

INDIANA DEPARTMENT OF TRANSPORTATION

Design Memo No. 26-07

March 12, 2026

TO: All Design Personnel and Consultants

FROM: */s/ Gregory P. Couch*
Stormwater Team Lead
Environmental Services Division

SUBJECT: Construction Stormwater General Permit Public Notice Procedure

EFFECTIVE: Immediately

This memo provides guidance regarding INDOT's responsibilities for issuing public notices required under the Construction Stormwater General Permit (CSGP). Under CSGP 3.7(a)(3)(B), the Project Site Owner must demonstrate that the public has been notified that construction activity is scheduled to begin. Government agencies are now able to satisfy this requirement by posting the public notice on a publicly accessible website.

To improve efficiency and reduce administrative costs, INDOT has developed a dedicated webpage to serve as the official platform for all CSGP public notices. The INDOT Stormwater Team will manage and post all CSGP public notices for INDOT projects.

When a CSGP public notice is required, it can be obtained from the INDOT [CSGP Public Notices](#) webpage. The link is also available from the INDOT [Stormwater](#) webpage, under the Construction Stormwater General Permit heading. The CSGP Public Notices webpage may be referenced as INDOT's official source for all CSGP public notices as needed.

The CSGP Data Sheet has been updated to reflect this change. It is available from the Design Manual [Editable Documents](#) webpage, under the Environmental category.
