July 9, 2002

### **DESIGN MEMORANDUM No. 02-06** **TECHNICAL ADVISORY**

**TO:** All Design, Operations and District Personnel, and Consultants

**FROM:** /s/ Anthony L. Uremovich  
Anthony L. Uremovich  
Acting Design Policy Engineer  
Contracts and Construction Division

**SUBJECT:** PCCP Joints

**EFFECTIVE:** Immediately

It has come to the attention of the Pavement Steering Committee that unique special provisions have been inserted into some recent contracts to require non-standard joints to be used in PCCP.

Non-standard joints are not to be used in any pavement without approval from the Pavement Steering Committee. If a designer would like to utilize non-standard pavement joints in an individual contract, a submittal should be made to the Committee through the Pavement Design Engineer. The designer should contact the Pavement Design Engineer to determine the required submittal contents. The Pavement Steering Committee may require the designer to make a presentation to provide additional justification for the use of non-standard joints.
