SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, DC 20549**

FORM 10-K

**ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934**

**For the fiscal year ended December 31, 2019
OR**

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934**

Commission File Number 001-10315

Encompass Health Corporation

(Exact Name of Registrant as Specified in its Charter)

Delaware

(State or Other Jurisdiction of
Incorporation or Organization)

63-0860407

(I.R.S. Employer
Identification No.)

**9001 Liberty Parkway
Birmingham, Alabama 35242**
(Address of Principal Executive Offices)

(205) 967-7116
(Registrant's telephone number)

Securities Registered Pursuant to Section 12(b) of the Act:

| <u>Title of each class</u> | <u>Trading Symbol</u> | <u>Name of each exchange on which registered</u> |
|--------------------------------|-----------------------|--|
| Common Stock, \$0.01 par value | EHC | New York Stock Exchange |

Securities Registered Pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Emerging growth company
Non-Accelerated filer Smaller reporting company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Exchange Act Rule 12b-2). Yes No

The aggregate market value of common stock held by non-affiliates of the registrant as of the last business day of the registrant's most recently completed second fiscal quarter was approximately \$6.2 billion. For purposes of the foregoing calculation only, executive officers and directors of the registrant have been deemed to be affiliates. There were 98,433,352 shares of common stock of the registrant outstanding, net of treasury shares, as of February 13, 2020.

DOCUMENTS INCORPORATED BY REFERENCE

The definitive proxy statement relating to the registrant's 2020 annual meeting of stockholders is incorporated by reference in Part III to the extent described therein.

NOTE TO READERS

As used in this report, the terms “Encompass Health,” “we,” “us,” “our,” and the “Company” refer to Encompass Health Corporation and its consolidated subsidiaries, unless otherwise stated or indicated by context. This drafting style is suggested by the Securities and Exchange Commission and is not meant to imply that Encompass Health Corporation, the publicly traded parent company, owns or operates any specific asset, business, or property. The hospitals, operations, and businesses described in this filing are primarily owned and operated by subsidiaries of the parent company. In addition, we use the term “Encompass Health Corporation” to refer to Encompass Health Corporation alone wherever a distinction between Encompass Health Corporation and its subsidiaries is required or aids in the understanding of this filing. We may refer to our consolidated subsidiary, EHHI Holdings, Inc. and its subsidiaries, which collectively operate our home health and hospice business, as “EHHI.”

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This annual report contains historical information, as well as forward-looking statements that involve known and unknown risks and relate to, among other things, future events, changes to Medicare reimbursement and other healthcare laws and regulations from time to time, our business strategy, our dividend and stock repurchase strategies, our financial plans, our growth plans, our future financial performance, our projected business results, or our projected capital expenditures. In some cases, the reader can identify forward-looking statements by terminology such as “may,” “will,” “should,” “could,” “expects,” “plans,” “anticipates,” “believes,” “estimates,” “predicts,” “targets,” “potential,” or “continue” or the negative of these terms or other comparable terminology. Such forward-looking statements are necessarily estimates based upon current information and involve a number of risks and uncertainties, many of which are beyond our control. Any forward-looking statement is based on information current as of the date of this report and speaks only as of the date on which such statement is made. Actual events or results may differ materially from the results anticipated in these forward-looking statements as a result of a variety of factors. While it is impossible to identify all such factors, factors that could cause actual results to differ, such as decreases in revenues or increases in costs or charges, materially from those estimated by us include, but are not limited to, the following:

- each of the factors discussed in Item 1A, *Risk Factors*; as well as uncertainties and factors, if any, discussed elsewhere in this Form 10-K, in our other filings from time to time with the SEC, or in materials incorporated therein by reference;
- changes in the rules and regulations of the healthcare industry at either or both of the federal and state levels, including those contemplated now and in the future as part of national healthcare reform and deficit reduction (such as the re-basing of payment systems, the introduction of site neutral payments or case-mix weightings across post-acute settings, the Patient-Driven Groupings Model for home health, the new patient assessment measures, which we refer to as “Section GG functional measures,” for inpatient rehabilitation, and other payment system reforms), which may decrease revenues and increase the costs of complying with the rules and regulations;
- reductions or delays in, or suspension of, reimbursement for our services by governmental or private payors, including our ability to obtain and retain favorable arrangements with third-party payors;
- restrictive interpretations of the regulations governing the claims that are reimbursable by Medicare;
- our ability to comply with extensive and changing healthcare regulations as well as the increased costs of regulatory compliance and compliance monitoring in the healthcare industry, including the costs of investigating and defending asserted claims, whether meritorious or not;
- any adverse outcome of various lawsuits, claims, and legal or regulatory proceedings, including disclosed and undisclosed *qui tam* suits;
- the use by governmental agencies and contractors of statistical sampling and extrapolation to expand claims of overpayment or noncompliance;
- delays in the administrative appeals process associated with denied Medicare reimbursement claims, including from various Medicare audit programs, and our exposure to the related delay or reduction in the receipt of the reimbursement amounts for services previously provided, including through recoupment of ongoing claims reimbursement by CMS;
- the ongoing evolution of the healthcare delivery system, including alternative payment models and value-based purchasing initiatives, which may decrease our reimbursement rate or increase costs associated with our operations;
- a pandemic, epidemic, or other widespread outbreak of an infectious disease or other public health crisis, which could decrease our patient volumes and revenues and lead to staffing and supply shortages and associated cost increases;
- our ability to attract and retain nurses, therapists, and other healthcare professionals in a highly competitive environment with often severe staffing shortages and the impact on our labor expenses from potential union activity and staffing recruitment and retention;
- competitive pressures in the healthcare industry, including from other providers that may be participating in integrated delivery payment arrangements in which we do not participate, and our response to those pressures;

- our ability to successfully complete and integrate de novo developments, acquisitions, investments, and joint ventures consistent with our growth strategy, including realization of anticipated revenues, cost savings, productivity improvements arising from the related operations and avoidance of unanticipated difficulties, costs or liabilities that could arise from acquisitions or integrations;
- increased costs of defending and insuring against alleged professional liability and other claims and the ability to predict the costs related to claims;
- potential incidents affecting the proper operation, availability, or security of our or our vendors' or partners' information systems, including the patient information stored there;
- new or changing quality reporting requirements impacting operational costs or our Medicare reimbursement;
- the price of our common stock as it affects our willingness and ability to repurchase shares and the financial and accounting effects of any repurchases;
- our ability and willingness to continue to declare and pay dividends on our common stock;
- our ability to maintain proper local, state and federal licensing, including compliance with the Medicare conditions of participation and provider enrollment requirements, which is required to participate in the Medicare program;
- our ability to attract and retain key management personnel;
- changes in our payor mix or the acuity of our patients affecting reimbursement rates; and
- general conditions in the economy and capital markets, including any disruption, instability, or uncertainty related to armed conflict or an act of terrorism, a governmental impasse over approval of the United States federal budget, an increase to the debt ceiling, an international trade war, a sovereign debt crisis, or a widespread outbreak of an infectious disease.

The cautionary statements referred to in this section also should be considered in connection with any subsequent written or oral forward-looking statements that may be issued by us or persons acting on our behalf. We undertake no duty to update these forward-looking statements, even though our situation may change in the future. Furthermore, we cannot guarantee future results, events, levels of activity, performance, or achievements.

PART I

Item 1. Business.

Overview of the Company

General

We are a leading provider of integrated healthcare services, offering both facility-based and home-based patient care through our network of inpatient rehabilitation hospitals, home health agencies, and hospice agencies. As of December 31, 2019, our national footprint spans 37 states and Puerto Rico and includes 133 hospitals and 245 home health and 83 hospice locations. We are committed to delivering high-quality, cost-effective, integrated patient care across the healthcare continuum with a primary focus on the post-acute sector.

In 2018, we undertook a rebranding to reinforce our strategy and position as an integrated provider of facility-based and home-based patient care. As part of the rebranding, we changed our corporate name from HealthSouth Corporation to Encompass Health Corporation and the NYSE ticker symbol for our common stock from “HLS” to “EHC.” Our principal executive offices are located at 9001 Liberty Parkway, Birmingham, Alabama 35242, and the telephone number of the principal executive offices is (205) 967-7116. Our website address is www.encompasshealth.com.

In addition to the discussion here, we encourage the reader to review Item 1A, *Risk Factors*, Item 2, *Properties*, and Item 7, *Management’s Discussion and Analysis of Financial Condition and Results of Operations*, which highlight additional considerations about our company.

We manage our operations in two operating segments which are also our reportable segments: (1) inpatient rehabilitation and (2) home health and hospice. The table below provides selected operating and financial data for our inpatient rehabilitation hospitals, home health agencies, and hospice agencies. See Note 19, *Segment Reporting*, to the accompanying consolidated financial statements for detailed financial information for each of our segments.

| | As of or for the Year Ended December 31, | | |
|--|---|-------------------|-------------------|
| | 2019 | 2018 | 2017 |
| | (Actual Amounts) | | |
| Consolidated data: | | | |
| <i>Inpatient rehabilitation:</i> | | | |
| Number of hospitals ⁽¹⁾ | 133 | 130 | 127 |
| Discharges | 186,842 | 179,846 | 171,922 |
| Number of licensed beds | 9,249 | 8,966 | 8,851 |
| <i>Home health and hospice:</i> | | | |
| Number of home health locations ⁽²⁾ | 245 | 220 | 200 |
| Home health admissions | 159,727 | 137,396 | 124,870 |
| Number of hospice locations | 83 | 58 | 37 |
| Hospice admissions | 10,452 | 7,474 | 4,870 |
| <i>Net operating revenues:</i> | | | |
| | (In Millions) | | |
| Inpatient | \$ 3,423.5 | \$ 3,247.9 | \$ 3,039.3 |
| Outpatient and other | 89.5 | 98.3 | 102.0 |
| Total inpatient rehabilitation | 3,513.0 | 3,346.2 | 3,141.3 |
| Home health | 918.0 | 814.6 | 702.4 |
| Hospice | 174.0 | 116.5 | 70.2 |
| Total home health and hospice | 1,092.0 | 931.1 | 772.6 |
| Net operating revenues | <u>\$ 4,605.0</u> | <u>\$ 4,277.3</u> | <u>\$ 3,913.9</u> |

(1) These amounts include one hospital as of December 31, 2018, and 2017 operating as a joint venture, which we accounted for using the equity method of accounting. As a result of an amendment to the joint venture agreement related to this hospital, the accounting for it changed from the equity method to consolidated effective July 1, 2019.

(2) These amounts include two locations as of December 31, 2019, 2018, and 2017 which we account for using the equity method of accounting.

Inpatient Rehabilitation

We are the nation's largest owner and operator of inpatient rehabilitation hospitals in terms of patients treated and discharged, revenues, and number of hospitals. We provide specialized rehabilitative treatment on predominantly an inpatient basis. We operate hospitals in 33 states and Puerto Rico, with concentrations in the eastern half of the United States and Texas. In addition to our hospitals, we manage four inpatient rehabilitation units through management contracts.

Our inpatient rehabilitation hospitals offer specialized rehabilitative care across an array of diagnoses and deliver comprehensive, high-quality, cost-effective patient care services. As participants in the Medicare program, our hospitals must be licensed and certified and otherwise comply with various requirements that are discussed below in the "Sources of Revenues—Medicare Reimbursement—Inpatient Rehabilitation" section. Substantially all (90%) of the patients we serve are admitted from acute care hospitals following physician referrals for specific acute inpatient rehabilitative care. Most of those patients have experienced significant physical and cognitive disabilities or injuries due to medical conditions, such as strokes, hip fractures, and a variety of debilitating neurological conditions, that are generally nondiscretionary in nature and require rehabilitative healthcare services in a facility-based setting. Our teams of highly skilled nurses and physical, occupational, and speech therapists utilize proven technology and clinical protocols with the objective of restoring our patients' physical and cognitive abilities. Patient care is provided by nursing and therapy staff as directed by physician orders while case managers monitor each patient's progress and provide documentation and oversight of patient status, achievement of goals, discharge planning, and functional outcomes. Our hospitals provide a comprehensive interdisciplinary clinical approach to treatment that leverages innovative technologies and advanced therapies and leads to superior outcomes.

Home Health and Hospice

Our home health business is the nation's fourth largest provider of Medicare-certified skilled home health services in terms of revenues. Our hospice business is the nation's eleventh largest provider of Medicare-certified hospice services in terms of revenues. We operate home health and hospice agencies in 31 states, with concentrations in the Southeast and Texas. As participants in the Medicare program, our agencies must comply with various requirements that are discussed below in the "Sources of Revenues—Medicare Reimbursement—Home Health" and "—Hospice" sections. We acquired a significant portion of our home health and hospice business when we purchased EHHI Holdings, Inc. ("EHHI") on December 31, 2014. In the acquisition, we acquired 83.3% of the issued and outstanding equity interests of EHHI, and certain members of EHHI management, including April Anthony, its chief executive officer, acquired the remaining interests. As of February 19, 2020, we own 98.8% of EHHI. See Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*, "Liquidity and Capital Resources" for further discussion of the ownership structure of our home health and hospice business.

Our home health agencies provide a comprehensive range of Medicare-certified home care services. These services include, among others, skilled nursing, physical, occupational and speech therapy, medical social work, and home health aide services. We also offer evidence-based specialty programs related to post-operative care, fall prevention, chronic disease management, and transitional care. Home health patients are frequently referred to us following a stay in an acute care or inpatient rehabilitation hospital or other facility, but many patients are referred from primary care settings and specialty physicians without a preceding inpatient stay. Our patients are typically older adults with three or more chronic conditions and significant functional limitations, and require greater than ten medications. Our teams of registered nurses, licensed practical nurses, physical, speech and occupational therapists, medical social workers, and home health aides work closely with patients and their families and physicians to deliver patient-centered care plans focused on their needs and their goals.

We also provide hospice services to terminally ill patients and their families. These in-home services address patients' physical needs, including pain control and symptom management, and provide emotional and spiritual support. Our hospice care teams consist of physician medical directors, nurses, social workers, chaplains, therapists, home health aides, and volunteers.

Competitive Strengths

We believe we differentiate ourselves from our competitors based on, among other things, the quality of our clinical outcomes, our cost-effectiveness, our financial strength, and our extensive application of technology. We also believe our competitive strengths discussed below give us the ability to adapt and succeed in a healthcare industry shifting toward integrated delivery payment models, value-based purchasing, and post-acute site neutrality. For example, we believe we are well-positioned to treat all types of post-acute patients by leveraging our operational expertise across our network of facility- and home-based assets in the event multiple or all post-acute settings (long-term acute care, inpatient rehabilitation, skilled nursing, and home health) transition in the future to site neutral patient criteria for reimbursement. Our hospitals have the physical construct (including aspects such as the therapy gym and training areas), clinical staffing, and operating expertise to address the broad spectrum of needs for higher acuity post-acute patients needing inpatient care. Our home health agencies can

often treat patients leaving our or other inpatient facilities who need additional post-acute care services in lieu of skilled nursing facility-based care. Additionally, those agencies can serve the lower acuity patients that do not require facility-based care.

- People. We believe our employees share a steadfast commitment to providing outstanding care to our patients. We undertake significant efforts to ensure our clinical and support staff receives the education and training necessary to provide the highest quality care in the most cost-effective manner. We also have hospital staff trained for all patient acuity levels faced in the post-acute setting. We embrace the Encompass Health Way, our core set of values developed through input from a broad cross section of our employees. The Encompass Health Way calls on each of our employees to set the standard, lead with empathy, do what's right, focus on the positive, and ensure we are stronger together.
- Change Agility. We have a demonstrated ability to adapt in the face of numerous and significant regulatory and legislative changes. For example, we successfully managed through the significant regulatory, financial, and other challenges associated with the Centers for Medicare & Medicaid Services ("CMS") rule commonly referred to as the "75% Rule" in 2004, reimbursement rate reductions associated with the shift from the 75% Rule to the "60% Rule" in 2007, sequestration beginning in 2013, multiple reimbursement rate reductions associated with healthcare reform and otherwise, introduction of significantly more quality reporting requirements beginning in 2013, and implementation of both voluntary and mandatory alternative payment models in recent years.
- Strategic Relationships. We have a long and successful history of building strategic relationships with major healthcare systems. Our experience will be important in growing the Company as the industry evolves toward integrated delivery models. We entered into our first joint venture in 1991 with a nationally prominent university's acute care hospital. Approximately one-third of our inpatient rehabilitation hospitals currently operate as joint ventures with acute care hospitals or systems. Joint ventures with market leading acute care hospitals establish a solid foundation for operating our business within integrated delivery and alternative payment models.

Our combined platform of facility-based and home-based services provides us with an opportunity to succeed in value-based purchasing programs and to participate in more coordinated care and integrated delivery payment models, such as accountable care organizations ("ACOs") and bundled payment arrangements. We believe clinical collaboration between our hospitals and home health agencies offers an excellent means to deliver the quality of care and the cost effectiveness the healthcare partners in these new models seek. We have focused, and will continue to focus, on increasing this collaboration. For additional discussion of our participation in these models, including the Bundled Payments for Care Improvement Advanced initiative, see Item 1A, *Risk Factors*, and Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*, "Executive Overview."

In 2017, we formed the Post-Acute Innovation Center in collaboration with Cerner Corporation, a global leader in health information technology, to develop enhanced tools to manage patients across the continuum of care. The objective of the Post-Acute Innovation Center is to develop clinical decision support tools and other initiatives that enhance the effective and efficient management of patients across multiple post-acute care settings by facilitating high-quality patient care, enhanced care coordination, network provider performance and cost management.

We also have a strategic sponsorship with the American Heart Association/American Stroke Association on a nationwide basis to increase patient independence after a stroke and reduce stroke mortality through community outreach and information campaigns. This strategic sponsorship is a three-year project beginning in 2019 to accelerate adoption of the AHA/ASA Stroke Rehabilitation Guidelines, increase patient awareness of their post-stroke options, and provide practical support to patients and their families to improve recovery outcomes. These Guidelines recommend, among other things, that stroke patients be treated at an inpatient rehabilitation facility, or "IRF," rather than a skilled nursing facility. In 2019, we began offering the patient, caregiver, and provider tools, the special events, and the educational programs developed in partnership with the AHA/ASA. Echoing the AHA/ASA Stroke Rehabilitation Guidelines, the Department of Veterans' Affairs and the Journal of the American Medical Association published in 2019 guidelines and an article, respectively, advocating for the treatment of stroke patients in inpatient rehabilitation facilities.

- Clinical Expertise and High-Quality Outcomes. We have extensive facility-based and home-based clinical experience from which we have developed standardized best practices and protocols. We believe these clinical best practices and protocols, particularly as leveraged with industry-leading technology, help ensure the delivery of consistently high-quality healthcare services. Our "TeamWorks" program is a series of operations-focused initiatives using identified and standardized best practices to reduce inefficiencies and improve performance

across a spectrum of operational areas. We believe these initiatives have enhanced, and will continue to enhance, patient-employee interactions, clinical collaboration, and communication among the patient, the patient's family, our treatment teams, other care providers, and payors, which, in turn, improves patient outcomes and satisfaction.

Our best practices and protocols have helped our hospitals consistently achieve patient outcomes, such as the rate of discharge to community, that exceed industry averages. Additionally, our hospitals participate in The Joint Commission's Disease-Specific Care Certification Program. Under this program, Joint Commission accredited organizations may seek certification for chronic diseases or conditions such as brain injury, stroke, or hip fracture rehabilitation by complying with Joint Commission standards, effectively using evidence-based, clinical practice guidelines to manage and optimize patient care, and using an organized approach to performance measurement and evaluation of clinical outcomes. Obtaining such certifications demonstrates our commitment to excellence in providing disease-specific care. As of December 31, 2019, 123 of our hospitals held stroke-specific certifications, and some of those hospitals held other disease-specific certifications.

In home health, we place a significant emphasis on technology for the purpose of furthering clinical excellence and consistency. We have also developed programs to, among other things, create physician-specific custom treatment protocols and provide care transition from inpatient facilities to home for higher acuity patients. We consistently achieve an acute care readmission rate lower than the industry average along with an average quality of patient care star rating above the industry average.

Clinical collaboration between our inpatient rehabilitation hospitals and home health agencies furthers our pursuit of quality patient outcomes and improved patient experiences. Institutional programs and advanced treatment protocols connect facility-based and home-based care and allow seamless transition of patients across the healthcare continuum. An important component of clinical collaboration has been the placement of care transition coordinators in markets where we operate both inpatient rehabilitation hospitals and home health agencies, which we refer to as "overlap markets." These highly skilled professionals collaborate with clinicians and case managers in our hospitals to assess patients who may require home health services and prepare these patients for the care they will receive at home. The coordinators also work with patients' families to ensure those family members are prepared to bring their loved ones home safely. We believe our clinical collaboration efforts contributed to reductions in discharges to skilled nursing facilities, higher discharges to home, and improved patient satisfaction.

- Cost Effectiveness. Our size, data-driven business practices, and culture help us provide facility-based and home-based healthcare services on a cost-effective basis. For example, our inpatient rehabilitation hospitals historically have received, on average, a lower per discharge payment from Medicare than the industry average payment while also treating patients with higher average acuity. Additionally, our hospitals historically have received, on average, significantly less Medicare high cost outlier reimbursement than other inpatient rehabilitation providers have. High cost outlier payments are supplemental payments from Medicare intended to cover high cost cases in excess of a fixed-loss threshold amount.

Specifically, we can leverage our comprehensive IT capabilities and centralized administrative functions, identify best practices, utilize proven staffing models, and take advantage of supply chain efficiencies across our extensive platform of operations. At the location level, we also enjoy economies of scale as our hospitals are often larger (more beds) than the industry average. Also, we target patient density in the home health markets we serve, which is central to our ability to deliver an efficient cost per visit. In addition, our proprietary information systems, discussed below, aggregate data from our business into a comprehensive reporting package and database used by management in the field and in the home office. Our information systems allow users to analyze data and trends and create custom reports on a timely basis.

With a significant presence in both facility-based and home-based healthcare services, we have the opportunity to take advantage of the broader industry focus on reducing costs. Home-based services, which typically have significantly lower cost structures than facility-based care settings, have increasingly been serving larger populations of higher acuity patients than in the past. Home-based services provide a cost-effective alternative to facility-based care in cases where lower acuity patients do not require a hospital stay.

- Financial Resources. We have a proven track record of generating strong cash flows from operations that have allowed us to successfully pursue our growth strategy, manage our financial leverage, and make significant shareholder distributions. As of December 31, 2019, we have a strong, well-capitalized balance sheet, including ownership of approximately 70% of our hospital real estate, no significant debt maturities prior to 2023, and ample availability under our revolving credit facility, which along with the cash flows generated from operations should, we believe, provide sufficient support for our business strategy.

- Advanced Technology and Innovation. We are focused on developing technology-enabled real-time strategies for the next generation of integrated healthcare. Our post-acute innovation strategy is based on leveraging our clinical expertise, our large post-acute datasets, and our proven capabilities in enterprise-level electronic medical record technologies, data analytics, data integration, and predictive analytics to drive value-based performance across the healthcare continuum for our patients, our partners, and our payors. We have devoted substantial resources, effort and expertise to leveraging technology to create post-acute solutions that improve patient care and operating efficiencies.

We have developed and implemented information technology, such as our rehabilitation-specific electronic medical record system (“ACE-IT”) and our internally developed management reporting system described above (“BEACON”), which we then leverage to enhance our clinical and business processes. ACE-IT allows us to interface with the clinical information systems of acute care hospitals to facilitate patient transfers, reduce readmissions, and enhance patient outcomes. We believe ACE-IT improves patient care and safety, streamlines operating efficiencies, and enhances staff recruitment and retention, making it a key competitive differentiator. BEACON gives us the ability to build from disparate data sources clinical and business dashboards that contribute to our ability to make data driven decisions in the day-to-day operation of our business and clinical care of our patients.

Members of our home health management team developed Homecare HomebaseSM, an industry-leading, comprehensive information platform designed to manage the entire patient work flow and allow home health providers to process clinical, compliance, financial, and marketing information as well as analyze data and trends for management purposes using custom reports on a timely basis. Our knowledge of Homecare Homebase, of which we are now a licensee, as well as the thorough integration of it into the operating culture allow us to optimize the system’s capability to drive superior clinical, operational, and financial outcomes. We also offer a number of evidence-based home health specialty programs, including post-operative care, fall prevention, chronic disease management and transitional care. In 2019, we began rolling out to our agencies a new data analytics tool designed to optimize patient health care plans and reduce emergency room visits and hospital readmissions.

We intend to continue to design, pilot and implement post acute information system solutions to improve our clinical care, including clinical decision support tools and home health care plan optimization tools. In recent years, we have designed and implemented a program we refer to as ReAct that uses predictive modeling and an extensive proprietary database of our IRF patients in an effort to identify patients at risk for acute care transfers and to implement intervention strategies in the care plan. In 2019, we developed a post-acute readmission prediction model to reduce readmissions for our patients. We piloted this model in 9 hospitals and corresponding overlap home health locations and will roll it out to all of our hospitals in 2020. We will continue to expand the depth and reach of our tools and the development of new tools that will help maximize patient outcomes and reduce episodic costs across the post-acute continuum.

We believe our information systems and post-acute solutions, in addition to improving patient care and operating efficiencies, allow us to collect, analyze, and share information on a timely basis making us an ideal partner for other healthcare providers in a coordinated care delivery environment. Systems such as ACE-IT and Homecare Homebase allow for interoperability with referral sources and other providers coordinating care. Homecare Homebase also allows us to share valuable data with payors to promote better patient outcomes on a more cost-effective basis.

Patients and Demographic Trends

Demographic trends, such as population aging, should continue to increase long-term demand for the services we provide. While we treat patients of all ages, most of our patients are 65 and older, and the number of Medicare enrollees is expected to grow approximately 3% per year for the foreseeable future. Even more specifically, the average age of our patients is approximately 76, and the population group ranging in ages from 75 to 79 is expected to grow at approximately 5% per year through 2026. We believe the demand for the services we provide will continue to increase as the U.S. population ages. We believe these factors align with our strengths in, and focus on, post-acute services. In addition, we believe we can address the demand for facility-based and home-based post-acute care services in markets where we currently do not have a presence by constructing or acquiring new hospitals and by acquiring or opening home health and hospice agencies in those extremely fragmented industries.

Strategy and 2020 Strategic Priorities

Our strategy is to expand our network of inpatient rehabilitation hospitals and home health and hospice locations, further strengthen our relationships with healthcare systems, provider networks, and payors in order to connect patient care across the healthcare continuum, and to deliver superior patient outcomes. We believe this strategy, along with our demonstrated ability to adapt to changes in healthcare, will position us for success in the evolving healthcare delivery system. In pursuit of our strategy, we established the following strategic priorities for 2020.

Growth. We will continue to expand our portfolio of inpatient rehabilitation hospitals, home health agencies, and hospice agencies. Each year we target adding four to six new inpatient rehabilitation hospitals and \$50 million to \$100 million in home health and hospice acquisitions. We also believe we will continue to have excellent organic growth opportunities in our inpatient rehabilitation and home health and hospice segments based on our track record of consistent growth in both segments, planned bed additions at a number of existing hospitals, and the maturation of acquired home health and hospice locations.

Operational Initiatives. Our priorities include operational initiatives that build on momentum from recent years. We will seek to continue to increase clinical collaboration. We believe our clinical collaboration efforts have and will continue to contribute to reductions in discharges to skilled nursing facilities, higher discharges to home, and improved patient experiences. Given the significant number of stroke patients in need of post-acute care, we are attempting to build our stroke market share by leveraging our strategic sponsorship of the American Heart Association/American Stroke Association, the IRF treatment recommendations published by the Department of Veterans' Affairs and the Journal of the American Medical Association, our clinical collaboration, and our hospitals' participation in The Joint Commission's Disease-Specific Care Certification Program. As of December 31, 2019, 123 of our 133 hospitals held stroke-specific certifications that required us to demonstrate effective use of evidence-based clinical practice guidelines to manage and optimize stroke care and an organized approach to performance measurement and evaluation of clinical outcomes. We will also continue to develop and implement post-acute solutions by leveraging our clinical expertise, large post-acute datasets, electronic medical record technologies, and strategic partnerships to drive improved patient outcomes and lower the cost of care across the entire post-acute episode. Additionally, we will continue the transition to the new Medicare reimbursement systems for both inpatient rehabilitation and home health, which are discussed further below under "—Sources of Revenue—Medicare Reimbursement."

Capital Structure. We will seek to maintain balance sheet flexibility, consider opportunistic refinancings and augment returns from investments in operations with shareholder distributions via common stock dividends and repurchases of our common stock.

For additional discussion of our strategic priorities as well as our progress toward our priorities in 2019, including operating results, growth, and shareholder distributions, and our business outlook, see Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*, "Executive Overview," "Results of Operations," and "Liquidity and Capital Resources."

Employees

As of December 31, 2019, we employed approximately 31,570 individuals, of whom approximately 18,980 were full-time employees, in our inpatient rehabilitation business and approximately 11,840 individuals, of whom approximately 8,990 were full-time employees, in our home health and hospice business. We are subject to various state and federal laws that regulate wages, hours, benefits, and other terms and conditions relating to employment. Except for approximately 58 employees at one hospital (approximately 15% of that hospital's workforce), none of our employees are represented by a labor union as of December 31, 2019. In some markets, the lack of availability of medical personnel is a significant operating issue facing healthcare providers. To address this challenge, we will continue to focus on maintaining the competitiveness of our compensation and benefit programs and improving our recruitment, retention, and productivity. Shortages of nurses and other medical personnel, including therapists, may, from time to time, require us to increase use of more expensive temporary personnel, which we refer to as "contract labor," and other types of premium pay programs.

Competition

Inpatient Rehabilitation. The inpatient rehabilitation industry, outside of our leading position, is highly fragmented. Our inpatient rehabilitation hospitals compete primarily with rehabilitation units, most of which are within acute care hospitals, in the markets we serve. An acute care hospital, particularly one owned or operated by a large public company or not-for-profit that has a dominant position in the local market, can be a formidable competitor because 90% of our patients come from acute care hospitals. There are several privately held companies offering post-acute rehabilitation services that compete with us primarily in select geographic markets. In addition, there is a public company that is primarily focused on other post-acute care services, including approximately 1,700 outpatient clinics, but also operates approximately 29 inpatient rehabilitation hospitals.

Other providers of post-acute care services compete for some rehabilitation patients. For example, nursing homes may market themselves as offering certain rehabilitation services, particularly to patients not in need of intensive rehabilitation therapy, even though those nursing homes are not required to offer the same level of care, and are not licensed, as hospitals. The primary competitive factors in any given market include the quality of care and service provided, the treatment outcomes achieved, the relationship and reputation with managed care and other private payors and the acute care hospitals, physicians, or other referral sources in the market, and the regulatory barriers to entry in certificate of need states. The ability to work as part of an integrated delivery payment model with other providers, including the ability to deliver quality patient outcomes and cost-effective care, is likely to become an increasingly important factor in competition. See the “Regulation—Relationships with Physicians and Other Providers” and “Regulation—Certificates of Need” sections below for further discussion of some of these factors. For a list of our inpatient rehabilitation markets by state, see the table in Item 2, *Properties*.

Home Health and Hospice. The home health and hospice services industries are also highly competitive and fragmented. There are more than 11,500 home health agencies and approximately 4,600 hospice agencies nationwide certified to participate in Medicare. We are the fourth largest provider of Medicare-certified skilled home health services in the United States in terms of Medicare revenues. Our primary competition varies from market to market. Providers of home health and hospice services include both not-for-profit and for-profit organizations. There are four other public healthcare companies with significant presences in the Medicare-certified home health industry, one of which is an insurance company that is one of the largest providers of Medicare-certified skilled home health services. The primary competitive factors in any given market include the quality of care and service provided, the treatment outcomes achieved, the relationship and reputation with managed care and other private payors and the acute care hospitals, physicians, or other referral sources in the market, and the regulatory barriers to entry in certificate of need states. The ability to work as part of an integrated care delivery model with other providers is likely to become an increasingly important factor in competition. For example, we are currently the preferred home health provider in two ACOs serving approximately 26,000 patients. Home health providers with scale, which include the other public companies, may have competitive advantages, including professional management, efficient operations, sophisticated information systems, brand recognition, and large referral bases. For a list of our home health and hospice markets by state, see the table in Item 2, *Properties*.

Regulatory and Reimbursement Challenges

Healthcare is a highly regulated industry facing many well-publicized regulatory and reimbursement challenges driven by escalating costs and the pursuit of better quality of care. The industry also is facing uncertainty associated with the efforts to identify and implement workable coordinated care and integrated delivery payment models as well as post-acute site neutrality in Medicare reimbursement. The Medicare reimbursement systems for both inpatient rehabilitation and home health are undergoing significant changes. The future of many aspects of healthcare regulation remains uncertain. Any regulatory or legislative changes impacting the healthcare industry ultimately may affect, among other things, reimbursement of healthcare providers, consumers’ access to coverage of health services, including among non-Medicare aged population segments within commercial insurance markets and Medicaid enrollees, and competition among providers. Changes may also affect the delivery of healthcare services to patients by providers and the regulatory compliance obligations associated with those services.

Successful healthcare providers are those able to adapt to changes in the regulatory and operating environments, build strategic relationships across the healthcare continuum, and consistently provide high-quality, cost-effective care. We believe we have the necessary capabilities — change agility, strategic relationships, quality of patient outcomes, cost effectiveness, and ability to capitalize on growth opportunities — to adapt to and succeed in a dynamic, highly regulated industry, and we have a proven track record of doing so. For more in-depth discussion of the primary challenges and risks related to our business, particularly the changes in Medicare reimbursement (including the impact of alternative payment models, value-based purchasing initiatives and site neutrality), increased compliance and enforcement burdens, and changes to our operating environment resulting from healthcare reform, see “Sources of Revenues—Medicare Reimbursement” and “Regulation” below in this section as well as Item 1A, *Risk Factors*, and Item 7, *Management’s Discussion and Analysis of Financial Condition and Results of Operations*, “Executive Overview—Key Challenges.”

Sources of Revenues

We receive payment for patient care services from the federal government (primarily under the Medicare program), managed care plans and private insurers, and, to a considerably lesser degree, state governments (under their respective Medicaid or similar programs) and directly from patients. Revenues and receivables from Medicare are significant to our operations. The federal and state governments establish payment rates as described in more detail below. We negotiate the payment rates with non-governmental group purchasers of healthcare services that are included in “Managed care” in the tables below, including private insurance companies, employers, health maintenance organizations (“HMOs”), preferred provider organizations (“PPOs”), and other managed care plans. Patients are generally not responsible for the difference between established gross charges and amounts reimbursed for such services under Medicare, Medicaid, and other private insurance plans, HMOs, or PPOs but are responsible to the extent of any exclusions, deductibles, copayments, or coinsurance features of their coverage. Medicare, through its Medicare Advantage program, offers Medicare-eligible individuals an opportunity to participate in managed care plans. Revenues from Medicare and Medicare Advantage represent approximately 86% of total revenues.

The following tables identify the sources and relative mix of our revenues for the periods stated for each of our business segments:

Inpatient Rehabilitation

| | For the Year Ended December 31, | | |
|--------------------------|--|---------------|---------------|
| | 2019 | 2018 | 2017 |
| Medicare | 72.2% | 73.2% | 73.6% |
| Medicare Advantage | 10.7% | 9.2% | 8.3% |
| Managed care | 9.8% | 10.3% | 10.7% |
| Medicaid | 3.1% | 3.0% | 3.0% |
| Other third-party payors | 1.2% | 1.5% | 1.6% |
| Workers' compensation | 0.8% | 0.8% | 0.9% |
| Patients | 0.7% | 0.6% | 0.6% |
| Other income | 1.5% | 1.4% | 1.3% |
| Total | 100.0% | 100.0% | 100.0% |

Home Health and Hospice

| | For the Year Ended December 31, | | |
|-----------------------|--|---------------|---------------|
| | 2019 | 2018 | 2017 |
| Medicare | 84.2% | 85.3% | 85.7% |
| Medicare Advantage | 10.2% | 9.5% | 9.7% |
| Managed care | 3.6% | 3.6% | 3.8% |
| Medicaid | 1.7% | 1.2% | 0.6% |
| Workers' compensation | 0.1% | 0.2% | —% |
| Patients | 0.1% | 0.1% | 0.1% |
| Other income | 0.1% | 0.1% | 0.1% |
| Total | 100.0% | 100.0% | 100.0% |

Medicare Reimbursement

Medicare is a federal program that provides hospital and medical insurance benefits to persons aged 65 and over, qualified disabled persons, and persons with end-stage renal disease. Medicare, through statutes and regulations, establishes reimbursement methodologies and rates for various types of healthcare providers, facilities, and services. Each year, the Medicare Payment Advisory Commission (“MedPAC”), an independent agency that advises the United States Congress on issues affecting Medicare, makes payment policy recommendations to Congress for a variety of Medicare payment systems including, among others, the inpatient rehabilitation facility prospective payment system (the “IRF-PPS”), the home health prospective payment system (the “HH-PPS”), and the hospice payment system (the “Hospice-PS”). Congress is not obligated to

adopt MedPAC recommendations, and, based on outcomes in previous years, there can be no assurance Congress will adopt MedPAC's recommendations in a given year. However, MedPAC's recommendations have, and could in the future, become the basis for subsequent legislative or, as discussed below, regulatory action.

The Medicare statutes are subject to change from time to time. For example, in March 2010, President Obama signed the Patient Protection and Affordable Care Act (as subsequently amended, the "2010 Healthcare Reform Laws"). In December 2018, a federal district court in Texas invalidated the 2010 Healthcare Reform Laws in their entirety but postponed enforcement of that decision pending appeal. On December 18, 2019, the United States Court of Appeals for the Fifth Circuit affirmed the district court decision but remanded the case for additional analysis on the question of severability. With respect to Medicare reimbursement, the 2010 Healthcare Reform Laws provided for specific reductions to healthcare providers' annual market basket updates and other payment policy changes. In August 2011, President Obama signed into law the Budget Control Act of 2011 providing for an automatic 2% reduction, or "sequestration," of Medicare program payments for all healthcare providers. Sequestration took effect April 1, 2013 and, as a result of subsequent legislation, will continue through fiscal year 2029 unless Congress and the President take further action. On February 9, 2018, President Trump signed into law the Bipartisan Budget Act of 2018 (the "2018 Budget Act"), which includes several provisions affecting Medicare reimbursement. Among those changes, the 2018 Budget Act mandated the adoption of a new Medicare payment model for home health providers which went into effect January 1, 2020. In the future, concerns about the federal deficit and national debt levels could result in enactment of further federal spending reductions, further entitlement reform legislation affecting the Medicare program, or both. The future of the 2010 Healthcare Reform Laws as well as the nature and substance of any other healthcare legislation remain uncertain. The 2020 presidential election is likely to involve extensive debate over dramatically different approaches to federal healthcare policy.

From time to time, Medicare regulations, including reimbursement methodologies and rates, can be further modified by CMS. CMS, subject to its statutory authority, may make some prospective payment system changes, including in response to MedPAC recommendations. For example, CMS recently instituted a rebasing adjustment in the HH-PPS consistent with a MedPAC recommendation. In some instances, CMS's modifications can have a substantial impact on healthcare providers. In accordance with Medicare laws and statutes, CMS makes annual adjustments to Medicare payment rates in prospective payment systems, including the IRF-PPS and HH-PPS, by what is commonly known as a "market basket update." CMS may take other regulatory action affecting rates as well. For example, under the 2010 Healthcare Reform Laws, CMS requires IRFs to submit data on certain quality of care measures for the IRF quality reporting program. A facility's failure to submit the required quality data results in a two percentage point reduction to that facility's annual market basket increase factor for payments made for discharges in a subsequent Medicare fiscal year. IRFs began submitting quality data to CMS in October 2012. All of our inpatient rehabilitation hospitals have met the reporting deadlines to date resulting in no corresponding reimbursement reductions. Similarly, home health and hospice agencies are required to submit quality data to CMS each year, and the failure to do so in accordance with the rules will result in a two percentage point reduction in their market basket update. For 2020, we expect no more than seven of our home health and hospice agencies will incur a reduction in their reimbursement rates.

We cannot predict the adjustments to Medicare payment rates Congress or CMS may make in the future. Congress, MedPAC, and CMS will continue to address reimbursement rates for a variety of healthcare settings. Any additional downward adjustment to rates or limitations on reimbursement for the types of facilities we operate and services we provide could have a material adverse effect on our business, financial position, results of operations, and cash flows. For additional discussion of the risks associated with our concentration of revenues from the federal government or with potential changes to the statutes or regulations governing Medicare reimbursement, including the 2018 Budget Act, see Item 1A, *Risk Factors*, and Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*, "Executive Overview—Key Challenges."

Although reductions or changes in reimbursement from governmental or third-party payors and regulatory changes affecting our business represent one of the most significant challenges to our business, our operations are also affected by other rules and regulations that indirectly affect reimbursement for our services, such as data coding rules and patient coverage rules and determinations. For example, Medicare providers like us can be negatively affected by the adoption of coverage policies, either at the national or local level, that determine whether an item or service is covered and under what clinical circumstances it is considered to be reasonable and necessary. Current CMS coverage rules require inpatient rehabilitation services to be ordered by a physician and be coordinated by an interdisciplinary team. The interdisciplinary team must meet weekly to review patient status and make any needed adjustments to the individualized plan of care. Qualified personnel must provide the rehabilitation nursing, physical therapy, occupational therapy, speech-language pathology, social services, psychological services, and prosthetic and orthotic services that may be needed. Medicare contractors processing claims for CMS make coverage determinations regarding medical necessity that can represent restrictive interpretations of the CMS coverage rules.

Those interpretations are not made through a notice and comment review process. We cannot predict how future CMS coverage rule interpretations or any new local coverage determinations will affect us.

In the ordinary course, Medicare reimbursement claims made by healthcare providers, including inpatient rehabilitation hospitals as well as home health and hospice agencies, are subject to audit from time to time by governmental payors and their agents, such as the Medicare Administrative Contractors (“MACs”) that act as fiscal intermediaries for all Medicare billings, as well as the United States Department of Health and Human Services Office of Inspector General (the “HHS-OIG”), CMS, and state Medicaid programs. In addition to those audits conducted by existing MACs, CMS has developed and instituted various Medicare audit programs under which CMS contracts with private companies to conduct claims and medical record audits. Some contractors are paid a percentage of the overpayments recovered. The Recovery Audit Contractors (“RACs”) conduct payment reviews of claims, which can examine coding, overall billing accuracy, and medical necessity. When conducting an audit, the RACs receive claims data directly from MACs on a monthly or quarterly basis.

CMS has also established Unified Program Integrity Contractors (“UPICs”), previously known as Zone Program Integrity Contractors, to perform fraud, waste, and abuse detection, deterrence and prevention activities for Medicare and Medicaid claims. Like the RACs, the UPICs conduct audits and have the ability to refer matters to the HHS-OIG or the United States Department of Justice (“DOJ”). Unlike RACs, however, UPICs do not receive a specific financial incentive based on the amount of the payment errors they identify.

As a matter of course, we undertake significant efforts through training, education, and documentation to ensure compliance with coding and medical necessity coverage rules. Despite our belief that our coding and assessment of patients are accurate, audits may lead to assertions that we have been underpaid or overpaid by Medicare or submitted improper claims in some instances, require us to incur additional costs to respond to requests for records and defend the validity of payments and claims, and ultimately require us to refund any amounts determined to have been overpaid. We cannot predict when or how these audit programs will affect us. Any denial of a claim for payment, either as a result of an audit or ordinary course payment review by the MAC, is subject to an appeals process that is currently taking numerous years to complete. For additional discussion of these audits and the risks associated with them, see Item 1A, *Risk Factors*, and Item 7, *Management’s Discussion and Analysis of Financial Condition and Results of Operations*, “Executive Overview—Key Challenges.”

A basic summary of current Medicare reimbursement in our business segments follows:

Inpatient Rehabilitation. As discussed above, our inpatient rehabilitation hospitals receive a fixed payment reimbursement amount per discharge under the IRF-PPS based on the patient’s rehabilitation impairment category established by the United States Department of Health and Human Services (“HHS”) and other characteristics and conditions identified by the attending clinicians. In order to qualify for reimbursement under the IRF-PPS, our hospitals must comply with various Medicare rules and regulations including documentation and coverage requirements, or specifications as to what conditions must be met to qualify for reimbursement. These requirements relate to, among other things, pre-admission screening, post-admission evaluations, and individual treatment planning that all delineate the role of physicians in ordering and overseeing patient care. For example, a physician must admit each patient and in doing so determine that the treatment of the patient in an IRF setting is reasonable and necessary. In addition, to qualify as an IRF under Medicare rules, a facility must be primarily focused on treating patients with one of 13 specified medical conditions that typically require intensive therapy and supervision, such as stroke, brain injury, hip fracture, certain neurological conditions, and spinal cord injury. Specifically, at least 60% of a facility’s patients must have a diagnosis from at least one of these 13 conditions, which requirement is known as the “60% Rule.” Also, each patient admitted to an IRF must be able to tolerate a minimum of three hours of therapy per day for five days per week and must have a registered nurse available 24 hours, each day of the week.

Under IRF-PPS, CMS is required to adjust the payment rates based on an IRF-specific market basket index. The annual market basket update is designed to reflect changes over time in the prices of a mix of goods and services used by IRFs. In setting annual market basket updates, CMS uses data furnished by the Bureau of Labor Statistics for price proxy purposes, primarily in three categories: Producer Price Indexes, Consumer Price Indexes, and Employment Cost Indexes. With IRF-PPS, our inpatient rehabilitation hospitals retain the difference, if any, between the fixed payment from Medicare and their operating costs. Thus, our hospitals benefit from being cost-effective providers.

On July 31, 2018, CMS released its notice of final rulemaking for fiscal year 2019 IRF-PPS (the “2019 IRF Rule”). The 2019 IRF Rule implemented a 2.9% market basket update that was reduced by 75 basis points under the requirements of the 2010 Healthcare Reform Laws effective for discharges between October 1, 2018 and September 30, 2019. The 2010 Healthcare Reform Laws also required the market basket update to be reduced by a productivity adjustment on an annual basis. The productivity adjustment equals the trailing 10-year average of changes in annual economy-wide private nonfarm business multi-factor productivity. The productivity adjustment effective October 1, 2018 decreased the market basket update by 80 basis points. Additionally, the 2019 IRF Rule included a change to the IRF-PPS, effective October 1, 2019, that replaced the

FIM™ assessment instrument with new patient assessment measures, which we refer to as “Section GG functional measures” or “Section GG” based on the designation CMS assigned to them.

On July 31, 2019, CMS released its notice of final rulemaking for fiscal year 2020 IRF-PPS (the “2020 IRF Rule”). The 2020 IRF Rule implements a net 2.5% market basket increase (market basket update of 2.9% reduced by a productivity adjustment of 40 basis points) effective for discharges between October 1, 2019 and September 30, 2020. The 2020 IRF Rule includes the final form of Section GG changes. Section GG affects patients’ classification into case-mix groupings, relative weights, and length-of-stay values under the IRF-PPS, which in turn will likely negatively impact our reimbursement amounts. The 2020 IRF Rule also includes changes that impact our hospital-by-hospital base rate for Medicare reimbursement. Such changes include, but are not limited to, revisions to the wage index and labor-related share values. There are also changes to the IRF quality reporting program that require IRFs to collect and report more quality data and clinical information in the future. Based on the market basket update, our analysis of the Section GG changes and the other adjustments included in the 2020 IRF Rule and other factors, we currently estimate Medicare payment rates for our inpatient rehabilitation segment will be flat to up 0.75% in fiscal year 2020.

Unlike our inpatient services, our outpatient services are primarily reimbursed under the Medicare Part B physician fee schedule. On November 1, 2019, CMS released its final notice of rulemaking for the payment policies under the physician fee schedule and other revisions to Part B policies for calendar year 2020. The provisions of this rule, including the updates to the fee schedule, are not expected to be material to us.

Home Health. Medicare pays home health benefits for patients discharged from a hospital or patients otherwise suffering from chronic conditions that require ongoing but intermittent skilled care. As a condition of participation under Medicare, patients must be homebound (meaning unable to leave their home without a considerable and taxing effort), require intermittent skilled nursing, physical therapy or speech therapy services, or have a continuing need for occupational therapy, and receive treatment under a plan of care established and periodically reviewed by a physician. A physician must document that he or she or a qualifying nurse practitioner has had a face-to-face encounter with the patient and then certify to CMS that a patient meets the eligibility requirements for the home health benefit. This initial certification of Medicare patient eligibility, plan of care, and comprehensive assessment is valid for a 60-day episode of care. Prior to January 1, 2020, Medicare paid home health providers under the HH-PPS for each 60-day episode of care for each patient. Providers typically received either 50% or 60% of the estimated base payment for the full 60 days for each patient upon submission of the initial claim at the beginning of the episode of care based on the patient’s condition and treatment needs. The provider received the remaining portion of the payment after the 60-day treatment period, subject to any applicable adjustments. This partial early payment process is referred to as the Request for Anticipated Payment or “RAP.”

