Executive Summary

In August 2009, scientists at Purdue University, with the aid of consultants from D.J. Case, constructed a telephone survey intended to assess the opinions of Indiana residents regarding woodland management in the state. The survey, hereafter referred to as “Indiana Woodland Monitor 2009,” was administered to Indiana residents in October. A total of 1,402 Indiana adults, 18 years and older, completed the survey.

Some highlights in opinions revealed by the survey include the following:

- Forty-eight percent said they were “very concerned” about the long-term health and productivity of Indiana’s woodlands, and 45%, “somewhat concerned.”
- Half (50%) said they were “very interested” in Indiana’s fish, forests, wildlife, and the outdoors, and 40% indicated they were “somewhat interested.”
- At least 78% of respondents indicated that they or someone in the household participated in selected outdoor activities with the most common activities being “visiting an Indiana state forest” (78%), “fishing or hunting in Indiana woodlands” (72%), and “gathering mushrooms, nuts, or berries from woodlands” (51%).
- Fifteen percent indicated they were “very familiar” with the Indiana Department of Natural Resources, with most others (54%) saying they were “somewhat familiar” with the DNR.
- Many Hoosiers (58%) said they were “not familiar” with the Division of Forestry within the DNR. However, a relatively small group (6%) said that they were “very familiar” with the Division of Forestry; a large majority (74%) of the small group who said they were very familiar rated the Division’s performance as “excellent” or “good.”
- A plurality of Indianans (47%) thought most of the state’s woodlands are held in about equal ownership by “private-corporate owners” and “government,” and 26% thought most woodlands are “government” owned (in fact, roughly 85% of the state’s forestlands are privately owned).
- When informed that “Indiana’s State Forest System makes up about 3% of Indiana’s woodlands,” a majority (55%) thought that the amount was “not enough,” and 39%, “about right.”
- Majority approval was given to:
  - Removing some trees to protect Indiana woodlands from spread of disease and wildfire (95%),
  - Harvesting Indiana trees for woodland management if overseen by professional foresters (85%),
  - Harvesting Indiana trees to improve places for wildlife to live (82%),
  - Advising Indiana private landowners on how many and what kinds of trees they might harvest and sell (70%), and
  - Harvesting Indiana trees to make lumber or other wood products that we use (61%).
Majority agreement was given to the statements:
  - “Indiana woodlands should be managed for a balance of wood products that we use, and other benefits like recreation, wildlife, and good water quality” (88%),
  - “If I hear an Indiana forest is being managed as a certified green forest, I get the idea it’s being wisely managed for future generations” (76%).

Nearly three-quarters (72%) agreed with the statement, “The amount of forested land in Indiana is shrinking.” Respondents identified “urban sprawl” as the highest-ranking threat to today’s Indiana woodlands.

Introduction
Researchers and managers have long been interested in public opinions about forest management in the United States. Such insights can provide opportunities for managers to make decisions that integrate public needs and desires into forest management programs. However, public opinions about how forests are managed are complex and lack homogeneity across publics and geographic regions. Even further, what the public values for a forest environment and management can be in opposition to an agency’s management priorities for forest health, habitat restoration, and revenue building.

In fact, several studies across the U.S. show that the public values non-commodity benefits of forests more than economic benefits. For instance, residents in Vermont ranked aesthetic, recreational, and ecological values as most important in forest management and economic as one of the least important (Manning et al. 1999). In a study of Southern states, Tarrant et al. (2003) found that people valued aesthetic qualities, such as clean air and scenic beauty, much more than wood production. But research also indicates that people are more supportive of various forest management techniques if the goals are focused on alleviating ecological concerns (Martin et al., 2000). For example, a national study of public opinions revealed that a majority of people favored management strategies that protect old growth forests and wildlife habitats over commodity-based strategies (Shindler et al., 1993).

Indiana supports an impressive forest resource that is valuable both for its ecological benefits and the commodity-based opportunities it provides. While the above trends in public opinion have been established in other areas of the U.S., few efforts at an in-depth, contemporary assessment of Indiana residents’ forest values and opinions about forest management have been completed. In particular, such topics as residents’ opinions about issues of sustainability, acceptable practices, and trust in state and federal government to manage forests have yet to be investigated in depth.

A number of studies have also attempted to better understand public (specifically consumers) perceptions and attitudes towards certified forest products (Ozanne and Vlosky, 2003; Ozanne and Smith, 1998). However, again, these studies do not investigate the public’s perceptions on certified forest management. Hubbard and Bowe (2005) found that some forest firms felt that they had gained increased credibility with the public after they had become certified. In addition, in a series of reports about sustainable forest management, Sheppard et al. (2006) have stated that sustainable forest management should also be sustainable in a social sense, and thus incorporate the public’s values into management.

It is important to determine if the same holds true in Indiana, because it can help to focus messaging and outreach strategies about forest management.
Research Objectives

Per stated needs and interests of the Indiana State Forester, research efforts at Purdue University resulted in construction of a survey instrument that gathered data on Indiana residents’ opinions of various aspects of private and public forest and woodland management. Specifically, the survey assessed:

- Opinions about active forest management techniques in Indiana, on both private and public lands.
- Residents’ stated values regarding the existence and use of Indiana forests and woodlands.
- Perceptions of “certified green forests” and acceptance for forest management practices that are considered certified green or sustainable.

Specific objectives included:

- Understanding opinions about active forest management on public and private lands;
- Assessing perceptions of what constitutes “sustainable” or “green” forest management;
- Identifying the importance of different forest values in support for or opposition to forest management in Indiana woodlands (e.g., aesthetics vs. economic);
- Determine residents’ awareness and perceptions of “certified green forests” (e.g., are people more accepting of forest management if it is a certified sustainable scheme);
- Assess residents’ trust in government regarding forest management on public lands;
- Determine the types of forest management that are socially acceptable;
- Determine environmental values orientations of Indiana residents; and
- Collect socio-demographic information to understand segmentations in the population with regard to specific stated opinions about forest management.

In addition to understanding public opinions, a major goal of this investigation was to develop a survey instrument that can be used to track changes in public opinion over time (“Indiana Woodland Monitor,” or IWM). This type of tool, re-administered every three to five years, would allow managers to understand the forest values the public holds and their preferences for management over time, affording opportunity to best incorporate public preferences into management programs and practices, or build educational materials about management actions that are necessary for forest health.
Survey Methodology

Dr. Shannon Amberg, project leader, sub-contracted with D.J. Case & Associates (DJ Case), to help with survey development/administration, data analysis, and report preparation. Dr. Amberg—and Messrs. Dave Case and Dan Witter, of DJ Case—first met in Indianapolis with the Indiana State Forester and Division of Forestry’s senior management team (the ad hoc survey planning team), to discuss survey objectives and possible methodologies, including mail and telephone surveys, and focus groups that could provide valuable follow-up insights to survey results.

Following this scoping meeting—and based on agreement that the population of interest at this initial stage of inquiry was Indiana’s general public—a telephone survey was selected as the preferred methodology. Dr. Amberg collaborated with DJ Case to develop a “Table of Specifications & Item Pool” that listed survey objectives, as well as specific question wording (or “items”) that might illuminate each objective. Survey drafts were offered for review to the survey planning team in an iterative process—17 different versions were considered through the refinement process—that resulted in a survey instrument ready for pre-testing.

Though many question and wording nuances were considered in the survey development process, one that warrants special mention was agreement within the survey planning team that the term “woodland” should accompany the word “forest,” and in many cases, replace the term “forest.” “Woodland” has proven its merit as a descriptive term in USDA Forest Service’s “National Woodland Owner Survey” (http://www.fia.fs.fed.us/nwos/; Retrieved 11/19/09). The survey team agreed that “woodland” has intuitive meaning and appeal as a term to supplement “forest,” as well as a descriptive stand-alone term.

Delve (St. Louis office)—a market research firm with call centers and focus group facilities in 10 major U.S. cities—administered the telephone pre-test to 25 Indiana residents by random-digit-dialed (RDD) selection. DJ Case listened to a sub-sample of these interviews, counseled with Dr. Amberg on apparent survey modifications needed, as well as survey strengths (such as clear understanding by members of the general public of the term “woodland”)—and the questionnaire was finalized and interviewing began (Appendix A).

Completed telephone interviews totaled 1,402. Respondents were:

- English-speaking Indiana adults,
- 18 years and older,
- 687 males and 715 females.

A total of 20,757 phone numbers (RDD) were necessary to complete 1,402 interviews, with an average interview length of 15 minutes.

The most conservative response rate features 1,402 completed interviews as the numerator and 20,757 phone numbers as the denominator, for a completion rate of 7%. However, this rate does not exclude the many phone numbers that were, for example, non-working, non-
Thus, a truer response rate features 1,402 completed interviews as the numerator, with the denominator comprised of 1,402 completed interviews plus 3,346 “refusals to participate” (denominator total of 4,748), for a cooperation rate of 30%.

Of immediate concern is the degree to which the sample appears to represent the target population—in this case, the adult population of Indiana, 18 years and older. Respondents were compared to known Indiana population distributions for:

- gender,
- metro-/outside-metro residence,
- age, and
- education (Table 1).

Survey respondents, as a statewide sample, tended to:

- Represent Indiana statewide gender distribution,
- Represent Indiana statewide metro-versus outside-metro residence,
- Under-represent younger Indiana adults and over-represent older Indiana adults, and
- Under-represent lower education levels and over-represent higher education levels.

Data were analyzed using Statistical Package for the Social Sciences (SPSS version 15, 2006). Missing values generally are excluded from the narrative. See Addendum A (Questionnaire) for exact question wording and order. Occasionally, shading is provided in tables to accentuate an insight or trend—or simply ease reading. Rounding sometimes results in totals other than 100% (e.g., 99%, 101%). Frequency analysis of all variables (including original response categories and missing values) is provided in Appendix C.

Sampling tolerance (95% confidence level) for a sample of 1,402 is ~±3%, but increases when sub-groups are compared. The alpha level for tests of significance reported in the narrative is .05; that is, the probability of a Type I error (rejecting the null hypothesis when it should be accepted).

---

1Five “cell phones” were among the numbers contacted in this study (interviews not conducted). Wireless phone numbers were not included in the RDD sampling frame for this project. A recent study estimated that 13.8% of Indiana households have only wireless phones (http://www.cdc.gov/nchs/data/nhsr/nhsr014.htm; Retrieved, 11/19/09). There are advantages—presumed increase in sample representativeness—and challenges to including cell phones in a sampling design—notably cost and wireless/landline sample integration, but other issues as well, including respondent attentiveness and increasing formal (legal) safety concerns for use of wireless phones in certain situations and settings (“...of course I can talk; I'm only driving”).

c. Based on county of residence (MSA Indiana county versus outside-MSA Indiana county).

The distribution for unweighted responses to a key, diagnostic question — “How interested are you in Indiana’s fish, forests, wildlife, and the out-of-doors?” — was compared to the weighted distribution for the same question (Table 3; see Appendix B for weight table). Differences among the unweighted and weighted distributions were negligible. For example, unweighted results indicated that 53% of Indiana adults are “very interested” in the out-of-doors, while results tabulated using the age-education combined weight indicated that 50% of Indiana adults are “very interested.” Nonetheless, the decision was made to report results in the narrative employing post-stratification weights (age-education combination) in those instances where normalization presumably improves estimates (i.e., statewide estimates). Unweighted data were used for most cross-tabulations and all inferential statistics.

Frequency analyses for all questions using unweighted data are presented in Appendix C; frequency analyses applying the age-education weight are presented for all questions in Appendix D.

a. Age-education combination (See Appendix B).

b. 30 respondents refused to provide age or education, thus reducing the dataset to 1372 respondents.

Creation of a geographic variable required the grouping of Indiana counties into “North Indiana” and “South Indiana” counties (Figure 1). Conveniently, a concrete dividing boundary exists; Interstate 70 Highway. I-70’s main appeal as a north-south divider is the predominance of forested landscape south of the road, and more prairie-like and thinly-forested landscape north of I-70 (relative to southern Indiana). (U.S. Highway 40 is another “boundary” road roughly parallel to I-70.) Though not perfect, this north-south classification demarcated by I-70 (and U.S. 40) roughly coincides with what many Hoosiers² would acknowledge as an intuitively appealing north-south Indiana split.

² The term “Hoosiers” is a widely accepted descriptor for residents of Indiana—or more poetically, “anyone who has adopted or inherited Indiana as a state of mind.” Though occasionally used in derogatory manner—usually by non-Indianans, some Hoosiers propose—the word is more akin to a term of endearment and pride for Indiana inhabitants, perhaps more than the clinical descriptor, “Indianans” (http://en.wikipedia.org/wiki/Hoosier, Retrieved, 12/7/09).
Figure 1. Indiana counties, major highways, and forest cover (courtesy, Brett Martin, IN DNR).
When the weighted sample distribution (grouped by county) was compared to the actual Indiana population residing north and south of I-70, the distributions were essentially identical, affirming the representativeness of the sample (Table 4).

b. Adjusted for missing values

Results and Discussion

Results are not presented in the exact order that questions were arranged in the survey, but rather re-organized into a narrative that presents a logical story.

Background Characteristics

Respondents were asked background questions intended to provide insights to their sentiments and experiences related to Indiana woodlands (Table 5). For purposes of inferential analyses and ease of interpretation, these characteristics were reduced to dichotomous variables (Table 6). Cross-tabulations by the original variable values (about 47 banner points) are presented for all questions in Appendix E.

Respondents were primarily White/Caucasian (93%), with the majority reporting they were politically conservative, and 92% possessing at least a high school education. Over 50% of survey respondents had at least some college education, with 40% having a college degree. Just over 60% of respondents described themselves as living in either a suburban or urban setting within Indiana, while nearly 40% reported living in a rural setting. However, based on Indiana County of residence, 75% of respondents could be classified as living in a metropolitan area.
Table 5. Respondents’ background characteristics, Indiana Woodland Monitor 2009 (weighted data). N=1372 for all variables except Metro-/Outside-metro (N=1336).

**Interest in Outdoors and Outdoor Activity**

Respondents were asked to characterize their personal interest in Indiana’s fish, forests, wildlife, and the out-of-doors (Table 7). Half (50%) of Indiana adults indicated they are “very interested” in Indiana’s outdoors, and 9 of 10 Indiana adults are at least “somewhat interested” in Indiana’s outdoors. Relatively few (10%) are “not interested.”

<table>
<thead>

</tr>
<tr>
<td></td>
<td>Very interested</td>
<td>50%</td>
</tr>
<tr>
<td>Total</td>
<td>1372</td>
<td></td>
</tr>
</tbody>
</table>

The degree of Hoosiers’ outdoor interest varied somewhat by selected background variables (Table 8). The odds of respondents saying they were “very interested” in Indiana’s fish, forests, wildlife, and out-of-doors (versus “somewhat/not interested”) were:

- Larger by a factor of 1.7 for that relatively small group who purchased lumber or wood products for home improvement in the last 5 years than those who did not,
- Larger by a factor of 1.7 for white than non-white Indianans,
- Larger by a factor of 1.5 for respondents describing their residences as “rural” than those describing their residences as “urban,”
- Larger by a factor of 1.4 for those older than 44 years than those 44 years and younger,
- Larger by a factor of 1.3 for men than women, and
- Larger by a factor of 1.3 for southern Indiana residents than for northern Indiana residents.

