## Annual Report of Indiana Ginseng Dealings:

### 2024-25 Harvest and Sale Season

There was a total of **841 lbs. 2 oz.** of wild ginseng certified as dried, and 174 lbs. 13 oz. certified as green in Indiana this year. Of this, 14 lbs. 12 oz. was counted as wild simulated. Of the wild ginseng, 826 lbs. 6 oz. was harvested as dry and 546 lbs. 6 oz. was gross wet weight harvested. This season, Indiana had a total of 17 dealers and 1,192 harvesters. This is the lowest year Indiana has had in harvest, certifications, and harvesters.

Based on comparison between years, 2024 was just atypical all around - down in harvest trends, harvest numbers, and roots per pound. We believe this is primarily due to weather conditions because it is appearing in all counties, but while we do know we had an extremely wet spring followed by an extremely dry summer and early fall in 2024, we have not compared the weather officially over the two years. Another factor is the overall number of harvesters is down by 437. This is the lowest since we began counting the unique harvester numbers in 2020, a total overall drop of 929. This year was typical in two aspects: Sales at the beginning of the season were extremely lively, slowing later and prices per pound were typically low at the start but later in the harvesting season, prices went higher. The average price per pound was also down this year to \$608.33 at mid-season point (October), which is more than \$80 lower than 2023.

#### FINDINGS:

Present abundance of wild ginseng rating was based on this scale:

0 = Absent	No Activity
1 = Rare	Under 1 lb.
3 = Frequent	Over 1 lb.

At the end of the 2024 harvest season, 26 Indiana counties reported no activity; of these, none reported an increase or decrease from last year in an amount to move to the next category. Most (66) counties reported a harvest of at least 1 oz. which is down 10 counties from last year.

Trend data requested in wild ginseng population considers the comparison of the 2023 harvest season and this current 2024 season:

-2 = extirpated	0 lbs. of wild ginseng harvested 2 years in a row
-1 = decreasing	decrease of more than 50 lbs. of wild ginseng since previous year
0 = stable	within 50 lbs. of previous harvest of wild ginseng
+1 = increasing	50 or more lbs. of wild ginseng harvested over last season

Except for extirpation, 3 of Indiana's 92 counties reported a negative trend in harvest, with all others showing a stable harvest. None are up in enough quantities to move to the next category. This year, 17 counties are showing extirpation with 10 showing extirpation for a period longer than 2 years: Adams, Benton, Grant, Howard, Jay, Lake, Shelby, Tipton, Wells and White. New to the extirpation list are Blackford, Elkhart, Hamilton, Hendricks, LaGrange, Marion and Stueben. Interestingly, 11 of the counties are in the Central Till Plain natural region while Benton and White are in the Grand Prairie natural region. The other region appearing this year is the Northern Lakes including Elkhart, LaGrange and Steuben counties. These are all natural regions that were scraped away by glacial activity and are now extremely desirable agricultural

areas. Howard, Lake, Shelby, and Marion are highly impacted by urban sprawl. Due to a grower, Madison County is off the extirpation list this year.

This year's root count was down at 256 roots per pound. This was taken from 6 samples in north, central and southern Indiana. Indiana generally produces smaller high-quality root for apothecary use and not the larger boutique roots used for expensive gifting.

Growing conditions continue to be the driving force behind the harvest figures. This seems to be true everywhere except perhaps the Grand Prairie and Central Till plain areas where it may be reduced due to agricultural practices. This is especially telling in the Northern Lakes region where 3 counties seem to have been hard hit by extremes. These are also areas where there are fewer harvesters and no dealers. We will be watching this in the coming years. Despite this, we do recommend continuing the harvest under the current rules and regulations. However, to help ensure those who violate Ginseng laws in other states are not able to do similar business with similar violations in Indiana, we strongly recommend the adoption of reciprocal suspension among the 19 Ginseng states, such as is already in place for hunting and fishing licenses.