Beginning January 1, 2020, Medicare reimburses home health providers under a new payment system, referred to as the Patient-Driven Groupings Model (“PDGM”). PDGM replaces the current 60-day episode of payment methodology with a 30-day payment period and relies more heavily on clinical characteristics and other patient information (such as principal diagnosis, functional level, referral source, and timing), rather than the current therapy service-use thresholds, to determine payments. Under PDGM, the initial certification will remain valid for 60-days. If a patient remains eligible for care after the initial period as certified by a physician, a new treatment period may begin. There are currently no limits to the number of home health treatment periods a Medicare patient may receive assuming there is eligibility for each successive period. PDGM also reduces the early payment opportunity available through RAP in 2020 and eliminates RAP completely in 2021. Additionally, beginning in 2022, home health providers will be required to submit a Notice of Admission, or “NOA,” within 5 days of the start of the initial treatment period and within 5 days of day 31 for the second 30-day payment period. CMS will reduce reimbursement for agencies that fail to submit a NOA timely. For additional discussion of PDGM and other regulatory and legislative initiatives that could impact our home health business, see Item 1A, *Risk Factors*, and Item 7, *Management’s Discussion and Analysis of Financial Condition and Results of Operations*, “Executive Overview—Key Challenges.”

Home health Medicare payments are adjusted based on each patient’s condition and clinical treatment. This is referred to as the case-mix adjustment. In addition to the case-mix adjustment, payments for periods of care may be adjusted for other reasons, including unusually large (outlier) costs, low-utilization patients (such as those requiring one to five visits based on the case-mix group), and geographic differences in wages. Payments are also made for non-routine medical supplies that are used in treatment.

On October 31, 2018, CMS released its notice of final rulemaking for calendar year 2019 for home health agencies under the HH-PPS (the “2019 HH Rule”). The 2019 HH Rule provided for a net market basket update of 2.2%, after taking into account a productivity adjustment reduction of 80 basis points and offsetting adjustments for the rural add-on program and outlier patients, effective for episodes ending in calendar year 2019. The 2019 HH Rule also included other pricing changes, such as a reduction to the case-mix weights for certain cases.

On October 31, 2019, CMS released its notice of final rulemaking for calendar year 2020 for home health agencies under the HH-PPS (the “2020 HH Rule”). Pursuant to the requirements of the 2018 Budget Act, the 2020 HH Rule finalized the implementation of PDGM for 2020. In addition to the significant changes to the home health reimbursement model related to PDGM discussed above, the 2020 HH Rule requires additional quality reporting measures and significantly increases the standardized patient assessment data elements collected by providers beginning in 2022. With respect to Medicare reimbursement rates, the 2020 HH Rule implements a net 1.3% market basket increase (market basket update of 1.5% reduced by 0.2% for an extension of the rural payment add-on factor) in 2020. The 2020 HH Rule then reduces the base payment rate by 4.4% to offset the provider behavioral changes that CMS assumes PDGM will drive. Based on the market basket update, our analysis of PDGM’s significant changes to the reimbursement model and the other adjustments included in the 2020 HH Rule as well as other factors, we currently estimate Medicare payment rates for our home health business will decrease between 2.0% and 3.0% in 2020.

For additional discussion of PDGM and other regulatory and legislative initiatives that could impact our home health business, see Item 1A, *Risk Factors*, and Item 7, *Management’s Discussion and Analysis of Financial Condition and Results of Operations*, “Executive Overview—Key Challenges.”

Hospice. Medicare pays hospice benefits for patients with life expectancies of six months or less, as documented by the patient’s physician(s). Under Medicare rules, patients seeking hospice benefits must agree to forgo curative treatment for their terminal medical conditions. For each day a patient elects hospice benefits, Medicare pays an adjusted daily rate based on patient location, and payments represent a prospective per diem amount tied to one of four different categories or levels of care: routine home care, continuous home care, inpatient respite care, and general inpatient care. Medicare hospice reimbursements to each provider are also subject to two annual caps, one limiting total hospice payments based on the average annual payment per beneficiary and another limiting payments based on the number of days of inpatient care billed by the hospice provider. There are currently no limits to the number of hospice benefit periods an eligible Medicare patient may receive, and a patient may revoke the benefit at any time.

On August 1, 2018, CMS released its notice of final rulemaking for fiscal year 2019 for hospice agencies under the Hospice-PS (the “2019 Hospice Rule”). The final rule updated hospice payments between October 1, 2018 and September 30, 2019. The 2019 Hospice Rule provided for a net market basket update of 1.8%.

On July 31, 2019, CMS released its notice of final rulemaking for fiscal year 2020 for hospice agencies under the Hospice-PS (the “2020 Hospice Rule”). The 2020 Hospice Rule provides for various pricing updates for hospice payments between October 1, 2019 through September 30, 2020 and makes other policy updates, including adding a requirement to provide additional cost sharing information to beneficiaries if there are services that will not be covered by the hospice agency. Based on our analysis of the various pricing adjustments included in the 2020 Hospice Rule as well as other factors, we currently estimate Medicare payment rates for our hospice business will increase between 0.25% and 0.75% in fiscal year 2020.

For additional discussion of matters and risks related to reimbursement, see Item 1A, *Risk Factors*.

Managed Care and Other Discount Plans

We negotiate payment rates with certain large group purchasers of healthcare services, including Medicare Advantage, managed care plans, private insurance companies, and third-party administrators. Managed care contracts typically have terms between one and three years, although we have a number of managed care contracts that automatically renew each year (with pre-defined rate increases) unless a party elects to terminate the contract. In 2019, typical rate increases for our inpatient rehabilitation contracts ranged from 2-4% and for our home health and hospice contracts ranged from 0-3%. We cannot provide any assurance we will continue to receive increases in the future. Our managed care staff focuses on establishing and re-negotiating contracts that provide equitable reimbursement for the services provided.

Medicaid Reimbursement

Medicaid is a jointly administered and funded federal and state program that provides hospital and medical benefits to qualifying individuals who are deemed unable to afford healthcare. As the Medicaid program is administered by the individual states under the oversight of CMS in accordance with certain regulatory and statutory guidelines, there are substantial differences in reimbursement methodologies and coverage policies from state to state. Many states have experienced shortfalls in their Medicaid budgets and are implementing significant cuts in Medicaid reimbursement rates. Additionally, certain states control Medicaid expenditures through restricting or eliminating coverage of some services. Continuing downward pressure on Medicaid payment rates could cause a decline in that portion of our *Net operating revenues*. However, for the year ended December 31, 2019, Medicaid payments represented only 2.8% of our consolidated *Net operating revenues*. In certain states in which we operate, we are experiencing an increase in Medicaid patients, partially the result of expanded coverage consistent

with the intent of the 2010 Healthcare Reform Laws. For additional discussion, see Item 1A, *Risk Factors*, “Changes in our payor mix or the acuity of our patients could adversely impact our revenues or our profitability.”

Cost Reports

Because of our participation in Medicare and Medicaid, we are required to meet certain financial reporting requirements. Federal and, where applicable, state regulations require the submission of annual cost reports covering the revenue, costs, and expenses associated with the services provided by inpatient hospital, home health, and hospice providers to Medicare beneficiaries and Medicaid recipients. These annual cost reports are subject to routine audits which may result in adjustments to the amounts ultimately determined to be due to us under these reimbursement programs. These audits are used for determining if any under- or over-payments were made to these programs and to set payment levels for future years. Medicare also makes retroactive adjustments to payments for certain low-income patients after comparing subsequently published statistical data from CMS to the cost report data. We cannot predict what retroactive adjustments, if any, will be made, but we do not anticipate these adjustments will have a material impact on us.

Regulation

The healthcare industry is subject to significant federal, state, and local regulation that affects our business activities by controlling the reimbursement we receive for services provided, requiring licensure or certification of our operations, regulating our relationships with physicians and other referral sources, regulating the use of our properties, and controlling our growth. State and local healthcare regulation may cover additional matters such as nurse staffing ratios, healthcare worker safety, marijuana legalization, and assisted suicide. We are also subject to the broader federal and state regulations that prohibit fraud and abuse in the delivery of healthcare services. Congress, HHS-OIG, and the DOJ have historically focused on fraud and abuse in healthcare. Since the 1980s, a steady stream of changes have stiffened penalties or made it easier for DOJ to impose liability on companies and individuals, and the pace of these changes has only been increasing. The 2018 Budget Act continues this emphasis by increasing the criminal and civil penalties that can be imposed for violating federal health care laws. As a healthcare provider, we are subject to periodic audits, examinations and investigations conducted by, or at the direction of, government investigative and oversight agencies. Failure to comply with applicable federal and state healthcare regulations can result in a provider’s exclusion from participation in government reimbursement programs and in substantial civil and criminal penalties.

We undertake significant effort and expense to provide the medical, nursing, therapy, and ancillary services required to comply with local, state, and federal regulations, as well as, for most facilities, accreditation standards of The Joint Commission and, for some facilities, the Commission on Accreditation of Rehabilitation Facilities. We also maintain accreditation for our home health and hospice agencies where required and in other instances where it facilitates more efficient Medicare enrollment. The Community Health Accreditation Program is the most common accrediting organization for our agencies. Accredited facilities and agencies are subject to periodic resurvey to ensure the standards are being met.

Beyond healthcare specific regulations, we face increasing state and local regulation in areas, such as labor and employment and data privacy, traditionally subject to only or primarily federal regulation. In addition to the risk and burden of new, additional, or more stringent regulatory standards, these state and local regulations often conflict with federal regulation, and with each other. Given the number of locations in which we operate, increasing state and local regulation, which may be more stringent than federal regulation and may even conflict with federal or other state or local regulation, represents a significant burden and risk to us.

We maintain a comprehensive ethics and compliance program to promote conduct and business practices that meet or exceed requirements under laws, regulations, and industry standards. The program monitors the Company’s performance on and raises awareness of various regulatory requirements among employees and emphasizes the importance of complying with governmental laws and regulations. As part of the compliance program, we provide annual compliance training to our employees, Board members, Medical Directors, vendors, and other non-employees that operate within our hospitals, and require all employees to report any violations to their supervisor or another person of authority or through a toll-free telephone hotline. Another integral part of our compliance program is a policy of non-retaliation against employees who report compliance concerns.

Licensure and Certification

Healthcare facility construction and operation are subject to numerous federal, state, and local regulations relating to, among other things, the adequacy of medical care, equipment, personnel, operating policies and procedures, acquisition and dispensing of pharmaceuticals and controlled substances, infection control, maintenance of adequate records and patient privacy, fire prevention, and compliance with building codes and environmental protection laws. Our inpatient rehabilitation

hospitals are subject to periodic inspection and other reviews by governmental and non-governmental certification authorities to ensure continued compliance with the various standards necessary for facility licensure. All of our hospitals are required to be licensed.

In addition, inpatient rehabilitation hospitals must be certified by CMS to participate in the Medicare program and generally must be certified by Medicaid state agencies to participate in Medicaid programs. Certification and participation in these programs involve numerous regulatory obligations. For example, hospitals must treat at least 30 patients free-of-charge prior to certification and eligibility for Medicare reimbursement. Once certified by Medicare, hospitals undergo periodic on-site surveys and revalidations in order to maintain their certification. All of our inpatient hospitals participate in the Medicare program.

Our home health and hospice agencies are each licensed under applicable law, certified by CMS for participation in the Medicare program, and generally certified by the applicable state Medicaid agencies to participate in those programs.

Failure to comply with applicable certification requirements may make our hospitals and agencies, as the case may be, ineligible for Medicare or Medicaid reimbursement. In addition, Medicare or Medicaid may seek retroactive reimbursement from noncompliant providers or otherwise impose sanctions for noncompliance. Non-governmental payors often have the right to terminate provider contracts if the provider loses its Medicare or Medicaid certification.

The 2010 Healthcare Reform Laws added new screening requirements and associated fees for all Medicare providers. The screening of employees with patient access must include a licensure check and may include other procedures such as fingerprinting, criminal background checks, unscheduled and unannounced site visits, database checks, and other screening procedures prescribed by CMS.

We have developed operational systems to oversee compliance with the various standards and requirements of the Medicare program and have established ongoing quality assurance activities; however, given the complex nature of governmental healthcare regulations, there can be no assurance Medicare, Medicaid, or other regulatory authorities will not allege instances of noncompliance. A determination by a regulatory authority that a facility or agency is not in compliance with applicable requirements could also lead to the assessment of fines or other penalties, loss of licensure, exclusion from participation in Medicare and Medicaid, and the imposition of requirements that the offending facility or agency must take corrective action.

Certificates of Need

In some states and U.S. territories where we operate, the construction or expansion of facilities, the acquisition of existing facilities or agencies, or the introduction of new beds or inpatient, home health, and hospice services may be subject to review by and prior approval of state regulatory bodies under a “certificate of need,” or “CON,” law. As of December 31, 2019, approximately 51% of our licensed beds and 36% of our home health and hospice locations are in states or U.S. territories that have CON laws. CON laws require a reviewing authority or agency to determine the public need for additional or expanded healthcare facilities and services. These laws also generally require approvals for capital expenditures involving inpatient rehabilitation hospitals if such capital expenditures exceed certain thresholds. In addition, CON laws in some states require us to abide by certain charity care commitments as a condition for approving a CON. Any instance where we are subject to a CON law, we must obtain it before acquiring, opening, reclassifying, or expanding a healthcare facility, starting a new healthcare program, or opening a new home health or hospice agency.

We potentially face opposition any time we initiate a project requiring a new or amended CON or seek to acquire an existing CON. This opposition may arise either from competing national or regional companies or from local hospitals, agencies, or other providers which file competing applications or oppose the proposed CON project. Opposition to our applications may delay or prevent our future addition of beds, hospitals, or agencies in given markets or increase our costs in seeking those additions. The necessity for these approvals serves as a barrier to entry and has the potential to limit competition for us (in markets where we hold a CON) and for other providers (in markets where we are seeking a CON). We have generally been successful in obtaining CONs or similar approvals, although there can be no assurance we will achieve similar success in the future, and the likelihood of success varies by locality and state.

In an attempt to reduce regulation and increase competition, lawmakers in several states have recently proposed modification or even full repeal of CON laws. In 2019, Florida enacted legislation to repeal CON laws for several provider types, including IRFs, in two stages. Effective July 1, 2019, existing IRFs became eligible to expand without first obtaining a CON. Effective July 1, 2021, new IRFs may operate without first obtaining a CON. Other states are expected to consider CON-related legislation and regulation changes, including in some cases expanding CON requirements, in 2020 and beyond.

False Claims

The federal False Claims Act (the “FCA”) imposes liability for the knowing presentation of a false claim to the United States government and provides for penalties equal to three times the actual amount of any overpayments plus up to approximately \$23,000 per claim. Federal civil penalties will be adjusted to account for inflation each year. In addition, the FCA allows private persons, known as “relators,” to file complaints under seal and provides a period of time for the government to investigate such complaints and determine whether to intervene in them and take over the handling of all or part of such complaints. The government and relators may also allege violations of the FCA for the knowing and improper failure to report and refund amounts owed to the government in a timely manner following identification of an overpayment. This is known as a “reverse false claim.” The government deems identification of the overpayment to occur when a person has, or should have through reasonable diligence, determined that an overpayment was received and quantified the overpayment.

Because we perform thousands of similar procedures a year for which we are reimbursed by Medicare and other federal payors and there is a relatively long statute of limitations, a billing error, cost reporting error or disagreement over physician medical judgment could result in significant damages and civil and criminal penalties under the FCA. Many states have also adopted similar laws relating to state government payments for healthcare services. The 2010 Healthcare Reform Laws amended the FCA to expand the definition of false claim, to make it easier for the government to initiate and conduct investigations, to enhance the monetary reward to relators where prosecutions are ultimately successful, and to extend the statute of limitations on claims by the government. The federal government has become increasingly aggressive in asserting that incidents of erroneous billing or record keeping represent FCA violations and in challenging the medical judgment of independent physicians as the basis for FCA allegations. Furthermore, well-publicized enforcement actions indicate that the federal government has increasingly sought to use statistical sampling to extrapolate allegations to larger pools of claims or to infer liability without proving knowledge of falsity of individual claims. For additional discussion, see Item 1A, *Risk Factors*, and Note 18, *Contingencies and Other Commitments*, to the accompanying consolidated financial statements.

Relationships with Physicians and Other Providers

Anti-Kickback Law. Various state and federal laws regulate relationships between providers of healthcare services, including management or service contracts and investment relationships. Among the most important of these restrictions is a federal law prohibiting the offer, payment, solicitation, or receipt of remuneration by individuals or entities to induce referrals of patients for services reimbursed under the Medicare or Medicaid programs (the “Anti-Kickback Law”). The 2010 Healthcare Reform Laws amended the federal Anti-Kickback Law to provide that proving violations of this law does not require proving actual knowledge or specific intent to commit a violation. Another amendment made it clear that Anti-Kickback Law violations can be the basis for claims under the FCA. These changes and those described above related to the FCA, when combined with other recent federal initiatives, are likely to increase investigation and enforcement efforts in the healthcare industry generally. In addition to standard federal criminal and civil sanctions, including imprisonment and penalties of up to \$100,000 for each violation plus tripled damages for improper claims, violators of the Anti-Kickback Law may be subject to exclusion from the Medicare and/or Medicaid programs. Federal civil penalties will be adjusted to account for inflation each year. In 1991, the HHS-OIG issued regulations describing compensation arrangements that are not viewed as illegal remuneration under the Anti-Kickback Law. Those regulations provide for certain safe harbors for identified types of compensation arrangements that, if fully complied with, assure participants in the particular arrangement that the HHS-OIG will not treat that participation as a criminal offense under the Anti-Kickback Law or as the basis for an exclusion from the Medicare and Medicaid programs or the imposition of civil sanctions. Failure to fall within a safe harbor does not constitute a violation of the Anti-Kickback Law, but the HHS-OIG has indicated failure to fall within a safe harbor may subject an arrangement to increased scrutiny. A violation of the Anti-Kickback Law by us or one or more of our joint ventures could have a material adverse effect upon our business, financial position, results of operations, or cash flows. Even the assertion of a violation could have an adverse effect upon our stock price or reputation.

We operate a number of our rehabilitation hospitals and a few of our home health agencies through joint ventures with institutional healthcare providers that may be in a position to make or influence referrals to us. In addition, we have a number of relationships with physicians and other healthcare providers, including management or service contracts. Some of these investment relationships and contractual relationships may not fall within the protection offered by a safe harbor. Despite our compliance and monitoring efforts, there can be no assurance violations of the Anti-Kickback Law will not be asserted in the future, nor can there be any assurance our defense against any such assertion would be successful.

For example, we have entered into agreements to manage our hospitals that are owned by joint ventures. Most of these agreements incorporate a percentage-based management fee. Although there is a safe harbor for personal services and management contracts, this safe harbor requires, among other things, the aggregate compensation paid to the manager over the term of the agreement be set in advance. Because our management fee may be based on a percentage of revenues, the fee

arrangement may not meet this requirement. However, we believe our management arrangements satisfy the other requirements of the safe harbor for personal services and management contracts and comply with the Anti-Kickback Law.

Physician Self-Referral Law. The federal law commonly known as the “Stark law” and CMS regulations promulgated under the Stark law prohibit physicians from making referrals for “designated health services” including inpatient and outpatient hospital services, physical therapy, occupational therapy, radiology services, and home health services, to an entity in which the physician (or an immediate family member) has an investment interest or other financial relationship, subject to certain exceptions. The Stark law also prohibits those entities from filing claims or billing Medicare for those referred services. Violators of the Stark law and regulations may be subject to recoupments, civil monetary sanctions (up to \$26,000 for each violation and assessments up to three times the amount claimed for each prohibited service) and exclusion from any federal, state, or other governmental healthcare programs. The statute also provides a penalty of up to \$172,000 for a circumvention scheme. Federal civil penalties will be adjusted to account for inflation each year. There are statutory exceptions to the Stark law for many of the customary financial arrangements between physicians and providers, including personal services contracts and leases. However, in order to be afforded protection by a Stark law exception, the financial arrangement must comply with every requirement of the applicable exception.

Under the 2010 Healthcare Reform Laws, the exception to the Stark law that currently permits physicians to refer patients to hospitals in which they have an investment or ownership interest has been dramatically limited by providing that only physician-owned hospitals with a provider agreement in place on December 31, 2010 are exempt from the general ban on self-referral. Existing physician-owned hospitals are prohibited from increasing the physician ownership percentage in the hospital after March 23, 2010. Additionally, physician-owned hospitals are prohibited from increasing the number of licensed beds after March 23, 2010, except when certain market and regulatory approval conditions are met. Currently, we have no hospitals that would be considered physician-owned under this law.

The complexity of the Stark law and the associated regulations and their associated strict liability provisions are a challenge for healthcare providers, who do not always have the benefit of significant regulatory or judicial interpretation of these laws and regulations. We attempt to structure our relationships to meet one or more exceptions to the Stark law, but the regulations implementing the exceptions are detailed and complex. Accordingly, we cannot assure that every relationship complies fully with the Stark law.

Additionally, no assurances can be given that any agency charged with enforcement of the Stark law and regulations might not assert a violation under the Stark law, nor can there be any assurance our defense against any such assertion would be successful or that new federal or state laws governing physician relationships, or new interpretations of existing laws governing such relationships, might not adversely affect relationships we have established with physicians or result in the imposition of penalties on us. A violation of the Stark law by us could have a material adverse effect upon our business, financial position, results of operations, or cash flows. Even the assertion of a violation could have an adverse effect upon our stock price or reputation.

HIPAA

The Health Insurance Portability and Accountability Act of 1996, commonly known as “HIPAA,” broadened the scope of certain fraud and abuse laws by adding several criminal provisions for healthcare fraud offenses that apply to all health benefit programs. HIPAA also added a prohibition against incentives intended to influence decisions by Medicare or Medicaid beneficiaries as to the provider from which they will receive services. In addition, HIPAA created new enforcement mechanisms to combat fraud and abuse, including the Medicare Integrity Program, and an incentive program under which individuals can receive a monetary reward for providing information on Medicare fraud and abuse that leads to the recovery of at least Medicare funds. Penalties for violations of HIPAA include civil and criminal monetary penalties. The HHS Office of Civil Rights (“HHS-OCR”) implemented a permanent HIPAA audit program for healthcare providers nationwide in 2016. As of December 31, 2019, we have not been selected for audit.

HIPAA and related HHS regulations contain certain administrative simplification provisions that require the use of uniform electronic data transmission standards for certain healthcare claims and payment transactions submitted or received electronically. HIPAA regulations also regulate the use and disclosure of individually identifiable health-related information, whether communicated electronically, on paper, or orally. The regulations provide patients with significant rights related to understanding and controlling how their health information is used or disclosed and require healthcare providers to implement administrative, physical, and technical practices to protect the security of individually identifiable health information.

The Health Information Technology for Economic and Clinical Health (“HITECH”) Act modifies and expands the privacy and security requirements of HIPAA. The HITECH Act applies certain of the HIPAA privacy and security requirements directly to business associates of covered entities. The modifications to existing HIPAA requirements include: expanded

accounting requirements for electronic health records, tighter restrictions on marketing and fundraising, and heightened penalties and enforcement associated with noncompliance. Significantly, the HITECH Act also establishes new mandatory federal requirements for notification of breaches of security involving protected health information. The HHS-OCR rules implementing the HITECH Act expand the potential liability for a breach involving protected health information to cover some instances where a subcontractor is responsible for the breaches and that individual or entity was acting within the scope of delegated authority under the related contract or engagement. These rules generally define “breach” to mean the acquisition, access, use or disclosure of protected health information in a manner not permitted by the HIPAA privacy standards, which compromises the security or privacy of protected health information. Under these rules, improper acquisition, access, use, or disclosure is presumed to be a reportable breach, unless the potentially breaching party can demonstrate a low probability that protected health information has been compromised.

HHS-OCR is responsible for enforcing the requirement that covered entities notify HHS and any individual whose protected health information has been improperly acquired, accessed, used, or disclosed. In certain cases, notice of a breach is required to be made to media outlets. The heightened penalties for noncompliance range from \$100 to \$50,000 per violation for most violations. In the event of violations due to willful neglect that are not corrected within 30 days, penalties start at \$50,000 per violation and are not subject to a per violation statutory maximum. Penalties are also subject to an annual cap for multiple identical violations in a single calendar year. Pursuant to 2019 guidance from HHS-OCR, this enforcement caps ranges from \$25,000 per year to \$1,500,000 per year depending on an entity’s level of culpability. Importantly, HHS-OCR has indicated that the failure to conduct a security risk assessment or adequately implement HIPAA compliance policies could qualify as willful neglect.

In addition, there are numerous legislative and regulatory initiatives at the federal and state levels addressing patient privacy concerns. Healthcare providers will continue to remain subject to any federal or state privacy-related laws, including but not limited to the California Consumer Privacy Act, that are more restrictive than the privacy regulations issued under HIPAA. These laws vary and could impose additional penalties. HHS-OIG and other regulators have also increasingly interpreted laws and regulations in a manner as to increase exposure of healthcare providers to allegations of noncompliance. Any actual or perceived violation of privacy-related laws and regulations, including HIPAA and the HITECH Act, could have a material adverse effect on our business, financial position, results of operations, and cash flows.

Civil Monetary Penalties Law

Under the Civil Monetary Penalties Law, HHS may impose civil monetary penalties on healthcare providers that present, or cause to be presented, ineligible reimbursement claims for services. The 2018 Budget Act increased the civil monetary penalties, which vary depending on the offense from \$5,000 to \$100,000 per violation, plus treble damages for the amount at issue and may include exclusion from federal health care programs such as Medicare and Medicaid. The penalties will be adjusted annually to account for inflation. HHS may seek to impose monetary penalties under this law for, among other things, offering inducements to beneficiaries for program services and filing false or fraudulent claims.

Available Information

We make available through our website, www.encompasshealth.com, the following documents, free of charge: our annual reports (Form 10-K), our quarterly reports (Form 10-Q), our current reports (Form 8-K), and any amendments to those reports promptly after we electronically file such material with, or furnish it to, the United States Securities and Exchange Commission.

Item 1A. Risk Factors

Our business, operations, and financial position are subject to various risks. Some of these risks are described below, and the reader should take such risks into account in evaluating Encompass Health or any investment decision involving Encompass Health. This section does not describe all risks that may be applicable to us, our industry, or our business, and it is intended only as a summary of material risk factors. More detailed information concerning other risks and uncertainties as well as those described below is contained in other sections of this annual report. Still other risks and uncertainties we have not or cannot foresee as material to us may also adversely affect us in the future. If any of the risks below or other risks or uncertainties discussed elsewhere in this annual report are actually realized, our business and financial condition, results of operations, and cash flows could be adversely affected. In the event the impact is materially adverse, the trading price of our common stock could decline.

Reductions or changes in reimbursement from government or third-party payors could adversely affect our Net operating revenues and other operating results.

We derive a substantial portion of our *Net operating revenues* from the Medicare program. See Item 1, *Business*, “Sources of Revenues,” for a table identifying the sources and relative payor mix of our revenues. In addition to many ordinary course reimbursement rate changes that the United States Department of Health and Human Services, Centers for Medicare and Medicaid Services (“CMS”), adopts each year as part of its annual rulemaking process for various healthcare provider categories, Congress and some state legislatures have periodically proposed significant changes in laws and regulations governing the healthcare system. Many of these changes have resulted in limitations on the increases in and, in some cases, significant roll-backs or reductions in the levels of payments to healthcare providers for services under many government reimbursement programs. There can be no assurance that future governmental initiatives will not result in pricing freezes, reimbursement reductions, or reduced levels of reimbursement increases that are less than the increases we experience in our costs of operation.

In March 2010, President Obama signed into law the Patient Protection and Affordable Care Act (as subsequently amended, the “2010 Healthcare Reform Laws”). Many provisions within the 2010 Healthcare Reform Laws have impacted or could in the future impact our business, including Medicare reimbursement reductions and promotion of alternative payment models, such as accountable care organizations (“ACOs”) and bundled payment initiatives. The Trump administration and the United States Congress have previously attempted, and may in the future attempt, to change or repeal provisions of the 2010 Healthcare Reform Laws through both legislative and regulatory action. For example, on December 22, 2017, President Trump signed into law the Tax Cuts and Jobs Act, which eliminated the tax penalty for individuals for failing to enroll in health insurance beginning in 2019. On January 20, 2017, President Trump issued his first executive order titled “Minimizing the Economic Burden of the Patient Protection And Affordable Care Act Pending Repeal,” that directs federal regulators to begin dismantling those laws through regulatory and policy-making processes and procedures, “to the maximum extent permitted by law.” In December 2018, a federal district court in Texas invalidated the 2010 Healthcare Reform Laws in their entirety based on the elimination of the tax penalty but postponed enforcement of that decision pending appeal. On December 18, 2019, the United States Court of Appeals for the Fifth Circuit affirmed the district court decision but remanded the case for additional analysis on the question of severability. The future of the 2010 Healthcare Reform Laws as well as the nature and substance of any other healthcare legislation remain uncertain. The 2020 presidential election is likely to involve extensive debate over dramatically different approaches to federal healthcare policy. Any future changes may ultimately impact the provisions of the 2010 Healthcare Reform Laws discussed below or other laws or regulations that either currently affect, or may in the future affect, our business.

For Medicare providers like us, these laws include reductions in CMS’s annual adjustments to Medicare reimbursement rates, commonly known as a “market basket update.” In accordance with Medicare laws and statutes, CMS makes market basket updates by provider type in an effort to compensate providers for rising operating costs. The 2010 Healthcare Reform Laws required reductions, the last of which ended in 2019, in the annual market basket updates for hospital providers ranging from 10 to 75 basis points and for hospice agencies 30 basis points. For home health agencies, the 2010 Healthcare Reform Laws directed CMS to improve home health payment accuracy through rebasing home health payments over four years starting in 2014. In addition, the 2010 Healthcare Reform Laws require the market basket updates for hospital, home health, and hospice providers to be reduced by a productivity adjustment on an annual basis. The productivity adjustment equals the trailing 10-year average of changes in annual economy-wide private nonfarm business multi-factor productivity. To date, the productivity adjustments have resulted in decreases to the market basket updates ranging from 30 to 100 basis points.

Other federal legislation can also have a significant direct impact on our Medicare reimbursement. On August 2, 2011, President Obama signed into law the Budget Control Act of 2011, which provided for an automatic 2% reduction of Medicare program payments. This automatic reduction, known as “sequestration,” began affecting payments received after April 1, 2013. Sequestration has been extended by subsequent legislation, most recently by the Bipartisan Budget Act of 2019, which was

signed into law on August 2, 2019. Under current law each year through fiscal year 2029, the reimbursement we receive from Medicare, after first taking into account all annual payment adjustments including the market basket update, will be reduced by sequestration unless it is repealed or modified before then. The Bipartisan Budget Act of 2018 (the “2018 Budget Act”), signed into law by President Trump on February 9, 2018, includes several provisions affecting Medicare reimbursement. Among those changes, the 2018 Budget Act mandates the adoption of a new Medicare payment model for home health providers effective in 2020 and eliminates the payment adjustments mandated by the 2010 Health Care Reform Laws in favor of fixing a market basket update of 1.5% in 2020.

Additionally, concerns held by federal policymakers about the federal deficit, national debt levels, or healthcare spending specifically could result in enactment of further federal spending reductions, further entitlement reform legislation affecting the Medicare program, and/or further reductions to provider payments. In October 2014, President Obama signed into law the Improving Medicare Post-Acute Care Transformation Act of 2014 (the “IMPACT Act”). The IMPACT Act directs the United States Department of Health and Human Services (“HHS”), in consultation with healthcare stakeholders, to implement standardized data collection processes for post-acute quality and outcome measures. Although the IMPACT Act does not specifically call for the implementation of a new post-acute payment system, we believe this act lays the foundation for possible future post-acute payment policies that would be based on patients’ medical conditions and other clinical factors rather than the setting where the care is provided, also referred to as “site neutral” reimbursement. CMS has begun changing current post-acute payment systems to improve comparability of patient assessment data and clinical characteristics across settings, which will make it easier to create a unified payment system in the future. For example, CMS recently established new case-mix classification models for both home health, discussed further below, and skilled nursing facilities which rely on patient characteristics rather than the amount of therapy received to determine payments. Another example is CMS’s implementation of the new patient assessment measures for IRFs discussed below. The IMPACT Act also creates additional data reporting requirements for our hospitals and home health agencies. The precise details of these new reporting requirements, including timing and content, are being developed and implemented by CMS through the regulatory process that we expect will continue to take place over the next several years. We cannot quantify the potential effects of the IMPACT Act on us.

Each year, the Medicare Payment Advisory Commission (“MedPAC”), an independent agency, advises Congress on issues affecting Medicare and makes payment policy recommendations to Congress for a variety of Medicare payment systems including, among others, the inpatient rehabilitation facility prospective payment system (the “IRF-PPS”), the home health prospective payment system (“HH-PPS”) and the hospice payment system (“Hospice-PS”). MedPAC also provides comments to CMS on proposed rules, including the prospective payment system rules. Congress is not obligated to adopt MedPAC recommendations, and, based on outcomes in previous years, there can be no assurance Congress will adopt MedPAC’s recommendations in a given year. However, MedPAC’s recommendations have, and could in the future, become the basis for legislative or regulatory action.

In connection with CMS’s final rulemaking for the IRF-PPS and the HH-PPS in each year since 2008, MedPAC has recommended either no updates to payments or reductions to payments. In a March 2019 report to Congress, MedPAC recommended, among other things, legislative changes to reduce by 2% the 2020 update for hospice agencies and reduce by 5% the base payments under the HH-PPS and IRF-PPS. In the March 2019 report, MedPAC also reiterated a previous recommendation for Congress to increase the outlier payment pool, to be funded by reductions to base Medicare payments rates under the IRF-PPS. This proposal would adversely affect us as we have a relatively low percentage of outlier patients compared to other inpatient rehabilitation providers.

In a June 2018 report mandated by the IMPACT Act, MedPAC reiterated its recommendation that Congress adopt a unified payment system for all post-acute care (“PAC-PPS”) in lieu of separate systems for inpatient rehabilitation facilities (“IRFs”), skilled nursing facilities, long-term acute care hospitals, and home health agencies. A PAC-PPS would rely on “site neutral” reimbursement based on patients’ medical conditions and other clinical factors rather than the care settings. MedPAC found a PAC-PPS to be feasible and desirable but also suggested many existing regulatory requirements, including the 60% rule discussed below and the requirement for a minimum of three hours of therapy per day, should be waived or modified as part of implementing a PAC-PPS. MedPAC previously estimated, although we cannot verify the methodology or the accuracy of that estimate, a PAC-PPS would result in 15% and 1% decreases to IRF and home health reimbursements, respectively. As a precursor to a unified PAC-PPS, MedPAC discussed in November 2017 a potential recommendation to change the case-mix weights in each post-acute setting for 2019 and 2020 to a blend of the current setting specific weight and the proposed unified PAC-PPS weight, which MedPAC suggested would shift money from for-profit and freestanding IRFs to non-profit and hospital-based IRFs. MedPAC has also called for aligning Medicare regulatory requirements across post-acute providers, although the agency has acknowledged it could take years to complete this effort. Additionally, MedPAC previously has suggested that Medicare should ultimately move from fee-for-service reimbursement to more integrated delivery payment models.

MedPAC also recommended significant changes to the HH-PPS, some of which CMS incorporated into the new payment system mandated by the 2018 Budget Act, referred to as the Patient-Driven Groupings Model (“PDGM”), and set out in the final rule for the 2019 HH-PPS. Beginning in 2020, PDGM replaces the current 60-day episode of payment methodology with a 30-day payment period and eliminates therapy usage as a factor in setting payments (that is, more therapy visits lead to higher reimbursement). CMS adopted a 4.4% reduction in the base payment rate for 2020 intended to offset the provider behavioral changes that CMS assumes PDGM will drive. The reimbursement and other changes associated with PDGM could have a significant impact on our home health agencies.

With respect to significant changes to the IRF-PPS, CMS finalized pursuant to a requirement of the IMPACT Act a change, effective October 1, 2019, that replaces the FIM™ assessment instrument with new patient assessment measures, which we refer to as “Section GG functional measures” or “Section GG” based on the designation CMS assigned to them. This change in how patients are assessed and reported to CMS affects patients’ classification into case-mix groupings, relative weights, and length-of-stay values under the IRF-PPS, which in turn will likely negatively impact our reimbursement amounts.

We cannot predict what alternative or additional deficit reduction initiatives, Medicare payment reductions, or post-acute care reforms, if any, will ultimately be adopted or enacted into law, or the timing or effect of any initiatives or reductions. Those initiatives or reductions would be in addition to many ordinary course reimbursement rate changes that CMS adopts each year as part of the market basket update rulemaking process for various provider categories. While we do not expect the drive toward integrated delivery payment models, value-based purchasing, and post-acute site neutrality in Medicare reimbursement to subside, there are well publicized efforts to repeal, or alter implementation of, various provisions of the 2010 Healthcare Reform Laws and substitute yet to be determined healthcare reforms. We cannot predict the nature or timing of any changes to the 2010 Healthcare Reform Laws or other laws or regulations that either currently affect, or may in the future affect, our business.

There can be no assurance future governmental action will not result in substantial changes to, or material reductions in, our reimbursements. Similarly, we may experience material increases in our operating costs. For example, in 2020, we expect our wage and benefit costs to increase at a rate in excess of our aggregate Medicare reimbursement rate increase. In any given year, the net effect of statutory and regulatory changes may result in a decrease in our reimbursement rate, and that decrease may occur at a time when our expenses are increasing. As a result, there could be a material adverse effect on our business, financial position, results of operations, and cash flows. For additional discussion of how we are reimbursed by Medicare, see Item 1, *Business*, “Regulatory and Reimbursement Challenges” and “Sources of Revenues—Medicare Reimbursement.”

In addition, there are increasing pressures, including as a result of the 2010 Healthcare Reform Laws, from many third-party payors to control healthcare costs and to reduce or limit increases in reimbursement rates for medical services. Our relationships with managed care and nongovernmental third-party payors, such as health maintenance organizations and preferred provider organizations, are generally governed by negotiated agreements. These agreements set forth the amounts we are entitled to receive for our services. Our *Net operating revenues* and our ability to grow our business with these payors could be adversely affected if we are unable to negotiate and maintain favorable agreements with third-party payors.

The ongoing evolution of the healthcare delivery system, including alternative payment models and value-based purchasing initiatives, in the United States may significantly affect our business and results of operations.

The healthcare industry in general is facing uncertainty associated with the efforts to identify and implement workable coordinated care and integrated delivery payment models. In an integrated delivery payment model, hospitals, physicians, and other care providers are reimbursed in a fashion meant to encourage coordinated healthcare on a more efficient, patient-centered basis. These providers are then paid based on the overall value and quality (as determined by outcomes) of the services they provide to a patient rather than the number of services they provide. While this is consistent with our goal and proven track record of being a high-quality, cost-effective provider, broad-based implementation of a new delivery payment model would represent a significant evolution or transformation of the healthcare industry, which may have a significant impact on our business and results of operations.

In recent years, HHS has been studying the feasibility of bundling, including conducting a voluntary, multi-year bundling pilot program to test and evaluate alternative payment methodologies. CMS’ voluntary Bundled Payments for Care Improvement Advanced (“BPCI Advanced”) initiative began October 1, 2018, runs through December 31, 2023, and covers 29 types of inpatient and three types of outpatient clinical episodes, including stroke and hip fracture. Providers participating in BPCI Advanced are subject to a semi-annual reconciliation process where CMS compares the aggregate Medicare expenditures for all items and services included in a clinical episode against the target price for that type of episode to determine whether the participant is eligible to receive a portion of the savings, or is required to repay a portion of the payment above target.

Accordingly, reimbursement may be increased or decreased, compared to what would otherwise be due, based on whether the total Medicare expenditures and patient outcomes meet, exceed or fall short of the targets.

Similarly, CMS has established per the 2010 Healthcare Reform Laws several separate ACO programs, the largest of which is the Medicare Shared Savings Program (“MSSP”), a voluntary ACO program in which hospitals, physicians, and other care providers pursue the delivery of coordinated healthcare on a more efficient, patient-centered basis. Conceptually, ACOs receive a portion of any savings generated above a certain threshold from care coordination as long as benchmarks for the quality of care are maintained. Under the MSSP, there are two ACO tracks from which participants can choose. Each track offers a different degree to which participants share any savings realized or any obligation to repay losses suffered. The ACO rules adopted by CMS are extremely complex and remain subject to further refinement by CMS. According to CMS, 517 MSSP ACOs served 11.2 million patients as of January 1, 2020.

We continue to evaluate, on a case-by-case basis, appropriate BPCI Advanced and ACO participation opportunities for our hospitals and home health agencies. More than 20 of our inpatient rehabilitation hospitals have signed participation or preferred provider agreements with these alternative payment models. Given the timing of our involvement, those hospitals have treated only a limited number of patients under these alternative payment models to date. We have also partnered as the preferred home health provider with two ACOs serving approximately 26,000 total Medicare patients in Texas and Oklahoma, one of which met the minimum savings rate required to participate in Medicare shared savings for 2018.

On November 16, 2015, CMS published its final rule establishing the Comprehensive Care for Joint Replacement (“CJR”) payment model, which holds acute care hospitals accountable for the quality of care they deliver to Medicare fee-for-service beneficiaries for lower extremity joint replacements (i.e., knees and hips) from surgery through recovery. The CJR originally was mandatory for the acute care hospitals in the 67 geographic areas covered. On November 30, 2017, CMS issued a final rule making the CJR voluntary in 33 of those areas. During the CJR model’s five-year term that ends in December 2020, healthcare providers in the 34 geographic areas with mandatory participation will continue to be paid under existing Medicare payment systems. However, the acute-care hospital where the joint replacement takes place will be held accountable for the quality and costs of care for the entire episode of care — from the time of the original admission through 90 days after discharge. Depending on the quality and cost performance during the entire episode, the acute-care hospital may receive an additional payment or be required to repay Medicare a portion of the episode costs. As a result, CMS believes acute care hospitals will be incented to work with physicians and post-acute care providers to ensure beneficiaries receive the coordinated care they need in an efficient manner. Acute care hospitals participating in the CJR model may enter into risk-sharing financial arrangements with post-acute providers, including IRFs and home health agencies. We operate 25 inpatient rehabilitation hospitals in the 34 areas with mandatory participation.

The bundling and ACO initiatives have served as motivating factors for regulators and healthcare industry participants to identify and implement workable coordinated care and integrated delivery payment models. Broad-based implementation of a new delivery payment model would represent a significant transformation for us and the healthcare industry generally. The nature and timing of the evolution or transformation of the current healthcare system to coordinated care delivery and integrated delivery payment models and value-based purchasing are uncertain. The development of new delivery and payment systems will almost certainly take significant time and expense. Many of the alternative approaches, including those discussed above and the new home health value-based purchasing model discussed below, being explored may not work or could change substantially prior to a nationwide implementation. While only a small percentage of our business currently is or is anticipated to be subject to the alternative payment models discussed above, we cannot be certain these models will not be expanded or made standard or new models will not be implemented broadly.

Additionally, as the number and types of bundling and ACO models increase, the number of Medicare beneficiaries who are treated in one of the models increases. Our willingness or inability to participate in integrated delivery payment and other alternative payment models and the referral patterns of other providers participating in those models may limit our access to Medicare patients who would benefit from treatment in inpatient rehabilitation hospitals or by home care services. In an attempt to reduce costs, ACOs may seek to discourage referrals to post-acute care all together. To the extent that acute care hospitals participating in those models do not perceive our quality of care or cost efficiency favorably compared to alternative post-acute providers, we may experience a decrease in volumes and *Net operating revenues*, which could adversely affect our financial position, results of operations, and cash flows. For further discussion of new coordinated care and integrated delivery payment models and value-based purchasing initiatives, the associated challenges, and our efforts to respond to them, see the “Executive Overview—Key Challenges—Changes to Our Operating Environment Resulting from Healthcare Reform” section of Item 7, *Management’s Discussion and Analysis of Financial Condition and Results of Operations*.

Other legislative and regulatory initiatives and changes affecting the industry could adversely affect our business and results of operations.

In addition to the legislative and regulatory actions that directly affect our reimbursement rates or further the evolution of the current healthcare delivery system, other legislative and regulatory changes, including as a result of ongoing healthcare reform, affect healthcare providers like us from time to time. For example, the 2010 Healthcare Reform Laws provide for the expansion of the federal Anti-Kickback Law and the False Claims Act (the “FCA”) that, when combined with other recent federal initiatives, are likely to increase investigation and enforcement efforts in the healthcare industry generally. Changes include increased resources for enforcement, lowered burden of proof for the government in healthcare fraud matters, expanded definition of claims under the FCA, enhanced penalties, and increased rewards for relators in successful prosecutions. CMS may also suspend payment for claims prospectively if, in its opinion, credible allegations of fraud exist. The initial suspension period may be up to 180 days. However, the payment suspension period can be extended almost indefinitely if the matter is under investigation by the HHS Office of Inspector General (the “HHS-OIG”) or the United States Department of Justice (“DOJ”). Any such suspension would adversely affect our financial position, results of operations, and cash flows.

Some states in which we operate have also undertaken, or are considering, healthcare reform initiatives that address similar issues. While many of the stated goals of other federal and state reform initiatives are consistent with our own goal to provide care that is high-quality and cost-effective, legislation and regulatory proposals may lower reimbursements, increase the cost of compliance, decrease patient volumes, promote frivolous or baseless litigation, and otherwise adversely affect our business. We cannot predict what healthcare initiatives, if any, will be enacted, implemented or amended, or the effect any future legislation or regulation will have on us.

On September 30, 2019, CMS adopted a new rule as called for by the IMPACT Act that revises the discharge planning requirements applicable to our inpatient rehabilitation hospitals and home health agencies. Effective November 29, 2019, CMS now requires every hospital (including IRFs) to have a discharge planning process that focuses on patients’ goals and preferences and on preparing them and, as appropriate, their caregivers, to be active partners in their post-discharge care. For our hospitals, this rule requires instituting standardized procedures to identify those patients who are likely to suffer adverse health consequences upon discharge in the absence of adequate discharge planning and to provide a discharge planning evaluation for such patients to ensure that appropriate arrangements for post-hospital care will be made before discharge. At the time of discharge, a hospital must transfer or refer the patient, along with all necessary medical information pertaining to the patient’s current course of illness and treatment, post-discharge goals of care, and treatment preferences, to the appropriate post-acute care service providers and suppliers, facilities, agencies, and other outpatient service providers and practitioners responsible for the patient’s follow-up or ancillary care. Patients must also be informed of all post-acute providers in the area and, for patients enrolled in managed care organizations, in network providers must be identified if the hospital has that information. Additional information must be provided to patients who are discharged home and referred for home health agency services or who are referred to other post-acute care services.

For home health agencies, the final rule includes several new requirements, including that home health agencies develop and implement an effective discharge planning process. Home health agencies must also send certain medical and other information to the post-discharge facility or health care practitioner, and comply with requests for additional information as may be necessary for treatment of the patient made by the receiving facility or health care practitioner. The rule will likely require implementation of new processes and modification of existing discharge forms and reports, and patient visits may need to be extended in order to accommodate patient education. We expect to incur additional one-time and recurring expenses in both our segments to comply with the new requirements, but at this time we cannot predict what the final impact will be. In areas where we are not part of a managed care network with significant enrollment, this discharge planning rule may negatively affect the number of patients choosing us.

In accordance with requirements adopted pursuant to the IMPACT Act, CMS implemented requirements to publish certain Medicare spending per beneficiary measures for each inpatient rehabilitation hospital in October 2016 and each home health agency in January 2017. The intent of tracking and publishing this data is to evaluate a given provider’s payment efficiency relative to the efficiency of the national median provider in that provider’s post-acute segment. CMS believes this measure will encourage improved efficiency and coordination of care in the post-acute setting by holding providers accountable for Medicare resource use during an episode of care. However, the measures may be misleading as they do not incorporate patient outcomes associated with those resources used. CMS has not proposed to compare payment efficiency across provider segments.