Hoosiers’ outdoor interest was also analyzed by different geographic regions of interest across the state of Indiana, whether or not respondents live in a county that has a State Forest, and if they reside in a metropolitan area or not (Table 9). Interest in fish, forests, wildlife and the outdoors was fairly consistent across these geographic and demographic characteristics with the exception of respondents living in southern Indiana counties, other than around Louisville and Evansville, indicating being “very interested” slightly more often than respondents from other regions (ranging from 6-12% difference among other regions).

---

3 The odds ratio is the ratio of the odds of an “event/condition” occurring in 1 group to the odds of it occurring in another group. An odds ratio of 1 indicates that the condition is equally likely in both groups; an odds ratio >1 indicates that the condition is more likely in the first group, and an odds ratio <1 indicates the condition is less likely in the first group (Norusis, 2005). See Appendix G for supporting test statistics. Odds ratios are only reported in those instances where the likelihood ratio chi-square statistic was significant.

Respondents were asked whether they or any members of their households participated in selected outdoor-related activities (Figure 2). Household outdoor activities mentioned by majorities of respondents were “visiting an Indiana state forest” (78%), “fishing or hunting in Indiana woodlands” (72%), and “gathering mushrooms, nuts, or berries from woodlands” (51%). Fully 43% said that they or household members had “cut/collected trees for firewood,” and about 1 in 10 respondents said s/he or a household member actually had “worked in the wood products industry”\(^4\). An analysis of these survey items by different geographic regions of interest across the state of Indiana, whether or not respondents live in a county that has a State Forest, and if they reside in a metropolitan area or not can be found in Appendix F (pp. 240-243). Overall, responses to these items across geographic regions were relatively consistent with only minor variations.

Indiana has 14 “State Forest Properties” (Figure 3). However, note that two of the State Forest properties are formally named “State Recreation Areas” (Starve-Hollow in Jackson County and Deam Lake in Clark County). Moreover, Indiana Department of Natural Resources (DNR) also manages 25 state parks, 22 Fish and Wildlife Areas, 8 Fish Hatcheries, 9 reservoirs, 6 inns, and a golf resort/conference center—with multiple facilities in some counties, and some facilities with similar names. Of special interest to the Division of Forestry is whether survey respondents, who indicated that they visited sites the agency manages (state forests), were truly visiting Division of Forestry properties (versus visiting state parks, national forest, etc.). To verify this,

\(^4\) “The Indiana forest products industry is the sixth largest manufacturing industry in the state, employing over 56,000 people. Forest-based manufacturing provides $3.5 billion in value-added and $7.9 billion in value of shipments to Indiana’s economy each year. It ranks first nationwide in the production of wood office furniture, wood kitchen cabinets, and hardwood veneer, along with several other products. As small family-owned businesses, wood products companies average less than 50 employees and play an important role in rural communities.” http://www.state.in.us/dnr/dnr_forest/index.html, Retrieved 11/30/09.
those survey respondents who indicated they had visited state-managed forests were asked to identify which of these they had visited.

Figure 3. Indiana State Forest Properties (http://in.gov/dnr/3631.htm, Retrieved 11/30/09).

Indiana State Forest properties are:

1. Salamonie River State Forest (Wabash County);
2. Owen-Putnam State Forest (Owen and Putnam Counties);
3. Morgan-Monroe State Forest (Morgan and Monroe Counties);
4. Yellowwood State Forest (Brown County);
5. Greene-Sullivan State Forest (Greene and Sullivan Counties);
6. Selmier State Forest (Jennings County);
7. Starve-Hollow State Recreation Area (Jackson County);
8. Jackson-Washington State Forest (Jack and Washington Counties);
9. Martin State Forest (Martin County);
10. Pike State Forest (Pike County);
11. Ferdinand State Forest (Dubois County);
12. Harrison-Crawford State Forest (Harrison and Crawford Counties);
13. Clark State Forest (Clark County); and
14. Deam Lake State Recreation Area (Clark County).
All “Indiana State Forests” mentioned by respondents are listed in Appendix C—and most were not Indiana State Forests managed by the Division of Forestry. In fact, a majority of respondents (60%) offered the names of non-Forestry properties (Table 10). Granted, many of these are managed by the Indiana Department of Natural Resources, such as Indiana State Parks (witness the oft-mentioned “Brown County” (not to be confused with the Yellowwood State Forest in Brown County)). Others (9%) offered some version of “Hoosier” (the Hoosier National Forest). Yet, some did indeed list at least one or more Indiana State Forests (including “Clark County Forest,” presumably referencing Deam Lake Recreation Area). Specifically, about 1 in 10 respondents (14%) correctly offered the name of at least one Division of Forestry property in response to the question, “Could you tell me the name of the State Forest you visited?”

Table 10. Q18g, Open-ended: “Could you tell me the name of the State Forest you visited?” Indiana Woodland Monitor 2009 (weighted data).

a. Respondents were grouped into mutually exclusive categories; first priority was given mention of a formal "State Forest." For example several respondents mentioned both a formal State Forest and "Hoosier," but these were grouped into the "State Forest" category.

b. Some of these areas could certainly include place names used by locals to describe Indiana State Forests. However, only those names that clearly described a State Forest were tallied in the "State Forest" category.

**Familiarity with IN DNR and Division of Forestry**

Respondents were asked how familiar they were with both the DNR and Indiana Division of Forestry (Table 11). Approximately one-third of respondents (31%) were not familiar with the DNR, while a majority (54%) said they were “somewhat familiar.” A majority of respondents (58%) said they were “not familiar” with the Division of Forestry, while just over one-third were “somewhat familiar.” Interestingly, only 15% of respondents were “very familiar” with the DNR, and only a small percentage of respondents (5%) indicated being “very familiar” with the Division of Forestry.

</tbody>
</table>

Hoosiers’ familiarity with the Indiana Department of Natural Resources (IDNR) and the Indiana Division of Forestry (IDoF) was also assessed by geographic regions of interest across the state (Tables 12 & 13). Familiarity with the IDNR was relatively consistent across regions, counties with State Forests, and metro and non-metro areas with the majority of respondents being “somewhat familiar” (Table 12). The Region had the highest percentage of respondents who are unfamiliar with IDNR.

Table 12. Q3: “How familiar are you with the Indiana Department of Natural Resources,” tabulated by geographic region, Indiana Woodland Monitor 2009 (unweighted data).

Far fewer respondents across all regions were familiar with the Indiana Division of Forestry with the majority of respondents across all regions, proximity to State Forests, and metro/non-metro area residence stating they were “not familiar” with IDoF (Table 13). Those respondents residing in counties that have a State Forest seem to be slightly more familiar than those who do not.

When asked “What first comes to mind when you think of the Indiana Division of Forestry” (without any prompt), 80% of respondents were able or willing to offer an answer. The most frequently mentioned responsibility was “forest management,” – the most obvious of answers – yet only 29% of respondents offered this option (Figure 4). Eighteen percent mentioned “parks,” and 16% said “wildlife management.” Some respondents mentioned Division of Forestry responsibilities other than the 17 specific categories into which responses were grouped. These are listed in Appendix C.

Figure 4. Q5: “What first comes to mind when you think of the Indiana Division of Forestry?” Multiple responses possible, Indiana Woodland Monitor 2009 (weighted data).
Essentially, Indiana’s adult population has a very low awareness of what it is that the Division of Forestry does—to the point that respondents generally refrained from offering the most obvious of answers—forestry or forest management. That said, it is very likely that most citizens would be unable to describe the responsibilities of other Indiana state government agencies or major divisions, most of which have much larger budgets than Indiana DNR and its Division of Forestry.

Respondents were asked to rate the job that the Indiana Division of Forestry is doing in providing services for the state of Indiana. In total, 57% responded either “excellent” or “good” (Table 14). Importantly, a large majority (74%) of that relatively small group that said they were “very familiar” with the Division of Forestry—presumably, the group “in the know”—rate the Division’s performance as “excellent” or “good.” Across the different regions of Indiana, most respondents seem to feel the IDoF is doing at least a “fair” job or better, with the majority of respondents indicating the IDoF is doing a “good” job and a small percentage rating the agency’s efforts as “excellent” (Table 15). It should be noted that anywhere from 9-22% of respondents indicated they didn’t know enough to rate the agency’s efforts.

Table 14. Q4: Familiarity with the Indiana Division of Forestry tabulated by Q6: Rating of the Indiana Division of Forestry’s effort, (weighted data).

| Q4: How familiar are you with the Indiana Division of Forestry within the Dept of Natural Resources? | Q6: Please rate the job the Indiana Division of Forestry is doing in providing services for the state of Indiana. |
|---|---|---|---|---|---|
| Poor | Fair | Good | Excellent | Don’t know | Total |
| Not familiar | 4% | 24% | 43% | 7% | 23% | 668 | 55% |
| Somewhat familiar | 4% | 24% | 50% | 15% | 7% | 477 | 39% |
| Very familiar | 6% | 18% | 49% | 25% | 2% | 69 | 6% |
| Total | 4% | 23% | 46% | 11% | 15% | 1214 | 100% |

a. The column totals vary from Q4 (Familiarity with Division of Forestry) in Table 9; respondents unable to give an answer to Q5 were skipped for Q6, on the rationale that if a respondent was unable to offer any answer (or even guess) on Division of Forestry responsibilities, s/he should be excluded from evaluating the Division’s performance.

Table 15. Q6: “Please rate the job that the Indiana Division of Forestry is doing in providing services for the state of Indiana,” tabulated by geographic region (unweighted data).

Perceptions of Woodlands and Forest Management

Of obvious interest is whether Indianans know who owns the state’s woodlands. A plurality (47%) thought most of Indiana’s woodlands are held in about equal ownership by private/corporate owners and government; 26% responded “government,” and 18%, “private.” In fact, roughly 85% of Indiana’s forestlands are privately owned, and the balance, in federal (12%) and state ownership (3%) (http://www.sbcouncil.org/Publications/Cooperative-Forest-Management-Programs, Retrieved, 11/30/09).

Similarly interesting is whether Hoosiers think that the state owns enough forested land. When informed that “Indiana’s State Forest System makes up about 3% of Indiana’s woodlands,” a majority (55%) thought that the amount was “not enough,” with 39% indicating the amount was “about right” (Table 16).

A variable that presumably would exert some influence on an individual’s awareness of woodlands and forest management is whether the person actually owns wooded acres in Indiana. Respondents were asked about the number of acres of wooded land they own. Notable insight is gained in comparing survey responses to this question to the distribution of “known” lot sizes in the Midwest (of which Indiana is a member, in formal Census geography) (Table 17). For “less than 1 acre or none,” the difference in the distributions slightly exceeded sampling tolerance. However, it is possible that these differences are real on the Indiana landscape, compared to the Midwest distribution. The similarity in these distributions should not be overlooked as a validation of the representativeness of this dataset.

An analysis of Hoosier perceptions of woodland ownership and opinions about the amount of woodlands that should be under State management by different geographic regions of interest across the state of Indiana, whether or not respondents live in a county that has a State Forest, and if they reside in a metropolitan area or not can be found in Appendix F (pp. 227, 231 & 240). Overall, responses to these items across geographic regions were relatively consistent with only minor variations. The majority of respondents think most of Indiana’s woodlands are equally owned by government and private industry, with one-quarter to one-third of respondents believing most woodland areas are owned by the government. Most respondents (54-62%) feel that the 3% of wooded lands owned by the State of Indiana is “not enough”, while one-third to 42% feel it is “about the right amount.”

Table 16. Q9: “Do you think most of Indiana’s woodlands are in government ownership, private and corporate ownership, or about equal government & private?”, tabulated by Q11: “Indiana’s State Forest System makes up about 3% of Indiana’s woodlands. Do you think this amount of State-owned land is not enough, about right, or too much?” (weighted data).

| Q9: Do you think most of Indiana’s woodlands are in govt ownership, private-corp. ownership, or about equal government & private? | Q11: Indiana’s State Forest System makes up about 3% of Indiana’s woodlands. Do you think this amount of State-owned land is... |
|---|---|---|---|---|---|

- a. Assumption is that respondent was answering for household ownership, and the respondent perceived that the presence of any tree/s on his/her lot constituted “wooded acres.”
- b. n=1,365
- c. n=19,456,000, Source: Statistical Abstract of the United States, 2009 (U.S. Census Bureau), Table 948, Housing Units-Size of Units and Lot: 2005, p. 603.
- d. Only 54 respondents indicated wooded ownerships of 50 acres or more, a rather small group upon which to base any conclusions regarding Indiana's private non-industrial forest landowners--and indeed, some of these larger ownerships could be commodity farms. Thus, the survey group that might be most akin to non-industrial woodland owners is the group defined by "10 or more acres."
- e. Differences between IWM09 sample and Midwest Lot Sizes in the "1-9 ac" and "10 or more ac" categories may be attributable to landowners not residing on larger "lots"/tracts they own.

Respondents were asked how concerned they are about the long-term health and productivity of Indiana’s woodlands (Table 18). A large majority of respondents indicated they were at least “somewhat concerned” about the long-term health of Indiana’s woodlands and 48% of respondents indicated they were “very concerned.” The degree of respondents’ concern for Indiana’s woodlands varied somewhat by selected demographic variables (Table 19).

5136 respondents were unable to offer an answer to Q5 (“What first comes to mind when you think of the Indiana Division of Forestry?”), and though these 136 were then appropriately skipped over Q6 (“…rate the job of IN Div of Forestry…), they were also inadvertently skipped over Q7 and Q8, (1) resulting in ~n of 1,260 for Q7 and Q8, (2) reducing the sampling tolerance for Q7 and Q8 from 2.6% to 2.7%, and (3) conceivably affecting the representativeness of the sample for these 2 questions, given that the 136 eliminated from Q7 and Q8 were unwilling to even guess at the Division of Forestry's responsibilities. This limitation applies only to Q7 and Q8.

Not surprisingly, those respondents who live in southern Indiana, reside in rural settings, and who own wooded acreage, were more likely to report being very concerned about the health of Indiana’s woodlands. Also, those respondents with more education were more likely to report being very concerned or somewhat concerned. Those respondents who considered themselves to be politically liberal also reported being very concerned about Indiana woodlands more frequently than those who considered themselves of different political orientation. The odds of respondents saying they were “very concerned” about the long-term health and productivity of Indiana’s woodlands (versus “somewhat/not concerned”) were:

- Larger by a factor of 1.7 for those owning wooded acreage than those who do not,
- Larger by a factor of 1.5 for that group who purchased lumber or wood products for home improvement in the last 5 years than those who did not,
- Larger by a factor of 1.3 for residents of southern Indiana than northern Indiana,
- Larger by a factor of 1.3 for those 44 years and older versus those younger than 44, and
- Larger by a factor of 1.3 for respondents who say they are liberal-leaning/liberal than those who are conservative/conservative-leaning.

