D1.1	Demonstrate appropriate documentation practices.
7340.D1.2	Describe and apply safety rules.
7340.D1.3	Learn and use various laboratory tools and measurements.
7340.D1.4	Use and prepare solutions of varying concentration.
Domain	<i>Survey of Biotechnology</i>
7340.D2.1	Understand basic molecular genetics as it applies to organismal genomes.
7340.D2.2	Describe processes of recombinant DNA technology and DNA cloning.
7340.D2.3	Understand the importance of information technology in the field of bioinformatics.
7340.D2.4	Discuss uses, purification, and analysis of proteins as biotechnology products.
7340.D2.5	Describe the uses of microorganisms as tools of biotechnology.
7340.D2.6	Define the major mechanisms of plant transgenesis and discuss their applications.
7340.D2.7	Review the use of transgenic and cloned animals in biotechnology research.
7340.D2.8	Understand the processes of DNA fingerprinting and forensic analysis.
7340.D2.9	Describe processes and products of medical biotechnology.
7340.D2.10	Understand government regulations that guide the biotechnology industry.
7340.D2.11	Discuss the ethics of using and manipulating living organisms for human benefit.
7340.D2.12	Understand the impact of biotechnology on agriculture, food production, medical and environmental applications, and biofuels through various types of interaction with the local industry including a field trip.

7341.D1.1	Demonstrate the ability to follow laboratory safety procedures and precautions through hands-on lab activities.
7341.D1.2	Demonstrate awareness of risks associated with a biotechnology laboratory and be able to create a chemical hygiene plan for that laboratory.
7341.D1.3	Know how a laboratory should be prepared for emergency situations.
7341.D1.4	Identify and be able to safely handle, store and dispose of hazardous, biological, and chemical and radioactive materials.
7341.D1.5	Identify and be able to use personal protective equipment (PPE) under the appropriate conditions.
7341.D1.6	Follow the appropriate safety procedures and guidelines with reference to physical hazards in the laboratory.
7341.D1.7	Identify and understand the role of regulatory agencies for which compliance is important in biotechnology.
7341.D1.8	Develop an understanding of the scientific basis for regulatory compliance in biotechnology.
7341.D1.9	Demonstrate the ability to understand and follow written technical instructions.
7341.D1.10	Demonstrate the skills of good documentation.
7341.D1.11	Interpret and follow GxPs and SOPs and locate the resources that provide updates.
7341.D1.12	Identify and understand validation methods as they apply to biotechnology.
7341.D1.13	Research and analyze intellectual property and its impact on biotechnology.
7341.D1.14	Assess readiness to take OSHA 10 Hour General Industry Certification exam.
Domain	Regulatory Practices
7341.D2.1	Understand the unique manufacturing environment as well as the special terminology used in the biotechnology industry.
7341.D2.2	Identify the steps of the basic product life cycle (manufacturing and regulatory) for pharmaceuticals and medical devices.
7341.D2.3	Know the history of the current regulatory environment for the biotechnology industry.
7341.D2.4	Understand CGMPs and how they form the industry environment.
7341.D2.5	Understand how the CGMPs and the nature of biotechnology manufacturing result in a unique work environment.
7341.D2.6	Understand what is done to prevent contamination, both in the work environment and the individuals working in that environment, and the consequences of contamination through hands-on lab activities including environmental monitoring, aseptic gowning, and aseptic handling.

7382.D1.6	Describe the steps for groundwater treatment.
7382.D1.7	Describe the steps for surface water treatment.
7382.D1.8	Describe the equipment used in water treatment labs.
7382.D1.9	Demonstrate knowledge of safety precautions and potential hazards for water treatment.
7382.D1.10	Apply proper techniques to analyze water samples.
7382.D1.11	Identify the different types of aeration used in water treatment.
7382.D1.12	Understand the different types of filters. <ul style="list-style-type: none"> - Pressure Filters - Gravity Filters - Iron Filters
7382.D1.13	Describe the basic water softening processes.
7382.D1.14	Understand the different applications and uses for valves and pumps in a water treatment plant.
7382.D1.15	Develop a general understanding of flow metering.
7382.D1.16	Examine the different types of disinfectants. <ul style="list-style-type: none"> - Chlorine (tablets, liquid, gas) - Chloramines - Chlorine Dioxide - Ozone - UV Disinfectant
7382.D1.17	List the key steps for water system security.

Advanced Water Systems (Distribution and Storage)

Career Cluster	STEM
Program of Study	Water Systems
NLPS Sequence	C
Course Code	7383
Course Description	<i>Advanced Water Systems: Distribution and Storage will focus on water distribution systems and storage tanks including pipes, valves, hydrants, metering, and maintenance.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Public Water Systems, Water System Fundamentals
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)

Next Level Programs of Study

Introduction to Engineering Design	
Career Cluster	STEM
Program of Study	Design Technology, Electronics and Computer Technology, Engineering
NLPS Sequence	A
Course Code	4802
Course Description	<i>Introduction to Engineering Design is a fundamental pre-engineering course where students become familiar with the engineering design process. Students work both individually and in teams to design solutions to a variety of problems using industry standard sketches and current 3D design and modeling software to represent and communicate solutions. Students apply their knowledge through hands-on projects and document their work with the use of an engineering notebook. Students begin with completing structured activities and move to solving open-ended projects and problems that require them to develop planning, documentation, communication, and other professional skills. Ethical issues related to professional practice and product development are also presented. NOTE: This course aligns with the PLTW Introduction to Engineering Design curriculum. Use of the PLTW curriculum may require additional training and membership in the PLTW network.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	NOTE: Schools that have agreed to be part of the Project Lead the Way network must follow all training and data collection requirements.

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	<i>Intro to Design</i>
4802.D1.1	Exercise file management and printing/plotting practices.
4802.D1.2	Understand the role of various types of drawings as applied to the design process.
4802.D1.3	Research potential career fields in Design Technology and Engineering.
4802.D1.4	Effectively communicate spatial visualizations with appropriate choices of technical drawings.

Next Level Programs of Study

Review Document

4802.D1.5	Demonstrate appropriate application of drawing standards to technical sketches and working drawings.
4802.D1.6	Collaborate in a studio setting.
4802.D1.7	Demonstrate relevant safety practices when using tools and equipment as determined by task, materials, environment, and protective attire.
4802.D1.8	Apply corrective action(s) to eliminate hazards.
4802.D1.9	Explain the importance of design documentation.
4802.D1.10	Apply sketching and annotation skills to document work.
4802.D1.11	Produce working drawings using appropriate drawing styles and techniques.
4802.D1.12	Formulate unbiased research questions to collect information/data and apply investigative strategies.
4802.D1.13	Select resources that are appropriate for academic research and relevant to the identified problem.
4802.D1.14	Discuss historical and current events related to engineering and technology and analyze the impact on society.
4802.D1.15	Discuss the importance of ethics in engineering design.
4802.D1.16	Synthesize information collected during the research process.
Domain	Design Process
4802.D2.1	Describe the steps in the design process.
4802.D2.2	Generate a valid and justifiable problem.
4802.D2.3	Create a design brief by constructing a problem and design statement and identifying problem constraints.
4802.D2.4	Apply the steps of the design process as they are used to solve the problem.
4802.D2.5	Describe the iterative nature of the design loop.
4802.D2.6	Discuss how the design process impacts the outcome when designing solutions to problems.
4802.D2.7	Implement design briefs in the problem-solving process.
4802.D2.8	Collaborate on engineering projects by working in design teams to solve valid problems.
4802.D2.9	Examine a design (product) with respect to its quality and usability.
4802.D2.10	Assess and refine original design solutions based upon reflection, critique, practice, and research.
Domain	2D Computer Aided Design
4802.D3.1	Create and use a template drawing.
4802.D3.2	Manipulate advanced dimensioning variables.
4802.D3.3	Use advanced editing commands.
4802.D3.4	Create blocks and form a symbol library.
4802.D3.5	Assign data/attributes to blocks.
4802.D3.6	Apply section lines to various types of drawing parts.
4802.D3.7	Create drawings using an isometric approach.
4802.D3.8	Share data utilizing external references.
4802.D3.9	Set up a plotter and plot a drawing.
Domain	Additional Technical Drawing
4802.D4.1	Distinguish between line types utilized on a technical drawing per industry standard (ANSI Line Conventions and Lettering Y14.2M-2008).
4802.D4.2	Interpret and develop appropriate annotations for technical drawings.
4802.D4.3	Differentiate between the various types of tolerances.

Next Level Programs of Study

Review Document

4802.D4.4	Analyze types of fits in relation to mating parts.
4802.D4.5	Collect and display data related to the sizes and shapes of objects utilizing various measuring tools.
4802.D4.6	Determine the appropriate number of views, including alternate views (auxiliary, section, detail), to fully document the details of a design.
4802.D4.7	Identify and produce various pictorial drawings including isometric, oblique, and perspective drawings for technical drawing representations.
4802.D4.8	Differentiate when the physical properties of geometric shapes can be utilized in order to optimize design solutions.
4802.D4.9	Apply industry accepted dimensioning practices to technical drawings to annotate design features.
4802.D4.10	Identify and produce multi-view drawings in proper orientation, scale, and proportion through methods of orthographic projection.
4802.D4.11	Illustrate and calculate mathematical problems related to real world situations involving characteristics of geometric shapes and solids.
Domain	Reverse Engineering
4802.D5.1	Identify visual, functional, and structural properties of a product.
4802.D5.2	Differentiate between invention and innovation.
4802.D5.3	Describe the relationship between reverse engineering and product/system improvement.
4802.D5.4	Create an innovation to a system or product using information obtained from a product analysis.
4802.D5.5	Evaluate the effectiveness of elements and principles in other design solutions and use analysis to revise original design.
4802.D5.6	Perform mathematical calculations to identify structural properties of a product.
Domain	Modeling
4802.D6.1	Formulate methods of communicating designs using various forms of modeling such as conceptual, graphical, mathematical, physical or computer modeling.
4802.D6.2	Utilize appropriate modeling materials to construct a physical model such as a prototype or mock-up.
4802.D6.3	Interpret the details of a sketch and generate physical or computer models using appropriate modeling materials and techniques.
4802.D6.4	Recognize and utilize constraints such as dimensional, geometric, assembly and parametric constraints in regard to modeling.
4802.D6.5	Identify the six degrees of freedom of a component floating in space in the context of an assembly.
4802.D6.6	Differentiate between assemblies and subassemblies and their appropriate use.
4802.D6.7	Use engineering design equipment (3D modeling software, 3D printer, etc.) to create 3D and 2D models to document engineering design. (Move to modeling)
4802.D6.8	Analyze the remaining degrees of freedom of mating components after systematically applying assembly constraints until only desired components are allowed to move.
4802.D6.9	Apply visual design principles to enhance the aesthetic appeal of a design solution.
4802.D6.10	Analyze products or systems by identifying problematic features to generate potential solution(s).

7361.D1.1	Practice principles of lab safety and electrical wiring safety and environmental impact awareness.
7361.D1.2	Discuss basic power supply regulation.
7361.D1.3	Create acceptable solder joints and desolder electronic components.
7361.D1.4	Demonstrate the principles of using test equipment to assemble and test on electronics projects.
7361.D1.5	Use proper assembly procedures for through-hole and surface mount parts.
7361.D1.6	Describe basic procedures for IC fabrication.
7361.D1.7	Apply basic project planning principles to a class project.
7361.D1.8	Develop a plan of study for their degree.
7361.D1.9	Outline careers and topics in electronics.

Digital Electronics	
Career Cluster	STEM
Program of Study	Engineering; Electronics and Computer Technology
NLPS Sequence	C
Course Code	5538
Course Description	<p><i>Digital Electronics is a course of study in applied digital logic that encompasses the design and application of electronic circuits and devices found in video games, watches, calculators, digital cameras, and thousands of other devices. Instruction includes the application of engineering and scientific principles as well as the use of Boolean algebra to solve design problems. Using computer software that reflects current industry standards, activities should provide opportunities for students to design, construct, test, and analyze simple and complex digital circuitry software will be used to develop and evaluate the product design. This course engages students in critical thinking and problem-solving skills, time management and teamwork skills.</i></p> <p><i>NOTE: This course aligns with the PLTW Digital Electronics curriculum. Use of the PLTW curriculum may require additional training and membership in the PLTW network.</i></p>
Prerequisite(s)/ Corequisite(s)	Introduction to Engineering Design
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum

Domain	Lab and Electrical Wiring Safety	
5538.D1.1	Students apply concepts of lab and electrical wiring safety to ensure a safe work environment.	
5538.D1.2	Demonstrate wearing safety attire and following all classroom procedures related to safety.	

Next Level Programs of Study

Review Document

5538.D1.3	Demonstrate methods to avoid electric shock by identifying the causes.
5538.D1.4	Utilizing environmentally sustainable design principles, design electronic circuits that reduce the negative impact on the environment while maintaining functions and safety.
5538.D1.5	Students will establish a working and functional knowledge of the software and equipment used in designing and troubleshooting circuits.
5538.D1.6	Create and test circuits using circuit design software.
5538.D1.7	Determine values associated with resistance, voltage, current and continuity using a digital multimeter.
5538.D1.8	Demonstrate successful soldering and desoldering techniques.
5538.D1.9	Demonstrate breadboarding techniques to build a working circuit.
Domain	Basic Laws of Electricity
5538.D2.1	Distinguish the parts of the atomic structure and how it plays a part in determining what elements are good conductors, insulators, and semi-conductors.
5538.D2.2	Define and explain Alternating Current (AC) and Direct Current (DC).
5538.D2.3	Distinguish between conventional current flow versus electron current flow and how they apply to engineering and scientific disciplines.
5538.D2.4	Design circuit boards that demonstrate the theory and principles associated with that of a complex circuit.
5538.D2.5	Calculate resistance, current and voltage in simple series, parallel and complex circuits using Ohm's Law.
5538.D2.6	Demonstrate the use of Kirchhoff's Voltage Law applied to simple series and complex circuits.
5538.D2.7	Demonstrate the use of Kirchhoff's Current Law for simple parallel and complex series-parallel circuits.
Domain	Electrical Components
5538.D3.1	Students apply concepts of the basic electrical components to design and create circuits.
5538.D3.2	Identify resistors by determining their nominal value.
5538.D3.3	Describe the material makeup of resistors and their application to circuit design.
5538.D3.4	Recognize industry standard symbols associated with resistors and their operation in schematic design.
5538.D3.5	Compare and contrast the measured value of a resistor to the calculated tolerance.
5538.D3.6	Identify the component parts of a capacitor, the types of capacitors available, ability to capture and contain static charge and voltage polarity requirements.
5538.D3.7	Identify and describe the unit of measure for capacitors.
5538.D3.8	Calculate the nominal values of different capacitors and their voltage polarity requirements.
5538.D3.9	Investigate types, functions, and power requirements of integrated circuits (logic gates).
5538.D3.10	Demonstrate the differences between an analog and cathode seven segment display.
Domain	Combinational Logic
5538.D4.1	Students apply the laws of motion as they apply to principles of engineering.
5538.D4.2	Demonstrate the calculation of projectile motion given parameters.

Next Level Programs of Study

Review Document

5538.D4.3	Examine the propulsion of an object.
5538.D4.4	Explain how gravity impacts motion.
5538.D4.5	Apply the laws of motion to solutions.
5538.D4.6	Analyze the forces acting on an object while in motion.
5538.D4.7	Describe the relationships among force, mass, and direction.
Domain	Simple Machines
5538.D5.1	Students create, analyze, and simplify digital logic circuits utilizing combinational logic.
5538.D5.2	Create truth tables and Boolean expressions for basic logic gates.
5538.D5.3	Demonstrate the relationship between the Boolean expression, logic diagram, and the truth table.
5538.D5.4	Design Boolean expressions, logic circuit diagrams or truth tables from information provided in a design problem.
5538.D5.5	Select the Sum-of-Products (SOP) or the Products-of-Sums (POS) form of a Boolean expression to use in the solution of a design problem.
5538.D5.6	Apply the rules of Boolean algebra to logic diagrams and truth tables to minimize the circuit size necessary to solve a design problem.
5538.D5.7	Apply DeMorgan's theory to simplify a negated expression to reduce resources used in the design and production of circuits.
5538.D5.8	Formulate and employ a Karnaugh Map to reduce Boolean expressions and logic circuits to their simplest forms.
5538.D5.9	Create circuits to solve a problem using NAND or NOR gates to replicate all combinational logic functions.
5538.D5.10	Generate simplified schematics to design problems using logic gates and symbolic algebra.
Domain	AC/DC Current Waveform
5538.D6.1	Students analyze the characteristics of waveforms and voltage generation associated with AC and DC current.
5538.D6.2	Identify the anatomy of the waveform associated with AC and DC current.
5538.D6.3	Analyze both analog and digital waveforms
5538.D6.4	Differentiate between digital and analog signals when given a waveform.
5538.D6.5	Design, create and test circuits to calculate the output frequency of circuits using observations and the oscilloscope.
5538.D6.6	Calculate the duty cycle associated with a digital waveform using observations and the oscilloscope.
Domain	Sequential Logic (Flip-Flops)
5538.D7.1	Students create, analyze, and simplify digital logic circuits utilizing combinational and sequential logic.
5538.D7.2	Examine how to operate a circuit using sequential logic.
5538.D7.3	Compare and contrast between the different kinds of flip-flops.
5538.D7.4	Construct circuits and evaluate information about the various applications of flip-flops.

Next Level Programs of Study

Review Document

5538.D7.5	Demonstrate the differences associated with asynchronous and synchronous circuits.
5538.D7.6	Compare and evaluate how sequential logic determines the operation of a circuit waveform and how a truth table can be used to predict an outcome.
5538.D7.7	Use of flip-flops or latches to store data, act as a memory device or transfer data through a shift register.
5538.D7.8	Determine the proper selection and use of a small-scale integrated circuit (SSI) and medium scale integrated circuit (MSI).
Domain	Number Systems, Simplifying
5538.D8.1	Students convert and calculate number systems and sequences to simplify problems.
5538.D8.2	Convert numbers between the binary, hexadecimal, octal and decimal number systems.
5538.D8.3	Translate design specifications into truth tables using binary numbering system language.
5538.D8.4	Construct truth tables from logic expressions and vice versa.
5538.D8.5	Understand least significant bit and most significant bit numerical place value within a numbering system.
5538.D8.6	Use mathematical symbols to represent bases and communicate concepts using different number systems.
5538.D8.7	Demonstrate the relationship of binary and hexadecimal to bits and bytes of information used in computers.
5538.D8.8	Design, construct, and test adder circuits using both discrete and MSI gates to perform basic addition and subtraction using a binary numbering system.
5538.D8.9	Convert any number using appropriate SI unit prefixes.
Domain	Programmable Logic Devices, State Machines, and Microprocessors
5538.D9.1	Students design and create a microprocessor to understand the impact of design, creation, and implementation of a processor.
5538.D9.2	Understand how programmable logic devices (PLDs) are used to build and execute the operation of a circuit.
5538.D9.3	Develop an understanding of a state bubble and state diagram.
5538.D9.4	Construct a state transition table and derive equations for outputs at each state.
5538.D9.5	Construct a state machine circuit using multiple inputs and outputs.
5538.D9.6	Formulate a flowchart/pseudocode to correctly apply basic programming concepts in the planning of a project.
5538.D9.7	Execute a program using a microprocessor.