In June 2019, CMS commenced the Home Health Review Choice Demonstration (“RCD”) in Illinois. RCD is intended to test whether pre-claim review improves methods for the identification, investigation, and prosecution of Medicare fraud and whether the pre-claim review helps reduce expenditures while maintaining or improving quality of care. Under RCD, providers may choose pre-claim review or post-payment review of all Medicare claims submitted or elect not to participate, in which case

they will incur a 25% payment reduction on all claims. If a home health agency elects to participate in the review and 90% or more of its claims are found to be valid during the six month pre-claim review period, that agency may then opt out of the RCD review, except for spot reviews of samples consisting of 5% of total claims. CMS implemented RCD in Ohio in September 2019. RCD is scheduled to expand to Texas in March 2020 and to North Carolina and Florida in May 2020. We operate agencies (representing approximately 44% of our home health Medicare claims) in these five states. We expect this demonstration project will require us to incur additional administrative and staffing costs and may impact the timeliness of claims payment given that Medicare administrative contractors in Illinois in a prior version of the project had difficulty processing pre-claim reviews on a timely basis. Accordingly, we may experience temporary decreases in *Net operating revenues* and in cash flow, or we may incur costs associated with patient care for which the Medicare claim is subsequently denied, which could have an adverse effect on our financial position, results of operations, and liquidity.

As discussed above, MedPAC makes healthcare policy recommendations to Congress and provides comments to CMS on Medicare payment related issues. Congress is not obligated to adopt MedPAC's recommendations, and, based on outcomes in previous years, there can be no assurance Congress will adopt any given MedPAC recommendation. For example, in March and June 2019, MedPAC issued reports to Congress again recommending several possible changes, which MedPAC has advocated previously, to various post-acute payment systems. One possible change discussed was an increase to outlier payments to be funded by reductions to non-outlier payments rates under the IRF-PPS. This change would adversely impact us compared to other IRF providers because our hospitals have also historically averaged significantly less Medicare reimbursement for high cost outlier patients than other providers have averaged.

We cannot predict what legislative or regulatory reforms or changes, if any, will ultimately be enacted, or the timing or effect any of those changes or reforms will have on us. If enacted, they may be challenging for all providers and have the effect of limiting Medicare beneficiaries' access to healthcare services and could have a material adverse impact on our *Net operating revenues*, financial position, results of operations, and cash flows. For additional discussion of healthcare reform and other factors affecting reimbursement for our services, see Item 1, *Business*, "Regulatory and Reimbursement Challenges" and "Sources of Revenues—Medicare Reimbursement."

Quality reporting requirements may negatively affect the Medicare reimbursement we receive.

The focus on alternative payment models and value-based purchasing of healthcare services has, in turn, led to more extensive quality of care reporting requirements. In many cases, the new reporting requirements are linked to reimbursement incentives. For example, under the 2010 Healthcare Reform Laws, CMS established new quality data reporting, effective October 1, 2012, for all IRFs. A facility's failure to submit the required quality data results in a two percentage point reduction to that facility's annual market basket increase factor for payments made for discharges in the subsequent Medicare fiscal year. Hospitals began submitting quality data to CMS in October 2012. All of our hospitals have met the reporting deadlines to date resulting in no corresponding reimbursement reductions. Similarly, home health and hospice agencies are required to submit quality data to CMS each year, and the failure to do so in accordance with the rules will result in a two percentage point reduction in their market basket updates. For 2020, we expect no more than seven of our home health and hospice agencies will incur a reduction in their reimbursement rates.

As noted above, the IMPACT Act mandated that CMS adopt several new quality reporting measures for the various post-acute provider types. The adoption of additional quality reporting measures to track and report will require additional time and expense and could affect reimbursement in the future. In healthcare generally, the burdens associated with collecting, recording, and reporting quality data are increasing. Currently, CMS requires IRF and home health providers to track and submit patient assessment data to support the calculation of 15 and 19 quality reporting measures, respectively.

In 2015, CMS established a five-year home health value-based purchasing model in nine states to test whether incentives for better care can improve outcomes in the delivery of home health services. The model, which began in 2016, applies a reduction or increase to current Medicare-certified home health agency payments, depending on quality performance, made to agencies in Massachusetts, Maryland, North Carolina, Florida, Washington, Arizona, Iowa, Nebraska, and Tennessee. As of December 31, 2019, we have 44 home health locations in those states, which account for 23% of our home health Medicare revenue. Performance will be assessed based on several process, outcome, and care satisfaction measures, and the payment adjustments to be applied on an annual basis are set forth in the table below:

| Performance Year | Calendar Year for Payment Adjustment | Maximum Payment Adjustment (+/-) |
|-------------------------|---|---|
| 2017 | 2019 | 5% |
| 2018 | 2020 | 6% |
| 2019 | 2021 | 7% |
| 2020 | 2022 | 8% |

To date, we have not experienced a decrease in *Net operating revenues* in excess of \$0.5 million in any year. Based on 2018 performance data, we anticipate almost no impact to our 2020 reimbursements. There can be no assurance all of our hospitals and agencies will meet quality reporting requirements or quality performance in the future which may result in one or more of our hospitals or agencies seeing a reduction in its Medicare reimbursements. Regardless, we, like other healthcare providers, are likely to incur additional expenses in an effort to comply with additional and changing quality reporting requirements.

Compliance with the extensive laws and government regulations applicable to healthcare providers requires substantial time, effort and expense, and if we fail to comply with them, we could suffer penalties or be required to make significant changes to our operations.

Healthcare providers are required to comply with extensive and complex laws and regulations at the federal, state, and local government levels. These laws and regulations relate to, among other things:

- licensure, certification, enrollments, and accreditation;
- policies, either at the national or local level, delineating what conditions must be met to qualify for reimbursement under Medicare (also referred to as coverage requirements);
- coding and billing for services;
- requirements of the 60% compliance threshold under the 2007 Medicare Act;
- relationships with physicians and other referral sources, including physician self-referral and anti-kickback laws;
- quality of medical care;
- use and maintenance of medical supplies and equipment;
- maintenance and security of patient information and medical records;
- minimum staffing;
- acquisition and dispensing of pharmaceuticals and controlled substances; and
- disposal of medical and hazardous waste.

In the future, changes in these laws or regulations or the manner in which they are enforced could subject our current or past practices to allegations of impropriety or illegality or could require us to make changes in our hospitals, equipment, personnel, services, capital expenditure programs, operating procedures, and contractual arrangements, as well as the way in which we deliver home health and hospice services. Those changes could also affect reimbursements as well as future training and staffing costs.

In addition to specific compliance-related laws and regulations, examples of regulatory changes that can affect our business, beyond direct changes to Medicare reimbursement rates, can be found from time to time in CMS's annual rulemaking.

For example, the final rule for the fiscal year 2010 IRF-PPS implemented new coverage requirements which provided in part that a patient medical record must document a reasonable expectation that, at the time of admission to an IRF, the patient generally required and was able to participate in the intensive rehabilitation therapy services uniquely provided at IRFs. CMS has also taken the position that a patient's medical file must appropriately document the rationale for the use of group therapies, as opposed to one-on-one therapy. Beginning on October 1, 2015, CMS instituted a new data collection requirement pursuant to which IRFs must capture the minutes and mode (individual, group, concurrent, or co-treatment) of therapy by specialty. CMS plans to use this data to potentially support future rulemaking in this area. Additionally, from time to time CMS has adopted changes in the medical conditions that will presumptively count toward the 60% compliance threshold to qualify for reimbursement as an inpatient rehabilitation hospital.

Of note, the HHS-OIG periodically updates a work plan that identifies areas of compliance focus. In recent years, HHS-OIG work plans for IRFs have focused on, among other items, the appropriate utilization of concurrent and group therapy and adverse and temporary harm events occurring in IRFs. The HHS-OIG website indicates active work plans will focus on incentives under the IRF-PPS to discharge patients prematurely to home health agencies and appropriate documentation to support claims by home health and hospice agencies. Another active work plan provides HHS-OIG will determine if hospice patients are receiving the required visits by registered nurses. In September 2016, the HHS-OIG released a report purporting to identify a high error rate (approximately 80% of claims) among inpatient rehabilitation hospital admissions in a small sample of 220 claims. Based on its findings, the HHS-OIG extrapolated the error rate to the universe of inpatient rehabilitation claims and, among other things, recommended reevaluation of the IRF-PPS. However, that HHS-OIG report involved an extremely small sample size, was not a random sample of cases, included some citations to coverage requirements that did not match actual regulations, appeared to conflate technical documentation requirements with medical necessity determinations, and was at odds with actual Medicare Administrative Contractors ("MACs") reviews of claims during that same timeframe which found substantially lower error rates. The HHS-OIG work plan, audit or similar future efforts could result in proposed changes to the payment systems for providers or increased denials of Medicare claims for patients notwithstanding the referring physicians' judgment that treatment is appropriate.

As the recent HHS-OIG work plans demonstrate, the clarity and completeness of each patient medical file, some of which is the work product of a physician not employed by us, are essential to demonstrating our compliance with various regulatory and reimbursement requirements. For example, to support the determination that a patient's IRF treatment was reasonable and necessary, the file must contain, among other things, an admitting physician's assessment of the patient as well as a post-admission assessment by the treating physician and other information from clinicians relating to the plan of care and the therapies being provided. These physicians are not employees. They exercise independent medical judgment. We and our hospital medical directors, who are independent contractors, provide training on a regular basis to the physicians who treat patients at our hospitals regarding appropriate documentation. However, we ultimately do not and cannot control the physicians' medical judgment. In connection with subsequent payment audits and investigations, there can be no assurance as to what opinion a third party may take regarding the status of patient files or the physicians' medical judgment evidenced in those files.

On March 4, 2013, we received document subpoenas from an office of the HHS-OIG addressed to four of our hospitals. On April 24, 2014, we received document subpoenas relating to an additional seven of our hospitals. Those subpoenas requested documents, including copies of patient medical records, related to reimbursement claims submitted during periods ranging from January 2008 through December 2013. The associated investigation led by DOJ was based on whistleblower claims of alleged improper or fraudulent claims submitted to Medicare and Medicaid and requested documents and materials relating to practices, procedures, protocols and policies of certain pre- and post-admissions activities at these hospitals including marketing functions, pre-admission screening, post-admission physician evaluations, patient assessment instruments, individualized patient plans of care, and compliance with the Medicare 60% rule. Under the Medicare rule commonly referred to as the "60% Rule," 60% or more of the patients of an IRF must have at least one of a specified list of medical conditions in order to be reimbursed at the IRF-PPS payment rates, rather than at the lower acute care hospital payment rates.

We settled the DOJ investigation, together with the related *qui tam* or whistleblower lawsuits, in 2019 for a total payment of \$48 million. In return for the settlement payment, the plaintiffs dismissed with prejudice their pending *qui tam* claims, and DOJ provided Encompass Health and all its subsidiaries with a release from civil liability. See Note 18, *Contingencies and Other Commitments*, to the accompanying consolidated financial statements for additional discussion of this matter.

Although we have invested, and will continue to invest, substantial time, effort, and expense in implementing and maintaining training programs as well as internal controls and procedures designed to ensure regulatory compliance, we have in the past been, and could in the future be, required to return portions of reimbursements for discharges alleged after the fact to

have not been appropriate under the applicable reimbursement rules and change our patient admissions practices going forward. We could also be subjected to other liabilities, including (1) criminal penalties, (2) civil penalties, including monetary penalties and the loss of our licenses to operate one or more of our hospitals, and (3) exclusion or suspension of one or more of our hospitals from participation in the Medicare, Medicaid, and other federal and state healthcare programs, which, if lengthy in duration and material to us, could potentially trigger a default under our credit agreement or debt instruments.

Because Medicare comprises a significant portion of our *Net operating revenues*, failure to comply with the laws and regulations governing the Medicare program and related matters, including anti-kickback and anti-fraud requirements, could materially and adversely affect us. As discussed above in connection with the 2010 Healthcare Reform Laws, the federal government has in the last couple of years made compliance enforcement and fighting healthcare fraud top priorities. In the past few years, DOJ and HHS as well as federal lawmakers have significantly increased efforts to ensure strict compliance with various reimbursement related regulations as well as combat healthcare fraud. DOJ has pursued and recovered record amounts based on alleged healthcare fraud. The increased enforcement efforts have frequently included aggressive arguments and interpretations of laws and regulations that pose risks for all providers. For example, the federal government has increasingly asserted that incidents of erroneous billing or record keeping may represent violations of the FCA. Human error and oversight in record keeping and documentation, particularly where those activities are the responsibility of non-employees, are always a risk in business, and healthcare providers and independent physicians are no different. Additionally, the federal government has been willing to challenge the medical judgment of independent physicians in determining issues such as the medical necessity of a given treatment plan.

Settlements of alleged violations or imposed reductions in reimbursements, substantial damages and other remedies assessed against us could have a material adverse effect on our business, financial position, results of operations, and cash flows. Even the assertion of a violation, depending on its nature, could have a material adverse effect upon our stock price or reputation and could cost us significant time and expense to defend.

Reimbursement claims are subject to various audits from time to time and such audits may negatively affect our operations and our cash flows from operations.

We receive a substantial portion of our revenues from the Medicare program. Medicare reimbursement claims made by healthcare providers, including inpatient rehabilitation hospitals as well as home health and hospice agencies, are subject to audit from time to time by governmental payors and their agents, such as MACs that act as fiscal intermediaries for all Medicare billings, auditors contracted by CMS, and insurance carriers, as well as HHS-OIG, CMS and state Medicaid programs. As noted above, the clarity and completeness of each patient medical file, some of which is the work product of a physician not employed by us, is essential to successfully challenging any payment denials. If the physicians working with our patients do not adequately document, among other things, their diagnoses and plans of care, our risks related to audits and payment denials in general are greater. Depending on the nature of the conduct found in such audits and whether the underlying conduct could be considered systemic, the resolution of these audits could have a material adverse effect in the aggregate on our financial position, results of operation and liquidity.

In the context of our inpatient rehabilitation business, one of the prevalent grounds for denying a claim or challenging a previously paid Medicare claim in an audit is that the patient's treatment in a hospital was not medically necessary. The medical record must support that both the documentation and coverage criteria requirements are met for the hospital stay to be considered medically reasonable and necessary. Medical necessity is an assessment by an independent physician of a patient's ability to tolerate and benefit from intensive multi-disciplinary therapy provided in an IRF setting. A Medicare claim may be denied or challenged based on an opinion of the auditor that the record did not evidence medical necessity for treatment in an IRF or lacked sufficient documentation to support the conclusion. In the past, we had a MAC that made determinations regarding medical necessity using its own uniquely restrictive interpretations of the CMS coverage rules or imposing otherwise arbitrary conditions not set out in the related rules, which resulted in a significant number of payment denials.

In some cases, we believe the reviewing party is not merely challenging the sufficiency of the medical record but is substituting its judgment of medical necessity for that of the attending physician or imposing documentation or other requirements that are not set out in the regulations. We argue that doing so is inappropriate and has no basis in law. When the government or its contractors reject the medical judgment of physicians or impose documentation and other requirements beyond the language of the statutes and regulations, patient access to inpatient rehabilitation as well as our Medicare reimbursement from the related claims may be adversely affected.

In August 2017, CMS announced the Targeted Probe and Educate ("TPE") initiative. Under the TPE initiative, MACs use data analysis to identify healthcare providers with high claim error rates and items and services that have high national error rates. Once a MAC selects a provider for claims review, the initial volume of claims review is limited to 20 to 40 claims. The TPE initiative includes up to three rounds of claims review with corresponding provider education and a subsequent period to

allow for improvement. If results do not improve sufficiently after three rounds, the MAC may refer the provider to CMS for further action, which may include extrapolation of error rates to a broader universe of claims or referral to a UPIC or RAC (defined below). As of December 31, 2019, none of our hospitals or agencies have progressed beyond the third round of reviews, so it is unclear how the review process after TPE would proceed. We cannot predict whether the TPE initiative or similar probes or reviews will affect our ability to collect a material amount of Medicare claims on a timely basis in the future.

CMS has developed and instituted various audit programs under which CMS contracts with private companies to conduct claims and medical record audits. These audits are in addition to those conducted by existing MACs. Some contractors are paid a percentage of the overpayments recovered. One type of audit contractor, the Recovery Audit Contractors (“RACs”), receive claims data directly from MACs on a monthly or quarterly basis and are authorized to review previously paid claims. The recovery auditor look back period is limited to six months from the date of service in cases where the hospital submits the claim within three months of the date of service. CMS has previously operated a demonstration project that expanded the RAC program to include prepayment review of Medicare fee-for-service claims from primarily acute care hospitals. It is unclear whether CMS intends to conduct RAC prepayment reviews in the future and if so, what providers and claims would be the focus of those reviews.

RAC audits of IRFs initially focused on coding errors but subsequently expanded to include medical necessity and billing accuracy reviews. To date, the Medicare payments subject to RAC audit requests represent less than 1% of our Medicare patient discharges from 2010 to 2019. We have appealed substantially all RAC denials arising from these audits using the same process we follow for appealing pre-payment denials by MACs. CMS has authorized RACs to conduct complex reviews of the medical records associated with both IRF and home health reimbursement claims.

CMS has also established contractors known as the Uniform Program Integrity Contractors (“UPICs,” formerly known as “ZPICs”). These contractors are successors to the Program Safeguard Contractors and conduct audits with a focus on potential fraud and abuse issues. Like the RACs, the UPICs conduct audits and have the ability to refer matters to the HHS-OIG or DOJ. Unlike RACs, however, UPICs do not receive a specific financial incentive based on the amount of the error. We have, from time to time, received UPIC record requests which have resulted in claim denials on paid claims. In some cases, the UPICs have extrapolated error rates to larger pools of our claims. In the most significant example to date, a UPIC denied less than \$2 million in claims but recouped an extrapolated amount of approximately \$30 million. We have appealed substantially all UPIC denials, including the recoupment noted above, arising from these audits using the same process we follow for appealing other denials by contractors and will continue to contest the use of extrapolation in any context.

Audits may lead to assertions that we have been underpaid or overpaid by Medicare or have submitted improper claims in some instances. Such assertions may require us to incur additional costs to respond to requests for records and defend the validity of payments and claims and may ultimately require us to refund any amounts determined to have been overpaid. In some circumstances auditors have the authority to extrapolate denial rationales to large pools of claims not actually audited, which could greatly increase the impact of the audit. As a result, we may suffer reduced profitability, and we may have to elect not to accept patients and conditions physicians believe can benefit from inpatient rehabilitation. We cannot predict when or how these audit programs will affect us.

Our third-party payors may also, from time to time, request audits of the amounts paid, or to be paid, to us. We could be adversely affected in some of the markets where we operate if the auditing payor alleges substantial overpayments were made to us due to coding errors or lack of documentation to support medical necessity determinations. Similarly, there can be no assurance that our current or future MACs will not take restrictive interpretations of Medicare coverage rules. Because one MAC has jurisdiction over a significant number of our hospitals and our hospitals derive a substantial portion of their revenue from Medicare, the adoption of restrictive interpretations of coverage rules by that MAC could result in a large number of payment denials and materially and adversely affect our financial position, results of operations, and cash flows.

The use of sub-regulatory guidance, statistical sampling, and extrapolation by CMS, Medicare contractors, HHS-OIG, and DOJ to deny claims, expand enforcement claims, and advocate for changes in reimbursement policy increases the risk that we could experience reduced revenue, suffer penalties, or be required to make significant changes to our operations.

Because Medicare comprises a significant portion of our *Net operating revenues*, failure to comply with the laws and regulations governing the Medicare program and related matters, including anti-kickback and anti-fraud requirements, could materially and adversely affect us. Our ability to operate in a compliant manner impacts the claims denials, compliance enforcement, and regulatory processes discussed in other risks above. The federal government’s reliance on sub-regulatory guidance, such as handbooks, FAQs, internal memoranda, and press releases, presents a unique challenge to compliance efforts. Such sub-regulatory guidance purports to explain validly promulgated regulations but often expands or supplements existing regulations without constitutionally and statutorily required notice and comment and other procedural protections. Without procedural protections, sub-regulatory guidance poses a risk above and beyond reasonable efforts to follow validly promulgated

regulations, particularly when the agency or MAC seeking to enforce such sub-regulatory guidance is not the agency or MAC issuing the guidance and therefore not as familiar with the substance and nature of the underlying regulations or even clinical issues involved.

Additionally, the federal government is increasingly turning to statistical sampling and extrapolation to expand claims denials and enforcement efforts and advocate for changes in reimbursement policy. Through sampling and extrapolation, the government takes a review of a small number of reimbursement claims and generalizes the results of that review to a much broader universe of claims, which can result in significant increases in the aggregate number and value of claims at issue. Increasing use of extrapolation can be found in payment review audits, such as those conducted by RACs and UPICs. In addition to payment reviews, government agencies may allege compliance violations, including submission of false claims, based on sampling and extrapolation and seek to change reimbursement policy. For example, the HHS-OIG issued a report in September 2018 purporting to identify a high error rate (approximately 80% of claims) among inpatient rehabilitation hospital admissions in a small sample of 220 claims. Based on its findings, the HHS-OIG extrapolated the error rate to the universe of inpatient rehabilitation claims and, among other things, recommended reevaluation of the IRF-PPS. However, the HHS-OIG report involves an extremely small sample size, is not a random sample of cases, includes incorrect references to coverage requirement regulations, appears to conflate technical documentation requirements with medical necessity determinations, and is at odds with actual MAC reviews of claims during that same timeframe which found substantially lower error rates. Notwithstanding the technical statistical flaws that can arise in sampling small groups of claims and the extremely problematic nature of extrapolation in the context of individualized decisions of medical judgment as some courts are beginning to note, sampling and extrapolation pose a growing risk to healthcare providers in the form of more significant claims of overpayments and increased legal costs to defend against these problematic regulatory practices. Any associated loss of revenue or increased legal costs could materially and adversely affect our financial position, results of operations, and cash flows.

Delays in the administrative appeals process associated with denied Medicare reimbursement claims may delay or reduce receipt of the related reimbursement amounts for services previously provided.

Ordinary course Medicare pre-payment denials by MACs, as well as denials resulting from widespread probes and audits, are subject to appeal by providers. We have historically appealed a majority of our denials. For claims we choose to appeal to an administrative law judge, we have historically experienced a success rate of approximately 70%. Due to the sheer number of appeals and various administrative inefficiencies, including a shortage of judges, appeals that are due to be resolved in a matter of months commonly take years to complete. For example, most of our appeals heard in 2019 related to denials received in 2013 and 2014. We believe the process for resolving individual Medicare payment claims that are denied will continue to take several years. Additionally, the number of new denials far exceeds the number of appeals resolved in recent years (except 2018) as shown in the following summary of our inpatient rehabilitation segment activity:

| | <u>New Denials</u> | <u>Collections of Previously Denied Claims</u> | <u>Revenue Reserve for New Denials</u> |
|-------------|--------------------|--|--|
| | | (In Millions) | |
| 2019 | \$20.2 | \$14.9 | \$6.1 |
| 2018 | 10.2 | 14.1 | 3.0 |
| 2017 | 43.6 | 27.6 | 13.0 |
| 2016 | 74.9 | 26.2 | 20.6 |
| 2015 | 79.0 | 15.0 | 20.6 |

We currently record our estimates for pre-payment denials and for post-payment audit denials that will ultimately not be collected as a component of *Net operating revenues*. See Note 1, *Summary of Significant Accounting Policies*, “Net Operating Revenues,” to the accompanying consolidated financial statements. Given the continuing or increasing delays along with the increasing number of denials in the backlog, we may experience decreases in *Net operating revenues* and/or decreases in cash flow as a result of increasing accounts receivable, which may in turn lead to a change in the patients and conditions we treat. Any of these impacts could have an adverse effect on our financial position, results of operations, and liquidity. Although Congress has considered legislation to reform and improve the Medicare audit and appeals process, we cannot predict what, if any, legislation will be adopted or what, if any, effect that legislation might have on the audit and appeals process.

In May 2014, the American Hospital Association (the “AHA”) and others filed a lawsuit seeking to compel HHS to meet the statutory deadlines for adjudication of denied Medicare claims. In December 2016, the presiding federal district court judge in the lawsuit ordered HHS to eliminate the backlog of appeals by the end of 2020. HHS appealed the federal district

court decision, and an appeals court remanded the order for further consideration of how HHS can eliminate the backlog. On November 1, 2018, the district court again ordered HHS to achieve the following reductions: 19% by the end of fiscal year 2019; 49% by the end of fiscal year 2020; 75% by the end of fiscal year 2021; and 100% by the end of fiscal year 2022. We cannot predict what, if any, further action CMS will take to reduce the backlog or how long it will take to resolve our pending appeals of payment denials that are part of the backlog.

The Hospital Pricing Transparency Rule could adversely affect our business and results of operations.

On November 15, 2019, CMS released a final rule on hospital price transparency requirements that become effective on January 1, 2021. This rule requires hospitals to publish on the internet in a consumer-friendly format their standard charges based on negotiated rates for all items and services and up to 300 common shoppable services. Shoppable services are those routinely provided in non-urgent situations and include those ancillary services that customarily accompany the primary service being provided. The charges for an individual item or service to be published include:

- gross charge (charge as reflected on a hospital’s chargemaster, absent any discounts),
- payer-specific negotiated charge (charge negotiated with a third party payer for an item or service),
- de-identified minimum negotiated charge (lowest charge negotiated with all third-party payers),
- de-identified maximum negotiated charge (highest charge negotiated with all third-party payers), and
- discounted cash price (charge that applies to an individual who pays cash).

This rule imposes significant initial and ongoing burdens on hospitals to track and publish various billing information. CMS estimates the total burden for hospitals to review and post their standard charges for the first year to be 150 man-hours and \$11,898.60 per hospital. In the event a hospital fails to comply with the new requirements and does not complete the prescribed corrective action, CMS may impose a civil monetary penalty of up to \$300 per day.

In December 2019, several hospital organizations, including the AHA, filed suit in federal court challenging this rule. The plaintiffs seek to invalidate the rule, but pending final adjudication, they asked the court to grant preliminary and permanent injunctions preventing HHS from enforcing the rule’s requirements beginning in 2021. We cannot predict the outcome of any legal challenges to this rule.

Many states have also passed or are debating legislation establishing price transparency websites or mandating that health plans or hospitals make price information available to consumers. The associated reporting obligations vary from state to state. We cannot predict what the adverse effects of this new CMS rule or any state law or regulation, such as the effect on relations with managed care payors and referral sources, may be for us. The burden of compliance with the associated requirements will have an adverse impact on our operations, results of operations, and cash flows.

Medicaid Fiscal Accountability Proposed Rule, if adopted as proposed by CMS, may adversely affect our business and results of operations.

On November 12, 2019, CMS released a proposed rule intended to increase oversight and transparency in Medicaid supplemental payment programs, including Disproportionate Share Hospital payments, and how states finance these programs. This proposed rule includes new policies to ensure that states are complying with the statutory restriction on using impermissible provider taxes or donations to fund their share of Medicaid reimbursements. Specifically, CMS expands the definition of impermissible tax to include provider assessments which have the effect of sorting providers by levels of Medicaid activity. Currently, inpatient rehabilitation hospitals are exempted based upon the hospital licensure category or services provided in 15 states within which we operate. If CMS ultimately finds that those exemptions are based upon low Medicaid utilization in comparison to other hospitals, generally acute care hospitals, subject to the taxes, our hospitals in those states could be subjected to new provider taxes. The proposed rule also seeks to eliminate mitigation agreements between healthcare providers and state or local governments which CMS believes result in a “net effect” of holding those providers harmless from a provider tax. In 2019, our hospitals received approximately \$10 million under mitigation agreements.

Because it is difficult to predict how any particular state might respond to the new requirements in this proposed rule should it be finalized as proposed, the impact on our Medicaid revenues cannot be determined. Some states may decide to limit federal matching dollars that could result in Medicaid reimbursement rate reductions, while other states may chose to maximize their Medicaid funding by increasing provider tax payments. Various changes in this proposal rule may adversely affect our *Net operating revenues*, results of operations, and cash flows.

We face intense competition for patients from other healthcare providers.

We operate in highly competitive, fragmented inpatient rehabilitation and home health and hospice industries. Although we are the nation's largest owner and operator of inpatient rehabilitation hospitals in terms of patients treated and discharged, revenues, and number of hospitals, in any particular market we may encounter competition from local or national entities with longer operating histories or other competitive advantages. For example, acute care hospitals, including those owned and operated by large public companies, may choose to expand or begin offering post-acute rehabilitation services. Given that approximately 90% of our hospitals' referrals come from acute care hospitals, that increase in competition could materially and adversely affect our admission referrals in the related markets. There are also large acute care systems that may have more resources available to compete than we have. Other providers of post-acute care services may attempt to become competitors in the future. For example, some nursing homes, including at least one public company operator, have been marketing themselves as offering certain rehabilitation services, even though nursing homes are not required to offer the same level of care, and are not licensed, as hospitals.

In the home health and hospice services industries, our primary competition comes from the home health division of a large insurance company, three other large public home health companies, locally owned private home health companies or acute care hospitals with adjunct home health services and typically varies from market to market. We also compete with a variety of other companies in providing home health and hospice services, some of which, including several large public companies, may have greater financial and other resources and may be more established in their respective communities. One public home health company has a strategy that emphasizes joint ventures with acute care hospitals, including a number of joint ventures with large systems, which frequently serve as the referral sources for home health patients in specific markets. Similarly, there is a large insurance company that offers Medicare Advantage coverage and owns a home health business. That insurance company is one of the largest providers of Medicare-certified skilled home health services. Additionally, nursing homes compete for referrals in some instances when the patients may be suitable for home-based care.

Competing companies may offer newer or different services from those we offer or have better relationships with referring physicians and may thereby attract patients who are presently, or would be candidates for, receiving our inpatient rehabilitation, home health, or hospice services. The other public companies and the insurance companies have or may obtain significantly greater marketing and financial resources or other advantages of scale than we have or may obtain. Relatively few barriers to entry exist in most of our local markets. Accordingly, other companies, including hospitals and other healthcare organizations that are not currently providing competing services, may expand their services to include inpatient rehabilitation, home health, hospice care, community care, or similar services.

There can be no assurance this competition, or other competition which we may encounter in the future, will not adversely affect our business, financial position, results of operations, or cash flows. In addition, from time to time, there are efforts in states with certificate of need ("CON") laws to weaken those laws, which could potentially increase competition in those states. For example, in 2019, Florida enacted legislation to repeal CON regulations for several provider types, including IRFs, in two stages. Effective July 1, 2019, existing IRFs became eligible to expand without first obtaining a CON. Effective July 1, 2021, new IRFs can be built without first obtaining a CON. Conversely, competition and statutory procedural requirements in some CON states may inhibit our ability to expand our operations in those states. For a breakdown of the CON status of the states and territories in which we have operations, see Item 2, *Properties*.

If we are unable to maintain or develop relationships with patient referral sources, our growth and profitability could be adversely affected.

Our success depends in large part on referrals from physicians, hospitals, case managers and other patient referral sources in the communities we serve. By law, referral sources cannot be contractually obligated to refer patients to any specific provider. However, there can be no assurance that individuals will not attempt to steer patients to competing post-acute providers or otherwise limit our access to potential referrals. The establishment of joint ventures or networks between referral sources, such as acute care hospitals, and other post-acute providers may hinder patient referrals to us. The growing emphasis on integrated care delivery across the healthcare continuum increases that risk.

Our growth and profitability depend on our ability to establish and maintain close working relationships with patient referral sources and to increase awareness and acceptance of the benefits of inpatient rehabilitation, home health, and hospice care by our referral sources and their patients. We cannot provide assurance that we will be able to maintain our existing referral source relationships or that we will be able to develop and maintain new relationships in existing or new markets. Our loss of, or failure to maintain, existing relationships or our failure to develop new relationships could adversely affect our ability to grow our business and operate profitably.

Efforts to reduce payments to healthcare providers undertaken by third-party payors, conveners, and referral sources may adversely affect our revenues and profitability.

Health insurers and managed care companies, including Medicare Advantage plans, may utilize certain third parties, known as conveners, to attempt to control costs. Conveners offer patient placement and care transition services to those payors as well as bundled payment participants, ACOs, and other healthcare providers with the intent of managing post-acute utilization and associated costs. Conveners may influence referral source decisions on which post-acute setting to recommend, as well as how long to remain in a particular setting. Given their focus on perceived financial savings, conveners customarily suggest that patients avoid higher acuity post-acute settings altogether or move as soon as practicable to lower acuity settings. Conveners are not healthcare providers and may suggest a post-acute setting or duration of care that may not be appropriate from a clinical perspective potentially resulting in a costly acute care hospital readmission.

We also depend on referrals from physicians, acute care hospitals, and other healthcare providers in the communities we serve. As a result of various alternative payment models, many referral sources are becoming increasingly focused on reducing post-acute costs by eliminating post-acute care referrals or referring patients to post-acute settings other than perceived high-cost rehabilitation hospitals, sometimes without understanding the potential impact on patient outcomes over an entire episode of care. Our ability to attract patients could be adversely affected if any of our hospitals or agencies fail to provide or maintain a reputation for providing high-quality care on a cost-effective basis as compared to other providers.

We may have difficulty completing investments and transactions that increase our capacity consistent with our growth strategy.

We are selectively pursuing strategic acquisitions of, and in some instances joint ventures with, other healthcare providers. We may face limitations on our ability to identify sufficient acquisition or other development targets and to complete those transactions to meet goals. In the home health industry, there is significant competition among acquirors attempting to secure the acquisition of companies that have a large number of locations. In the inpatient rehabilitation industry, the costs of constructing new hospitals may be increasing faster than the general inflation rate. In many states, the need to obtain governmental approvals, such as a CON or an approval of a change in ownership, may represent a significant obstacle to completing transactions. Additionally, in states with CON laws, it is not unusual for third-party providers to challenge the initial awards of CONs, the increase in the number of approved beds in an existing CON, or the expansion of the area served, and the adjudication of those challenges and related appeals may take many years. These factors may increase the cost to us associated with any acquisition or *de novo* development or prevent us from completing one or more acquisitions or *de novo* developments.

We may make investments or complete transactions that could expose us to unforeseen risks and liabilities.

Investments, acquisitions, joint ventures or other development opportunities identified and completed may involve material cash expenditures, debt incurrence, operating losses, amortization of certain intangible assets of acquired companies, issuances of equity securities, liabilities, and expenses, some of which are unforeseen, that could materially and adversely affect our business, financial position, results of operations and liquidity. Acquisitions, investments, and joint ventures involve numerous risks, including:

- limitations, including state CONs as well as anti-trust, Medicare, and other regulatory approval requirements, on our ability to complete such acquisitions, particularly those involving not-for-profit providers, on terms, timetables, and valuations reasonable to us;
- limitations in obtaining financing for acquisitions at a cost reasonable to us;
- difficulties integrating acquired operations, personnel, and information systems, and in realizing projected revenues, efficiencies and cost savings, or returns on invested capital;
- entry into markets, businesses or services in which we may have little or no experience;
- diversion of business resources or management's attention from ongoing business operations; and
- exposure to undisclosed or unforeseen liabilities of acquired operations, including liabilities for failure to comply with healthcare laws and anti-trust considerations in specific markets as well as risks and liabilities related to previously compromised information systems.

As part of our development activities, we intend to build new, or *de novo*, inpatient rehabilitation hospitals. The construction of new hospitals involves numerous risks, including the receipt of all zoning and other regulatory approvals, such as a CON where necessary, construction delays and cost over-runs and unforeseen environmental liability exposure. Once built,

new hospitals must undergo the state and Medicare certification process, the duration of which may be beyond our control. We may be unable to operate newly constructed hospitals as profitably as expected, and those hospitals may involve significant additional cash expenditures and operating expenses that could, in the aggregate, have an adverse effect on our business, financial position, results of operations, and cash flows.

We may not be able to successfully integrate acquisitions or realize the anticipated benefits of any acquisitions.

We may undertake strategic acquisitions from time to time. For example, we completed the acquisitions of the home health and hospice business of Camellia Healthcare and Alacare Home Health and Hospice in 2018 and 2019, respectively. Prior to consummation of any acquisition, the acquired business will have operated independently of us, with its own procedures, corporate culture, locations, employees and systems. We expect to integrate acquired businesses into our existing business utilizing certain common information systems, operating procedures, administrative functions, financial and internal controls and human resources practices to the extent practicable. There may be substantial difficulties, costs and delays involved in the integration of an acquired business with our business. Additionally, an acquisition could cause disruption to our business and operations and our relationships with customers, employees and other parties. In some cases, the acquired business has itself grown through acquisitions, and there may be legacy systems, operating policies and procedures, financial and administrative practices yet to be fully integrated. To the extent we are attempting to integrate multiple businesses at the same time, we may not be able to do so as efficiently or effectively as we initially anticipate. The failure to successfully integrate on a timely basis any acquired business with our existing business could have an adverse effect on our business, financial position, results of operations, and cash flows.

We anticipate our acquisitions will result in benefits including, among other things, increased revenues and an enhanced ability to provide a continuum of facility-based and home-based post-acute healthcare services. However, acquired businesses may not contribute to our revenues or earnings to the extent anticipated, and any synergies we expect may not be realized after the acquisitions have been completed. If the acquired businesses underperform and any underperformance is other than temporary, we may be required to take an impairment charge. Failure to achieve the anticipated benefits could result in the diversion of management's time and energy and could have an adverse effect on our business, financial position, results of operations, and cash flows.

Competition for staffing, shortages of qualified personnel, union activity or other factors may increase our labor costs and reduce profitability.

Our operations are dependent on the efforts, abilities, and experience of our medical personnel, such as physical therapists, occupational therapists, speech pathologists, nurses, and other healthcare professionals. We compete with other healthcare providers in recruiting and retaining qualified personnel responsible for the daily operations of each of our locations. In some markets, the lack of availability of medical personnel is a significant operating issue facing all healthcare providers. This issue may be exacerbated if immigration is more limited in the future. A shortage may require us to continue to enhance wages and benefits to recruit and retain qualified personnel or to contract for more expensive temporary personnel. We also depend on the available labor pool of semi-skilled and unskilled employees in each of the markets in which we operate.

If our labor costs increase, we may not experience reimbursement rate or pricing increases to offset these additional costs. Because a significant percentage of our revenues consists of fixed, prospective payments, our ability to pass along increased labor costs is limited. In particular, if labor costs rise at an annual rate greater than our net annual market basket update from Medicare, as is expected to happen in 2020, or we experience a significant shift in our payor mix to lower rate payors such as Medicaid, our results of operations and cash flows will be adversely affected. Conversely, decreases in reimbursement revenues, such as with sequestration and the PDGM reimbursement rate reductions, may limit our ability to increase compensation or benefits to the extent necessary to retain key employees, in turn increasing our turnover and associated costs. Union activity is another factor that may contribute to increased labor costs. We currently have a minimal number of union employees, so an increase in labor union activity could have a significant impact on our labor costs. Our failure to recruit and retain qualified medical personnel, or to control our labor costs, could have a material adverse effect on our business, financial position, results of operations, and cash flows.

We are a defendant in various lawsuits, and may be subject to liability under qui tam cases, the outcome of which could have a material adverse effect on us.

We operate in a highly regulated industry in which healthcare providers are routinely subject to litigation. As a result, various lawsuits, claims, and legal and regulatory proceedings have been and can be expected to be instituted or asserted against us. We are a defendant in a number of lawsuits, most of which are general and professional liability matters inherent in treating patients with medical conditions. Our more significant lawsuits and investigations, including the recently settled DOJ

investigation, are discussed in Note 18, *Contingencies and Other Commitments*, to the accompanying consolidated financial statements.

Substantial damages, fines, or other remedies assessed against us or agreed to in settlements could have a material adverse effect on our business, financial position, results of operations, and cash flows, including indirectly as a result of the covenant defaults under our credit agreement or debt instruments or other claims such as those in securities actions. Additionally, the costs of defending litigation and investigations, even if frivolous or nonmeritorious, could be significant.

The FCA allows private citizens, called “relators,” to institute civil proceedings on behalf of the United States alleging violations of the FCA. These lawsuits, also known as “whistleblower” or “*qui tam*” actions, can involve significant monetary damages, fines, attorneys’ fees and the award of bounties to the relators who successfully prosecute or bring these suits to the government. *Qui tam* cases are sealed at the time of filing, which means knowledge of the information contained in the complaint typically is limited to the relator, the federal government, and the presiding court. The defendant in a *qui tam* action may remain unaware of the existence of a sealed complaint for years. While the complaint is under seal, the government reviews the merits of the case and may conduct a broad investigation and seek discovery from the defendant and other parties before deciding whether to intervene in the case and take the lead on litigating the claims. The court lifts the seal when the government makes its decision on whether to intervene. If the government decides not to intervene, the relator may elect to continue to pursue the lawsuit individually on behalf of the government.

The settled DOJ investigation originated in 2013 based on the allegations made by relators. The seven-year investigation produced no evidence of falsity or fraudulent conduct. Eventually, the court overseeing the *qui tam* actions refused to give DOJ more time to decide whether to intervene and unsealed the cases. DOJ chose not to intervene and prosecute the matter. Even when a matter is without merit, as we believe was the case with this investigation, we may still incur significant costs of defense or settlement costs or both.

It is possible that other *qui tam* lawsuits have been filed against us, which suits remain under seal, or that we are unaware of such filings or precluded by existing law or court order from discussing or disclosing the filing of such suits. We may be subject to liability under one or more undisclosed *qui tam* cases brought pursuant to the FCA.

The healthcare services we provide involve substantial risk of general and professional liability. Inpatient rehabilitative care involves three hours of daily intensive therapy for patients who are usually elderly and come to our hospitals with debilitating medical conditions. Our clinicians must frequently assist patients who have difficulty with mobility. Home care services, by their very nature, are provided in an environment that is not in the substantial control of the healthcare provider. On any given day, we have thousands of care providers driving to and from the homes of patients. We cannot predict the impact any claims arising out of the travel, the home visits or the care being provided (regardless of their ultimate outcomes) could have on our business or reputation or on our ability to attract and retain patients and employees. We also cannot predict the adequacy of any reserves for such losses or recoveries from any insurance or re-insurance policies.

We insure a substantial portion of our professional, general, and workers’ compensation liability risks, which may not include risks related to regulatory fines and penalties, through our captive insurance subsidiary, as discussed further in Note 11, *Self-Insured Risks*, to the accompanying consolidated financial statements. Changes in the number of these liability claims and the cost to resolve them impact the reserves for these risks. A variance between our estimated and actual number of claims or average cost per claim could have a material impact, either favorable or unfavorable, on the adequacy of the reserves for these liability risks, which could have an effect on our financial position and results of operations.

The proper function, availability, and security of our information systems are critical to our business.

We are and will remain dependent on the proper function, availability and security of our and third-party information systems, including our electronic clinical information system, referred to as ACE-IT, which plays a substantial role in the operations of the hospitals, and the information systems currently in use by our home health and hospice business. We undertake measures to protect the safety and security of our information systems and the data maintained within those systems, and we periodically test the adequacy of our security and disaster recovery measures. We have implemented administrative, technical and physical controls on our systems and devices in an attempt to prevent unauthorized access to that data, which includes patient information subject to the protections of the Health Insurance Portability and Accountability Act of 1996 and the Health Information Technology for Economic and Clinical Health Act and other sensitive information. For additional discussion of these laws, see Item 1, *Business*, “Regulation.”

We expend significant capital to protect against the threat of security breaches, including cyber attacks, email phishing schemes, malware and ransomware. Substantial additional expenditures may be required to respond to and remediate any problems caused by breaches, including the unauthorized access to or theft of patient data and protected health information

stored in our information systems and the introduction of computer malware or ransomware to our systems. We also provide our employees annual training and regular reminders on important measures they can take to prevent breaches and other cyber threats, including phishing schemes. We routinely identify attempts to gain unauthorized access to our systems. However, given the rapidly evolving nature and proliferation of cyber threats, there can be no assurance our training and network security measures or other controls will detect, prevent or remediate security or data breaches in a timely manner or otherwise prevent unauthorized access to, damage to, or interruption of our systems and operations. For example, it has been widely reported that many well-organized international interests, in certain cases with the backing of sovereign governments, are targeting the theft of patient information through the use of advance persistent threats. Similarly, in recent years, several hospitals have reported being victims of ransomware attacks in which they lost access to their systems, including clinical systems, during the course of the attacks. We are likely to face attempted attacks in the future. Accordingly, we may be vulnerable to losses associated with the improper functioning, breach or unavailability of our and our vendors' information systems, including systems used in acquired operations, and third-party systems we use. In January 2018, news reports widely circulated the discovery of two vulnerabilities, named Meltdown and Spectre, found in the most commonly used microchip processors. These vulnerabilities which affect nearly all computers could allow unauthorized parties to circumvent system protections exposing nearly any data device processes, such as passwords, proprietary information, or encrypted communications.

To date, we are not aware of having experienced a material cyber breach or attack. However, given the increasing cyber security threats in the healthcare industry, there can be no assurance we will not experience business interruptions; data loss, ransom, misappropriation or corruption; theft or misuse of proprietary, patient or other personally identifiable information; or litigation, investigation, or regulatory action related to any of those, any of which could have a material adverse effect on our patient care, financial position, and results of operations and harm our business reputation.

A compromise of our network security measures or other controls, or of those businesses or vendors with whom we interact, which results in confidential information being accessed, obtained, damaged or used by unauthorized persons or unavailability of systems necessary to the operation of our business, could impact patient care, harm our reputation, and expose us to significant remedial costs as well as regulatory actions (fines and penalties) and claims from patients, financial institutions, regulatory and law enforcement agencies, and other persons, any of which could have a material adverse effect on our business, financial position, results of operations and cash flows. The nature of our business requires the sharing of protected health information and other sensitive information among employees and healthcare partners, many of whom carry and access portable devices outside of our physical locations, which in turn increases the risk of loss, theft or inadvertent disclosure of that information. Moreover, a security breach, or threat thereof, could require that we expend significant resources to repair or improve our information systems and infrastructure and could distract management and other key personnel from performing their primary operational duties. In the case of a material breach or cyber attack, the associated expenses and losses may exceed our current insurance coverage for such events. Some adverse consequences are not insurable, such as reputational harm and third-party business interruption. Failure to maintain proper function, security, or availability of our information systems or protect our data against unauthorized access could have a material adverse effect on our business, financial position, results of operations, and cash flows.

ACE-IT is subject to a licensing, implementation, technology hosting, and support agreement with Cerner Corporation. Similarly, we have an agreement to license, host, and support a comprehensive home care management and clinical information system, Homecare HomebaseSM. In addition, we have a number of partners and non-software vendors with whom we share data in order to provide patient care and otherwise operate our business. In fact, federal laws and regulations require interoperability among healthcare entities in many circumstances. Our inability, or the inability of our partners or vendors, to continue to maintain and upgrade information systems, software, and hardware could disrupt or reduce the efficiency of our operations, including affecting patient care. A security breach or other system failure involving Cerner, Homecare Homebase or another third-party with whom we share data or system connectivity could compromise our patient data or proprietary information or disrupt our ability to operate. In addition, costs, unexpected problems, and interruptions associated with the implementation or transition to new systems or technology or with adequate support of those systems or technology across numerous hospitals and agencies could have a material adverse effect on our business, financial position, results of operations, and cash flows.

Efforts to comply with regulatory mandates to increase the use of electronic health data and health system interoperability may lead to negative publicity which could adversely affect our business.

For many years, a primary focus of the healthcare industry has been to increase the use of electronic health records, or "EHR," and the sharing of the health data among providers, payors and other members of the industry. The federal government has been a significant driver of that initiative through rules and regulations. In 2009, as part of the Health Information Technology for Economic and Clinical Health (HITECH) Act, the federal government set aside \$27 billion of incentives for hospitals and providers to adopt EHR systems. In 2019, CMS proposed policy changes supporting its MyHealthEData initiative to improve patient access and advance electronic data exchange and care coordination throughout the healthcare system. The

Interoperability and Patient Access Proposed Rule seeks to make patient data more useful and transferable through open, secure, standardized, and machine-readable formats while reducing restrictive burdens on healthcare providers. In addition to this proposed rule, CMS released a request for information to obtain feedback on interoperability and health information technology adoption in post-acute care settings. As noted in connection with the release of the proposed rule, CMS seeks to break down existing barriers to important data exchange in all aspects of healthcare from patients to providers to payers and researchers.

The goals of increased use of electronic health data and interoperability are improved quality of care and lower healthcare costs generally. However, increased use of electronic health data and interoperability inherently magnifies the risk of security breaches involving that data and information systems, which risk is discussed above. Additionally, the sharing of health information, that is interoperability, has received increasingly negative publicity. There is at least one well publicized instance where organizations received significant negative publicity for sharing health data despite having appeared to comply in all respects with privacy law. There can be no assurance that our efforts to improve the care we deliver and to comply with the law through increasing use of electronic data and system interoperability will not receive negative publicity that may materially and adversely affect our ability to get patient referrals or enter into joint ventures with other providers or may lead to greater regulatory scrutiny. Negative publicity may also lead to federal or state regulation that conflicts with current federal policy and interferes with the healthcare industry's efforts to improve care and reduce costs through use of electronic data and interoperability.

Successful execution of our current business plan depends on our key personnel.