Hoosiers’ concern about the long-term health and productivity of woodlands was also analyzed by geographic region, proximity to State Forests, and residence in metro/non-metro areas.
(Table 20). The majority of respondents across all geographic regions indicated they were “very concerned” (ranging from 49-60%). Those respondents living in southern regions of Indiana expressed this concern more frequently than those living in northern or central regions of the state. Those living in close proximity to a State Forest indicated being very concerned more frequently than those who do not live near a State Forest. Overall, across all regions, most respondents expressed at least some concern for forest health and productivity.

Survey participants were also presented a list of ways that woodlands might be managed, and asked to indicate their approval or disapproval (Table 21 and Figure 5). Near-unanimity (95%) existed for removal of some trees to protect Indiana woodlands from disease and wildfire. Majority support also was given to:

- Harvesting Indiana trees if overseen by a professional foresters (85%);
- Harvesting trees to improve wildlife habitat (82%);
- Advising private landowners on number and species of trees to harvest/sell (70%); and
- Harvesting trees to make lumber or other wood products we use (61%).

Respondents seemed ambivalent about the idea of “importing woods products from other states and countries instead of harvesting Indiana trees,” with 48% approval. It is possible that mixed feelings, as a group, are attributable to lack of consideration about where wood products come from — Indiana or elsewhere. There was low approval (18%) of “cutting Indiana trees to make room for new homes” (Figure 5). An analysis of these survey items by different geographic regions of interest across the state of Indiana, whether or not respondents live in a county that has a State Forest, and if they reside in a metropolitan area or not can be found in Appendix F.
Overall, responses to these items across geographic regions were relatively consistent with only minor variations.

Figure 5. Q10: “There are a number of ways that woodlands might be managed. After listening to each way, please tell me if you approve or disapprove,” (weighted data). See Table 21 for exact question wording.
Arguably, one of the more important questions in the survey from the standpoint of contemporary forest management and wood products in Indiana is the public's sentiment toward “harvesting Indiana trees to make lumber or other wood products that we use.” A majority of respondents (61%) approved of harvesting Indiana trees to make consumable wood products. However, groups can be identified who are particularly supportive of tree harvest for wood products. A number of independent variables were examined for possible associations with this dependent variable (sentiment toward harvesting trees for wood products) (Table 22). The odds of respondents saying they “approved” of harvesting Indiana trees to make lumber or other wood products that we use” (versus “disapproved”) were:

- Larger by a factor of 3.1 for those who purchased lumber or wood products for home improvement in the last 5 years than those who did not,
- Larger by a factor of 1.9 for people that cut/collected firewood than those that did not,
- Larger by a factor of 1.7 for households with a member who worked in the wood products industry,
- Larger by a factor of 1.7 for men than women,
- Larger by a factor of 1.5 for people residing outside metro counties than those residing inside metro counties,
- Larger by a factor of 1.4 for Indianans describing themselves as “conservative or conservative-leaning” than those describing themselves as “liberal/liberal-leaning,”
- Larger by a factor of 1.4 for people residing in “rural” versus “urban” settings,
- Larger by a factor of 1.4 for people owning wooded acres than those who do not, and
- Larger by a factor of 1.3 for residents of southern Indiana than northern Indiana.

Public sentiment toward “harvesting Indiana trees to make lumber or other wood products that we use” was also analyzed by geographic region (Table 23). The majority of respondents across all regions in Indiana approve of using trees to make lumber or other wood products (54-71% of respondents). Roughly one-third to nearly 40% disapprove of this activity, with urban centers of Indianapolis and The Region having the most respondents who disapprove of this activity (39% and 37% respectively).

Respondents were presented seven statements about the importance of Indiana woodlands and management of these woodlands. Respondents were asked to express their agreement or disagreement to each of these statements (Table 24). A majority of respondents (74%) disagreed that “Indiana woodlands are valuable only if they produce jobs and income for people.”

A majority of respondents (88%) agreed that “Indiana woodlands should be managed for a balance of wood products that we use, and other benefits like recreation, wildlife, and good water quality.” Further, nearly three-quarters of respondents believe that the amount of forested land in Indiana is shrinking. Interestingly, 76% of respondents agreed with the statement “If I hear an Indiana forest is being managed as a certified green forest, I get the idea it’s being wisely managed for future generations.”

As a group, respondents generally were divided about several of the statements regarding Indiana woodlands. Nearly half of respondents (49%) disagreed with the statement that Indiana woodlands should be left untouched by humans; however, nearly over one-third agreed with this statement (17% were neutral). Similarly, one-third of respondents disagreed that the ways in which Indiana woodlands are managed will hurt the environment in the long run, while nearly
40% of people agreed with this statement (approximately one-quarter were neutral). Lastly, approximately 40% of respondents disagree that our future wood needs will be met because we are growing more than enough trees to replace those that are harvested, while nearly one-third of people agree with this statement (approximately 22% were neutral). When a mean score is calculated, respondents’ opinions are interpreted as neutral (see Table 25). However, analysis of frequencies as presented in Table 24 suggests distinct segmentation of beliefs and values with the population regarding certain forest issues.

An analysis of these survey items by different geographic regions of interest across the state of Indiana, whether or not respondents live in a county that has a State Forest, and if they reside in a metropolitan area or not can be found in Appendix F (pp. 231-232). Overall, across geographic regions, there were relatively few differences in agreement or disagreement for these survey items. The exception to this is the metropolitan areas of The Region and Indianapolis in which respondents expressed greater agreement than other regions that woodlands should be left untouched by humans, greater disagreement than other regions that future wood needs will be met because we’re growing more than enough trees, and greater agreement than other regions that the ways Indiana woodlands are managed today will hurt the environment in the long run (Evansville is another exception to this survey item with 41% agreement that management will hurt the environment, but the small sample for this region (n=88) should be noted – see p. 232 in Appendix F).

These findings also can be portrayed using “mean score analysis” (Table 25; see Figure 6 for graphic representation). In this case, mean score analysis confirmed that respondents...

- Agreed that:
  - Indiana woodlands should be managed for a balance,
  - “Certified green forest” gives the idea of forests for the future,
  - The amount of Indiana forested land is shrinking;

- Were Neutral on the statements that:
  - Woodland management today usually hurts the environment,
  - Indiana woodlands should be untouched by humans,
  - Indiana is growing enough trees to replace those harvested;

- Disagreed that:
  - Indiana woodlands are valuable only for jobs and incomes.

a. Agree range = .50 to 1.00; Neutral range = -.49 to +49; Disagree range = -.50 to -1.00
Figure 6. Q13: “For each of the following statements about Indiana woodlands, please tell me if you agree, disagree, or are neutral.” (weighted data), where -1=”disagree,” 0=”neutral,” and +1=”agree.” Agree range = .50 to 1.00; Neutral range = -.49 to +.49; Disagree range = -.50 to -1.00.

Responses to the above statements about Indiana woodlands were examined by approval and disapproval of “harvesting Indiana trees to make lumber or other wood products that we use” (Table 26). Consistently, respondents who tended to favor the existence/worth of woodlands were less supportive of tree harvest for wood products than respondents more supportive of utilitarian forest values. That said, of the group that agreed “Indiana woodlands should be left untouched by humans,” 46% approved of “harvesting trees to make lumber or other wood products that we use.” In other words, many of those who might prefer to see woodlands untouched apparently reconcile that desire with their approval of lumber and wood products.

The topic of “certified green forests” was pursued at some length with respondents. They were asked, “If you’ve heard the term ‘certified green forests,’ in a few words, could you please tell me what the term means?” Though the term “certified green forests” appealed to respondents, most (68%) were unable to offer a meaning of the phrase (Figure 7). Of the few able to provide an answer, most frequently mentioned was the idea that such forests are managed for “green” or environmentally-friendly products (14%), or more simply that the forests are wisely- or well-managed (7%). Some respondents mentioned definitions of “certified green forests” other than the nine specific categories into which responses were grouped (listed in Appendix C).

| | Agree | 63% | 37% | 1012 |

Figure 7. Q12: “If you've heard the term ‘certified green forests,’ in a few words, could you please tell me what the term means,” Multiple responses possible, (weighted data).

"Certified Green Forests" Means What? (n=1,372)
Respondents were asked their opinions of the severity of each of nine possible threats to Indiana woodlands (Table 27). Examination of the frequency distributions would suggest that “air and water pollution” and “urban sprawl” were the most severe threats identified by respondents. Mean score analysis revealed that “urban sprawl” and “air and water pollution” were indeed the two highest-rated threats—followed closely by “insects or plant diseases”—though on average, none of these qualified in the minds of respondents as a “high threat” to Indiana woodlands, but rather, “medium threats” (Table 28). Indeed, all nine possible threats (on average) fell in the “medium” range. The bottom of the list was shared by “unplanned forest fires” and “planned or prescribed fires” (Figure 8). Interestingly, “climate change” was near the bottom of the threat list. The degree to which climate change remains a relatively low-ranking threat in the minds of the general public will be an especially intriguing trend to follow in the next five to ten years. An analysis of perceived threats by different geographic regions of interest across the state of Indiana, whether or not respondents live in a county that has a State Forest, and if they reside in a metropolitan area or not can be found in Appendix F (pp. 233-236).

Hoosiers’ Sources of Information about Woodlands

Respondents were asked how often they hear or read something about Indiana forests, woodlands, or tree-covered areas. Only 14% indicated that they “often” hear or read something about Indiana forests, and 47% said “occasionally” (Table 29). This suggests that forest and woodland management in the state has relatively low salience for the Indiana citizenry.

Table 29. Q14: “How often would you say you hear or read something about Indiana forests, woodlands, or tree-covered areas,” Indiana Woodland Monitor 2009 (weighted data).
When asked about information sources they “learn about woodland ecosystems or woodland management,” the two most frequent sources of information appeared to be “TV shows and documentaries,” and “news media, such as newspapers, radio, or TV news” (Table 30). An analysis of perceived threats by different geographic regions of interest across the state of Indiana, whether or not respondents live in a county that has a State Forest, and if they reside in a metropolitan area or not can be found in Appendix F (pp. 236-240).

Mean scores confirmed the relative importance of TV shows-documentaries, and news media, though no information source provided respondents “a lot” of information (Table 31). Ranking last as a woodland information source was “university experts”—perhaps not unexpected—yet somewhat surprising was the fact that university experts as a source of information ranked just below the Indiana Department of Natural Resources. That said, it is important to note that the Indiana DNR has citizen outreach through TV shows and news media, so perhaps it is through these sources that the DNR communicates with the public and is better known (Figure 9).

a. "A lot" range = 1.50 to 2.00; "Some" range=.50 to 1.49; "Nothing" range=<.49

Figure 9. Q15: “From what sources do you learn about woodland ecosystems or woodland management? Do you learn ‘a lot,’ ‘some,’ or ‘nothing’ from…” where 0=“nothing,” 1=“some,” and 2=“a lot;” “A lot” range=1.50 to 2.00, “Some” range=.50 to 1.49, “Nothing” range=<.49, Indiana Woodland Monitor 2009 (weighted data).
Perhaps one of the most interesting questions in the survey was the one that asked about the person or experience that most influenced their sentiments about woodland management and timber harvest. A total of 1,402 unique answers were collected from respondents. This type of data always presents an analytical challenge for survey researchers, as the statements are diverse in context and reduction or categorization of them can result in a loss of depth and richness of the responses. Verbatim responses are presented in Appendix C—fully 32 pages of responses. However, for purposes of data reduction and summarization, each response was read individually and grouped into one of ten prominent categories highlighted below (Table 32).

“My Lifestyle”
Thirty-one percent of respondents implied or stated that their woodland values are rooted in their lifestyles; essentially, values virtually inseparable or indistinguishable from their personal identities and how they think as individuals. These values generally grew from early life-experiences and training (family activities, memories at a specific outdoor place, hiking, camping, scouting, fishing, burning fuel wood), though some respondents referred to more recent influences or epiphanies of sorts. Likely, these outdoor-oriented ways of thinking pervade respondents’ interests, activities, relationships—even where they have chosen to live. For example:

- I’ve just been a nature lover all my life,
- I grew up in the mountains,
- I’ve been an outdoors-person most of my life,
- Enjoyed the parks as a youngster,
- I enjoy the outdoors and woods and would like it to be there in future generations,
- I live by a lake and have 100 trees on my property,
- Probably the fact that I go to the woods every day and enjoy it,
- I live on a farm and have land in Colorado,
- Living in the middle of the forest for 15 years in Brown County,
- Ten years ago I bought a house with some woods and forest on it, and I started to like the forest,
- I grew up in the forest and I just love it,
- We have a motor home and have traveled extensively and we have seen state and national timberlands up close,
- The Lord; he was all for wood and that is why I say it. He was a carpenter, and so am I,
- I’ve just always loved the outdoors. We always went camping and I have my own little woods in my backyard; it’s our little piece of heaven,
- My family has gone camping, boating, and hiking since I was a young child, and I still do it with my kids.

**“Resource Professionals”**

A somewhat surprising 17% of respondents were influenced by a resource professional. That is, they are themselves in natural resource management, they were influenced by a relative or acquaintance in park and resource disciplines, they schooled in natural resources, they were mentored in resource studies by teachers or professors, they knew farmers or loggers/mill operators who made their livings on the land. Additionally, they reported being exposed to formal professional outreach, such as university extension, DNR publications, soil and water district contacts, political contacts, national guard training, or even Smokey Bear. For example:

- From my family; dad was a farmer,
- My occupation; I own a lumberyard. It has most influenced my opinions,
- Conservation officer from the past,
- I get most of my information from DNR,
- I’m running a saw mill now; it was passed down to me from my dad,
- From a forester that came out and walked through our woods with us,
- University professor,
- Forest service employees, both federal and state,
- A son and his wife are landscapers who are both college graduates,
- I know a Department of Natural Resources person,
- Used to work for the Department of Natural Resources,
- From my father; he was a conservation officer for a while,
- My brother, because he’s in politics,
- My family; my cousin is a forester.
- Smokey (the) Bear.
“Family Member”
Fifteen percent made simple but eloquent reference to the influence of a family member. For example:

- My dad,
- My mother,
- My son,
- My parents,
- My husband is very smart,
- My grandparents,
- My granddaughter,
- My uncle,
- My family,
- My dad and my stepfather,
- The men in my family,
- My brother,
- My grandmother.

“News Media”
Eleven percent said they were most influenced by a variety of media and media personalities. For example:

- TV,
- Documentaries,
- Internet,
- Newspapers,
- Books,
- National Geographic,
- Nova,
- Scientific magazines,
- Rush Limbaugh,
- Sarah Palin,
- Al Gore,
- Mr. Rogers.

“Travel/Witnessing Good and Bad”
Six percent attributed their sentiments to observations they’d made while traveling or in the course of daily living and activity, witnessing what they described as good and bad cases. For example:

- When I was out in Montana and saw clearcuts; that influenced me the most,
- I saw Dutch Elm Disease, and deforestation has left the land barren in Britain,
- Watching the fires in California on TV,
- Where we live is in a middle of a bunch of loggers, and they’re about the money,
- Every time I go someplace, trees are down; they cut down trees for the properties to sell,
Seeing the damage done by loggers when I lived in New Mexico and California, probably just what I have seen in my visits to the different conservation areas, taking woods to build houses.