License applications/payments/issuances were once again accomplished online with the same timelines as 2023. Indiana's Ginseng Dealers continue to be required to accomplish 100% of their submittals online and into the Ginseng Portal. Dealers may do this work via various platforms (mobile/smartphone, notebook, laptop or desktop computer) and the database behind it allows for single entry accomplished directly by dealers. Various reports, all certificates, annual reporting, etc. are pulled from the logged transactions, verified, electronically signed by dealers and certified by conservation officers online. Dealers are comfortable with using the portal as this was the smoothest year since introduction based on the questions, phone calls, system glitches that required resolution. The Access Indiana website, to establish an account and enter the ginseng portal, is <https://www.in.gov/access/available-services.html> Also, the Indiana Ginseng website continues to be maintained at [www.in.gov/dnr/nature-preserves/ginseng/](http://www.in.gov/dnr/nature-preserves/ginseng/)

Looking forward to the 2025 season, we will continue to refine the Ginseng Portal. With the 2026 Indiana Legislative session, it is anticipated Indiana DNR will introduce changes to Ginseng Law (IC 14-31-3) and rules (312 IAC 19) to incorporate the two into one law under IC 14-31-3. The goal is to reduce regulations and ensure conformity to other licensing practices in the state while requiring the information collection needed to comply with federal requirements. Changes may also include harvester and grower registration requirements. The dealer license fee will remain in code. Several items may be considered to provide consistency with Indiana's Division of Fish and Wildlife regarding enforcement. Collaborative work continues between Nature Preserves, Law Enforcement, Fish and Wildlife and others.

In conclusion, weather continues to be the greatest factor for fluctuations and change in the Indiana harvest of Ginseng.

Respectfully submitted,

Laura Minzes,  
Indiana Ginseng Coordinator  
April 22, 2025

## Annual Report--American Ginseng Export Program

### AMERICAN GINSENG EXPORT PROGRAM (CITES)

STATE OR TRIBE: Indiana

HARVEST YEAR: 2024

PREPARED BY: Laura Minzes

Below, please provide the amount of ginseng harvested:

Source of Ginseng	Harvested (dried lbs.)	Harvested (green lbs.)	Certified (dried lbs.)	Certified (green lbs.)	Estimated number of roots per pound (dried)
WILD	826	546	826	546	256
WILD SIMULATED (not reported as wild)	15		15		
ARTIFICIALLY PROPAGATED (as defined under 50 CFR <a href="#">23.64</a> )					

If the information requested has not changed from last year, please indicate "No Change." (Attach separate sheets to responses, as needed).

1. Program administered by (Department or Agency name): No Change
2. Ginseng certification by (Department or Agency name): No Change
3. Has the State/Tribe or its enabling legislation, ginseng regulations, or ginseng certification form been modified in the last year? If yes, please provide copies, as appropriate. No Change
4. Does the State or Tribal agency certify all wild ginseng harvested? If no, when would the agency not certify wild ginseng harvested in the State or on the Tribal lands, can uncertified ginseng be sold or transported outside the State or Tribe? No Change
5. Does the State or Tribal agency certify all artificially propagated ginseng harvested? If no, when would the agency not certify artificially propagated ginseng harvested in the State or on the Tribal lands? Can uncertified ginseng be sold or transported outside the State or Tribe? No Change
6. When does State or Tribal agency certify wild/artificially propagated ginseng (e.g., at time of harvest, at time of sale)? No Change
7. How does the State or Tribal agency handle wild/artificially propagated ginseng entering the State or Tribe from another State or Tribe? Is this procedure the same for both certified (by another State or Tribe) and uncertified ginseng? No Change
8. Do all resident and non-resident individuals and companies dealing in (i.e., buying or selling) ginseng in the State or Tribe have to be registered or licensed? If no, please explain. No Change
9. Can wild and/or artificially propagated ginseng be sold at any time during the year? No Change