Electronics and Computer Technology Capstone	
Career Cluster	STEM
Program of Study	Electronics and Computer Technology
NLPS Sequence	D

Next Level Programs of Study

Review Document

Course Code	7362	
Course Description	<i>Electronics and Computer Technology Capstone provides the opportunity for students to continue with foundational electronic concepts including circuit analysis and digital electronics modules. This course incorporates classroom, laboratory, and work-based experiences in the fundamental electronics concepts of circuit analysis and digital electronics as well as optional modules focused on industrial technology, emerging electronic technologies, residential and commercial electronic communication, and automation. Industry certifications and additional post-secondary education are critical components of this pathway.</i>	
Prerequisite(s)/ Corequisite(s)	Introduction to Engineering Design; Electronic Fundamentals; Digital Electronics	
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum	
Counts Toward	Counts as a directed elective or elective for all diplomas Counts as a quantitative reasoning course

Principles of Energy Technology	
Career Cluster	STEM
Program of Study	Energy Technology
NLPS Sequence	A
Course Code	7203
Course Description	<i>Principles of Energy Technology provides a broad understanding of the electric and natural gas utility industry and the energy generation, transmission, and distribution infrastructure, commonly called the “largest machine in the world,” which forms the backbone for the industry. The course includes business models, regulations, types of energy and their conversion to useable energy such as electric power, how generated power is transmitted and distributed to the point of use, emerging technologies and the connection to careers in the energy industry. Safety instruction covers topics including; Material Safety Data Sheets (MSDS), confined space, lock out/tag out, zero energy state, hazardous materials, storage of flammable materials, storage of fuel gas and high pressure gas cylinders, portable powered tool safety, hand tool safety, record keeping, training, employer enforcement of safety regulations, and right to know.</i>

Fundamentals of Electricity and Motors	
Career Cluster	STEM
Program of Study	Energy Technology
NLPS Sequence	B
Course Code	7200
Course Description	<i>Fundamentals of Electricity and Motors will introduce students to the basic electrical laws and principles pertaining to DC and AC circuits and provide a general understanding of the common types of electric motors. Electricity topics include current, voltage, resistance, power, inductance, capacitance, and transformers. Stresses the use of standard electrical tests, electrical equipment, and troubleshooting procedures. Topics related to motors will cover motor theory, magnetism and how it affects motor rotation, motor starting components and protective devices for motor circuits. Heat dissipation from a motor, motor slippage, how they are wired to obtain different speeds, and how capacitors affect a motor circuit will be included. Safety procedures and practices are emphasized.</i>

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Industrial Electrical
7200.D1.1	Demonstrate proper safety precautions related to equipment. [c]
7200.D1.2	Define the following terms: voltage, resistance, current amperage, direct current, alternating current, and power supply. [a,e]
7200.D1.3	Identify electrical components and form a schematic diagram. [e,f]
7200.D1.4	Identify types of electrical mechanical switches (SPDT, DPDT, etc.) [e]
7200.D1.5	Use Ohm's Law to calculate voltage, current, and resistance problems. [a,b,e]
7200.D1.6	Perform voltage, current, and resistance measurements using the proper measurement devices (both analog and digital meters).
7200.D1.7	Calculate voltage, current, and resistance in simple series, parallel, and series-parallel circuits.
7200.D1.8	Create a schematic drawing and complete single phase AC electrical service connections including meter bases and service panels. [f]
7200.D1.9	Explain the basic principles and operation of transformers, resistors, capacitors and diodes.
7200.D1.10	Describe the concepts of both DC and AC inductance and capacitance.
7200.D1.11	Calculate values for AC and DC resistive, inductive, and capacitive components.
7200.D1.12	Assemble and test laboratory exercises including building single phase AC switched circuits, and circuits using mechanical relays.
7200.D1.13	Use meters to identify and measure results of AC and DC laboratory exercises.
7200.D1.14	Demonstrate ability to read and interpret technical documents.
7200.D1.15	Demonstrate ability to use various types of software applicable to course.
7200.D1.16	Assess readiness to take the SACA C-201 Electrical Systems I Certification exam.
Domain	Motors and Motor Controls
7200.D2.1	Demonstrate safe practices and procedures.
7200.D2.2	Identify motors used in commercial and residential applications.
7200.D2.3	Identify and describe methods for controlling motor speeds.
7200.D2.4	Appropriately select and install motors.
7200.D2.5	Demonstrate methods of starting motors utilized in industrial applications.
7200.D2.6	Identify various types of motor protective devices used in industry.
7200.D2.7	Analyze ladder diagrams for motor circuits.
7200.D2.8	Diagnose and troubleshoot motors.
7200.D2.9	Identify various types of three-phase motor designs and applications.
7200.D2.10	Demonstrate methods for reversing AC and DC motors.

Next Level Programs of Study

Review Document

7200.D2.11	Explain the methods for accelerating and braking motors.
7200.D2.12	Demonstrate ability to read and interpret technical documents.
7200.D2.13	Demonstrate ability to use various types of software applicable to course.
7200.D2.14	Assess readiness to take the SACA C-202 Electric Motor Control Systems 1 Certification exam.

Electrical Power Distribution	
Career Cluster	STEM
Program of Study	Energy Technology
NLPS Sequence	C
Course Code	7198
Course Description	<i>Electrical Power Distribution is an introduction to the electrical grid and power distribution. It will cover the history of the current electrical grid and the future of the smart grid, basic electrical concepts, power generation, transmission, distribution, system operations, electrical market structures, regulation, restructuring, market dynamics, and most aspects of the electricity business. This course answers the questions of who creates the power we use, how it's distributed throughout the electrical grid, who determines the cost of electricity, and who controls the entire electrical infrastructure. Students will also study the principles and components required for the transmission and distribution of electric power.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Energy Technology; Fundamentals of Electricity and Motors
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas Counts as a quantitative reasoning course*

Competency #	Competency
Domain	<i>Electrical Power Distribution and Transmission</i>
7198.D1.1	Define the various sources of power and explain how they are generated.
7198.D1.2	Explain the power grid and power delivery systems.
7198.D1.3	Describe the power line safety guideline in accordance with the American Public Power Association (APPA).
7198.D1.4	Describe single and three phase transformers.
7198.D1.5	Describe voltage regulation in power systems.
7198.D1.6	Describe the process of buying and selling of power between utility companies.
7198.D1.7	Explain how power is monitored in a power grid.
7198.D1.8	Describe cabling requirements for overhead and underground power.
7198.D1.9	Describe the various faults that can occur in overhead and underground power distribution.
7198.D1.10	Describe the operation of lightning arresters.
7198.D1.11	Understand the history of the electrical grid.
7198.D1.12	Model the basic electrical concepts such as AC and DC theory.
7198.D1.13	Differentiate electrical consumers and why they pay different rates.
7198.D1.14	Analyze power generation, both traditional and renewable models.
7198.D1.15	Identify and describe how transmission and distribution systems currently work.
7198.D1.16	Explain what the smart Grid is and compare it to the current electrical grid.
7198.D1.17	Analyze electric system operations and the importance of independent system operators.
7198.D1.18	Differentiate market participants and electrical market structures.
7198.D1.19	Explain regulations in the electrical industry.
7198.D1.20	Research the Energy Policy Act and Smart Grid Policies.
7198.D1.21	Determine how to do an interconnection agreement.
7198.D1.22	Demonstrate how to make money in the electricity business.
Domain	<i>Industrial Wiring Principles</i>
7198.D2.1	Select appropriate device, pull, and junction boxes, and calculate NEC fill values.

Next Level Programs of Study

Review Document

7198.D2.2	Lay-out and install the common conduit types used in industrial settings.
7198.D2.3	Choose proper conductors, cables, raceways, and fittings.
7198.D2.4	Read and examine industrial electrical prints and ladder diagrams.
7198.D2.5	Splice, terminate, and specify NEC appropriate wire, conductors, and cable.
7198.D2.6	Understand and apply appropriate bonding and grounding techniques.
7198.D2.7	Specify and size appropriate overcurrent devices.
7198.D2.8	Recognize the hazards of industrial electricity and the procedures employed to guard against them.
7198.D2.9	Size and install appropriate equipment for motor control centers.
7198.D2.10	Demonstrate ability to read and interpret technical documents.
7198.D2.11	Demonstrate ability to use various types of software applicable to course.
7198.D2.12	Assess readiness to take the SACA C-206 Electrical System Installation 1 Certification exam.
Domain	Fluid Power
7198.D3.1	Calculate and demonstrate the basic physics of fluid mechanics using Pascal's Law.
7198.D3.2	Describe function and construction of various fluid power components, including pumps, valves, cylinders, filters, heat exchangers, pressure regulators, and accumulators.
7198.D3.3	Identify fluid power symbols and interpret fluid power schematic diagrams.
7198.D3.4	Demonstrate basic fluid power plumbing.
7198.D3.5	Design elementary fluid power circuits.
7198.D3.6	Troubleshoot elementary fluid power circuits.
7198.D3.7	Demonstrate knowledge of safety procedures related to fluid power equipment.
7198.D3.8	Demonstrate ability to read and interpret technical documents.
7198.D3.9	Demonstrate ability to use various types of software applicable to course.
7198.D3.10	Assess readiness to take the SACA C-209 Pneumatic Systems 1 Certification exam.

Electrical Line Capstone	
Career Cluster	STEM
Program of Study	Energy Technology
NLPS Sequence	D
Course Code	7268
Course Description	<i>The Electrical Line Capstone course builds upon the knowledge and skills developed in the Principles of Energy Technology, Basic Electrical and Motor Controls, and Electrical Power Distribution courses by developing advanced skills that students can apply to the field. Students enrolled in this course will participate in instruction and lab activities that covers aspects proper care of climbing tools, and the mastering of climbing wood pole structures, electrical principles required for installation, maintenance and troubleshooting of power lines, rigging gear inspection, safe rigging procedures and load control, using almost any vertical or horizontal rigging system. Upon successful completion of this course, the student will be qualified in two methods of pole top rescue.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Energy Technology; Fundamentals of Electricity and Motors; Electrical Power and Distribution
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas

Competency #	Competency
Domain	<i>Climbing</i>
7268.D1.1	Select, fit, and maintain climbing equipment.
7268.D1.2	Perform climbing functions using safe and sound judgment.
7268.D1.3	Inspect pole for unsafe conditions.
7268.D1.4	Climb in both the belted and unbelted positions.
7268.D1.5	Ascend the pole using proper climbing positions.
7268.D1.6	Execute hitchhiking and circling procedures.
7268.D1.7	Hoist tool and materials to the work position.
7268.D1.8	Perform pole type rescue and vault rescue.
7268.D1.9	Identify overhead structures, stays, hardware and conductors.
Domain	<i>Electrical Essentials for Powerline Workers</i>
7268.D2.1	Describe and demonstrate the use of protective equipment.
7268.D2.2	Utilize power formulas and ohm's law.
7268.D2.3	Calculate ac current and voltage in single and three phase circuits.
7268.D2.4	Identify and utilize proper protective grounding equipment.
7268.D2.5	Explain the grounding requirement for poles.
7268.D2.6	Explain the power grid and power delivery systems.
7268.D2.7	Explain transformer connections and 3 phase banks.
7268.D2.8	Describe the power line safety guideline in accordance with the American Public
7268.D2.9	Power Association (APPA).
7268.D2.10	Describe the various types of power cabling and their properties.
7268.D2.11	Explain OSHA rules and regulations for power line workers.
Domain	<i>Rigging for Line Workers</i>
7268.D3.1	Describe and classify the various types of wire rope and discuss the factors which influence wire rope construction.
7268.D3.2	Define the term safety factor and discuss how it relates to safe working load limits.
7268.D3.3	Discuss the factors which need to be considered when inspecting wire rope slings.

Next Level Programs of Study

Review Document

7268.D3.4	Identify the various types of end attachments and describe their application in the rigging operation.
7268.D3.5	List the five common types of fiber ropes and discuss their inherent advantages and disadvantages to the rigging operation.
7268.D3.6	Contrast the advantages and disadvantages of chain slings with those of wire rope slings.
7268.D3.7	Discuss the factors which need to be considered when inspecting chain slings.
7268.D3.8	List safety considerations necessary when utilizing wire rope, fiber rope, and chain slings.
7268.D3.9	Working with wire rope, fiber rope and chains; Explain the proper handling and care of these common rigging tools; Detail correct rope splicing and end-attachment procedures.

Industrial Wind Capstone	
Career Cluster	STEM
Program of Study	Energy Technology
NLPS Sequence	D
Course Code	7269
Course Description	<i>The Industrial Wind Capstone course builds upon the knowledge and skills developed in the Principles of Energy Technology, Basic Electrical and Motor Controls, and Electrical Power Distribution courses by developing advanced skills that students can apply to the field. Students enrolled in this course will participate in instruction and lab activities that covers aspects of site selection, topographic map reading, meteorology, wind turbine construction, wind power system components, and wind turbine safety. This course will cover general wind turbine systems and operations including troubleshooting for the mechanical, hydraulic, and electrical systems as well as the interaction of wind turbine systems with technologies. Upon completion of this course students will be able to earn the Small Wind Installer - Level 1 (SWI1) certification.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Energy Technology; Fundamentals of Electricity and Motors; Electrical Power and Distribution
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum

	machinery.
7269.D2.3	Identify simple machines: lever, pulley, inclined plane, screw, wheel and axle, etc.
7269.D2.4	Explain how simple machines provide mechanical advantage.
7269.D2.5	Identify bearing components.
7269.D2.6	Describe importance of lubrication in machines.
7269.D2.7	Analyze lubricants.
7269.D2.8	Perform an oil change on a machine
7269.D2.9	Determine center of gravity.
7269.D2.10	Identify anchoring points for machinery lifting.
7269.D2.11	Inspect ropes, straps, and chains.
7269.D2.12	Perform crane hand signals.
Domain	Advanced Wind Turbine Mechanical Systems
7269.D3.1	Differentiate corrective, preventive, and predictive maintenance.
7269.D3.2	Describe machinery lifecycles.
7269.D3.3	Describe the importance of shaft alignment
7269.D3.4	Differentiate between shaft axes for alignment.
7269.D3.5	Perform mechanical shaft alignment.
7269.D3.6	Perform laser shaft alignment.
7269.D3.7	Explain the importance of vibration analysis.
7269.D3.8	Perform a capture of a vibration signature.
7269.D3.9	Analyze a vibration signature against a control.
7269.D3.10	Explain the purpose of temperature control on moving parts.
7269.D3.11	Apply thermodynamic laws to temperature management.
7269.D3.12	Model a wind turbine coolant system.
7269.D3.13	Troubleshoot temperature sensors.
7269.D3.14	Explain the mechanisms through which SCADA interacts with wind turbine mechanical systems.
7269.D3.15	Use SCADA software to identify wind turbine system mechanical failures.

Natural Gas Capstone	
Career Cluster	STEM
Program of Study	Energy Technology
NLPS Sequence	D
Course Code	7266
Course Description	<i>The Natural Gas Capstone course builds upon the knowledge and skills developed in the Principles of Energy Technology, Basic Electrical and Motor Controls, and Electrical Power Distribution courses by developing advanced skills that students can apply to the field. Students enrolled in this course will participate in instruction and lab activities involving the health, safety and environmental hazards and federal regulations surrounding natural gas. Students will participate in activities that cover the types of natural gas pipeline materials, joining techniques, and coating maintenance. Students will also be engaged in activities that cover methods used to locate and install natural gas lines, basic design theory, backfilling, purging, valve inspection and maintenance, pressure testing, customer regulations and relief design, explanation of hoop stress, shutting down the flow of gas, basic tapping and stopping techniques, construction equipment and current methods and common materials. As a capstone course, students should have the opportunity to apply their knowledge and use skills through an intensive work-based learning experience.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Energy Technology; Fundamentals of Electricity and Motors; Electrical Power and Distribution
Credits	2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a Directed Elective or Elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	
ADDITIONAL COURSE INFO	
Funding	Less than Moderate Value Level II

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Fundamentals of Natural Gas</i>
7266.D1.1	Develop the skills to understand the processing technologies associated with the production of natural gas.
7266.D1.2	Develop an understanding of the gas laws.
7266.D1.3	Explain and perform leak testing on natural gas lines.
7266.D1.4	Describe the molecular structure, process theory, and terminology during the production of natural gas.
7266.D1.5	Identify the equipment and auxiliary systems which support the production and processing of natural gases.
7266.D1.6	Demonstrate proper safety techniques used in working with natural gas.
Domain	<i>Gas Pipe Joining</i>
7266.D2.1	Understand the tubing specifications, materials, and fittings.
7266.D2.2	Procedures used in bending, cutting, and installing tubing.
7266.D2.3	Understand the basics of tubing in a hydraulic system.
7266.D2.4	Identify and understand the factors of tubing and hoses differ from piping.
7266.D2.5	Understand how piping is sized, fitted, bent, and joined. [a, e, f, g, i]
7266.D2.6	Repair methods used on specific material types used in pipe joining
Domain	<i>Natural Gas Regulatory and Compliance Issues</i>
7266.D3.1	Understand the requirements for effective leak survey and patrol requirements.
7266.D3.2	Learn how the Department of Transportation Regulations is used in natural gas companies.
7266.D3.3	Internal and external corrosion testing, identification, and monitoring.
7266.D3.4	Identify the integrity of the pipeline.
7266.D3.5	Understand the requirements for regulatory reporting.
7266.D3.6	Prevent damage to natural gas lines.
7266.D3.7	Learn how to apply and use the regulations identified by the Department of Transportation.
7266.D3.8	Requirements of a natural gas operator.
Domain	<i>Natural Gas Construction Techniques</i>

Next Level Programs of Study

Review Document

7266.D4.1	Learn the planning techniques for new construction.
7266.D4.2	Learn Route selection for new construction.
7266.D4.3	Regulatory requirements of pipeline construction.
7266.D4.4	The design of natural gas pipelines.
7266.D4.5	How to string the pipe for construction.
7266.D4.6	How to trench and backfill the pipeline construction.
7266.D4.7	How to test the pipelines before usage.

Renewable Energy Alternatives

Domain	Wind Power
7365.D1.1	Discuss the wind energy industry (A, F, G)
7365.D1.2	Explore key factors in industry decisions (A, D, E)
7365.D1.3	Investigate wind park development: sites and construction (A, C, E)
7365.D1.4	Predict short term weather conditions (D)
7365.D1.5	Identify players and roles in wind park operations (F, H)
7365.D1.6	Explain the operation of a wind turbine (B)
7365.D1.7	Practice safe doffing and donning procedures of personal fall arrest system equipment (I)
7365.D1.8	Investigate types of towers, designs, and wind turbine safety (I, H,)
7365.D1.9	Inspect climbing and fall protection equipment (I)
7365.D1.10	Understand the importance of generator and wind electrical systems (B, C, E)
7365.D1.11	Discuss the function of gearboxes (I, E, B)
7365.D1.12	Learn how wind turbines integrate with the grid (C)
7365.D1.13	Estimate wind turbine performance (I)
7365.D1.14	Attain readiness to take the ETA Small Wind Installer - Level 1 (SWI1) [H]
Domain	Wind, Solar, Geothermal Systems
7365.D2.1	Differentiate grid-tied, grid interactive and off-grid systems. (A,C,F,)
7365.D2.2	Understand procedures for grid interaction and relationship with power companies.