The success of our current business plan depends in large part upon the leadership and performance of our executive management team and other key employees and our ability to retain and motivate these individuals. We rely upon their ability, expertise, experience, judgment, discretion, integrity and good faith. However, there is no guarantee we will be able to retain our key personnel. Our only employment agreements are with members of the home health and hospice senior management team. We entered into those agreements in connection with the acquisition of that business at the end of 2014. They expired at the end of 2019, but in the fourth quarter of 2019, we executed updated forms of the agreements with terms of three years. If we are unable to retain one or more key members of management, we may be unable to replace them with personnel of comparable experience in, or knowledge of, the healthcare provider industry or our specific post-acute segments. The loss of the services of any of these individuals could prevent us from successfully executing our business plan and could have a material adverse effect on our business and results of operations.

A pandemic, epidemic or other widespread outbreak of an infectious disease could adversely affect our operations.

If a pandemic, epidemic, or other widespread outbreak of an infectious disease or other public health crisis were to occur in areas in which we operate, our operations could be materially and adversely affected. State or local health departments may require us or a significant referral source for us to close one or more hospitals or limit patient admissions as a precautionary measure in a crisis to avoid the spread of a disease. Patients may choose to avoid elective procedures and hospital stays during a health crisis. Further, a pandemic, epidemic or other widespread outbreak might adversely affect our operations by causing staffing and supply shortages. We have infectious disease protocols, but the exact nature of a crisis stemming from a pandemic, epidemic or other widespread outbreak and how it would affect us is difficult to predict and could adversely affect our operations.

Changes in our payor mix or the acuity of our patients could adversely affect our Net operating revenues or our profitability.

Many factors affect pricing of our services and, in turn, our revenues. For example, in the inpatient rehabilitation segment, these factors include the treating facility's urban or rural status, the length of stay, the payor and its applicable rate of reimbursement, and the patient's medical condition and impairment status (acuity). In recent years, our inpatient rehabilitation segment has experienced a shift in payor mix to a slightly larger percentage of Medicaid patients. We could also experience a shift to a lower average patient acuity. Both of these shifts adversely affect pricing growth. See the "Segment Results of Operations—Inpatient Rehabilitation—Net Operating Revenues" section of Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*. The expansion and growth of Medicaid resulting from provisions of the 2010 Healthcare Reform Laws have increased the number of those patients coming to us. Medicaid reimbursement rates are almost always the lowest among those of our payors, and frequently Medicaid patients come to us with other complicating conditions that make treatment more difficult and costly. We do not anticipate that Medicaid will continue to grow at the rate it has in recent years. However, we cannot predict what, if any, Medicaid changes will be adopted. We cannot predict whether our payor mix will shift to lower reimbursement rate payors. In the future, we may experience shifts in our payor mix or the acuity of our patients that could adversely affect our pricing, *Net operating revenues*, and profitability.

We may incur additional indebtedness in the future, and that debt or the associated increased leverage may have negative consequences for our business.

As of December 31, 2019, we have approximately \$2.7 billion of long-term debt outstanding (including that portion of long-term debt classified as current and excluding \$384.1 million in finance leases). See Note 10, *Long-term Debt*, to the accompanying consolidated financial statements. Subject to specified limitations, our credit agreement and the indentures governing our debt securities permit us and our subsidiaries to incur material additional debt. If new debt is added to our current debt levels, the risks described here could intensify.

Our indebtedness could have important consequences, including:

- limiting our ability to borrow additional amounts to fund working capital, capital expenditures, acquisitions, debt service requirements, execution of our business strategy and other general corporate purposes;
- making us more vulnerable to adverse changes in general economic, industry and competitive conditions, in government regulation and in our business by limiting our flexibility in planning for, and making it more difficult for us to react quickly to, changing conditions;
- placing us at a competitive disadvantage compared with competing providers that have less debt; and
- exposing us to risks inherent in interest rate fluctuations for outstanding amounts under our credit facility, which could result in higher interest expense in the event of increases in interest rates, as discussed in Item 7A, *Quantitative and Qualitative Disclosures about Market Risk*.

We are subject to contingent liabilities, prevailing economic conditions, and financial, business, and other factors beyond our control. Although we expect to make scheduled interest payments and principal reductions, we cannot provide assurance that changes in our business or other factors will not occur that may have the effect of preventing us from satisfying obligations under our credit agreement or debt instruments. If we are unable to generate sufficient cash flow from operations in the future to service our debt and meet our other needs or have an unanticipated cash payment obligation, we may have to refinance all or a portion of our debt, obtain additional financing or reduce expenditures or sell assets we deem necessary to our business. We cannot provide assurance these measures would be possible or any additional financing could be obtained.

The restrictive covenants in our credit agreement and the indentures governing our senior notes could affect our ability to execute aspects of our business plan successfully.

The terms of our credit agreement and the indentures governing our senior notes do, and our future debt instruments may, contain various provisions that limit our ability and the ability of certain of our subsidiaries to, among other things:

- incur or guarantee indebtedness;
- pay dividends on, or redeem or repurchase, our capital stock; or repay, redeem or repurchase our subordinated obligations;
- issue or sell certain types of preferred stock;
- make investments;
- incur obligations that restrict the ability of our subsidiaries to make dividends or other payments to us;
- sell assets;
- engage in transactions with affiliates;
- create certain liens;
- enter into sale/leaseback transactions; and
- merge, consolidate, or transfer all or substantially all of our assets.

These covenants could adversely affect our ability to finance our future operations or capital needs and pursue available business opportunities. For additional discussion of our material debt covenants, see the “Liquidity and Capital

Resources” section of Item 7, *Management’s Discussion and Analysis of Financial Condition and Results of Operations*, and Note 10, *Long-term Debt*, to the accompanying consolidated financial statements.

In addition, our credit agreement requires us to maintain specified financial ratios and satisfy certain financial condition tests. See the “Liquidity and Capital Resources” section of Item 7, *Management’s Discussion and Analysis of Financial Condition and Results of Operations*, and Note 10, *Long-term Debt*, to the accompanying consolidated financial statements. Although we remained in compliance with the financial ratios and financial condition tests as of December 31, 2019, we cannot provide assurance we will continue to do so. Events beyond our control, including changes in general economic and business conditions, may affect our ability to meet those financial ratios and financial condition tests. A severe downturn in earnings, failure to realize anticipated earnings from acquisitions, or, if we have outstanding borrowings under our credit facility at the time, a rapid increase in interest rates could impair our ability to comply with those financial ratios and financial condition tests and we may need to obtain waivers from the required proportion of the lenders to avoid being in default. If we try to obtain a waiver or other relief from the required lenders, we may not be able to obtain it or such relief might have a material cost to us or be on terms less favorable than those in our existing debt. If a default occurs, the lenders could exercise their rights, including declaring all the funds borrowed (together with accrued and unpaid interest) to be immediately due and payable, terminating their commitments or instituting foreclosure proceedings against our assets, which, in turn, could cause the default and acceleration of the maturity of our other indebtedness. A breach of any other restrictive covenants contained in our credit agreement or the indentures governing our senior notes would also (after giving effect to applicable grace periods, if any) result in an event of default with the same outcome.

As of December 31, 2019, approximately 70% of our consolidated *Property and equipment, net* was held by our company and its guarantor subsidiaries under its credit agreement. See Note 10, *Long-term Debt*, and Note 21, *Condensed Consolidating Financial Information*, to the accompanying consolidated financial statements, and Item 2, *Properties*.

Uncertainty in the capital markets could adversely affect our ability to carry out our development objectives.

In recent years, the global and sovereign credit markets have experienced significant disruptions, and the debt ceiling and federal budget disputes in the United States as well as international trade disputes affected capital markets. Future market shocks could negatively affect the availability or terms of certain types of debt and equity financing, including access to revolving lines of credit. Future business needs combined with market conditions at the time may cause us to seek alternative sources of potentially less attractive financing and may require us to adjust our business plan accordingly. For example, tight credit markets, such as might result from further turmoil in the sovereign debt markets, would likely make additional financing more expensive and difficult to obtain. The inability to obtain additional financing at attractive rates or prices could have a material adverse effect on our financial performance or our growth opportunities.

As a result of credit market uncertainty, we could face potential exposure to counterparties who may be unable to adequately service our needs, including the ability of the lenders under our credit agreement to provide liquidity when needed. We monitor the financial strength of our depositories, creditors, and insurance carriers using publicly available information, as well as qualitative inputs.

If any of our hospitals or home health or hospice agencies fail to comply with the Medicare enrollment requirements or conditions of participation, that hospital or agency could be terminated from the Medicare program.

Each of our hospitals and home health and hospice agencies must comply with extensive enrollment requirements and conditions of participation for the Medicare program. If any fail to meet any of the Medicare enrollment requirements or conditions of participation, we may receive a notice of deficiency from the applicable survey agency or contractor, as applicable. If that hospital or agency then fails to institute an acceptable plan of correction and correct the deficiency within the applicable correction period, it could lose the ability to bill Medicare. A hospital or agency could be terminated from the Medicare program if it fails to address the deficiency within the applicable correction period. If CMS terminates one hospital or agency, it may increase its scrutiny of others under common control.

On September 5, 2019, CMS released a final rule that will implement over a period time additional provider enrollment provisions and create several new revocation and denial authorities in an attempt to bolster CMS’ efforts to prevent waste, fraud and abuse. A few provisions of this new rule could significantly increase the complexity of filing enrollment applications for all of our provider entities, including increased burden related to tracking and identifying required reporting data from our joint venture partners. This rule requires Medicare and Medicaid providers and suppliers to disclose any current or previous (in the last five years), direct or indirect affiliation with a provider or supplier that has ever had a disclosable event. A disclosable event is any uncollected debt to Medicare or Medicaid, payment suspension under a federal health care program, denial, revocation or termination of enrollment (even if it is under appeal), or exclusion by the OIG from participation in a federal health care program. The rule also broadens the definition of an affiliation, including many indirect ownership or control

situations such as ownership interests in a publicly traded company. If CMS determines an affiliation with a disclosable event poses an undue risk of fraud, waste or abuse, then the provider reporting that affiliation may be subject to exclusion from Medicare. Currently, information regarding uncollected debt, payment suspensions and enrollment actions are not generally available, so obtaining such information on affiliates could prove difficult or impossible in some situations. CMS intends to issue further guidance on the level of effort it expects providers to undertake to uncover information on their affiliates.

Under this new rule, CMS may revoke a provider's Medicare enrollment, including all of the provider's locations, if the provider bills for services performed at or items furnished from one location that it knew or should have known did not comply with Medicare enrollment requirements, including making the disclosures discussed above. CMS has the ability to prevent applicants from enrolling in the program for up to three years if a provider is found to have submitted false or misleading information in its initial enrollment application. Additionally, CMS can now block providers and suppliers who are revoked from re-entering the Medicare program for up to 10 years. CMS may also revoke a provider's enrollment if it fails to report on a timely basis any change in ownership or control, revocation or suspension of a federal or state license or certification, or any other change in its enrollment data.

Any termination of one or more of our hospitals or agencies from the Medicare program for failure to satisfy the enrollment requirements or conditions of participation could materially adversely affect our business, financial position, results of operations, and cash flows.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

We currently maintain our principal executive office at 9001 Liberty Parkway, Birmingham, Alabama, the lease for which expires in 2033 and has multiple renewal options for additional five-year terms.

In addition to our principal executive office, as of December 31, 2019, we leased or owned through various consolidated entities 453 physical locations to operate or support our business. All but three of our hospital leases, which represent the largest portion of our rent expense, have at least five years remaining on their terms after taking into consideration one or more renewal options. Our consolidated entities associated with our leased hospitals are generally responsible for property taxes, property and casualty insurance, and routine maintenance expenses. Our home health and hospice business is based in Dallas, Texas where it leases office space for corporate and administrative functions. The remaining home health and hospice locations are in the localities served by that business and are subject to relatively small space leases, primarily 5,000 square feet or less. Those space leases are typically five years or less in term. We do not believe any one of our individual properties is material to our consolidated operations.

The following table sets forth information regarding our hospitals and our home health and hospice locations (excluding two of the home health locations that operate as joint ventures which we account for using the equity method of accounting) as of December 31, 2019:

| State | Licensed Beds | Number of Hospitals | | | Total | Home Health and Hospice Locations |
|-------------------|---------------|-------------------------|--------------------------------|--------------------------|------------|-----------------------------------|

- * Hospital certificate of need state or U.S. territory. In Florida, existing IRFs became eligible to expand without first obtaining a CON effective July 1, 2019, and new IRFs may operate without first obtaining a CON effective July 1, 2021.
- + Home health certificate of need state or U.S. territory.
- (1) The inpatient rehabilitation hospitals in Augusta and Newnan, Georgia are parties to industrial development bond financings that reduce the *ad valorem* taxes payable by each hospital. In connection with each of these bond structures, title to the related property is held by the local development authority. We lease the related hospital property and hold the bonds issued by that authority, the payment on which equals the amount payable under the lease. We may terminate each bond financing and the associated lease at any time at our option without penalty, and fee title to the related hospital property will return to us.
- (2) This total includes 245 locations where we provide home health services and 83 locations where we provide hospice services.

Our principal executive office, hospitals, and other properties are suitable for their respective uses and are, in all material respects, adequate for our present needs. Information regarding the utilization of our licensed beds and other operating statistics can be found in Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

Item 3. Legal Proceedings

We provide services in the highly regulated healthcare industry. In the ordinary course of our business, we are a party to various legal actions, proceedings, and claims as well as regulatory and other governmental audits and investigations. These matters could potentially subject us to sanctions, damages, recoupments, fines, and other penalties. Some of these matters have been material to us in the past, and others in the future may, either individually or in the aggregate, be material and adverse to our business, financial position, results of operations, and liquidity. We do not believe any of our pending legal proceedings are material to us, but there can be no assurance our assessment will not change based on future developments.

Additionally, the False Claims Act (the "FCA") allows private citizens, called "relators," to institute civil proceedings on behalf of the United States alleging violations of the FCA. These lawsuits, also known as "*qui tam*" actions, are common in the healthcare industry and can involve significant monetary damages, fines, attorneys' fees and the award of bounties to the relators who successfully prosecute or bring these suits to the government. It is possible that *qui tam* lawsuits have been filed against us, which suits remain under seal, or that we are unaware of such filings or precluded by existing law or court order from discussing or disclosing the filing of such suits. Therefore, from time to time, we may be party to one or more undisclosed *qui tam* cases brought pursuant to the FCA.

Information relating to certain legal proceedings in which we are involved is included in Note 18, *Contingencies and Other Commitments*, to the accompanying consolidated financial statements.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information

Shares of our common stock trade on the New York Stock Exchange under the ticker symbol “EHC.”

Holders

As of February 13, 2020, there were 98,433,352 shares of Encompass Health common stock issued and outstanding, net of treasury shares, held by approximately 7,453 holders of record (participant positions at The Depository Trust Corporation plus record holders).

Dividends

On February 20, 2020, our board of directors declared a cash dividend of \$0.28 per share, payable on April 15, 2020 to stockholders of record on April 1, 2020. We expect quarterly dividends to continue to be paid in January, April, July, and October. However, the actual declaration of any future cash dividends, and the setting of record and payment dates as well as the per share amounts, will be at the discretion of our board each quarter after consideration of various factors, including our capital position and alternative uses of funds.

Recent Sales of Unregistered Securities

None.

Securities Authorized for Issuance Under Equity Compensation Plans

The following table sets forth, as of December 31, 2019, information concerning compensation plans under which our securities are authorized for issuance. The table does not reflect grants, awards, exercises, terminations, or expirations since that date. All share amounts and exercise prices have been adjusted to reflect stock splits that occurred after the date on which any particular underlying plan was adopted, to the extent applicable.

| | Number of securities to be issued upon exercise of outstanding options | Weighted-average exercise price of outstanding options ⁽¹⁾ | Number of securities available for future issuance ⁽³⁾ |
|------------------------------------|--|---|---|
| Plans approved by stockholders | 2,744,223 ⁽²⁾ | \$ 43.02 | 9,160,752 ⁽³⁾ |
| Plans not approved by stockholders | 86,830 ⁽⁴⁾ | | — |
| Total | 2,831,053 | \$ 43.02 | 9,160,752 |

⁽¹⁾ This calculation does not take into account awards of restricted stock, restricted stock units, or performance share units.

⁽²⁾ This amount assumes maximum performance by performance-based awards for which the performance has not yet been determined.

⁽³⁾ This amount represents the number of shares available for future equity grants under the 2016 Omnibus Performance Incentive Plan approved by our stockholders in May 2016.

⁽⁴⁾ This amount represents 86,830 restricted stock units issued under the 2004 Amended and Restated Director Incentive Plan, the material terms of which are described below.

2004 Amended and Restated Director Incentive Plan

The 2004 Amended and Restated Director Incentive Plan (the “2004 Plan”) provided for the grant of common stock, awards of restricted common stock, and the right to receive awards of common stock, which we refer to as “restricted stock units,” to our non-employee directors. The 2004 Plan expired in March 2008 and was replaced by the 2008 Equity Incentive Plan. Some awards remain outstanding. Awards granted under the 2004 Plan at the time of its termination will continue in effect in accordance with their terms. Awards of restricted stock units were fully vested when awarded and will be settled in shares of common stock on the earlier of the six-month anniversary of the date on which the director ceases to serve on the

board of directors or certain change in control events. The restricted stock units generally cannot be transferred. Awards are generally protected against dilution upon the issuance of stock dividends and in the event of a stock split, recapitalization, or other major corporate restructuring.

Purchases of Equity Securities

The following table summarizes our repurchases of equity securities during the three months ended December 31, 2019:

| Period | Total Number of Shares (or Units) Purchased ⁽¹⁾ | Average Price Paid per Share (or Unit) (\$) | Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs | Maximum Number (or Approximate Dollar Value) of Shares That May Yet Be Purchased Under the Plans or Programs ⁽²⁾ |
|--------------------------------------|--|---|--|---|
| October 1 through October 31, 2019 | 5,803 | \$ 67.41 | — | \$204,120,171 |
| November 1 through November 30, 2019 | — | — | — | 204,120,171 |
| December 1 through December 31, 2019 | — | — | — | 204,120,171 |
| Total | <u>5,803</u> | <u>\$ 67.41</u> | <u>—</u> | |

⁽¹⁾ Except as noted in the following sentence, the number of shares reported in this column represents shares tendered by an employee as payment of the tax liabilities incident to the vesting of previously awarded shares of restricted stock. In October, 276 shares were purchased pursuant to our Directors’ Deferred Stock Investment Plan. This plan is a nonqualified deferral plan allowing non-employee directors to make advance elections to defer a fixed percentage of their director fees. The plan administrator acquires the shares in the open market which are then held in a rabbi trust. The plan also provides that dividends paid on the shares held for the accounts of the directors will be reinvested in shares of our common stock which will also be held in the trust. The directors’ rights to all shares in the trust are nonforfeitable, but the shares are only released to the directors after departure from our board.

⁽²⁾ On October 28, 2013, we announced our board of directors authorized the repurchase of up to \$200 million of our common stock. On February 14, 2014, our board approved an increase in this common stock repurchase authorization from \$200 million to \$250 million. On July 24, 2018, our board approved resetting the aggregate common stock repurchase authorization to \$250 million. The repurchase authorization does not require the repurchase of a specific number of shares, has an indefinite term, and is subject to termination at any time by our board of directors. Subject to certain terms and conditions, including a maximum price per share and compliance with federal and state securities and other laws, the repurchases may be made from time to time in open market transactions, privately negotiated transactions, or other transactions, including trades under a plan established in accordance with Rule 10b5-1 under the Securities Exchange Act of 1934, as amended.

Company Stock Performance

Set forth below is a line graph comparing the total returns of our common stock, the Standard & Poor’s 500 Index (“S&P 500”), and the S&P Health Care Services Select Industry Index (“SPSIHP”), an equal-weighted index of at least 35 companies in healthcare services that are also part of the S&P Total Market Index and subject to float-adjusted market capitalization and liquidity requirements. Our compensation committee has in prior years used the SPSIHP as a benchmark for a portion of the awards under our long-term incentive program. The graph assumes \$100 invested on December 31, 2014 in our common stock and each of the indices. The returns below assume reinvestment of dividends paid on the related common stock. We have paid a quarterly cash dividend on our common stock since October 2013.

The information contained in the performance graph shall not be deemed “soliciting material” or to be “filed” with the SEC nor shall such information be deemed incorporated by reference into any future filing under the Securities Act of 1933 or the Securities Exchange Act of 1934, except to the extent we specifically incorporate it by reference into such filing.

The comparisons in the graph below are based upon historical data and are not indicative of, nor intended to forecast, future performance of our common stock. Research Data Group, Inc. provided the data for the indices presented below. We assume no responsibility for the accuracy of the indices' data, but we are not aware of any reason to doubt its accuracy.

COMPARISON OF 5-YEAR CUMULATIVE TOTAL RETURN

Among Encompass Health Corporation, the S&P 500 Index, and the S&P Health Care Services Select Industry Index

| Company/Index Name | For the Year Ended December 31, | | | | | |
|--|---------------------------------|-------------------------|--------|--------|--------|--------|
| | Base Period | Cumulative Total Return | | | | |
| | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 |
| Encompass Health Corporation | 100.00 | 92.50 | 112.22 | 137.31 | 174.20 | 198.99 |
| Standard & Poor's 500 Index | 100.00 | 101.38 | 113.51 | 138.29 | 132.23 | 173.86 |
| S&P Health Care Services Select Industry Index | 100.00 | 103.27 | 92.30 | 98.26 | 99.47 | 115.83 |

Item 6. Selected Financial Data

We derived the selected consolidated financial data presented below as of December 31, 2019 and 2018 and for the years ended December 31, 2019, 2018, and 2017 from our audited consolidated financial statements and related notes included elsewhere in this filing. We derived the selected historical consolidated financial data presented below as of December 31, 2017 and as of and for the years ended December 31, 2016 and 2015 from our consolidated financial statements and related notes not included herein. Refer to Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*, and the notes to the accompanying consolidated financial statements for additional information regarding the financial data presented below, including matters that might cause this data not to be indicative of our future financial position or results of operations.

| | For the Year Ended December 31, | | | | |
|---|--|-----------------|-----------------|-----------------|-----------------|
| | 2019 | 2018 | 2017 | 2016 | 2015 |
| (In Millions, Except per Share Data) | | | | | |
| Statement of Operations Data: | | | | | |
| Net operating revenues | \$4,605.0 | \$4,277.3 | \$3,913.9 | \$3,642.6 | \$3,115.7 |
| Operating earnings ⁽¹⁾ | 612.1 | 555.2 | 578.3 | 588.1 | 485.7 |

- (1) We define operating earnings as income from continuing operations attributable to Encompass Health before (1) loss on early extinguishment of debt; (2) interest expense and amortization of debt discounts and fees; (3) other income; (4) loss on interest rate swaps; and (5) income tax expense or benefit.
- (2) During the fourth quarter of 2013, we exchanged \$320 million in aggregate principal amount of newly issued 2.00% Convertible Senior Subordinated Notes due 2043 (“Convertible Notes”) for 257,110 shares of our then outstanding 6.50% Series A Convertible Perpetual Preferred Stock. On April 23, 2015, we exercised our rights to force conversion of all remaining outstanding shares of our *Convertible perpetual preferred stock* into common stock. During the second quarter of 2017, we exercised the early redemption option and subsequently retired all \$320 million of the Convertible Notes reducing our long-term debt balance by approximately \$278 million. Substantially all of the holders elected to convert their Convertible Notes to shares of our common stock, which resulted in the issuance of 8.9 million shares from treasury stock. See Note 10, *Long-term Debt* and Note 17, *Earnings per Common Share*, to the accompanying consolidated financial statements.
- (3) During 2019, we repurchased 0.8 million million shares of our common stock in the open market for \$45.9 million. During 2017, we repurchased 0.9 million shares of our common stock in the open market for \$38.1 million. During 2016, we repurchased 1.7 million shares of our common stock in the open market for \$65.6 million. During 2015, we repurchased 1.3 million shares of our common stock in the open market for \$45.3 million.
- (4) In May 2018, we acquired Camellia Healthcare and affiliated entities using cash on hand and borrowings under our revolving credit facility. In July 2019, we acquired privately owned Alacare Home Health & Hospice using cash on hand and borrowings under our revolving credit facility. See Note 2, *Business Combinations*, and Note 10, *Long-term Debt*, to the accompanying consolidated financial statements.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following Management’s Discussion and Analysis of Financial Condition and Results of Operations (“MD&A”) should be read in conjunction with the accompanying consolidated financial statements and related notes. This MD&A is designed to provide the reader with information that will assist in understanding our consolidated financial statements, the changes in certain key items in those financial statements from year to year, and the primary factors that accounted for those changes, as well as how certain accounting principles affect our consolidated financial statements. See “Cautionary Statement Regarding Forward-Looking Statements” on page ii of this report for a description of important factors that could cause actual results to differ from expected results. See also Item 1A, *Risk Factors*.

In addition, management’s discussion and analysis of our results of operations and cash flows for the year ended December 31, 2018 compared to the year ended December 31, 2017 may be found in, Part II, Item 7, *Management’s Discussion and Analysis of Financial Condition and Results of Operations* of our Annual Report on Form 10-K for the year ended December 31, 2018, filed with the SEC on February 27, 2019.

Executive Overview

Our Business

We are a national leader in integrated healthcare services, offering both facility-based and home-based patient care through our network of inpatient rehabilitation hospitals, home health agencies, and hospice agencies. As of December 31, 2019, our national footprint spans 37 states and Puerto Rico. As discussed in this Item, “Segment Results of Operations,” we manage our operations in two operating segments which are also our reportable segments: (1) inpatient rehabilitation and (2) home health and hospice. For additional information about our business and reportable segments, see Item 1, *Business* and

Item 1A, *Risk Factors*, of this report, Note 19, *Segment Reporting*, to the accompanying consolidated financial statements, and the “Results of Operations” section of this Item.

Inpatient Rehabilitation

We are the nation’s largest owner and operator of inpatient rehabilitation hospitals in terms of patients treated and discharged, revenues, and number of hospitals. We provide specialized rehabilitative treatment on both an inpatient and outpatient basis. We operate hospitals in 33 states and Puerto Rico, with concentrations in the eastern half of the United States and Texas. As of December 31, 2019, we operate 133 inpatient rehabilitation hospitals and manage four inpatient rehabilitation units through management contracts. Our inpatient rehabilitation segment represented approximately 76% of our *Net operating revenues* for the year ended December 31, 2019.

Home Health and Hospice

Our home health business is the nation’s fourth largest provider of Medicare-certified skilled home health services in terms of revenues. Our home health services include a comprehensive range of Medicare-certified home nursing services to adult patients in need of care. These services include, among others, skilled nursing, physical, occupational, and speech therapy, medical social work, and home health aide services. Our hospice business is the nation’s eleventh largest provider of Medicare-certified hospice services in terms of revenues. We provide hospice services to terminally ill patients and their families that address patients’ physical needs, including pain control and symptom management, and to provide emotional and spiritual support. As of December 31, 2019, we provide home health services in 245 locations and hospice services in 83 locations across 31 states, with concentrations in the Southeast and Texas. In addition, two of these home health agencies operate as joint ventures that we account for using the equity method of accounting. Our home health and hospice segment represented approximately 24% of our *Net operating revenues* for the year ended December 31, 2019.

2019 Overview

In 2019, we focused on the following strategic priorities:

- providing high-quality, cost-effective care to patients in our existing markets;
- achieving organic growth at our existing inpatient rehabilitation hospitals and home health and hospice locations;
- expanding our services to more patients who require post-acute healthcare services by constructing and acquiring hospitals in new markets and acquiring and opening home health and hospice locations in new markets;
- making shareholder distributions via common stock dividends and repurchases of our common stock; and
- positioning the Company for success in the evolving healthcare delivery system through key operational initiatives that include increasing clinical collaboration between our inpatient rehabilitation hospitals and home health locations, building stroke market share, developing and implementing post-acute solutions, transitioning to the new inpatient rehabilitation patient assessment measures, commonly referred to as “Section GG” measures, and preparing for implementation of the home health Patient-Driven Groupings Model (“PDGM”).

During 2019, *Net operating revenues* increased 7.7% over 2018 due primarily to pricing and volume growth in our inpatient rehabilitation segment and volume growth in our home health and hospice segment. Within our inpatient rehabilitation segment, discharge growth of 3.9% coupled with a 1.5% increase in inpatient revenue per discharge in 2019 generated 5.0% growth in net patient revenue compared to 2018. Discharge growth included a 1.8% increase in same-store discharges. Within our home health and hospice segment, home health admission growth of 16.3% and hospice admission growth of 39.8% contributed to 17.3% growth in home health and hospice revenue compared to 2018. Home health admission growth and hospice admission growth included a 7.7% and 12.2% increase, respectively, in same-store admissions. Many of our quality and outcome measures remained above both inpatient rehabilitation and home health industry averages. Not only did we treat more patients and enhance outcomes, we did so in a cost-effective manner. See the “Results of Operations” and “Segment Results of Operations” sections of this Item.

Our growth efforts continued to yield positive results in 2019. In our inpatient rehabilitation segment, we:

- began operating a 40-bed inpatient rehabilitation hospital in Lubbock, Texas with our joint venture partner, University Medical Center Health System, in May 2019;

- began operating a 40-bed inpatient rehabilitation hospital in Boise, Idaho with our joint venture partner, Saint Alphonsus Regional Medical Center, in July 2019;
- amended the joint venture agreement related to our 51-bed Yuma Rehabilitation Hospital which resulted in a change in accounting for this hospital from the equity method of accounting to a consolidated entity;
- began operating our new 40-bed inpatient rehabilitation hospital in Katy, Texas in September 2019;
- continued our capacity expansions by adding 152 new beds to existing hospitals; and
- continued development of the following hospitals:

| Location | # of Beds | Expected Operational Date |
|----------------------------|-----------|---------------------------|
| De novos: | | |
| Murrieta, California* | 50 | Q1 2020 |
| Sioux Falls, South Dakota | 40 | Q2 2020 |
| Toledo, Ohio | 40 | Q4 2020 |
| Cumming, Georgia | 50 | Q1 2021 |
| North Tampa, Florida | 50 | Q2 2021 |
| Stockbridge, Georgia | 50 | Q3 2021 |
| Greenville, South Carolina | 40 | Q3 2021 |
| Joint ventures: | | |
| Coralville, Iowa | 40 | Q2 2020 |
| San Angelo, Texas | 40 | Q2 2021 |

* We began operating this hospital in February 2020.

We also continued our growth efforts in our home health and hospice segment. On July 1, 2019, we completed the acquisition of privately owned Alacare Home Health and Hospice (“Alacare”) for a cash purchase price of \$217.8 million. The Alacare portfolio consisted of 23 home health and 23 hospice locations in Alabama. We funded the transaction with cash on hand and borrowings under our revolving credit facility. In connection with this transaction, we expect to realize an income tax benefit with an estimated present value of approximately \$30 million. For additional information regarding this transaction, see Note 2, *Business Combinations*, to the accompanying consolidated financial statements.

In addition to completing the Alacare transaction, we acquired two home health locations in East Providence, Rhode Island and Westport, Massachusetts and began accepting patients at our two new home health locations in Columbia, South Carolina and Vero Beach, Florida. We also began accepting patients at our two new hospice locations in Burleson, Texas and Greensburg, Pennsylvania.

To support our growth efforts, we continued taking steps to further increase the strength and flexibility of our balance sheet. Specifically, we redeemed \$100 million of the outstanding principal balance of the 5.75% Senior Notes due 2024 (the “2024 Notes”) in June 2019. In September 2019, we issued \$500 million of 4.50% Senior Notes due 2028 at par and \$500 million of 4.75% Senior Notes due 2030 (the “New Notes”) at par, which resulted in approximately \$983 million in net proceeds from the public offering. We used the proceeds to fund the purchase of equity and vested stock appreciation rights from management investors of our home health and hospice segment, redeem \$400 million of our 2024 Notes, and repay borrowings under our revolving credit facility. In November 2019, we amended our existing credit agreement to, among other things, increase the size of our revolving credit facility from \$700 million to \$1 billion and extend the agreement's maturity by two years to 2024. For additional information regarding these transactions, see Note 10, *Long-term Debt*, Note 12, *Redeemable Noncontrolling Interests*, and Note 14, *Share-Based Payments*, to the accompanying consolidated financial statements and the “Liquidity and Capital Resources” section of this Item.

We also continued our shareholder distributions by paying a quarterly cash dividend of \$0.27 per share on our common stock in January, April, and July of this year. On July 23, 2019, our board of directors approved an increase in our quarterly dividend and declared a cash dividend of \$0.28 per share that was paid in October 2019. On October 25, 2019, our board of directors declared a cash dividend of \$0.28 per share, that was paid on January 15, 2020 to stockholders of record on

January 2, 2020. In addition, we repurchased 0.8 million shares of our common stock in the open market for approximately \$46 million during 2019. For additional information see the “Liquidity and Capital Resources” section of this Item.

During 2019, we continued to increase the clinical collaboration rate between our inpatient rehabilitation hospitals and home health locations. We increased stroke market share by continuing to meet the needs of patients recovering from a stroke, as discussed in Item 1, *Business*, “Competitive Strengths.” We developed and implemented post-acute solutions that focus on improving patient outcomes and lowering the cost of care by reducing hospital readmissions across the entire episode of care. Additionally, we transitioned to the new inpatient rehabilitation Section GG measures on October 1, 2019 and prepared for the implementation of the home health PDGM on January 1, 2020, which are both discussed further below and in Item 1, *Business*, and Item 1A, *Risk Factors*.

Business Outlook

We believe our business outlook remains positive. Demographic trends, such as population aging, should continue to increase long-term demand for the services we provide. While we treat patients of all ages, most of our patients are 65 and older, and the number of Medicare enrollees is expected to grow approximately 3% per year for the foreseeable future. Even more specifically, the average age of our patients is approximately 76, and the population group ranging in ages from 75 to 79 is expected to grow at approximately 5% per year through 2026. We believe the demand for the services we provide will continue to increase as the U.S. population ages. We believe these factors align with our strengths in, and focus on, post-acute services. In addition, we believe we can address the demand for facility-based and home-based post-acute care services in markets where we currently do not have a presence by constructing or acquiring new hospitals and by acquiring or opening home health and hospice agencies in those extremely fragmented industries.

We are a leading provider of integrated healthcare services, offering both facility-based and home-based patient care through our network of inpatient rehabilitation hospitals, home health agencies, and hospice agencies. We are committed to delivering high-quality, cost-effective, integrated patient care across the healthcare continuum with a primary focus on the post-acute sector. As the nation’s largest owner and operator of inpatient rehabilitation hospitals in terms of patients treated and discharged, revenues, and number of hospitals, we believe we differentiate ourselves from our competitors based on the quality of our clinical outcomes, our cost-effectiveness, our financial strength, and our extensive application of technology. As the fourth largest provider of Medicare-certified skilled home health services in terms of revenues, we believe we differentiate ourselves from our competitors by the application of a highly integrated technology platform, our ability to manage a variety of care pathways, and a proven track record of consummating and integrating acquisitions.

The nature and timing of the transformation of the current healthcare system to coordinated care delivery and payment models is uncertain, as the development and implementation of new care delivery and payment systems will require significant time and resources. Furthermore, many of the alternative approaches being explored may not work as intended. However, our goal is to position the Company in a prudent manner to be responsive to industry shifts. We have invested in our core business and created an infrastructure that enables us to provide high-quality care on a cost-effective basis. We have been disciplined in creating a capital structure that is flexible with no significant debt maturities prior to 2023. We continue to have a strong, well-capitalized balance sheet, including a substantial portfolio of owned real estate. We have significant availability under our revolving credit facility, and we continue to generate strong cash flows from operations. Strong and consistent free cash flow generated by our Company, together with the unfunded commitment of our revolving credit facility, provides substantial capacity to pursue growth opportunities in both of our business segments while continuing to invest in our operational initiatives and capital structure strategy. For these and other reasons, we believe we will be able to adapt to changes in reimbursement, sustain our business model, and grow through acquisition and consolidation opportunities as they arise. See also Item 1, *Business*, “Competitive Strengths” and “Strategy and 2020 Strategic Priorities.”

Key Challenges

Healthcare is a highly-regulated industry facing many well-publicized regulatory and reimbursement challenges. The industry also is facing uncertainty associated with the efforts to identify and implement workable coordinated care and integrated delivery payment models as well as post-acute site neutrality in Medicare reimbursement. The Medicare reimbursement systems for both inpatient rehabilitation and home health are undergoing significant changes. The future of many aspects of healthcare regulation remains uncertain. Successful healthcare providers are those able to adapt to changes in the regulatory and operating environments, build strategic relationships across the healthcare continuum, and consistently provide high-quality, cost-effective care. We believe we have the necessary capabilities — change agility, strategic relationships, quality of patient outcomes, cost effectiveness, and ability to capitalize on growth opportunities — to adapt to and succeed in a dynamic, highly regulated industry, and we have a proven track record of doing so.

As we continue to execute our business plan, the following are some of the challenges we face.

- Operating in a Highly Regulated Industry. We are required to comply with extensive and complex laws and regulations at the federal, state, and local government levels. These rules and regulations have affected, or could in the future affect, our business activities by having an impact on the reimbursement we receive for services provided or the costs of compliance, mandating new documentation standards, requiring additional licensure or certification, regulating our relationships with physicians and other referral sources, regulating the use of our properties, and limiting our ability to enter new markets or add new capacity to existing hospitals and agencies. Ensuring continuous compliance with extensive laws and regulations is an operating requirement for all healthcare providers.

We have invested, and will continue to invest, substantial time, effort, and expense in implementing and maintaining training programs as well as internal controls and procedures designed to ensure regulatory compliance, and we are committed to continued adherence to these guidelines. More specifically, because Medicare comprises a significant portion of our *Net operating revenues*, failure to comply with the laws and regulations governing the Medicare program and related matters, including anti-kickback and anti-fraud requirements, could materially and adversely affect us. The federal government's reliance on sub-regulatory guidance, such as handbooks, FAQs, internal memoranda, and press releases, presents a unique challenge to compliance efforts. For additional details on sub-regulatory guidance, See Item 1A, *Risk Factors*.

Reimbursement claims made by healthcare providers, including inpatient rehabilitation hospitals as well as home health and hospice agencies, are subject to audit from time to time by governmental payors and their agents, such as the Medicare Administrative Contractors ("MACs"), fiscal intermediaries and carriers, as well as the Office of Inspector General, CMS, and state Medicaid programs. These audits as well as the ordinary course claim reviews of our billings result in payment denials, including recoupment of previously paid claims from current accounts receivable. Healthcare providers can challenge any denials through an administrative appeals process that can be extremely lengthy, taking several years. For additional details of these claim reviews, See Item 1, *Business*, "Sources of Revenues," Item 1A, *Risk Factors*, and Note 1, *Summary of Significant Accounting Policies*, "Net Operating Revenues" and "Accounts Receivable," to the accompanying consolidated financial statements.

In June 2019, CMS commenced the Home Health Review Choice Demonstration ("RCD") in Illinois. RCD is intended to test whether pre-claim review improves methods for the identification, investigation, and prosecution of Medicare fraud and whether the pre-claim review helps reduce expenditures while maintaining or improving quality of care. The demonstration expanded to Ohio in September 2019 and will be expanded to Texas in March 2020 and in North Carolina and Florida in May 2020. We operate agencies (representing approximately 44% of our home health Medicare claims) in these five states. For additional details of the RCD program, see Item 1A, *Risk Factors*.

See also Item 1, *Business*, "Regulation," and Item 1A, *Risk Factors*, to this report and Note 18, *Contingencies and Other Commitments*, "Governmental Inquiries and Investigations," to the accompanying consolidated financial statements.

- Changes to Our Operating Environment Resulting from Healthcare Reform. Concerns held by federal policymakers about the federal deficit and national debt levels, as well as other healthcare policy priorities, could result in enactment of legislation affecting portions of the Medicare program, including post-acute care services we provide. It is not clear what, if any, Medicare-related changes may ultimately be enacted and signed into law or otherwise implemented, but it is possible that any reductions in Medicare spending will have a material impact on reimbursements for healthcare providers generally and post-acute providers specifically. We cannot predict what, if any, changes in Medicare spending or modifications to the healthcare laws and regulations will result from future budget or other legislative or regulatory initiatives.

Many provisions within the 2010 Healthcare Reform Laws have impacted, or could in the future impact, our business. Most notable for us are Medicare reimbursement reductions, such as reductions to annual market basket updates to providers and reimbursement rate rebasing adjustments, and promotion of alternative payment models, such as accountable care organizations ("ACOs") and bundled payment initiatives including the Bundled Payments for Care Improvement Initiative Advanced ("BPCI Advanced") and the Comprehensive Care for Joint Replacement ("CJR") program. The Center for Medicare and Medicaid Innovation ("CMMI") plays a key role in the development of many of these new payment and service delivery models. Our challenges related to healthcare reform are discussed in Item 1, *Business*, "Sources of Revenues," and Item 1A, *Risk Factors*.

The healthcare industry in general has been facing uncertainty associated with the efforts to identify and implement workable coordinated care and integrated delivery payment models. In these models, hospitals, physicians, and other care providers work together to provide coordinated healthcare on a more efficient, patient-centered basis. These providers are then paid based on the efficiency and overall value and quality of the services they provide to a patient. While this is consistent with our goal and proven track record of being a high-quality, cost-effective provider, broad-based implementation of a new care delivery and payment model would represent a significant transformation for the healthcare industry. As the industry and its regulators explore this transformation, we are attempting to position the Company in preparation for whatever changes are ultimately made to the delivery system.

As discussed in Item 1, *Business*, the future of the 2010 Healthcare Reform Laws as well as the nature and substance of any other healthcare legislation remain uncertain, nor can we predict whether other legislation affecting Medicare and post-acute care providers will be enacted, or what actions the Trump Administration may take through the regulatory process that may result in modifications to the 2010 Healthcare Laws or the Medicare program. Therefore, the ultimate nature and timing of any transformation of the healthcare delivery system is uncertain, and will likely remain so for some time. We will continue to evaluate these laws and regulations and position the Company for this industry shift. Based on our track record, we believe we can adapt to these regulatory and industry changes. Further, we have engaged, and will continue to engage, actively in discussions with key legislators and regulators to attempt to ensure any healthcare laws or regulations adopted or amended promote our goal of high-quality, cost-effective care.

Each year, CMS adopts rules that update pricing and otherwise amend the respective payment systems. On July 31, 2019, CMS released its notice of final rulemaking for fiscal year 2020 under the inpatient rehabilitation facility prospective payment system (the “2020 IRF Rule”). Based on the market basket update, our analysis of the Section GG changes and the other adjustments included in the 2020 IRF Rule and other factors, we currently estimate Medicare payment rates for our inpatient rehabilitation segment will be flat to up 0.75% in fiscal year 2020 (effective October 1, 2019). On October 31, 2019, CMS released its notice of final rulemaking for calendar year 2020 for home health agencies under the home health prospective payment system (the “2020 HH Rule”). Based on the market basket update, our analysis of PDGM’s significant changes to the reimbursement model and the other adjustments included in the 2020 HH Rule as well as other factors, we currently estimate Medicare payment rates for our home health business will decrease between 2.0% and 3.0% in 2020. For additional details of the 2020 IRF Rule, 2020 HH Rule, and other proposed and adopted legislative and regulatory actions that may be material to our business, see Item 1, *Business*, and Item 1A, *Risk Factors*.

- Maintaining Strong Volume Growth. Various factors, including competition and increasing regulatory and administrative burdens, may impact our ability to maintain and grow our hospital, home health, and hospice volumes. In any particular market, we may encounter competition from local or national entities with longer operating histories or other competitive advantages, such as acute care hospitals who provide post-acute services similar to ours or other post-acute providers with relationships with referring acute care hospitals or physicians. Aggressive payment review practices by Medicare contractors, aggressive enforcement of regulatory policies by government agencies, and restrictive or burdensome rules, regulations or statutes governing admissions practices may lead us to not accept patients who would be appropriate for and would benefit from the services we provide. In addition, from time to time, we must get regulatory approval to expand our services and locations in states with certificate of need laws. This approval may be withheld or take longer than expected. In the case of new-store volume growth, the addition of hospitals, home health agencies, and hospice agencies to our portfolio also may be difficult and take longer than expected.
- Recruiting and Retaining High-Quality Personnel. See Item 1A, *Risk Factors*, for a discussion of competition for staffing, shortages of qualified personnel, and other factors that may increase our labor costs. Recruiting and retaining qualified personnel, including management, for our inpatient hospitals and home health and hospice agencies remain a high priority for us. We attempt to maintain a comprehensive compensation and benefits package that allows us to remain competitive in this challenging staffing environment while remaining consistent with our goal of being a high-quality, cost-effective provider of post-acute services.

These key challenges notwithstanding, we believe we have a strong business model, a strong balance sheet, and a proven track record of achieving strong financial and operational results. We are attempting to position the Company to respond to changes in the healthcare delivery system and believe we will be in a position to take advantage of any opportunities that arise as the industry moves to this new stage. We believe we are positioned to continue to adapt to external events and create value for our shareholders in 2020 and beyond.

Results of Operations

Payor Mix

During 2019, 2018, and 2017, we derived consolidated *Net operating revenues* from the following payor sources:

| | For the Year Ended December 31, | | |
|--------------------------|--|---------------|---------------|
| | 2019 | 2018 | 2017 |
| Medicare | 75.1% | 75.9% | 76.0% |
| Medicare Advantage | 10.6% | 9.2% | 8.6% |
| Managed care | 8.3% | 8.8% | 9.3% |
| Medicaid | 2.8% | 2.6% | 2.5% |
| Other third-party payors | 0.9% | 1.1% | 1.3% |
| Workers' compensation | 0.7% | 0.7% | 0.7% |
| Patients | 0.5% | 0.5% | 0.5% |
| Other income | 1.1% | 1.2% | 1.1% |
| Total | <u>100.0%</u> | <u>100.0%</u> | <u>100.0%</u> |

Our payor mix is weighted heavily towards Medicare. We receive Medicare reimbursements under the IRF-PPS, the HH-PPS, and the hospice payment system (the “Hospice-PS”). For additional information regarding Medicare reimbursement, see the “Sources of Revenues” section of Item 1, *Business*.

As part of the Balanced Budget Act of 1997, Congress created a program of private, managed healthcare coverage for Medicare beneficiaries. This program has been referred to as Medicare Part C, or “Medicare Advantage.” The program offers beneficiaries a range of Medicare coverage options by providing a choice between the traditional fee-for-service program (under Medicare Parts A and B) or enrollment in a health maintenance organization, preferred provider organization, point-of-service plan, provider sponsor organization, or an insurance plan operated in conjunction with a medical savings account.

Our consolidated *Net operating revenues* consist primarily of revenues derived from patient care services. *Net operating revenues* also include other revenues generated from management and administrative fees and other non-patient care services. These other revenues are included in “other income” in the above table.

Our Results

From 2017 through 2019, our consolidated results of operations were as follows:

| | For the Year Ended December 31, | | | Percentage Change | |
|--|---------------------------------|-----------------|-----------------|-------------------|---------------|
| | 2019 | 2018 | 2017 | 2019 vs. 2018 | 2018 vs. 2017 |
| | (In Millions) | | | | |
| Net operating revenues | \$ 4,605.0 | \$ 4,277.3 | \$ 3,913.9 | 7.7 % | 9.3 % |
| Operating expenses: | | | | | |
| Salaries and benefits | 2,573.0 | 2,354.0 | 2,154.6 | 9.3 % | 9.3 % |

In the discussion that follows, we use “same-store” comparisons to explain the changes in certain performance metrics and line items within our financial statements. We calculate same-store comparisons based on hospitals and home health and hospice locations open throughout both the full current period and prior periods presented. These comparisons include the

financial results of market consolidation transactions in existing markets, as it is difficult to determine, with precision, the incremental impact of these transactions on our results of operations.

2019 Compared to 2018

Net Operating Revenues

Our consolidated *Net operating revenues* increased in 2019 compared to 2018 primarily from pricing and volume growth in our inpatient rehabilitation segment and volume growth in our home health and hospice segment. See additional discussion in the “Segment Results of Operations” section of this Item.

Salaries and Benefits

Salaries and benefits are the most significant cost to us and represent an investment in our most important asset: our employees. *Salaries and benefits* include all amounts paid to full- and part-time employees who directly participate in or support the operations of our hospitals and home health and hospice agencies, including all related costs of benefits provided to employees. It also includes amounts paid for contract labor.

Salaries and benefits increased in 2019 compared to 2018 primarily due to salary increases for our employees, increased benefits costs, and increased patient volumes, including an increase in the number of full-time equivalents as a result of our development activities. As a percent of *Net operating revenues*, *Salaries and benefits* increased during 2019 compared to 2018 primarily as a result of higher salaries and benefits cost increases compared to revenue pricing increases. See additional discussion in the “Segment Results of Operations” section of this Item.