10. How often are dealers required to report the sale, purchase or export of ginseng (e.g., monthly, quarterly)? No Change
11. Does the State or Tribe track unsold and/or un-exported ginseng from one season or one year to the next? Please explain process. No Change
12. What is the wild ginseng harvest season in the State or Tribe? No Change
13. Does the State or Tribe have a harvest season for artificially propagated ginseng? If so, what is it? No Change
14. Within the wild and artificially propagated ginseng reported above, are there other sub-categories of ginseng production that are tracked in the State or Tribe? If so, please describe each sub-category (e.g., woods grown, wild simulated) and, if available, what quantities have been harvested and certified in the last year? No Change
15. Is there a minimum allowable size/age for the harvest of wild and/or artificially propagated ginseng in the State or Tribe? No Change
16. Is the harvest of wild ginseng allowed on State or Tribal lands? If yes, is a harvest permit required? No Change
17. Does the State or Tribe require ginseng diggers to be licensed? No Change
18. Does the State or Tribe require ginseng diggers to have written permission from private landowners to harvest ginseng? Do dealers need to supply copies of the written permissions when the ginseng is certified? No Change
19. Please provide the average age of wild-harvested ginseng in the State or Tribal lands. No Change
20. Please provide an estimate of the average number of roots per pound (dry weight) of wild ginseng harvested in the State or on the Tribal lands for the last harvest season, and describe the methodology used to calculate the estimate. 256 roots per pound; At 3 locations (north, central and south), the roots making up 2 separate pounds at each location were counted and the average of the 6 results was used to provide the roots per pound.
21. Does the State or Tribe require or encourage diggers to plant seeds from harvested wild ginseng plants at the site of harvest? If so, please describe any guidelines. Does the State or Tribe allow diggers to plant ginseng seeds from other sources (e.g., commercial sources)? Based on the best available information, what is the effect of the current harvest level of American ginseng in the State or on Tribal lands on the wild population (e.g., positive, negative, no impact)? No Change
22. Please provide an assessment of the status of ginseng in the State or on Tribal lands (i.e., stable, increasing, declining). If population levels are increasing or declining, please provide the State or Tribe's professional assessment of the reason for the change and any steps being taken to address these changes. See attached letter
23. On a separate sheet of paper, please provide a brief description of any research, including ginseng population monitoring, being conducted in your State or Tribe on American ginseng. No Change
24. Please provide details of any ginseng-related violations found and/or prosecuted in the State or on Tribal lands during the last year.  
24 for harvesting / possession of ginseng during closed season.  
10 for harvesting illegal ginseng / quota violations.  
11 for harvesting ginseng without landowner consent

## NOTICES

### PRIVACY ACT STATEMENT

**Authority:** The information requested is authorized by the following: the Bald and Golden Eagle Protection Act (16 U.S.C. 668), 50 CFR 22; the Endangered Species Act (16 U.S.C. 1531-1544), 50 CFR 17; the Migratory Bird Treaty Act (16 U.S.C. 703-712), 50 CFR 21; the Marine Mammal Protection Act (16 U.S.C. 1361, et seq.), 50 CFR 18; the Wild Bird Conservation Act (16 U.S.C. 4901-4916), 50 CFR 15; the Lacey Act: Injurious Wildlife (18 U.S.C. 42), 50 CFR 16; Convention on International Trade in Endangered Species of Wild Fauna and Flora (TIAS 8249), 50 CFR 23; General Provisions, 50 CFR 10; General Permit Procedures, 50 CFR 13; and Wildlife Provisions (Import/export/transport), 50 CFR 14.

**Purpose:** The collection of contact information is to verify the individual has an eligible permit to conduct activities which affect protected species. This helps FWS monitor and report on protected species and assess the impact of permitted activities on the conservation and management of species and their habitats.

**Routine Uses:** The collected information may be used to verify an applicant's eligibility for a permit to conduct activities with protected wildlife; to provide the public and the permittees with permit related information; to monitor activities under a permit; to analyze data and produce reports to monitor the use of protected wildlife; to assess the impact of permitted activities on the conservation and management of protected species and their habitats; and to evaluate the effectiveness of the permit programs. More information about routine uses can be found in the System of Records Notice, Permits System, FWS-21.

**Disclosure:** The information requested in this form is voluntary. However, submission of requested information is required to process applications for permits authorized under the listed authorities. Failure to provide the requested information may be sufficient cause for the U.S. Fish & Wildlife Service to deny the request.

### PAPERWORK REDUCTION ACT STATEMENT

We are collecting this information subject to the Paperwork Reduction Act (PRA; 44 U.S.C. 3501 *et seq.*) in order provide the U.S. Fish and Wildlife Service the information necessary, under the applicable laws governing the requested activity, for which a permit is requested. Information requested in this form is purely voluntary. However, submission of requested information is required in order to process applications for permits authorized under the applicable laws. Failure to provide all requested information may be sufficient cause for the U.S. Fish and Wildlife Service to deny the request. According to the PRA, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. OMB has approved this collection of information and assigned Control No. 1018-0093.

### ESTIMATED BURDEN STATEMENT

We estimate public reporting for this collection of information to average 40 hours (electronically and paper-based), including time for reviewing instructions, gathering and maintaining data and completing and reviewing the form. Direct comments regarding the burden estimate or any other aspect of the form to the Service Information Clearance Officer, Fish and Wildlife Service, U.S. Department of the Interior, 5275 Leesburg Pike, MS: PRB (JAO/3W), Falls Church, VA 22041-3803, or via email at [Info\\_Coll@fws.gov](mailto:Info_Coll@fws.gov). Please do not send your completed form to this address.

Questions regarding permits from Management Authority should be sent to [managementauthority@fws.gov](mailto:managementauthority@fws.gov).