“Self-Taught”
Five percent referred to insights gained through self-study and personal research. For example:

- My own experience; watching people go into poverty and towns dry up because they weren’t allowed to harvest in a logging town,
- Just what I read; no person in particular,
- Personal experience in the woods,
- Just being in nature,
- Just what I hear,
- My own thoughts and opinions.

“Conservation and Environmental Groups”
Three percent mentioned the influence of conservation and environmental groups. For example:

- Organizations that I belong to,
- We used to belong to the Sierra Club…,
- Letters and stuff from environmental groups,
- Environmental groups and Sycamore Land Trust,
- Activities as an environmental activist.

“Friend/Neighbor”
Two percent responded that their sentiments were influenced by a friend or neighbor. For example,

- Friends that I talk with,
- A good friend of mine,
- Watching my neighbors and listening to people talk about what’s going on,
- Good childhood mentor and friend.

“Classified Forest”
Though a rare event, several respondents referenced their involvement in the formal “Classified Forests” program, or tree farming. For example,

- Got into the Classified Forest,
- Our family has 2 properties in the Classified Forest program,
- My dad’s farm is in the program to grow trees.

Finally, 11% of respondents were unable to offer an answer.
Summary and Concluding Remarks
Objectives of the Indiana Woodland Monitor 2009 were to assess Hoosiers’…

- Opinions on active forest management on public and private lands, and trust in government regarding forest management.
  
  Finding: Indianans are generally unknowledgeable about who owns the state’s woodlands, with almost half thinking that Indiana forests are in equal public and private ownership. However, roughly half say they are “very concerned” (and most others, “somewhat concerned) about the long-term health and productivity of Indiana’s woodlands. A large majority would support efforts to advise private landowners on how many and what kinds of trees they might harvest and sell. A majority think that the 3% of Indiana’s woodlands in State Forest management is not enough, even though most say they are “not familiar” with the Indiana Division of Forestry, and when asked what first comes to mind when they think of the Division of Forestry, apparently few think to volunteer that the agency has something to do with looking after trees.

- Perceptions of what constitutes “good” forest management, and importance of different forest values in forest management (e.g., aesthetics vs. economic);
  
  Finding: “Good” forest management in the minds of Hoosiers appears to mean balancing forest benefits. A large majority supports harvesting Indiana trees for woodland management if overseen by professional foresters, but fully one-third would prefer that the state’s woodlands be untouched by human hands...Hoosiers essentially imploring, “Do what you need to do—including harvesting Indiana trees for lumber or other wood products that we use—but do it professionally with an eye toward forests for the future.”

- Awareness and perceptions of “certified green forests” (e.g., are people more accepting of forest management if it is a certified sustainable);
  
  Finding: The phrase “certified green forest” gives Indianans the idea that the forest is being managed for future generations—so whatever “certified green forest” is, they’re reassured. However, other than this vague impression, Indianans generally don’t have a clear understanding of the phrase. Moreover, Indianans think that the amount of forested land in the state is shrinking, and many perceive that not enough trees are being grown to replace trees harvested.

- Types of forest management that are socially acceptable;
  
  Finding: Majorities of Indianans support tree harvest to protect Indiana woodlands from spread of disease and wildfire, to improve places for wildlife to live, and for lumber and wood products. The citizenry is divided on the idea of importing wood products from other states and countries instead of harvesting Indiana trees, but Hoosiers roundly reject the thought of cutting Indiana trees to make room for new homes, describing the greatest threat to Indiana
woodlands as “urban sprawl.” Near the bottom of Indianans’ list of woodland threats is “climate change.”

- Environmental values and orientations.
  - **Finding:** As a citizenry, Hoosiers’ acknowledge the utilitarian values of the state’s woodlands, while expecting to see the all-important balance between woods products and other benefits, such as recreation, wildlife, and good water quality. Without doubt, the Indiana public places importance and relevance on what the Division of Forestry does—simply, as a citizenry, they lack a well-defined idea of who does it.

### Acknowledgements

Thanks are extended to:

- The Indiana adults who made this project possible by taking the time to participate in the telephone survey;
- Delve Research, for the firm’s commitment to exemplary and value-added customer service;
- Staff of Indiana Department of Natural Resources and Division of Forestry who originated the idea of an Indiana Woodland Monitor, and made themselves available throughout survey instrument development;
- Brett Martin, GIS Coordinator, Indiana Division of Forestry, who provided immediate and exemplary help with a project map request;
- Sarah Sanders of DJ Case for insightful editing;
- And to Dr. Shannon Amberg, not only for her encouragement and counsel, but for her extraordinary insights and expertise in the human dimensions of natural resource management.

APPENDIX A: Telephone Survey

Indiana Residents' Perceptions of Forests and Woodland Management: Indiana Woodland Monitor 2009

ITEMS for a Phone Survey: Version 17 (10/13/09)

Dr. Shannon Amberg, Dept. of Forestry and Natural Resources, Purdue University

Sample is 1,400 adult (18 and older) Indiana residents (English-speaking), 51% female, 49% male

Access by Random Digit Dial (RDD)

SELECTION SEQUENCE (proposed): Hello, my name is _____, and I'm calling on behalf of researchers at Purdue University who are studying public opinions about forests and woodland management in Indiana. We are not selling anything or requesting donations. Your answers will remain anonymous. Can we have about 10 minutes of your time to answer some questions that will help us better manage Indiana woodlands?

VOICE MESSAGE: Hello, my name is ____, and I'm calling on behalf of researchers at Purdue University who are studying public opinions about forests and woodland management in Indiana. We are not selling anything or requesting donations. I will try to call you again in the near future.

I need to speak with the adult living in your household over the age of 18 who had the most recent birthday and is currently at home. Are you that person?

[REINTRODUCE AS NECESSARY, READING INITIAL GREETING TO SPEAK TO NEEDED RESPONDENT]

| Q1 | [Interviewer indicate gender of respondent] | Male | Female |
| Q2 | How interested are you in Indiana's fish, forests, wildlife, and the out-of-doors? [READ LIST] | Not interested | Somewhat interested, or | Very interested |
| Q3 | How familiar are you with the Indiana Department of Natural Resources? Would you say...[READ LIST] | Not familiar | Somewhat familiar, or | Very familiar |
| Q4 | How familiar are you with the Indiana Division of Forestry within the Department of Natural Resources? Would you say...[READ LIST] | Not familiar | Somewhat familiar, or | Very familiar |
Q5  What first comes to mind when you think of the Indiana Division of Forestry? [DO NOT READ LIST; check all mentioned]

- Don't know [DON'T READ]
- camping
- conservation
- cutting trees/timber/timber harvest
- fishing (fish)
- forest fires (fighting forest fires)
- forest management/forests
- helping forest/private landowners
- hunting (game/game management)
- natural resources
- outdoor recreation/recreation
- parks
- planting trees
- Smokey Bear
- streams-lakes
- water quality
- wildlife/wildlife management
- wildlife viewing (bird-watching)
- I DON'T KNOW [SKIP TO Q9]
- other?

IF RESPONDENTS’ ANSWER QUALIFIES AS "OTHER,"
please fill-in short answer

________________________
________________________
________________________

Q6  Please rate the job that the Indiana Division of Forestry is doing in providing services for the state of Indiana [READ LIST].

- Excellent
- Good
- Fair, or
- Poor
- Don't know [DON'T READ]

Q7  How concerned are you about the long-term health and productivity of Indiana's woodlands? [READ LIST]

- Not concerned
- Somewhat concerned, or
- Very concerned
- Don't know [DON'T READ]

Q8  How often would you say you hear or read something about Indiana forests, woodlands, or tree-covered areas? [READ LIST]

- Often
- Occasionally, or
- Almost never

Q9  Do you think most of Indiana's woodlands are in government ownership, private and corporate ownership, or about equal government and private ownership? [READ LIST]

- Government ownership,
- Private and corporate ownership, or
- Equal government and private ownership
- Don't know [DON'T READ]
Q10 There are a number of ways that woodlands might be managed. After listening to each way, please tell me if you approve or disapprove [RANDOMIZE].

<table>
<thead>
<tr>
<th>Approve</th>
<th>Disapprove</th>
<th>Don't know</th>
</tr>
</thead>
<tbody>
<tr>
<td>□</td>
<td>□</td>
<td>□</td>
</tr>
<tr>
<td>a. Harvesting Indiana trees to make lumber or other wood products that we use</td>
<td>□</td>
<td>□</td>
</tr>
<tr>

</tr>
</tbody>
</table>

IF YES, "Could you tell me the name of the State Forest you visited?"
Q19  In the last 5 years, have you purchased any lumber or wood products for home improvement?
   ☐ No
   ☐ Yes

Q20  We're just about through. Do you consider your place of residence to be [READ LIST]...?
   ☐ Urban,
   ☐ Suburban, or
   ☐ Rural
   ☐ Refused [DON'T READ]

Q21  What is the highest level of education you've completed? [CATEGORIZE RESPONSE]
   ☐ Less than high school
   ☐ High school graduate
   ☐ Some college
   ☐ College graduate
   ☐ Advanced degree (MD, Lawyer, Doctorate, Graduate school)
   ☐ Refused [DO NOT READ]

Q22  With which race or ethnic group do you most closely identify yourself? [READ LIST--Respondent will likely interrupt with answer after first 3 categories]
   ☐ Black or African American
   ☐ White
   ☐ Hispanic or Latino
   ☐ Asian
   ☐ Native American
   ☐ Native Hawaiian or Pacific Islander
   ☐ Refused [DO NOT READ]

Q23  Regarding social and environmental issues, how would you describe yourself? [READ LIST]
   ☐ Liberal
   ☐ Liberal-leaning
   ☐ Conservative-leaning
   ☐ Conservative, or
   ☐ None of these
   ☐ Refused [DO NOT READ]

Q24  May I ask your age? [CATEGORIZE RESPONSE]
   ☐ 18 to 24
   ☐ 25 to 34
   ☐ 35 to 44
   ☐ 45 to 54
   ☐ 55 to 64
   ☐ 65 or older
   ☐ Refused [DO NOT READ]

Q25  What is the 5-digit zipcode of your residence?

That's all my questions. Thank you very much.
APPENDIX B: Weight Table

Summarized from “Using Weights in the Analysis of Survey Data”

David R. Johnson, Dept. of Sociology, Population Research Institute, Penn State, 2009

Weighting—assigning a value to each case in the data file—typically is used to make statistics computed from a dataset more representative of the target population. Post-stratification or “non-response” weighting is used to compensate for the fact that persons with certain characteristics may not be as likely to respond to, say, a telephone survey, as others in the target population. In the case of the Indiana Woodland Monitor 2009, it appeared that the response group tended to under-represent younger Indiana adults and over-represent older Indiana adults, and under-represent Indiana adults with lower educational attainment and over-represent Indiana adults with higher educational attainment. These under- and over-representations were identified by comparing the response group (sample) distributions with “known” and trusted population distributions, such as those presented in the 2006 National Survey of Wildlife-Associated Recreation, Indiana, a survey conducted by the Census Bureau for the U.S. Fish and Wildlife Service; and the American Community Survey, 2006-2008, also by the Census Bureau. It’s almost always better to have a “self-weighted” dataset for analysis purposes, because there are some issues with weighting. For example, weights primarily adjust means and proportions, and are appropriate for descriptive data. Weights, however, may adversely affect inferential data and standard errors, almost always increasing standard errors of estimates. But producing a truly “self-weighted” dataset of, say, 1402 Indiana adults across even a small number of variables—such as gender, metro-/outside-metro residence, age, and education—is neither efficient nor cost effective. So, weights can be employed in an attempt adjust the dataset to better mirror the target population.

Two weights were calculated for the IWM-09 (see Table B1). The first (“age-education weight” in Table B1) normalizes the sample response by the actual proportions of the Indiana population for the defined age and education categories.

The second weight (“Expansion weight” in Table B1) expands the sample response for the defined age and education categories to the actual age and education frequencies estimated in the Indiana population—again, essentially weighting by age and education, but in this case, projecting sample estimates to the Indiana adult population, 18 years and older.
Table B1. Weight table for Indiana Woodland Monitor 2009.

</tr>
</tbody>
</table>

b. The small number of respondents in this cell (18-24 year olds with college degree or higher) highlights the challenge of simultaneously weighting a dataset by more than 2 variables. Even with a relatively large sample of 1402, the number of respondents in some of the lower-response categories can quickly grow unacceptably small. Other weighting approaches are useful for weighting by 3 or more variables, such as "sequential weighting," and "raking," but each of these with its own issues.

c. (Proportion*1372).

d. (Adjusted survey frequency)/(Survey response); note that 30 respondents refused to give their ages, educational attainment, or both, thus reducing the dataset to 1372.

e. (Actual Indiana age-education frequency)/(Survey response).

