In this webinar, the Bureau of Quality Improvement Services (BQIS) will share key data points from Indiana’s National Core Indicator surveys for 2014-2016, as well as comparative data with national results. The presentation will highlight areas where Indiana excels and areas that remain challenging.
Agenda

I. National Core Indicators Background
II. Adult Consumer Survey
III. Indiana’s Adult Consumer Survey
   Demographic Data
IV. Indicator – Individual Outcomes
V. Indicator – Health, Welfare, and Rights
VI. Indicator – System Performance
VII. Conclusion
VIII. Questions
I. National Core Indicators Background
II. Adult Consumer Survey
III. Indiana’s Adult Consumer Survey Demographic Data
IV. Indicator – Individual Outcomes
V. Indicator – Health, Welfare, and Rights
VI. Indicator – System Performance
VII. Conclusion
VIII. Questions
The National Core Indicators (NCI) is a collaborative effort between the National Association of State Directors of Developmental Disabilities Services (NASDDDS) and the Human Services Research Institute (HSRI). The purpose of the program, which began in 1997, is to support NASDDDS member agencies to gather a standard set of performance and outcome measures that can be used to track their own performance over time, to compare results across states, and to establish national benchmarks.
National Core Indicators (NCI) Background

NCI includes the following surveys:

- Adult Consumer Survey
- Family Survey
- Staff Stability Survey

Indiana participates in the Adult Consumer Survey and the Staff Stability Survey. However, the information presented in this webinar will not include the Staff Stability Survey data.
I. National Core Indicators Background
II. Adult Consumer Survey
III. Indiana’s Adult Consumer Survey Demographic Data
IV. Indicator – Individual Outcomes
V. Indicator – Health, Welfare, and Rights
VI. Indicator – System Performance
VII. Conclusion
VIII. Questions
The National Core Indicator (NCI) Adult Consumer Survey was initially developed by a technical advisory subcommittee for the purpose of collecting information directly from individuals with intellectual/developmental disabilities and their families or advocates. In 2016-2017, 45 states and the District of Columbia participated in the survey.
The Adult Consumer Survey measures three (3) indicators, each of which includes sub-domains:

- Individual Outcomes
- Health, Welfare, and Rights
- System Performance
I. National Core Indicators Background
II. Adult Consumer Survey
III. Indiana’s Adult Consumer Survey
   Demographic Data
IV. Indicator – Individual Outcomes
V. Indicator – Health, Welfare, and Rights
VI. Indicator – System Performance
VII. Conclusion
VIII. Questions
Respondents: Indiana adults (ages 18 and over) with an IDD receiving one service (in addition to case management) and are receiving services through the Home and Community Based Services waivers: Family Supports Waiver (FS) or the Community Integration and Habilitation Waiver (CIH).
Sample: Each year Indiana utilizes a statistically valid random sample. The sample is proportionate to each waiver and stratified across BDDS Districts.

VIII. Questions
Indicator: Individual Outcomes

• Addresses how well the public system aids adults with developmental disabilities to:
  ❖ Work;
  ❖ Participate in their communities;
  ❖ Have friends and sustain relationships;
  ❖ Exercise choice; and
  ❖ Self-determination.

• Assesses individual satisfaction with services and supports

- **2014-15**: 66% chose roommates in Indiana compared to 45% NCI average.
People have support to find and maintain community integrated employment.

There are 11 Work indicators measured by the Adult Consumer Survey:

1. The percentage of people with a paid job in the community
2. The average number of hours worked biweekly by people with jobs in the community
3. The average biweekly earnings of people with paid jobs in the community
4. The average biweekly hourly earnings of people with a paid job in the community
5. Of those with a paid job in the community, the percentage of people who were continuously employed throughout the previous year
6. Of those with a paid job in the community, the average length of time they have been working at their current job
7. Of those with a paid job in the community, the percentage of people who receive vacation and/or sick time benefits
8. The percentage of people who have a goal of integrated employment in their service plan
9. The percentage of people who do not have a paid job in the community but would like to have one
10. The percentage of people who go to a day program or have some other daily activity
11. The percentage of people who do volunteer work
Individual Outcomes

People have support to find and maintain community integrated employment.

- A paid community job, either individual or group, takes place in an integrated setting.
- A paid individual job takes place in a local business alongside peers who do not have disabilities—that is, the job is part of the typical labor market (e.g., competitive employment).
- A paid group job in a Community-based Group Residential Settings is done in an integrated setting, as part of a group of not more than eight people with disabilities (e.g., enclave, work crew).
A Community Job is one of three types:

1. Individual job without publicly funded supports—an individual job in which the person does not receive state or other funded supports;
2. Individual job with publicly funded supports—an individual job in which the person receives state or other funded supports; or
3. Group-supported—a job that takes part in an integrated setting but is done with a group of individuals with disabilities (e.g., work crew). Group-supported jobs may or may not receive publicly funded supports.

