Dear Mr. Meyer,

Re: Request for approval of alternate aerator
use with the Norweco Singulair with
Bio-Kinetic System Model 960 Series

This letter is in response to your January 31, 2025 request referenced above. After reviewing the submitted materials, the Indiana Department of Health (IDOH) determines that the Norweco Model 225L Aerator Assembly is an acceptable alternate aerator for use with the above referenced treatment systems.

The NSF Alternate Aerator Review approval dated January 17, 2025, provides necessary documentation for the IDOH approval of the alternate aerator. The aerator documents which were submitted have been titled with the aerator model (attached) and placed on the IDOH TNI website within the Norweco Singulair listing. This will provide information to designers, regulators, installers, service providers, and inspectors that these two aerator models are acceptable for use in Indiana with the Norweco Singulair with Bio-Kinetic System Model 960 series.

In the future when Norweco updates the Indiana specific Manuals, the alternate aerator (Model 225L) can be added to those materials and the manual then be submitted to IDOH for review and approval.

To **promote**, **protect**, and **improve** the health and safety of all Hoosiers.
