## **GENERAL NOTES**

- The pavement section for traffic volumes or percent trucks exceeding the values shown in (S) in the Legend shall be as shown elsewhere in the plans.
- The surface course shall be placed when the runaround is in service between December 1 and the following April 1.
- A temporary bridge or temporary pipe shall be used as specified. A 28'-0 clear roadway width shall be provided on a temporary bridge.
- The connection of the temporary runaround to the existing pavement shall be outside the limits of the approach pavement removal.
- Temporary pavement markings will be required as shown. The contractor shall have the option of using temporary tape or paint for all temporary pavement markings except where otherwise specified.
- Delineators type D-2 (white) shall be placed at 30 ft maximum spacing on both sides throughout the length of the temporary runaround, including across the temporary structure. If a temporary bridge is used, type 3 object markers shall be placed at all four corners in accordance with the MUTCD.
- Spacing of drums at this location shall be 20 ft.
- If the runaround posted speed limit is greater than 30 mph the reverse curve sign, XW1-4-A, shall be used at this location. If the runaround posted advisory speed limit is 30 mph or less, the reverse turn sign, XW1-3-A shall be used.

## LEGEND

- Delineator type D-2 (white)
- Pavement section for ADT∠ 4500 and maximum of 10% trucks shall be: 140#/vd<sup>2</sup> HMA Surface 9.5 mm 630#/yd<sup>2</sup> HMA intermediate 19.0 mm 6 in. compacted aggregate base, size No. 53 (See Genaral Notes 1 and 2.)
