**BX.5 State overpayment reporting monitoring**

Describe how the state monitors plan performance in reporting overpayments to the state, e.g. does the state track compliance with this requirement and/or timeliness of reporting?

The regulations at 438.604(a)(7), 608(a)(2) and 608(a)(3) require plan reporting to the state on various overpayment topics (whether annually or promptly). This indicator is asking the state how it monitors that reporting.

The Hoosier Care Connect MCEs submit monthly, quarterly, and yearly reports that detail the ongoing activities and status on overpayments. Additionally, members of the PI staff meet with each MCE monthly to discuss ongoing activities.

---

**BX.6 Changes in beneficiary circumstances**

Describe how the state ensures timely and accurate reconciliation of enrollment files between the state and plans to ensure appropriate payments for enrollees experiencing a change in status (e.g., incarcerated, deceased, switching plans).

The Benefit Enrollment and Maintenance (834) file is sent to the health plans on a daily basis. Additionally, the state sends the health plans a weekly reconciliation file. The MCEs review the files to identify any discrepancies in enrollment. The MCEs are responsible for verifying member eligibility data and reconciling with capitation payments for each eligible member on a monthly basis. If the MCE discovers a discrepancy in eligibility or capitation information, the MCE must notify FSSA and the State fiscal agent within thirty (30) calendar days of discovering the discrepancy and no more than ninety (90) calendar days after FSSA delivers the eligibility records. The MCE must accept enrollment data in electronic format ,currently via secure file transfer protocol("FTP").

**Changes to enrollment or benefits**

Briefly explain any major changes to the population enrolled in or benefits provided by the managed care program during the reporting year. If there were no major changes, please enter 'There were no major changes to the population or benefits during the reporting year' as your response. 'N/A' is not an acceptable response.

The COVID-19 PHE emergency ended during the reporting year. Eligibility redetermination actions began in April 2023, with a 12-month plan to return to normal operations. Individuals for whom all eligibility determination is known and verified and have remained eligible under normal rules during the public health emergency were subject to standard requirements starting in April 2023. Individuals who only remained eligible for Hoosier Care Connect due to the special rules effective since March 2020 were reevaluated when their annual redetermination came due and could not be disenrolled until after such time. As a result, HCC enrollment is no longer increasing. Additionally, the Pathways for Aging Program went live on 7/1/24. Although this is outside of the reporting year, enrollment numbers will decrease because of the program's implementation

## **Access Measures**

Describe the measures the state uses to monitor availability, accessibility, and network adequacy. Report at the program level.

Revisions to the Medicaid managed care regulations in 2016 and 2020 built on existing requirements that managed care plans maintain provider networks sufficient to ensure adequate access to covered services by: (1) requiring states to develop quantitative network adequacy standards for at least eight specified provider types if covered under the contract, and to make these standards available online; (2) strengthening network adequacy monitoring requirements; and (3) addressing the needs of people with long-term care service needs (42 CFR 438.66; 42 CFR 438.68).

42 CFR 438.66(e) specifies that the MCPAR must provide information on and an assessment of the availability and accessibility of covered services within the MCO, PHIP, or PAHP contracts, including network adequacy standards for each managed care program.

For managed care plans that cover LTSS, enter the number of critical incidents filed within the reporting year by (or on behalf of) LTSS users who previously filed appeals in the reporting year. If the managed care plan does not cover LTSS, enter "N/A".

**Managed Health Services**

N/A

Also, if the state already submitted this data for the reporting year via the CMS readiness review appeal and grievance report (because the managed care program or plan were new or serving new populations during the reporting year), and the readiness review tool was submitted for at least 6 months of the reporting year, enter "N/A".

The appeal and critical incident do not have to have been "related" to the same issue - they only need to have been filed by (or on behalf of) the same enrollee. Neither the critical incident nor the appeal need to have been filed in relation to delivery of LTSS — they may have been filed for any reason, related to any service received (or desired) by an LTSS user.

To calculate this number, states or managed care plans should first identify the LTSS users for whom critical incidents were filed during the reporting year, then determine whether those enrollees had filed an appeal during the reporting year, and whether the filing of the appeal preceded the filing of the critical incident.
