

INDIANA DEPARTMENT OF TRANSPORTATION

Driving Indiana's Economic Growth

Design Memorandum No. 17-18 Technical Advisory

August 7, 2017

TO: All Design, Operations, and District Personnel, and Consultants

FROM: /s/Athar Khan
Athar Khan
Manager, Office of Geotechnical Services
Pavement Engineering Division

SUBJECT: Use of Geotextile in Geotechnical Applications

EFFECTIVE: Lettings on or After September 1, 2017

The 2018 *Standard Specifications* include revisions to section 918, Geosynthetic Materials (previously Soil Fabrics). Section 918 now includes Geotextile, Geomembrane, Geocell Confinement Systems, and Geogrid and further subdivides these products by type.

The geotechnical engineer will provide the recommendation for all geosynthetic material types except for Geotextile for Pavement, which is used for subbase applications. The Office of Pavement Engineering will provide the recommendation for Geotextile for Pavement as part of the approved pavement design, where required.

1. The geotextile type will be identified in geotechnical reports completed after May 2017.
2. For geotechnical reports completed prior to May 2017, designers should contact the Office of Geotechnical Services Manager, Athar Khan, at (317) 610-7251 ext.219 or via email at ATKhan@indot.in.gov for specific geotextile type recommendations.
3. For projects that do not require a geotechnical report, but include geotextiles, designers should contact the Office of Geotechnical Services, Nayyar Siddiki at (317) 610-7251 or via email at NSiddiki@indot.in.gov for the specific geotextile type recommendations. The designer should provide the contract number, Des. number, and the intended use. For example rip rap for slope protection or erosion control. For underdrains, provide the underdrain depth.

New pay items created for each type are shown below.
