INTRODUCTION

A cooperative project of the U. S. Geological Survey and the Indiana Department of Conservation was begun in 1935 to record ground-water level fluctuations in Indiana. Personnel of these governmental agencies made periodic measurements of water levels in observation wells.

In 1944 the Geological Survey and the Department of Conservation increased and broadened their cooperative effort to a program of ground-water resources appraisal. Under this program a number of wells were added to the network of observation wells.

Purpose and Scope

Periodic and continuous measurements of water level in selected observation wells give information on long-term and short-term water-level fluctuations. A continuing program of observations supplies information on ground-water conditions as influenced by variations in regional and local climatic factors and local withdrawals of ground water. The data are used for determinations of water supply and effects of recharge and discharge on ground-water storage. The number of observation wells used, their location, and type and length of record obtained depends largely on the kind of information needed and how it is to be used.

This report represents a compilation of ground-water levels based on the measurements in 28 key observation wells and 116 other observation wells in the state of Indiana. The report summarizes the records of these observation wells for the period 1955 through 1962. The map (Fig. 1) on page 2 shows the locations of the observation wells.

PREVIOUS RECORDS

Water-level records for observation wells in Indiana were published annually for the period 1935-52 in Water-Supply Papers of U. S. Geological Survey. From 1953-55 the water-level records of only the key wells were published annually in these reports. Beginning with 1956 only selected water levels in key wells were published. The records for 1956 and 1957 were published in a single Water-Supply Paper. A list of Water-Supply Papers is given on page 118. Starting with 1958 the publication in Water-Supply Papers of selected water levels in key wells in Indiana will be at 5-year intervals.

A monthly release by the U. S. Geological Survey entitled "Water Resources Review" contains information on changes in ground-water levels throughout the Nation and gives the relative monthly position of the water level in three Federal key wells in Indiana; water-level records for these wells are included in this report.

Publications prepared by the U. S. Geological Survey and published by the Indiana Department of Conservation that contain summaries of water levels in observation wells are listed on page 119.

INDIANA

EXPLANATION

- ◆ Federal-State key well
- State key well
- Active well
- Discontinued well
- 2 Two observation wells

Approximate location of current and discontinued observation wells for which water-level information is available.

WELL-DESIGNATION SYSTEM

Observation wells in this report are designated by a two-letter symbol corresponding to the county name in which the well is located, followed by a number for successive wells. The first observation well in Allen County, for example, is designated as A1 1.

WATER-LEVEL MEASUREMENT

Water-level measurements are given in feet above or below land-surface datum (lsd). If known, the altitude of the land-surface datum above mean sea level (msl) is given in the well description. The height of the measuring point (MP) above or below land-surface datum is given in each well description. A tabulation, by observation wells, is given of the water level nearest the 25th of each month for the period of record covered by the report. A plus sign (+) in the table means water level was above land-surface.

CAUSE OF WATER-LEVEL FLUCTUATIONS

The water levels in some parts of Indiana have been declining over a period of years. Declines in water level are followed by periods of rising water levels, except in areas of heavy withdrawals of ground water where the lowered water levels reflect pumping conditions. Generally, periods of rising water levels can be correlated with periods of normal or above-normal precipitation and periods of declining water levels with dry periods. Figures 2, 3, and 4, (p. 4) illustrate these types of changes.

The general downward trend of water levels in southern Indiana, 1955-62, reflect the below-average rainfall for the period (fig. 2, p. 4). Slight reversals to an upward trend occur in 1957 and 1958 which are related to an above-average rainfall.

Water levels in the central part of the state have been on a general upward trend from 1955-62 except for 1959 when there was below-average rainfall and the general trend was downward. The above-average rainfall in 1960 returned the water levels to a general upward trend (fig. 3, p. 4).

Water levels in the northern area were on a downward trend from 1955 through 1957. The reversals of water-level trend in 1958 and 1959 are related to variability in the average rainfall. The upward trend recorded in 1960 continued until April 1962 when, in general, water levels started downward again in response to the below-average rainfall (fig. 4, p. 4). Water-level fluctuations are further described in publications listed on page 119.

PUBLICATIONS OF COOPERATIVE GROUND-WATER PROGRAM

Report

Ground-water resources of the Indianapolis area, Marion County, Ind.
C. L. McGuinness. Ind. Dept. Conserv., Div. Geology. 1943.

Bulletins

1. Memorandum concerning a pumping test at Gas City, Ind. J. G. Ferris.
Ind. Dept. Conserv., Div. Water Resources. 1945.
2. A preliminary report of the ground-water levels of the state based on
records of twenty-six observation wells for which long time records
are available. Anonymous. Ind. Dept. Conserv., Div. Water Resources.
1946.
3. Ground-water resources of St. Joseph County, Ind. Part 1, South Bend
area. F. H. Klaer, Jr., and R. W. Stallman. Ind. Dept. Conserv.,
Div. Water Resources. 1948.
4. Ground-water resources of Boone County, Ind. E. A. Brown. Ind. Dept.
Conserv., Div. Water Resources. 1949.
5. Ground-water resources of Noble County, Ind. R. W. Stallman and F. H.
Klaer, Jr. Ind. Dept. Conserv., Div. Water Resources. 1950.
7. Water-level records of Indiana. Anonymous. Ind. Dept. Conserv., Div.
Water Resources. 1956.
8. Ground-water resources of Tippecanoe County, Ind. Appendix, Basic Data.
J. S. Rosenshein and O. J. Cosner. Ind. Dept. Conserv., Div. Water
Resources. 1956.
8. Ground-water resources of Tippecanoe County, Ind. J. S. Rosenshein.
Ind. Dept. Conserv., Div. Water Resources. 1958.
9. Ground-water resources of Adams County, Ind. F. A. Watkins, Jr., and
P. E. Ward. Ind. Dept. Conserv., Div. Water Resources. 1962.
10. Ground-water resources of Northwestern Ind., Preliminary Report:
Lake County. J. S. Rosenshein. Ind. Dept. Conserv., Div. Water
Resources. 1961.
11. Ground-water resources of West-Central Ind., Preliminary Report:
Greene County. F. A. Watkins, Jr., and D. G. Jordan. Ind. Dept.
Conserv., Div. Water Resources. 1961.
12. Ground-water resources of Northwestern Ind., Preliminary Report:
Porter County. J. S. Rosenshein. Ind. Dept. Conserv., Div. Water
Resources. 1962.

13. Ground-water resources of Northwestern Ind., Preliminary Report:
La Porte County. J. S. Rosenshein and J. D. Hunn. Ind. Dept.
Conserv., Div. Water Resources. 1962.
14. Ground-water resources of West-Central Ind., Preliminary Report:
Sullivan County. F. A. Watkins, Jr., and D. G. Jordan. Ind.
Dept. Conserv., Div. Water Resources. 1962.
15. Ground-water resources of Northwestern Ind., Preliminary Report:
St. Joseph County. J. S. Rosenshein and J. D. Hunn. Ind. Dept.
Conserv., Div. Water Resources. 1962.
16. Ground-water resources of West-Central Ind., Preliminary Report:
Clay County. F. A. Watkins, Jr., and D. G. Jordan. Ind. Dept.
Conserv., Div. Water Resources, 1962.
17. Ground-water resources of West-Central Ind., Preliminary Report:
Vigo County. F. A. Watkins, Jr., and D. G. Jordan. Ind. Dept.
Conserv., Div. Water Resources. 1963.
18. Ground-water resources of West-Central Ind., Preliminary Report:
Owen County. F. A. Watkins, Jr., and D. G. Jordan. Ind. Dept.
Conserv., Div. Water Resources. 1963.