	(A,C,D,F,H)
7365.D2.3	Identify varieties of PV cells. (A)
7365.D2.4	Investigate materials and equipment for PV installation. (E)
7365.D2.5	Describe installation considerations for PV. (A,F,I)
7365.D2.6	Model a PV system and requirements. (A,C,B)
7365.D2.7	Identify varieties of solar heat. (A)
7365.D2.8	Investigate materials and equipment for solar heat installation. (E)
7365.D2.9	Describe installation considerations for solar heat. (A,F,I)
7365.D2.10	Model a solar heat system and requirements. (A,E)
7365.D2.11	Identify varieties of wind generators. (A,
7365.D2.12	Investigate materials and equipment for wind generator installation. (E)
7365.D2.13	Describe installation considerations for wind generators. (A,F,I)
7365.D2.14	Model a wind generator system and requirements. (A,C,E,B)
7365.D2.15	Identify varieties of geothermal heat systems. (A)
7365.D2.16	Investigate materials and equipment for geothermal heat systems installation. (E)
7365.D2.17	Describe installation considerations for geothermal heat systems. (A,F,I)
7365.D2.18	Model a geothermal heat system and requirements. Install a wind and solar array. (A,E)
Domain	Smart Grid Home Integration
7365.D3.1	Introduces the Smart Meter and In Home Display.
7365.D3.2	Developing a Home Energy Efficiency Plan.
7365.D3.3	Conduct a Home Energy Audit.
7365.D3.4	Upgrade home energy efficiency by reducing heat transfer.
7365.D3.5	Analyze energy efficiency lighting and entertainment systems.
7365.D3.6	Develop solar power systems for the home.
7365.D3.7	Install wind turbine power for the home.
7365.D3.8	Perform Energy Audit.
7365.D3.9	Analyze Power Quality Data.
7365.D3.10	Critique viability of other systems.
Domain	Photovoltaic System Installation
7365.D4.1	Discuss the solar energy industry.
7365.D4.2	Demonstrate photovoltaic system safety.
7365.D4.3	Review electrical circuit fundamentals.
7365.D4.4	Practice solar site evaluation and data collection.
7365.D4.5	Understand the physical construction of PV modules.
7365.D4.6	Learn battery maintenance, wiring, and charge cycles.
7365.D4.7	Examine charge controller configuration.
7365.D4.8	Understand inverters and their functions.
7365.D4.9	Learn PV wiring and code regulations.
7365.D4.10	Design and size PV systems.
7365.D4.11	Learn installation techniques for solar array mounting systems.
7365.D4.12	Practice maintenance and troubleshooting of PV systems.
7365.D4.13	Attain readiness to take the ETA Photovoltaic Installer – Level I (PVI1) Certification exam.

Introduction to Transportation	
Career Cluster	Transportation
Program of Study	
NLPS Sequence	Introductory
Course Code	4798
Course Description	<i>Introduction to Transportation is an introductory course designed to help students become familiar with fundamental principles in modes of land, sea, air, and space transportation, including basic mechanical skills and processes involved in transportation of people, cargo, and goods. Students will gain and apply knowledge and skills in the safe application, design, production, and assessment of products, services, and systems as it relates to the transportation industries. Content of this course includes the study of how transportation impacts individuals, society, and the environment. This course allows students to reinforce, apply, and transfer their academic knowledge and skills to a variety of interesting and relevant transportation related activities, problems, and settings.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	1 or 2 semester course, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	
Additional Notes	When offered as applied: 2 units maximum; counts as an employability applied unit for alternate diploma. Note: This course qualifies for funding at the 8 th grade level
ADDITIONAL COURSE INFO	
Funding	Introductory Available for 8 th grade

Postsecondary Credential	
Liberal Arts/Sciences Requirements	
Promoted Certifications	
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>History of Transportation</i>
4798.D1.1	Students validate the historical, current, and future importance of transportation technology
4798.D1.2	Identify and describe different modes of transportation
4798.D1.3	Explore the history of transportation and technical progression
4798.D1.4	Describe technology as it is applied in the context of transportation
4798.D1.5	Identify and evaluate the impact of transportation on daily life
4798.D1.6	Identify major events in the history of the United States that impacted transportation
4798.D1.7	Investigate how historic events changed the course of technological advancement in different modes of transportation
4798.D1.8	Describe the emerging technologies in the transportation industry and how transportation will evolve
Domain	<i>Transportation Technology</i>
4798.D2.1	Students analyze technical components in a transportation system that must be considered when designing and using any form of transportation.
4798.D2.2	Examine basic vehicle structural and suspension principles as they relate to performance in different modes of transportation
4798.D2.3	Examine how a vehicle is controlled and guided in each of the modes of transportation
4798.D2.4	Identify support systems that are necessary for transportation systems to effectively work
4798.D2.5	Explain the interaction and operation of different internal components in various land, air, and sea vehicles
4798.D2.6	Explore how interrelated systems make the vehicle move through their different environments
4798.D2.7	Students evaluate basic operations and physical principles used in all forms of land, air, space, and water transportation.
4798.D2.8	Examine Basic Engine Operations of <u>all</u> modes of transportation
4798.D2.9	Differentiate between Basic Engine Classifications
4798.D2.10	Identify different types of power used to propel a vehicular system
4798.D2.11	Examine Basic Principles of Electricity
4798.D2.12	Explain the transfer of power from the source to actual movement

Next Level Programs of Study

Review Document

4798.D2.13	Interpret scientific principles in the design of vehicles for each mode of transportation
Domain	Transportation Design
4798.D3.1	Students choose appropriate technical, design and engineering processes used to create different modes of transportation.
4798.D3.2	Identify appropriate materials used in designing transportation systems
4798.D3.3	Describe the engineering involved in designing the parts of a transportation system
4798.D3.4	Identify the use of standardized parts in the transportation systems
4798.D3.5	Use different measurement methods using a variety of tools
4798.D3.6	Examine how automotive systems help minimize emissions, control engine temperature, and keep occupants safe
4798.D3.7	Compare how mechanical, fluid, and alternative systems work as related to systems in a transportation vehicle
4798.D3.8	Identify and apply math and science principles as related to the appropriate transportation system
4798.D3.9	Examine safety features of a vehicular system
Domain	Career Exploration
4798.D4.1	Students integrate skills and behaviors required for self-sufficiency and management of their personal and professional lives.
4798.D4.2	Evaluate employment and career pathway opportunities related to established career interest(s) in the field of transportation
4798.D4.3	Evaluate resources that keep workers current in the career field
4798.D4.4	Describe the emerging transportation-related jobs and industry needs
4798.D4.5	Demonstrate skills and attitudes needed for lifelong learning
Domain	Working Safe
4798.D5.1	Students design workplace procedures based on established regulations to promote a safe working environment.
4798.D5.2	Demonstrate appropriate tool safety and shop operations that are common across all the Transportation careers
4798.D5.3	Identify state and national safety regulations for working in a transportation facility
4798.D5.4	Identify the function and application of tools, equipment, and technologies used in transportation systems
4798.D5.5	Practice the proper storage of tools
4798.D5.6	Practice appropriate shop/lab upkeep and maintenance duties
4798.D5.7	Practice safety procedures for handling and disposal of hazardous materials
4798.D5.8	Practice safety procedures in cases of emergency
4798.D5.9	Choose the appropriate tools to use on particulars systems
Domain	Transportation and Society
4798.D6.1	Students analyze the effects transportation has on our world to determine what is the most efficient and effective vehicle for moving people and goods.

Next Level Programs of Study

Review Document

4798.D6.2	Examine the possible ways that natural resources could be used to conserve fuel and energy use in various vehicles
4798.D6.3	Analyze the effects transportation has on the environment by both vehicular and support views
4798.D6.4	Differentiate alternate fuel options for all modes of transportation
4798.D6.5	Identify and describe how mass transportation affects society and the environment
4798.D6.6	Appraise the effect of the built support systems for transportation on the environment
Domain	<i>The Science of Transportation</i>
4798.D7.1	Students integrate science and math concepts used in vehicles in different modes of transportation to understand the relationships of technology development.
4798.D7.2	Identify and describe Newton's laws of motion as they pertain to each mode of transportation
4798.D7.3	Apply and adapt the basic principles and forces of flight
4798.D7.4	Apply and adapt Archimedes' principle as it pertains to water transportation
4798.D7.5	Apply and adapt the propulsion as it relates to movement of a vehicle
4798.D7.6	Investigate how aerodynamics affects the vehicles in each mode of transportation
4798.D7.7	Explain Bernoulli's principle in transportation modes
4798.D7.8	Identify and describe energy conversion within each transportation system
4798.D7.9	Distinguish the different mathematical principles involved in a transportation system such as mass, volume, horsepower, center of gravity, work, and power

Advanced Career & Technical Education, College Credit: Transportation	
Career Cluster	Transportation
Program of Study	
NLPS Sequence	
Course Code	6128
Course Description	<i>Advanced Career and Technical Education, College Credit is a course title covering any CTE advanced course offered for credit by an accredited postsecondary institution through an adjunct agreement with a secondary school. The intent of this course is to allow students to earn college credit for courses with content that goes beyond that currently approved for high school credit. This course may be used for any dual enrollment course, including a joint program of study involving a postsecondary partnership.</i>
Prerequisite(s)/ Corequisite(s)	None Recommended: CTE courses that would help prepare the student for success in this area
Credits	1 semester course, up to 3 credits per semester, may be offered for successive semesters up to 12 credits
Counts Toward	Counts as a directed elective or elective for all diplomas

Next Level Programs of Study

Review Document

Dual Credit Status	X
Additional Notes	A student should earn at least 3 postsecondary credits for each high school credit. Schools must have an approved Nonstandard Course Waiver on file to be eligible for CTE funding.

NLPS Sequence	
Course Code	6156
Course Description	<i>Transportation: Special Topics is an extended learning experience designed to address the advancement and specialization of careers within the career cluster through the provision of a specialized course for a specific workforce need in the school's region. The learning experience is at a qualified site, and is designed to give the student the opportunity to learn and practice technical skills while working under the direction of an appropriately licensed professional. Throughout the course, students will focus on learning about employment opportunities and obtaining the knowledge, skills, and attitudes essential for success in specific occupations. Course standards and curriculum must be tailored to the specific profession, preparing students to advance in this career field, and where applicable, provide students with opportunities for certification or dual credit. Participation in a related CTSO encourages the development of leadership, communication and career related skills, and opportunities for community service.</i>

7213.D1.1	Identify proper shop safety practices while in the labs.
7213.D1.2	Identify tools & fasteners used in automotive repair.
7213.D1.3	Identify and explain how the automotive repair industry is structured.
7213.D1.4	Identify and explain operation of the 8 major systems of the automobile.
7213.D1.5	Identify and explain what EPA, CAFÉ and NHTSA regulations are and how they affect the automotive industry.
7213.D1.6	Identify and perform basic service and maintenance procedures including tire mounting, balancing, and repair.
7213.D1.7	Attain readiness to be certified to use industry standard diagnostic equipment, like ShopKey Pro.
7213.D1.8	Attain readiness to take SP/2 Mechanical Safety exam.
7213.D1.9	Attain readiness to take SP/2 Pollution Prevention exam.
Domain	<i>Basic Automotive Electrical</i>
7213.D2.1	Demonstrate safe shop practices while working with electrical systems.

Next Level Programs of Study

Review Document

7213.D2.2	Describe the basic laws of electricity and circuit construction.
7213.D2.3	Identify Electrical symbols and components.
7213.D2.4	Calculate resistance, current, and voltage problems using Ohms Laws.
7213.D2.5	Perform voltage, current, and resistance measurements using the proper measurement devices.
7213.D2.6	Perform voltage drop testing on multiplex and non-multiplex circuits.
7213.D2.7	Perform basic battery testing and diagnosis.
7213.D2.8	Identify starting and charging system components and circuits.
7213.D2.9	Diagnose starting and charging system faults.
7213.D2.10	Attain readiness to be certified to use an industry standard multimeter or fluke meter (e.g. Snap-On EEDM504B4).
Domain	Optional Competencies
7213.D3.1	Complete a vehicle inspection.
7213.D3.2	Perform an oil change and demonstrate basic fluid maintenance.
7213.D3.3	Understand fundamentals of the 4-stroke cycle of an internal combustion engine.

Brake Systems	
Career Cluster	Transportation
Program of Study	Automotive Services
NLPS Sequence	B
Course Code	7205
Course Description	<i>Brake Systems teaches theory, service, and repair of automotive braking systems. This course provides an overview of various mechanical brake systems used on today's automobiles. This course will emphasize professional diagnosis and repair methods for brake systems.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Automotive Services
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	Schools partnering with Vincennes University must offer the program of study as part of a 2-3 period block
ADDITIONAL COURSE INFO	
Funding	High Value Level I
Bulletin 400	<ul style="list-style-type: none"> ● Industrial Arts 7-12, K-12 ● Standard Trade & Industrial: Auto Mechanics K-12 ● Appropriate Vocational license

POSTSECONDARY AND CREDENTIAL INFORMATION

ITCC Course Alignment	AUTI 121: Brake Systems
VU Course Alignment	AUTO 120/L (Lab): Automotive Chassis Systems
Four Yr. Course Alignment	
Postsecondary Credential	ITCC - CT Maintenance and Light Repair (47.0604), TC Automotive Service Technology (47.0604) VU - CG Automotive Service Technology (47.0604); A.S. Automotive Technology (47.0604)
Liberal Arts/Sciences Requirements	
Promoted Certifications	ASE A-5 Brakes

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Brake Systems
7205.D1.1	Demonstrate proper shop safety practices while in the labs.
7205.D1.2	Use and identify tools used to repair brake systems.
7205.D1.3	Explain friction principles and Newton's laws of Motion.
7205.D1.4	Identify and explain operation of braking system components including hydraulic control devices.
7205.D1.5	Perform Disc Brake Inspection and recommend necessary repairs.
7205.D1.6	Perform Drum Brake Inspection and recommend necessary repairs.
7205.D1.7	Adjust parking brakes.
7205.D1.8	Demonstrate resurfacing of drums and rotors including on-car brake lathes.
Domain	
7205.D2.1	Understand anti-lock braking systems and perform diagnostic procedures: Pull ABS trouble codes; Bleeding ant-locking braking systems; How to use the multi-meter

Next Level Programs of Study

Review Document

7205.D2.2	Understand driveline service including, differentials, axles, and driveline angles
7205.D2.3	Diagnose if a differential seal is leaking.

Steering and Suspensions	
Career Cluster	Transportation
Program of Study	Automotive Services
NLPS Sequence	C
Course Code	7212
Course Description	<i>Steering and Suspensions will cover driveline theory and in-car service procedures. Theory and overhaul procedures related to the driveshaft and axle assemblies for front and rear wheel drive vehicles are included as well. Additionally, the course teaches theory, service and repair of automotive steering, and suspension systems. It provides an overview of various mechanical, power, and electrical steering and suspension systems used on today's automobiles and will emphasize professional diagnosis and repair methods for steering and suspension systems.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Automotive Services; Brake Systems
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	Schools partnering with Vincennes University must offer the program of study as part of a 2-3 period block

Promoted Certifications	ASE A-4 Steering and Suspension
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Steering and Suspensions
7212.D1.1	Demonstrate proper shop safety practices while in the labs.
7212.D1.2	Identify tools used for steering and suspension repair.
7212.D1.3	Diagnose steering and suspension concerns and determine worn/defective components.
7212.D1.4	Remove, inspect and service or replace front or rear wheel bearings.
7212.D1.5	Inspect, rotate, mount and balance tires.
7212.D1.6	Diagnose abnormal tire pull and drifting/pulling concerns.
7212.D1.7	Perform Pre-Alignment inspections.
7212.D1.8	Perform 4-wheel alignments.
Domain	Driveline
7212.D2.1	Demonstrate safe shop practices and work habits while working with driveline equipment and lifts.
7212.D2.2	Demonstrate usage of tools for driveline diagnosis and repair.
7212.D2.3	Describe basic power flow of the vehicle driveline.
7212.D2.4	Identify correct fluids for manual and automatic transmissions and drive axles.
7212.D2.5	Inspect for sources of leaks.
7212.D2.6	Remove and Replace drive axle bearings, axle shafts, seals, and wheel studs.
7212.D2.7	Remove and replace universal joints, yokes, and shafts.
7212.D2.8	Remove and replace and/or repair constant velocity joints and/ or half-shafts.
7212.D2.9	Locate specifications for drivelines from repair databases.
Domain	

Next Level Programs of Study

Review Document

7212.D3.1	Demonstrate operation of a scan tool.
7212.D3.2	Understand, hybrid automotive systems and alternative fuels.
7212.D3.3	Understand drive trains, manual transmissions, and auto SIR systems.

Automotive Service Capstone	
Career Cluster	Transportation
Program of Study	Automotive Services
NLPS Sequence	D
Course Code	7375
Course Description	<i>Automotive Service Capstone further explores important skills and competencies within the Automotive Service Technology Pathway. Students will be exposed to an in-depth study of vehicle electrical systems. The course will cover the fundamentals of electricity and automotive electronics in various automotive systems. Students will understand other topics such as engine repair, climate control, and driveline service. Additionally, Co-Op and Internship opportunities will be available for students.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Automotive Services; Brake Systems; Steering and Suspensions
Credits	2 semester course, 2 semester required, 1-3 credits per semester, 6 credits max
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes

Promoted Certifications	ASE A-1 Engine repair; ASE A-7 Heating and Air; ASE A-8 Engine Performance and ASE A-6 Electrical Systems;
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Engine Performance and Repair
7375.D1.1	Demonstrate proper shop safety practices while in the labs.
7375.D1.2	Explain four-stroke cycle fundamentals and volumetric efficiency.
7375.D1.3	Identify and explain the operation of fuel injection systems.
7375.D1.4	Identify and explain operation of ignition systems.
7375.D1.5	Identify and explain operation of vehicle emission systems.
7375.D1.6	Identify and explain operation of sensors and actuators.
7375.D1.7	Retrieve DTCs and freeze frame data with a scan tool.
7375.D1.8	Diagnose fuel and ignition faults.
7375.D1.9	Describe the major engine operating systems and their function. Identify engine configurations.
7375.D1.10	Demonstrate basic engine diagnosis including compression and leak down testing.
Domain	Engine Performance Systems
7375.D2.1	Demonstrate knowledge of computer sensors and inputs.
7375.D2.2	Demonstrate knowledge of computer actuators and outputs.
7375.D2.3	Diagnose inputs and outputs.
7375.D2.4	Describe the function of the OBD II Monitors.
7375.D2.5	Diagnose OBD II system fault codes and determine repair needed.
7375.D2.6	Determine if OBD II monitors have executed.
7375.D2.7	Attain readiness to take the VERUS Navigation and Scanner Certification exam.

Next Level Programs of Study

Review Document

Domain	Engine Fundamentals
7375.D3.1	Identify tools used for common engine repair.
7375.D3.2	Describe the major engine operating systems and their function.
7375.D3.3	Identify engine configurations.
7375.D3.4	Describe engine components and their functions.
7375.D3.5	Describe engine lubricants and sealing systems.
7375.D3.6	Demonstrate use of precision measuring equipment.
7375.D3.7	Describe fasteners and torque requirements and procedures.
7375.D3.8	Inspect cylinder long block components and determine needed repairs.
7375.D3.9	Properly install camshaft and timing chain(s) and /or belts.
7375.D3.10	Disassemble and reassemble engines to industry standards.
7375.D3.11	R & R engine assembly.
7375.D3.12	Attain readiness to take Snap on Torque Electrical Certification exam.
7375.D3.13	Attain readiness to take Snap on Torque Mechanical Certification exam.
Domain	Electrical Systems
7375.D4.1	Describe and explain analog and digital signals.
7375.D4.2	Explain and diagnose body modules and their function.
7375.D4.3	Demonstrate knowledge of wiring and circuit diagrams.
7375.D4.4	Demonstrate knowledge of voltage, current, and resistance measurements using meters and scopes.
7375.D4.5	Diagnose service and repair electrical/electronic system faults.
7375.D4.6	Demonstrate the ability to diagnose automotive circuits using electrical schematics.
7375.D4.7	Explain Hybrid Electrical systems and their operation.
7375.D4.8	Explain/demonstrate Hybrid vehicle service safety precautions.
7375.D4.9	Explain and diagnose advanced automotive systems and networks.
7375.D4.10	Utilize scan tools, lab scopes, and other electronic diagnostic equipment.
Domain	Climate Control
7375.D5.1	Demonstrate proper handling of refrigerants.
7375.D5.2	Identify tools and equipment used in climate control systems.
7375.D5.3	Identify all components of the heating and air conditioning system.
7375.D5.4	Explain the purpose and function of the heating and air conditioning systems.
7375.D5.5	Explain refrigeration theory.
7375.D5.6	Diagnose service and repair heating and air conditioning components.
7375.D5.7	Recover and recycle refrigerants using approved equipment.
7375.D5.8	Demonstrate knowledge of automatic climate control systems.
7375.D5.9	Diagnose automatic and manual climate control systems.
7375.D5.10	Explain hybrid climate control system operation.