Other Operating Expenses

Other operating expenses include costs associated with managing and maintaining our hospitals and home health and hospice agencies. These expenses include such items as contract services, non-income related taxes, professional fees, utilities, insurance, and repairs and maintenance.

Other operating expenses increased during 2019 compared to 2018 primarily due to increased patient volumes. As a percent of *Net operating revenues*, *Other operating expenses* decreased during 2019 compared to 2018 primarily due to operating leverage resulting from revenue growth. See additional discussion in the “Segment Results of Operations” section of this Item.

General and Administrative Expenses

General and administrative expenses primarily include administrative expenses such as information technology services, human resources, corporate accounting, legal services, and internal audit and controls that are managed from our home office in Birmingham, Alabama. These expenses also include stock-based compensation expenses.

General and administrative expenses increased in 2019 compared to 2018 in terms of dollars and as a percent of *Net operating revenues* due primarily to increased corporate salaries and benefits costs, including expenses associated with stock appreciation rights (“SARs”), offset by lower costs associated with our rebranding. The 2019 SARs expense was approximately \$82 million compared to approximately \$56 million in 2018. The 2019 rebranding expenses were approximately \$1 million compared to approximately \$11 million in 2018. For additional information on SARs, see Note 14, *Share-Based Payments*, to the accompanying consolidated financial statements, and on the rebranding, see Item 1, *Business*.

Depreciation and Amortization

Depreciation and amortization increased during 2019 compared to 2018 due to our capital expenditures and development activities throughout 2018 and 2019. We expect *Depreciation and amortization* to increase going forward as a result of our recent and ongoing capital investments.

Government, Class Action, and Related Settlements

The amount in *Government, class action, and related settlements* in 2018 related primarily to a \$48 million loss contingency accrual we established in the fourth quarter of 2018 for the potential settlement of the investigation being conducted by the United States Department of Justice (the “DOJ”). We settled the DOJ investigation in 2019. See Note 18, *Contingencies and Other Commitments*, to the accompanying consolidated financial statements for additional information on this matter.

Loss on Early Extinguishment of Debt

The *Loss on early extinguishment of debt* during 2019 resulted from the June and November redemptions of our 2024 Notes. See Note 10, *Long-term Debt*, to the accompanying consolidated financial statements.

Interest Expense and Amortization of Debt Discounts and Fees

The increase in *Interest expense and amortization of debt discounts and fees* in 2019 compared to 2018 primarily resulted from the September 2019 issuances of our 2028 Notes and 2030 Notes offset by the June and November 2019 redemptions of our 2024 Notes. Cash paid for interest approximated \$156 million and \$150 million in 2019 and 2018, respectively. See Note 10, *Long-term Debt*, to the accompanying consolidated financial statements.

Other Income

Other income for 2019 included a \$19.2 million gain as a result of our consolidation of Yuma Rehabilitation Hospital and the remeasurement of our previously held equity interest at fair value. See Note 9, *Investments in and Advances to Nonconsolidated Affiliates*, to the consolidated financial statements.

Income from Continuing Operations Before Income Tax Expense

Our pre-tax income from continuing operations in 2019 increased compared to 2018 primarily due to increased *Net operating revenues* and the gain resulting from the consolidation of Yuma Rehabilitation Hospital, as discussed above, offset by the contingency accrual we established in the fourth quarter of 2018, as discussed above.

Provision for Income Tax Expense

Our *Provision for income tax expense* declined in 2019 compared to 2018 due primarily to the *Government, class action, and related settlements* discussed in Note 18, *Contingencies and Other Commitments*, to the accompanying consolidated financial statements. See also Note 16, *Income Taxes*, to the accompanying consolidated financial statements.

On December 22, 2017, the US enacted the 2017 Tax Cuts and Jobs Act (the “Tax Act”). The Tax Act, which is commonly referred to as “US tax reform,” significantly changed US corporate income tax laws by, among other things, reducing the US corporate income tax rate from 35% to 21% starting in 2018. See Note 16, *Income Taxes*, to the accompanying consolidated financial statements for further discussion.

Our cash payments for income taxes approximated \$104 million, net of refunds, in 2019. These payments were based on estimates of taxable income for 2019. We estimate we will pay approximately \$60 million to \$80 million of cash income taxes, net of refunds, in 2020. In 2019 and 2018, current income tax expense was \$75.9 million and \$128.0 million, respectively.

In certain jurisdictions, we do not expect to generate sufficient income to use all of the available state NOLs and other credits prior to their expiration. This determination is based on our evaluation of all available evidence in these jurisdictions including results of operations during the preceding three years, our forecast of future earnings, and prudent tax planning strategies. It is possible we may be required to increase or decrease our valuation allowance at some future time if our forecast of future earnings varies from actual results on a consolidated basis or in the applicable tax jurisdiction, if the timing of future tax deductions differs from our expectations, or pursuant to changes in state tax laws and rates.

See Note 16, *Income Taxes*, to the accompanying consolidated financial statements and the “Critical Accounting Estimates” section of this Item.

Net Income Attributable to Noncontrolling Interests

The increase in *Net income attributable to noncontrolling interests* during 2019 compared to the same period of 2018 primarily resulted from increased profitability of our joint ventures and the July 1, 2019 consolidation of our Yuma Rehabilitation Hospital, as discussed above, which created a new noncontrolling interest.

Impact of Inflation

The impact of inflation on the Company will be primarily in the area of labor costs. The healthcare industry is labor intensive. Wages and other expenses increase during periods of inflation and when labor shortages occur in the marketplace.

There can be no guarantee we will not experience increases in the cost of labor, as the need for clinical healthcare professionals is expected to grow. In addition, increases in healthcare costs are typically higher than inflation and impact our costs under our employee benefit plans. Managing these costs remains a significant challenge and priority for us.

Suppliers pass along rising costs to us in the form of higher prices. Our supply chain efforts and our continual focus on monitoring and actively managing medical supplies and pharmaceutical costs has enabled us to accommodate increased pricing related to supplies and other operating expenses over the past few years. However, we cannot predict our ability to cover future cost increases.

It should be noted that we have little or no ability to pass on these increased costs associated with providing services to Medicare and Medicaid patients due to federal and state laws that establish fixed reimbursement rates.

Relationships and Transactions with Related Parties

Related party transactions were not material to our operations in 2019, 2018, or 2017, and therefore, are not presented as a separate discussion within this Item.

Segment Results of Operations

Our internal financial reporting and management structure is focused on the major types of services provided by Encompass Health. We manage our operations using two operating segments which are also our reportable segments: (1) inpatient rehabilitation and (2) home health and hospice. For additional information regarding our business segments, including a detailed description of the services we provide, financial data for each segment, and a reconciliation of total segment Adjusted EBITDA to income from continuing operations before income tax expense, see Note 19, *Segment Reporting*, to the accompanying consolidated financial statements.

Inpatient Rehabilitation

During the years ended December 31, 2019, 2018 and 2017, our inpatient rehabilitation segment derived its *Net operating revenues* from the following payor sources:

| | For the Year Ended December 31, | | |
|--------------------------|--|---------------|---------------|
| | 2019 | 2018 | 2017 |
| Medicare | 72.2% | 73.2% | 73.6% |
| Medicare Advantage | 10.7% | 9.2% | 8.3% |
| Managed care | 9.8% | 10.3% | 10.7% |
| Medicaid | 3.1% | 3.0% | 3.0% |
| Other third-party payors | 1.2% | 1.5% | 1.6% |
| Workers' compensation | 0.8% | 0.8% | 0.9% |
| Patients | 0.7% | 0.6% | 0.6% |
| Other income | 1.5% | 1.4% | 1.3% |
| Total | <u>100.0%</u> | <u>100.0%</u> | <u>100.0%</u> |

Additional information regarding our inpatient rehabilitation segment's operating results for the years ended December 31, 2019, 2018 and 2017, is as follows:

| | For the Year Ended December 31, | | | Percentage Change | |
|--|---------------------------------|-----------------|-----------------|-------------------|---------------|
| | 2019 | 2018 | 2017 | 2019 vs. 2018 | 2018 vs. 2017 |
| (In Millions, Except Percentage Change) | | | | | |
| Net operating revenues: | | | | | |
| Inpatient | \$ 3,423.5 | \$ 3,247.9 | \$ 3,039.3 | 5.4 % | 6.9 % |
| Outpatient and other | 89.5 | 98.3 | 102.0 | (9.0)% | (3.6)% |
| Inpatient rehabilitation segment revenues | 3,513.0 | 3,346.2 | 3,141.3 | 5.0 % | 6.5 % |
| Operating expenses: | | | | | |
| Salaries and benefits | 1,813.1 | 1,701.5 | 1,603.8 | 6.6 % | 6.1 % |
| Other operating expenses | 521.9 | 502.3 | 462.5 | 3.9 % | 8.6 % |
| Supplies | 147.0 | 140.6 | 135.7 | 4.6 % | 3.6 % |
| Occupancy costs | 64.8 | 63.8 | 61.9 | 1.6 % | 3.1 % |
| Other income | (10.5) | (3.6) | (4.1) | 191.7 % | (12.2)% |
| Equity in net income of nonconsolidated affiliates | (5.5) | (7.5) | (7.3) | (26.7)% | 2.7 % |
| Noncontrolling interests | 82.6 | 77.2 | 67.6 | 7.0 % | 14.2 % |
| Segment Adjusted EBITDA | \$ 899.6 | \$ 871.9 | \$ 821.2 | 3.2 % | 6.2 % |

(Actual Amounts)

| | | | | | |
|-----------------------------------|-----------|-----------|-----------|---------|---------|
| Discharges | 186,842 | 179,846 | 171,922 | 3.9 % | 4.6 % |
| Net patient revenue per discharge | \$ 18,323 | \$ 18,059 | \$ 17,678 | 1.5 % | 2.2 % |
| Outpatient visits | 375,525 | 488,754 | 576,345 | (23.2)% | (15.2)% |
| Average length of stay (days) | 12.6 | 12.6 | 12.7 | — % | (0.8)% |
| Occupancy % | 69.5% | 69.3% | 67.8% | 0.3 % | 2.2 % |
| # of licensed beds | 9,249 | 8,966 | 8,851 | 3.2 % | 1.3 % |
| Full-time equivalents* | 21,967 | 21,335 | 20,802 | 3.0 % | 2.6 % |
| Employees per occupied bed | 3.42 | 3.43 | 3.47 | (0.3)% | (1.2)% |

* Full-time equivalents included in the above table represent our employees who participate in or support the operations of our hospitals and include an estimate of full-time equivalents related to contract labor.

We actively manage the productive portion of our *Salaries and benefits* utilizing certain metrics, including employees per occupied bed, or "EPOB." This metric is determined by dividing the number of full-time equivalents, including an estimate of full-time equivalents from the utilization of contract labor, by the number of occupied beds during each period. The number of occupied beds is determined by multiplying the number of licensed beds by our occupancy percentage.

Operating Expenses as a % of Net Operating Revenues

| | For the Year Ended December 31, | | |
|----------------------------|---------------------------------|-------|-------|
| | 2019 | 2018 | 2017 |
| Operating expenses: | | | |
| Salaries and benefits | 51.6% | 50.8% | 51.1% |
| Other operating expenses | 14.9% | 15.0% | 14.7% |
| Supplies | 4.2% | 4.2% | 4.3% |
| Occupancy costs | 1.8% | 1.9% | 2.0% |

2019 Compared to 2018

Net Operating Revenues

Revenue growth during 2019 compared to 2018 resulted from volume growth and an increase in net patient revenue per discharge. Discharge growth from new stores resulted from our joint ventures in Murrells Inlet, South Carolina (September 2018), Winston-Salem, North Carolina (October 2018), Lubbock, Texas (May 2019), and Boise, Idaho (July 2019), as well as wholly owned hospitals in Shelby County, Alabama (April 2018), Bluffton, South Carolina (June 2018), and Katy, Texas (September 2019). New-store growth also resulted from the consolidation of our Yuma Rehabilitation Hospital effective July 1, 2019. Discharge growth included a 1.8% increase in same-store discharges. Growth in net patient revenue per discharge primarily resulted from an increase in reimbursement rates and improvements in discharge destinations. The decrease in outpatient and other revenues in 2019 compared to 2018 was primarily due to the continued closures of hospital-based outpatient programs.

See Note 2, *Business Combinations*, to the accompanying consolidated financial statements for information regarding our joint ventures discussed above. See Note 9, *Investments in and Advances to Nonconsolidated Affiliates*, to the consolidated financial statements for information regarding the consolidation of our Yuma Rehabilitation Hospital.

Adjusted EBITDA

The increase in Adjusted EBITDA for the inpatient rehabilitation segment in 2019 compared to 2018 primarily resulted from revenue growth, as discussed above. *Salaries and benefits* as a percent of *Net operating revenues* increased primarily due to higher salaries and wages per full-time equivalent, inclusive of approximately \$3.5 million of training and education costs associated with the transition to CMS Section GG, as discussed in Item 1, *Business*, and Item 1A, *Risk Factors*.

Home Health and Hospice

During the years ended December 31, 2019, 2018 and 2017, our home health and hospice segment derived its *Net operating revenues* from the following payor sources:

| | For the Year Ended December 31, | | |
|-----------------------|--|-------------|-------------|
| | 2019 | 2018 | 2017 |
| Medicare | 84.2% | 85.3% | 85.7% |
| Medicare Advantage | 10.2% | 9.5% | 9.7% |
| Managed care | 3.6% | 3.6% | 3.8% |
| Medicaid | 1.7% | 1.2% | 0.6% |
| Workers' compensation | 0.1% | 0.2% | —% |
| Patients | 0.1% | 0.1% | 0.1% |
| Other income | 0.1% | 0.1% | 0.1% |
| Total | 100.0% | 100.0% | 100.0% |

Additional information regarding our home health and hospice segment's operating results for the years ended December 31, 2019, 2018 and 2017, is as follows:

| | For the Year Ended December 31, | | | Percentage Change | |
|---|--|-----------------|-----------------|--------------------------|----------------------|
| | 2019 | 2018 | 2017 | 2019 vs. 2018 | 2018 vs. 2017 |
| (In Millions, Except Percentage Change) | | | | | |
| Net operating revenues: | | | | | |
| Home health | \$ 918.0 | \$ 814.6 | \$ 702.4 | 12.7 % | 16.0 % |
| Hospice | 174.0 | 116.5 | 70.2 | 49.4 % | 66.0 % |
| Home health and hospice segment revenues | 1,092.0 | 931.1 | 772.6 | 17.3 % | 20.5 % |
| Operating expenses: | | | | | |
| Cost of services sold (excluding depreciation and amortization) | 506.2 | 438.4 | 363.3 | 15.5 % | 20.7 % |
| Support and overhead costs | 381.7 | 323.5 | 277.2 | 18.0 % | 16.7 % |
| Other income | — | (0.5) | — | 100.0 % | N/A |
| Equity in net income of nonconsolidated affiliates | (1.2) | (1.2) | (0.7) | — % | 71.4 % |
| Noncontrolling interests | 9.5 | 8.5 | 6.9 | 11.8 % | 23.2 % |

Operating Expenses as a % of Net Operating Revenues

| | For the Year Ended December 31, | | |
|---|--|-------------|-------------|
| | 2019 | 2018 | 2017 |
| Operating expenses: | | | |
| Cost of services sold (excluding depreciation and amortization) | 46.4% | 47.1% | 47.0% |
| Support and overhead costs | 35.0% | 34.7% | 35.9% |

2019 Compared to 2018

Net Operating Revenues

Revenue growth during 2019 compared to 2018 was primarily driven from volume growth. Volume growth included a 7.7% increase in home health same-store admissions and the impact of the acquisition of Alacare on July 1, 2019 and Camellia Healthcare on May 1, 2018. Revenue per episode decreased primarily due to the patient mix of the former Alacare locations and the timing of episodes. Hospice revenue increased primarily due to the acquisition of Alacare and same-store admissions growth of 12.2%.

See Note 2, *Business Combinations*, to the accompanying consolidated financial statements of this report for information regarding our acquisitions discussed above.

Adjusted EBITDA

The increase in Adjusted EBITDA during 2019 compared to 2018 primarily resulted from revenue growth, as discussed above. *Cost of services* as a percent of *Net operating revenues* for 2019 compared to 2018 decreased primarily due to improvements in caregiver optimization and productivity in home health partially offset by higher costs at the former Alacare locations. *Support and overhead costs* as a percent of *Net operating revenues* for 2019 compared to 2018 increased primarily due to expenses associated with the integration of Alacare.

Liquidity and Capital Resources

Our primary sources of liquidity are cash on hand, cash flows from operations, and borrowings under our revolving credit facility.

The objectives of our capital structure strategy are to ensure we maintain adequate liquidity and flexibility. Pursuing and achieving those objectives allow us to support the execution of our operating and strategic plans and weather temporary disruptions in the capital markets and general business environment. Maintaining adequate liquidity is a function of our unrestricted *Cash and cash equivalents* and our available borrowing capacity. Maintaining flexibility in our capital structure is a function of, among other things, the amount of debt maturities in any given year, the options for debt prepayments without onerous penalties, and limiting restrictive terms and maintenance covenants in our debt agreements.

Consistent with these objectives, in June 2019, we redeemed \$100 million of the outstanding principal amount of the 2024 Notes using cash on hand and capacity under our revolving credit facility. Pursuant to the terms of the 2024 Notes, this optional redemption was made at a price of 101.917%, which resulted in a total cash outlay of approximately \$102 million. As a result of this redemption, we recorded a \$2.3 million *Loss on early extinguishment of debt* in the second quarter of 2019.

In September 2019, we issued \$500 million of the 2028 Notes at par and \$500 million of the 2030 Notes at par (the “New Notes”), which resulted in approximately \$983 million in net proceeds from the public offering. We used the net proceeds from the offering of the New Notes to fund the purchase of equity and vested stock appreciation rights from management investors of our home health and hospice segment, redeem \$400 million of our 2024 Notes as described below, and repay borrowings under our revolving credit facility.

In November 2019, we redeemed \$400 million of the outstanding principal amount of our 2024 Notes. Pursuant to the terms of the 2024 Notes, this optional redemption was made at a price of 100.958%, which resulted in a total cash outlay of approximately \$404 million. As a result of this redemption, we recorded a \$5.4 million *Loss on early extinguishment of debt* in the fourth quarter of 2019. Also in November 2019, we amended our existing credit agreement to, among other things, increase the size of our revolving credit facility from \$700 million to \$1 billion and extend the agreement's maturity by two years to 2024.

We have been disciplined in creating a capital structure that is flexible with no significant debt maturities prior to 2023. We continue to have a strong, well-capitalized balance sheet, including a substantial portfolio of owned real estate, and we have significant availability under our revolving credit facility. We continue to generate strong cash flows from operations, and we have significant flexibility with how we choose to invest our cash and return capital to shareholders.

See Note 10, *Long-term Debt*, to the accompanying consolidated financial statements.

Current Liquidity

As of December 31, 2019, we had \$94.8 million in *Cash and cash equivalents*. This amount excludes \$64.8 million in restricted cash (\$57.4 million included in *Restricted cash* and \$7.4 million included in *Other long-term assets* in our consolidated balance sheet) and \$76.1 million of restricted marketable securities (included in *Other long-term assets* in our consolidated balance sheet). Our restricted assets pertain primarily to obligations associated with our captive insurance company, as well as obligations we have under agreements with joint venture partners. See Note 4, *Cash and Marketable Securities*, to the accompanying consolidated financial statements.

In addition to *Cash and cash equivalents*, as of December 31, 2019, we had approximately \$916 million available to us under our revolving credit facility. Our credit agreement governs the substantial majority of our senior secured borrowing capacity and contains a leverage ratio and an interest coverage ratio as financial covenants. Our leverage ratio is defined in our credit agreement as the ratio of consolidated total debt (less up to \$300 million of cash on hand) to Adjusted EBITDA for the trailing four quarters. In calculating the leverage ratio under our credit agreement, we are permitted to use pro forma Adjusted EBITDA, the calculation of which includes historical income statement items and pro forma adjustments resulting from (1) the dispositions and repayments or incurrence of debt and (2) the investments, acquisitions, mergers, amalgamations, consolidations and operational changes from acquisitions to the extent such items or effects are not yet reflected in our trailing four-quarter financial statements. Our interest coverage ratio is defined in our credit agreement as the ratio of Adjusted EBITDA to consolidated interest expense, excluding the amortization of financing fees, for the trailing four quarters. As of December 31, 2019, the maximum leverage ratio requirement per our credit agreement was 4.50x and the minimum interest coverage ratio requirement was 3.0x, and we were in compliance with these covenants. Based on Adjusted EBITDA for 2019 and the interest rate in effect under our credit agreement during the three-month period ended December 31, 2019, if we had drawn on the first day and maintained the maximum amount of outstanding draws under our revolving credit facility for the entire year, we would still be in compliance with the maximum leverage ratio and minimum interest coverage ratio requirements.

We do not face near-term refinancing risk, as the amounts outstanding under our credit agreement do not mature until 2024, and our bonds all mature in 2023 and beyond. See the “Contractual Obligations” section below for information related to our contractual obligations as of December 31, 2019.

We acquired a significant portion of our home health and hospice business when we purchased EHHI Holdings, Inc. (“EHHI”) on December 31, 2014. In the acquisition, we acquired all of the issued and outstanding equity interests of EHHI, other than equity interests contributed to Encompass Health Home Health Holdings, Inc. (“Holdings”), a subsidiary of Encompass Health and an indirect parent of EHHI, by certain sellers in exchange for shares of common stock of Holdings. Those sellers were members of EHHI management, and they contributed a portion of their shares of common stock of EHHI, valued at approximately \$64 million on the acquisition date, in exchange for approximately 16.7% of the outstanding shares of common stock of Holdings. At any time after December 31, 2017, each management investor has the right (but not the obligation) to have his or her shares of Holdings stock repurchased by Encompass Health for a cash purchase price per share equal to the fair value. Specifically, up to one-third of each management investor’s shares of Holdings stock may be sold prior to December 31, 2018; two-thirds of each management investor’s shares of Holdings stock may be sold prior to December 31, 2019; and all of each management investor’s shares of Holdings stock may be sold thereafter. At any time after December 31, 2019, Encompass Health will have the right (but not the obligation) to repurchase all or any portion of the shares of Holdings stock owned by one or more management investors for a cash purchase price per share equal to the fair value. The fair value is determined using the product of the trailing twelve-month adjusted EBITDA measure for Holdings and a specified median market price multiple based on a basket of public home health companies and transactions, after adding cash and deducting indebtedness that includes the outstanding principal balance under any intercompany notes. In February 2018, each management investor exercised the right to sell one-third of his or her shares of Holdings stock to Encompass Health, representing approximately 5.6% of the outstanding shares of the common stock of Holdings. On February 21, 2018, Encompass Health settled the acquisition of those shares upon payment of approximately \$65 million in cash. In July 2019, we received additional exercise notices, representing approximately 5.6% of the outstanding shares of the common stock of Holdings. In September 2019, Encompass Health settled the acquisition of those shares upon payment of approximately \$163 million in cash. As of December 31, 2019, the fair value of those outstanding shares of Holdings owned by management investors is approximately \$208 million. In January 2020, we received additional exercise notices, representing approximately 4.3% of the outstanding shares of the common stock of Holdings. In February 2020, Encompass Health settled the acquisition of those shares upon payment of approximately \$162 million in cash. Upon settlement of these exercises, approximately \$46 million of the shares of Holdings held by two management investors remained outstanding.

On February 20, 2020, Encompass Health entered into exchange agreements (each, an “Exchange Agreement”) with these two management investors, pursuant to which they have the right to exchange all of the remaining shares of Holdings

held by them for shares of common stock of Encompass Health (the “EHC Shares”). Each of the Exchange Agreements provides that the management investor must deliver a written exchange notice (an “Exchange Notice”) to Encompass Health in order to exchange his or her remaining shares of Holdings for EHC Shares. Each Exchange Agreement further provides that the number of EHC Shares to be delivered to the management investor is to be determined by dividing the fair value of the shares of Holdings held by the management investor on the date of the Exchange Agreement by the last reported sales price of Encompass Health’s common stock on the New York Stock Exchange (the “NYSE”) on the date of delivery of the Exchange Notice.

On February 20, 2020, Encompass Health received an Exchange Notice from each of the management investors. Based on the last sales price of Encompass Health’s common stock on the NYSE on February 20, 2020, Encompass Health anticipates delivering an aggregate of approximately 561,000 EHC Shares, less than 0.6% of the total number of outstanding shares of the Encompass Health’s common stock, to the management investors. The settlement of the exchanges is expected to occur prior to the end of the first quarter of 2020. Encompass Health anticipates issuing the EHC Shares from its treasury shares. See also Note 12, *Redeemable Noncontrolling Interests*, to the accompanying consolidated financial statements.

In conjunction with the EHHI acquisition, we granted stock appreciation rights (“SARs”) based on Holdings common stock to certain members of EHHI management at closing. Half of the SARs vested on December 31, 2018 with the remainder vesting on December 31, 2019. Upon exercise, each SAR must be settled for cash in the amount by which the per share fair value of Holdings’ common stock on the exercise date exceeds the per share fair value on the grant date. In February 2019, members of the management team exercised a portion of their vested SARs for approximately \$13 million in cash. In July 2019, members of the management team exercised the remainder of the vested SARs, which resulted in cash distributions of approximately \$55 million. As of December 31, 2019, the fair value of the remaining 115,545 SARs is approximately \$101 million, all of which is included in *Other current liabilities* in the accompanying consolidated balance sheet. In January 2020, members of the management team exercised the remaining SARs and in February 2020, we settled those awards upon payment of approximately \$101 million in cash. See also Note 14, *Share-Based Payments*, to the accompanying consolidated financial statements.

We anticipate we will continue to generate strong cash flows from operations that, together with availability under our revolving credit facility, will allow us to invest in growth opportunities and continue to improve our existing business. We also will continue to consider additional shareholder value-enhancing strategies such as repurchases of our common stock and distribution of common stock dividends, including the potential growth of the quarterly cash dividend on our common stock, recognizing that these actions may increase our leverage ratio. See also the “Authorizations for Returning Capital to Stakeholders” section of this Item.

See Item 1A, *Risk Factors*, for a discussion of risks and uncertainties facing us.

Sources and Uses of Cash

The following table shows the cash flows provided by or used in operating, investing, and financing activities for the years ended December 31, 2019, 2018, and 2017 (in millions):

| | For the Year Ended December 31, | | |
|---|--|----------------|----------------|
| | 2019 | 2018 | 2017 |
| Net cash provided by operating activities | \$ 635.3 | \$ 762.4 | \$ 658.3 |
| Net cash used in investing activities | (657.4) | (424.5) | (283.0) |
| Net cash provided by (used in) financing activities | 48.2 | (321.2) | (359.9) |
| Increase in cash, cash equivalents, and restricted cash | <u>\$ 26.1</u> | <u>\$ 16.7</u> | <u>\$ 15.4</u> |

2019 Compared to 2018

Operating activities. The decrease in *Net cash provided by operating activities* during 2019 compared to 2018 primarily resulted from the payment to management investors of our home health and hospice segment for vested stock appreciation rights, the settlement payment associated with the investigation conducted by the United States Department of Justice, and an increase in *Accounts receivable* due to volume increases in both segments during 2019. See Note 18, *Contingencies and Other Commitments*, to the accompanying consolidated financial statements.

Investing activities. The increase in *Net cash used in investing activities* during 2019 compared to 2018 resulted primarily from the acquisition of Alacare, as described in Note 2, *Business Combinations*, to the accompanying consolidated financial statements, and an increase in purchases of property and equipment during 2019.

Financing activities. The increase in *Net cash provided by financing activities* during 2019 compared to 2018 primarily resulted from the public offering of the New Notes in September 2019 offset by cash used for principal payments on net debt, repurchases of common stock, and the purchase of equity interests held by the home health and hospice management team during the third quarter of 2019. See also See Note 10, *Long-term Debt*, and Note 12, *Redeemable Noncontrolling Interests*, to the accompanying consolidated financial statements.

Contractual Obligations

Our consolidated contractual obligations as of December 31, 2019 are as follows (in millions):

| | Total | 2020 | 2021-2022 | 2023-2024 | 2025 and thereafter |
|--|-------------------|-----------------|------------------|-------------------|----------------------------|
| Long-term debt obligations: | | | | | |
| Long-term debt, excluding revolving credit facility and finance lease obligations ^(a) | \$ 2,633.5 | \$ 18.3 | \$ 41.5 | \$ 1,236.8 | \$ 1,336.9 |
| Revolving credit facility | 45.0 | — | — | 45.0 | — |
| Interest on long-term debt ^(b) | 840.0 | 135.8 | 269.3 | 230.2 | 204.7 |
| Finance lease obligations ^(c) | 640.5 | 50.4 | 94.4 | 90.0 | 405.7 |
| Operating lease obligations ^(d) | 384.2 | 57.5 | 98.6 | 75.1 | 153.0 |
| Purchase obligations ^(e) | 143.0 | 61.4 | 56.8 | 17.7 | 7.1 |
| Other long-term liabilities ^{(f)(g)} | 3.3 | 0.3 | 0.4 | 0.4 | 2.2 |
| Total | \$ 4,689.5 | \$ 323.7 | \$ 561.0 | \$ 1,695.2 | \$ 2,109.6 |

- ^(a) Included in long-term debt are amounts owed on our bonds payable and other notes payable. These borrowings are further explained in Note 10, *Long-term Debt*, to the accompanying consolidated financial statements.
- ^(b) Interest on our fixed rate debt is presented using the stated interest rate. Interest expense on our variable rate debt is estimated using the rate in effect as of December 31, 2019. Interest pertaining to our credit agreement and bonds is included to their respective ultimate maturity dates. Interest related to finance lease obligations is excluded from this line (see Note 7, *Leases*, and Note 10, *Long-term Debt*, to the accompanying consolidated financial statements). Amounts exclude amortization of debt discounts, amortization of loan fees, or fees for lines of credit that would be included in interest expense in our consolidated statements of operations.
- ^(c) Amounts include interest portion of future minimum finance lease payments.
- ^(d) Our inpatient rehabilitation segment leases approximately 14% of its hospitals as well as other property and equipment under operating leases in the normal course of business. Our home health and hospice segment leases relatively small office spaces in the localities it serves, space for its corporate office, and other equipment under operating leases in the normal course of business. Amounts include interest portion of future minimum operating lease payments. For more information, see Note 7, *Leases*, to the accompanying consolidated financial statements.
- ^(e) Purchase obligations include agreements to purchase goods or services that are enforceable and legally binding on Encompass Health and that specify all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum, or variable price provisions; and the approximate timing of the transaction. Purchase obligations exclude agreements that are cancelable without penalty. Our purchase obligations primarily relate to software licensing and support and medical equipment. Purchase obligations are not recognized in our consolidated balance sheet.
- ^(f) Because their future cash outflows are uncertain, the following noncurrent liabilities are excluded from the table above: general liability, professional liability, and workers' compensation risks, noncurrent amounts related to third-party billing audits, SARs, and deferred income taxes. As discussed above, the remaining SARs were exercised and settled during the first quarter of 2020. For more information, see Note 11, *Self-Insured Risks*, Note 14, *Share-Based*

Payments, and Note 18, *Contingencies and Other Commitments*, to the accompanying consolidated financial statements.

- (g) The table above does not include *Redeemable noncontrolling interests* of \$239.6 million because of the uncertainty surrounding the timing and amounts of any related cash outflows. As discussed above, a portion of the outstanding shares of Holdings were exercised and settled during the first quarter of 2020. See Note 12, *Redeemable Noncontrolling Interests*, to the accompanying consolidated financial statements.

Our capital expenditures include costs associated with our hospital refresh program, de novo projects, capacity expansions, technology initiatives, and building and equipment upgrades and purchases. During the year ended December 31, 2019, we made capital expenditures of approximately \$404 million for property and equipment, intangible assets, and capitalized software. These expenditures in 2019 are exclusive of approximately \$232 million in net cash related to our acquisition activity. During 2020, we expect to spend approximately \$440 million to \$510 million for capital expenditures. Approximately \$155 million to \$165 million of this budgeted amount is considered nondiscretionary expenditures, which we may refer to in other filings as “maintenance” expenditures. In addition, we expect to spend approximately \$50 million to \$100 million on home health and hospice acquisitions during 2020. Actual amounts spent will be dependent upon the timing of construction projects and acquisition opportunities for our home health and hospice business.

Authorizations for Returning Capital to Stakeholders

In October 2018, February 2019, and May 2019, our board of directors declared cash dividends of \$0.27 per share that were paid in January 2019, April 2019, and July 2019, respectively. On July 23, 2019, our board of directors approved an increase in our quarterly dividend and declared a cash dividend of \$0.28 per share, that was paid on October 15, 2019. On October 25, 2019, our board of directors declared a cash dividend of \$0.28 per share, that was paid on January 15, 2020 to stockholders of record on January 2, 2020. We expect quarterly dividends to be paid in January, April, July, and October. However, the actual declaration of any future cash dividends, and the setting of record and payment dates as well as the per share amounts, will be at the discretion of our board of directors after consideration of various factors, including our capital position and alternative uses of funds. Cash dividends are expected to be funded using cash flows from operations, cash on hand, and availability under our revolving credit facility.

On October 28, 2013, we announced our board of directors authorized the repurchase of up to \$200 million of our common stock, which amount was subsequently increased to \$250 million. On July 24, 2018, our board approved resetting the aggregate common stock repurchase authorization to \$250 million. As of December 31, 2019, approximately \$204 million remained under this authorization. The repurchase authorization does not require the repurchase of a specific number of shares, has an indefinite term, and is subject to termination at any time by our board of directors. Subject to certain terms and conditions, including a maximum price per share and compliance with federal and state securities and other laws, the repurchases may be made from time to time in open market transactions, privately negotiated transactions, or other transactions, including trades under a plan established in accordance with Rule 10b5-1 under the Securities Exchange Act of 1934, as amended. During 2019, we repurchased 0.8 million shares of our common stock in the open market for approximately \$46 million under this repurchase authorization using cash on hand. Future repurchases under this authorization generally are expected to be funded using a combination of cash on hand and availability under our \$1 billion revolving credit facility.

Adjusted EBITDA

Management believes Adjusted EBITDA as defined in our credit agreement is a measure of our ability to service our debt and our ability to make capital expenditures. We reconcile Adjusted EBITDA to *Net income* and to *Net cash provided by operating activities*.

We use Adjusted EBITDA on a consolidated basis as a liquidity measure. We believe this financial measure on a consolidated basis is important in analyzing our liquidity because it is the key component of certain material covenants contained within our credit agreement, which is discussed in more detail in Note 10, *Long-term Debt*, to the accompanying consolidated financial statements. These covenants are material terms of the credit agreement. Noncompliance with these financial covenants under our credit agreement—our interest coverage ratio and our leverage ratio—could result in our lenders requiring us to immediately repay all amounts borrowed. If we anticipated a potential covenant violation, we would seek relief from our lenders, which would have some cost to us, and such relief might be on terms less favorable to us than those in our existing credit agreement. In addition, if we cannot satisfy these financial covenants, we would be prohibited under our credit agreement from engaging in certain activities, such as incurring additional indebtedness, paying common stock dividends, making certain payments, and acquiring and disposing of assets. Consequently, Adjusted EBITDA is critical to our assessment of our liquidity.

In general terms, the credit agreement definition of Adjusted EBITDA, therein referred to as “Adjusted Consolidated EBITDA,” allows us to add back to consolidated *Net income* interest expense, income taxes, and depreciation and amortization and then add back to consolidated *Net income* (1) all unusual or nonrecurring items reducing consolidated *Net income* (of which only up to \$10 million in a year may be cash expenditures), (2) any losses from discontinued operations, (3) non-ordinary course fees, costs and expenses incurred with respect to any litigation or settlement, (4) share-based compensation expense, (5) costs and expenses associated with changes in the fair value of marketable securities, (6) costs and expenses associated with the issuance or prepayment debt and acquisitions, and (7) any restructuring charges not in excess of 20% of Adjusted Consolidated EBITDA. We also subtract from consolidated *Net income* all unusual or nonrecurring items to the extent they increase consolidated *Net income*.

Under the credit agreement, the Adjusted EBITDA calculation does not require us to deduct net income attributable to noncontrolling interests or gains on fair value adjustments of hedging and equity instruments, disposal of assets, and development activities. It also does not allow us to add back losses on fair value adjustments of hedging instruments or unusual or nonrecurring cash expenditures in excess of \$10 million. These items and amounts, in addition to the items falling within the credit agreement’s “unusual or nonrecurring” classification, may occur in future periods, but can vary significantly from period to period and may not directly relate to, or be indicative of, our ongoing liquidity or operating performance. Accordingly, the Adjusted EBITDA calculation presented here includes adjustments for them.

Adjusted EBITDA is not a measure of financial performance under generally accepted accounting principles in the United States of America, and the items excluded from Adjusted EBITDA are significant components in understanding and assessing financial performance. Therefore, Adjusted EBITDA should not be considered a substitute for *Net income* or cash flows from operating, investing, or financing activities. Because Adjusted EBITDA is not a measurement determined in accordance with GAAP and is thus susceptible to varying calculations, Adjusted EBITDA, as presented, may not be comparable to other similarly titled measures of other companies. Revenues and expenses are measured in accordance with the policies and procedures described in Note 1, *Summary of Significant Accounting Policies*, to the accompanying consolidated financial statements.

Our Adjusted EBITDA for the years ended December 31, 2019, 2018, and 2017 was as follows (in millions):

Reconciliation of Net Income to Adjusted EBITDA

| | For the Year Ended December 31, | | |
|--|---------------------------------|-----------------|-----------------|
| | 2019 | 2018 | 2017 |
| Net income | \$ 445.8 | \$ 375.4 | \$ 350.2 |
| Loss (income) from discontinued operations, net of tax, attributable to Encompass Health | 0.6 | (1.1) | 0.4 |
| Provision for income tax expense | 115.9 | 118.9 | 145.8 |
| Interest expense and amortization of debt discounts and fees | 159.7 | 147.3 | 154.4 |
| Loss on early extinguishment of debt | 7.7 | — | 10.7 |
| Government, class action, and related settlements | — | 52.0 | — |
| Net noncash loss on disposal of assets | 11.1 | 5.7 | 4.6 |
| Depreciation and amortization | 218.7 | 199.7 | 183.8 |
| Stock-based compensation expense | 114.4 | 85.9 | 47.7 |
| Net income attributable to noncontrolling interests | (87.1) | (83.1) | (79.1) |
| Transaction costs | 2.1 | 1.0 | — |
| Gain on consolidation of Yuma | (19.2) | — | — |
| SARs mark-to-market impact on noncontrolling interests | (5.0) | (2.6) | — |
| Change in fair market value of equity securities | (0.8) | 1.9 | — |
| Tax reform impact on noncontrolling interests | — | — | 4.6 |
| Payroll taxes on SARs exercise | 1.0 | — | — |
| Adjusted EBITDA | \$ 964.9 | \$ 901.0 | \$ 823.1 |

Reconciliation of Net Cash Provided by Operating Activities to Adjusted EBITDA

| | For the Year Ended December 31, | | |
|--|---------------------------------|-----------------|-----------------|
| | 2019 | 2018 | 2017 |
| Net cash provided by operating activities | \$ 635.3 | \$ 762.4 | \$ 658.3 |
| Interest expense and amortization of debt discounts and fees | 159.7 | 147.3 | 154.4 |
| Equity in net income of nonconsolidated affiliates | 6.7 | 8.7 | 8.0 |
| Net income attributable to noncontrolling interests in continuing operations | (87.1) | (83.1) | (79.1) |
| Amortization of debt-related items | (4.5) | (4.0) | (8.7) |
| Distributions from nonconsolidated affiliates | (6.6) | (8.3) | (8.6) |
| Current portion of income tax expense | 75.9 | 128.0 | 85.0 |
| Change in assets and liabilities | 180.1 | (46.0) | 7.4 |
| Tax reform impact on noncontrolling interests | — | — | 4.6 |
| Cash used in operating activities of discontinued operations | 4.4 | (0.8) | 0.6 |
| Transaction costs | 2.1 | 1.0 | — |
| SARs mark-to-market impact on noncontrolling interests | (5.0) | (2.6) | — |
| Change in fair market value of equity securities | (0.8) | 1.9 | — |
| Payroll taxes on SARs exercise | 1.0 | — | — |
| Other | 3.7 | (3.5) | 1.2 |
| Adjusted EBITDA | \$ 964.9 | \$ 901.0 | \$ 823.1 |

Growth in Adjusted EBITDA in 2019 compared to 2018 resulted primarily from revenue growth. For additional information see the “Results of Operations” and “Segment Results of Operations” sections of this Item.

Off-Balance Sheet Arrangements

In accordance with the definition under SEC rules, the following qualify as off-balance sheet arrangements:

- any obligation under certain guarantees or contracts;
- a retained or contingent interest in assets transferred to an unconsolidated entity or similar entity or similar arrangement that serves as credit, liquidity, or market risk support to that entity for such assets;
- any obligation under certain derivative instruments; and
- any obligation under a material variable interest held by the registrant in an unconsolidated entity that provides financing, liquidity, market risk, or credit risk support to the registrant, or engages in leasing, hedging, or research and development services with the registrant.

As of December 31, 2019, we do not have any material off-balance sheet arrangements.

As part of our ongoing business, we do not participate in transactions that generate relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities (“SPEs”), which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. As of December 31, 2019, we are not involved in any unconsolidated SPE transactions.

Critical Accounting Estimates

Our consolidated financial statements are prepared in accordance with GAAP. In connection with the preparation of our financial statements, we are required to make assumptions and estimates about future events and apply judgments that affect the reported amounts of assets, liabilities, revenue, expenses, and the related disclosures. We base our assumptions, estimates, and judgments on historical experience, current trends, and other factors we believe to be relevant at the time we prepared our consolidated financial statements. On a regular basis, we review the accounting policies, assumptions, estimates, and judgments to ensure our consolidated financial statements are presented fairly and in accordance with GAAP. However,

because future events and their effects cannot be determined with certainty, actual results could differ from our assumptions and estimates, and such differences could be material.

Our significant accounting policies are discussed in Note 1, *Summary of Significant Accounting Policies*, to the accompanying consolidated financial statements. We believe the following accounting estimates are the most critical to aid in fully understanding and evaluating our reported financial results, as they require our most difficult, subjective, or complex judgments, resulting from the need to make estimates about the effect of matters that are inherently uncertain. We have reviewed these critical accounting estimates and related disclosures with the audit committee of our board of directors.

Revenue Recognition

We recognize net operating revenue in the reporting period in which we perform the service based on our best estimate of the transaction price for the type of service provided to the patient. Our estimate of the transaction price includes estimates of price concessions for such items as contractual allowances (principally for patients covered by Medicare, Medicare Advantage, Medicaid, and other third-party payors), potential adjustments that may arise from payment and other reviews, and uncollectible amounts. See Note 1, *Summary of Significant Accounting Policies*, “Net Operating Revenues,” to the accompanying consolidated financial statements of this report for a complete discussion of our revenue recognition policies.

Our patient accounting systems calculate contractual allowances on a patient-by-patient basis based on the rates in effect for each primary third-party payor. Certain other factors that are considered and could influence the estimated transaction price are assumed to remain consistent with the experience for patients discharged in similar time periods for the same payor classes, and additional adjustments are provided to account for these factors.

Management continually reviews the revenue transaction price estimation process to consider and incorporate updates to laws and regulations and the frequent changes in managed care contractual terms that result from contract renegotiations and renewals. In addition, laws and regulations governing the Medicare and Medicaid programs are complex and subject to interpretation. If actual results are not consistent with our assumptions and judgments, we may be exposed to gains or losses that could be material.

Due to complexities involved in determining amounts ultimately due under reimbursement arrangements with third-party payors, which are often subject to interpretation and review, we may receive reimbursement for healthcare services authorized and provided that is different from our estimates, and such differences could be material. However, we continually review the amounts actually collected in subsequent periods in order to determine the amounts by which our estimates differed. Historically, such differences have not been material from either a quantitative or qualitative perspective.

The collection of outstanding receivables from third-party payors and patients is our primary source of cash and is critical to our operating performance. Our primary collection risks relate to patient responsibility amounts and claims reviews conducted by MACs or other contractors.

The table below shows a summary of our net accounts receivable balances as of December 31, 2019 and 2018. Information on the concentration of total patient accounts receivable by payor class can be found in Note 1, *Summary of Significant Accounting Policies*, “Accounts Receivable,” to the accompanying consolidated financial statements.

| | As of December 31, | |
|--|---------------------------|-----------------|
| | 2019 | 2018 |
| | (In Millions) | |
| Current: | | |
| 0 - 30 Days | \$ 385.6 | \$ 362.5 |
| 31 - 60 Days | 45.2 | 43.7 |
| 61 - 90 Days | 25.4 | 18.4 |
| 91 - 120 Days | 12.7 | 10.0 |
| 120 + Days | 29.8 | 25.3 |
| Patient accounts receivable | 498.7 | 459.9 |
| Other accounts receivable | 7.4 | 7.8 |
| | 506.1 | 467.7 |
| Noncurrent patient accounts receivable | 152.1 | 155.5 |
| Accounts receivable | <u>\$ 658.2</u> | <u>\$ 623.2</u> |

Changes in general economic conditions (such as increased unemployment rates or periods of recession), business office operations, payor mix, or trends in federal or state governmental and private employer healthcare coverage could affect our collection of accounts receivable. Our collection risks include patient accounts for which the primary insurance carrier has paid the amounts covered by the applicable agreement, but patient responsibility amounts (deductibles and co-payments) remain outstanding, pre-payment claim reviews by our respective MACs, and reimbursement claims audits by governmental or other payors and their agents. As of December 31, 2019 and 2018, \$144.5 million and \$149.3 million of our patient accounts receivable represented denials that were under review or audit in our inpatient rehabilitation segment. If actual results are not consistent with our assumptions and judgments, we may be exposed to gains or losses that could be material. See Note 1, *Summary of Significant Accounting Policies*, “Net Operating Revenues” and “Accounts Receivable,” to the accompanying consolidated financial statements of this report.

Self-Insured Risks

We are self-insured for certain losses related to professional liability, general liability, and workers’ compensation risks. Although we obtain third-party insurance coverage to limit our exposure to these claims, a substantial portion of our professional liability, general liability, and workers’ compensation risks are insured through a wholly owned insurance subsidiary. See Note 11, *Self-Insured Risks*, to the accompanying consolidated financial statements for a more complete discussion of our self-insured risks.

Our self-insured liabilities contain uncertainties because management must make assumptions and apply judgment to estimate the ultimate cost of reported claims and claims incurred but not reported as of the balance sheet date. Our reserves and provisions for professional liability, general liability, and workers’ compensation risks are based largely upon semi-annual actuarial calculations prepared by third-party actuaries.

Periodically, we review our assumptions and the valuations provided by third-party actuaries to determine the adequacy of our self-insurance reserves. The following are certain of the key assumptions and other factors that significantly influence our estimate of self-insurance reserves: historical claims experience; trending of loss development factors; trends in the frequency and severity of claims; coverage limits of third-party insurance; demographic information; statistical confidence levels; medical cost inflation; payroll dollars; and hospital patient census.

The time period to resolve claims can vary depending upon the jurisdiction, the nature, and the form of resolution of the claims. The estimation of the timing of payments beyond a year can vary significantly. In addition, if current and future claims differ from historical trends, our estimated reserves for self-insured claims may be significantly affected. Our self-insurance reserves are not discounted.

Given the number of factors used to establish our self-insurance reserves, we believe there is limited benefit to isolating any individual assumption or parameter from the detailed computational process and calculating the impact of changing that single item. Instead, we believe the sensitivity in our reserve estimates is best illustrated by changes in the statistical confidence level used in the computations. Using a higher statistical confidence level increases the estimated self-insurance reserves. The following table shows the sensitivity of our recorded self-insurance reserves to the statistical confidence level (in millions):

Net self-insurance reserves as of December 31, 2019:

| | |
|--|-------|
| As reported, with 50% statistical confidence level | 130.9 |
| With 70% statistical confidence level | 139.9 |

We believe our efforts to improve patient safety and overall quality of care, as well as our efforts to reduce workplace injuries, have helped contain our ultimate claim costs. See Note 11, *Self-Insured Risks*, to the accompanying consolidated financial statements for additional information.

We believe our self-insurance reserves are adequate to cover projected costs. Due to the considerable variability that is inherent in such estimates, there can be no assurance the ultimate liability will not exceed management's estimates. If actual results are not consistent with our assumptions and judgments, we may be exposed to gains or losses that could be material.

