RE: Family impact certification – presumptive eligibility determinations

DATE: May 31, 2013

CC: Natalie Angel, Steve Holt, Brandon Shirley

This certification, submitted in accordance with Executive Order #13-05, formalizes the Family and Social Services Administration's ("FSSA") assessment of the impact of proposed rule LSA 13-____ on Indiana families.

Executive Order 13-05 Certification of rules affecting families

Executive Order 13-05 ("Executive Order") requires the FSSA, prior to adopting any policy or rule, to certify that it has assessed its "real or potential impact on family well-being or family formation" in light of considerations set out in Executive Order. In addition, the FSSA must justify any rule that is expected to have a negative impact on family well-being or formation. The Office of Management and Budget ("OMB") must respond to the FSSA statement no later than seven (7) days before the public hearing.

Summary of the proposed rule

The proposed rule authorizes certain qualifying hospitals to make presumptive eligibility determinations for Medicaid eligibility, and it establishes performance standards for Medicaid application submissions and related sanctions for hospitals. The OMPP must promulgate administrative rules to codify this requirement.

Impact of the proposed rule on the family well-being or family formation

The proposed rule's presumptive eligibility provisions are administrative in nature and do not impact family well-being or family formation. In fact, the proposed rule primarily concerns the relationship between the Medicaid program and participating hospitals regarding presumptive eligibility determinations. Accordingly, it is expected that the proposed rule will have a **neutral** impact on family well-being or family formation. The FSSA is submitting this certification to

the OMB that it has considered the requisite criteria in Executive Order 13-05 in developing the proposed rule.