Automotive Body Repair	
Career Cluster	Transportation
Program of Study	Auto Collision Repair
NLPS Sequence	B
Course Code	7204
Course Description	<i>Automotive Body Repair provides students with an understanding of the materials, measuring, welding, and information resources applicable to collision repair. Students will study steel and aluminum dent repair, including the welding practices commonly performed within an automotive repair environment. Basic skills and knowledge in oxy-fuel welding, cutting, brazing and plasma cutting, gas metal arc welding, squeeze type resistance welding, exterior panel welding and I-CAR welding test preparation will be gained. Students will also learn the installation of moldings, ornaments, and fasteners with emphasis on sheet metal analysis and safety.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Collision Repair
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas

Promoted Certifications	ASE Non-structural Analysis and Damage Repair

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Metal Body Repair
7204.D1.1	Demonstrate proper shop safety practices while in the lab(s). This includes always wearing safety glasses (goggles) while in the lab(s).
7204.D1.2	Define and describe different types of metals. This includes the identification of the various types of metals used on automobiles.
7204.D1.3	Gauge metals. This includes the proper use of specific measuring tools used to gauge metals.
7204.D1.4	Remove and install moldings and ornaments. This includes the proper removal, installation, inspection, and replacement (if necessary) of moldings and ornaments.
7204.D1.5	Identify fasteners and their use. This includes all the various fasteners used on the automobile to attach a variety of body panels and pieces to the body and/or frame of the vehicle.
7204.D1.6	Use and identify hand and power tools. This includes safely and properly using the tools.
7204.D1.7	This also includes proper storing and oiling of air tools
7204.D1.8	Perform minor damage repair. This includes properly mixing and applying body filler (bondo), sanding, priming, etc. in order to prepare the surface for painting.
Domain	Automotive Welding
7204.D2.1	Demonstrate the proper safety procedures in oxy-fuel, gas metal arc welding, plasma cutting, squeeze type resistance and exterior panel welding.
7204.D2.2	Set up and shut down an oxy-fuel station properly and safely.
7204.D2.3	Perform soldering and brazing with oxy-fuel equipment.
7204.D2.4	Perform square cut, bevel cut, and hole cut with hand-held oxyfuel cutting torch and plasma cutting equipment.
7204.D2.5	Weld butt, lap and tee joints in the vertical and overhead positions with GMAW.
7204.D2.6	Perform welds with a squeeze type resistance welder.
7204.D2.7	Perform the replacement of body panels, both in steel and plastic parts.
7204.D2.8	Perform all welds necessary for I-CAR welder qualification.
7204.D2.9	Attain readiness to take ICAR Steel Welding Certification exam.

Plastic Body Repair and Paint Fundamentals

Career Cluster	Transportation
Program of Study	Auto Collision Repair

Next Level Programs of Study

Review Document

NLPS Sequence	C	
Course Code	7206	
Course Description	<i>Plastic Body Repair and Paint Fundamentals introduces the types of fiberglass and plastic materials used in auto body repair and considerations for automotive painting. Students will explore methods for repairing fiberglass and plastic damage, like welding, reinforcing, repairing holes, and retexturing plastic. Students will be asked to demonstrate the proper use of primers and sealers, spraying techniques, and an understanding of various paint finishes.</i>

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Fiberglass and Plastic Body Repair
7206-D1.1	Demonstrate proper shop safety practices while in the lab(s). This includes always wearing safety glasses while in the lab(s).
7206-D1.2	Define hazards and safety of materials. This includes proper handling, storing and use of materials and chemicals used.
7206-D1.3	Select tools and equipment. This includes selecting and properly using tools and equipment for the job.
7206-D1.4	Describe use of composite material.
7206-D1.5	Identify different types of damage.
7206-D1.6	Select related material in composite repair.
7206-D1.7	Repair fiberglass and plastic damage. This includes several methods such as welding, reinforcing, repairing holes and retexturing plastics.
Domain	Paint Fundamentals
7206-D2.1	Define and demonstrate metal conditioners as they relate to the different metals
7206-D2.2	Demonstrate use of primers and sealers according to their uses (per manufacturer's specifications) as a base for final finishes. This includes the proper mixing and application of both primers and sealers.
7206-D2.3	Discuss and know the difference between enamel, urethane, and lacquer finishes and their applications.
7206-D2.4	Determine the proper amount of paint needed for a specific job.
7206-D2.5	Select the proper type of thinner or reducer needed for a specific job.
7206-D2.6	Demonstrate proper spraying techniques using production type equipment for spraying
7206-D2.7	lacquer and enamel finishes.
7206-D2.8	Demonstrate the proper use and application of base coat/clear coat systems.
7206-D2.9	Clean and maintain spray equipment to remove excess materials remaining after spraying.
7206-D2.10	Properly and safely handle, store, and remove toxic body shop materials.

Collision Repair Capstone	
Career Cluster	Transportation
Program of Study	Auto Collision Repair
NLPS Sequence	D
Course Code	7380
Course Description	<i>Collision Repair Capstone further explores important skills and competencies within the Automotive Body Technology Pathway. Topics such as automotive painting technology, collision damage appraising, and fiberglass plastic repair. Additionally, Co-Op and Internship opportunities will be available for students.</i>
Prerequisite(s)/	Principles of Collision Repair; Plastic Body Repair and Paint Fundamentals; Automotive Body

Next Level Programs of Study

	as sanding, cleaning, masking, etc.
7380.D1.3	Spray Automotive Paint. This includes the knowledge of how to properly set up, use, clean and maintain a spray gun and its related equipment (i.e., air hoses, air source(s), air lines, etc.).
7380.D1.4	Spot Refinishing. This includes properly matching paint colors and types in order to apply paint to one area of the automobile so that there is no evidence of the repair.
7380.D1.5	Tint and Blend Colors. This includes being able to properly match paint color and type of that already on the vehicle. This also includes the ability to blend paint while applying it to the vehicle.
7380.D1.6	Compound (buff), polish and clean up the job. This includes buffing and polishing the vehicle after wet sanding to remove any defects and bring out paint shine. This also includes cleaning body openings (door jambs, edges, etc.) as well as the entire exterior to make the vehicle deliverable to its owner after repairs are completed.
Domain	Collision Damage Appraising
7380.D2.1	Demonstrate proper shop safety practices while in the lab(s). This includes always wearing safety glasses (goggles) while in the lab(s).
7380.D2.2	Inspect and record damage to a damaged vehicle. Diagnose and measure structural damage using various measuring devices.
7380.D2.3	Calculate paint and materials needed. This includes determining the proper type and amount of paint and related materials needed to make the repair.
7380.D2.4	Estimate repairable damage. This includes determining all damage that needs to be repaired or determining if the vehicle is “totaled” or a “total loss”.
7380.D2.5	Record labor times and parts pieces from cash guides on estimate form. Calculate data on estimate form.
7380.D2.6	Demonstrate proper shop safety practices while in the lab(s). This includes always wearing safety glasses (goggles) while in the lab(s).
Domain	Metalwork and Filler
7380.D3.1	Perform metal straightening and filling metals. This includes heat or cold shrinking of stretched metal panels, mixing, and applying body filler (bondo) while shaping during curing as well as rough sanding cured body filler to contour and then finish sanding.
7380.D3.2	Remove dents in body panels. This includes properly repairing, filling, etc. dents as well as sanding the filler to the contour of the vehicle.
7380.D3.3	Demonstrate body-filling techniques. This includes mixing, proper application and sanding of body filler.
7380.D3.4	Select proper tools and materials needed to repair damaged sheet metal. This includes knowing what each tool is for and how to properly use it.

Principles of Diesel Services	
Career Cluster	Transportation
Program of Study	Diesel Services
NLPS Sequence	A
Course Code	7216
Course Description	<i>Principles of Diesel Technology introduces the maintenance requirements and procedures of modern diesel engines and medium and heavy-duty trucks. Proper procedures and requirements for the Federal Highway Safety Inspection (DOT) will be discussed and practiced. In addition, this course gives students an overview of the electrical operating systems of the modern automobile. Students will be introduced to the safety and operation of equipment and tools used in electrical diagnosis and repair in the automotive electrical industry. Students will study the fundamentals of electricity and automotive electronics.</i>
Prerequisite(s)/ Corequisite(s)	None

Domain	Preventive Maintenance
7216.D1.1	Identify Proper shop safety practices while in the labs
7216.D1.2	Identify tools, equipment, & fasteners used in truck repair.
7216.D1.3	Identify and explain how the truck repair industry is structured.
7216.D1.4	Identify and explain operation of the major systems of the trucks.
7216.D1.5	Identify and explain what EPA, CAFÉ, FMCSR, CDL, and NHTSA regulations are and how they affect the transportation industry.
7216.D1.6	Perform complete FMC annual inspection of tractors and trailers.
7216.D1.7	Examine maintenance requirements and procedures for heavy duty trucks.
7216.D1.8	Change oil and filters and lubricate the complete chassis.
7216.D1.9	Perform CDL pre-trip inspections.
7216.D1.10	Perform the CDL air brake leak down safety test and inspection.
7216.D1.11	Attain readiness to take Torque exams.
7216.D1.12	Attain readiness to take SP/2 Mechanical Safety exam.
7216.D1.13	Attain readiness to take SP/2 Pollution Prevention exam.
Domain	Basic Electrical
7216.D2.1	Demonstrate safe shop practices while working with electrical systems.
7216.D2.2	Describe the basic laws of electricity and circuit construction.
7216.D2.3	Identify Electrical symbols and components.
7216.D2.4	Calculate resistance, current, and voltage problems using Ohms Laws.
7216.D2.5	Perform voltage, current, and resistance measurements using the proper measurement devices.
7216.D2.6	Perform voltage drop testing on multiplex and non-multiplex circuits.
7216.D2.7	Perform basic battery testing and diagnosis.
7216.D2.8	Identify starting and charging system components and circuits.
7216.D2.9	Diagnose starting and charging system faults.

7216.D2.13	Identify Electrical symbols and components.
7216.D2.14	Calculate resistance, current, and voltage problems using Ohms Laws.
7216.D2.15	Perform voltage, current, and resistance measurements using the proper measurement devices.
7216.D2.16	Perform voltage drop testing on multiplex and non-multiplex circuits.
7216.D2.17	Perform basic battery testing and diagnosis.
7216.D2.18	Identify starting and charging system components and circuits.
7216.D2.19	Diagnose starting and charging system faults.
7216.D2.20	Attain readiness to be certified to use an industry standard multimeter or fluke meter (e.g. Snap-On EEDM504B4).

Diesel Steering and Brakes	
Career Cluster	Transportation
Program of Study	Diesel Services
NLPS Sequence	B
Course Code	7210
Course Description	<i>Diesel Steering and Brakes studies steering and suspension systems commonly used on modern tractors and trailers. Topics will include steering and suspension components, power steering units, alignment theory and procedures, tire repair and service, and wheel balancing. Diagnosis, repair, and servicing of components including modern air suspension systems will be emphasized. Additionally, this course will cover theory, service, and repair of medium and heavy truck brake systems and their components. Emphasis is given to air brakes and their theory of operation, repair, and service of system components. Spring brakes and anti-lock systems will be studied on tractors and trailers.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Diesel Technology
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Steering and Suspensions</i>
7210.D1.1	Identify tools used for steering and suspension repair.
7210.D1.2	Disable supplemental restraint systems in accordance with manufacturers' procedures.
7210.D1.3	Diagnose power steering systems and determine need for replacement.
7210.D1.4	Diagnose steering and suspension components to determine need for replacement.
7210.D1.5	Remove and replace steering and suspension components.
7210.D1.6	Describe steering and alignment geometry.
7210.D1.7	Perform pre-alignment checks according to industry standards.
7210.D1.8	Diagnose rear suspension system and determine needed service or repair.
7210.D1.9	Check and adjust all alignment angles and measurements.
7210.D1.10	Inspect, rotate, mount, and balance tires.
7210.D1.11	Repair tire leaks.
7210.D1.12	Inspect, service, and replace front leaf spring bushings, pins, and shackles.
7210.D1.13	Inspect and service air springs.
7210.D1.14	Inspect, diagnose, and repair air ride systems.
7210.D1.15	Inspect and service kingpins.
Domain	<i>Brakes</i>
7210.D2.1	Demonstrate proper shop safety practices while using brake tools and equipment.
7210.D2.2	Use and identify tools and equipment used to repair brake systems.
7210.D2.3	Identify and explore operation, construction, and nomenclature of braking system components including hydraulic, air, and mechanical control devices.
7210.D2.4	Use safety procedures while servicing caged spring brake systems.
7210.D2.5	Diagnose and repair ABS and traction control systems on tractors and trailers.

Next Level Programs of Study

Review Document

7210.D2.6	Diagnose, service, and repair air brake systems.
7210.D2.7	Test and service air supply and storage circuits.
7210.D2.8	Perform air brake leak down test.
7210.D2.9	Inspect, test, and repair air brake lines and hoses.
7210.D2.10	Replace drive axle bearings, hubs, axle shafts, seals, and wheel studs.

Diesel Transmissions	
Career Cluster	Transportation
Program of Study	Diesel Services
NLPS Sequence	C
Course Code	7211
Course Description	<i>Diesel Transmissions explores theory, diagnosis, and overhaul procedures related to manual transmissions and differentials. Course topics include service of twin countershaft, under-drive, overdrive, power-dividers, and air shift systems. Additionally, this course studies precision tools, equipment, and procedures needed to repair modern diesel engines. Repair, proper assembly, and component identification are examined along with service of removable cylinder liners.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Diesel Technology
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Transmissions
7211.D1 .1	Demonstrate proper shop safety practices while repairing transmissions and drivetrains.
7211.D1 .2	Identify tools, equipment, and pullers used in the repair of manual drive trains.
7211.D1 .3	Identify and describe the function of manual drive train parts and components
7211.D1 .4	Diagnose shifting related concerns.
7211.D1 .5	Disassemble, inspect, determine needed action, and reassemble manual transmissions
7211.D1 .6	Diagnose, repair, or replace air shift controls.
7211.D1 .7	Tear down, inspect, and set up a differential assembly to specifications.
7211.D1 .8	Inspect power divider assembly, determine needed action.
7211.D1 .9	Demonstrate power flow of a manual transmission and transaxle.
7211.D1 .10	Diagnosis, service, replace, and adjust a double clutch system.
7211.D1 .11	Diagnose slipping, incorrect shifting, and abnormal noise caused by the clutch system.
7211.D1 .12	Inspect flywheel and bell housing alignment
7211.D1 .13	Inspect, service, and replace universal joints, yokes, and shafts.

Diesel Services Capstone	
Career Cluster	Transportation
Program of Study	Diesel Services
NLPS Sequence	D
Course Code	7221
Course Description	<i>Diesel Services Capstone further explores important skills and competencies within the Diesel Technology Pathway. Topics such as truck climate control systems, diesel engine performance, HT electrical systems, Hd truck auto transmission, and heavy truck electronics. Additionally, Co-Op and Internship opportunities will be available for students.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Diesel Technology; Diesel Steering and Brakes; Diesel Transmission
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas Counts as a quantitative reasoning course

7221.D1.1	Demonstrate proper shop safety practices while overhauling and repairing engines.	
7221.D1.2	Identify tools and equipment used in engine repair.	
7221.D1.3	Inspect and determine serviceability of cylinder head according to manufacturer specifications.	
7221.D1.4	Inspect and determine the serviceability of cylinder block according to recommended manufacturer specifications.	
7221.D1.5	Adjust or measure valve and engine brake clearance.	
7221.D1.6	Install camshaft according to manufacturer specifications.	
7221.D1.7	Inspect connecting rods and pistons.	
7221.D1.8	Measure the crankshaft and determine serviceability.	
7221.D1.9	Diagnose and or repair of the oil lubrication system.	

Next Level Programs of Study

Review Document

7221.D1.10	Install piston rings according to manufacturer specifications.
7221.D1.11	Install connecting rod and main bearings according to manufacturer specifications.
7221.D1.12	Assemble engine according to industry standards.
7221.D1.13	Time camshaft and components to manufacturer specifications.
7221.D1.14	Inspect cooling system and components for needed repair.
7221.D1.15	Perform injector replacement procedures.
7221.D1.16	Remove and reinstall the cylinder liner and check and adjust protrusion.
7221.D1.17	Clean engine procedures
Domain	Engine Performance
7221.D2.1	Demonstrate proper shop safety practices and around high-pressure fuel lines.
7221.D2.2	Identify tools used in Diesel Engine Performance.
7221.D2.3	Diagnose, test, and replace fuel system components including mechanical injectors.
7221.D2.4	Diagnose, test, and service intake and exhaust systems.
7221.D2.5	Identify key emission systems.
7221.D2.6	Use diagnostic scan tools to pull codes, set parameters, and inspect sensor values.
7221.D2.7	Diagnose, test, and service sensors and actuators.
7221.D2.8	Test, inspect, and service turbo systems.
7221.D2.9	Inspect and service engine brake systems.
7221.D2.10	Test and repair bus communication systems.
Domain	HT Electrical Systems
7221.D3.1	Demonstrate safe shop practices while working with electrical systems.
7221.D3.2	Identify the diagnostic equipment used for computer-controlled truck and diesel systems.
7221.D3.3	Explain and diagnose advanced truck and diesel electrical system networks.
7221.D3.4	Utilize scan tools, lab scopes, and other electronic diagnostic equipment.
7221.D3.5	Identify and access engine computer control sensors and systems.
7221.D3.6	Identify and diagnose body computer systems.
7221.D3.7	Identify and diagnose anti-lock brake and traction control systems.
7221.D3.8	Identify and diagnose advanced active and passive restraint systems.
7221.D3.9	Identify and diagnose various electrical control systems.
7221.D3.10	Identify and diagnose multi-battery starting and charging systems.
7221.D3.11	Identify and diagnose warning indicator systems, lighting, and dash gauge systems.
Domain	HT Climate Control
7221.D4.1	Demonstrate proper handling of refrigerants.
7221.D4.2	Identify tools and equipment used in climate control systems.
7221.D4.3	Identify all components of the heating and air conditioning system.
7221.D4.4	Explain the purpose and function of the heating and air conditioning systems.
7221.D4.5	Explain refrigeration theory.
7221.D4.6	Diagnose service and repair heating and air conditioning components.
7221.D4.7	Recover and recycle refrigerants using approved equipment.
7221.D4.8	Demonstrate knowledge of Axillary Power Units used for climate control systems.
7221.D4.9	Explain trailer refrigeration principles.