Goodwill

Absent any impairment indicators, we evaluate goodwill for impairment as of October 1st of each year. We test goodwill for impairment at the reporting unit level and are required to make certain subjective and complex judgments on a number of matters, including assumptions and estimates used to determine the fair value of our inpatient rehabilitation and home health and hospice reporting units. We assess qualitative factors in each reporting unit to determine whether it is necessary to perform the quantitative goodwill impairment test. The quantitative impairment test is required only if we conclude it is more likely than not a reporting unit's fair value is less than its carrying amount.

If, based on our qualitative assessment, we were to believe we must perform the quantitative goodwill impairment test, we would determine the fair value of the applicable reporting unit using generally accepted valuation techniques including the income approach and the market approach. We would validate our estimates under the income approach by reconciling the estimated fair value of the reporting units determined under the income approach to our market capitalization and estimated fair value determined under the market approach. Values from the income approach and market approach would then be evaluated and weighted to arrive at the estimated aggregate fair value of the reporting units.

The income approach includes the use of each reporting unit's projected operating results and cash flows that are discounted using a weighted-average cost of capital that reflects market participant assumptions. The projected operating results use management's best estimates of economic and market conditions over the forecasted period including assumptions for pricing and volume, operating expenses, and capital expenditures. Other significant estimates and assumptions include cost-saving synergies and tax benefits that would accrue to a market participant under a fair value methodology. The market approach estimates fair value through the use of observable inputs, including the Company's stock price.

See Note 1, *Summary of Significant Accounting Policies*, "Goodwill and Other Intangibles," and Note 8, *Goodwill and Other Intangible Assets*, to the accompanying consolidated financial statements for additional information.

The following events and circumstances are certain of the qualitative factors we consider in evaluating whether it is more likely than not the fair value of a reporting unit is less than its carrying amount:

- Macroeconomic conditions, such as deterioration in general economic conditions, limitations on accessing capital, or other developments in equity and credit markets;
- Industry and market considerations and changes in healthcare regulations, including reimbursement and compliance requirements under the Medicare and Medicaid programs;
- Cost factors, such as an increase in labor, supply, or other costs;
- Overall financial performance, such as negative or declining cash flows or a decline in actual or forecasted revenue or earnings;

- Other relevant company-specific events, such as material changes in management or key personnel or outstanding litigation;
- Material events, such as a change in the composition or carrying amount of each reporting unit's net assets, including acquisitions and dispositions;
- Consideration of the relationship of our market capitalization to our book value, as well as a sustained decrease in our share price; and
- Length of time since most recent qualitative analysis.

In the fourth quarter of 2019, we performed our annual evaluation of goodwill and determined no adjustment to impair goodwill was necessary. If actual results are not consistent with our assumptions and estimates, we may be exposed to goodwill impairment charges. However, at this time, we continue to believe our inpatient rehabilitation and home health and hospice reporting units are not at risk for any impairment charges.

Income Taxes

We provide for income taxes using the asset and liability method. We also evaluate our tax positions and establish assets and liabilities in accordance with the applicable accounting guidance on uncertainty in income taxes. See Note 1, *Summary of Significant Accounting Policies*, "Income Taxes," and Note 16, *Income Taxes*, to the accompanying consolidated financial statements for a more complete discussion of income taxes and our policies related to income taxes.

The application of income tax law is inherently complex. Laws and regulations in this area are voluminous and are often ambiguous. We are required to make many subjective assumptions and judgments regarding our income tax exposures. Interpretations of and guidance surrounding income tax laws and regulations change over time. As such, changes in our subjective assumptions and judgments can materially affect amounts recognized in our consolidated financial statements.

The ultimate recovery of certain of our deferred tax assets is dependent on the amount and timing of taxable income we will ultimately generate in the future, as well as other factors. A high degree of judgment is required to determine the extent a valuation allowance should be provided against deferred tax assets. On a quarterly basis, we assess the likelihood of realization of our deferred tax assets considering all available evidence, both positive and negative. Our operating performance in recent years, the scheduled reversal of temporary differences, our forecast of taxable income in future periods in each applicable tax jurisdiction, our ability to sustain a core level of earnings, and the availability of prudent tax planning strategies are important considerations in our assessment. Our forecast of future earnings includes assumptions about patient volumes, payor reimbursement, labor costs, hospital operating expenses, and interest expense. Based on the weight of available evidence, we determine if it is more likely than not our deferred tax assets will be realized in the future.

Our liability for unrecognized tax benefits contains uncertainties because management is required to make assumptions and to apply judgment to estimate the exposures associated with our various filing positions which are periodically audited by tax authorities. In addition, our effective income tax rate is affected by changes in tax law, the tax jurisdictions in which we operate, and the results of income tax audits.

During the year ended December 31, 2019, we increased our valuation allowance by \$4.7 million. As of December 31, 2019, we had a remaining valuation allowance of \$38.4 million which primarily related to state NOLs. At the state jurisdiction level, we determined it was necessary to maintain a valuation allowance due to uncertainties related to our ability to utilize a portion of the NOLs before they expire. The amount of the valuation allowance has been determined for each tax jurisdiction based on the weight of all available evidence, as described above, including management's estimates of taxable income for each jurisdiction in which we operate over the periods in which the related deferred tax assets will be recoverable.

While management believes the assumptions included in its forecast of future earnings are reasonable and it is more likely than not the net deferred tax asset balance as of December 31, 2019 will be realized, no such assurances can be provided. If management's expectations for future operating results on a consolidated basis or at the state jurisdiction level vary from actual results due to changes in healthcare regulations, general economic conditions, or other factors, we may need to increase our valuation allowance, or reverse amounts recorded currently in the valuation allowance, for all or a portion of our deferred tax assets. Similarly, future adjustments to our valuation allowance may be necessary if the timing of future tax deductions is different than currently expected. Our income tax expense in future periods will be reduced or increased to the extent of offsetting decreases or increases, respectively, in our valuation allowance in the period when the change in circumstances occurs. These changes could have a significant impact on our future earnings.

Assessment of Loss Contingencies

We have legal and other contingencies that could result in significant losses upon the ultimate resolution of such contingencies. See Note 1, *Summary of Significant Accounting Policies*, “Litigation Reserves,” and Note 18, *Contingencies and Other Commitments*, to the accompanying consolidated financial statements for additional information.

We have provided for losses in situations where we have concluded it is probable a loss has been or will be incurred and the amount of loss is reasonably estimable. A significant amount of judgment is involved in determining whether a loss is probable and reasonably estimable due to the uncertainty involved in determining the likelihood of future events and estimating the financial statement impact of such events. If further developments or resolution of a contingent matter are not consistent with our assumptions and judgments, we may need to recognize a significant charge in a future period related to an existing contingent matter.

Business Combinations

We account for acquisitions of entities that qualify as business combinations under the acquisition method of accounting. Under the acquisition method of accounting, the total consideration is allocated to the tangible and identifiable intangible assets acquired and liabilities assumed based on their estimated fair values at the acquisition date. The excess of the purchase price over the fair values of these identifiable assets and liabilities is recorded as goodwill. During the measurement period, which may be up to one year from the acquisition date, we may record adjustments to the assets acquired and liabilities assumed with the corresponding offset to goodwill.

In determining the fair value of assets acquired and liabilities assumed in a business combination, we primarily use the income and multi-period excess earnings approaches to estimate the value of our most significant acquired intangible assets. Both income approaches utilize projected operating results and cash flows and include significant assumptions such as base revenue, revenue growth rate, projected EBITDA margin, discount rates, rates of increase in operating expenses, and the future effective income tax rates. The valuations of our significant acquired businesses have been performed by a third-party valuation specialist under our management’s supervision. We believe that the estimated fair value assigned to the assets acquired and liabilities assumed is based on reasonable assumptions and estimates that marketplace participants would use. However, such assumptions are inherently uncertain and actual results could differ from those estimates. Future changes in our assumptions or the interrelationship of those assumptions may result in purchase price allocations that are different than those recorded in recent years.

Acquisition related costs are not considered part of the consideration paid and are expensed as operating expenses as incurred. Contingent consideration, if any, is measured at fair value initially on the acquisition date as well as subsequently at the end of each reporting period until the contingency is resolved and settlement occurs. Subsequent adjustments to contingent considerations are recorded in our consolidated statements of operations. We include the results of operations of the businesses acquired as of the beginning of the acquisition dates.

Recent Accounting Pronouncements

For information regarding recent accounting pronouncements, see Note 1, *Summary of Significant Accounting Policies*, to the accompanying consolidated financial statements.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Our primary exposure to market risk is to changes in interest rates on our variable rate long-term debt. We use a sensitivity analysis model to evaluate the impact of interest rate changes on our variable rate debt. As of December 31, 2019, our primary variable rate debt outstanding related to \$45.0 million in advances under our revolving credit facility and \$265.2 million outstanding under our term loan facilities. Assuming outstanding balances were to remain the same, a 1% increase in interest rates would result in an incremental negative cash flow of approximately \$2.7 million over the next 12 months, while a 1% decrease in interest rates would result in an incremental positive cash flow of approximately \$2.7 million over the next 12 months.

The fair value of our fixed rate debt is determined using inputs, including quoted prices in nonactive markets, that are observable either directly or indirectly, or *Level 2* inputs within the fair value hierarchy, and is summarized as follows (in millions):

| Financial Instrument: | December 31, 2019 | | December 31, 2018 | |
|-------------------------------------|-------------------|--------------|-------------------|--------------|
| | Book Value | Market Value | Book Value | Market Value |
| 5.125% Senior Notes due 2023 | | | | |
| Carrying Value | \$ 297.3 | \$ — | \$ 296.6 | \$ — |
| Unamortized debt discount and fees | 2.7 | — | 3.4 | — |
| Principal amount | 300.0 | 306.6 | 300.0 | 298.5 |
| 5.75% Senior Notes due 2024 | | | | |
| Carrying Value | 697.3 | — | 1,194.7 | — |
| Unamortized debt discount and fees | 2.7 | — | 5.3 | — |
| Principal amount | 700.0 | 708.8 | 1,200.0 | 1,200.0 |
| 5.75% Senior Notes due 2025 | | | | |
| Carrying Value | 345.6 | — | 345.0 | — |
| Unamortized debt discount and fees | 4.4 | — | 5.0 | — |
| Principal amount | 350.0 | 369.7 | 350.0 | 339.5 |
| 4.50% Senior Notes due 2028 | | | | |
| Carrying Value | 491.7 | — | — | — |
| Unamortized debt discount and fees | 8.3 | — | — | — |
| Principal amount | 500.0 | 519.4 | — | — |
| 4.75% Senior Notes due 2030 | | | | |
| Carrying Value | 491.7 | — | — | — |
| Unamortized debt discount and fees | 8.3 | — | — | — |
| Principal amount | 500.0 | 520.0 | — | — |

Foreign operations, and the related market risks associated with foreign currencies, are currently, and have been, insignificant to our financial position, results of operations, and cash flows.

See also Note 10, *Long-term Debt*, to the accompanying consolidated financial statements.

Item 8. Financial Statements and Supplementary Data

Our consolidated financial statements and related notes are filed together with this report. See the index to financial statements on page F-1 for a list of financial statements filed with this report.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, an evaluation was carried out by our management, including our chief executive officer and chief financial officer, of the effectiveness of our disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Our disclosure controls and procedures are designed to ensure that information required to be disclosed in reports we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission and that such information is accumulated and communicated to our management, including our chief executive officer and chief financial officer, to allow timely decisions regarding required disclosures. Based on our evaluation, our chief executive officer and chief financial officer concluded that, as of December 31, 2019, our disclosure controls and procedures were effective.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles in the United States of America. Internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on its financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, we conducted an assessment of the effectiveness of our internal control over financial reporting as of December 31, 2019. In making this assessment, management used the criteria set forth in *Internal Control-Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission, the COSO framework. Based on our evaluation, our chief executive officer and chief financial officer concluded that, as of December 31, 2019, our internal control over financial reporting was effective.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2019 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears herein.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal controls over financial reporting that occurred during the quarter ended December 31, 2019 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

None.

PART III

We expect to file a definitive proxy statement relating to our 2020 Annual Meeting of Stockholders (the “2020 Proxy Statement”) with the United States Securities and Exchange Commission, pursuant to Regulation 14A, not later than 120 days after the end of our most recent fiscal year. Accordingly, certain information required by Part III has been omitted under General Instruction G(3) to Form 10-K. Only the information from the 2020 Proxy Statement that specifically addresses disclosure requirements of Items 10-14 below is incorporated by reference.

Item 10. Directors and Executive Officers of the Registrant

The information required by Item 10 is hereby incorporated by reference from our 2020 Proxy Statement under the captions “Items of Business Requiring Your Vote—Proposal 1—Election of Directors,” “Corporate Governance and Board Structure—Corporate Governance—Code of Ethics,” “—Board Structure and Committees—Audit Committee,” “—Board Composition and Director Nomination Process—Director Nominees Proposed by Stockholders,” and “Executive Officers.”

Item 11. Executive Compensation

The information required by Item 11 is hereby incorporated by reference from our 2020 Proxy Statement under the captions “Corporate Governance and Board Structure—Compensation of Directors,” “Compensation and Human Capital Committee Matters,” and “Executive Compensation.”

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by Item 12 is hereby incorporated by reference from our 2020 Proxy Statement under the captions “Executive Compensation—Equity Compensation Plans” and “Security Ownership of Certain Beneficial Owners and Management.”

Item 13. Certain Relationships and Related Transactions and Director Independence

The information required by Item 13 is hereby incorporated by reference from our 2020 Proxy Statement under the captions “Corporate Governance and Board Structure—Director Independence” and “Certain Relationships and Related Transactions.”

Item 14. Principal Accountant Fees and Services

The information required by Item 14 is hereby incorporated by reference from our 2020 Proxy Statement under the caption “Items of Business Requiring Your Vote—Proposal 2—Ratification of Appointment of Independent Registered Public Accounting Firm.”

PART IV

Item 15. Exhibits and Financial Statement Schedules

Financial Statements

See the accompanying index on page F-1 for a list of financial statements filed as part of this report.

Financial Statement Schedules

None.

Exhibits

See Exhibit Index immediately following page F-80 of this report.

Item 16. Form 10-K Summary

Not applicable.

POWER OF ATTORNEY

Each person whose signature appears below hereby constitutes and appoints Patrick Darby his true and lawful attorney-in-fact and agent with full power of substitution and re-substitution, for him in his name, place and stead, in any and all capacities, to sign any and all amendments to this Report and to file the same, with all exhibits thereto, and other documents in connection therewith, with the Securities and Exchange Commission, and hereby grants to such attorney-in-fact and agent, full power and authority to do and perform each and every act and thing requisite and necessary to be done, as fully to all intents and purposes as he might or could do in person, hereby ratifying and confirming all that said attorney-in-fact and agent or his substitute or substitutes may lawfully do or cause to be done by virtue hereof.

[Table of Contents](#)

Pursuant to the requirements of the Securities Exchange Act of 1934, this Report has been signed below by the following persons on behalf of the Registrant and in the capacities and on the dates indicated.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Encompass Health Corporation

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Encompass Health Corporation and its subsidiaries (the “Company”) as of December 31, 2019 and 2018, and the related consolidated statements of operations, comprehensive income, shareholders’ equity and cash flows for each of the three years in the period ended December 31, 2019, including the related notes (collectively referred to as the “consolidated financial statements”). We also have audited the Company's internal control over financial reporting as of December 31, 2019, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2019 and 2018, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2019 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2019, based on criteria established in Internal Control - Integrated Framework (2013) issued by the COSO.

Change in Accounting Principle

As discussed in Note 1 to the consolidated financial statements, the Company changed the manner in which it accounts for leases in 2019.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control Over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on the Company’s consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the

company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the consolidated financial statements that were communicated or required to be communicated to the audit committee and that (i) relate to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Valuation of Inpatient Rehabilitation Segment Patient Accounts Receivable - Contractual Allowances and Uncollectible Amounts

As described in Notes 1 and 5 to the consolidated financial statements, revenues for inpatient rehabilitation services are recognized (or measured) using the input method as therapy, nursing, and auxiliary services are provided based on management's estimate of the respective transaction price. Management's estimate of the transaction price includes estimates of price concessions for such items as contractual allowances, potential adjustments that may arise from payment and other reviews, and uncollectible amounts. Revenues recognized by the inpatient rehabilitation segment are subject to a number of elements which impact both the overall amount of revenue realized as well as the timing of the collection of the related patient accounts receivable. Factors considered by management in determining the estimated transaction price include the patient's total length of stay for in-house patients, each patient's discharge destination, the proportion of patients with secondary insurance coverage and the level of reimbursement under that secondary coverage, and the amount of charges that will be disallowed by payors. Management assumes these additional factors will remain consistent with the experience for patients discharged in similar time periods for the same payor classes. The Company's consolidated accounts receivable balance is \$658.2 million as of December 31, 2019. Management estimates the allowance for uncollectible amounts based on the aging of accounts receivable, historical collection experience for each type of payor, and other relevant factors. As disclosed by management, changes in general economic conditions (such as increased unemployment rates or periods of recession) are also considered.

The principal considerations for our determination that performing procedures relating to the valuation of inpatient rehabilitation segment patient accounts receivable - contractual allowances and uncollectible amounts is a critical audit matter are there was significant judgment by management to estimate patient accounts receivable and the amount that will ultimately be collected under the terms of the third-party payor contracts. This in turn led to significant auditor judgment and effort to evaluate the audit evidence obtained related to the valuation of inpatient rehabilitation segment patient accounts receivable.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the valuation of inpatient rehabilitation patient accounts receivable, which included controls over management's approach, assumptions, and data used to estimate contractual allowances and uncollectible amounts and determine patient accounts receivable. These procedures also included, among others, i) evaluating management's process for developing the estimate for contractual allowances and uncollectible amounts, as well as the relevance and use of the historical billing and collection data as an input to the valuation model, ii) testing the accuracy of a sample of revenue transactions and a sample of cash collections from the historical billing data and historical collection data which is used in management's estimation of contractual allowances and uncollectible amounts, iii) and evaluating the historical accuracy of management's process for developing the estimate of the amount which will ultimately be collected by comparing actual cash collections to the previously recorded patient accounts receivable.

Valuation of Inpatient Rehabilitation Segment Patient Accounts Receivable - Denied Claims

As described in Note 1 to the consolidated financial statements, the Company's Medicare claims have been subject to review by Medicare Administrative Contractors ("MACs") under various programs such as "widespread probes" and the Targeted Probe and Educate initiative. The MACs reviews have resulted in denial of payment for claims billed under certain diagnosis codes. As of December 31, 2019, \$144.5 million of the Company's patient accounts receivable represented denials that were under review or audit. While the Company generally appeals most of the denials of claims by the MACs, the resolution of these appeals may take several years, and the future success rate of these appeals is uncertain. Adjustments related to payment reviews by third-party payors or their agents are based on its historical experience and success rates in the claims adjudication process.

The principal considerations for our determination that performing procedures relating to the valuation of inpatient rehabilitation patient accounts receivable - denied claims is a critical audit matter are there was significant judgment by management to estimate the ultimate expected amount of collectible accounts receivable related to denied claims. This in turn led to a high degree of auditor judgment and effort to evaluate the audit evidence obtained related to the valuation of such denied claims.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the valuation of inpatient rehabilitation patient accounts receivable related to denied claims, which included controls around the identification of denied claims at period-end, as well as controls to assess the reasonableness of the success rate estimates. These procedures also included, among others, i) evaluating management's process for developing the estimate for collectible amounts related to denied claims, as well as the relevance and use of the historical billing and collection data as an input to the valuation analysis, ii) evaluating the reasonableness of management's analysis and success rate estimate for denied claims by comparing it to the Company's adjudicated denied claim results, iii) performing testing over a sample of denied revenue transactions by inspecting evidence that the claim was denied, and iv) performing testing over a sample of cash collections from the historical collection data used in management's estimation of collectability.

Acquisition of Alacare Home Health & Hospice

As discussed in Note 2 to the consolidated financial statements, the Company acquired Alacare Home Health & Hospice ("Alacare") for consideration of \$217.8 million in 2019, which resulted in \$51.0 million of intangible assets being recorded. As disclosed by management, in determining the fair value of assets acquired and liabilities assumed, management used the income and multi-period excess earnings approaches to estimate the value of the most significant acquired intangible assets. Both income approaches utilize projected operating results and cash flows and include significant assumptions such as base revenue, revenue growth rate, projected EBITDA margin, discount rates, rates of increase in operating expenses, and the future effective income tax rates.

The principal considerations for our determination that performing procedures relating to the acquisition of Alacare is a critical audit matter are (i) there was a high degree of auditor judgment and subjectivity in applying procedures relating to the valuation of the acquired intangible assets due to the significant amount of judgement by management when developing the estimates; (ii) significant audit effort was required in evaluating assumptions relating to the cash flow projections, including revenue growth rates, projected EBITDA margins, and the discount rate; and (iii) the audit effort involved the use of professionals with specialized skill and knowledge, to evaluate the audit evidence obtained.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the financial statements. These procedures included testing the effectiveness of controls relating to the acquisition accounting, including controls over management's valuation of the intangible assets and controls over development of the assumptions related to the valuation of the intangible assets, such as cash flow projections, including revenue growth rates, projected EBITDA margins, and the discount rate. These procedures also included, among others, (i) reading the purchase agreement, (ii) testing management's process for estimating the fair value of intangible assets, and (iii) testing management's cash flow projections used to estimate the fair value of the intangible assets, using professionals with specialized skill and knowledge to assist in doing so. Testing management's process included evaluating the appropriateness of the valuation methods and the reasonableness of significant assumptions in the cash flow projections, including revenue growth rates, projected EBITDA margins, and the discount rate for intangible assets. Evaluating the reasonableness of the cash flow projections, including the revenue growth rates and projected EBITDA margins, involved considering past performance of the acquired business, as well as economic and industry forecasts and the performance of peer companies in the market. The discount rate was evaluated by the aforementioned professionals with specialized skill and knowledge by considering the cost

of capital of comparable businesses and other industry factors. These professionals also assisted in the evaluation of the appropriateness of the Company's valuation models.

The accompanying notes to consolidated financial statements are an integral part of these statements.

Notes to Consolidated Financial Statements

1. Summary of Significant Accounting Policies:*Organization and Description of Business—*

Encompass Health Corporation, incorporated in Delaware in 1984, including its subsidiaries, is one of the nation's largest providers of post-acute healthcare services, offering both facility-based and home-based post-acute services in 37 states and Puerto Rico through our network of inpatient rehabilitation hospitals, home health agencies, and hospice agencies. We manage our operations and disclose financial information using two reportable segments: (1) inpatient rehabilitation and (2) home health and hospice. See Note 19, *Segment Reporting*.

Basis of Presentation and Consolidation—

The accompanying consolidated financial statements of Encompass Health and its subsidiaries were prepared in accordance with generally accepted accounting principles in the United States of America and include the assets, liabilities, revenues, and expenses of all wholly-owned subsidiaries, majority-owned subsidiaries over which we exercise control, and, when applicable, entities in which we have a controlling financial interest.

We use the equity method to account for our investments in entities we do not control, but where we have the ability to exercise significant influence over operating and financial policies. Consolidated *Net income attributable to Encompass Health* includes our share of the net earnings of these entities. The difference between consolidation and the equity method impacts certain of our financial ratios because of the presentation of the detailed line items reported in the consolidated financial statements for consolidated entities compared to a one line presentation of equity method investments.

We use the cost method to account for our investments in entities we do not control and for which we do not have the ability to exercise significant influence over operating and financial policies. In accordance with the cost method, these investments are recorded at the lower of cost or fair value, as appropriate.

We eliminate all significant intercompany accounts and transactions from our financial results.

Variable Interest Entities—

Any entity considered a variable interest entity ("VIE") is evaluated to determine which party is the primary beneficiary and thus should consolidate the VIE. This analysis is complex, involves uncertainties, and requires significant judgment on various matters. In order to determine if we are the primary beneficiary of a VIE, we must determine what activities most significantly impact the economic performance of the entity, whether we have the power to direct those activities, and if our obligation to absorb losses or receive benefits from the VIE could potentially be significant to the VIE.

Use of Estimates and Assumptions—

The preparation of our consolidated financial statements in conformity with GAAP requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the reporting periods. Significant estimates and assumptions are used for, but not limited to: (1) revenue reserves for contractual adjustments and uncollectible amounts; (2) fair value of acquired assets and assumed liabilities in business combinations; (3) asset impairments, including goodwill; (4) depreciable lives of assets; (5) useful lives of intangible assets; (6) economic lives and fair value of leased assets; (7) income tax valuation allowances; (8) uncertain tax positions; (9) fair value of stock options and restricted stock containing a market condition; (10) fair value of redeemable noncontrolling interests; (11) reserves for self-insured healthcare plans; (12) reserves for professional, workers' compensation, and comprehensive general insurance liability risks; and (13) contingency and litigation reserves. Future events and their effects cannot be predicted with certainty; accordingly, our accounting estimates require the exercise of judgment. The accounting estimates used in the preparation of our consolidated financial statements will change as new events occur, as more experience is acquired, as additional information is obtained, and as our operating environment changes. We evaluate and update our assumptions and estimates on an ongoing basis and may employ outside experts to assist in our evaluation, as considered necessary. Actual results could differ from those estimates.

Notes to Consolidated Financial Statements

Risks and Uncertainties—

As a healthcare provider, we are required to comply with extensive and complex laws and regulations at the federal, state, and local government levels. These laws and regulations relate to, among other things:

- licensure, certification, and accreditation;
- policies, either at the national or local level, delineating what conditions must be met to qualify for reimbursement under Medicare (also referred to as coverage requirements);
- coding and billing for services;
- requirements of the 60% compliance threshold under The Medicare, Medicaid and State Children's Health Insurance Program (SCHIP) Extension Act of 2007;
- relationships with physicians and other referral sources, including physician self-referral and anti-kickback laws;
- quality of medical care;
- use and maintenance of medical supplies and equipment;
- maintenance and security of patient information and medical records;
- acquisition and dispensing of pharmaceuticals and controlled substances; and
- disposal of medical and hazardous waste.

In the future, changes in these laws or regulations or the manner in which they are enforced could subject our current or past practices to allegations of impropriety or illegality or could require us to make changes in our hospitals, equipment, personnel, services, capital expenditure programs, operating procedures, contractual arrangements, and patient admittance practices, as well as the way in which we deliver home health and hospice services.

If we fail to comply with applicable laws and regulations, we could be required to return portions of reimbursements deemed after the fact to have not been appropriate. We could also be subjected to liabilities, including (1) criminal penalties, (2) civil penalties, including monetary penalties and the loss of our licenses to operate one or more of our hospitals or agencies, and (3) exclusion or suspension of one or more of our hospitals from participation in the Medicare, Medicaid, and other federal and state healthcare programs which, if lengthy in duration and material to us, could potentially trigger a default under our credit agreement. Because Medicare comprises a significant portion of our *Net operating revenues*, failure to comply with the laws and regulations governing the Medicare program and related matters, including anti-kickback and anti-fraud requirements, could materially and adversely affect us. Specifically, reductions in reimbursements, substantial damages, and other remedies assessed against us could have a material adverse effect on our business, financial position, results of operation, and cash flows. Even the assertion of a violation, depending on its nature, could have a material adverse effect upon our stock price or reputation.

Historically, the United States Congress and some state legislatures have periodically proposed significant changes in regulations governing the healthcare system. Many of these changes have resulted in limitations on the increases in and, in some cases, significant roll-backs or reductions in the levels of payments to healthcare providers for services under many government reimbursement programs. There can be no assurance that future governmental initiatives will not result in pricing roll-backs or freezes or reimbursement reductions. Because we receive a significant percentage of our revenues from Medicare, such changes in legislation might have a material adverse effect on our financial position, results of operations, and cash flows.

In addition, there are increasing pressures from many third-party payors to control healthcare costs and to reduce or limit increases in reimbursement rates for medical services. Our relationships with managed care and nongovernmental third-party payors are generally governed by negotiated agreements. These agreements set forth the amounts we are entitled to receive for our services. We could be adversely affected in some of the markets where we operate if we are unable to negotiate and maintain favorable agreements with third-party payors.

Notes to Consolidated Financial Statements

Our third-party payors may also, from time to time, request audits of the amounts paid, or to be paid, to us. We could be adversely affected in some of the markets where we operate if the auditing payor alleges substantial overpayments were made to us due to coding errors or lack of documentation to support medical necessity determinations.

As discussed in Note 18, *Contingencies and Other Commitments*, we are a party to a number of lawsuits. We cannot predict the outcome of litigation filed against us. Substantial damages or other monetary remedies assessed against us could have a material adverse effect on our business, financial position, results of operations, and cash flows.

Net Operating Revenues—

Our *Net operating revenues* disaggregated by payor source and segment are as follows (in millions):

| | Inpatient Rehabilitation | | | Home Health and Hospice | | | Consolidated | | |
|--------------------------|---------------------------------|------------------|------------------|--------------------------------|-----------------|-----------------|--------------------------------|------------------|------------------|
| | Year Ended December 31, | | | Year Ended December 31, | | | Year Ended December 31, | | |
| | 2019 | 2018 | 2017 | 2019 | 2018 | 2017 | 2019 | 2018 | 2017 |
| Medicare | \$2,537.3 | \$2,451.7 | \$2,313.6 | \$ 920.0 | \$ 794.5 | \$ 662.9 | \$3,457.3 | \$3,246.2 | \$2,976.5 |
| Medicare Advantage | 375.5 | 306.5 | 261.0 | 111.9 | 88.6 | 74.8 | 487.4 | 395.1 | 335.8 |
| Managed care | 342.7 | 343.3 | 335.6 | 39.1 | 33.2 | 29.1 | 381.8 | 376.5 | 364.7 |
| Medicaid | 110.3 | 101.3 | 93.2 | 18.4 | 11.6 | 4.3 | 128.7 | 112.9 | 97.5 |
| Other third-party payors | 43.4 | 49.0 | 49.9 | — | — | — | 43.4 | 49.0 | 49.9 |
| Workers' compensation | 29.2 | 27.4 | 27.5 | 1.0 | 1.5 | 0.1 | 30.2 | 28.9 | 27.6 |
| Patients | 23.3 | 18.7 | 18.4 | 0.6 | 0.8 | 0.7 | 23.9 | 19.5 | 19.1 |
| Other income | 51.3 | 48.3 | 42.1 | 1.0 | 0.9 | 0.7 | 52.3 | 49.2 | 42.8 |
| Total | \$3,513.0 | \$3,346.2 | \$3,141.3 | \$1,092.0 | \$ 931.1 | \$ 772.6 | \$4,605.0 | \$4,277.3 | \$3,913.9 |

We record *Net operating revenues* on an accrual basis using our best estimate of the transaction price for the type of service provided to the patient. Our estimate of the transaction price includes estimates of price concessions for such items as contractual allowances, potential adjustments that may arise from payment and other reviews, and uncollectible amounts. Our accounting systems calculate contractual allowances on a patient-by-patient basis based on the rates in effect for each primary third-party payor. Adjustments related to payment reviews by third-party payors or their agents are based on our historical experience and success rates in the claims adjudication process. Estimates for uncollectible amounts are based on the aging of our accounts receivable, our historical collection experience for each type of payor, and other relevant factors.

Management continually reviews the revenue transaction price estimation process to consider and incorporate updates to laws and regulations and the frequent changes in managed care contractual terms that result from contract renegotiations and renewals. Due to complexities involved in determining amounts ultimately due under reimbursement arrangements with third-party payors, which are often subject to interpretation, we may receive reimbursement for healthcare services authorized and provided that is different from our estimates, and such differences could be material. In addition, laws and regulations governing the Medicare and Medicaid programs are complex, subject to interpretation, and are routinely modified for provider reimbursement. All healthcare providers participating in the Medicare and Medicaid programs are required to meet certain financial reporting requirements. Federal regulations require submission of annual cost reports covering medical costs and expenses associated with the services provided under each hospital, home health, and hospice provider number to program beneficiaries. Annual cost reports required under the Medicare and Medicaid programs are subject to routine audits, which may result in adjustments to the amounts ultimately determined to be due to Encompass Health under these reimbursement programs. These audits often require several years to reach the final determination of amounts earned under the programs. If actual results are not consistent with our assumptions and judgments, we may be exposed to gains or losses that could be material.

The Centers for Medicare and Medicaid Services (“CMS”) has been granted authority to suspend payments, in whole or in part, to Medicare providers if CMS possesses reliable information an overpayment, fraud, or willful misrepresentation exists. If CMS suspects payments are being made as the result of fraud or misrepresentation, CMS may suspend payment at any

Notes to Consolidated Financial Statements

time without providing prior notice to us. The initial suspension period is limited to 180 days. However, the payment suspension period can be extended almost indefinitely if the matter is under investigation by the United States Department of Health and Human Services Office of Inspector General (the “HHS-OIG”) or the United States Department of Justice (the “DOJ”). Therefore, we are unable to predict if or when we may be subject to a suspension of payments by the Medicare and/or Medicaid programs, the possible length of the suspension period, or the potential cash flow impact of a payment suspension. Any such suspension would adversely impact our financial position, results of operations, and cash flows.

Pursuant to legislative directives and authorizations from Congress, CMS has developed and instituted various Medicare audit programs under which CMS contracts with private companies to conduct claims and medical record audits. As a matter of course, we undertake significant efforts through training and education to ensure compliance with Medicare requirements. However, audits may lead to assertions we have been underpaid or overpaid by Medicare or submitted improper claims in some instances, require us to incur additional costs to respond to requests for records and defend the validity of payments and claims, and ultimately require us to refund any amounts determined to have been overpaid. In some circumstances auditors assert the authority to extrapolate denial rationales to large pools of claims not actually audited, which could increase the impact of the audit. We cannot predict when or how these audit programs will affect us.

Medicare Administrative Contractors (“MACs”), under programs known as “widespread probes,” have conducted pre-payment claim reviews of our Medicare billings and in some cases denied payment for certain diagnosis codes. The majority of the denials we have encountered in these probes relate to determinations regarding medical necessity and provision of therapy services. We dispute, or “appeal,” most of these denials, and for claims we choose to take to administrative law judge hearings, we have historically experienced a success rate of approximately 70%. This historical success rate is a component of our estimate of transaction price as discussed above. The Medicare appeals adjudication process is administered by the Office of Medicare Hearings and Appeals (“OMHA”). For a period of years, OHMA has failed to adjudicate appeals in accordance with timelines established by Congress. Due to the sheer number of appeals and various administrative inefficiencies, appeals that are due to be resolved in a matter of months commonly take years to complete. The growing backlog of appeals contributes further to the delay. We currently have appeals pending for claims that were denied up to eight years ago. Accordingly, we believe the process for resolving individual Medicare payment claims that are denied will continue to take several years. We cannot provide assurance as to our ongoing and future success of these disputes. When the amount collected related to denied claims differs from the amount previously estimated, these collection differences are recorded as an adjustment to *Net operating revenues*.

In August 2017, CMS announced the Targeted Probe and Educate (“TPE”) initiative. Under the TPE initiative, MACs use data analysis to identify healthcare providers with high claim error rates and items and services that have high national error rates. Once a MAC selects a provider for claims review, the initial volume of claims review is limited to 20 to 40 claims. The TPE initiative includes up to three rounds of claims review if necessary with corresponding provider education and a subsequent period to allow for improvement. If results do not improve sufficiently after three rounds, the MAC may refer the provider to CMS for further action, which may include extrapolation of error rates to a broader universe of claims or referral to a UPIC or RAC (defined below). We cannot predict the impact of the TPE initiative on our ability to collect claims on a timely basis.

In connection with CMS approved and announced Recovery Audit Contractors (“RACs”) audits related to inpatient rehabilitation facilities (“IRFs”), we received requests from 2013 to 2019 to review certain patient files for discharges occurring from 2010 to 2019. These RAC audits are focused on identifying Medicare claims that may contain improper payments. RAC contractors must have CMS approval before conducting these focused reviews which cover issues ranging from billing documentation to medical necessity. Medical necessity is an assessment by an independent physician of a patient’s ability to tolerate and benefit from intensive multi-disciplinary therapy provided in an IRF setting.

CMS has also established Unified Program Integrity Contractors (“UPICs”), previously known as Zone Program Integrity Contractors. These contractors perform fraud, waste, and abuse detection, deterrence and prevention activities for Medicare and Medicaid claims. Like the RACs, the UPICs conduct audits and have the ability to refer matters to the HHS-OIG or the DOJ. Unlike RACs, however, UPICs do not receive a specific financial incentive based on the amount of the error as a result of UPIC audits. We have, from time to time, received UPIC record requests which have resulted in claim denials on paid claims. We have appealed substantially all UPIC denials arising from these audits using the same process we follow for appealing other denials by contractors.

Notes to Consolidated Financial Statements

To date, the Medicare claims that are subject to these post-payment audit requests represent less than 1% of our Medicare patient discharges from 2010 to 2019. Because we have confidence in the medical judgment of both the referring and admitting physicians who assess the treatment needs of their patients, we have appealed substantially all claim denials arising from these audits using the same process we follow for appealing denials by MACs. Due to the delays announced by CMS in the related adjudication process discussed above, we believe the resolution of any claims that are subsequently denied as a result of these claim audits could take several years. In addition, because we have limited experience with UPICs and RACs in the context of claims reviews of this nature, we cannot provide assurance as to the timing or outcomes of these disputes. As such, we make estimates for these claims based on our historical experience and success rates in the claims adjudication process, which is the same process we follow for appealing denials by MACs. During 2019, 2018, and 2017, our adjustment to *Net operating revenues* for claims that are part of this post-payment claims review process was not material.

Our performance obligations relate to contracts with a duration of less than one year. Therefore, we elected to apply the optional exemption to not disclose the aggregate amount of the transaction price allocated to performance obligations that are unsatisfied or partially unsatisfied at the end of the reporting period. These unsatisfied or partially unsatisfied performance obligations primarily relate to services provided at the end of the reporting period.

We are subject to changes in government legislation that could impact Medicare payment levels and changes in payor patterns that may impact the level and timing of payments for services rendered.

Inpatient Rehabilitation Revenues

Inpatient rehabilitation segment revenues are recognized over time as the services are provided to the patient. The performance obligation is the rendering of services to the patient during the term of their inpatient stay. Revenues are recognized (or measured) using the input method as therapy, nursing, and auxiliary services are provided based on our estimate of the respective transaction price. Revenues recognized by our inpatient rehabilitation segment are subject to a number of elements which impact both the overall amount of revenue realized as well as the timing of the collection of the related accounts receivable. Factors considered in determining the estimated transaction price include the patient's total length of stay for in-house patients, each patient's discharge destination, the proportion of patients with secondary insurance coverage and the level of reimbursement under that secondary coverage, and the amount of charges that will be disallowed by payors. Such additional factors are assumed to remain consistent with the experience for patients discharged in similar time periods for the same payor classes.

Home Health and Hospice Revenues*Home Health*

Under the Medicare home health prospective payment system, we are paid by Medicare based on episodes of care. The performance obligation is the rendering of services to the patient during the term of the episode of care. An episode of care is defined as a length of stay up to 60 days, with multiple continuous episodes allowed. A base episode payment is established by the Medicare program through federal regulation. The base episode payment can be adjusted based on each patient's health including clinical condition, functional abilities, and service needs, as well as for the applicable geographic wage index, low utilization, patient transfers, and other factors. The services covered by the episode payment include all disciplines of care in addition to medical supplies.

We bill a portion of reimbursement from each Medicare episode near the start of each episode, and the resulting cash payment is typically received before all services are rendered. As we provide home health services to our patients on a scheduled basis over the episode of care in a manner that approximates a pro rata pattern, revenue for the episode of care is recorded over an average length of treatment period using a calendar day prorating method. The amount of revenue recognized for episodes of care which are incomplete at period end is based on the pro rata number of days in the episode which have been completed as of the period end date. As of December 31, 2019 and December 31, 2018, the difference between the cash received from Medicare for a request for anticipated payment on episodes in progress and the associated estimated revenue was not material and was recorded in *Other current liabilities* in our consolidated balance sheets.

We are subject to certain Medicare regulations affecting outlier revenue if our patient's care was unusually costly. Regulations require a cap on all outlier revenue at 10% of total Medicare revenue received by each provider during a cost

Notes to Consolidated Financial Statements

reporting year. Management has reviewed the potential cap. Adjustments to the transaction price for the outlier cap were not material as of December 31, 2019 and December 31, 2018.

For episodic-based rates that are paid by other insurance carriers, including Medicare Advantage, we recognize revenue in a similar manner as discussed above for Medicare revenues. However, these rates can vary based upon the negotiated terms. For non-episodic-based revenue, revenue is recorded on an accrual basis based upon the date of service at amounts equal to our estimated per-visit transaction price. Price concessions, including contractual allowances for the differences between our standard rates and the applicable contracted rates, as well as estimated uncollectible amounts from patients, are recorded as decreases to the transaction price.

Hospice

Medicare revenues for hospice are recognized and recorded on an accrual basis using the input method based on the number of days a patient has been on service at amounts equal to an estimated daily or hourly payment rate. The performance obligation is the rendering of services to the patient during each day that they are on hospice care. The payment rate is dependent on whether a patient is receiving routine home care, general inpatient care, continuous home care or respite care. Adjustments to Medicare revenues are recorded based on an inability to obtain appropriate billing documentation or authorizations acceptable to the payor or other reasons unrelated to credit risk. Hospice companies are subject to two specific payment limit caps under the Medicare program. One limit relates to inpatient care days that exceed 20% of the total days of hospice care provided for the year. The second limit relates to an aggregate Medicare reimbursement cap calculated by the MAC. Adjustments to the transaction price for these caps were not material as of December 31, 2019 and December 31, 2018.

For non-Medicare hospice revenues, we record gross revenue on an accrual basis based upon the date of service at amounts equal to our estimated per day transaction price. Price concessions, including contractual adjustments for the difference between our standard rates and the amounts estimated to be realizable from patients and third parties for services provided, are recorded as decreases to the transaction price and thus reduce our *Net operating revenues*.

Cash and Cash Equivalents—

Cash and cash equivalents include highly liquid investments with maturities of three months or less when purchased. Carrying values of *Cash and cash equivalents* approximate fair value due to the short-term nature of these instruments.

We maintain amounts on deposit with various financial institutions, which may, at times, exceed federally insured limits. However, management periodically evaluates the credit-worthiness of those institutions, and we have not experienced any losses on such deposits.

Marketable Securities—

We record all equity securities with readily determinable fair values and for which we do not exercise significant influence at fair value and record the change in fair value for the reporting period in our consolidated statements of operations. We record debt securities with readily determinable fair values and for which we do not exercise significant influence as available-for-sale securities. We carry the available-for-sale securities at fair value and report unrealized holding gains or losses, net of income taxes, in *Accumulated other comprehensive loss*, which is a separate component of shareholders' equity. We recognize realized gains and losses in our consolidated statements of operations using the specific identification method. Unrealized losses are charged against earnings when a decline in fair value was determined to be other than temporary. Management reviews several factors to determine whether a loss is other than temporary, such as the length of time a security is in an unrealized loss position, the extent to which fair value is less than cost, the financial condition and near term prospects of the issuer, industry, or geographic area and our ability and intent to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value.

Notes to Consolidated Financial Statements

Accounts Receivable—

We report accounts receivable from services rendered at their estimated transaction price which takes into account price concessions from federal and state agencies (under the Medicare and Medicaid programs), managed care health plans, commercial insurance companies, workers' compensation programs, employers, and patients. Our accounts receivable are concentrated by type of payor. The concentration of patient service accounts receivable by payor class, as a percentage of total patient service accounts receivable, is as follows:

| | As of December 31, | |
|---|--------------------|--------|
| | 2019 | 2018 |
| Medicare | 72.1% | 73.2% |
| Managed care and other discount plans, including Medicare Advantage | 20.1% | 19.3% |
| Medicaid | 3.1% | 2.8% |
| Other third-party payors | 2.6% | 2.7% |
| Workers' compensation | 1.2% | 1.1% |
| Patients | 0.9% | 0.9% |
| Total | 100.0% | 100.0% |

While revenues and accounts receivable from the Medicare program are significant to our operations, we do not believe there are significant credit risks associated with this government agency. We do not believe there are any other significant concentrations of revenues from any particular payor that would subject us to any significant credit risks in the collection of our accounts receivable.

Accounts requiring collection efforts are reviewed via system-generated work queues that automatically stage (based on age and size of outstanding balance) accounts requiring collection efforts for patient account representatives. Collection efforts include contacting the applicable party (both in writing and by telephone), providing information (both financial and clinical) to allow for payment or to overturn payor decisions to deny payment, and arranging payment plans with self-pay patients, among other techniques. When we determine all in-house efforts have been exhausted or it is a more prudent use of resources, accounts may be turned over to a collection agency.

The collection of outstanding receivables from Medicare, managed care payors, other third-party payors, and patients is our primary source of cash and is critical to our operating performance. While it is our policy to verify insurance prior to a patient being admitted, there are various exceptions that can occur. Such exceptions include instances where we are (1) unable to obtain verification because the patient's insurance company was unable to be reached or contacted, (2) a determination is made that a patient may be eligible for benefits under various government programs, such as Medicaid, and it takes several days, weeks, or months before qualification for such benefits is confirmed or denied, and (3) the patient is transferred to our hospital from an acute care hospital without having access to a credit card, cash, or check to pay the applicable patient responsibility amounts (i.e., deductibles and co-payments).

Our primary collection risks relate to patient responsibility amounts and claims reviews conducted by MACs or other contractors. Patient responsibility amounts include accounts for which the patient was the primary payor or the primary insurance carrier has paid the amounts covered by the applicable agreement, but patient co-payment amounts remain outstanding. Changes in the economy, such as increased unemployment rates or periods of recession, can further exacerbate our ability to collect patient responsibility amounts.

If actual results are not consistent with our assumptions and judgments, we may be exposed to gains or losses that could be material. Changes in general economic conditions, business office operations, payor mix, or trends in federal or state governmental and private employer healthcare coverage could affect our collection of accounts receivable, financial position, results of operations, and cash flows.

Notes to Consolidated Financial Statements

Property and Equipment—

We report land, buildings, improvements, vehicles, and equipment at cost, net of accumulated depreciation and amortization and any asset impairments. We depreciate our assets using the straight-line method over the shorter of the estimated useful life of the assets. Useful lives are generally as follows:

| | Years |
|------------------------------------|--------------|
| Buildings | 10 to 30 |
| Leasehold improvements | 2 to 15 |
| Vehicles | 5 |
| Furniture, fixtures, and equipment | 2 to 10 |

Maintenance and repairs of property and equipment are expensed as incurred. We capitalize replacements and betterments that increase the estimated useful life of an asset. We capitalize pre-acquisition costs when they are directly identifiable with a specific property, the costs would be capitalizable if the property were already acquired, and acquisition of the property is probable. We capitalize interest expense on major construction and development projects while in progress.

We retain fully depreciated assets in property and accumulated depreciation accounts until we remove them from service. In the case of sale, retirement, or disposal, the asset cost and related accumulated depreciation balances are removed from the respective accounts, and the resulting net amount, less any proceeds, is included as a component of income from continuing operations in the consolidated statements of operations. However, if the sale, retirement, or disposal involves a discontinued operation, the resulting net amount, less any proceeds, is included in the results of discontinued operations.

Leases—

We determine if an arrangement is a lease or contains a lease at inception and perform an analysis to determine whether the lease is an operating lease or a finance lease. We measure right-of-use assets and lease liabilities at the lease commencement date based on the present value of the remaining lease payments. As most of our leases do not provide a readily determinable implicit rate, we estimate an incremental borrowing rate based on the credit quality of the Company and by comparing interest rates available in the market for similar borrowings, and adjusting this amount based on the impact of collateral over the term of each lease. We use this rate to discount the remaining lease payments in measuring the right-of-use asset and lease liability. We use the implicit rate when readily determinable. We recognize lease expense for operating leases on a straight-line basis over the lease term. For our finance leases, we recognize amortization expense from the amortization of the right-of-use asset and interest expense on the related lease liability. Certain of our lease agreements contain annual escalation clauses based on changes in the Consumer Price Index. The changes to the Consumer Price Index, as compared to our initial estimate at the lease commencement date, are treated as variable lease payments and recognized in the period in which the obligation for those payments was incurred. We do not account for lease and nonlease components separately for purposes of establishing right-of-use assets and lease liabilities.

Leases with an initial term of twelve months or less are not recorded on the consolidated balance sheet. We recognize lease expense for these leases on a straight-line basis over the lease term.

Goodwill and Other Intangible Assets—

We are required to test our goodwill and indefinite-lived intangible asset for impairment at least annually, absent some triggering event that would accelerate an impairment assessment. Absent any impairment indicators, we perform this impairment testing as of October 1st of each year. We recognize an impairment charge for any amount by which the carrying amount of the asset exceeds its implied fair value. We present an impairment charge as a separate line item within income from continuing operations in the consolidated statements of operations, unless the impairment is associated with a discontinued operation. In that case, we include the impairment charge, on a net-of-tax basis, within the results of discontinued operations.

