Section #	C	NC	R	Narrative		To Be Corrected				
430 187 309	X Observed the electricity for the food truck periodically shutting off. The truck was operating on a generator and was able to connected to a nearby building with an extension cord to correct. Electrical demands must be met by generator if that is the design for the mobile food truck. X Observed thermometer in the chicken cooler reading 45F. Measured chicken at 43F. Observed thermomer in prep cooler reading 44F. Temperature was measured at 44F. Potentially hazardous (TCS) foods must be stored at 41F or below. Issue may have been caused by pauses in electrical service. Person in Charge (PIC) stated all foods were to be sold within 3 hours and a delivery to refill truck was planned. X Observed the exhaust fans above fryers unable to operate in pauses of electrical service causing a periodical accumulation of vapor and heat.									
Summary of Violations C 1 NC 2 R 0								3