Tractor/Trailer Operation	
Career Cluster	Transportation
Program of Study	Diesel Services
NLPS Sequence	D
Course Code	5622
Course Description	<i>Tractor/Trailer Operation is a comprehensive training program that prepares students to enter the trucking industry as an entry-level tractor-trailer operator. Instruction will include both classroom activities and behind-the-wheel driving experiences. Additional emphasis will include preventive maintenance and basic control skills training. Students are required to submit to and pass a Department of Transportation, Distribution and Logistics physical exam and drug screen. In addition, students must reach their 18th birthday prior to graduation from high school in order to enroll in and complete this course. Upon successful completion, students will be qualified to operate Class A Commercial Vehicles on Indiana highways.</i>
Prerequisite(s)/ Corequisite(s)	Diesel Service Program of Study; or Supply Chain Management Program of Study
Credits	2 semester course, 1-3 credits per semester, 6 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	May not be used as a capstone for the CDL pathway

Liberal Arts/Sciences Requirements	
Promoted Certifications	CDL A
CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Safety
5622.D1.1	Recognize key safety principles in operating a commercial vehicle.
5622.D1.2	Distinguish between safe, defensive driving practices and those practices that increase risk to the driver and the general public.
5622.D1.3	Comply with DOT regulations by submitting to a DOT physical.
5622.D1.4	Comply with DOT regulations by taking the CDL permit exam.
5622.D1.5	Identify hazardous materials and the procedures for handling them.
Domain	CDL Permit
5622.D2.1	Prepare for the CDL permit exam.
5622.D2.2	Prepare for multiple endorsements available to commercial truck drivers such as articulated vehicles, air brakes, passenger, and hazardous materials.
Domain	Truck Equipment
5622.D3.1	Review the equipment on a commercial vehicle.
5622.D3.2	Review and summarize the pre-trip process.
5622.D3.3	Discuss the importance of the pre-trip inspection.
5622.D3.4	Explain each individual part of the pre-trip process.
Domain	Safety and Qualifications
5622.D4.1	Discuss and review regulations in trucking.
5622.D4.2	Review driver qualifications.
5622.D4.3	Recognize key safety principles in operating a commercial vehicle.
Domain	Engine Controls
5622.D5.1	Describe the engine controls as well as the primary and secondary vehicle controls.
5622.D5.2	Identify and describe the controls for starting the engine, shifting, accelerating, braking, and parking.
5622.D5.3	Explain the acceptable operating range for oil, coolant, and electrical systems.
Domain	Vehicle Systems
5622.D6.1	Identify and describe all vehicle instruments and their purpose.
5622.D6.2	Recognize basic vehicle construction and systems including suspensions, axles, engine, fuel, exhaust, air intake, electrical, drive train, brake, steering and coupling systems.
5622.D6.3	Use systematic procedure to conduct accurate and efficient vehicle inspection.
Domain	Vehicle Inspection

Next Level Programs of Study

Review Document

5622.D7.1	Identify damaged, loose, or missing parts.
5622.D7.2	Recognize and report system defects.
5622.D7.3	Explain why an undiscovered malfunction or vehicle problem can be unsafe and costly.
5622.D7.4	Explain the importance of having malfunctions corrected quickly.
5622.D7.5	Review Federal Motor Carrier Safety Regulations (FMCSR) regarding vehicle inspections.
5622.D7.6	Apply procedures for performing post trip inspections.
Domain	Vehicle Operation
5622.D8.1	Safely practice the basic control maneuvers in a commercial vehicle.
5622.D8.2	Demonstrate how to put the vehicle in motion and how to stop the vehicle.
5622.D8.3	Demonstrate proper application of shifting patterns and procedures to efficiently perform gear shifting maneuvers.
5622.D8.4	Demonstrate the ability to back a tractor-trailer including the ability to parallel park.
5622.D8.5	Apply the step-by-step procedures used to couple and uncouple the most standard tractor-trailer combination units.
5622.D8.6	Demonstrate the skills needed to perform a safe and effective visual search while on the road.
5622.D8.7	Review the principles of basic communication as it pertains to the professional driver.
5622.D8.8	Discuss the importance of speed and space management when it comes to operating a tractor-trailer during the day or night as well as in extreme conditions.
5622.D8.9	Identify road conditions and other road users that are a potential safety threat.
5622.D8.10	Discuss the importance of methods for carrying out evasive steering, emergency stops, off road recoveries, and proper responses to brake failures and blowouts.
5622.D8.11	Review all components and regulations of railroad crossings.
5622.D8.12	Discuss conditions that cause skids, the major type of skids, and the procedures for recovering from skids.
5622.D8.13	Review the characteristics of special rigs.
Domain	Compliance, Safety, and Accountability (CAS)
5622.D9.1	Discuss the importance of preventive maintenance and servicing to prevent breakdown and accidents.
5622.D9.2	Discuss the importance of diagnosing and reporting vehicle malfunctions as well as the student's role in troubleshooting.
5622.D9.3	Review the importance of properly handling cargo including proper and legal securement.
5622.D9.4	Summarize the basics of freight documentation.
5622.D9.5	Describe hazardous material basics, and what responsibilities are associated with hazardous material transportation.
5622.D9.6	Explain hours of service regulations, including operating within the legal limits and accurately completing a driver's record of duty status.
5622.D9.7	Plan all aspects of the trip for having proper paperwork on hand to planning an efficient and legal route of travel.
5622.D9.8	Explain accident scene procedures as well as fire prevention.

Review Document

5622.D9.9	Discuss the many security issues facing truck drivers today.
5622.D9.10	Review a variety of subjects that together make for an alert, healthy, and safe driver.
5622.D9.11	Discuss the driver's highly visible role in representing the trucking industry.
5622.D9.12	Explain Compliance, Safety, and Accountability (CAS) and how this compliance and enforcement program affects the professional driving career.
5622.D9.13	Apply the basic business concepts that are important to be successful in the transportation industry.
Domain	Commercial Driving Internship
5622.D10.1	Gain practical on-the-job experience in commercial truck driving.
5622.D10.2	Develop an applied knowledge of the commercial truck driving.
5622.D10.3	Analyze, synthesize, and evaluate problems and information.
5622.D10.4	Apply problem solving skills using critical thinking.
5622.D10.5	Demonstrate professionalism through time management, ethics, and standards of conduct.
5622.D10.6	Prepare a professional report documenting the co-op/internship experience.

Principles of Transportation and Logistics	
Career Cluster	Transportation
Program of Study	Commercial Driver
NLPS Sequence	A
Course Code	7386
Course Description	<i>Principles of Transportation and Logistics examines the structure and importance of the commercial transportation industry in the logistics sector of business. Topics covered include an in-depth examination of the various modes of transportation including discussions of regulations, economics, characteristics, and development in major transportation modes. Also discussed are costing and pricing issues in transportation and relationship management between buyers and sellers of transportation. Additionally, this course introduces students to an overview of the CDL licensure and prepares them to get their CDL permit. Students are required to get a Department of Transportation Physical and Drug Screen.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	Recommended as a one-year concentrator sequence offered through a half day program

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	<i>Trucking, Supply Chain Strategy and Planning, Logistics</i>
7386.D1.1	Discuss general knowledge of the trucking industry.
7386.D1.2	Understand the economic importance of logistics in both individual applications and global implications.
7386.D1.3	Understand the role of logistics in modern manufacturing.
7386.D1.4	Understand the effect of distribution in customer service relationships.
7386.D1.5	Define supply chain management and understand issues involved in creating and maintaining supply chain strategies.
7386.D1.6	Discuss global implications of supply chain management and logistics systems with respect to current technology.
7386.D1.7	Explain the central components of a logistics system and their integration.
7386.D1.8	Analyze improvement opportunities for today's manufacturing logistics systems.
Domain	<i>Safety</i>
7386.D2.1	Recognize key safety principles in operating a commercial vehicle.
7386.D2.2	Distinguish between safe, defensive driving practices and those practices that increase risk to the driver and the general public.
7386.D2.3	Comply with DOT regulations by submitting to a DOT physical.
7386.D2.4	Comply with DOT regulations by taking the CDL permit exam.
7386.D2.5	Identify hazardous materials and the procedures for handling them.
Domain	<i>CDL Permit</i>
7386.D3.1	Prepare for the CDL permit exam.
7386.D3.2	Prepare for multiple endorsements available to commercial truck drivers such as articulated

	vehicles, air brakes, passenger, and hazardous materials.
Domain	Truck Equipment
7386.D4.1	Review the equipment on a commercial vehicle.
7386.D4.2	Review and summarize the pre-trip process.
7386.D4.3	Discuss the importance of the pre-trip inspection.
7386.D4.4	Explain each individual part of the pre-trip process.
Domain	Information and Inventory Management
7386.D5.1	Discuss the different types of information systems and their use in logistics systems.
7386.D5.2	Distinguish the basic concepts and characteristics of different forms of transportation and the influence of transportation on plant and warehouse locations.
7386.D5.3	Apply techniques and methods for effective inventory management from a lean manufacturing perspective.
7386.D5.4	Design a warehouse operation layout considering safety, material handling, automation, information systems and lean manufacturing concepts.

Commercial Driver Operations Fundamentals	
Career Cluster	Transportation
Program of Study	Commercial Driver
NLPS Sequence	B
Course Code	7387
Course Description	<i>Commercial Drivers Operation Fundamentals introduces students to an orientation of the CDL industry, the Commercial Driver's License (CDL), driver qualifications, and the commercial vehicle. The vehicle control systems are reviewed and discussed. The vehicle systems including engine, suspension, electrical, and many others are reviewed in detail. The vehicle inspection is practiced and applied. Range and on the road training in a tractor trailer are major components of this course. Students will discuss driving in a variety of conditions including at night, emergency situations, skidding, and extreme weather. Students will practice many different driving maneuvers including backing, turning, shifting, coupling, and space and speed management to prepare for the CDL A exam. This course must be taken concurrently with Advanced Commercial Drivers Operations.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Transportation and Logistics; Co-enrolled in Advanced Commercial Drivers Operations
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	Recommended as a one-year concentrator sequence. Must be enrolled in both Commercial Drivers Operations Fundamentals and Advanced Commercial Drivers Operations.

7387.D1.1	Discuss and review regulations in trucking.	
7387.D1.2	Review driver qualifications.	
7387.D1.3	Recognize key safety principles in operating a commercial vehicle.	
Domain	Engine Controls	
7387.D2.1	Describe the engine controls as well as the primary and secondary vehicle controls.	
7387.D2.2	Identify and describe the controls for starting the engine, shifting, accelerating, braking, and parking.	
7387.D2.3	Explain the acceptable operating range for oil, coolant, and electrical systems.	
Domain	Vehicle Systems	
7387.D3.1	Identify and describe all vehicle instruments and their purpose.	
7387.D3.2	Recognize basic vehicle construction and systems including suspensions, axles, engine, fuel, exhaust, air intake, electrical, drive train, brake, steering and coupling systems.	
7387.D3.3	Use systematic procedure to conduct accurate and efficient vehicle inspection.	

Next Level Programs of Study

Review Document

Domain	Vehicle Inspection
7387.D4.1	Identify damaged, loose, or missing parts.
7387.D4.2	Recognize and report system defects.
7387.D4.3	Explain why an undiscovered malfunction or vehicle problem can be unsafe and costly.
7387.D4.4	Explain the importance of having malfunctions corrected quickly.
7387.D4.5	Review Federal Motor Carrier Safety Regulations (FMCSR) regarding vehicle inspections.
7387.D4.6	Apply procedures for performing post trip inspections.
Domain	Vehicle Operation
7387.D5.1	Safely practice the basic control maneuvers in a commercial vehicle.
7387.D5.2	Demonstrate how to put the vehicle in motion and how to stop the vehicle.
7387.D5.3	Demonstrate proper application of shifting patterns and procedures to efficiently perform gear shifting maneuvers.
7387.D5.4	Demonstrate the ability to back a tractor-trailer including the ability to parallel park.
7387.D5.5	Apply the step-by-step procedures used to couple and uncouple the most standard tractor-trailer combination units.
7387.D5.6	Demonstrate the skills needed to perform a safe and effective visual search while on the road.
7387.D5.7	Review the principles of basic communication as it pertains to the professional driver.
7387.D5.8	Discuss the importance of speed and space management when it comes to operating a tractor-trailer during the day or night as well as in extreme conditions.
7387.D5.9	Identify road conditions and other road users that are a potential safety threat.
7387.D5.10	Discuss the importance of methods for carrying out evasive steering, emergency stops, off road recoveries, and proper responses to brake failures and blowouts.
7387.D5.11	Review all components and regulations of railroad crossings.
7387.D5.12	Discuss conditions that cause skids, the major type of skids, and the procedures for recovering from skids.
7387.D5.13	Review the characteristics of special rigs.

Advanced Commercial Driver Operations	
Career Cluster	Transportation
Program of Study	Commercial Driver
NLPS Sequence	C
Course Code	7388
Course Description	<i>In Advanced Commercial Drivers Operations, students will continue to practice until mastery of the pre-trip inspection, which is a critical component of passing the CDL A exam. Administrative and professional components of being a professional driver are discussed and explained including hours of service, accident reporting, personal health, communication, and Compliance, Safety, and Accountability (CAS). This course must be taken concurrently with</i>

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Mathematics
	Demonstrates understanding of:
7372.D1.1	Basic mathematic functions (addition, subtraction, multiplication, division).
7372.D1.2	Rounding numbers
7372.D1.3	Ratio problems, including examples of where or how they may be used in relation to aircraft maintenance or system(s) operation.
7372.D1.4	Proportion and percentage problems, including examples of where or how they may be used in relation to aircraft maintenance or system(s) operation.
7372.D1.5	Use of positive and negative integers in mathematical operations.
7372.D1.6	Powers and special powers.
7372.D1.7	Algebraic operations, including examples of where or how they may be used in relation to aircraft maintenance.
7372.D1.8	Definitions, descriptions, and use of geometrical terms, including but not limited to any of the following: polygon, pi, diameter, radius, and hypotenuse.
7372.D1.9	Areas of various geometrical shapes.
7372.D1.10	Volumes of various geometrical shapes.
7372.D1.11	Measurement systems.
7372.D1.12	Scientific (exponential) notation, decimal notation, fractional notation, binary notation, and conversion between these various forms of numeric notation.
7372.D1.13	Conditions or areas in which metric conversion may be necessary.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7372.D1.14	Rounding off calculations.
7372.D1.15	Use of both positive and negative integers in mathematical operations.
7372.D1.16	Precedence of operations when solving an algebraic equation.
	Skills:
7372.D1.17	Determine the square root of given numbers.
7372.D1.18	Compare two numerical values using ratios.
7372.D1.19	Compute the area of a wing.
7372.D1.20	Calculate the volume of a shape, such as a baggage compartment or fuel tank.
7372.D1.21	Compute the volume of a cylinder.

Next Level Programs of Study

Review Document

7372.D1.22	Compute compression ratio.
7372.D1.23	Compute the torque value when converting from inch-pounds to foot-pounds or from foot-pounds to inch-pounds.
7372.D1.24	Convert between fractional and decimal numbers.
Domain	Physics of Aviation
	Demonstrates understanding of:
7372.D2.1	Matter and energy.
7372.D2.2	Relationship between temperature, density, weight, and volume.
7372.D2.3	Work, power, force, and motion.
7372.D2.4	Force, area, or pressure in a specific application.
7372.D2.5	Simple machines and mechanics.
7372.D2.6	Newton's Law of Motion.
7372.D2.7	Heat and pressure.
7372.D2.8	Gas law and fluid mechanics.
7372.D2.9	Bernoulli's Principle.
7372.D2.10	Standard atmosphere and factors affecting atmospheric conditions.
7372.D2.11	Theory of flight (aerodynamics).
7372.D2.12	Primary and secondary aircraft flight controls.
7372.D2.13	Additional aerodynamic devices, including vortex generators, wing fences, and stall strips.
Domain	Demonstrates ability to identify, assess, and mitigate risks associated with:
7372.D3.1	Use of related units of measure (e.g., Celsius vs. Fahrenheit).
7372.D3.2	Changes in aircraft and engine performance due to density altitude.
7372.D3.3	Effect a repair can have on a flight surface.
7372.D3.4	Use of performance/testing data.
	Skills:
7372.D3.5	Calculate force, area, or pressure in a specific application.
7372.D3.6	Calculate horsepower.
7372.D3.7	Identify changes in pressure and velocity as a fluid passes through a venturi.
7372.D3.8	Demonstrate the mechanical advantage of various types of levers.
7372.D3.9	Design an inclined plane on paper, indicating the mechanical advantage.
7372.D3.10	Convert temperature units (e.g., from Celsius to Fahrenheit).
7372.D3.11	Determine density altitude.
7372.D3.12	Determine pressure altitude.
Domain	Regulations, Maintenance Forms, Records, and Publications
	Demonstrates understanding of:
7372.D3.13	The regulatory framework, including general subject matter of the parts of 14 CFR relevant to aircraft maintenance and mechanics.
7372.D3.14	Agency publications and guidance materials, including aircraft specifications, TCDSs, advisory circulars (AC), and airworthiness directives (AD).
7372.D3.15	Alternative Method of Compliance (AMOC) for an AD.
7372.D3.16	Manufacturer publications, including maintenance manuals, service bulletins, maintenance alerts, and master minimum equipment lists.
7372.D3.17	Maintenance terminology as defined in 14 CFR part 1 (e.g., time in service, maintenance, preventive maintenance, major alteration, major repair, minor alteration, minor repair).
7372.D3.18	Usable on (effectivity) codes in parts manuals.

Next Level Programs of Study

Review Document

7372.D3.19	Methods used to establish the serial number effectivity of an item.
7372.D3.20	Inoperative equipment.
7372.D3.21	Alert, caution, and warning indications; and the basic definition of warnings, cautions, and notes that are used in maintenance and operating manuals.
7372.D3.22	Compliance requirements for manufacturer-specified methods, techniques, and practices.
7372.D3.23	Maintenance record entry for approval for return to service after maintenance and alterations.
7372.D3.24	The purpose and use of FAA forms (e.g., FAA Forms 337, 8010-4, 8100-2, 8130-3).
7372.D3.25	Criteria and responsibility for determining whether a repair or alteration is major or minor.
7372.D3.26	Difference between approved data and acceptable data, and when each is required.
7372.D3.27	FAA databases and resources available, including TCDSs and supplemental type certificates.
7372.D3.28	FAA-approved maintenance data, including maintenance manuals and other methods, techniques, and practices acceptable by the administrator.
7372.D3.29	Maintenance record entry for approval for return to service after inspection.
7372.D3.30	Discrepancy records or placards.
7372.D3.31	Compliance requirements for manufacturer-specified maintenance and inspection intervals.
7372.D3.32	FAA-approved airworthiness limitations.
7372.D3.33	Mechanic address change notification procedures.
7372.D3.34	Recent experience requirements and how to re-establish once lost.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7372.D3.35	Adherence to warnings, cautions, or notes in maintenance and operational manuals.
7372.D3.36	Completeness or accuracy of documentation.
7372.D3.37	Complacency during documentation phase of maintenance procedures.
7372.D3.38	Determination of component applicability to a given aircraft. (Parts Catalog)
7372.D3.39	Use of SDS.
	Skills:
7372.D3.40	Locate applicable FAA aircraft specifications and FAA TCDS for an aircraft or component.
7372.D3.41	Determine applicability of an AD.
7372.D3.42	Determine maximum allowable weight of a specific aircraft.
7372.D3.43	Locate supplemental type certificates applicable to a specific aircraft.
7372.D3.44	Explain the difference between “approved data” (required for major repair/alteration) and “acceptable data” (required for minor repair/alteration).
7372.D3.45	Determine applicability of approved data for a major repair.
7372.D3.46	Determine the conformity of aircraft instrument range markings and placarding.
7372.D3.47	Determine approved replacement parts for installation on a given aircraft.
7372.D3.48	Check a Technical Standard Order (TSO) or part manufacturing authorization for the proper markings.
7372.D3.49	Determine whether a given repair or alteration is major or minor.
7372.D3.50	Use a manufacturer’s illustrated parts catalog to locate a specific part number and applicability.
7372.D3.51	Complete an FAA Form 337 for a major repair or alteration.
7372.D3.52	Examine an FAA Form 337 for accuracy.
7372.D3.53	Complete an aircraft maintenance record entry for the compliance of a reoccurring AD for a specific airframe, aircraft engine, appliance, or propeller.
7372.D3.54	Determine whether a given repair or alteration is major or minor.