</table>
HAVING WORKED IN THE LUMBER BUSINESS FOR A NUMBER OF YEARS MOST INFLUENCED ME.  
HIGH SCHOOL SCIENCE TEACHERS  
HIKING  
HIKING ACTIVITY  
HIKING AND ALL THE RECREATION I DO.  
HIKING AND CAMPING IN THE INDIANA WOODLANDS.  
HIKING AND CAMPING.  
HIKING AND CAMPING. SEEING THE ANIMALS AND INSECTS AND FISH AND BIRDS THAT LIVE THERE. I'VE SEEN SOME AREAS THAT ARE CLEAN CUT OF TREES AND I'VE SEEN THE DAMAGE TO THE HABITAT OF THINGS THAT USED TO LIVE THERE.  
HIKING IN PARKS AND WOODS.  
HIKING, CAMPING, AND JUST KNOWING IT'S THERE AND PRESERVED.  
HOBBIES  
HONEY  
HOW I WAS RAISED. PARENTS RAISED TO APPRECIATE THE ENVIRONMENT.  
HUNTERS  
HUNTING  
HUNTING AND CAMPING. PRESERVATION OF A NATURAL ECOSYSTEM.  
HUNTING AND DOING OUTDOOR STUFF MAKES ME INTERESTED.  
HUNTING AND FISHING  
HUNTING EXPERIENCE WITH MY SON. I LIKE TO HUNT, TO FISH, FAMILY CAMPS, AND JUST GREW UP DOING THAT. MY HEART'S IN THE WOODS.  
HUNTING EXPERIENCE.  
HUNTING SOME GAME AND CAMPING.  
HUNTING WITH MY FATHER.  
HUNTING, HIKING, JUST GOING AROUND THE RIVER BOTTOMS.  
HUSBAND  
I'D SAY VISITING THE STATE PARKS.  
I'M A HIKER. SO I GUESS THE FRIENDS I HIKE WITH. I'M IN ENVIRONMENTAL GROUPS AND NATURE CONSERVATION.  
I'M A MUSHROOM HUNTER.  
I'M A PART TIME PARK RANGER.  
I'M A WOOD WORKER AS A HOBBY AND WOOD PRODUCTS ARE VERY IMPORTANT TO ME. IT'S A GOOD MANAGEMENT OF TREES AND WOODLANDS. IT'S IMPORTANT. ALSO, WE'VE BEEN CAMP AND OUTDOOR PEOPLE ALL OUR LIFE, SO SPENDING TIME IN THE OUTDOORS ARE VERY IMPORTANT TO ME. THE PRESERVATION OF OUR WOODS AND WILDLIFE AREA ARE VERY IMPORTANT TO ME.  
I'M ALWAYS OUT IN THE BOONDOCKS SO THAT PERSON WOULD BE MYSELF.  
I'M AN ADULT LEADER WITH THE BOY SCOUTS.  
I'M AN ANIMAL LOVER AND I DON'T LIKE TO SEE THEIR HABITAT INVADED.  
I'M AN EAGLE SCOUT. I'VE BEEN A BOY SCOUT LEADER FOR MY WHOLE LIFE. I KNOW THE OWNERS OF A COUPLE OF LOGGING COMPANIES.  
I'M AN ENVIRONMENTAL TEACHER AND WE DO A LOT OF OUTDOOR ASSIGNMENTS AND RESEARCHES.  
I'M AN EX BOY SCOUT, SO THAT WAS AN EXPERIENCE.  
I'M AN OUTDOORS PERSON. I GREW UP IN THE WOODS. I'VE ALWAYS JUST HAD AN APPRECIATION OF IT.
<p>| I'M INTERESTED IN THE GREEN MOVEMENT AND THE CLIMATE CONTROL AND SUSTAINABILITY. | 1 |
| I'M LOST, I DON'T KNOW. | 1 |
| I'M NATURALLY CONCERNED. | 1 |
| I'M NOT AWARE OF BEING EXPOSED TO ANY OF IT. | 1 |
| I'M NOT REALLY INFLUENCED BY OTHER PEOPLE. | 1 |
| I'M NOT SURE | 2 |
| I'M NOT SURE OF THIS. | 1 |
| I'M NOT SURE THAT I CAN SAY ANYTHING. IT'S PERSONAL KNOWLEDGE THAT I HAD ALONG THE WAY. | 1 |
| I'M REALLY NOT AN OUTDOORSMAN. I MOVED FROM NEW YORK CITY, SO LET'S JUST PUT IT LIKE THAT. | 1 |
| I'M RUNNING A SAW MILL NOW. IT WAS PASSED DOWN TO ME FROM MY DAD. | 1 |
| I'VE ALWAYS KNOWN WE SHOULD TAKE CARE OF OUR FORESTS. WE WERE TAUGHT THAT IN SCHOOL. | 1 |
| I'VE ALWAYS LOVED NATURE. | 1 |
| I'VE BEEN AN OUTDOORS PERSON MOST OF MY LIFE. I'VE ALSO BEEN IN A FEW ORGANIZATIONS SUCH AS SCOUTING AND CONSERVATION GROUPS WHICH KEPT ME INFORMED WITH THE NATURAL RESOURCES. | 1 |
| I'VE HIRED PART OF THE APPALACHIAN TRAIL. VISITING NATIONAL PARKS AND STATE PARKS. PERSONAL INTEREST. | 1 |
| I'VE JUST ALWAYS GROWN UP WITH IT AROUND THE FORESTS. | 1 |
| I'VE JUST ALWAYS LOVED THE OUTDOORS. WE ALWAYS WENT CAMPING AND I HAVE MY OWN LITTLE WOODS IN MY BACKYARD. IT'S OUR LITTLE PIECE OF HEAVEN. I WENT TO GOSHEN COLLEGE IN INDIANA; THAT ALSO INSPIRED ME TO LOVE THE OUTDOORS. | 1 |
| I'VE JUST BEEN A NATURE LOVER ALL MY LIFE, SO I WOULD TO SAY MY EX-HUSBAND AND SON. WE HAVE EXPLORED THE OUTDOORS ALL OUR LIVES. | 1 |
| I'VE NEVER HAD ANY THOUGHT OR PROCESS ABOUT THE OUTDOORS BUT JUST THINGS I'VE OBSERVED OR HEARD. | 1 |
| I'VE SEEN A LOT OF WOODED AREAS BY MY HOUSE. | 1 |
| I'VE SEEN THE PARKS IN THE WOODLANDS IN 25 STATES. I CONTRIBUTE TO PRESERVE THEM. | 1 |
| I'VE TAKEN PART OF TIMBER HARVEST BOTH IN INDIANA AND MISSOURI ON LAND I OWNED. | 1 |
| I ALWAYS KNEW BECAUSE I GO CAMPING. | 1 |
| I AM AN AVID SPORTSMAN AND I SEE THE WOODS AND CLEAR CUTTING OF WOODS. WE ARE LOSING MORE WOODS THAN WHAT THEY ARE PUTTING BACK IN. | 1 |
| I AM AN EAGLE SCOUT. SO WHEN I WAS IN SCOUT, WE DID A LOT TO KEEP THE FOREST AREAS CLEAN. | 1 |
| I AM AN OLD CAMPER AND HAVE DONE A LOT OF CAMPING IN THE WOODS ALL YEAR AROUND. | 1 |
| I AM FROM NORTHERN MICHIGAN. I HAVE DONE MY OWN LUMBERING. THAT INFLUENCED MY OPINIONS. | 1 |
| I AM IN THE CONSTRUCTION INDUSTRY AND I SEE THE QUALITY DIFFERENCE BETWEEN LUMBER IN THE OLD DAYS AND NOW. THE NEW WOOD WARPS BECAUSE THE GROWTH GRAINS ARE NOT AS TIGHT. | 1 |
| I BELIEVE IN THE GREEN MOVEMENT AND NOT BEING WASTEFUL. | 1 |
| I BELONG TO THE CANAL SOCIETY AND WE DO TOURS ON THE WILDLIFE. ALSO I BELONG TO A CONSERVATION GROUP THAT RUNS THIS TOUR. IT HAS INFLUENCED ME THE MOST. THE MAN AND WOMAN WHO RUN THE TOUR TELL US ABOUT PLANTS AND ANIMALS. | 1 |</p>

<td>1</td>
</tr>
</tbody>
</table>
I would say I just hear and see things on TV and newspaper.
I would say it's probably friends who are sportsmen.
I would say my father and brother because they were big fishermen and that has always been very important to them.
I would say my grandmother because she owns farm lands that is partial woodland.
I would say my own experiences with local parks and departments. Also the childhood vacations and woodland states visited. Some documentaries, some articles on evening news.
I would say outdoor activities.
I would say preserve nation resources.
I would say television.
I would say the books.
I would say the little experience we have with camping and from the rangers at the state park.
I would say the newspaper and television. The shows they have about the woodlands, and water.
If you let the tree and stuff grow, we have a lot of oxygen. If we start cutting them down to build suburbs, then you are taking the oxygen out of here.
In the Boy Scouts and we camp out all the time.
Indiana DNR Department of Natural Resources and the information they put out.
Indiana Parks
Indiana State Foresters
Individuals within the park.
Information from my son.
Internet
Interviews like this.
It's hiking in the woods.
It's just the right thing to do, save the trees. We have to be a good steward of the land. We are the supreme being of the earth.
It's my job is to manage parks.
It's really what I've read like from Who's Your Environmental Counselor for Indiana.
It was myself. If I want to learn something, I will find the resources myself instead of depending on someone else.
It was someone on TV on a special on national parks on CBS two weeks ago.
It was the environmental censor.
It would be the people who take care of the forest.
Jane Goodall and Dianne Fosse
Jim Story
John Muir
John Muir, he was an environmentalist of the late Nineteenth Century.
John Muir, Nineteenth Century Conservationist
Just because I donate to different animals.
Just being aware of my environment, considering the flooding that went on last year.