People have support to participate in everyday community activities.

Effective with the 2015-16 survey questions around frequency of participation in community activities (shopping, errands, entertainment, etc.) respondents chose from a categorical response (where the respondent picks from a pre-set range of frequencies in a multiple choice-style option). As a result, frequency of participation in community activities is now reported as the proportion of people who performed the activity at least once instead of number of times activity occurred within a month.
Effective with the 2015-16 Survey the four Community Inclusion indicators:

1. The proportion of people who regularly participate in integrated activities in their communities (seven items within this indicator):
   a. Went shopping (in the past month)
   b. Went out on errands or appointments (in the past month)
   c. Went out for entertainment (in the past month)
   d. Went out to eat (in the past month)
   e. Went to religious services (in the past month)
   f. Took part in community groups or participated in other activities in the community (in the past month)
   g. Went on vacation in the past year

2. Proportion of people who report being able to go out and do the things they like to do

3. Proportion of people who report being able to go out and do the things they like to do enough

4. Proportion of people who report they have enough things to do at home

III. Indiana’s Adult Consumer Survey
   Demographic Data
IV. Indicator – Individual Outcomes
V. Indicator – Health, Welfare, and Rights
VI. Indicator – System Performance
VII. Conclusion
VIII. Questions
Indicator: Health, Welfare, and Rights

The following topics are addressed within this indicator:

- Safety and personal security;
- Health and wellness; and
- Protection of and respect for individual rights.

Sub-domains:

| • Safety       | • Wellness    |
| • Health       | • Respect/Rights |
| • Medication   |               |
The 10 core Health indicators are:

1. Proportion of people who were reported to have a primary care practitioner
2. Proportion of people who were reported to be in poor health
3. Proportion of people who were reported to have had a complete physical exam in the past year
4. Proportion of people who were reported to have had a dental exam in the past year
5. Proportion of people who were reported to have had an eye exam in the past year
6. Proportion of people who were reported to have had a hearing test in the past five years
7. Proportion of women who were reported to have had a Pap test in the past three years
8. Proportion of women over 40 who were reported to have had a mammogram test in the past two years
9. Proportion of people 50 or over who were reported to have had a colorectal cancer screening in the past year
10. Proportion of people who were reported to have had a flu vaccine in the past year
Exercise caution when examining the health data and making a comparison with the national NCI average. Per NCI, many states had a large amount of missing data for these questions, but it is unknown whether the data was missing systematically or randomly. The data for the national NCI average may not be representative of the entire sample or population.

Medications are managed effectively and appropriately.

There is one indicator for Medications:

- Proportion of people who take at least one medication for mood, anxiety, psychotic disorder, and/or behavioral challenges

NCI collects additional information on:

1. Proportion of people who were reported to take medication for at least one of the following: mood disorders, anxiety, psychotic disorders
2. Proportion of people who were reported to take medication for behavior challenges
3. Proportion of people reported to have a behavior plan
4. Proportion of people who take meds for behavior challenges who have a behavior plan
% of Respondents who take at least one medication for Mood Disorders, Anxiety, Behavior Problems, or Psychotic Disorders
(Data is not mutually exclusive.)

II. Adult Consumer Survey
III. Indiana’s Adult Consumer Survey Demographic Data
IV. Indicator – Individual Outcomes
V. Indicator – Health, Welfare, and Rights
VI. **Indicator – System Performance**
VII. Conclusion
VIII. Questions
The following topics are addressed within this indicator:

- Service coordination;
- Family and individual participation in provider-level decisions;
- The utilization of and outlays for various types of services and supports;
- Cultural competency; and
- Access to services.

Sub-domains:

- Service Coordination
- Access
Service coordinators are accessible, responsive, and support the person’s participation in service planning.
There are eight Service Coordination indicators:

1. Proportion of people who reported they met their case manager/service coordinator
2. Proportion of people who reported their case manager/service coordinator asks them what they want
3. Proportion of people who reported their case manager/service coordinator gets back to them right away
4. Proportion of people who reported taking part in the last service planning meeting
5. Proportion of people who reported that they understood what was discussed in last service planning meeting
6. Proportion of people who reported that service planning meeting included people the person wanted to be there
7. Proportion of people who reported that they were able to choose the services that were received as part of service plan
8. Proportion of people who reported support workers come and leave when they are supposed to

Publicly funded services are readily available to individuals who need and qualify for them.

