**P2603.5 Pipes through footings or foundation walls.** Any pipe that passes under a footing or through a foundation wall shall be provided with a relieving arch; or there shall be built into the masonry wall a pipe sleeve two pipe sizes greater than the pipe passing through.

**REASON**

This proposal is brought forward from the current code and removes the requirement for a sleeve though a footing or foundation wall to be two pipe sizes larger than the pipe.

**Fiscal impact:** no increase to the cost of construction, current amendment language.