| MOST OF IT IS FROM ME READING A LOT OF MAGAZINES. | 1 |
| MOSTLY JUST MY PERSONAL THOUGHTS ABOUT BEING IN NATURE. | 1 |
| MOSTLY NEWSPAPERS OR ARTICLES. | 1 |
| MOSTLY PRIVATE PEOPLE. | 1 |
| MOSTLY TELEVISION, NEWS AND PROFESSORS. | 1 |
| MOSTLY TV | 1 |
| MR. ROGERS | 1 |
| MY ANCESTORS | 1 |
| MY AUNT LOST HALF A MILLION DOLLARS WHEN SHE SOLD HER HOUSE BECAUSE SOMEONE TURNED HER LAND INTO A WETLAND BY LAKE MICHIGAN. | 1 |
| MY BACKGROUND IN VISITING NATURE RESERVES AND THINGS LIKE THAT. VACATIONING IN NATURE RESERVES. | 1 |
| MY BROTHER-IN-LAW WHO IS A HUNTER AND ANOTHER BROTHER-IN-LAW IS AN ENVIRONMENTALIST ENGINEER. | 1 |
| MY BROTHER | 2 |
| MY BROTHER HAS MOST INFLUENCED ME. HE IS A DIRECTOR FOR NATIONAL WILDLIFE TURKEY FEDERATION. | 1 |
| MY BROTHER, BECAUSE HE IS IN POLITICS. | 1 |
| MY BROTHER. HE WAS GOING TO BE A FOREST RANGER. | 1 |
| MY BROTHERS, A WILDLIFE BIOLOGIST AND FORESTER THAT GRADUATED FROM PURDUE. | 1 |
| MY CHILDHOOD, I’D SEEN A LOT OF CHANGE. | 1 |
| MY CHILDHOOD, MY LOVE OF NATURE. MY HUSBAND, HE’S A FARMER. | 1 |
| MY CHILDREN | 1 |
| MY CHILDREN AND GRANDCHILDREN. I WANT TO MAKE SURE THINGS ARE STILL AROUND WHEN I’M GONE. | 1 |
| MY CHILDREN CAMP A LOT. | 1 |
| MY COMMUNITY, MY NEIGHBORS AND BEING AROUND THEM. | 1 |
| MY CONCERN ABOUT MY ENVIRONMENT, THAT IT SHOULD BE CLEAN. NOT FOR PEOPLE TO THROW TRASH AROUND AND TEAR UP STUFF THAT ISN’T THEIRS. THEY SHOULD HAVE RESPECT FOR THE WOODLANDS. | 1 |
| MY COUSIN | 1 |
| MY COUSIN MOST INFLUENCED ME ABOUT WOODLANDS MANAGEMENT AND TIMBER HARVEST. | 1 |
| MY DAD’S FARM IS IN THE PROGRAM TO GROW TREES. | 1 |
| MY DAD | 11 |
| MY DAD AND HUSBAND. | 1 |
| MY DAD HAD THE INFLUENCE ON ME. | 1 |
| MY DAD INFLUENCED ME MOST. | 1 |
| MY DAD INFLUENCED ME THE MOST ON IT. I ALWAYS LOOKED UP TO HIM FOLLOWED HIS FOOTSTEPS. THE WAY HE MANAGED THE FOREST. HE LOOKED AFTER THE FOREST ON HIS OWN. | 1 |
| MY DAD IS A LOGGER. | 1 |
| MY DAD WAS A TIMBER MAN. | 1 |
| MY DAD WAS AGAINST LOGGING, SO HE INFLUENCED MY SENTIMENTS. | 1 |
| MY DAD WAS THE ONE THAT TAUGHT ME ABOUT HUNTING AND GENERAL WILDLIFE CONSERVATION. | 1 |
| <strong>MY DAD, BECAUSE HE USED TO ALWAYS TAKE US OUT AND SHOW US COUNTRIES AND DIFFERENT STATES TO GO FISHING AND CAMPING AND STUFF. MY BROTHER-IN-LAW, TOO, BECAUSE HE HUNTS AND FISHES AND STUFF. I GREW UP AROUND A PLACE WHERE TRUCKS WOULD CUT DOWN TREES AND NOW THE TOWN'S DEAD. MY GRANDMOTHER, AS WELL, BECAUSE SHE'S REALLY THRIFTY AND WATCHED WHAT SHE USED AND NEVER WASTED ANYTHING AND LOVED THE OUT DOORS.</strong> | 1 |
| <strong>MY DAD, HE WAS A FORESTER.</strong> | 1 |
| <strong>MY DAD, WE ALWAYS WENT HUNTING AND WATCHED THE WILDLIFE.</strong> | 1 |
| <strong>MY DAUGHTER AND FAMILY.</strong> | 1 |
| <strong>MY DAUGHTER WAS AN ENVIRONMENTALIST.</strong> | 1 |
| <strong>MY DAUGHTER WHEN SHE WAS IN COLLEGE. SHE WORKED IN A WEAPONS PRESERVATION PROJECT AND DISCOVERED HOW much MANKIND HAS DAMAGED THE NATURAL ECOSYSTEM.</strong> | 1 |
| <strong>MY DAUGHTER WHO HAS A FARM AND THEY WERE TOLD HOW MANY TREES THEY HAD TO PLANT IN ORDER TO REPLACE THE FALLEN TREES THEY TOOK OUT.</strong> | 1 |
| <strong>MY DAUGHTER. THE PEOPLE AT THE COUNTY PARK IN MY AREA.</strong> | 1 |
| <strong>MY DEALING WITH THE FOREST SERVICE. I WAS IN THE PARKS SERVICE AND I WORKED WITH FOREST SERVICE PEOPLE ON COMMITTEES.</strong> | 1 |
| <strong>MY ECOTOLOGY PROFESSOR. LEARNED A LOT FROM THE NATIONAL PUBLIC RADIO AND NATIONAL GEOGRAPHIC.</strong> | 1 |
| <strong>MY ENVIRONMENTAL SCIENCE TEACHER.</strong> | 1 |
| <strong>MY EX-HUSBAND AND I USED TO GO FISHING AND CAMPING AT THE GREEN SULLIVAN FOREST AND IT WAS VERY MEMORABLE FOR ME. I'M DISABLED NOW AND I WOULD LOVE IF THEY HAD A PROGRAM FOR DISABLED PEOPLE TO GET OUT IN THE ENVIRONMENT.</strong> | 1 |
| <strong>MY EX-HUSBAND WAS A PURDUE GRADUATE IN FORESTRY.</strong> | 1 |
| <strong>MY EXPERIENCE AS A FARMER HAS INFLUENCED ME.</strong> | 1 |
| <strong>MY EXPERIENCE WITH FORESTS.</strong> | 1 |
| <strong>MY EXPERIENCES IN 4-H WHEN WE WENT OUT TO THE WOODS AND GATHERED INSECTS, PLANTS AND FROGS. ALSO IN THE ARMY NATIONAL GUARD WHERE WE WENT OUT TO THE WOODS 30 OUT OF 60 DAYS AND CAMPED IN THE WOODS MOST INFLUENCED MY OPINIONS.</strong> | 1 |
| <strong>MY EXPERIENCES IN YELLOWSTONE AND YOSEMITE.</strong> | 1 |
| <strong>MY FAITH IN GOD.</strong> | 1 |
| <strong>MY FAMILY</strong> | 4 |
| <strong>MY FAMILY AND I LOVE TO HIKE AND BE OUTDOORS. WE ARE CONCERNED ABOUT RESPONSIBLE RESOURCE MANAGEMENT.</strong> | 1 |
| <strong>MY FAMILY ARE HUNTERS.</strong> | 1 |
| <strong>MY FAMILY DID A LOT OF CAMPING IN THE STATE PARKS, THAT HAS MOST INFLUENCED ME.</strong> | 1 |
| <strong>MY FAMILY GOES HIKING IN THE FOREST, THAT IS WHAT HAS INFLUENCED ME.</strong> | 1 |
| <strong>MY FAMILY HAS GONE CAMPING, BOATING AND HIKING SINCE I WAS A YOUNG CHILD AND I STILL DO IT WITH MY KIDS. IT IS EXCITING AND FUN. ALSO, I HAVE FRIENDS WHO HUNT DEER AND THAT IS IMPOSSIBLE WITHOUT FORESTS.</strong> | 1 |
| <strong>MY FAMILY HAS MOST INFLUENCED MY SENTIMENTS. MY FAMILY USED TO LOG TIMBER.</strong> | 1 |
| <strong>MY FAMILY HAS SOME LAND DOWN SOUTH.</strong> | 1 |
| <strong>MY FAMILY MEMBERS</strong> | 1 |
| <strong>MY FAMILY OWNS SOME WOODLANDS SO I'VE HEARD MORE ABOUT IT BECAUSE THEY'RE DEALING WITH WHAT SHOULD AND SHOULDN'T BE DONE.</strong> | 1 |
| <strong>MY FAMILY OWNS TEN ACRES OF WOODLAND CLOSE TO THE PIKE COUNTY STATE PARK.</strong> | 1 |
| <strong>MY FAMILY, MY COUSIN IS A FORESTER.</strong> | 1 |
| MY FAMILY, THEY ARE THE ONES THAT TALK ABOUT IT THE MOST. | 1 |
| MY FAMILY, WE GREW UP IN A LITTLE WOOD COMMUNITY. | 1 |
| MY FAMILY, WE LIKE TO HUNT AND FISH. OUTDOOR RECREATION, SUCH AS CAMPING HIKING. | 1 |
| MY FATHER-IN-LAW MOST INFLUENCED ME. HE WAS A FORESTER. | 1 |
| MY FATHER-IN-LAW. HE HAS BEEN A BIOLOGY TEACHER FOR 39 YEARS AND IS VERY MUCH INTO CONSERVATION. KEEPING UP WITH OUR NATURAL RESOURCES, TAKING CARE OF THEM AND SUCH. | 1 |
| MY FATHER | 11 |
| MY FATHER AND FAMILY | 1 |
| MY FATHER AND GRANDFATHER | 1 |
| MY FATHER AND MOTHER | 1 |
| MY FATHER | 1 |
| MY FATHER FARmed AND OWNED SEVERAL ACRES. | 1 |
| MY FATHER HAS A MASTERS IN RESOURCE MANAGEMENT. | 1 |
| MY FATHER HAS BEEN A NATURE GURU HUNTING AND EVERYTHING ELSE. HE’S A GREAT OUTDOOR GUY. | 1 |
| MY FATHER LIKED TO HUNT AND HE WAS A PERSON WHO INFLUENCED ME. | 1 |
| MY FATHER MANAGING A SMALL FAMILY FARM. | 1 |
| MY FATHER TOOK ME FISHING AND HIKING AND TAUGHT ME HOW TO HUNT AND ALWAYS PICK UP TRASH AND TO MAKE SURE CAMP FIRES ARE OUT, THAT MOST INFLUENCED ME. | 1 |
| MY FATHER TOOK ME HUNTING AND TOLD ME TO LEAVE THE WOODS THE SAME WAY IT WAS WHEN YOU CAME IN AND TO ONLY HUNT WHAT YOU NEEDED. DON’T SHOOT JUST TO BE SHOOTING. | 1 |
| MY FATHER WAS A LUMBERMAN AND I USED A PROFESSIONAL FORESTER TO MANAGE OUR TREES ON OUR PROPERTY. | 1 |
| MY FATHER WAS A TREE LOVER. HE THOUGHT THEY WERE BEAUTIFUL AND SO DID I. | 1 |
| MY FATHER WAS ALWAYS CONCERNED ABOUT THE ENVIRONMENT. | 1 |
| MY FATHER. HE WAS A TIMBER CUTTER IN INDIANA. | 1 |
| MY FATHER. JUST FROM LEARNING WHAT HE TAUGHT ME. HE LOVED THE OUTDOORS. | 1 |
| MY FATHER. WE LIVED ON A FARM AND MY FATHER WOULD NOT ALLOW ANYONE TO CUT DOWN A TREE UNLESS IT WAS A DEAD TREE AND WE WOULD USE IT FOR HEAT. | 1 |
| MY FONDNESS OF THE OUTDOORS. | 1 |
| MY FRIEND | 1 |
| MY FRIEND CAROL WHO IS A CONSERVATION OFFICER. | 1 |
| MY FRIEND WHO HAS A PHD IN FORESTRY. | 1 |
| MY FRIENDS | 1 |
| MY FRIENDS, DISCUSSING PRESERVATION, TALKING ABOUT RECYCLING RECYCLABLE PRODUCTS LIKE BOTTLES, CSNS AND PAPER. | 1 |
| MY GIRLFRIEND HAS MOST INFLUENCED ME. SHE WORKS FOR THE ILLINOIS FOREST PRESERVE. | 1 |
| MY GRANDDAUGHTER, SHE IS REALLY INTO CONSERVATION AND ENTOMOLOGY. WE HAVE BEEN GOING OUT IN THE WOODS A LOT. | 1 |
| MY GRANDFATHER | 11 |
| MY GRANDFATHER AND FATHER | 1 |
| MY GRANDFATHER AND I USED TO TAKE WALKS IN THE WOODS. | 1 |
| MY GRANDFATHER HAS MOST INFLUENCED ME. | 1 |
| MY GRANDFATHER SPENT A LOT OF TIME IN THE WOODS AND I'VE SPENT A LOT OF TIME IN THE WOODS MYSELF. I'M A SCOUT MASTER NOW. | 1 |
| MY GRANDFATHER, HE WAS PURE BLOOD INDIAN. WE WOULD GO OUT IN THE WOODS AND LEARN A LOT. I CAN NAME EVERY BUSH, FLOWER, TREE, AND ANIMAL THAT LIVES IN THE AREA. AT NIGHT THERE WERE HUNTERS THAT WOULD SET TRAPS; THE ONES THAT CLAMP SHUT AND AT NIGHT WE WOULD GO OUT AND SET OFF THE TRAPS SO NO ANIMALS WILL STEP IN THEM. | 1 |
| MY GRANDFATHER, DOING STUFF LIKE FORESTING AND YOU CAN'T BE REPLACING THE FOREST. IT'S NOT LIKE BUYING SHOES AND REPLACING IT. | 1 |
| MY GRANDKIDS, WE HUNT AND FISH AND TRY TO TAKE CARE OF IT FOR THEM. | 1 |
| MY GRANDMA INFLUENCED ME. | 1 |
| MY GRANDPA | 1 |
| MY GRANDPARENTS | 4 |
| MY GROWING UP IN THIS AREA AND SEEING A LOT MORE TREES. | 1 |
| MY HEART | 1 |
| MY HUNTING EXPERIENCE IN INDIANA. | 1 |
| MY HUSBAND'S OPINION. HE'S AN OUTDOORSMAN, SO HE LIKES HUNTING, FISHING, HIKING AND CAMPING. | 1 |
| MY HUSBAND | 13 |
| MY HUSBAND AND I HAVE BEEN CAMPING FOR A LONG TIME. | 1 |
| MY HUSBAND AND I HAVE BEEN IN THE TIMBER BUSINESS FOR OVER FIFTY YEARS, AND HIS FATHER FIFTY YEARS BEFORE THAT. | 1 |
| MY HUSBAND AND KIDS HAVE MOST INFLUENCED MY SENTIMENTS ABOUT WOODLAND MANAGEMENT, THEIR KNOWLEDGE. | 1 |
| MY HUSBAND AND MY ONE FRIEND. ALSO TV. | 1 |
| MY HUSBAND BECAUSE HE'S FOR WOODLANDS AND KEEPS UP ON HARVESTING OF WOODLANDS. | 1 |
| MY HUSBAND BEING INVOLVED IN SCOUTING. | 1 |
| MY HUSBAND HAS FRIENDS THAT ARE FORESTERS. | 1 |
| MY HUSBAND HAS MOST INFLUENCED ME. | 1 |
| MY HUSBAND HAS MOST INFLUENCED MY VIEWS ABOUT WOODLAND MANAGEMENT. | 1 |
| MY HUSBAND IS VERY SMART. | 1 |
| MY HUSBAND RUNS A STATE RECREATION CENTER AND A STATE FOREST HE MANAGES. | 1 |
| MY HUSBAND STUDIED SOME OF THAT IN COLLEGE. I ALSO HAVE FRIENDS THAT ENJOY HUNTING. WE SIT AROUND THE CAMP FIRE AND TALK ABOUT THAT. | 1 |
| MY HUSBAND WAS AN OUTDOORSMAN AND HE TAUGHT ME A LOT ABOUT TAKING CARE OF THE ENVIRONMENT. | 1 |
| MY HUSBAND, BECAUSE OF THE WAY HE CUTS TREES AND SO FORTH. | 1 |
| MY HUSBAND, FATHER-IN-LAW, AND MYSELF. | 1 |
| MY HUSBAND, HE'S A HUNTER. | 1 |
| MY HUSBAND, HE IS A HUNTER AND ALSO USE WOOD TO HEAT OUR HOME. I LIKE TO FISH. | 1 |
| MY HUSBAND, HE WAS WITH THE FOREST SERVICE. | 1 |
| MY HUSBAND. | 1 |
| MY HUSBAND. HE TOLD ME A LOT OF THINGS ABOUT TREES BECAUSE HE LOVED NATURE. | 1 |
| MY LATE HUSBAND MOST INFLUENCED ME AND SOME ENVIRONMENTAL REPORTS. READING NATIONAL GEOGRAPHIC AND TV REPORTS ALSO INFLUENCED ME. | 1 |
| MY LIFESTYLE. | 1 |
| MY LIFETIME OF EXPERIENCE. | 1 |
| MY LOVE FOR THE EARTH AND THE ANIMALS WAS INFLUENCED BY THE BIBLE. | 1 |
| MY MAN, MITCH. | 1 |
| MY MOTHER-IN-LAW HAS MOST INFLUENCED MY OPINIONS. | 1 |
| MY MOTHER-IN-LAW. | 1 |
| MY MOTHER | 3 |
| MY MOTHER HAS MOST INFLUENCED ME, SHE LOVES TREES, HATES TO SEE THEM CUT DOWN. | 1 |
| MY NEIGHBORS. | 1 |
| MY OCCUPATION; I OWN A LUMBERYARD. IT HAS MOST INFLUENCED MY OPINIONS. | 1 |
| MY OLD SCHOOL TEACHER AT THE UNIVERSITY AND I JUST ALREADY KNOW. | 1 |
| MY OWN | 1 |
| MY OWN AWARENESS OF HOW THEY LOOK NOW THAN HOW THEY USED TO LOOK. | 1 |
| MY OWN BELIEFS. WHAT I'VE SEEN AND EVALUATED ON MY OWN. | 1 |
| MY OWN EXPERIENCE HUNTING AND ENJOYING THE OUTDOORS AND NATURE HAVE MOST INFLUENCED ME. | 1 |
| MY OWN EXPERIENCE. WATCHING PEOPLE GO INTO POVERTY AND TOWNS DRY UP BECAUSE THEY WEREN'T ALLOWED TO HARVEST IN A LOGGING TOWN. | 1 |
| MY OWN EXPERIENCES OF LIVING IN THE WOODS AND HIKING. I'M A BEE KEEPER, SO I JUST CARE ABOUT THE FACT THAT THERE'S WOODS IN THE OPEN AREAS THAT ARE UNTouched. | 1 |
| MY OWN FATHER. THINGS I GATHER FROM TELEVISION AND MEDIA SOURCES. | 1 |
| MY OWN PERSONAL EXPERIENCE HUNTING AND ENJOYING THE OUTDOORS AND NATURE HAVE MOST INFLUENCED ME. | 1 |
| MY OWN PERSONAL EXPERIENCE. WATCHING PEOPLE GO INTO POVERTY AND TOWNS DRY UP BECAUSE THEY WEREN'T ALLOWED TO HARVEST IN A LOGGING TOWN. | 1 |
| MY OWN PERSONAL EXPERIENCES. | 2 |
| MY OWN PERSONAL INTEREST. I LIKE THE TREES FOR WHAT THEY ARE. | 1 |
| MY OWN PERSONAL OPINION. | 1 |
| MY OWN SELF | 1 |
| MY OWN THOUGHTS AND OPINIONS. | 1 |
| MY OWN VISITATION AND STUDYING OF INDIANA. | 1 |
| MY PARENTS | 5 |
| MY PARENTS AND GROWING UP IN PENNSYLVANIA. ALSO MY WORK ENVIRONMENT. | 1 |
| MY PARENTS HAVE MOST INFLUENCED MY SENTIMENTS. | 1 |
| MY PARENTS, MY FRIENDS AND MY OWN HEALTH. I WAS VERY SICK FOR FIVE YEARS BECAUSE OF THINGS I ATE AND SINCE I'VE BECOME TOTALLY ORGANIC AND GROW MY OWN FOODS, I'M HEALTHY AGAIN. | 1 |
| MY PARENTS. I GREW UP IN A WOODED AREA AND I DON'T WANT THEM TO GET CUT DOWN. | 1 |
| MY PERSONAL EXPERIENCE HIKING. | 1 |
| MY PROFESSOR | 1 |
| MY PROFESSORS IN NATURAL RESOURCES AND ENVIRONMENTAL SCIENCES AT PURDUE. I MAJORED IN IT, SO THEY MOST INFLUENCED ME. ALSO, I LIKE TO CAMP AND FISH WITH MY STEP FATHER AND MOTHER WHO TOOK ME CAMPING WHEN I WAS 10 YEARS OLD. THAT INFLUENCED ME TOO. | 1 |
| MY READING ABOUT THE ORIGINAL FORESTS OF INDIANA HAS MOST INFLUENCED ME; BOOKS. | 2 |
| MY RELIGIOUS BELIEFS. | 1 |
| MY SCOUT MASTER WHEN I WAS IN BOY SCOUTS. | 1 |
| MY SISTER-IN-LAW. | 1 |
| MY SISTER | 1 |
| MY SISTER IS A FIRE FIGHTER. | 1 |
| MY SON-IN-LAW | 1 |
| MY SON | 3 |
| MY SON BECAUSE HE ENJOYS THE OUTDOORS. HE’S A HUNTER. | 1 |
| MY SON, HE LIVES IN PART OF THE NATIONAL FOREST. | 1 |
| MY SON, WHILE HE WAS AT PURDUE. | 1 |
| MY SURROUNDINGS | 1 |
| MY TRAVELS, WEST RANGERS. | 1 |
| MY TRIP TO SEQUOIA NATIONAL FOREST IN CALIFORNIA. | 1 |
| MY UNCLE AND BROTHER | 1 |
| MY UNCLE IS AN OUTDOORSMAN. HE LIVES IN A CABIN OUT IN THE WOODS. SO I LEARN A LOT FROM HIM ABOUT WOODLANDS. | 1 |
| MY UNCLE OWNED ABOUT 15 ACRES OF NATURAL WOODLAND. | 1 |
| MY UNCLE WAS A TIMBER BUYER. | 1 |
| MY UNCLE WITH HIS KNOWLEDGE. | 1 |
| MY UNCLE, BECAUSE HE WAS A LOGGER. HE HAD A REAL LOVE OF THE WOODS. WE GREW UP IN WOODLAND AREAS AND RESPECTED THE WOODS. | 1 |
| MY UNCLE, MY BROTHER, AND OUTDOOR, SUCH AS CAMPING, HUNTING SPORTSMEN GROUPS. | 1 |
| MY UPBRINGING. NO SINGLE EXPERIENCE INFLUENCED MY VIEW POINT. | 1 |
| MY WAY OF LIFE. | 1 |
| MY WIFE'S FAMILY OWNS SOME PARTS OF THE WOODS. | 1 |
| MY WIFE | 1 |
| MY WIFE AND I BOTH LIKE THE OUTDOORS AND LIVED IN A RURAL COMMUNITY WHERE FARMERS WERE OFTEN CUTTING DOWN THEIR TREES. | 1 |
| MY WIFE MOST INFLUENCED ME, SHE IS DOING A PAPER ON WOODLAND MANAGEMENT IN SCHOOL. SHE HAS INVESTIGATED WOODLANDS MANAGEMENT ON INTERNET NEWS. | 1 |
| MY WIFE WHO'S A SCIENCE TEACHER. | 1 |
| MY WIFE WHO WORKS AT PURDUE. | 1 |
| MY WIFE, BECAUSE SHE'S ALWAYS TALKING ABOUT TREES, ANIMALS AND MARSHLANDS. | 1 |
| MY WOOD WORKING HOBBY AND CONSTRUCTION PROJECTS. OWNING WOOD. DESIRING TO BE A CONSERVATIONIST. | 1 |
| MY WORK | 1 |
| MY WORK EXPERIENCE. | 1 |
| MY WORK EXPERIENCES, I USED TO WORK WITH KIMBEL MANUFACTURERS. THEY HAVE AN OFFICE/FURNITURE BUSINESS. THEY OWNED AND MANAGED THEIR OWN FORESTRY. MY NEIGHBOR IS ALSO A TREE HARVESTER, AND MY HUSBAND'S FRIEND IS A CONSERVATION OFFICER. LOCAL STUFF, WE LIVE NEAR POTOCO LAKE. | 1 |
| MYSELF | 9 |
| MYSELF AND THE BENEFIT OF THE DOUBT RATHER THAN REAPING THE HARVEST, SO TO SPEAK. | 1 |
| MYSELF FROM BEING OUTDOORS. | 1 |
| MYSELF JUST HIKING, RUNNING AND MOUNTAIN BIKING AND I LIVE NEXT TO PLYMOUTH PARK. | 1 |
| MYSELF, I DO A LOT OF TREE PLANTING IN THE DIFFERENT PLACES THAT I'VE LIVED. | 1 |</p>

