REMARKS: Timber marked in **BLUE** paint. Despite the over-all smaller average volume per tree, this sale contains many outstanding quality and higher volume black oak, yellow-poplar, sugar maple, and chestnut oak trees. Winds from the September 14, 2008 wind storm severely damaged 207 of the sawtimber trees. These are trees that were either blown over or the entire crown of the tree was removed. This does not include trees that only had part of the crown knocked out by the wind storm. Most of these damaged trees did not have any merchantable volume loss; however, on the trees that did, volumes were adjusted accordingly. **This sale is available to be paid and harvested in installments by pre-determined areas by the state. Contact property for additional information.**
