CRITICAL ITEMS ARE IDENTIFIED IN THE CHECKLIST AND NARRATIVE COLUMNS MARKED "C"
VIOLATION(S) REPEATED FROM PREVIOUS INSPECTIONS ARE DENOTED IN THE "SUMMARY OF VIOLATIONS" AND IN THE NARRAIVE COLUMN MARKED AS "R"

Section #	C	NC	R	Narrative	To Be Corrected
187	X		X	Observed milk in walk-in cooler to be 44F. Correction: Milk should be stored at 41F or less.	Today
294	X			Observed no sanitization step in use. Correction: Dirty dishes should go through three steps: wash rinse, and sanitize. The sanitize step should be done using an approved chemical. An example would be chlorine bleach. The bleach should not be too strong or weak. The concentration should be between 50 and 100ppm. This should be verified using test strips. Test strips to check concentration are available in many stores. After being washed and rinsed off, dishes should be held in the sanitizer for 10 seconds. Another option would be to put the sanitizer in a spray bottle and let the dishes air dry after using it. There are other chemicals that can be used however they have their own concentration requirements.	3 days
297		X		Observed the soda nozzles and ice chute in soda fountain in need of more frequent cleaning. Correction: Increase how often the soda fountain is cleaned to prevent the buildup of film.	1 week
309		X	X	Observed no ventilation in the public restroom. Correction: Install mechanical ventilation.	3 weeks
433		X		Observed wet mop not hung up to dry. Correction: Mops should be hung up to dry.	Today

Summary of Violations	C	2	NC	3	R	2	5
