Signed By Owner: _____

Signed By Agent: _____

This application must include drawings and specifications showing the location of the driveway to be constructed and must specify the size of any pipe to be installed under the driveway. Drawing shall include distance from nearest property line to center of proposed driveway. The minimum recommended pipe size that may be installed is 12". A traffic impact study is recommended to be included with this application.

The Applicant assumes all responsibility for the construction and maintenance of the driveway and for selection of the size of the pipe to be installed under the driveway. A hydraulic survey is recommended. Construction of the driveway must reasonably conform to the drawings and specifications submitted with this application. If, subsequent to construction of the driveway, the pipe does not have sufficient capacity to receive and convey stormwater runoff, the Applicant shall promptly install a new pipe with sufficient capacity to receive and convey stormwater runoff at no expense to the Department or the County.