We assess qualitative factors in our inpatient rehabilitation and home health and hospice reporting units to determine whether it is necessary to perform the quantitative impairment test. If, based on this qualitative assessment, we were to believe

Notes to Consolidated Financial Statements

we must perform the quantitative goodwill impairment test, we would determine the fair value of our reporting units using generally accepted valuation techniques including the income approach and the market approach. The income approach includes the use of each reporting unit's discounted projected operating results and cash flows. This approach includes many assumptions related to pricing and volume, operating expenses, capital expenditures, discount factors, tax rates, etc. Changes in economic and operating conditions impacting these assumptions could result in goodwill impairment in future periods. We reconcile the estimated fair value of our reporting units to our market capitalization. When we dispose of a hospital or home health or hospice agency, goodwill is allocated to the gain or loss on disposition using the relative fair value methodology.

We assess qualitative factors related to our indefinite-lived intangible asset to determine whether it is necessary to perform the quantitative impairment test. If, based on this qualitative assessment, we were to believe we must perform the quantitative goodwill impairment test, we would determine the fair value of our indefinite-lived intangible asset using generally accepted valuation techniques including the relief-from-royalty method. This method is a form of the income approach in which value is equated to a series of cash flows and discounted at a risk-adjusted rate. It is based on a hypothetical royalty, calculated as a percentage of forecasted revenue, that we would otherwise be willing to pay to use the asset, assuming it were not already owned. This approach includes assumptions related to pricing and volume, as well as a royalty rate a hypothetical third party would be willing to pay for use of the asset. When making our royalty rate assumption, we consider rates paid in arms-length licensing transactions for assets comparable to our asset.

We amortize the cost of intangible assets with finite useful lives over their respective estimated useful lives to their estimated residual value. As of December 31, 2019, none of our finite useful lived intangible assets has an estimated residual value. We also review these assets for impairment whenever events or changes in circumstances indicate we may not be able to recover the asset's carrying amount.

The range of estimated useful lives and the amortization basis for our intangible assets, excluding goodwill, are generally as follows:

| | Estimated Useful Life and Amortization Basis |
|-----------------------|---|
| Certificates of need | 10 to 30 years using straight-line basis |
| Licenses | 10 to 20 years using straight-line basis |
| Noncompete agreements | 1 to 18 years using straight-line basis |
| Trade names: | |
| Encompass | indefinite-lived asset |
| All other | 1 to 20 years using straight-line basis |
| Internal-use software | 3 to 7 years using straight-line basis |
| Market access assets | 20 years using accelerated basis |

We capitalize the costs of obtaining or developing internal-use software, including external direct costs of material and services and directly related payroll costs. Amortization begins when the internal-use software is ready for its intended use. Costs incurred during the preliminary project and post-implementation stages, as well as maintenance and training costs, are expensed as incurred.

Our market access assets are valued using discounted cash flows under the income approach. The value of the market access assets is attributable to our ability to gain access to and penetrate an acquired facility's historical market patient base. To determine this value, we first develop a debt-free net cash flow forecast under various patient volume scenarios. The debt-free net cash flow is then discounted back to present value using a discount factor, which includes an adjustment for company-specific risk. As noted in the above table, we amortize these assets over 20 years using an accelerated basis that reflects the pattern in which we believe the economic benefits of the market access will be consumed.

Notes to Consolidated Financial Statements

Impairment of Long-Lived Assets and Other Intangible Assets—

We assess the recoverability of long-lived assets (excluding goodwill and our indefinite-lived asset) and identifiable acquired intangible assets with finite useful lives, whenever events or changes in circumstances indicate we may not be able to recover the asset's carrying amount. We measure the recoverability of assets to be held and used by a comparison of the carrying amount of the asset to the expected net future cash flows to be generated by that asset, or, for identifiable intangibles with finite useful lives, by determining whether the amortization of the intangible asset balance over its remaining life can be recovered through undiscounted future cash flows. The amount of impairment of identifiable intangible assets with finite useful lives, if any, to be recognized is measured based on projected discounted future cash flows. We measure the amount of impairment of other long-lived assets (excluding goodwill) as the amount by which the carrying value of the asset exceeds the fair market value of the asset, which is generally determined based on projected discounted future cash flows or appraised values. We classify long-lived assets to be disposed of other than by sale as held and used until they are disposed. We report long-lived assets to be disposed of by sale as held for sale and recognize those assets in the balance sheet at the lower of carrying amount or fair value less cost to sell, and we cease depreciation.

Investments in and Advances to Nonconsolidated Affiliates—

Investments in entities we do not control but in which we have the ability to exercise significant influence over the operating and financial policies of the investee are accounted for under the equity method. Equity method investments are recorded at original cost and adjusted periodically to recognize our proportionate share of the investees' net income or losses after the date of investment, additional contributions made, dividends or distributions received, and impairment losses resulting from adjustments to net realizable value. We record equity method losses in excess of the carrying amount of an investment when we guarantee obligations or we are otherwise committed to provide further financial support to the affiliate.

We use the cost method to account for equity investments for which the equity securities do not have readily determinable fair values and for which we do not have the ability to exercise significant influence. Under the cost method of accounting, private equity investments are carried at cost and are adjusted only for other-than-temporary declines in fair value, additional investments, or distributions deemed to be a return of capital.

Management periodically assesses the recoverability of our equity method and cost method investments and equity method goodwill for impairment. We consider all available information, including the recoverability of the investment, the earnings and near-term prospects of the affiliate, factors related to the industry, conditions of the affiliate, and our ability, if any, to influence the management of the affiliate. We assess fair value based on valuation methodologies, as appropriate, including discounted cash flows, estimates of sales proceeds, and external appraisals, as appropriate. If an investment or equity method goodwill is considered to be impaired and the decline in value is other than temporary, we record an appropriate write-down.

Financing Costs—

We amortize financing costs using the effective interest method over the expected life of the related debt. Excluding financing costs related to our revolving line of credit (which are included in *Other long-term assets*), financing costs are presented as a direct deduction from the face amount of the financings. The related expense is included in *Interest expense and amortization of debt discounts and fees* in our consolidated statements of operations.

We accrete discounts and amortize premiums using the effective interest method over the expected life of the related debt, and we report discounts or premiums as a direct deduction from, or addition to, the face amount of the financing. The related income or expense is included in *Interest expense and amortization of debt discounts and fees* in our consolidated statements of operations.

Fair Value Measurements—

Fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions market participants would use in pricing an asset or liability.

Notes to Consolidated Financial Statements

The basis for these assumptions establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows:

- *Level 1* – Observable inputs such as quoted prices in active markets;
- *Level 2* – Inputs, other than quoted prices in active markets, that are observable either directly or indirectly; and
- *Level 3* – Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

Assets and liabilities measured at fair value are based on one or more of three valuation techniques. The three valuation techniques are as follows:

- *Market approach* – Prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities;
- *Cost approach* – Amount that would be required to replace the service capacity of an asset (i.e., replacement cost); and
- *Income approach* – Techniques to convert future cash flows to a single present amount based on market expectations (including present value techniques, option-pricing models, and lattice models).

Our financial instruments consist mainly of cash and cash equivalents, restricted cash, restricted marketable securities, accounts receivable, accounts payable, letters of credit, and long-term debt. The carrying amounts of cash and cash equivalents, restricted cash, accounts receivable, and accounts payable approximate fair value because of the short-term maturity of these instruments. The fair value of our letters of credit is deemed to be the amount of payment guaranteed on our behalf by third-party financial institutions. We determine the fair value of our long-term debt using quoted market prices, when available, or discounted cash flows based on various factors, including maturity schedules, call features, and current market rates.

On a recurring basis, we are required to measure our restricted marketable securities at fair value. The fair values of our restricted marketable securities are determined based on quoted market prices in active markets or quoted prices, dealer quotations, or alternative pricing sources supported by observable inputs in markets that are not considered to be active.

On a nonrecurring basis, we are required to measure property and equipment, goodwill, other intangible assets, investments in nonconsolidated affiliates, and assets and liabilities of discontinued operations at fair value. Generally, assets are recorded at fair value on a nonrecurring basis as a result of impairment charges or similar adjustments made to the carrying value of the applicable assets. The fair value of our property and equipment is determined using discounted cash flows and significant unobservable inputs, unless there is an offer to purchase such assets, which could be the basis for determining fair value. The fair value of our intangible assets, excluding goodwill, is determined using discounted cash flows and significant unobservable inputs. The fair value of our investments in nonconsolidated affiliates is determined using quoted prices in private markets, discounted cash flows or earnings, or market multiples derived from a set of comparables. The fair value of our assets and liabilities of discontinued operations is determined using discounted cash flows and significant unobservable inputs unless there is an offer to purchase such assets and liabilities, which would be the basis for determining fair value. The fair value of our goodwill is determined using discounted projected operating results and cash flows, which involve significant unobservable inputs.

See also the “Redeemable Noncontrolling Interests” section of this note.

Noncontrolling Interests in Consolidated Affiliates—

The consolidated financial statements include all assets, liabilities, revenues, and expenses of less-than-100%-owned affiliates we control. Accordingly, we have recorded noncontrolling interests in the earnings and equity of such entities. We record adjustments to noncontrolling interests for the allocable portion of income or loss to which the noncontrolling interests holders are entitled based upon their portion of the subsidiaries they own. Distributions to holders of noncontrolling interests are adjusted to the respective noncontrolling interests holders’ balance.

Notes to Consolidated Financial Statements

Redeemable Noncontrolling Interests—

Certain of our joint venture agreements contain provisions that allow our partners to require us to purchase their interests in the joint venture at fair value at certain points in the future. Likewise, certain members of the home health and hospice management team hold similar put rights regarding their interests in our home health and hospice business, as discussed in Note 12, *Redeemable Noncontrolling Interests*. Because these noncontrolling interests provide for redemption features that are not solely within our control, we classify them as *Redeemable noncontrolling interests* outside of permanent equity in our consolidated balance sheets. At the end of each reporting period, we compare the carrying value of the *Redeemable noncontrolling interests* to their estimated redemption value. If the estimated redemption value is greater than the current carrying value, the carrying value is adjusted to the estimated redemption value, with the adjustments recorded through equity in the line item *Capital in excess of par value*.

The fair value of the *Redeemable noncontrolling interests* related to our home health segment is determined using the product of a 12-month specified performance measure and a specified median market price multiple based on a basket of public health companies and publicly disclosed home health acquisitions with a value of \$400 million or more. The fair value of our *Redeemable noncontrolling interests* in our joint venture hospitals is determined primarily using the income approach. The income approach includes the use of the hospital's projected operating results and cash flows discounted using a rate that reflects market participant assumptions for the applicable hospitals, or *Level 3* inputs. The projected operating results use management's best estimates of economic and market conditions over the forecasted periods including assumptions for pricing and volume, operating expenses, and capital expenditures.

Share-Based Payments—

Encompass Health has shareholder-approved stock-based compensation plans that provide for the granting of stock-based compensation to certain employees and directors. All share-based payments to employees, excluding stock appreciation rights ("SARs"), are recognized in the financial statements based on their estimated grant-date fair value and amortized on a straight-line basis over the applicable requisite service period. Share-based payments to employees in the form of SARs are recognized in the financial statements based on their current fair value and expensed ratably over the applicable service period.

Litigation Reserves—

We accrue for loss contingencies associated with outstanding litigation for which management has determined it is probable a loss contingency exists and the amount of loss can be reasonably estimated. If the accrued amount associated with a loss contingency is greater than \$5.0 million, we also accrue estimated future legal fees associated with the loss contingency. This requires management to estimate the amount of legal fees that will be incurred in the defense of the litigation. These estimates are based on our expectations of the scope, length to complete, and complexity of the claims. In the future, additional adjustments may be recorded as the scope, length to complete, or complexity of outstanding litigation changes.

Advertising Costs—

We expense costs of print, radio, television, and other advertisements as incurred. Advertising expenses, primarily included in *Other operating expenses* within the accompanying consolidated statements of operations, were \$6.1 million, \$6.7 million, and \$6.3 million in each of the years ended December 31, 2019, 2018, and 2017, respectively.

Income Taxes—

We provide for income taxes using the asset and liability method. This approach recognizes the amount of income taxes payable or refundable for the current year, as well as deferred tax assets and liabilities for the future tax consequence of events recognized in the consolidated financial statements and income tax returns. Deferred income tax assets and liabilities are adjusted to recognize the effects of changes in tax laws or enacted tax rates.

A valuation allowance is required when it is more likely than not some portion of the deferred tax assets will not be realized. Realization is dependent on generating sufficient future taxable income in the applicable tax jurisdiction. On a quarterly basis, we assess the likelihood of realization of our deferred tax assets considering all available evidence, both positive and negative. Our most recent operating performance, the scheduled reversal of temporary differences, our forecast of

Notes to Consolidated Financial Statements

taxable income in future periods by jurisdiction, our ability to sustain a core level of earnings, and the availability of prudent tax planning strategies are important considerations in our assessment.

We evaluate our tax positions and establish assets and liabilities in accordance with the applicable accounting guidance on uncertainty in income taxes. We review these tax uncertainties in light of changing facts and circumstances, such as the progress of tax audits, and adjust them accordingly. We have used the with-and-without method to determine when we will recognize excess tax benefits from stock-based compensation.

Encompass Health and its corporate subsidiaries file a consolidated federal income tax return. Some subsidiaries consolidated for financial reporting purposes are not part of the consolidated group for federal income tax purposes and file separate federal income tax returns. State income tax returns are filed on a separate, combined, or consolidated basis in accordance with relevant state laws and regulations. Partnerships, limited liability companies, and other pass-through entities we consolidate or account for using the equity method of accounting file separate federal and state income tax returns. We include the allocable portion of each pass-through entity's income or loss in our federal income tax return. We allocate the remaining income or loss of each pass-through entity to the other partners or members who are responsible for their portion of the taxes.

Assets and Liabilities in and Results of Discontinued Operations—

Effective January 1, 2015, in connection with a new standard issued by the FASB, we changed our criteria for determining which disposals are presented as discontinued operations. Historically, any component that had been disposed of or was classified as held for sale qualified for discontinued operations reporting unless there was significant continuing involvement with the disposed component or continuing cash flows. In contrast, we now report the disposal of the component, or group of components, as discontinued operations only when it represents a strategic shift that has, or will have, a major effect on our operations and financial results. As a result, the sale or disposal of a single Encompass Health facility or location no longer qualifies as a discontinued operation. This accounting change was made prospectively. No new components were recognized as discontinued operations since this guidance became effective.

In the period a component of an entity has been disposed of or classified as held for sale, we reclassify the results of operations for current and prior periods into a single caption titled *(Loss) income from discontinued operations, net of tax*. In addition, we classify the assets and liabilities of those components as current and noncurrent assets and liabilities within *Prepaid expenses and other current assets*, *Other long-term assets*, *Other current liabilities*, and *Other long-term liabilities* in our consolidated balance sheets. We also classify cash flows related to discontinued operations as one line item within each category of cash flows in our consolidated statements of cash flows.

Earnings per Common Share—

The calculation of earnings per common share is based on the weighted-average number of our common shares outstanding during the applicable period. The calculation for diluted earnings per common share recognizes the effect of all potential dilutive common shares, including warrants, that were outstanding during the respective periods, unless their impact would be antidilutive. The calculation of earnings per common share also considers the effect of participating securities. Stock-based compensation awards that contain nonforfeitable rights to dividends and dividend equivalents, such as our restricted stock units, are considered participating securities and are included in the computation of earnings per common share pursuant to the two-class method. In applying the two-class method, earnings are allocated to both common stock shares and participating securities based on their respective weighted-average shares outstanding for the period.

We used the if-converted method to include our convertible senior subordinated notes in our computation of 2017 diluted earnings per share. All other potential dilutive shares, including warrants, are included in our weighted-average diluted share count using the treasury stock method.

Treasury Stock—

Shares of common stock repurchased by us are recorded at cost as treasury stock. When shares are reissued, we use an average cost method to determine cost. The difference between the cost of the shares and the re-issuance price is added to or deducted from *Capital in excess of par value*. We account for the retirement of treasury stock as a reduction of retained

Notes to Consolidated Financial Statements

earnings. However, due to our *Accumulated deficit*, the retirement of treasury stock is currently recorded as a reduction of *Capital in excess of par value*.

Comprehensive Income—

Comprehensive income is comprised of *Net income* and changes in unrealized gains or losses on available-for-sale securities and is included in the consolidated statements of comprehensive income.

Recent Adopted Accounting Pronouncements—

In February 2016, the FASB issued ASU 2016-02, “Leases (Topic 842),” and has subsequently issued supplemental and/or clarifying ASUs (collectively “ASC 842”), in order to increase transparency and comparability by recognizing lease assets and liabilities on the balance sheet and disclosing key information about leasing arrangements. We adopted ASC 842 using the modified retrospective approach and applied the transition provisions with an effective date as of January 1, 2019 for leases that existed on that date. Prior period results continue to be presented under ASC 840 based on the accounting originally in effect for such periods. ASC 842 provides optional practical expedients in transition. We elected the ‘package of practical expedients,’ which permits us to not reassess under ASC 842 our prior conclusions about lease identification, lease classification and initial direct costs, and the practical expedient to not reassess certain land easements. We did not elect the use-of-hindsight practical expedient during the transition to ASC 842. The adoption of ASC 842 resulted in the addition of approximately \$349 million in assets and \$347 million in liabilities to our consolidated balance sheet as of January 1, 2019, with the remaining \$2 million being recorded as an adjustment to *Capital in excess of par value*. The adoption of ASC 842 also resulted in increased disclosure, including qualitative and quantitative disclosures about the nature, amount, timing and uncertainty of cash flows arising from leases. See the “Leases” section of this note and Note 7, *Leases*, and Note 10, *Long-term Debt*, for additional information about our leases.

Recent Accounting Pronouncements Not Yet Adopted—

In June 2016, the FASB issued ASU 2016-13, “Financial Instruments – Credit Losses (Topic 326),” which provides guidance for accounting for credit losses on financial instruments. The new guidance introduces an approach based on expected losses to estimate credit losses on certain types of financial instruments and modifies the impairment model for available-for-sale debt securities. The new guidance is effective for us beginning January 1, 2020, including interim periods within that reporting period. The adoption of this guidance will result in an immaterial change to our consolidated financial statements.

In August 2018, the FASB issued ASU 2018-15, “Intangibles—Goodwill and Other—Internal-Use Software (Subtopic 350-40): Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract.” The update helps entities evaluate the accounting for fees paid by a customer in a cloud computing arrangement (hosting arrangement), by providing guidance in determining when the arrangement includes a software license. It requires entities to account for such costs consistent with the guidance on capitalizing costs associated with developing or obtaining internal-use software. The new guidance is effective for us beginning January 1, 2020, including interim periods within that reporting period. We do not expect the adoption of this guidance to have a material impact to our consolidated financial statements.

In December 2019, the FASB issues ASU 2019-12, “Income Taxes (Topic 740): Simplifying the Accounting for Income Taxes.” The standard removes certain exceptions to the general principles of ASC 740 and simplifies other areas such as accounting for outside basis differences of equity method investments. Either prospective or retrospective transition of this standard is dependent upon the specific amendments. The new guidance is effective for us beginning January 1, 2021, including interim periods within that reporting period. Early adoption is permitted. We continue to review the requirements of this standard and any potential impact it may have on our consolidated financial statements.

We do not believe any other recently issued, but not yet effective, accounting standards will have a material effect on our consolidated financial position, results of operations, or cash flows.

Notes to Consolidated Financial Statements

2. Business Combinations:*2019 Acquisitions*Inpatient Rehabilitation

During 2019, we completed the following inpatient rehabilitation acquisitions, none of which were individually material to our financial position, results of operations, or cash flows. Each acquisition was made to enhance our position and ability to provide inpatient rehabilitation services to patients in the applicable geographic areas.

- In July 2019, we acquired approximately 51% of the operations of a 30-bed inpatient rehabilitation unit in Boise, Idaho when Saint Alphonsus Regional Medical Center contributed those operations to a joint venture with us. We funded our ownership interest in that consolidated joint venture through contributions of cash which the joint venture entity used to fund the construction of a 40-bed de novo inpatient rehabilitation hospital.
- In September 2019, we acquired 75% of the operations of Heritage Valley Sewickley Hospital's 11-bed inpatient rehabilitation unit in Sewickley, Pennsylvania, when Heritage Valley Health System, Inc. contributed those operations to our existing joint venture entity in connection with the opening of a new hospital.

We accounted for these transactions under the acquisition method of accounting and reported the results of operations of the acquired hospitals from its respective date of acquisition. Assets acquired were recorded at their estimated fair values as of the acquisition date. Estimated fair values were based on various valuation methodologies including an income approach using primarily discounted cash flow techniques for the noncompete intangible assets and an income approach utilizing the relief from royalty method for the trade name intangible asset. The aforementioned income methods utilize management's estimates of future operating results and cash flows discounted using a weighted-average cost of capital that reflects market participant assumptions. The excess of the fair value of the consideration conveyed over the fair value of the assets acquired was recorded as goodwill. The goodwill reflects our expectations of our ability to gain access to and penetrate the acquired hospital's historical patient base and the benefits of being able to leverage operational efficiencies with favorable growth opportunities based on positive demographic trends in this market. None of the goodwill recorded as a result from these transactions are deductible for federal income tax purposes.

The fair value of the assets acquired and liabilities assumed at the acquisition date were as follows (in millions):

Identifiable intangible assets:

| | |
|---|--------|
| Noncompete agreements (useful lives of 2 years) | \$ 0.1 |
| Trade name (useful life of 20 years) | 0.4 |
| Goodwill | 4.8 |
| Total assets acquired | 5.3 |
| Total liabilities assumed | 0.2 |
| Net assets acquired | \$ 5.1 |

Information regarding the net cash paid for the inpatient rehabilitation acquisitions during 2019 is as follows (in millions):

| | |
|--|--------|
| Fair value of assets acquired | \$ 0.5 |
| Goodwill | 4.8 |
| Fair value of liabilities assumed | (0.2) |
| Fair value of noncontrolling interest owned by joint venture partner | (5.1) |
| Net cash paid for acquisitions | \$ — |

Notes to Consolidated Financial Statements

Home Health and Hospice*Alacare Acquisition*

In July 2019, we completed the acquisition of privately owned Alacare Home Health & Hospice (“Alacare”) for a cash purchase price of \$217.8 million. The Alacare portfolio consisted of 23 home health locations and 23 hospice locations in Alabama. The acquisition was made to enhance our position and ability to provide post-acute healthcare services to patients across Alabama. We funded the transaction with cash on hand and borrowings under our revolving credit facility.

We accounted for this transaction under the acquisition method of accounting and reported the results of operations of Alacare from its date of acquisition. Assets acquired and liabilities assumed were recorded at their estimated fair values as of the acquisition date. Estimated fair values were based on various valuation methodologies including: replacement cost and continued use methods for property and equipment; an income approach using primarily discounted cash flow techniques for the noncompete and certain license intangible assets; an income approach utilizing the relief-from-royalty method for the trade name intangible asset; an income approach utilizing the excess earnings method for the certificates of need; and present value of the remaining lease payments for leases. The aforementioned income methods utilize management’s estimates of future operating results and cash flows discounted using a weighted-average cost of capital that reflects market participant assumptions. For all other assets and liabilities, the fair value was assumed to represent carrying value due to their short maturities. The excess of the fair value of the consideration conveyed over the fair value of the net assets acquired was recorded as goodwill. All goodwill recorded as a result from this transaction is deductible for federal income tax purposes. The goodwill reflects our expectations of favorable growth opportunities in the home health and hospice markets based on positive demographic trends.

The fair value of the assets acquired and liabilities assumed at the acquisition date were as follows (in millions):

| | |
|---|------------------------|
| Accounts receivable | \$ 10.2 |
| Prepaid expenses and other current assets | 1.7 |
| Property and equipment, net | 0.7 |
| Identifiable intangible assets: | |
| Noncompete agreements (useful lives of 5 years) | 1.0 |
| Trade name (useful life of 6 months) | 1.0 |
| Certificates of need (useful lives of 10 years) | 34.3 |
| Licenses (useful lives of 10 years) | 14.6 |
| Internal-use software (useful lives of 3 years) | 0.1 |
| Goodwill | 163.9 |
| Other long-term assets | 5.0 |
| Total assets acquired | <u>232.5</u> |
| Liabilities assumed: | |
| Current portion of long-term debt | 0.3 |
| Accounts payable | 1.2 |
| Accrued payroll | 8.1 |
| Other current liabilities | 2.0 |
| Long-term operating lease liabilities | 3.1 |
| Total liabilities assumed | <u>14.7</u> |
| Net assets acquired | <u><u>\$ 217.8</u></u> |

Notes to Consolidated Financial Statements

Information regarding the net cash paid for Alacare is as follows (in millions):

| | |
|-----------------------------------|-----------------|
| Fair value of assets acquired | \$ 68.6 |
| Goodwill | 163.9 |
| Fair value of liabilities assumed | (14.7) |
| Net cash paid for acquisition | <u>\$ 217.8</u> |

Other Home Health and Hospice Acquisitions

During 2019, we completed the following home health and hospice acquisitions, none of which were individually material to our financial position, results of operations, or cash flows. Each acquisition was made to enhance our position and ability to provide post-acute healthcare services to patients in the applicable geographic areas. Each acquisition was funded using cash on hand.

- In February 2019, we acquired the assets of Tidewater Home Health, PA in Columbia, South Carolina.
- In March 2019, we acquired the assets and assumed the liabilities of two home health locations from Care Resource Group in East Providence, Rhode Island and Westport, Massachusetts.

We accounted for these transactions under the acquisition method of accounting and reported the results of operations of the acquired locations from their respective dates of acquisition. Assets acquired and liabilities assumed were recorded at their estimated fair values as of the respective acquisition dates. The fair values of identifiable intangible assets were based on valuations using an income approach. The income approach is based on management's estimates of future operating results and cash flows discounted using a weighted-average cost of capital that reflects market participant assumptions. The excess of the fair value of the consideration conveyed over the fair value of the net assets acquired was recorded as goodwill. The goodwill reflects our expectations of our ability to utilize the acquired locations' mobile workforce and established relationships within each community and the benefits of being able to leverage operational efficiencies with favorable growth opportunities based on positive demographic trends in these markets. All goodwill recorded as a result of these transactions is deductible for federal income tax purposes.

The fair value of the assets acquired and liabilities assumed at the acquisition date were as follows (in millions):

| | |
|---|----------------|
| Operating lease right-of-use assets | \$ 0.2 |
| Identifiable intangible assets: | |
| Noncompete agreements (useful lives of 5 years) | 0.2 |
| Certificates of need (useful lives of 10 years) | 2.0 |
| License (useful life of 10 years) | 0.8 |
| Goodwill | 10.8 |
| Total assets acquired | <u>14.0</u> |
| Liabilities assumed: | |
| Current operating lease liabilities | 0.1 |
| Accrued payroll | 0.1 |
| Long-term lease liabilities | 0.1 |
| Total liabilities assumed | <u>0.3</u> |
| Net assets acquired | <u>\$ 13.7</u> |

Notes to Consolidated Financial Statements

Information regarding the net cash paid for the other home health and hospice acquisitions during each period presented is as follows (in millions):

| | |
|-----------------------------------|----------------|
| Fair value of assets acquired | \$ 3.2 |
| Goodwill | 10.8 |
| Fair value of liabilities assumed | (0.3) |
| Net cash paid for acquisitions | <u>\$ 13.7</u> |

2019 Pro Forma Results of Operations

The following table summarizes the results of operations of the above mentioned acquisitions from their respective dates of acquisition included in our consolidated results of operations and the unaudited pro forma results of operations of the combined entity had the date of the acquisitions been January 1, 2018 (in millions):

| | Net Operating Revenues | Net (Loss) Income Attributable to Encompass Health |
|--|-----------------------------------|---|
| Acquired entities only: Actual from acquisition date to December 31, 2019 | | |
| Inpatient Rehabilitation | \$ 4.4 | \$ (1.3) |
| Alacare | 58.5 | 1.6 |
| Home Health and Hospice | 6.5 | (1.5) |
| Combined entity: Supplemental pro forma from 01/01/2019-12/31/2019 (unaudited) | 4,674.6 | 364.3 |
| Combined entity: Supplemental pro forma from 01/01/2018-12/31/2018 (unaudited) | 4,415.9 | 301.8 |

The information presented above is for illustrative purposes only and is not necessarily indicative of results that would have been achieved if the acquisitions had occurred as of the beginning of our 2018 period.

*2018 Acquisitions*Inpatient Rehabilitation

During 2018, we completed the following inpatient rehabilitation acquisitions, none of which were individually material to our financial position, results of operations, or cash flows. Each acquisition was made to enhance our position and ability to provide inpatient rehabilitation services to patients in the applicable geographic areas.

- In September 2018, we acquired approximately 62% of a 29-bed inpatient rehabilitation unit, including a 60-bed certificate of need, in Murrells Inlet, South Carolina through a joint venture with Tideland Health. The acquisition was funded through contributions of funds to be utilized by the consolidated joint venture to build a 46-bed de novo inpatient rehabilitation satellite location.
- In October 2018, we acquired approximately 50% of a 68-bed inpatient rehabilitation unit in Winston-Salem, North Carolina through a joint venture with Novant Health Inc. This acquisition was funded through a contribution of a 68-bed de novo inpatient rehabilitation hospital to the consolidated joint venture.
- In November 2018, we acquired approximately 68% of a 17-bed inpatient rehabilitation unit in Littleton, Colorado through a joint venture with PorterCare Adventist Health System. The acquisition was funded through the contribution of our existing inpatient rehabilitation hospital in Littleton, Colorado to the consolidated joint venture.

We accounted for these transactions under the acquisition method of accounting and reported the results of operations of the acquired hospitals from its respective date of acquisition. Assets acquired were recorded at their estimated fair values as of the acquisition date. Estimated fair values were based on various valuation methodologies including: an income approach

Notes to Consolidated Financial Statements

using primarily discounted cash flow techniques for the noncompete intangible asset; an income approach utilizing the relief from royalty method for the trade name intangible asset; and an income approach utilizing the excess earnings method for the certificate of need intangible asset. The aforementioned income methods utilize management's estimates of future operating results and cash flows discounted using a weighted-average cost of capital that reflects market participant assumptions. The excess of the fair value of the consideration conveyed over the fair value of the assets acquired was recorded as goodwill. The goodwill reflects our expectations of our ability to gain access to and penetrate the acquired hospital's historical patient base and the benefits of being able to leverage operational efficiencies with favorable growth opportunities based on positive demographic trends in this market. None of the goodwill recorded as a result from these transactions is deductible for federal income tax purposes.

The fair value of the assets acquired and liabilities assumed at the acquisition date were as follows (in millions):

| | |
|--|----------------|
| Property and equipment | \$ 0.1 |
| Identifiable intangible assets: | |
| Noncompete agreements (useful lives of 2 to 3 years) | 1.4 |
| Trade names (useful lives of 20 years) | 2.3 |
| Certificates of need (useful lives of 20 years) | 12.5 |
| Goodwill | 23.2 |
| Total assets acquired | <u>39.5</u> |
| Total liabilities assumed | (0.2) |
| Net assets acquired | <u>\$ 39.3</u> |

Information regarding the net cash paid for the inpatient rehabilitation acquisitions during 2018 is as follows (in millions):

| | |
|--|-------------|
| Fair value of assets acquired | \$ 16.3 |
| Goodwill | 23.2 |
| Fair value of liabilities assumed | (0.2) |
| Fair value of noncontrolling interest owned by joint venture partner | (39.3) |
| Net cash paid for acquisitions | <u>\$ —</u> |

Home Health and Hospice*Camellia Acquisition*

On May 1, 2018, we completed the previously announced acquisition of privately owned Camellia Healthcare and affiliated entities ("Camellia"). The Camellia portfolio consists of hospice, home health and private duty locations in Mississippi, Alabama, Louisiana and Tennessee. The acquisition leverages our home health and hospice operating platform across key certificate of need states and strengthens our geographic presence in the Southeastern United States. We funded the cash purchase price of the acquisition with cash on hand and borrowings under our revolving credit facility.

We accounted for this transaction under the acquisition method of accounting and reported the results of operations of Camellia from its date of acquisition. Assets acquired and liabilities assumed were recorded at their estimated fair values as of the acquisition date. Estimated fair values were based on various valuation methodologies including: replacement cost and continued use methods for property and equipment; an income approach using primarily discounted cash flow techniques for the noncompete and certain license intangible assets; an income approach utilizing the relief-from-royalty method for the trade name intangible asset; and an income approach utilizing the excess earnings method for the certificate of need and certain license intangible assets. The aforementioned income methods utilize management's estimates of future operating results and cash flows discounted using a weighted-average cost of capital that reflects market participant assumptions. For all other assets and liabilities, the fair value was assumed to represent carrying value due to their short maturities. The excess of the fair value

Notes to Consolidated Financial Statements

of the consideration conveyed over the fair value of the net assets acquired was recorded as goodwill. All goodwill recorded as a result from this transaction is deductible for federal income tax purposes. The goodwill reflects our expectations of favorable growth opportunities in the home health and hospice markets based on positive demographic trends.

The fair value of the assets acquired and liabilities assumed at the acquisition date were as follows (in millions)

| | |
|---|----------|
| Cash and cash equivalents | \$ 1.3 |
| Prepaid expenses and other current assets | 0.3 |
| Property and equipment, net | 0.6 |
| Identifiable intangible assets: | |
| Noncompete agreements (useful lives of 5 years) | 0.5 |
| Trade name (useful life of 1 year) | 1.4 |
| Certificates of need (useful lives of 10 years) | 16.6 |
| Licenses (useful lives of 10 years) | 21.6 |
| Goodwill | 96.1 |
| Total assets acquired | 138.4 |
| Liabilities assumed: | |
| Accounts payable | 1.7 |
| Accrued payroll | 4.0 |
| Total liabilities assumed | 5.7 |
| Net assets acquired | \$ 132.7 |

Information regarding the net cash paid for Camellia is as follows (in millions):

| | |
|--|----------|
| Fair value of assets acquired, net of \$1.3 million of cash acquired | \$ 41.0 |
| Goodwill | 96.1 |
| Fair value of liabilities assumed | (5.7) |
| Net cash paid for acquisition | \$ 131.4 |

Other Home Health and Hospice Acquisitions

During 2018, we completed the following home health acquisitions, none of which were individually material to our financial position, results of operations, or cash flows. Each acquisition was made to enhance our position and ability to provide post-acute healthcare services to patients in the applicable geographic areas. Each acquisition was funded using cash on hand.

- In January 2018, we acquired the assets of one hospice location from Golden Age Hospice, Inc. in Oklahoma City, Oklahoma.
- In June 2018, we acquired the assets of one hospice location from Medical Services of America in Las Vegas, Nevada.
- In November 2018, we acquired the assets of one home health and one hospice location from Tenet Hospital Limited in Birmingham, Alabama and El Paso, Texas. We also acquired 75% of the assets of a home health location in Talladega, Alabama through a joint venture with Tenet Hospital Limited.
- In December 2018, we acquired 75% of the assets of a hospice location in Talladega, Alabama through a joint venture with Tenet Hospital Limited.

Notes to Consolidated Financial Statements

We accounted for these transactions under the acquisition method of accounting and reported the results of operations of the acquired locations from their respective dates of acquisition. Assets acquired were recorded at their estimated fair values as of the respective acquisition dates. The fair values of identifiable intangible assets were based on valuations using an income approach. The income approach is based on management's estimates of future operating results and cash flows discounted using a weighted-average cost of capital that reflects market participant assumptions. The excess of the fair value of the consideration conveyed over the fair value of the net assets acquired was recorded as goodwill. The goodwill reflects our expectations of our ability to utilize the acquired locations' mobile workforce and established relationships within each community and the benefits of being able to leverage operational efficiencies with favorable growth opportunities based on positive demographic trends in these markets. All goodwill recorded as a result of these transactions is deductible for federal income tax purposes.

The fair value of the assets acquired and liabilities assumed at the acquisition date were as follows (in millions):

| | |
|---|----------------|
| Total current assets | \$ 0.1 |
| Identifiable intangible asset: | |
| Noncompete agreements (useful lives of 5 years) | 0.2 |
| Certificates of need (useful lives of 10 years) | 2.5 |
| Licenses (useful lives of 10 years) | 1.5 |
| Goodwill | 8.9 |
| Total assets acquired | <u>13.2</u> |
| Total liabilities assumed | (0.1) |
| Net assets acquired | <u>\$ 13.1</u> |

Information regarding the net cash paid for the home health acquisitions during 2018 is as follows (in millions):

| | |
|--|----------------|
| Fair value of assets acquired | \$ 4.3 |
| Goodwill | 8.9 |
| Fair value of liabilities assumed | (0.1) |
| Fair value of noncontrolling interest owned by joint venture partner | (0.6) |
| Net cash paid for acquisitions | <u>\$ 12.5</u> |

Notes to Consolidated Financial Statements
2018 Pro Forma Results of Operations

The following table summarizes the results of operations of the above mentioned acquisitions from their respective dates of acquisition included in our consolidated results of operations and the unaudited pro forma results of operations of the combined entity had the date of the acquisitions been January 1, 2017 (in millions):

| | <u>Net Operating Revenues</u> | <u>Net (Loss) Income Attributable to Encompass Health</u> |
|--|-------------------------------|---|
| Acquired entities only: Actual from acquisition date to December 31, 2018 | | |
| Inpatient Rehabilitation | \$ 9.1 | \$ (1.6) |
| Camellia | 50.0 | (0.9) |
| All Other Home Health and Hospice | 3.5 | (0.3) |
| Combined entity: Supplemental pro forma from 01/01/2018-12/31/2018 (unaudited) | 4,337.4 | 300.0 |
| Combined entity: Supplemental pro forma from 01/01/2017-12/31/2017 (unaudited) | 4,039.9 | 289.0 |

The information presented above is for illustrative purposes only and is not necessarily indicative of results that would have been achieved if the acquisitions had occurred as of the beginning of our 2017 reporting period.

2017 Acquisitions
Inpatient Rehabilitation

During 2017, we completed the following inpatient rehabilitation acquisitions, none of which were individually material to our financial position, results of operations, or cash flows. Each acquisition was made to enhance our position and ability to provide inpatient rehabilitation services to patients in the applicable geographic areas.

- In April 2017, we acquired 80% of the 33-bed inpatient rehabilitation unit of Memorial Hospital at Gulfport in Gulfport, Mississippi, through a joint venture with Memorial Hospital at Gulfport. This acquisition was funded on March 31, 2017 using cash on hand.
- In April 2017, we also acquired approximately 80% of the inpatient rehabilitation unit of Mount Carmel West in Columbus, Ohio, through a joint venture with Mount Carmel Health System. This acquisition was funded through a contribution of a 60-bed de novo inpatient rehabilitation hospital to the consolidated joint venture.
- In July 2017, we acquired 50% of the inpatient rehabilitation unit at Jackson-Madison County General Hospital through a joint venture with West Tennessee Healthcare. The acquisition was funded through a contribution of our existing inpatient rehabilitation hospital in Martin, Tennessee to the consolidated joint venture.
- In September 2017, we acquired 75% of Heritage Valley Beaver Hospital's inpatient rehabilitation unit in Beaver, Pennsylvania, through a joint venture with Heritage Valley Health System, Inc. The acquisition was funded through the exchange of 25% of our existing inpatient rehabilitation hospital in Sewickley, Pennsylvania.

We accounted for these transactions under the acquisition method of accounting and reported the results of operations of the acquired hospitals from their respective dates of acquisition. Assets acquired were recorded at their estimated fair values as of the respective acquisition dates. The fair values of the identifiable intangible assets were based on valuations using the income approach. The income approach is based on management's estimates of future operating results and cash flows discounted using a weighted-average cost of capital that reflects market participant assumptions. The excess of the fair value of the consideration conveyed over the fair value of the net assets acquired was recorded as goodwill. The goodwill reflects our expectations of our ability to gain access to and penetrate the acquired hospital's historical patient base and the benefits of being able to leverage operational efficiencies with favorable growth opportunities based on positive demographic trends in these markets. None of the goodwill recorded as a result of these transactions is deductible for federal income tax purposes.

Notes to Consolidated Financial Statements

The fair value of the assets acquired at the acquisition date were as follows (in millions):

| | |
|--|----------------|
| Property and equipment | \$ 0.1 |
| Identifiable intangible assets: | |
| Noncompete agreements (useful lives of 2 to 3 years) | 0.6 |
| Trade name (useful life of 20 years) | 0.5 |
| Certificate of need (useful life of 20 years) | 9.8 |
| Goodwill | 24.0 |
| Total assets acquired | <u>\$ 35.0</u> |

Information regarding the net cash paid for all inpatient rehabilitation acquisitions during 2017 is as follows (in millions):

| | |
|--|----------------|
| Fair value of assets acquired | \$ 11.0 |
| Goodwill | 24.0 |
| Fair value of noncontrolling interest owned by joint venture partner | (24.1) |
| Net cash paid for acquisitions | <u>\$ 10.9</u> |

Home Health and Hospice

During 2017, we completed the following home health acquisitions, none of which were individually material to our financial position, results of operations, or cash flows. Each acquisition was made to enhance our position and ability to provide post-acute healthcare services to patients in the applicable geographic areas. Each acquisition was funded using cash on hand.

- In February 2017, we acquired the assets of Celtic Healthcare of Maryland, Inc., a home health provider with locations in Owings Mill, Maryland and Rockville, Maryland.
- In February 2017, we also acquired the assets of two home health locations from Community Health Services, Inc., located in Owensboro, Kentucky and Elizabethtown, Kentucky.
- In May 2017, we acquired the assets of two home health locations from Bio Care Home Health Services, Inc. and Kinsman Enterprises, Inc., located in Irving, Texas and Longview, Texas.
- In July 2017, we acquired the assets of four home health locations from VNA Healthtrends, located in Bourbonnais, Illinois; Des Plaines, Illinois; Schererville, Indiana; and Tempe, Arizona.
- In August 2017, we acquired the assets of two home health locations from VNA Healthtrends, located in Canton, Ohio and Forsyth, Illinois.
- In October 2017, we acquired the assets of a home health location from Ware Visiting Nurses Services, Inc. located in Savannah, Georgia; and
- In October 2017, we also acquired the assets of a home health location from Pickens County Health Care Authority located in Carrollton, Alabama.

We accounted for these transactions under the acquisition method of accounting and reported the results of operations of the acquired locations from their respective dates of acquisition. Assets acquired or liabilities assumed were recorded at their estimated fair values as of the respective acquisition dates. The fair values of identifiable intangible assets were based on valuations using the cost and income approaches. The cost approach is based on amounts that would be required to replace the asset (i.e., replacement cost). The income approach is based on management's estimates of future operating results and cash flows discounted using a weighted-average cost of capital that reflects market participant assumptions. The excess of the fair value of the consideration conveyed over the fair value of the net assets acquired was recorded as goodwill. The goodwill

Notes to Consolidated Financial Statements

reflects our expectations of our ability to utilize the acquired locations' mobile workforce and established relationships within each community and the benefits of being able to leverage operational efficiencies with favorable growth opportunities based on positive demographic trends in these markets. All of the goodwill recorded as a result of these transactions is deductible for federal income tax purposes.

The fair value of the assets acquired and liabilities assumed at the acquisition date were as follows (in millions):

| | |
|---|----------------|
| Total current assets | \$ 0.1 |
| Identifiable intangible asset: | |
| Noncompete agreements (useful lives of 5 years) | 0.8 |
| Trade name (useful life of 1 year) | 0.1 |
| Certificates of need (useful lives of 10 years) | 1.8 |
| Licenses (useful lives of 10 years) | 4.0 |
| Goodwill | 21.4 |
| Total assets acquired | <u>28.2</u> |
| Total liabilities assumed | (0.3) |
| Net assets acquired | <u>\$ 27.9</u> |

Information regarding the net cash paid for home health and hospice acquisitions during 2017 is as follows (in millions):

| | |
|-----------------------------------|----------------|
| Fair value of assets acquired | \$ 6.8 |
| Goodwill | 21.4 |
| Fair value of liabilities assumed | (0.3) |
| Net cash paid for acquisitions | <u>\$ 27.9</u> |

2017 Pro Forma Results of Operations

The following table summarizes the results of operations of the above mentioned inpatient rehabilitation hospitals and home health and hospice agencies from their respective dates of acquisition included in our consolidated results of operations and the unaudited pro forma results of operations of the combined entity had the date of the acquisitions been January 1, 2016 (in millions):

| | Net Operating Revenues | Net (Loss) Income Attributable to Encompass Health |
|--|---------------------------|--|
| Acquired entities only: Actual from acquisition date to December 31, 2017 | \$ 32.9 | \$ (6.3) |
| Combined entity: Supplemental pro forma from 01/01/2017-12/31/2017 (unaudited) | 3,996.1 | 260.3 |
| Combined entity: Supplemental pro forma from 01/01/2016-12/31/2016 (unaudited) | 3,771.5 | 254.8 |

The information presented above is for illustrative purposes only and is not necessarily indicative of results that would have been achieved if the acquisitions had occurred as of the beginning of our 2016 reporting period.

3. Variable Interest Entities:

As of December 31, 2019 and December 31, 2018, we consolidated eight limited partnership-like entities that are variable interest entities ("VIEs") and of which we are the primary beneficiary. Our ownership percentages in these entities range from 50.0% to 75.0% as of December 31, 2019. Through partnership and management agreements with or governing each of these entities, we manage all of these entities and handle all day-to-day operating decisions. Accordingly, we have the

Notes to Consolidated Financial Statements

decision making power over the activities that most significantly impact the economic performance of our VIEs and an obligation to absorb losses or receive benefits from the VIE that could potentially be significant to the VIE. These decisions and significant activities include, but are not limited to, marketing efforts, oversight of patient admissions, medical training, nurse and therapist scheduling, provision of healthcare services, billing, collections and creation and maintenance of medical records. The terms of the agreements governing each of our VIEs prohibit us from using the assets of each VIE to satisfy the obligations of other entities.

The carrying amounts and classifications of the consolidated VIEs' assets and liabilities, which are included in our consolidated balance sheet, are as follows (in millions):

| | <u>December 31, 2019</u> | <u>December 31, 2018</u> |
|--|--------------------------|--------------------------|
| Assets | | |
| Current assets: | | |
| Cash and cash equivalents | \$ 0.2 | \$ 0.3 |
| Accounts receivable | 29.3 | 31.0 |
| Other current assets | 6.4 | 4.9 |
| Total current assets | <u>35.9</u> | <u>36.2</u> |
| Property and equipment, net | 122.6 | 111.5 |
| Operating lease right-of-use assets | 6.0 | — |
| Goodwill | 15.9 | 15.9 |
| Intangible assets, net | 3.3 | 4.3 |
| Deferred income tax assets | 0.7 | 0.6 |
| Other long-term assets | 30.6 | 29.0 |
| Total assets | <u>\$ 215.0</u> | <u>\$ 197.5</u> |
| Liabilities | | |
| Current liabilities: | | |
| Current portion of long-term debt | \$ 0.8 | \$ 0.6 |
| Current operating lease liabilities | 1.4 | — |
| Accounts payable | 6.7 | 5.2 |
| Accrued payroll | 7.7 | 7.0 |
| Other current liabilities | 9.3 | 38.0 |
| Total current liabilities | <u>25.9</u> | <u>50.8</u> |
| Long-term debt, net of current portion | 10.5 | — |
| Long-term operating lease liabilities | 4.7 | — |
| Total liabilities | <u>\$ 41.1</u> | <u>\$ 50.8</u> |

Notes to Consolidated Financial Statements
4. Cash and Marketable Securities:

The components of our investments as of December 31, 2019 are as follows (in millions):

| | Cash & Cash Equivalents | Restricted Cash | Restricted Marketable Securities | Total |
|-------------------|--|------------------------|---|-----------------|
| Cash | \$ 94.8 | \$ 64.8 | \$ — | \$ 159.6 |
| Equity securities | — | — | 63.5 | 63.5 |
| Debt securities | — | — | 12.6 | 12.6 |
| Total | <u>\$ 94.8</u> | <u>\$ 64.8</u> | <u>\$ 76.1</u> | <u>\$ 235.7</u> |

The components of our investments as of December 31, 2018 are as follows (in millions):

| | Cash & Cash Equivalents | Restricted Cash | Restricted Marketable Securities | Total |
|-------------------|--|------------------------|---|-----------------|
| Cash | \$ 69.2 | \$ 64.3 | \$ — | \$ 133.5 |
| Equity securities | — | — | 55.6 | 55.6 |
| Debt securities | — | — | 6.4 | 6.4 |
| Total | <u>\$ 69.2</u> | <u>\$ 64.3</u> | <u>\$ 62.0</u> | <u>\$ 195.5</u> |

Restricted Cash—

As of December 31, 2019 and 2018, *Restricted cash* consisted of the following (in millions):

| | As of December 31, | |
|----------------------------|---------------------------|----------------|
| | 2019 | 2018 |
| Current: | | |
| Affiliate cash | \$ 16.0 | \$ 16.4 |
| Self-insured captive funds | 41.4 | 42.6 |
| | <u>57.4</u> | <u>59.0</u> |
| Noncurrent: | | |
| Self-insured captive funds | 7.4 | 5.3 |
| Total restricted cash | <u>\$ 64.8</u> | <u>\$ 64.3</u> |

Affiliate cash represents cash accounts maintained by joint ventures in which we participate where one or more of our external partners requested, and we agreed, that the joint venture's cash not be commingled with other corporate cash accounts and be used only to fund the operations of those joint ventures. Self-insured captive funds represent cash held at our wholly owned insurance captive, HCS, Ltd., as discussed in Note 11, *Self-Insured Risks*. These funds are committed to pay third-party administrators for claims incurred and are restricted by insurance regulations and requirements. These funds cannot be used for purposes outside HCS without the permission of the Cayman Islands Monetary Authority.

