Dear Mr. & Mrs. Senn;

I have been contacted by Jason Copperwaite from Paul Primavera & Associates to provide a letter concerning the provision of local phone service to a new development named Westoaks Subdivision Section Two. The information provided indicates this subdivision is located within the Lanesville exchange boundaries. Frontier is the local phone provider for this area and has adequate facilities on Old Salem Road to serve this new development, but is not obligated to cable this new development unless the developer accepts the charges for cable placement. An estimate could be provided upon your request.

Sincerely,

A handwritten signature in cursive script that reads "D. J. Book".

Ref. West Oaks II Subdivision Sanitary Sewer

Mr. Copperwaite,

The Georgetown Water Reclamation Facility is well below the threshold capacity at the present time and has sufficient capacity to handle current and the future sanitary sewer flows being proposed by the West Oaks II Subdivision. Once the sewer plans for the new development are approved by the Town of Georgetown's engineer, sewer credits would be provided.

As the sanitary sewer provider, the Town verifies the following information:

- a. Present average daily flow is 0.238 MGD, representing 68% of actual flow design.
- b. There are no IDEM violations.
- c. The estimated amount of daily usage agreed to serve proposed developments is 0.026 MGD.
- d. The estimated daily use for your proposed development is 0.02914 MDG.

If I can be of further assistance please contact me. The Town looks forward to serving your proposed development's sanitary sewer needs.

Best Regards,

Edwardsville Water Corporation has a sufficient supply of water to serve West Oaks Section II. This has been facilitated by the fact that DSD Development LLC has agreed to install a 12 inch water main connecting this development to our main trunk line.

Letter of Service - West Oaks Subdivision #2

Dear Sirs and/or Madams:

I have been asked to verify that the Town of Georgetown is capable of and willing to provide sanitary sewer service to the Section 2 of the West Oaks subdivision, located off of Corydon Ridge Rd, south of Georgetown.

Once the Federal EPA and the IDEM grant the New Albany Sewer Board additional sewer treatment capacity credits, incidental to New Albany's sewer treatment plant improvements, Georgetown will have an additional 274,000 gallons per day of sewer treatment capacity. Pending Town Council approval, the Town is willing to sell up to 100 EDUs of that capacity, some 30,600 GPD, at the Town's present Sewer Service Availability Fee rate, to the West Oaks Subdivision if the landowner(s) of the West Oaks Subdivision give waiver of remonstrance against annexation for each parcel to be served by Georgetown sanitary sewer.

If there are any questions, please contact me.

Sincerely,

Kenton G. Griffin