</table>
The movement in this country is green stuff, green technology. We should be good stewards of the natural resources we do have. So much junk science and political movement, it is politically correct to be green. It is out of balance. You don’t put environment above people. People are still important. The path the country that’s going down is leading to the destruction of economic growth. Our food production in the country is 60 percent foreign. The false beliefs or myths that environmentalists are presenting is going to be destructive to the welfare of the people and the economics of Indiana and the country.

The Nature Conservancy has most influenced me through their magazine. Also the National Geographic magazine.

The Nature Conservancy

The News

The News Media

The News Media, the local newspaper does give some information.

The News, so just watching the News and seeing what’s going on. I know different people want to do different things and I see this from the News.

The News, talking with people.

The News, if I don’t see it on TV, I don’t learn about it.

The Newspaper

The Newspaper and Television.

The Newspaper, Media

The Newspapers

The NRDC Group

The numbers of trucks I see going down the highway loaded with harvested logs and the number of trees I see cut down for building, road construction, etc.

The Outdoors and Family.

The Outdoors.

The overall irresponsibility of Corporate America.

The people I grew up with, like family and friends.

The people that run the parks and the woodlands do a very good job.

The people that take care of the woodlands. The Forest Newsletter.

The people that work for the DNR.

The person would be Tommy Cutter. He owns some forest land, he talks to me.

The programs I see on television.

The Public Foresters I’ve met.

The Reservoir Manager

The schools I went to influenced my opinions.

The sons and my husband.

The sportsmen that use the land.

The Teacher at my building.

The television has most affected me. Things like only you can prevent forest fires.

The television has most influenced my opinions. The logging show on TV.

The things I watch on television makes me think about it.

The times I’ve been in the state parks. What I read in the newspaper.

The trees in my yard bend over into others and they fall. I love to fish.

</tbody>
</table>
We live in Indiana Dunes, that has influenced me most. It should be used for recreation. Also the California wildfires have influenced my opinions.

We live on a farm with trees.

We raised trees 46 acres. We worked with forest, got interested at the Biekne and Purdue.

We use the woods all the time. We're always out in the woods.

We used to belong to the Sierra Club and naturalist shows on TV. They have both influenced me.

We used to camp a lot in the national parks and the national forests and we really enjoyed it.

We used to camp a lot. We always liked going to the wooded areas. My friend had the DNR out and planted trees.

We used to get the National Geographic magazine.

We used to go camping years ago and I enjoyed it.

We went to see the wildlife Kankakee Reserve.

We went vacationing down the Florida Keys, and you can see the trees, birds and everything. But now they just about destroyed everything there.

Well we live in the middle of the woods.

Well you would hope that the head of your town would be the person to work with them and make sure nothing bad comes in, whatever shouldn't be happening, he would be handling that (W/E)NE.

Well, my college degree in wildlife biology.

What I've learned camping and from the internet.

What I've read in magazines and seen on television.

What I've read in magazines, articles and books.

What I've seen on TV and read in magazines.

What I get from the university, Purdue and concerned group.

What I have read in magazines has most influenced me.

What I hear on the TV or read. Just in general.

What I read on the internet, like news and environmental issues.

What I read.

What I saw on TV, like nature.

What you read in the paper personally for me.

What you see on news about burning controlled fires.

When I got to ride my horse at Brown County Park (W/E) NE.

When I was a boy growing up, my father and grandfathers.

When I was a kid, we lived by the woods that I would go play in. Now there is a large environmentally active community. The area has always been involved with the environment.

When I was growing up, I lived in Tennessee, so I learned a lot from how they managed things there.

When I was out in Montana and saw clear cut forests, that influenced me most.

When I was young, I liked camping.

When I went to the park as a child.

When I worked with wood.
WHEN WE WERE YOUNGER, WE WOULD GO TO THE STATE PARKS AND SPEND A LOT OF TIME IN THE ROCKY’S. GOING OUT AND SEEING WHEN I WAS YOUNGER.  
WHERE WE LIVE, IS IN A MIDDLE OF A BUNCH OF LOGGERS, AND THEY'RE ABOUT THE MONEY. I JUST THINK THE ALL MIGHTY DOLLAR IS PRETTY SURROUND HERE.  
WHO MANAGED THE TIMBER.  
WIM’S RADIO. THEY HAVE AN OUTDOOR SHOW THAT I LISTEN TO.  
WOODS  
WORD OF MOUTH  
WORKING WITH FORESTRY PEOPLE AND CONSERVATION GROUPS HAS INFLUENCED ME MOST.  
WOULD BE MY PARENTS AND COLLEAGUES.  
YOU DID. I HAVEN’T PAID MUCH ATTENTION TO IT.  
YOU. THE PERSON INTERVIEWING ME.  

### Q17: How many total wooded acres of Indiana land do you own?

APPENDIX E:
Frequency Analysis of All Variables (Excluding Open-ended Questions) by Selected Classification Variables:
“Banner Point Analysis” (unweighted data)

(See Questionnaire, Appendix A, for exact question wording)

Often, the words “back of the report” bring to mind an endless stream of tables that no one seriously studies—an almost perfunctory product accompanying large-scale survey research. Yet anyone who has used reports from the Department of Interior’s and Census Bureau’s National Survey of Fishing, Hunting, and Wildlife Associated Recreation knows that some of the most interesting and insightful findings are gleaned from examination of tables “in the back of the report” (http://www.census.gov/prod/www/abs/fishing.html, Retrieved, 11/30/09). The tables have scant (or no) supporting narrative. Yet for anyone willing to ponder the numbers, the data and distributions reveal relationships that wonderfully illuminate the research project as a whole, and augment the report’s up-front expository narrative into which some researcher has poured his/her best insights and interpretations. Simply, the thrill of “the back of the report” is that it allows the reader to become the researcher.

This is especially the case with the Indiana Woodland Monitor 2009 (IWM09) that featured a 25-question, carefully planned and artfully-worded questionnaire, and produced a dataset that an analyst could explore for a long season. The following Banner Point analyses were conscientiously constructed with a full appreciation of the genuine importance of tables in the “back of the report.” A banner point is a single response category or value; for example, for the variable, Gender, “Male” is one banner point, and “Female” is one banner point. Banner Point analysis essentially is a 2-way cross-tabulation of each question in the survey by several other carefully chosen questions; tabulation by about 35-45 Banner Points is common (perhaps not coincidentally, about what usually fits on a page with 10-pt. Arial font).

But why not cross-tabulate every question in the survey with every other question to look for insightful results? Given that the IWM09 had 25 questions, several of which had multiple sub-questions), solving for the number of possible cross-tabulations not only represents a classic “Introduction to Probability 101” exercise (and how many possible 3-way cross-tabulations with 25+ variables?), but an effective way to fill a dumpster with perfectly good paper. Though “data dredging,” as it’s sometimes called, has appropriate application, it’s not helpful for the purpose here, which is to set research priorities and actually reduce data—in fact, innumerable cross-tabulations take our minds off the task at hand, and that’s to “think things through to what’s important.” The essence of human dimensions research—just like decision-making in conservation agencies—is setting priorities.

The priority Banner Points (51 in total) and rationale for inclusion, are:

- Q1: “Gender”
  - Outdoor-oriented human dimensions studies consistently reveal a gender effect.
    - Male
    - Female
  2 Banner Points
Q2: “How interested are you in Indiana’s fish, forests, wildlife, and the out-of-doors?”
- This variable helps reveal the respondent’s interest in and commitment to outdoor-oriented issues and activities.
  - Not interested
  - Somewhat interested
  - Very interested

Q3: “How familiar are you with the Indiana Department of Natural Resources?”
- Variable provides insights to respondent’s attentiveness to natural resource topics.
  - Not familiar
  - Somewhat familiar
  - Very familiar
  - 2 “Don’t know” eliminated for this analysis

Q4: “How familiar are you with the Indiana Division of Forestry within the Department of Natural Resources?”
- This variable—as well as Q8—focuses very specifically on respondent’s awareness of forestry management and related issues.
  - Not familiar
  - Somewhat familiar
  - Very familiar
  - 6 “Don’t know” eliminated for this analysis

Q8: “Please rate the job the Indiana Division of Forestry is doing in providing services for the state of Indiana.”
- Poor
- Fair
- Good
- Excellent
- Don’t know

Q7: “How concerned are you about the long-term health and productivity of Indiana woodlands?”
- Variable helps establish the degree of salience of forest-related topics and issues to the respondent.
  - Not concerned
  - Somewhat concerned
  - Very concerned
  - 6 “Don’t know” eliminated for this analysis

Q8: “How often would you say you hear or read something about Indiana forests, woodlands, or tree-covered areas?”
- Variable helps measure extent to which the respondent is attuned or exposed to forest management and issues.
  - Almost never
  - Occasionally
  - Often
Q17: “How many total wooded acres of Indiana land do you own?”
   - Ownership of wooded acres presumably could affect respondent’s perceptions of forest management, and the category “10 or more acres” might provide insights to the thinking of private non-industrial forest landowners.
     - Less than 1 acre or none
     - 1-9 acres
     - 10 or more acres

Q19: “In the last 5 years, have you purchased any lumber or wood products for home improvement?”
   - Respondent’s actual purchase of lumber or wood products in recent years could have an affect on his/her awareness of forest management, or interpretation of forest issues.
     - Yes
     - No
     - Don’t know

Q20: “Do you consider your place of residence to be urban, suburban, or rural?”
   - The extent to which the respondent actually resides—or more precisely, perceives him-/herself to be residing—in a urban versus rural setting could affect perceptions of forest management.
     - Urban
     - Suburban
     - Rural
     - 26 “Refused” eliminated for this analysis

Q20: Residence in northern Indiana, southern Indiana, or Indianapolis.
   - Respondents were grouped by county of residence (based on Zip5) into North Indiana and South Indiana, with I-70 as the boundary. The sample size was large enough to allow residents of Marion County (Indianapolis) to be analyzed separately from the North and South categories.
     - North
     - South
     - Indianapolis (Indy)
     - 48 “Refused” Zip5; eliminated for this analysis

Q21: “What is the highest level of education you’ve completed?”
   - Outdoor-oriented human dimensions studies often reveal a gender effect.
     - Less than HS
     - HS grad
     - Some college
     - College grad+

Q22: “With which race or ethnic group to you most closely identify yourself?”
   - Outdoor-oriented human dimensions studies often reveal a race-ethnicity effect.
     - Black/other
     - White
Q23: “Regarding social and environmental issues, how would you describe yourself?”
   - Outdoor-oriented human dimensions studies often reveal a “political stance” effect.
     - Liberal
     - Liberal-leaning
     - Conservative-leaning
     - Conservative
     - None of these
     - 42 “Refused” eliminated for this analysis  

Q24: “May I ask your age?”
   - Outdoor-oriented human dimensions studies often reveal an age effect.
     - 18-24
     - 25-34
     - 35-44
     - 45-54
     - 55-64
     - >64
     - 22 “Refused” eliminated for this analysis

## Frequency Analysis of All Variables by Selected Variables

### Q1: Gender:
- Male: 74% Approve, 24% Disapprove, 2% Don’t know, Total 687
- Female: 70% Approve, 27% Disapprove, 4% Don’t know, Total 715

### Q2: Your interest in Indiana’s fish, forests, wildlife, and outdoors?
- Not interested: 58% Approve, 37% Disapprove, 5% Don’t know, Total 107
- Somewhat interested: 69% Approve, 28% Disapprove, 3% Don’t know, Total 554
- Very interested: 76% Approve, 22% Disapprove, 3% Don’t know, Total 741

### Q3: Your familiarity with IN DNR?
- Not familiar: 67% Approve, 30% Disapprove, 4% Don’t know, Total 380
- Somewhat familiar: 74% Approve, 24% Disapprove, 3% Don’t know, Total 786
- Very familiar: 75% Approve, 23% Disapprove, 3% Don’t know, Total 234

### Q4: Your familiarity with IN Div of Forestry?
- Not familiar: 69% Approve, 28% Disapprove, 3% Don’t know, Total 771
- Somewhat familiar: 77% Approve, 20% Disapprove, 2% Don’t know, Total 524
- Very familiar: 68% Approve, 28% Disapprove, 4% Don’t know, Total 101

