

CHIEF ALAN BURNS HIGH-RISE FIREFIGHTER TRAINING CENTER

FLOORS 8-9

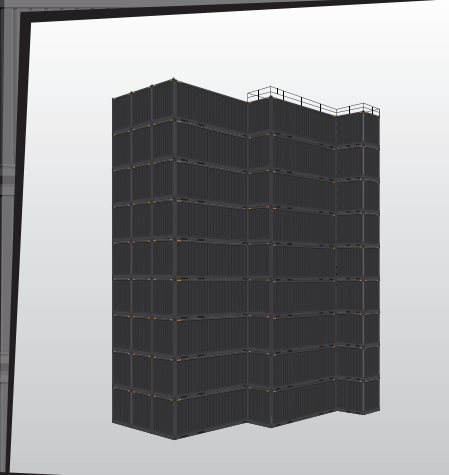

High-rise office suite configurations

- Includes multiple windows to be able to mimic wind-driven fires
- Includes five condo balconies with guard rails
- Represents office space with wide open floor plans
- Designed with future expansion in mind (moveable walls to be purchased at a later date will provide diversity in training)

FLOORS 6-7

Residential high-rise apartment configurations

FLOORS 4-5

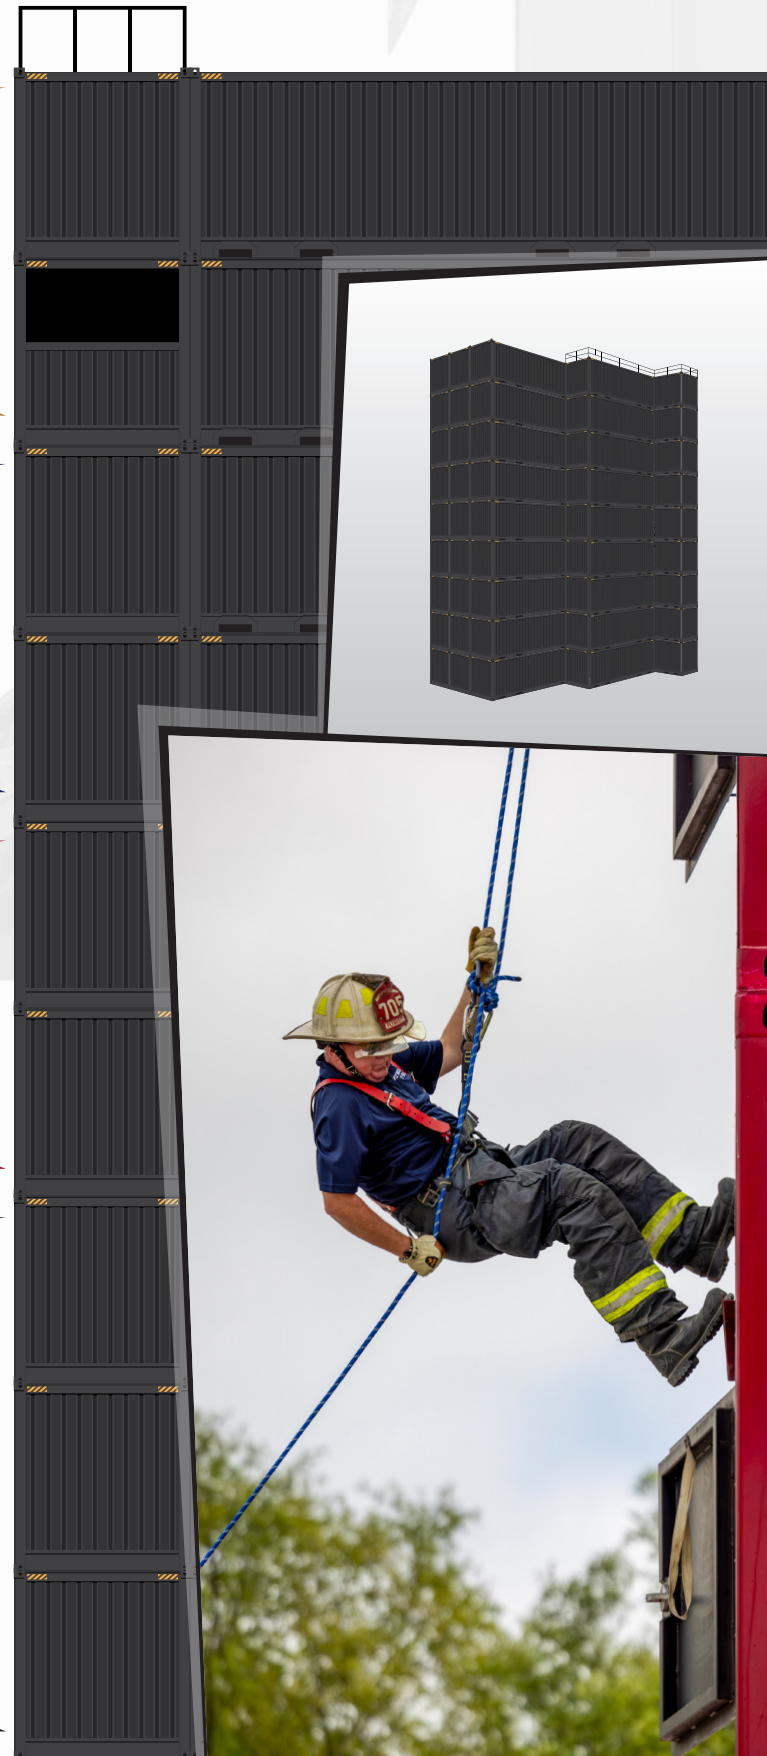

Residential configurations

- Includes anchors and repelling props so firefighters can practice rope rescue under fire conditions

FLOORS 1-3

Center hallway configurations

This Indiana Fire & Public Safety Academy facility can set the standard and be a model for innovative, evolving training scenarios.
