

INDIANA COMMISSION *for* HIGHER EDUCATION

July 1, 2026

To: Members of the Indiana State Budget Committee

CC: Indiana State Budget Agency

Indiana Code 21-18-6-9.5 requires the Indiana Commission for Higher Education (Commission) to annually report on the utilization of physical facilities on the campuses of state educational institutions. This report is the first submission for this annual reporting requirement.

To most effectively collect and represent data, Commission staff met with each institution to discuss their data systems and reporting capabilities as it relates to instructional space utilization. Special thanks to staff from both Ivy Tech Community College, Ball State University, and Vincennes University who supported on-site visits by Commission staff to discuss their reporting capabilities and the various considerations of physical space utilization.

There is no standard system across the seven institutions for tracking facility utilization. Therefore, the Commission aimed to develop a reporting structure that was universal enough to allow for accurate statewide data representation. After meeting with institutions to discuss their preferences and capabilities, Commission staff developed guidance for data reporting. A preliminary version of this guidance was shared with institutions and subsequently adjusted based on their feedback. Final guidance was shared thereafter.

The collected and reported data below represents *instructional utilization* of physical facilities during the fall 2025 semester and does not include utilization of space for other purposes (e.g. student clubs, community gatherings, staff/faculty meetings). Given the large number of nuances, considerations, and unique situations inherent in higher education space utilization, a great deal of deference was offered to the institutions to make judgements on how best to represent their facilities based on the collaboratively established guidance.

The data has been represented in the following manner:

- A count of instructional spaces by campus by type;
- The utilization of classroom instructional spaces for morning and afternoon, Monday-Friday;
- The utilization of lab and combined instructional spaces for morning and afternoon, Monday-Friday;
- A count of instructional spaces by building;
- The utilization of all instructional spaces by building, Monday-Friday; and
- The utilization of all instructional spaces by building, Saturday only.

Utilization is defined as the estimated percentage (%) of time that a space was scheduled for instructional use over the course of a semester. Institutions reported utilization by self-defining regularly scheduled morning, afternoon, and evening blocks, then reporting how often a space was actively scheduled at the top of the hour within each block. This reporting methodology allowed for comparative data representation across institutional scheduling systems.