### Q6: Rate the job IN Div of Forestry is doing in providing services for IN.
- Poor: 51% Approve, 35% Disapprove, 14% Don’t know, Total 43
- Fair: 74% Approve, 22% Disapprove, 4% Don’t know, Total 261
- Good: 74% Approve, 24% Disapprove, 1% Don’t know, Total 602
- Excellent: 76% Approve, 23% Disapprove, 1% Don’t know, Total 135
- Don’t know: 65% Approve, 31% Disapprove, 4% Don’t know, Total 225

### Q7: Your concern about long-term health/productivity of IN woodlands?
- Not concerned: 56% Approve, 40% Disapprove, 3% Don’t know, Total 87
- Somewhat concerned: 69% Approve, 28% Disapprove, 3% Don’t know, Total 536
- Very concerned: 76% Approve, 21% Disapprove, 3% Don’t know, Total 637

### Q8: How often do you hear/read about IN woodlands?
- Almost never: 68% Approve, 30% Disapprove, 3% Don’t know, Total 426
- Occasionally: 74% Approve, 23% Disapprove, 3% Don’t know, Total 650
- Often: 73% Approve, 24% Disapprove, 3% Don’t know, Total 190

### Q17: Wooded acres owned?
- <1 acre or none: 71% Approve, 25% Disapprove, 4% Don’t know, Total 847
- 1-9 acres: 72% Approve, 27% Disapprove, 1% Don’t know, Total 362
- 10 or more acres: 75% Approve, 21% Disapprove, 3% Don’t know, Total 187

### Q19: Purchased lumber/wood products for home improvement in last 5 yrs?
- Yes: 76% Approve, 21% Disapprove, 3% Don’t know, Total 170
- No: 72% Approve, 26% Disapprove, 3% Don’t know, Total 893
- Don’t know: 70% Approve, 27% Disapprove, 4% Don’t know, Total 339

### Q20: Your place of residence...
- Urban: 69% Approve, 27% Disapprove, 4% Don’t know, Total 340
- Suburban: 72% Approve, 25% Disapprove, 3% Don’t know, Total 517
- Rural: 74% Approve, 23% Disapprove, 2% Don’t know, Total 519

### Q21: Level of education?
- Less than HS: 71% Approve, 24% Disapprove, 5% Don’t know, Total 55
- HS grad: 67% Approve, 30% Disapprove, 4% Don’t know, Total 410
- Some college: 70% Approve, 28% Disapprove, 1% Don’t know, Total 370
- College grad+: 77% Approve, 20% Disapprove, 3% Don’t know, Total 551

### Q22: Race-ethnicity?
- Black/Other: 67% Approve, 30% Disapprove, 3% Don’t know, Total 96
- White: 72% Approve, 25% Disapprove, 3% Don’t know, Total 1287

### Q23: Regarding social & environmental issues, are you...
- Liberal: 71% Approve, 27% Disapprove, 2% Don’t know, Total 228
- Liberal-leaning: 81% Approve, 17% Disapprove, 1% Don’t know, Total 135
- Conservative-leaning: 79% Approve, 18% Disapprove, 3% Don’t know, Total 180
- Conservative: 67% Approve, 29% Disapprove, 4% Don’t know, Total 589
- None of these: 73% Approve, 23% Disapprove, 4% Don’t know, Total 228

### Q24: Age?
- 18-24: 73% Approve, 27% Disapprove, 0% Don’t know, Total 45
- 25-34: 66% Approve, 31% Disapprove, 3% Don’t know, Total 102

### Conclusion

The final report provides a comprehensive analysis of various variables by selected variables, highlighting trends and insights into public interest and familiarity with Indiana's natural resources and forestry services. This data could be useful for policymakers and stakeholders in planning future initiatives and strategies for conservation and public education.
| Q1: Gender... | Male | 47% | 35% | 18% | 687 |
| Q1: Gender... | Female | 49% | 35% | 16% | 715 |
| Q2: Your interest in Indiana’s fish, forests, wildlife, and outdoors? | Not interested | 68% | 21% | 10% | 107 |
| Q2: Your interest in Indiana’s fish, forests, wildlife, and outdoors? | Somewhat interested | 50% | 37% | 13% | 554 |
| Q2: Your interest in Indiana’s fish, forests, wildlife, and outdoors? | Very interested | 44% | 35% | 21% | 741 |
| Q3: Your familiarity with IN DNR? | Not familiar | 58% | 31% | 12% | 380 |
| Q3: Your familiarity with IN DNR? | Somewhat familiar | 47% | 36% | 17% | 786 |
| Q3: Your familiarity with IN DNR? | Very familiar | 38% | 38% | 24% | 234 |
| Q4: Your familiarity with IN Div of Forestry? | Not familiar | 54% | 33% | 13% | 771 |
| Q4: Your familiarity with IN Div of Forestry? | Somewhat familiar | 41% | 36% | 22% | 524 |
| Q4: Your familiarity with IN Div of Forestry? | Very familiar | 37% | 42% | 22% | 101 |
| Q6: Rate the job IN Div of Forestry is doing in providing services for IN. | Poor | 58% | 28% | 14% | 43 |
| Q6: Rate the job IN Div of Forestry is doing in providing services for IN. | Fair | 47% | 35% | 18% | 261 |
| Q6: Rate the job IN Div of Forestry is doing in providing services for IN. | Good | 46% | 35% | 19% | 602 |
| Q6: Rate the job IN Div of Forestry is doing in providing services for IN. | Excellent | 40% | 36% | 24% | 135 |
| Q6: Rate the job IN Div of Forestry is doing in providing services for IN. | Don’t know | 56% | 34% | 11% | 225 |
| Q7: Your concern about long-term health/productivity of IN woodlands? | Not concerned | 55% | 33% | 11% | 87 |
| Q7: Your concern about long-term health/productivity of IN woodlands? | Somewhat concerned | 51% | 35% | 14% | 536 |
| Q7: Your concern about long-term health/productivity of IN woodlands? | Very concerned | 44% | 35% | 21% | 637 |
| Q8: How often do you hear/read about IN woodlands? | Almost never | 55% | 29% | 15% | 426 |
| Q8: How often do you hear/read about IN woodlands? | Occasionally | 45% | 37% | 17% | 650 |
| Q8: How often do you hear/read about IN woodlands? | Often | 39% | 38% | 23% | 190 |
| Q17: Wooded acres owned? | <1 acre or none | 47% | 35% | 17% | 647 |
| Q17: Wooded acres owned? | 1-8 acres | 46% | 34% | 20% | 362 |
| Q17: Wooded acres owned? | 10 or more acres | 56% | 33% | 11% | 187 |
| Q19: Purchased lumber/wood products for home improvement in last 5 yrs? | Yes | 45% | 38% | 17% | 170 |
| Q19: Purchased lumber/wood products for home improvement in last 5 yrs? | No | 51% | 31% | 18% | 893 |
| Q19: Purchased lumber/wood products for home improvement in last 5 yrs? | Don’t know | 43% | 42% | 15% | 339 |
| Q20: Your place of residence...? | Urban | 49% | 31% | 19% | 340 |
| Q20: Your place of residence...? | Suburban | 44% | 38% | 18% | 517 |
| Q20: Your place of residence...? | Rural | 52% | 34% | 14% | 519 |
| Q25: Your place of residence...? | North IN | 48% | 35% | 17% | 811 |
| Q25: Your place of residence...? | South IN | 48% | 37% | 15% | 416 |
| Q25: Your place of residence...? | Indy (Marion Co) | 44% | 33% | 23% | 127 |
| Q21: Level of education? | Less than HS | 62% | 20% | 18% | 55 |
| Q21: Level of education? | HS grad | 64% | 25% | 12% | 410 |
| Q21: Level of education? | Some college | 45% | 36% | 19% | 370 |
| Q21: Level of education? | College grad+ | 38% | 43% | 19% | 551 |
| Q22: Race-ethnicity? | Black/Other | 40% | 30% | 30% | 96 |
| Q22: Race-ethnicity? | White | 49% | 35% | 16% | 1267 |
| Q23: Regarding social & environmental issues, are you...? | Liberal | 45% | 35% | 20% | 228 |
| Q23: Regarding social & environmental issues, are you...? | Liberal-leaning | 44% | 42% | 14% | 135 |
| Q23: Regarding social & environmental issues, are you...? | Conservative-leaning | 42% | 39% | 18% | 180 |
| Q23: Regarding social & environmental issues, are you...? | Conservative | 52% | 33% | 15% | 589 |
| Q23: Regarding social & environmental issues, are you...? | None of these | 47% | 33% | 20% | 228 |
| Q24: Age? | 18-24 | 24% | 44% | 31% | 45 |

</tbody>
</table>

### Q1: Gender...

- Male: 36% (Not interested), 50% (Somewhat interested), 14% (Very interested)
- Female: 40% (Not interested), 49% (Somewhat interested), 11% (Very interested)

### Q2: Your interest in Indiana's fish, forests, wildlife, and outdoors?

- Not interested: 47% (Male), 45% (Female), 8% (Both)
- Somewhat interested: 41% (Male), 51% (Female), 8% (Both)
- Very interested: 34% (Male), 50% (Female), 16% (Both)

### Q3: Your familiarity with IN DNR?

- Not familiar: 53% (Male), 39% (Female), 7% (Both)
- Somewhat familiar: 34% (Male), 55% (Female), 11% (Both)
- Very familiar: 26% (Male), 48% (Female), 25% (Both)

### Q4: Your familiarity with IN Div of Forestry?

- Not familiar: 46% (Male), 47% (Female), 7% (Both)
- Somewhat familiar: 30% (Male), 54% (Female), 16% (Both)
- Very familiar: 20% (Male), 49% (Female), 32% (Both)

### Q6: Rate the job IN Div of Forestry is doing in providing services for IN.

- Poor: 53% (Male), 30% (Female), 16% (Both)
- Fair: 43% (Male), 47% (Female), 10% (Both)
- Good: 34% (Male), 55% (Female), 11% (Both)
- Excellent: 22% (Male), 50% (Female), 27% (Both)
- Don't know: 46% (Male), 42% (Female), 12% (Both)

### Q7: Your concern about long-term health/productivity of IN woodlands?

- Not concerned: 43% (Male), 45% (Female), 13% (Both)
- Somewhat concerned: 40% (Male), 51% (Female), 10% (Both)
- Very concerned: 34% (Male), 50% (Female), 16% (Both)

### Q8: How often do you hear/read about IN woodlands?

- Almost never: 52% (Male), 41% (Female), 7% (Both)
- Occasionally: 31% (Male), 56% (Female), 13% (Both)
- Often: 27% (Male), 46% (Female), 27% (Both)

### Q17: Wooded acres owned?

- <1 acre or none: 39% (Male), 49% (Female), 11% (Both)
- 1-9 acres: 37% (Male), 51% (Female), 12% (Both)
- 10 or more acres: 34% (Male), 48% (Female), 19% (Both)

### Q19: Purchased lumber/wood products for home improvement in last 5 yrs?

- Yes: 32% (Male), 47% (Female), 21% (Both)
- No: 39% (Male), 49% (Female), 12% (Both)
- Don't know: 37% (Male), 54% (Female), 9% (Both)

### Q20: Your place of residence...

- Urban: 42% (Male), 46% (Female), 12% (Both)
- Suburban: 39% (Male), 50% (Female), 11% (Both)
- Rural: 34% (Male), 52% (Female), 14% (Both)

### Q25: Your place of residence...

- North IN: 37% (Male), 50% (Female), 13% (Both)
- South IN: 38% (Male), 50% (Female), 12% (Both)
- Indy (Marion Co): 41% (Male), 50% (Female), 9% (Both)

### Q21: Level of education?

- Less than HS: 40% (Male), 44% (Female), 16% (Both)
- HS grad: 41% (Male), 47% (Female), 12% (Both)
- Some college: 36% (Male), 51% (Female), 13% (Both)
- College grad+: 36% (Male), 52% (Female), 12% (Both)

### Q22: Race-ethnicity?

- Black/Other: 33% (Male), 44% (Female), 23% (Both)
- White: 38% (Male), 50% (Female), 12% (Both)

### Q23: Regarding social & environmental issues, are you...

- Liberal: 40% (Male), 47% (Female), 13% (Both)
- Liberal-leaning: 34% (Male), 58% (Female), 8% (Both)
- Conservative-leaning: 31% (Male), 52% (Female), 17% (Both)
- Conservative: 37% (Male), 50% (Female), 13% (Both)
- None of these: 46% (Male), 44% (Female), 10% (Both)

### Q24: Age?

- 18-24: 51% (Male), 42% (Female), 7% (Both)
- 25-34: 38% (Male), 49% (Female), 13% (Both)
- 35-44: 36% (Male), 52% (Female), 12% (Both)
- 45-54: 36% (Male), 52% (Female), 12% (Both)
- 55-64: 37% (Male), 50% (Female), 13% (Both)
- >64: 41% (Male), 46% (Female), 13% (Both)

APPENDIX F:
Frequency Analysis of All Variables (Excluding Open-ended Questions) by Additional Geographic Variables
“Supplemental Banner Point Analysis” (unweighted data)

Appendix E included cross tabulation of all variables by 2 geographic variables:

- Q20 (Respondent’s characterization of his/her residence as “urban,” “suburban,” and “rural”), and
- Q25 (Respondent’s Indiana county of residence grouped by “north Indiana,” “south Indiana,” and “Indy” (Indianapolis)).

Appendix F features cross tabulation of all variables by 3 additional geographic groupings of respondents:

- A variable grouping respondents by specified state region, based on Indiana County:
  1. The Region:
     - Lake County
     - La Porte County
     - Porter County
  2. Fort Wayne:
     - Adams County
     - Allen County
     - De Kalb County
     - Huntington County
     - Noble County
     - Wells County
     - Whitley County
  3. Evansville
     - Dubois County
     - Gibson County
     - Pike County
     - Posey County
     - Spencer County
     - Vanderburgh
     - Warrick County
  4. Louisville
     - Clark County
     - Floyd County
     - Harrison County
     - Scott County
     - Washington County
  5. Indianapolis
     - Marion County
  6. Other South Indiana
     - All other Indiana Counties south of I-70
  7. Other North Indiana
     - All other Indiana Counties north of I-70
A variable grouping respondents by whether they reside in counties in which Indiana State Forests are located:

1. Residents of Counties in which State Forests are located:
   - Brown County
   - Clark County
   - Crawford County
   - Dubois County
   - Greene County
   - Harrison County
   - Jack County
   - Jackson County
   - Jennings County
   - Martin County
   - Monroe County
   - Morgan County
   - Owen County
   - Pike County
   - Putnam County
   - Sullivan County
   - Wabash County
   - Washington County

2. Residents of Counties in which State Forests are not located:
   - All other Indiana Counties other than those listed above.

A variable grouping respondents by whether they reside,

1. In Indianapolis metropolitan Counties (“Indy-metro”),
   - Boone County
   - Hamilton County
   - Hancock County
   - Madison County
   - Hendricks County
   - Johnson County
   - Marion County
   - Morgan County
   - Shelby County

2. In another Indiana metropolitan County (“Other-metro”),
   - Lake County
   - Porter County
   - Newton County
   - Jasper County
   - La Porte County