Next Level Programs of Study

Review Document

7372.D3.55	Compare an equipment list for an aircraft to equipment installed.
7372.D3.56	Determine an aircraft's inspection status by reviewing the aircraft's maintenance records.
7372.D3.57	Complete a 100-hour inspection aircraft maintenance record entry.
Domain	Human Factors
	Demonstrates understanding of:
7372.D4.1	Human performance and limitations.
7372.D4.2	Human error principles.
7372.D4.3	Safety culture and organizational factors.
7372.D4.4	Teamwork and leadership.
7372.D4.5	Physical and social environment.
7372.D4.6	Shift and task turnover.
7372.D4.7	Communication/reporting of hazards.
7372.D4.8	Types of human errors.
7372.D4.9	Fatigue management and fitness for duty.
7372.D4.10	Professionalism and integrity.
7372.D4.11	Conditions/preconditions for unsafe acts.
7372.D4.12	Event investigation.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7372.D4.13	Selective reporting of hazards.
7372.D4.14	Non-invasive, condition-monitoring technologies.
	Skills:
7372.D4.15	Locate information regarding human factors errors.
7372.D4.16	Brief a shift turnover for continuity of work.
7372.D4.17	File a Malfunction or Defect Report.

Aviation Maintenance Fundamentals	
Career Cluster	Transportation
Program of Study	Aviation Maintenance
NLPS Sequence	B
Course Code	7374
Course Description	<i>Aviation Maintenance Fundamentals provides students with an understanding of aircraft materials and operation. Topics of discussion will include ground operations and servicing, cleaning and corrosion control, and weight and balance. This course will include lab elements that allow students to build necessary skills associated with the above understandings of FAA Maintenance General Section subjects.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Aviation Maintenance
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)

Next Level Programs of Study

Review Document

Additional Notes	Schools partnering with Vincennes University must offer the program of study as part of a 2-3 period block in order to meet the contact hour requirements for VU aviation maintenance courses

CONTENT STANDARDS AND COMPETENCIES		
Competency #	Competency	
Domain	Ground Operations and Servicing	
	Demonstrates understanding of:	
7374.D1.1	Hazardous materials, Safety Data Sheets (SDS), and PPE.	
7374.D1.2	Tool and hardware use and accountability.	
7374.D1.3	Foreign object damage effects.	
7374.D1.4	Types/classes of fire extinguishers and procedures.	
7374.D1.5	Aircraft securing procedures.	
7374.D1.6	Airport operation area procedures and ATC communications, including runway incursion prevention.	
7374.D1.7	Engine starting, ground operation, and aircraft taxiing procedures.	
7374.D1.8	Aircraft towing procedures.	
7374.D1.9	Aircraft oil, hydraulic and pneumatic, and deicing servicing procedures.	
7374.D1.10	Oxygen system servicing procedures.	

Next Level Programs of Study

Review Document

7374.D1.11	Characteristics of aviation gasoline and turbine fuels, including basic types and means of identification.
7374.D1.12	Use of approved grades/types of fuel in aircraft engines.
7374.D1.13	Fuel additives commonly used in the field.
7374.D1.14	Aviation fueling/defueling procedures.
7374.D1.15	Material handling.
7374.D1.16	Parts protections.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7374.D1.17	Engine start/run-up without using a checklist.
7374.D1.18	Engine starting and ground operations.
7374.D1.19	Engine starting and operation while troubleshooting or adjusting engine controls.
7374.D1.20	Ground operation of an aircraft engine with cowling removed contrary to manufacturer instructions.
7374.D1.21	Ground operation of aircraft in the vicinity of other aircraft or ground support equipment.
7374.D1.22	Preparing to tow an aircraft.
7374.D1.23	Connecting external power equipment to an aircraft.
7374.D1.24	Oxygen system servicing.
7374.D1.25	Misfueling and using incorrect or contaminated fuel.
7374.D1.26	Fueling/defueling ungrounded aircraft or using improper equipment.
	Skills:
7374.D1.27	Hazardous materials, Safety Data Sheets (SDS), and PPE.
7374.D1.28	Perform a foreign object damage control procedure.
7374.D1.29	Connect external power to an aircraft.
7374.D1.30	Prepare an aircraft for towing.
7374.D1.31	Use appropriate hand signals for the movement of aircraft.
7374.D1.32	Inspect an aircraft fuel system for water and foreign object debris (FOD) contamination.
7374.D1.33	Identify different grades of aviation fuel.
7374.D1.34	Select an approved fuel for an aircraft.
7374.D1.35	Prepare an aircraft for fueling.
7374.D1.36	Follow a checklist to start up or shut down an aircraft reciprocating or turbine engine.
7374.D1.37	Identify procedures for extinguishing fires in an engine induction system.
7374.D1.38	Secure an aircraft.
7374.D1.39	Locate and explain procedures for securing a turbine-powered aircraft after engine shutdown.
Domain	Weight and Balance
	Demonstrates understanding of:
7374.D2.1	Purpose for weighing an aircraft.
7374.D2.2	Purpose and application of weight and CG limits.
7374.D2.3	Purpose of determining CG.
7374.D2.4	Weight and balance terminology.
7374.D2.5	Determine proper empty weight configuration.
7374.D2.6	Weighing procedures, including the general preparations for weighing, with emphasis on aircraft weighing area considerations.
7374.D2.7	Jacking an aircraft.
7374.D2.8	Procedures for calculation of the following: arm, positive or negative moment, center of gravity (CG), or moment index.

Next Level Programs of Study

Review Document

7374.D2.9	Adverse loading considerations and how to calculate if adverse loading causes an out-of-limit condition.
7374.D2.10	Proper ballast placement.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7374.D2.11	Aerodynamic effect of CG that is forward or aft of CG limits.
7374.D2.12	Aerodynamic and performance effects of weight in excess of limits.
7374.D2.13	Aircraft weighing procedures.
7374.D2.14	Use of scales.
7374.D2.15	Situations and conditions when jacking an aircraft.
	Skills:
7374.D2.16	Research and explain the procedures for weighing an aircraft.
7374.D2.17	Perform weight and balance calculations.
7374.D2.18	Calculate ballast weight shift and required weight location.
7374.D2.19	Check aircraft weighing scales for calibration.
7374.D2.20	Calculate weight and balance for an aircraft after an equipment change.
7374.D2.21	Compute forward and aft loaded CG limit.
7374.D2.22	Create a maintenance record for a weight and balance change.
7374.D2.23	Compute the empty weight and empty weight CG of an aircraft.
7374.D2.24	Calculate the moment of an item of equipment.
7374.D2.25	Identify tare items.
7374.D2.26	Locate weight and balance information.
7374.D2.27	Locate datum.
7374.D2.28	Locate weight and balance placarding and limitation requirements for an aircraft.
7374.D2.29	Revise an aircraft equipment list after equipment change.
7374.D2.30	Calculate the change needed to correct an out of balance condition.
7374.D2.31	Determine an aircraft's CG range using aircraft specifications, Type Certificate Data Sheets (TCDSs), and aircraft listings.
7374.D2.32	Calculate a weight change and complete required records.
Domain	<i>Cleaning and Corrosion Control</i>
	Demonstrates understanding of:
7374.D3.1	Corrosion theory and causation.
7374.D3.2	Types and effects of corrosion.
7374.D3.3	Corrosion preventive maintenance procedures.
7374.D3.4	Corrosion preventive compounds (CPC) (e.g., waxy sealants, thin-film dielectrics).
7374.D3.5	Selection of optimal CPC and frequency of treatment.
7374.D3.6	Use of high-pressure application equipment.
7374.D3.7	Materials used for protection of airframe structures.
7374.D3.8	Corrosion identification and inspection.
7374.D3.9	Corrosion-prone areas in aircraft.
7374.D3.10	Corrosion removal and treatment procedures.
7374.D3.11	Dissimilar metals causing accelerated corrosion and role of protective barriers to mitigate this risk.
7374.D3.12	Conversion coatings.
7374.D3.13	Aircraft cleaning procedures.
7374.D3.14	Improper use of cleaners on aluminum or composite materials.

Next Level Programs of Study

Review Document

7374.D3.15	Primer materials.
7374.D3.16	Topcoat materials.
7374.D3.17	Surface preparation for a desired finishing material.
7374.D3.18	Finishing materials application techniques and practices.
7374.D3.19	Effects of ambient conditions on finishing materials.
7374.D3.20	Effects of improper surface preparation on finishing materials.
7374.D3.21	Inspection of aircraft finishes.
7374.D3.22	Regulatory requirements for replacing identification, registration markings, and placards.
7374.D3.23	Safety practices/precautions when using finishing materials (e.g., PPE, fire prevention).
7374.D3.24	Control surface balance considerations after refinishing.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7374.D3.25	Working with flammable chemicals.
7374.D3.26	Identification of materials and processes to be used for cleaning or corrosion treatment on a given part or structure to prevent further damage.
7374.D3.27	SDS PPE instructions for products during removal and treatment of corrosion.
7374.D3.28	Use of PPE when working with paints and solvents.
7374.D3.29	Ventilation.
7374.D3.30	Disposal of chemicals and waste materials.
7374.D3.31	Health concerns when using paints, solvents, finishing materials, and processes.
	Skills:
7374.D3.32	Perform a portion of an aircraft corrosion inspection.
7374.D3.33	Identify, select, and use aircraft corrosion prevention/cleaning materials.
7374.D3.34	Apply corrosion prevention/coating materials.
7374.D3.35	Inspect finishes and identify defects.
7374.D3.36	Inspect an aircraft compartment for corrosion.
7374.D3.37	Identify procedures to clean and protect plastics.
7374.D3.38	Determine location and size requirements for aircraft registration numbers.
7374.D3.39	Prepare composite surface for painting.
7374.D3.40	Identify finishing materials and appropriate thinners.
7374.D3.41	Layout and mask a surface in preparation for painting.
7374.D3.42	Prepare metal surface for painting.
7374.D3.43	Determine what paint system can be used on a given aircraft.
7374.D3.44	Apply etch solution and conversion coating.
7374.D3.45	Identify types of protective finishes.

Advanced Aviation Maintenance

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	<i>Aircraft Drawings</i>
	Demonstrates understanding of:

7376.D1.1	Drawings, blueprints, sketches, charts, graphs, and system schematics, including commonly used lines, symbols, and terminology.
7376.D1.2	Terms used in conjunction with aircraft drawings, blueprints, or system schematics.
7376.D1.3	Repair or alteration of an aircraft system or component(s) using drawings, blueprints, or system schematics to determine whether it conforms to its type design.
7376.D1.4	Inspection of an aircraft system or component(s) using drawings, blueprints, or system schematics.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7376.D1.5	Interpretation of plus or minus tolerances as depicted on aircraft drawings.
7376.D1.6	Identification of the current version and applicability of drawing being used.
7376.D1.7	Applicability of the drawing or schematic to the particular aircraft by model and serial number.
7376.D1.8	Specifications for design of alterations and repairs.
	Skills:
7376.D1.9	Identify the meaning of lines and symbols used in an aircraft drawing.
7376.D1.10	Interpret dimensions used in an aircraft drawing.
7376.D1.11	Identify changes on an aircraft drawing.
7376.D1.12	Identification of the current version and applicability of drawing being used.
7376.D1.13	Determine material requirements from an aircraft drawing.
7376.D1.14	Interpret graphs and charts.
Domain	Fundamentals of Electricity and Electronics
	Demonstrates understanding of:
7376.D2.1	Electrostatic discharge, Magnetism, Voltage, Electron theory (conventional flow vs. electron flow), Current, Electrical circuit drawings.
7376.D2.2	Electrical laws and theory, Ohm's Law, Resistance, Power.
7376.D2.3	Resistor types and color coding.
7376.D2.4	Protective devices, including fuses, circuit breakers, and current limiters.
7376.D2.5	Controlling devices, including switches and relays.
7376.D2.6	Direct current (DC) electrical circuits, Series circuits.
7376.D2.7	Kirchhoff's Laws, Faraday's Law, Lenz's Law, Watt's Law
7376.D2.8	Total resistance, Resistance in series, Parallel circuits, Resistance in parallel.
7376.D2.9	Complex/combined circuits, Capacitance in a circuit, Inductance in a circuit,
7376.D2.10	Alternating current (AC) electrical circuits.
7376.D2.11	Impedance
7376.D2.12	Transformers.
7376.D2.13	Electrical measurement tools, principles, and procedures.
7376.D2.14	Circuit continuity, Aircraft batteries
7376.D2.15	Semiconductors, including diodes, transistors, and integrated circuits.
7376.D2.16	Digital logic, including RAM, ROM, NVRAM, logic gates, inverter, rectifier, and flip flop.
7376.D2.17	Binary numbers, AC and DC motors, Right-hand motor rule, Regulation.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7376.D2.18	Working around batteries
7376.D2.19	Handling, storage, and inspection of different types of batteries (i.e., lead acid, NiCad, lithium ion, gel cell
7376.D2.20	High-voltage circuits (e.g., strobe lighting).
	Skills:

Next Level Programs of Study

Review Document

7376.D2.21	Perform circuit continuity test.
7376.D2.22	Measure voltage.
7376.D2.23	Measure current.
7376.D2.24	Measure resistance.
7376.D2.25	Test a switch or relay.
7376.D2.26	Test a fuse or circuit breaker.
7376.D2.27	Read and interpret aircraft electrical circuit diagrams, and symbols, including solid state devices and logic functions.
7376.D2.28	Troubleshoot a circuit.
7376.D2.29	Identify symbols used in electrical and electronic schematic diagrams (e.g., grounds, shields, resistors, capacitors, fuses, circuit breakers, batteries, diodes, transistors, and integrated circuits).
7376.D2.30	Demonstrate how to test for short-circuit and open-circuit conditions.
7376.D2.31	Measure voltage drop across a resistor.
7376.D2.32	Determine or measure for open electrical circuits.
7376.D2.33	Inspect an aircraft battery.
7376.D2.34	Service an aircraft battery.
Domain	<i>Aircraft Materials, Hardware, and Processes</i>
	Demonstrates understanding of:
7376.D2.34	Suitability and compatibility of materials and hardware used for maintenance.
7376.D2.35	Materials commonly used in aircraft and their general application.
7376.D2.36	Forces placed on aircraft materials (e.g., tension, compression, torsion, bending, strain, and shear).
7376.D2.37	Heat treatment and metal working processes.
7376.D2.38	Hardware commonly used in aircraft (e.g., bolts, nuts, screws, pins, washers, turnlock fasteners, cables, cable fittings, and rigid line couplings).
7376.D2.39	Identification markings on materials and hardware.
7376.D2.40	Torquing tools, principles, and procedures.
7376.D2.41	Safety wire and safety clip requirements and techniques.
7376.D2.42	Cable construction and swaging.
7376.D2.43	Precision measurement tools, principles, and procedures.
7376.D2.44	Soldering preparation, types of solder, and flux usage.
7376.D2.45	Characteristics of acceptable welds.
7376.D2.46	Characteristics of unacceptable welds.
7376.D2.47	Procedures for weld repairs.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7376.D2.48	Use of personal protective equipment (PPE).
7376.D2.49	Used hardware or suspected unapproved parts (SUPS).
7376.D2.50	Improper torque.
7376.D2.51	Torquing techniques on critical, highly stressed fasteners.
	Skills:
7376.D2.52	Distinguish between heat-treated and non-heat-treated aluminum alloys.
7376.D2.53	Select the correct aluminum alloy for a structural repair.
7376.D2.54	Identify aircraft materials and hardware based on manufacturer's markings.
7376.D2.55	Determine suitability of materials for aircraft repairs.

Next Level Programs of Study

Review Document

7376.D2.56	Select and install aircraft bolts.
7376.D2.57	Identify rivets by physical characteristics.
7376.D2.58	Determine and properly torque aircraft hardware.
7376.D2.59	Install safety wire on nuts, bolts, and turnbuckles.
7376.D2.60	Identify aircraft control cable components.
7376.D2.61	Fabricate a cable assembly using a swaged-end fitting.
7376.D2.62	Inspect and check welds.
7376.D2.63	Check for proper calibration of a micrometer.
7376.D2.64	Check the concentricity of a shaft.
7376.D2.65	Make precision measurements with an instrument that has a Vernier scale.
Domain	Fluid Lines and Fittings
	Demonstrates understanding of:
7376.D3.1	Tubing and hose materials, applications, sizes, and fittings.
7376.D3.2	Importance of using a torque wrench when securing fluid hose and line fittings.
7376.D3.3	Rigid line or flexible hose material identification.
7376.D3.4	Use of torque seal or similar witness techniques after installing critical fluid hose and line fittings.
7376.D3.5	Rigid line fabrication, installation, and inspection techniques/practices.
7376.D3.6	Flexible hose fabrication, installation, and inspection techniques/practices.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7376.D3.7	Hazardous fluids.
7376.D3.8	High-pressure fluid systems.
7376.D3.9	Use of required safety equipment.
7376.D3.10	System configuration prior to and during maintenance.
7376.D3.11	A twisted hose.
7376.D3.12	Use of tools while applying torque to a fluid line.
7376.D3.13	A loosened fitting or a hose that has moved out of position.
	Skills:
7376.D3.14	Identify fluid lines, pneumatic lines, and fittings.
7376.D3.15	Perform a rigid line or flexible hose inspection.
7376.D3.16	Fabricate a rigid line with a flare and a bend.
7376.D3.17	Install an aircraft rigid line.
7376.D3.18	Fabricate a flareless-fitting-tube connection.
7376.D3.19	Fabricate a flexible hose.
7376.D3.20	Install an aircraft flexible hose.
Domain	Inspection Concepts and Techniques
	Demonstrates understanding of:
7376.D4.1	Measuring tools, including calipers, micrometers, and gauges.
7376.D4.2	Calibration and tool accuracy requirements.
7376.D4.3	Aircraft inspection programs (e.g., progressive, 100-hour, annual, and other FAA-approved inspections).
7376.D4.4	Nondestructive Testing (NDT) procedures and methods.
7376.D4.5	Aircraft inspection methods and tools for materials, hardware, and processes.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7376.D4.6	Using precision measuring instruments.

CONTENT STANDARDS AND COMPETENCIES

Competency #	Competency
Domain	Environmental Systems
	Demonstrates understanding of:
7378.D1.1	Pressurization systems.
7378.D1.2	Bleed air heating.
7378.D1.3	Aircraft instrument cooling
7378.D1.4	Exhaust heat exchanger and system component(s) function, operation, and inspection procedures.
7378.D1.5	Combustion heater and system component(s) function, operation, and inspection procedures.
7378.D1.6	Vapor-cycle system and system component(s) operation, servicing, and inspection procedures.
7378.D1.7	Air-cycle system and system component(s) operation and inspection procedures.
7378.D1.8	Cabin pressurization and system component(s) operation and inspection procedures.
7378.D1.9	Types of oxygen systems and oxygen system component(s) operation (e.g., chemical generator, pressure cylinder).
7378.D1.10	Oxygen system maintenance and inspection procedures.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7378.D1.11	Oxygen system maintenance.
7378.D1.12	Recovery of vapor-cycle refrigerant.
7378.D1.13	Handling or performing maintenance on, chemical oxygen generating systems.
7378.D1.14	Storage, handling, and use of compressed gas cylinder and high-pressure systems.

