

INDIANA DEPARTMENT OF TRANSPORTATION

Design Memo No. 25-14

May 7, 2025

TO: All Design Personnel and Consultants

FROM: /s/ Elizabeth P. Mouser
Elizabeth P. Mouser
Standards & Policy Director

SUBJECT: CAD Workspace Updates

EFFECTIVE: Stage 3 Submittals on or after June 1, 2025

INDOT CAD Support has released workspace updates. The new workspace and associated templates are available from the INDOT CAD Support Downloads webpage at <https://www.in.gov/indot/doing-business-with-indot/other-business/cad-support/downloads/>.

Changes to the sheet templates include the following and should be implemented as soon as practicable.

Title Sheet (INDOT Template Documents)

- Removed "Project" heading in the upper left and lower right project information boxes.
- Replaced "Project No." with "Designation No." in the center of the sheet. Only the designation number for the current plan set should be shown. Suffixes P.E., R/W, and Const. should not be shown.
- Added "(Lead)" to the Designation entry on the Project Kin Information table.

All Sheet Borders (INDOT Template Documents)

- Removed "Project" fields in the lower right project information box.

Structure Data Table (Excel Quantity Summary Tables and INDOT Template Documents)

- Revised "Flowline" to "Invert" for the upstream and downstream elevations. This information is more practical for structure installation, particularly when the structure is sumped. Regardless of the heading, designers should ensure that accurate elevations are shown.

The INDOT Typical Plans ([Bridge Replacement](#) and [Bridge Rehabilitation](#)) have been updated to reflect these changes.

For questions related to CAD workspace updates, please contact INDOT CAD Support at indotcadsupport@indot.in.gov.