There are four Access indicators:

1. Proportion of people who reported they always have a way to get places when they need to go somewhere
2. Proportion of people who reported they always have a way to get places when they want to do something for fun
3. Proportion of people who reported their staff have adequate training to meet their needs
4. Proportion of people who report needing additional services
Individual has a way to get places when *needs* to go

VII. Conclusion
VIII. Questions
The NCI survey is an invaluable tool for insight into how our consumers feel about the care and services they are receiving. Based on the results of the survey, and the ability to compare Indiana performance against the national average, we can ascertain what Indiana does well and where we have opportunities for improvement.
What Indiana does well
(2016-17 data)

- **Life Decisions**
  - Able to make choices about their everyday lives, including: daily schedule, free time activities, and what to spend money on (91%)

- **Work**
  - Length of employment in current paid job (111.8 months vs. NCI Average of 67.5)

- **Community Inclusion**
  - Individual participate in everyday community activities (85%)
  - Individuals go shopping at least once a month (96%)

- **Satisfaction**
  - Individuals like their home (96%)
  - Services and Supports help individual have a good life (96%)

Conclusion
What Indiana does well
(2016-17 data)

• Service Coordination
  – Have met case manager/service coordinator (96%)
  – Case manager asks individual what h/she wants (96%)

• Access
  – Ability to get places when they need to go (96%)

• Health
  – Have a primary care doctor (97%)
  – Nicotine/tobacco use (5%)

• Respect and Rights
  – Staff treat individual with respect (96%)
  – Others let individual know before entering home (94%)
  – Has a place to be alone in the home (98%)
Areas where Indiana is challenged
2016-17 data

• Work
  – Individuals with a paid job in the community (18%)
  – Individual does not have a paid job and wants one (40%)
  – Individual has community employment as a goal (21%)

• Community Inclusion
  – Going out for entertainment (72%)

• Service Coordination
  – Choosing the services as part of the service plan (77%)

• Safety
  – There is at least one place the individual feels scared or afraid (12%)
Areas where Indiana is challenged
2016-17 data

• Relationships
  – Individual has friends that are not staff or family (78%)
  – Individual often feels lonely (11%)
  – Individual can go on a date, is married, or living with a partner (76%)

• Health
  – Females (21+) not obtaining Pap tests as recommended (51%)
  – Females (40+) not obtaining Mammograms as recommended (59%)
  – Individuals not having eye exams or hearing tests as recommended (53% and 34%, respectively)
  – Individuals not obtaining flu vaccines as recommended (60%)
Areas where Indiana is challenged
2016-17 data

• Respect and Rights
  – Individual has a key to his/her home (59%)
  – Others read individual’s mail without asking (13%)
  – Individual can be alone with visitors at home (67%)
  – Individual had the opportunity to attend a self-advocacy event (22%)
  – Individual has voted in a local, state, or federal election (39%)
Conclusion

POSSIBLE
Recommendations for achieving the possible:

• **Choice in Services**
  – Utilize and embrace the Person-Centered Individualized Support Plan (PCISP) and LifeCourse Framework;
  – Ensure the team focus is on the needs and wants of the individual when developing the service plan

• **Employment**
  – Assist individuals in developing employment skills
  – Assist individuals in seeking out employment through vocational rehabilitation services
  – Provide opportunities for individuals to apply for jobs
Preventative health screenings such as Pap tests, mammograms, and colorectal screenings are usually free of charge to the individual.

- Educate individuals on the importance of preventative health;
- Encourage individuals to undergo preventative screenings;
- Ensure all team members support the individual;
- Establish a system to track preventative health screenings for individuals to ensure screenings are timely.

**Conclusion**

Recommendations for achieving the possible:
Vaccines are usually low to no cost for individuals.

- Educate and encourage individuals on the importance of obtaining vaccines;
- Establish a system to track vaccines, including annual vaccines (flu and pneumonia) for individuals to ensure screenings are offered timely;
- Consider having an RN (either employed or contracted) to provide vaccines to individuals in the home.
Recommendations for achieving the possible:

• Offer activities that will allow individuals to volunteer in their community while at the same time engage in physical activity (e.g. helping a neighbor shovel snow, raking leaves, pulling weeds at a park, packing boxes at a food bank, etc.).

• Consider utilizing the annual NCI survey data to establish performance measures that will support continued improvement to the services and quality of life for the individuals being served.
Recommendations for achieving the possible:

• Ensure individuals are safe and can openly express issues with management regarding unsafe situations.

• Provide opportunities and transportation for individuals to participate in self-advocacy activities.

• Provide opportunities for individuals to meet new people and make new friends.
Incorporate a checks and balances system to ensure individuals’ rights are protected (i.e. the individual has a key to their home, mail is not read without permission, the individual can have visitors in their home.)