Next Level Programs of Study

Review Document

7378.D1.15	Manufacturer's recommended servicing procedures, including refrigerant types.
7378.D1.16	Maintenance of combustion heaters.
	Skills:
7378.D1.17	Inspect an oxygen system.
7378.D1.18	Purge an oxygen system prior to servicing.
7378.D1.19	Service an oxygen system.
7378.D1.20	Clean and inspect a pilot emergency oxygen mask and supply hoses.
7378.D1.21	Inspect an oxygen system pressure regulator.
7378.D1.22	Inspect an oxygen system cylinder for serviceability.
7378.D1.23	Inspect a chemical oxygen generator for serviceability and safe handling.
7378.D1.24	Locate the procedures to troubleshoot a combustion heater.
7378.D1.25	Locate the procedures for servicing a refrigerant (vapor-cycle) system.
7378.D1.26	Inspect a combustion heater fuel system for leaks.
7378.D1.27	Locate the troubleshooting procedures for an air-cycle system.
7378.D1.28	Troubleshoot an air-cycle air conditioning system.
7378.D1.29	Inspect a cabin heater system equipped with an exhaust heat exchanger for cracks.
7378.D1.30	Clean and inspect an outflow valve for a pressurization system.
7378.D1.31	Locate troubleshooting procedures for a pressurization system.
Domain	Aircraft Fuel Systems
	Demonstrates understanding of:
7378.D2.1	Fuel system types.
7378.D2.2	Fuel system components, including filters and selector valves.
7378.D2.3	Aircraft fuel tanks/cells
7378.D2.4	Fuel flow.
7378.D2.5	Fuel transfer, fueling, and defueling.
7378.D2.6	Fuel jettisoning/dump systems.
7378.D2.7	Characteristics of fuel types.
7378.D2.8	Fuel system maintenance and inspection.
7378.D2.9	Fuel quantity indication.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7378.D2.10	Fuel system maintenance.
7378.D2.11	Fuel system contamination.
7378.D2.12	Fuel spills.
7378.D2.13	Fuel system maintenance requiring fuel tank entry.
7378.D2.14	Defueling aircraft.
	Skills:
7378.D2.15	Inspect, check, troubleshoot, or repair a fuel system.
7378.D2.16	Inspect a metal, bladder, or integral fuel tank.
7378.D2.17	Troubleshoot and repair aircraft fuel system.
7378.D2.18	Inspect a fuel selector valve.
7378.D2.19	Inspect and check manually operated fuel valves for proper operation and leaks.
7378.D2.20	Troubleshoot a fuel valve problem.
7378.D2.21	Drain fuel system sump(s).
7378.D2.22	Service a fuel system strainer.
7378.D2.23	Inspect a fuel quantity indicating system.

Next Level Programs of Study

Review Document

7378.D2.24	Locate fuel system operating instructions.
7378.D2.25	Locate fuel system inspection procedures.
7378.D2.26	Locate fuel system cross feed procedures.
7378.D2.27	Locate fuel system required placards.
7378.D2.28	Locate fuel system defueling procedures.
7378.D2.29	Troubleshoot fuel pressure warning system.
7378.D2.30	Locate troubleshooting procedures for fuel temperature systems.
7378.D2.31	Remove and install a fuel quantity transmitter.
7378.D2.32	Troubleshoot fuel quantity indicating system.
Domain	Water and Waste Systems
	Demonstrates understanding of:
7378.D3.1	Potable water system components and operation.
7378.D3.2	Lavatory waste system components and operation.
7378.D3.3	Inspection and servicing requirements for water and waste systems.
Domain	Demonstrates ability to identify, assess, and mitigate risks associated with:
7378.D4.4	Servicing lavatory waste systems, including use of safety equipment.
	Skills:
7378.D4.5	Locate and explain the procedures for servicing a lavatory waste system.
7378.D4.6	Locate and explain the procedures for servicing a potable water system.
Domain	Ice and Rain Control Systems
	Demonstrates understanding of:
7378.D5.1	Aircraft icing causes/effects.
7378.D5.2	Ice detection systems.
7378.D5.3	Aircraft and powerplant anti-ice systems and components.
7378.D5.4	De-ice systems and components.
7378.D5.5	Wiper blade, chemical, and pneumatic bleed air rain control systems.
7378.D5.6	Anti-icing and de-icing system maintenance.
7378.D5.7	Environmental conditions that degrade vision.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7378.D5.8	System testing or maintenance.
7378.D5.9	Storage and handling of deicing fluids.
7378.D5.10	Selection and use of cleaning materials for heated windshields.
	Skills:
7378.D5.11	Inspect and operationally check pitot-static anti-ice system.
7378.D5.12	Inspect and operationally check deicer boot.
7378.D5.13	Clean a pneumatic deicer boot.
7378.D5.14	Troubleshoot an electrically heated pitot system.
7378.D5.15	Inspect thermal anti-ice systems.
7378.D5.16	Inspect and operationally check an electrically heated windshield.
7378.D5.17	Locate and explain the procedures for inspecting an electrically operated windshield wiper system.
7378.D5.18	Locate and explain the procedures for replacing blades on a windshield wiper system.
7378.D5.19	Locate and explain the procedures for inspecting a pneumatic rain removal system.
Domain	Airframe Fire Protection Systems
	Demonstrates understanding of:

Next Level Programs of Study

Review Document

7378.D5.20	Types of fires and aircraft fire zones.
7378.D5.21	Overheat and fire detection and warning systems.
7378.D5.22	Overheat and fire detection system maintenance and inspection.
7378.D5.23	Smoke and carbon monoxide detection systems.
7378.D5.24	Fire extinguishing agents.
7378.D5.25	Types of fire extinguishing systems.
7378.D5.26	Fire extinguishing system maintenance and inspection requirements.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7378.D5.27	Maintenance on circuits associated with fire bottle squibs.
7378.D5.28	Use of PPEs when working on or testing fire extinguishing systems.
7378.D5.29	Fire extinguishing agents.
	Skills:
7378.D5.30	Troubleshoot an aircraft fire detection or extinguishing system.
7378.D5.31	Determine proper container pressure for an installed fire extinguisher system.
7378.D5.32	Identify maintenance procedures for fire detection and extinguishing system(s) and system component(s).
7378.D5.33	Inspect a smoke and toxic gas detection system.
7378.D5.34	Inspect a carbon monoxide detector.
7378.D5.35	Locate and explain the procedures for checking a smoke detection system.
7378.D5.36	Locate and explain the procedures for inspecting an overheat detection system.
7378.D5.37	Inspect fire protection system cylinders and check for hydrostatic test date.
7378.D5.38	Inspect fire detection/protection system.
7378.D5.39	Perform operational check of fire detection/protection system.
7378.D5.40	Inspect fire extinguishing agent bottle discharge cartridge.
7378.D5.41	Inspect a continuous-loop type fire detection system.
Domain	Rotorcraft Fundamentals
	Demonstrates understanding of:
7378.D1.1	Rotorcraft aerodynamics.
7378.D1.2	Flight controls.
7378.D1.3	Transmissions.
7378.D1.4	Rigging requirements for rotary wing aircraft.
7378.D1.5	Design, type, and operation of rotor systems.
7378.D1.6	Helicopter skid shoe and tube inspection.
7378.D1.7	Rotor blade functions and construction.
7378.D1.8	Rotor vibrations, track, and balance.
7378.D1.9	Drive system vibrations and inspection.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7378.D1.10	Working around helicopter blades during ground operations.
7378.D1.11	Ground-handling procedures.
7378.D1.12	Ground operations and functional tests.
7378.D1.13	Maintenance and inspection of rotorcraft systems and components.
	Skills:
7378.D1.14	Locate components of a helicopter rotor system.
7378.D1.15	Locate helicopter rotor blade track and balance procedures.
7378.D1.16	Locate and explain procedures needed to rig helicopter controls.

Next Level Programs of Study

Review Document

7378.D1.17	Locate and explain procedures to track and balance a rotor system.
Domain	Aircraft Electrical Systems
	Demonstrates understanding of:
7378.D2.1	Generators, DC generation systems, and DC power distribution systems.
7378.D2.2	Alternators, AC generation systems, and AC power distribution systems.
7378.D2.3	Starter generators.
7378.D2.4	Constant speed drive (CSD) and integrated drive generator (IDG) systems and components.
7378.D2.5	Voltage regulators and over-volt and overcurrent protection.
7378.D2.6	Inverter systems.
7378.D2.7	Aircraft wiring sizes, types, selection, installation, and circuit protection devices.
7378.D2.8	Derating factors in switch selection.
7378.D2.9	Aircraft wiring shielding.
7378.D2.10	Aircraft lightning protection.
7378.D2.11	Instrument or instrument panel removal and installation.
7378.D2.12	Aircraft lighting systems.
7378.D2.13	Electrical system troubleshooting.
7378.D2.14	Soldering preparation, types of solder, and flux usage.
7378.D2.15	Aircraft electrical connectors, splices, terminals, and switches.
7378.D2.16	Electrical system measurement, adjustment, and testing.
7378.D2.17	Aircraft battery troubleshooting and maintenance.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7378.D2.18	Testing/troubleshooting electrical systems or components.
7378.D2.19	Connecting or disconnecting external power.
7378.D2.20	Maintenance on energized circuits/systems.
7378.D2.21	Maintenance in areas containing aircraft wiring.
7378.D2.22	Routing and securing wires and wire bundles.
7378.D2.23	Selecting the size of wire in an electrical circuit.
7378.D2.24	Selection or installation of wire terminals.
7378.D2.25	Effects of soldering.
7378.D2.26	Soldering practices.
	Skills:
7378.D2.27	Inspect aircraft wiring to verify installation and routing.
7378.D2.28	Perform wire terminating and splicing.
7378.D2.29	Assemble an aircraft electrical connector.
7378.D2.30	Use a wiring circuit diagram to identify components.
7378.D2.31	Solder aircraft wiring.
7378.D2.32	Troubleshoot an airframe electrical circuit.
7378.D2.33	Install airframe electrical wiring, switches, or protective devices.
7378.D2.34	Secure wire bundles.
7378.D2.35	Determine an electrical load in a given aircraft system.
7378.D2.36	Install bonding jumpers.
7378.D2.37	Check output voltage of a DC generator.
7378.D2.38	Check the resistance of an electrical system component.
7378.D2.39	Inspect generator brush serviceability and brush spring tension.
7378.D2.40	Inspect and check anti-collision, position, and landing lights for proper operation.

Next Level Programs of Study

Review Document

7378.D2.41	Inspect components in an electrical system.
7378.D2.42	Troubleshoot a DC electrical system supplied by an AC electrical system.
7378.D2.43	Identify components in an electrical schematic where AC is rectified to a DC voltage.
7378.D2.44	Perform a continuity test to verify the condition of a conductor.
7378.D2.45	Perform a test on a conductor for a short to ground.
7378.D2.46	Perform a test on a conductor for a short to other conductors.
Domain	Aircraft Instrument Systems
	Demonstrates understanding of:
7378.D3.1	Annunciator indicating systems and the meaning of warning, caution, and advisory lights.
7378.D3.2	Magnetic compass inspection and operation.
7378.D3.3	Magnetic compass swinging procedures.
7378.D3.4	Pressure indicating instruments.
7378.D3.5	Temperature indicating instruments.
7378.D3.6	Position indication sensors and instruments.
7378.D3.7	Gyroscopic instruments.
7378.D3.8	Direction indicating instruments.
7378.D3.9	Instrument vacuum and pneumatic systems.
7378.D3.10	Pitot-static system.
7378.D3.11	Fuel quantity indicating systems.
7378.D3.12	Instrument range markings.
7378.D3.13	Electronic displays.
7378.D3.14	Electrostatic sensitive devices.
7378.D3.15	Built-in test equipment.
7378.D3.16	Electronic flight instrument system.
7378.D3.17	Engine indication and crew alerting system.
7378.D3.18	Head-up displays (HUDs).
7378.D3.19	14 CFR parts 43 and 91 requirements for static system leak checks.
7378.D3.20	Instrument limitations, conditions, and characteristics.
7378.D3.21	Angle of attack and stall warning systems.
7378.D3.22	Takeoff and landing gear configuration warning systems.
7378.D3.23	Bonding and protection.
7378.D3.24	Instrument or instrument panel removal and installation.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7378.D3.25	Use of pressurized air and water during maintenance or cleaning of aircraft instrument systems.
7378.D3.26	Actions in response to a reported intermittent warning or caution annunciator light illumination.
7378.D3.27	Performing maintenance on equipment identified as electrostatic-sensitive
7378.D3.28	Handling of mechanical gyros or instruments containing mechanical gyros.
7378.D3.29	Performing a pitot/static system test.
	Skills:
7378.D3.30	Perform a static system leak test.
7378.D3.31	Remove and install an instrument.
7378.D3.32	Install range marks on an instrument glass.
7378.D3.33	Determine barometric pressure using an altimeter.

Next Level Programs of Study

Review Document

7378.D3.34	Check for proper range markings on an instrument.
7378.D3.35	Inspect a magnetic compass.
7378.D3.36	Locate the procedures for troubleshooting a vacuum-operated instrument system.
7378.D3.37	Select proper altimeter for installation on a given aircraft.
7378.D3.38	Identify exhaust gas temperature system components.
7378.D3.39	Inspect a vacuum system filter for serviceability.
7378.D3.40	Adjust gyro/instrument air pressure/vacuum.
7378.D3.41	Inspect an aircraft's alternate air (static) source.
7378.D3.42	Locate and explain the adjustment procedures for a stall warning system.
7378.D3.43	Inspect outside air temperature gauge for condition and operation.
Domain	Communications, Light Signals, and Runway Lighting Systems
	Demonstrates understanding of:
7378.D4.1	Radio operating principles.
7378.D4.2	Radio components.
7378.D4.3	Antenna, static discharge wicks, and avionics identification, inspection, and mounting requirements.
7378.D4.4	Interphone and intercom systems.
7378.D4.5	Very high frequency (VHF), high frequency (HF), and SATCOM systems.
7378.D4.6	Aircraft Communication Addressing and Reporting System (ACARS) theory, components, and operation.
7378.D4.7	Emergency locator transmitter (ELT).
7378.D4.8	Automatic direction finder (ADF).
7378.D4.9	VHF omnidirectional range (VOR) theory, components, and operation.
7378.D4.10	Distance measuring equipment (DME) theory, components, and operation.
7378.D4.11	Instrument landing system (ILS) theory, components, and operation.
7378.D4.12	Global positioning system (GPS) theory, components, and operation.
7378.D4.13	Traffic collision avoidance system (TCAS), theory, components, and operation.
7378.D4.14	Weather radar.
7378.D4.15	Ground proximity warning system (GPWS) theory, components, and operation.
7378.D4.16	Autopilot theory, components, and operation.
7378.D4.17	Auto-throttle theory, components, and operation.
7378.D4.18	Stability augmentation systems (SAS) (Rotorcraft).
7378.D4.19	Radio altimeter (RA) theory, components, and operation.
7378.D4.20	Automatic Dependent Surveillance-Broadcast (ADS-B) theory, components, and operation.
7378.D4.21	Transponder/encoder system.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7378.D4.22	ELT testing procedures.
7378.D4.23	Performing maintenance on high power/high frequency systems (e.g., weather radar and SATCOM).
7378.D4.24	Wire harness routing.
7378.D4.25	Mounting antennas.
7378.D4.26	Electro-static discharge.
7378.D4.27	Working around live electrical systems.
	Skills:
7378.D4.28	Make a list of required placards for communication and navigation avionic equipment.

Next Level Programs of Study

Review Document

7378.D4.29	Locate and explain autopilot inspection procedures.
7378.D4.30	List autopilot major components.
7378.D4.31	Locate and identify navigation and communication antennas.
7378.D4.32	Check VHF communications for operation.
7378.D4.33	Inspect a coaxial cable installation for security.
7378.D4.34	Check an emergency locator transmitter for operation.
7378.D4.35	Inspect ELT batteries for expiration date and locate proper testing procedures.
7378.D4.36	Inspect electronic equipment mounting base for security and condition.
7378.D4.37	Inspect electronic equipment shock mount bonding jumpers for resistance.
7378.D4.38	Inspect static discharge wicks for security and resistance.
7378.D4.39	Inspect a radio installation for security.
7378.D4.40	Locate and explain the installation procedures for antennas, including mounting and coaxial connections.
Domain	Metallic Structures
	Demonstrates understanding of:
7378.D5.1	Inspection/testing of metal structures.
7378.D5.2	Types of sheet metal defects.
7378.D5.3	Selection of sheet metal repair materials.
7378.D5.4	Layout, forming, and drilling of sheet metal components.
7378.D5.5	Selection of rivets, hardware, and fasteners for a sheet metal repair.
7378.D5.6	Heat treatment processes for aluminum.
7378.D5.7	Rivet layout.
7378.D5.8	Rivet removal and installation methods.
7378.D5.9	Maintenance safety practices/precautions for sheet metal repairs or fabrications.
7378.D5.10	Flame welding gases.
7378.D5.11	Storage/handling of welding gases.
7378.D5.12	Flame welding practices and techniques.
7378.D5.13	Inert-gas welding practices and techniques.
7378.D5.14	Purpose and types of shielding gases.
7378.D5.15	Types of steel tubing welding repairs.
7378.D5.16	Procedures for weld repairs.
7378.D5.17	Types of structures and their characteristics.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7378.D5.18	Selection of repair materials.
7378.D5.19	Utilizing maintenance safety practices/precautions for sheet metal structures.
7378.D5.20	Use of PPE when working with sheet metal structures.
7378.D5.21	Handling, storage, and use of compressed gas bottles.
7378.D5.22	Use of electric welding equipment.
	Skills:
7378.D5.23	Install and remove solid rivets.
7378.D5.24	Install and remove a blind rivet.
7378.D5.25	Determine applicability of sheet metal for a repair in a specific application.
7378.D5.26	Select and install special purpose fasteners.
7378.D5.27	Design a repair using a manufacturer's structural repair manual.
7378.D5.28	Prepare and install a patch to repair an aircraft or component.

Next Level Programs of Study

Review Document

7378.D5.29	Make a drawing of a repair, including the number of rivets and size of sheet metal required.
7378.D5.30	Remove a repair that was installed with rivets.
7378.D5.31	Trim and form a piece of sheet metal to fit a prepared area.
7378.D5.32	Fabricate an aluminum part in accordance with a drawing.
7378.D5.33	Determine a rivet pattern for a specific repair.
7378.D5.34	Countersink rivet holes in sheet metal.
7378.D5.35	Perform a repair on a damaged aluminum sheet.
7378.D5.36	Determine extent of damage and decide if metallic structure is repairable.
Domain	Non-metallic Structures
	Demonstrates understanding of:
7378.D6.1	Wood structures, including inspection techniques, tools, and practices for wood structures.
7378.D6.2	Effects of moisture/humidity on wood and fabric coverings.
7378.D6.3	Types and general characteristics of wood used in aircraft structures.
7378.D6.4	Permissible substitutes and other materials used in the construction and repair of wood structures.
7378.D6.5	Acceptable and unacceptable wood defects.
7378.D6.6	Wood repair techniques and practices.
7378.D6.7	Factors used in determining the proper type covering material.
7378.D6.8	Types of approved aircraft covering material.
7378.D6.9	Seams commonly used with aircraft covering.
7378.D6.10	Covering textile terms.
7378.D6.11	Structure surface preparation.
7378.D6.12	Covering methods commonly used.
7378.D6.13	Covering means of attachment.
7378.D6.14	Areas on aircraft covering most susceptible to deterioration.
7378.D6.15	Aircraft covering preservation/restoration.
7378.D6.16	Inspection of aircraft covering.
7378.D6.17	Covering repair techniques and practices.
7378.D6.18	Inspection/testing of composite structures.
7378.D6.19	Types of composite structure defects.
7378.D6.20	Composite structure fiber, core, and matrix materials.
7378.D6.21	Composite materials storage practices and shelf life.
7378.D6.22	Composite repair methods, techniques, fasteners, and practices.
7378.D6.23	Thermoplastic material inspection/types of defects.
7378.D6.24	Thermoplastic material storage and handling.
7378.D6.25	Thermoplastic material installation procedures.
7378.D6.26	Care and maintenance of windows.
7378.D6.27	Window temporary and permanent repairs.
7378.D6.28	Maintenance safety practices/precautions for composite materials/structures, and windows.
7378.D6.29	Inspecting restraints and upholstery.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7378.D6.30	Selection of glue (adhesive) or fasteners for aircraft structure.
7378.D6.31	Composite structure repairs.
7378.D6.32	Exposure to materials used in composite repair.
7378.D6.33	Storage of composite materials.

Next Level Programs of Study

Review Document

7378.D6.34	Measuring and mixing of materials associated with composite construction.
7378.D6.35	Use of materials that are not part of an approved repair system.
7378.D6.36	Material shelf-life.
	Skills:
7378.D6.37	Identify appropriate fasteners on composite structures.
7378.D6.38	Inspect and repair fiberglass.
7378.D6.39	Inspect composite, plastic, or glass-laminated structures.
7378.D6.40	Clean and inspect acrylic type windshields.
7378.D6.41	Locate and explain procedures for a temporary repair to a side window.
7378.D6.42	Locate and explain the procedures for tying a modified seine knot.
7378.D6.43	Prepare composite surface for painting.
7378.D6.44	Perform a tap test on composite material.
7378.D6.45	Locate and explain repair standard dimensions.
7378.D6.46	Locate and explain repair procedures for elongated bolt holes.
7378.D6.47	Determine extent of damage and decide if nonmetallic structure is repairable.
7378.D6.48	Perform lay up for a repair to a composite panel, including preparation for vacuum bagging, using a manufacturer's repair manual.
Domain	Hydraulics and Pneumatics Systems
	Demonstrates understanding of:
7378.D7.1	Hydraulic system components and fluids.
7378.D7.2	Hydraulic system operation.
7378.D7.3	Hydraulic system servicing requirements.
7378.D7.4	Hydraulic system inspection, check, servicing, and troubleshooting.
7378.D7.5	Pneumatic system types and components.
7378.D7.6	Pneumatic system servicing requirements.
7378.D7.7	Servicing, function, and operation of accumulators.
7378.D7.8	Types of hydraulic/pneumatic seals and fluid/seal compatibility.
7378.D7.9	Hoses, lines, and fittings.
7378.D7.10	Pressure regulators, restrictors, and valves.
7378.D7.11	Filter maintenance procedures.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7378.D7.12	Relieving system pressure prior to system servicing or disassembly.
7378.D7.13	High pressure gases and fluids.
7378.D7.14	Storage and handling of hydraulic fluids.
7378.D7.15	Cross-contamination of hydraulic fluids.
7378.D7.16	Compatibility between hydraulic seals and hydraulic fluids.
	Skills:
7378.D7.17	Identify different types of hydraulic fluids.
7378.D7.18	Identify different packing seals.
7378.D7.19	Install seals and backup rings in a hydraulic component.
7378.D7.20	Remove and install a selector valve.
7378.D7.21	Check a pressure regulator and adjust as necessary.
7378.D7.22	Remove, clean, inspect, and install a hydraulic system filter.
7378.D7.23	Service a hydraulic system accumulator.
7378.D7.24	Service a hydraulic system reservoir.

Next Level Programs of Study

Review Document

7378.D7.25	Remove, install, and perform an operational check of a hydraulic pump.
7378.D7.26	Locate procedures for checking pneumatic/bleed air overheat warning systems.
7378.D7.27	Purge air from a hydraulic system.
7378.D7.28	Remove and install a system pressure relief valve.
7378.D7.29	Inspect a hydraulic or pneumatic system for leaks.
7378.D7.30	Troubleshoot a hydraulic or pneumatic system for leaks.
7378.D7.31	Locate and explain hydraulic fluid servicing instructions and identify/select fluid for a given aircraft.
7378.D7.32	Locate installation procedures for a seal, backup ring, or gasket.
Domain	Landing Gear Systems
	Demonstrates understanding of:
7378.D8.1	Fixed and retractable landing gear systems.
7378.D8.2	Fixed and retractable landing gear components.
7378.D8.3	Landing gear strut servicing/lubrication.
7378.D8.4	Inspection of bungee and spring steel landing gear systems.
7378.D8.5	Steering systems.
7378.D8.6	Landing gear position and warning system inspection, check, and servicing.
7378.D8.7	Brake assembly servicing and inspection.
7378.D8.8	Anti-skid system components and operation.
7378.D8.9	Wheel, brake, and tire construction.
7378.D8.10	Tire storage, care, and servicing.
7378.D8.11	Landing gear and tire and wheel safety and inspection.
7378.D8.12	Brake actuating systems.
7378.D8.13	Alternative landing gear systems (e.g., skis, floats).
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7378.D8.14	Landing gear and tire and wheel practices/precautions.
7378.D8.15	Use of aircraft jacks.
7378.D8.16	High pressure fluids and gases.
7378.D8.17	Storage and handling of hydraulic fluids.
7378.D8.18	High pressure strut or system disassembly.
7378.D8.19	Operation of retractable landing gear systems around personnel.
	Skills:
7378.D8.20	Inspect and service landing gear.
7378.D8.21	Inspect, check, and service an anti-skid system.
7378.D8.22	Locate and explain procedures for checking operation of an anti-skid warning system.
7378.D8.23	Locate and explain troubleshooting procedures for an anti-skid system.
7378.D8.24	Jack aircraft.
7378.D8.25	Troubleshoot a landing gear retraction check.
7378.D8.26	Inspect wheels, brakes, bearings, and tires.
7378.D8.27	Remove and replace brake lining(s).
7378.D8.28	Service landing gear air/oil shock strut.
7378.D8.29	Bleed air from a hydraulic brake system.
7378.D8.30	Troubleshoot hydraulic brake systems.
7378.D8.31	Remove, inspect, and install a wheel brake assembly.
7378.D8.32	Inspect a tire for defects.

Next Level Programs of Study

Review Document

7378.D8.33	Locate tire storage practices.
7378.D8.34	Replace air/oil shock strut air valve.
7378.D8.35	Troubleshoot an air/oil shock strut.
7378.D8.36	Service a nose-wheel shimmy damper.
7378.D8.37	Inspect nose-wheel steering system for proper adjustment.
7378.D8.38	Locate and explain the process for checking landing gear alignment.
7378.D8.39	Replace master brake cylinder packing seals.
7378.D8.40	Troubleshoot aircraft steering system.
7378.D8.41	Identify landing gear position and warning system components.
7378.D8.42	Troubleshoot landing gear position and warning systems.
7378.D8.43	Inspect and repair landing gear position indicating system.
7378.D8.44	Adjust the operation of a landing gear warning system.
7378.D8.45	Remove, install, and adjust a landing gear down-lock switch.
7378.D8.46	Inspect a brake for serviceability.
7378.D8.47	Troubleshoot nose-wheel shimmy.
7378.D8.48	Inspect tube landing gear for damage.
Domain	Airframe Inspection
	Demonstrates understanding of:
7378.D9.1	Inspection requirements under 14 CFR part 91.
7378.D9.2	Maintenance recordkeeping requirements under 14 CFR part 43.
7378.D9.3	Requirements for complying with ADs.
7378.D9.4	Identification of life-limited parts and their replacement interval.
7378.D9.5	Special inspections.
7378.D9.6	Use of FAA-approved data.
7378.D9.7	Compliance with service letters, service bulletins, instructions for continued airworthiness, or ADs.
7378.D9.8	CFRs applicable to inspection and airworthiness.
7378.D9.9	Corrosion types and identification.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7378.D9.10	Interpretation of inspection instructions, which can lead to over or under maintenance being performed.
7378.D9.11	Visual inspection and where to apply it.
7378.D9.12	Performing radiographic inspections.
7378.D9.13	Selection and use of checklists and other maintenance publications.
7378.D9.14	Maintenance record documentation.
	Skills:
7378.D9.15	Perform an airframe inspection, including a records check.
7378.D9.16	Perform a portion of a 100-hour inspection in accordance with 14 CFR part 43.
7378.D9.17	Enter results of a 100-hour inspection in a maintenance record.
7378.D9.18	Determine compliance with a specific AD.
7378.D9.19	Provide a checklist for conducting a 100-hour inspection.
7378.D9.20	Determine if any additional inspections are required during a particular 100-hour inspection; (i.e., 300-hour filter replacement).
7378.D9.21	Inspect seat and seatbelt, including TSO markings.
Domain	Flight Controls

Next Level Programs of Study

Review Document

	Demonstrates understanding of:
7378.D20.1	Control cables, Control cable maintenance, Cable connectors, Cable guides, Control stops.
7378.D20.2	Push-pull tubes, Torque tubes, Bellcranks.
7378.D20.3	Flutter and flight control balance.
7378.D20.4	Rigging of aircraft flight controls.
7378.D20.5	Aircraft flight controls and stabilizer systems.
7378.D20.6	Other aerodynamic wing features.
7378.D20.7	Secondary and auxiliary control surfaces.
	Demonstrates ability to identify, assess, and mitigate risks associated with:
7378.D20.8	Use of and interpretation of a cable tension chart.
7378.D20.9	Rigging aircraft flight controls.
7378.D20.10	Selection and use of lifting equipment used to move aircraft components into place for assembly.
7378.D20.11	Maintaining a calibration schedule for cable tension meters and other rigging equipment.
7378.D20.12	Use and interpretation of cable tensiometers.
	Skills:
7378.D20.13	Identify fixed-wing aircraft rigging adjustment locations.
7378.D20.14	Identify control surfaces that provide movement about an aircraft's axes.
7378.D20.15	Inspect a primary and secondary flight control surface.
7378.D20.16	Remove and reinstall a primary flight control surface.
7378.D20.17	Inspect primary control cables.
7378.D20.18	Adjust and secure a primary flight control cable.
7378.D20.19	Adjust push-pull flight control systems.
7378.D20.20	Check the balance of a flight control surface.
7378.D20.21	Determine allowable axial play limits for a flight control bearing.
7378.D20.22	Inspect a trim tab for free play, travel, and operation.
7378.D20.23	Balance a control surface.
7378.D20.24	Fabricate a primary flight control cable.
7378.D20.25	Locate aircraft flight control travel limits.

Principles of Aviation Management	
Career Cluster	Transportation
Program of Study	Aviation Management
NLPS Sequence	A
Course Code	7214
Course Description	<i>Principles of Aviation Management provides students the opportunity to develop an understanding of various aspects of the aviation industry to include general regulations and laws associated with the field. Included is an overview of the aviation field and all employment opportunities. Areas of study include aerodynamics, aircraft systems, performance, weight and balance, physiology, regulations, cross country planning, weather, and decision-making skills. Students will also learn of the departments associated with an airport and their impact on the industry as a whole.</i>
Prerequisite(s)/ Corequisite(s)	None
Credits	2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum
Counts Toward	Counts as a directed elective or elective for all diplomas
Dual Credit Status	X (PCL/CTE)
Additional Notes	
ADDITIONAL COURSE INFO	
Funding	Moderate Value Level I

POSTSECONDARY AND CREDENTIAL INFORMATION	
ITCC Course Alignment	AVIT 111: Introduction to Aviation Technology
VU Course Alignment	*AMNT 100: Introduction to Aviation (not available for dual credit)
Four Yr. Course Alignment	
Postsecondary Credential	CT Aviation Operations (49.0104), TC Aviation Management (49.0104)
Liberal Arts/Sciences Requirements	
Promoted Certifications	

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Introduction to Aviation
7214.D1.1	Identify current events in the field of aviation and discuss their relationship and potential effects on the aviation industry.
7214.D1.2	Identify and assess career opportunities in the aviation industry (both civil and military) and identify the attributes of an aviation professional.
7214.D1.3	List and discuss all regulating agencies used in the industry
7214.D1.4	Identify specific Federal Aviation Regulations (FARs) and discuss their importance.
7214.D1.5	Use of Aviation within industry and business.
7214.D1.6	Describe all systems used within the airport proper and national airspace.
7214.D1.7	Identify all aircraft classifications.
7214.D1.8	Identify aviation safety issues.
7214.D1.9	Understand aviation human factors issues.

Private Pilot Theory	
Career Cluster	Transportation
Program of Study	Aviation Management
NLPS Sequence	B
Course Code	7217
Course Description	<i>In Private Pilot Theory students will receive ground school knowledge required for certification as a private pilot with an airplane single engine land rating. Areas of study include aerodynamics, aircraft systems, performance, weight and balance, physiology, regulations, cross country planning, weather, and decision-making skills.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Aviation Management

	aircraft performance and stability by visually inspecting various aircraft.
7217.D1.10	Apply knowledge of commonly used aircraft performance charts and tables to accurately predict performance.

Aviation Safety and Operations

Career Cluster	Transportation
Program of Study	Aviation Management
NLPS Sequence	C
Course Code	7207
Course Description	<i>Aviation Safety and Operations provides an overview of general aviation operations, including the operation and management of the Fixed Base Operation (FBO). It introduces the challenges and complexity of aviation security faced by aviation professionals across the industry and traces the evolution of current security approaches and explores technologies and processes targeting threat mitigation and improved operational efficiency. Emphasis will be placed on financial and operational considerations as well as on regulatory requirements and constraints.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Aviation Management

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Aviation Operations
7207.D1.1	Understand the role of the Fixed Base Operator in the National Airspace System.
7207.D1.2	Identify general aviation management functions.
7207.D1.3	Describe and outline corporate aviation including business use of aircraft, corporate flight departments, and the types of aircraft used by that industry.
7207.D1.4	Identify and describe the linkages among the manufacturers, fixed base operators, and corporate operators.
7207.D1.5	Compare and contrast the inter-working of the unique components of the general aviation industry.
7207.D1.6	Demonstrate an understanding of marketing techniques.
7207.D1.7	Demonstrate understanding of basic aviation fiscal administration.
7207.D1.8	Understand the role of human resources in the general aviation environment.
7207.D1.9	Identify general aviation organization and administrative functions.
7207.D1.10	Identify functions of the flight line and front desk.
7207.D1.11	Outline and explain the Federal Aviation Regulations that apply to general aviation flight training and maintenance.
7207.D1.12	Demonstrate an understanding of aviation management information systems.
7207.D1.13	Demonstrate an understanding of basic general aviation maintenance procedures.
7207.D1.14	Demonstrate an understanding of general aviation safety and liability.
7207.D1.15	Demonstrate an understanding of general aviation physical facilities.
Domain	Aviation Weather
7207.D2.1	Development basic knowledge of meteorology and its effect on the aviation environment.
7207.D2.2	Demonstrate how the aviation weather service program functions.
7207.D2.3	Learn about industry changes both current and in the future that will affect flight planning and flight safety.
7207.D2.4	Interpret and explain weather reports, forecasts, weather charts, and flight briefings.
7207.D2.5	Learn the limitations of weather observations and forecasts.
7207.D2.6	Create go/no-go decisions.
7207.D2.7	Build professional communications skills.
7207.D2.8	Interpret written, graphic, and other weather information sources as they apply to aviation.
7207.D2.9	Identify several weather hazards and discuss their causes.
7207.D2.10	Explain the basics of aviation weather, which includes: the atmosphere; weather systems; pressure, altitude, and density; stability and instability; wind; temperature and its effects;

Next Level Programs of Study

	atmospheric moisture
7207.D2.11	Identify the FAA required alternate minimums for an IFR flight plan.

Aviation Management Capstone	
Career Cluster	Transportation
Program of Study	Aviation Management
NLPS Sequence	D
Course Code	7385
Course Description	<i>Aviation Management Capstone is an introduction to the aviation weather service program. Course topics include the National Weather Service, Flight Service Stations, International Civil Aviation Organization, and analyzing and interpreting weather reports and maps. Additionally, this course will prepare students for certification as an Instrument Pilot with an Airplane Single Engine Land rating. Areas of study include basic instrument flying, flying instruments, IFR charts and approach plates, IFR regulations and procedures, ATC clearances, and IFR flight planning.</i>
Prerequisite(s)/ Corequisite(s)	Principles of Aviation Management; Private Pilot Theory; Aviation Safety and Operations
Credits	2 semester course, 2 semester required, 1-3 credits per semester, 6 credits max
Counts Toward	Counts as a directed elective or elective for all diplomas Counts as a quantitative reasoning course
Dual Credit Status	X (PCL/CTE)
Additional Notes	There are no standards or competencies included for private flight training. The decision to provide flight training as a part of this program of study is completely optional and is a local decision. A school or career center accepts all liability if they decide to include private flight training as a part of this program of study.

CONTENT STANDARDS AND COMPETENCIES	
Competency #	Competency
Domain	Aviation Safety Management
7385.D1.1	Develop an outline of the essential characteristics of natural and man-made threats to national and international aviation.
7385.D1.2	Solve problems as an individual and in coordination with team members.
7385.D1.3	Compose historical timelines reflecting methods and outcomes used to counter aviation security threats.
7385.D1.4	Identify functions and interdependencies of local, national, and international aviation security agencies.
7385.D1.5	Differentiate between individual privacy and national security related to aviation.
7385.D1.6	Exhibit the knowledge, skills, and attitudes necessary to be a success in the chosen area of the aviation industry.
7385.D1.7	Develop an ability to do basic research, interpret and analyze the data and make useful presentations based on that research.
7385.D1.8	Develop the basic knowledge, skills, and attitudes needed to be useful participants in the student’s profession, society, and country, i.e., higher order thinking, communicating, interacting, managing information, and valuing.
7385.D1.9	Identify the different portions of CRM
7385.D1.10	List the reasons that CRM are important on the flight deck
7385.D1.11	Distinguish between different CRM training applications
7385.D1.12	Implement positive CRM strategies to flight operations
7385.D1.13	Identify hazardous situations requiring CRM control elements
7385.D1.14	Analyze various situations and apply the best CRM strategy
7385.D1.15	Recognize human limitations as they apply to aviation operations
7385.D1.16	Develop strategies for handling human limitations as they apply to aviation operations
Domain	Air Traffic Control
7385.D2.1	Exhibit a high level of comprehension about the ATC system in the United States.
7385.D2.2	Determine how flights are coordinated between airlines, airports, and ATC services.
7385.D2.3	Discuss major regulations involving the National Airspace System.
7385.D2.4	Comprehend the Code of Federal Aviation Regulations.
7385.D2.5	Possess a working knowledge of the terminology specific to the industry.

Next Level Programs of Study

Review Document

7385.D2.6	Demonstrate a fundamental knowledge of navigational aids available to aviation professionals.
7385.D2.7	Demonstrate a working knowledge of ATC procedures to include control tower operations, non-radar operations, and radar operations.
7385.D2.8	Explain the different types of environmental concerns within a geographic area.
Domain	Aviation Law
7385.D3.1	Develop a basic understanding of administrative, tort, criminal, contract, labor, and international law as they relate to the aviation industry.
7385.D3.2	Exhibit the skills needed to read and understand reported court cases, statutes, and administrative regulations.
7385.D3.3	Apply general legal theories to aviation topics.
7385.D3.4	Identify various laws and regulating agencies relating to the aviation industry.
7385.D3.5	Describe the legal and regulatory environments which surround the field of aviation.
7385.D3.6	Discuss the legal issues affecting airline operations, civil aviation, Fixed Base Operators, and airport administrators.
7385.D3.7	Exhibit an ability to identify and mitigate aviation related actions that may be counter to aviation laws and regulations.
7385.D3.8	Understand the basics of the US legal system
7385.D3.9	Gain the ability to describe different aviation company choices
7385.D3.10	Understand the legal process of FAA enforcement actions
7385.D3.11	Describe aviation administrative bodies and their legal functions
7385.D3.12	Understand employment law as it pertains to aviation