The classification of restricted cash held by HCS as current or noncurrent depends on the classification of the corresponding claims liability.

Notes to Consolidated Financial Statements
Marketable Securities—

Restricted marketable securities at both balance sheet dates represent restricted assets held at HCS. HCS insures a substantial portion of Encompass Health’s professional liability, workers’ compensation, and other insurance claims. These funds are committed for payment of claims incurred, and the classification of these marketable securities as current or noncurrent depends on the classification of the corresponding claims liability. As of December 31, 2019 and 2018, \$76.1 million and \$62.0 million, respectively, of restricted marketable securities are included in *Other long-term assets* in our consolidated balance sheets. During the year ended December 31, 2019 and 2018, \$1.2 million and \$(1.7) million, respectively, of unrealized net gains (losses) were recognized in our consolidated statement of operations on marketable securities still held at the reporting date.

A summary of our available-for-sale marketable securities as of December 31, 2019 is as follows (in millions):

| | Cost | Gross Unrealized Gains | Gross Unrealized Losses | Fair Value |
|-----------------|-------------|---------------------------------------|--|-------------------|
| Debt securities | \$ 12.6 | \$ — | \$ — | \$ 12.6 |

A summary of our available-for-sale marketable securities as of December 31, 2018 is as follows (in millions):

| | Cost | Gross Unrealized Gains | Gross Unrealized Losses | Fair Value |
|-----------------|-------------|---------------------------------------|--|-------------------|
| Debt securities | \$ 6.4 | \$ — | \$ — | \$ 6.4 |

Cost in the above tables includes adjustments made to the cost basis of our debt securities for other-than-temporary impairments. During the years ended December 31, 2019, 2018, and 2017, we did not record any impairment charges related to our restricted marketable securities.

Investing information related to our available-for-sale marketable securities is as follows (in millions):

| | For the Year Ended December 31, | | |
|--|--|-------------|-------------|
| | 2019 | 2018 | 2017 |
| Proceeds from sales and maturities of available-for-sale marketable securities | \$ 6.4 | \$ — | \$ 4.0 |

Our portfolio of marketable securities is comprised of investments in mutual funds that hold investments in a variety of industries and geographies. As discussed in Note 1, *Summary of Significant Accounting Policies*, “Marketable Securities,” when our portfolio included marketable securities with unrealized losses that are not deemed to be other-than-temporarily impaired, we examined the severity and duration of the impairments in relation to the cost of the individual investments. We also considered the industry and geography in which each investment is held and the near-term prospects for a recovery in each.

Scheduled maturities of investments in debt securities at December 31, 2019 were as follows (in millions):

| | Cost | Fair Value |
|--|----------------|-------------------|
| Due in one year or less | \$ 12.6 | \$ 12.6 |
| Due after one year through five years | — | — |
| Due after five years through ten years | — | — |
| Due after ten years | — | — |
| Total | \$ 12.6 | \$ 12.6 |

Notes to Consolidated Financial Statements
5. Accounts Receivable:

Accounts receivable consists of the following (in millions):

| | As of December 31, | |
|---|---------------------------|-----------------|
| | 2019 | 2018 |
| Current: | | |
| Patient accounts receivable | \$ 498.7 | \$ 459.9 |
| Other accounts receivable | 7.4 | 7.8 |
| | <u>506.1</u> | <u>467.7</u> |
| Noncurrent patient accounts receivable | <u>152.1</u> | <u>155.5</u> |
| Accounts receivable | <u>\$ 658.2</u> | <u>\$ 623.2</u> |

Because the resolution of claims that are part of Medicare audit programs can take several years, we review the patient receivables that are part of this adjudication process to determine their appropriate classification as either current or noncurrent. Amounts considered noncurrent are included in *Other long-term assets* in our consolidated balance sheet. See Note 1, *Summary of Significant Accounting Policies*, “Net Operating Revenues,” for additional information.

6. Property and Equipment:

Property and equipment consists of the following (in millions):

| | As of December 31, | |
|---|---------------------------|-------------------|
| | 2019 | 2018 |
| Land | \$ 169.6 | \$ 142.4 |
| Buildings | 2,084.8 | 1,875.2 |
| Leasehold improvements | 192.6 | 147.5 |
| Vehicles | 31.2 | 24.6 |
| Furniture, fixtures, and equipment | 505.1 | 441.6 |
| | <u>2,983.3</u> | <u>2,631.3</u> |
| Less: Accumulated depreciation and amortization | <u>(1,211.8)</u> | <u>(1,147.0)</u> |
| | 1,771.5 | 1,484.3 |
| Construction in progress | 187.8 | 150.5 |
| Property and equipment, net | <u>\$ 1,959.3</u> | <u>\$ 1,634.8</u> |

As of December 31, 2019, approximately 70% of our consolidated *Property and equipment, net* held by Encompass Health Corporation and its guarantor subsidiaries was pledged to the lenders under our credit agreement. See Note 10, *Long-term Debt*, and Note 21, *Condensed Consolidating Financial Information*.

The amount of depreciation expense and interest capitalized is as follows (in millions):

| | For the Year Ended December 31, | | |
|----------------------|--|-------------|-------------|
| | 2019 | 2018 | 2017 |
| Depreciation expense | \$ 130.0 | \$ 124.2 | \$ 111.8 |
| Interest capitalized | \$ 8.3 | \$ 6.0 | \$ 3.7 |

Notes to Consolidated Financial Statements

In February 2016, we entered into a development/lease agreement with CR HQ, LLC (the “Developer”) to construct our new home office in Birmingham, Alabama. Under the terms of this agreement, the Developer was responsible for all costs of constructing the new facility ‘shell’ which is being leased to us for an initial term of 15 years with four, five-year renewal options. The lease commenced in April of 2018. We were responsible for the costs associated with improvements to the interior of the building. Due to the nature and extent of the tenant improvements we made to the new home office and certain provisions of the development/lease agreement, we were deemed to be the accounting owner of the new home office during the construction period. Construction commenced in the second quarter of 2016. As of December 31, 2018, *Property and equipment, net* included \$55.0 million for the construction costs incurred by the Developer, and *Long-term debt, net of current portion* included a corresponding financing obligation liability of \$54.8 million. The remaining corresponding financing obligation liability of \$0.2 million as of December 31, 2018 is included in the *Current portion of long-term debt*. The amounts recorded for construction costs and the corresponding liability are noncash activities for purposes of our consolidated statement of cash flows. As a result of adopting ASC 842 on January 1, 2019, this lease became a finance lease obligation. See Note 1, *Summary of Significant Accounting Policies*, “Recent Accounting Pronouncements,” for additional information on ASC 842. See also Note 10, *Long-term Debt*.

7. Leases:

We lease real estate, vehicles, and equipment under operating and finance leases with non-cancelable terms generally expiring at various dates through 2037. Our operating and finance leases generally have 1- to 25-year terms, with one or more renewal options, primarily relating to our real estate leases, with terms to be determined at the time of renewal. The exercise of such lease renewal options is at our sole discretion, and to the extent we are reasonably certain we will exercise a renewal option, the years related to that option are included in our determination of the lease term for purposes of classifying and measuring a given lease. Certain leases also include options to purchase the leased property.

The components of lease costs are as follows (in millions):

| | For the Year Ended December 31, 2019 |
|-------------------------------------|---|
| Operating lease cost | \$ 72.9 |
| Finance lease cost: | |
| Amortization of right-of-use assets | 30.3 |
| Interest on lease liabilities | 29.5 |
| Total finance lease cost | 59.8 |
| Variable lease cost | 1.5 |
| Sublease income | (3.2) |
| Total lease cost | \$ 131.0 |

Notes to Consolidated Financial Statements

Supplemental consolidated balance sheet information related to leases is as follows (in millions):

| | Classification | As of December 31, 2019 | |
|------------------------------|--|--------------------------------|--------------|
| Assets | | | |
| Operating lease | Operating lease right-of-use assets | \$ | 276.5 |
| Finance lease ⁽¹⁾ | Property and equipment, net | | 327.0 |
| Total leased assets | | <u>\$</u> | <u>603.5</u> |
| Liabilities | | | |
| Current liabilities: | | | |
| Operating lease | Current operating lease liabilities | \$ | 40.4 |
| Finance lease | Current portion of long-term debt | | 21.0 |
| Noncurrent liabilities: | | | |
| Operating lease | Long-term operating lease liabilities | | 243.8 |
| Finance lease | Long-term debt, net of current portion | | 363.1 |
| Total leased liabilities | | <u>\$</u> | <u>668.3</u> |

⁽¹⁾ Finance lease assets are recorded net of accumulated amortization of \$99.6 million as of December 31, 2019.

| | As of December 31, 2019 |
|--|--------------------------------|
| Weighted Average Remaining Lease Term | |
| Operating lease | 9.1 years |
| Finance lease | 13.4 years |
| Weighted Average Discount Rate | |
| Operating lease | 6.2% |
| Finance lease | 7.9% |

Maturities of lease liabilities as of December 31, 2019 are as follows (in millions):

| <u>Year Ending December 31,</u> | <u>Operating Leases</u> | <u>Finance Leases</u> |
|--|--------------------------------|------------------------------|
| 2020 | \$ 57.5 | \$ 50.4 |
| 2021 | 53.2 | 48.9 |
| 2022 | 45.4 | 45.5 |
| 2023 | 40.7 | 45.3 |
| 2024 | 34.4 | 44.7 |
| 2025 and thereafter | 153.0 | 405.7 |
| Total lease payments | <u>384.2</u> | <u>640.5</u> |
| Less: Interest portion | (100.0) | (256.4) |
| Total lease liabilities | <u>\$ 284.2</u> | <u>\$ 384.1</u> |

Notes to Consolidated Financial Statements

Supplemental cash flow information related to our leases is as follows (in millions):

| | For the Year Ended December 31, 2019 |
|---|---|
| Cash paid for amounts included in the measurement of lease liabilities: | |
| Operating cash flows from operating leases | \$ 70.4 |
| Operating cash flows from finance leases | 30.0 |
| Financing cash flows from finance leases | 19.5 |
| Right-of-use assets obtained in exchange for lease obligations: | |
| Operating leases | \$ 43.8 |
| Finance leases | 34.2 |

Information prior to the adoption of ASC 842—

Information related to assets under capital lease obligations is as follows (in millions):

| | As of December 31, 2018 |
|---|--------------------------------|
| Assets under capital lease obligations: | |
| Buildings | \$ 329.6 |
| Vehicles | 21.1 |
| Equipment | 0.3 |
| | 351.0 |
| Less: Accumulated amortization | (126.9) |
| Assets under capital lease obligations, net | \$ 224.1 |

The amount of amortization expense relating to assets under capital lease obligations and rent expense under operating leases is as follows (in millions):

| | For the Year Ended December 31, | |
|----------------------------|--|-------------|
| | 2018 | 2017 |
| Amortization expense | \$ 24.1 | \$ 22.7 |
| Rent expense: | | |
| Minimum rent payments | \$ 69.8 | \$ 66.5 |
| Contingent and other rents | 24.9 | 24.1 |
| Other | 9.1 | 8.9 |
| Total rent expense | \$ 103.8 | \$ 99.5 |

Notes to Consolidated Financial Statements

Future minimum lease payments at December 31, 2018, for those leases having an initial or remaining noncancelable lease term in excess of one year, are as follows (in millions):

| <u>Year Ending December 31,</u> | Operating Leases | Capital Lease Obligations |
|--|-----------------------------|--------------------------------------|
| 2019 | \$ 71.4 | \$ 36.2 |
| 2020 | 65.8 | 32.3 |
| 2021 | 54.3 | 30.3 |
| 2022 | 41.0 | 28.7 |
| 2023 | 35.3 | 28.0 |
| 2024 and thereafter | 148.2 | 299.7 |
| | <u>\$ 416.0</u> | <u>455.2</u> |
| Less: Interest portion | | (191.4) |
| Obligations under capital leases | | <u>\$ 263.8</u> |

Rental income from subleases approximated \$3.0 million and \$2.9 million for the years ended December 31, 2018 and 2017, respectively.

8. Goodwill and Other Intangible Assets:

The following table shows changes in the carrying amount of *Goodwill* for the years ended December 31, 2019, 2018, and 2017 (in millions):

| | Inpatient Rehabilitation | Home Health and Hospice | Consolidated |
|---|-------------------------------------|------------------------------------|---------------------|
| Goodwill as of December 31, 2016 | \$ 1,142.0 | \$ 785.2 | \$ 1,927.2 |
| Acquisitions | 24.0 | 21.4 | 45.4 |
| Goodwill as of December 31, 2017 | 1,166.0 | 806.6 | 1,972.6 |
| Acquisitions | 23.2 | 105.0 | 128.2 |
| Goodwill as of December 31, 2018 | 1,189.2 | 911.6 | 2,100.8 |
| Acquisitions | 4.8 | 174.7 | 179.5 |
| Consolidation of joint venture formerly accounted for under the equity method of accounting | 24.9 | — | 24.9 |
| Goodwill as of December 31, 2019 | <u>\$ 1,218.9</u> | <u>\$ 1,086.3</u> | <u>\$ 2,305.2</u> |

Goodwill increased in 2017 as a result of our acquisitions of inpatient and home health operations. *Goodwill* increased in 2018 as a result of our acquisitions of Camellia and other inpatient and home health and hospice operations. *Goodwill* increased in 2019 as a result of our consolidation of Yuma Rehabilitation Hospital and the remeasurement of our previously held equity interest at fair value and our acquisitions of Alacare and other inpatient and home health and hospice operations. See Note 2, *Business Combinations*, and Note 9, *Investments in and Advances to Nonconsolidated Affiliates*.

We performed impairment reviews as of October 1, 2019, 2018, and 2017 and concluded no *Goodwill* impairment existed. As of December 31, 2019, we had no accumulated impairment losses related to *Goodwill*.

Notes to Consolidated Financial Statements

The following table provides information regarding our other intangible assets (in millions):

| | Gross Carrying Amount | Accumulated Amortization | Net |
|---------------------------------|----------------------------------|-------------------------------------|------------|
| Certificates of need: | | | |
| 2019 | \$ 197.2 | \$ (40.4) | \$ 156.8 |
| 2018 | 148.3 | (28.2) | 120.1 |
| Licenses: | | | |
| 2019 | \$ 187.3 | \$ (94.1) | \$ 93.2 |
| 2018 | 169.1 | (82.2) | 86.9 |
| Noncompete agreements: | | | |
| 2019 | \$ 74.2 | \$ (62.3) | \$ 11.9 |
| 2018 | 65.6 | (58.6) | 7.0 |
| Trade name - Encompass: | | | |
| 2019 | \$ 135.2 | \$ — | \$ 135.2 |
| 2018 | 135.2 | — | 135.2 |
| Trade names - all other: | | | |
| 2019 | \$ 41.6 | \$ (22.4) | \$ 19.2 |
| 2018 | 38.9 | (19.4) | 19.5 |
| Internal-use software: | | | |
| 2019 | \$ 173.8 | \$ (116.0) | \$ 57.8 |
| 2018 | 161.3 | (89.3) | 72.0 |
| Market access assets: | | | |
| 2019 | \$ 13.2 | \$ (11.0) | \$ 2.2 |
| 2018 | 13.2 | (10.5) | 2.7 |
| Total intangible assets: | | | |
| 2019 | \$ 822.5 | \$ (346.2) | \$ 476.3 |
| 2018 | 731.6 | (288.2) | 443.4 |

Amortization expense for other intangible assets is as follows (in millions):

| | For the Year Ended December 31, | | |
|----------------------|--|-------------|-------------|
| | 2019 | 2018 | 2017 |
| Amortization expense | \$ 58.4 | \$ 51.4 | \$ 49.3 |

Total estimated amortization expense for our other intangible assets for the next five years is as follows (in millions):

| Year Ending December 31, | Estimated Amortization Expense |
|---------------------------------|---|
| 2020 | \$ 55.9 |
| 2021 | 46.2 |
| 2022 | 38.2 |
| 2023 | 33.9 |
| 2024 | 31.0 |

Notes to Consolidated Financial Statements
9. Investments in and Advances to Nonconsolidated Affiliates:

Investments in and advances to nonconsolidated affiliates as of December 31, 2019 represents our investment in five partially owned subsidiaries, of which four are general or limited partnerships, limited liability companies, or joint ventures in which Encompass Health or one of its subsidiaries is a general or limited partner, managing member, member, or venturer, as applicable. We do not control these affiliates but have the ability to exercise significant influence over the operating and financial policies of certain of these affiliates. Our ownership percentages in these affiliates range from approximately 8% to 60%. We account for these investments using the cost and equity methods of accounting. Our investments, which are included in *Other long-term assets* in our consolidated balance sheets, consist of the following (in millions):

| | As of December 31, | |
|---|---------------------------|----------------|
| | 2019 | 2018 |
| Equity method investments: | | |
| Capital contributions | \$ 0.9 | \$ 0.9 |
| Cumulative share of income | 68.1 | 114.0 |
| Cumulative share of distributions | (63.6) | (102.7) |
| | <u>5.4</u> | <u>12.2</u> |
| Cost method investments: | | |
| Capital contributions, net of distributions and impairments | 2.0 | — |
| Total investments in and advances to nonconsolidated affiliates | <u>\$ 7.4</u> | <u>\$ 12.2</u> |

The following summarizes the combined assets, liabilities, and equity and the combined results of operations of our equity method affiliates (on a 100% basis, in millions):

| | As of December 31, | |
|---|---------------------------|----------------|
| | 2019 | 2018 |
| Assets— | | |
| Current | \$ 4.2 | \$ 9.9 |
| Noncurrent | 9.3 | 17.8 |
| Total assets | <u>\$ 13.5</u> | <u>\$ 27.7</u> |
| Liabilities and equity— | | |
| Current liabilities | \$ 0.5 | \$ 1.4 |
| Noncurrent liabilities | 0.3 | 0.1 |
| Partners' capital and shareholders' equity— | | |
| Encompass Health | 4.9 | 12.2 |
| Outside partners | 7.8 | 14.0 |
| Total liabilities and equity | <u>\$ 13.5</u> | <u>\$ 27.7</u> |

Notes to Consolidated Financial Statements

Condensed statements of operations (in millions):

| | For the Year Ended December 31, | | |
|---|--|-------------|-------------|
| | 2019 | 2018 | 2017 |
| Net operating revenues | \$ 32.6 | \$ 42.6 | \$ 40.9 |
| Operating expenses | (19.1) | (25.6) | (24.1) |
| Income from continuing operations, net of tax | 13.4 | 17.1 | 17.0 |
| Net income | 13.4 | 17.1 | 17.0 |

As a result of an amendment to the joint venture agreement related to Yuma Rehabilitation Hospital, the accounting for this hospital changed from the equity method of accounting to a consolidated entity effective July 1, 2019. The amendment revised certain participatory rights held by our joint venture partner resulting in Encompass Health gaining control of this entity from an accounting perspective. We accounted for this change in control as a business combination and consolidated this entity using the acquisition method. The consolidation of Yuma Rehabilitation Hospital did not have a material impact on our financial position, results of operations, or cash flows. As a result of our consolidation of this hospital and the remeasurement of our previously held equity interest at fair value, *Goodwill* increased by \$24.9 million and we recorded a \$19.2 million gain as part of *Other income* during the year ended December 31, 2019.

10. Long-term Debt:

Our long-term debt outstanding consists of the following (in millions):

| | As of December 31, | |
|--|---------------------------|-------------------|
| | 2019 | 2018 |
| Credit Agreement— | | |
| Advances under revolving credit facility | \$ 45.0 | \$ 30.0 |
| Term loan facilities | 265.2 | 280.1 |
| Bonds payable— | | |
| 5.125% Senior Notes due 2023 | 297.3 | 296.6 |
| 5.75% Senior Notes due 2024 | 697.3 | 1,194.7 |
| 5.75% Senior Notes due 2025 | 345.6 | 345.0 |
| 4.50% Senior Notes due 2028 | 491.7 | — |
| 4.75% Senior Notes due 2030 | 491.7 | — |
| Other notes payable | 44.7 | 104.2 |
| Finance lease obligations | 384.1 | 263.8 |
| | <u>3,062.6</u> | <u>2,514.4</u> |
| Less: Current portion | (39.3) | (35.8) |
| Long-term debt, net of current portion | <u>\$ 3,023.3</u> | <u>\$ 2,478.6</u> |

Notes to Consolidated Financial Statements

The following chart shows scheduled principal payments due on long-term debt for the next five years and thereafter (in millions):

| Year Ending December 31, | Face Amount | Net Amount |
|---------------------------------|--------------------|-------------------|
| 2020 | \$ 39.3 | \$ 39.3 |
| 2021 | 35.5 | 35.5 |
| 2022 | 46.3 | 46.3 |
| 2023 | 335.1 | 332.4 |
| 2024 | 995.7 | 991.6 |
| Thereafter | 1,638.6 | 1,617.5 |
| Total | \$ 3,090.5 | \$ 3,062.6 |

As a result of the 2019 and 2017 redemptions discussed below, we recorded a \$7.7 million and \$10.7 million *Loss on early extinguishment of debt* in 2019 and 2017, respectively. There were no redemptions resulting in a *Loss on early extinguishment of debt* during 2018.

Senior Secured Credit Agreement—

Credit Agreement

In November 2019, we amended our existing credit agreement, previously amended in September 2017 (the “Credit Agreement”). The Credit Agreement provided for a \$270 million term loan commitment and a \$1 billion revolving credit facility, with a \$260 million letter of credit subfacility and a swingline loan subfacility, all of which mature in November 2024. Outstanding term loan borrowings are payable in equal consecutive quarterly installments, commencing on December 31, 2019, of 1.25% of the aggregate principal amount of the term loans outstanding as of December 31, 2019, with the remainder due at maturity. We have the right at any time to prepay, in whole or in part, any borrowing under the term loan facilities.

Amounts drawn on the term loan facilities and the revolving credit facility bear interest at a rate per annum of, at our option, (1) LIBOR or (2) the higher of (a) Barclays Bank PLC’s (“Barclays”) prime rate and (b) the federal funds rate plus 0.5%, in each case, plus, in each case, an applicable margin that varies depending upon our leverage ratio. We are also subject to a commitment fee of 0.375% per annum on the daily amount of the unutilized commitments under the term loan facilities and revolving credit facility. The current interest rate on borrowings under the Credit Agreement is LIBOR plus 1.50%.

The Credit Agreement contains affirmative and negative covenants and default and acceleration provisions, including a minimum interest coverage ratio and a maximum leverage ratio. Under one such negative covenant, we are restricted from paying common stock dividends, prepaying certain senior notes, making certain investments, and repurchasing preferred and common equity unless (1) we are not in default under the terms of the Credit Agreement and (2) our senior secured leverage ratio, as defined in the Credit Agreement, does not exceed 2x. In the event the senior secured leverage ratio exceeds 2x, these payments are subject to a limit of \$200 million plus an amount equal to a portion of available excess cash flows each fiscal year. Our obligations under the Credit Agreement are secured by the current and future personal property of the Company and its subsidiary guarantors. The maximum leverage ratio in the financial covenants is 4.50x through December 2021 and 4.25x from then until maturity.

As of December 31, 2019 and 2018, \$45 million and \$30 million were drawn under the revolving credit facility with an interest rate of 3.2% and 3.9%, respectively. Amounts drawn as of December 31, 2019 and 2018 exclude \$38.9 million and \$37.4 million, respectively, utilized under the letter of credit subfacility, which were being used in the ordinary course of business to secure workers’ compensation and other insurance coverages and for general corporate purposes. Currently, there are no undrawn term loan commitments under the Credit Agreement.

Notes to Consolidated Financial Statements

2017 Credit Agreement

In September 2017, we amended our existing credit agreement (the “2017 Credit Agreement”). The 2017 Credit Agreement provided for a \$300 million term loan commitment and a \$700 million revolving credit facility, with a \$260 million letter of credit subfacility and a swingline loan subfacility, all of which would have matured in September 2022. Outstanding term loan borrowings were payable in equal consecutive quarterly installments, commencing on December 31, 2017, of 1.25% of the aggregate principal amount of the term loans outstanding as of December 31, 2017, with the remainder due at maturity. The 2017 Credit Agreement contained similar affirmative and negative covenants and default and acceleration provisions as the Credit Agreement. The 2017 amendment to our existing credit agreement included a net repayment of approximately \$110 million to our existing term loan facility.

*Bonds Payable—*Nonconvertible Notes

The Company’s 2023 Notes, 2024 Notes, 2025 Notes, 2028 Notes, and 2030 Notes (collectively, the “Senior Notes”) were issued pursuant to an indenture (the “Base Indenture”) dated as of December 1, 2009, as supplemented by each Senior Notes’ respective supplemental indenture (together with the Base Indenture, the “Indenture”). Pursuant to the terms of the Indenture, the Senior Notes are jointly and severally guaranteed on a senior, unsecured basis by all of our existing and future subsidiaries that guarantee borrowings under our Credit Agreement and other capital markets debt (see Note 21, *Condensed Consolidating Financial Information*). The Senior Notes are senior, unsecured obligations of Encompass Health and rank equally with our other senior indebtedness, senior to any of our subordinated indebtedness, and effectively junior to our secured indebtedness to the extent of the value of the collateral securing such indebtedness.

Upon the occurrence of a change in control (as defined in the Indenture), each holder of the Senior Notes may require us to repurchase all or a portion of the notes in cash at a price equal to 101% of the principal amount of the Senior Notes to be repurchased, plus accrued and unpaid interest.

The Senior Notes contain covenants and default and acceleration provisions, that, among other things, limit our and certain of our subsidiaries’ ability to (1) incur additional debt, (2) make certain restricted payments, (3) consummate specified asset sales, (4) incur liens, and (5) merge or consolidate with another person.

2023 Notes

In March 2015, we issued \$300 million of 5.125% Senior Notes due 2023 (“the 2023 Notes”) at par, which resulted in approximately \$295 million in net proceeds from the public offering. The 2023 Notes mature on March 15, 2023 and bear interest at a per annum rate of 5.125%. Inclusive of financing costs, the effective interest rate on the 2023 Notes is 5.4%. Interest on the 2023 Notes is payable semiannually in arrears on March 15 and September 15. We may redeem the 2023 Notes, in whole or in part, at any time on or after March 15, 2018 at the redemption prices set forth below:

| <u>Period</u> | <u>Redemption Price*</u> |
|---------------------|--------------------------|
| 2019 | 102.563% |
| 2020 | 101.281% |
| 2021 and thereafter | 100.000% |

* Expressed in percentage of principal amount

2024 Notes

In September 2012, we completed a public offering of \$275 million aggregate principal amount of the 5.75% Senior Notes due 2024 (“the 2024 Notes”) at par. In September 2014, we issued an additional \$175 million of the 2024 Notes at a price of 103.625% of the principal amount, in January 2015, we issued an additional \$400 million of the 2024 Notes at a price of 102% of the principal amount, and in August 2015, we issued an additional \$350 million of our 2024 Notes at a price of 100.5% of the principal amount. The 2024 Notes mature on November 1, 2024 and bear interest at a per annum rate of 5.75%.

Notes to Consolidated Financial Statements

Inclusive of premiums and financing costs, the effective interest rate on the 2024 Notes is 5.8%. Interest is payable semiannually in arrears on May 1 and November 1 of each year.

In June 2019, we redeemed \$100 million of outstanding principal amount of our 2024 Notes using cash on hand and capacity under our revolving credit facility. Pursuant to the terms of the 2024 Notes, this optional redemption was made at a price of 101.917%, which resulted in a total cash outlay of approximately \$102 million. In November 2019, we redeemed \$400 million of the outstanding principal amount of our 2024 Notes. Pursuant to the terms of the 2024 Notes, this optional redemption was made at a price of 100.958%, which resulted in a total cash outlay of approximately \$404 million.

We may redeem the 2024 Notes, in whole or in part, at any time on or after November 1, 2017, at the redemption prices set forth below:

| Period | Redemption Price* |
|---------------------|--------------------------|
| 2019 | 100.958% |
| 2020 and thereafter | 100.000% |

* Expressed in percentage of principal amount

2025 Notes

In September 2015, we issued \$350 million of 5.75% Senior Notes due 2025 (“the 2025 Notes”) at par. The 2025 Notes mature on September 15, 2025 and bear interest at a per annum rate of 5.75%. Inclusive of financing costs, the effective interest rate on the 2025 Notes is 6.0%. Interest on the 2025 Notes is payable semiannually in arrears on March 15 and September 15.

We may redeem the 2025 Notes, in whole or in part, at any time on or after September 15, 2020, at the redemption prices set forth below:

| Period | Redemption Price* |
|---------------------|--------------------------|
| 2020 | 102.875% |
| 2021 | 101.917% |
| 2022 | 100.958% |
| 2023 and thereafter | 100.000% |

* Expressed in percentage of principal amount

Notes to Consolidated Financial Statements

2028 and 2030 Notes

In September 2019, we issued \$500 million of 4.50% Senior Notes due 2028 (the “2028 Notes”) at par and \$500 million of 4.75% Senior Notes due 2030 (the “2030 Notes”) at par. The proceeds from this offering were used to fund the purchase of equity and vested stock appreciation rights from management investors of our home health and hospice segment, redeem a portion of our 2024 Notes as discussed above, and repay borrowings under our revolving credit facility.

The 2028 Notes mature on February 1, 2028. Inclusive of financing costs, the effective interest rate on the 2028 Notes is 4.7%. Interest on the 2028 Notes is payable semiannually in arrears on February 1 and August 1. We may redeem the 2028 Notes, in whole or in part, at any time on or after February 1, 2023 at the redemption prices set forth below:

| Period | Redemption Price* |
|---------------------|--------------------------|
| 2023 | 102.250% |
| 2024 | 101.125% |
| 2025 and thereafter | 100.000% |

* Expressed in percentage of principal amount

The 2030 Notes mature on February 1, 2030. Inclusive of financing costs, the effective interest rate on the 2030 Notes is 5.0%. Interest on the 2030 Notes is payable semiannually in arrears on February 1 and August 1. We may redeem the 2030 Notes, in whole or in part, at any time on or after February 1, 2025 at the redemption prices set forth below:

| Period | Redemption Price* |
|---------------------|--------------------------|
| 2025 | 102.375% |
| 2026 | 101.583% |
| 2027 | 100.792% |
| 2028 and thereafter | 100.000% |

* Expressed in percentage of principal amount

Convertible Notes*Former Convertible Senior Subordinated Notes Due 2043*

In November 2013, we exchanged \$320 million in aggregate principal amount of newly issued 2.00% Convertible Senior Subordinated Notes due 2043 (the “Former Convertible Notes”) for 257,110 shares of our outstanding 6.50% Series A Convertible Perpetual Preferred Stock. Our Former Convertible Notes were issued pursuant to an indenture dated November 18, 2013 (the “Former Convertible Notes Indenture”) between us and Wells Fargo Bank, National Association, as trustee and conversion agent.

In May 2017, we provided notice of our intent to exercise our early redemption option on the \$320 million outstanding principal amount of the Former Convertible Notes. Pursuant to the Former Convertible Notes Indenture, the holders had the right to convert their Former Convertible Notes into shares of our common stock at a conversion rate of 27.2221 shares per \$1,000 principal amount of Former Convertible Notes, which rate was increased by the make-whole premium. Holders of \$319.4 million in principal of these Former Convertible Notes chose to convert their notes to shares of our common stock resulting in the issuance of 8.9 million shares from treasury stock, including 0.2 million shares due to the make-whole premium. Approximately 8.6 million of these shares were included in *Diluted earnings per share attributable to Encompass Health common shareholders* as of March 31, 2017. We redeemed the remaining \$0.6 million in principal at par in cash. The redemption and all conversions occurred in the second quarter of 2017. The Former Convertible Notes would have matured on

Notes to Consolidated Financial Statements

December 1, 2043. Inclusive of discounts and financing costs, the effective interest rate on the Former Convertible Notes was 6.0%. Interest was payable semiannually in arrears in cash on June 1 and December 1 of each year.

Other Notes Payable—

Our notes payable consist of the following (in millions):

| | As of December 31, | | Interest Rates |
|---|---------------------------|-----------------|---|
| | 2019 | 2018 | |
| Sale/leaseback transactions involving real estate accounted for as financings | \$ 28.0 | \$ 82.8 | 8.1% to 11.2% as of December 31, 2019; 7.8% to 11.2% as of December 31, 2018 |
| Construction of a new hospital | 12.9 | 14.6 | 5.0% as of December 31, 2019; 4.8% to 5.0% as of December 31, 2018 |
| Other | 3.8 | 6.8 | 4.3% to 6.8% |
| Other notes payable | <u>\$ 44.7</u> | <u>\$ 104.2</u> | |

As a result of adopting ASC 842 on January 1, 2019, notes payable of approximately \$52 million related to a sale/leaseback transaction involving real estate became a finance lease obligation. See Note 1, *Summary of Significant Accounting Policies*, “Recent Accounting Pronouncements,” for additional information on ASC 842.

11. Self-Insured Risks:

We insure a substantial portion of our professional liability, general liability, and workers’ compensation risks through a self-insured retention program (“SIR”) underwritten by our consolidated wholly owned offshore captive insurance subsidiary, HCS, Ltd., which we fund via regularly scheduled premium payments. HCS is an insurance company licensed by the Cayman Island Monetary Authority. We use HCS to fund our first layer of insurance coverage up to approximately \$30 million for annual aggregate losses associated with general and professional liability risks. Workers’ compensation exposures are capped on a per claim basis. Risks in excess of specified limits per claim and in excess of our aggregate SIR amount are covered by unrelated commercial carriers.

The following table presents the changes in our self-insurance reserves for the years ended December 31, 2019, 2018, and 2017 (in millions):

| | 2019 | 2018 | 2017 |
|---|-----------------|-----------------|-----------------|
| Balance at beginning of period, gross | \$ 160.9 | \$ 171.0 | \$ 171.4 |
| Less: Reinsurance receivables | (25.6) | (39.9) | (41.4) |
| Balance at beginning of period, net | 135.3 | 131.1 | 130.0 |
| Increase for the provision of current year claims | 46.9 | 47.1 | 44.7 |
| Decrease for the provision of prior year claims | (12.6) | (8.7) | (3.0) |
| Expenses related to discontinued operations | (0.1) | (0.2) | (0.5) |
| Payments related to current year claims | (7.5) | (7.0) | (5.0) |
| Payments related to prior year claims | (31.1) | (27.0) | (35.1) |
| Balance at end of period, net | 130.9 | 135.3 | 131.1 |
| Add: Reinsurance receivables | 26.4 | 25.6 | 39.9 |
| Balance at end of period, gross | <u>\$ 157.3</u> | <u>\$ 160.9</u> | <u>\$ 171.0</u> |

As of December 31, 2019 and 2018, \$40.1 million and \$41.3 million, respectively, of these reserves are included in *Other current liabilities* in our consolidated balance sheets.

Notes to Consolidated Financial Statements

Provisions for these risks are based primarily upon actuarially determined estimates. These reserves represent the unpaid portion of the estimated ultimate cost of all reported and unreported losses incurred through the respective consolidated balance sheet dates. The reserves are estimated using individual case-basis valuations and actuarial analyses. Those estimates are subject to the effects of trends in loss severity and frequency. The estimates are continually reviewed and adjustments are recorded as experience develops or new information becomes known. The changes to the estimated ultimate loss amounts are included in current operating results.

The reserves for these self-insured risks cover approximately 1,000 individual claims at December 31, 2019 and 2018, and estimates for potential unreported claims. The time period required to resolve these claims can vary depending upon the jurisdiction, the nature, and the form of resolution of the claims. The estimation of the timing of payments beyond a year can vary significantly. Although considerable variability is inherent in reserve estimates, management believes the reserves for losses and loss expenses are adequate; however, there can be no assurance the ultimate liability will not exceed management's estimates.

12. Redeemable Noncontrolling Interests:

The following is a summary of the activity related to our *Redeemable noncontrolling interests* (in millions):

| | For the Year Ended December 31, | | |
|---|--|-----------------|-----------------|
| | 2019 | 2018 | 2017 |
| Balance at beginning of period | \$ 261.7 | \$ 220.9 | \$ 138.3 |
| Net income attributable to noncontrolling interests | 12.6 | 13.9 | 17.9 |
| Distributions declared | (9.2) | (8.6) | (4.6) |
| Contribution to joint venture | 1.0 | 9.6 | 2.3 |
| Reclassification to noncontrolling interests | (11.2) | — | — |
| Purchase of redeemable noncontrolling interests | (162.9) | (65.1) | — |
| Change in fair value | 147.6 | 91.0 | 67.0 |
| Balance at end of period | \$ 239.6 | \$ 261.7 | \$ 220.9 |

The following table reconciles the net income attributable to nonredeemable *Noncontrolling interests*, as recorded in the shareholders' equity section of the consolidated balance sheets, and the net income attributable to *Redeemable noncontrolling interests*, as recorded in the mezzanine section of the consolidated balance sheets, to the *Net income attributable to noncontrolling interests* presented in the consolidated statements of operations (in millions):

| | For the Year Ended December 31, | | |
|---|--|----------------|----------------|
| | 2019 | 2018 | 2017 |
| Net income attributable to nonredeemable noncontrolling interests | \$ 74.5 | \$ 69.2 | \$ 61.2 |
| Net income attributable to redeemable noncontrolling interests | 12.6 | 13.9 | 17.9 |
| Net income attributable to noncontrolling interests | \$ 87.1 | \$ 83.1 | \$ 79.1 |

On December 31, 2014, we acquired 83.3% of our home health and hospice business when we purchased EHHI Holdings, Inc. ("EHHI"). In the acquisition, we acquired all of the issued and outstanding equity interests of EHHI, other than equity interests contributed to Encompass Health Home Health Holdings, Inc. ("Holdings"), a subsidiary of Encompass Health and an indirect parent of EHHI, by certain sellers in exchange for shares of common stock of Holdings. Those sellers were members of EHHI management, and they contributed a portion of their shares of common stock of EHHI, valued at approximately \$64 million on the acquisition date, in exchange for approximately 16.7% of the outstanding shares of common stock of Holdings. At any time after December 31, 2017, each management investor has the right (but not the obligation) to have his or her shares of Holdings stock repurchased by Encompass Health for a cash purchase price per share equal to the fair value. Specifically, up to one-third of each management investor's shares of Holdings stock may be sold prior to December 31, 2018; two-thirds of each management investor's shares of Holdings stock may be sold prior to December 31, 2019; and all of

Notes to Consolidated Financial Statements

each management investor's shares of Holdings stock may be sold thereafter. At any time after December 31, 2019, Encompass Health will have the right (but not the obligation) to repurchase all or any portion of the shares of Holdings stock owned by one or more management investors for a cash purchase price per share equal to the fair value. In February 2018, each management investor exercised the right to sell one-third of his or her shares of Holdings stock to Encompass Health, representing approximately 5.6% of the outstanding shares of the common stock of Holdings. On February 21, 2018, Encompass Health settled the acquisition of those shares upon payment of approximately \$65 million in cash. In July 2019, we received additional exercise notices, representing approximately 5.6% of the outstanding shares of the common stock of Holdings. In September 2019, Encompass Health settled the acquisition of those shares upon payment of approximately \$163 million in cash. As of December 31, 2019, the value of the outstanding shares of Holdings owned by management investors was approximately \$208 million. In January 2020, we received additional exercise notices, representing approximately 4.3% of the outstanding shares of the common stock of Holdings. On February 18, 2020, Encompass Health settled the acquisition of those shares upon payment of approximately \$162 million in cash. Upon settlement of these exercises, approximately \$46 million of the shares of Holdings held by two management investors remained outstanding.

On February 20, 2020, Encompass Health entered into exchange agreements (each, an "Exchange Agreement") with these two management investors, pursuant to which they have the right to exchange all of the remaining shares of Holdings held by them for shares of common stock of Encompass Health (the "EHC Shares"). Each of the Exchange Agreements provides that the management investor must deliver a written exchange notice (an "Exchange Notice") to Encompass Health in order to exchange his or her remaining shares of Holdings for EHC Shares. Each Exchange Agreement further provides that the number of EHC Shares to be delivered to the management investor is to be determined by dividing the fair value of the shares of Holdings held by the management investor on the date of the Exchange Agreement by the last reported sales price of Encompass Health's common stock on the New York Stock Exchange (the "NYSE") on the date of delivery of the Exchange Notice.

On February 20, 2020, Encompass Health received an Exchange Notice from each of the management investors. Based on the last sales price of Encompass Health's common stock on the NYSE on February 20, 2020, Encompass Health anticipates delivering an aggregate of approximately 561,000 EHC Shares, less than 0.6% of the total number of outstanding shares of the Encompass Health's common stock, to the management investors. The settlement of the exchanges is expected to occur prior to the end of the first quarter of 2020. Encompass Health anticipates issuing the EHC Shares from its treasury shares.

See also Note 13, *Fair Value Measurements*.

Notes to Consolidated Financial Statements

13. Fair Value Measurements:

Our financial assets and liabilities that are measured at fair value on a recurring basis are as follows (in millions):

| | Fair Value Measurements at Reporting Date Using | | | | | Valuation Technique ⁽¹⁾ |
|-------------------------------------|---|--|---|---|--|------------------------------------|
| | Fair Value | Quoted Prices in Active Markets for Identical Assets (Level 1) | Significant Other Observable Inputs (Level 2) | Significant Unobservable Inputs (Level 3) | | |
| As of December 31, 2019 | | | | | | |
| Other long-term assets: | | | | | | |
| Equity securities | \$ 63.5 | \$ — | \$ 63.5 | \$ — | | M |
| Debt securities | 12.6 | 12.6 | — | — | | M |
| Redeemable noncontrolling interests | 239.6 | — | — | 239.6 | | I |
| As of December 31, 2018 | | | | | | |
| Other long-term assets: | | | | | | |
| Equity securities | \$ 55.6 | \$ — | \$ 55.6 | \$ — | | M |
| Debt securities | 6.4 | 6.4 | — | — | | M |
| Redeemable noncontrolling interests | 261.7 | — | — | 261.7 | | I |

⁽¹⁾ The three valuation techniques are: market approach (M), cost approach (C), and income approach (I).

In addition to assets and liabilities recorded at fair value on a recurring basis, we are also required to record assets and liabilities at fair value on a nonrecurring basis. Generally, assets are recorded at fair value on a nonrecurring basis as a result of impairment charges or similar adjustments made to the carrying value of the applicable assets.

As a result of our consolidation of Yuma Rehabilitation Hospital and the remeasurement of our previously held equity interest at fair value, we recorded a \$19.2 million gain as part of *Other income* during the year ended December 31, 2019. We determined the fair value of our previously held equity interest using the income approach valuation technique. The income approach included the use of the hospital's projected operating results and cash flows discounted using a rate that reflects market participant assumptions for the hospital. The projected operating results use management's best estimates of economic and market conditions over the forecasted period including assumptions for pricing and volume, operating expenses, and capital expenditures. During the years ended December 31, 2018 and 2017, we did not record any gains or losses related to our nonfinancial assets and liabilities that are recognized or disclosed at fair value in the financial statements on a nonrecurring basis as part of our continuing operations.

Notes to Consolidated Financial Statements

As discussed in Note 1, *Summary of Significant Accounting Policies*, “Fair Value Measurements,” the carrying value equals fair value for our financial instruments that are not included in the table below and are classified as current in our consolidated balance sheets. The carrying amounts and estimated fair values for our other financial instruments are presented in the following table (in millions):

| | As of December 31, 2019 | | As of December 31, 2018 | |
|--|-------------------------|----------------------|-------------------------|----------------------|
| | Carrying Amount | Estimated Fair Value | Carrying Amount | Estimated Fair Value |
| Long-term debt: | | | | |
| Advances under revolving credit facility | \$ 45.0 | \$ 45.0 | \$ 30.0 | \$ 30.0 |
| Term loan facilities | 265.2 | 266.6 | 280.1 | 281.3 |
| 5.125% Senior Notes due 2023 | 297.3 | 306.6 | 296.6 | 298.5 |
| 5.75% Senior Notes due 2024 | 697.3 | 708.8 | 1,194.7 | 1,200.0 |
| 5.75% Senior Notes due 2025 | 345.6 | 369.7 | 345.0 | 339.5 |
| 4.50% Senior Notes due 2028 | 491.7 | 519.4 | — | — |
| 4.75% Senior Notes due 2030 | 491.7 | 520.0 | — | — |
| Other notes payable | 44.7 | 44.7 | 104.2 | 104.2 |
| Financial commitments: | | | | |
| Letters of credit | — | 38.9 | — | 37.4 |

Fair values for our long-term debt and financial commitments are determined using inputs, including quoted prices in nonactive markets, that are observable either directly or indirectly, or *Level 2* inputs within the fair value hierarchy. See Note 1, *Summary of Significant Accounting Policies*, “Fair Value Measurements” and “Redeemable Noncontrolling Interests.”

14. Share-Based Payments:

The Company has awarded employee stock-based compensation in the form of stock options, SARs, and restricted stock awards (“RSAs”) under the terms of share-based incentive plans designed to align employee and executive interests to those of its stockholders. All employee stock-based compensation awarded during 2019, 2018, and 2017 was issued under the 2016 Omnibus Performance Incentive Plan, a stockholder-approved plan that reserves and provides for the grant of up to 14,000,000 shares of common stock. This plan allows for the grants of nonqualified stock options, incentive stock options, restricted stock, SARs, performance shares, performance share units, dividend equivalents, restricted stock units (“RSUs”), and/or other stock-based awards.

Stock Options—

Under our share-based incentive plans, officers and employees are given the right to purchase shares of Encompass Health common stock at a fixed grant price determined on the day the options are granted. The terms and conditions of the options, including exercise prices and the periods in which options are exercisable, are generally at the discretion of the compensation and human capital committee of our board of directors. However, no options are exercisable beyond ten years from the date of grant. Granted options vest over the awards’ requisite service periods, which are generally three years.

Notes to Consolidated Financial Statements

The fair values of the options granted during the years ended December 31, 2019, 2018, and 2017 have been estimated at the grant date using the Black-Scholes option-pricing model with the following weighted-average assumptions:

| | For the Year Ended December 31, | | |
|-------------------------|--|-------------|-------------|
| | 2019 | 2018 | 2017 |
| Expected volatility | 25.3% | 29.2% | 30.5% |
| Risk-free interest rate | 2.7% | 2.7% | 2.1% |
| Expected life (years) | 7.1 | 7.1 | 7.7 |
| Dividend yield | 2.1% | 2.2% | 2.2% |

The Black-Scholes option-pricing model was developed for use in estimating the fair value of traded options which have no vesting restrictions and are fully transferable. In addition, the Black-Scholes option-pricing model requires the input of highly subjective assumptions, including the expected stock price volatility. We estimate our expected term through an analysis of actual, historical post-vesting exercise, cancellation, and expiration behavior by our employees and projected post-vesting activity of outstanding options. We calculate volatility based on the historical volatility of our common stock over the period commensurate with the expected term of the options. The risk-free interest rate is the implied daily yield currently available on U.S. Treasury issues with a remaining term closely approximating the expected term used as the input to the Black-Scholes option-pricing model. We estimated our dividend yield based on our annual dividend rate and our stock price on the dividend payment dates. Under the Black-Scholes option-pricing model, the weighted-average grant date fair value per share of employee stock options granted during the years ended December 31, 2019, 2018, and 2017 was \$15.45, \$14.57, and \$11.55, respectively.

A summary of our stock option activity and related information is as follows:

| | Shares (In Thousands) | Weighted- Average Exercise Price per Share | Weighted- Average Remaining Life (Years) | Aggregate Intrinsic Value (In Millions) |
|--------------------------------|----------------------------------|---|---|--|
| Outstanding, December 31, 2018 | 537 | \$ 35.22 | | |
| Granted | 106 | 63.77 | | |
| Exercised | (78) | 17.73 | | |
| Outstanding, December 31, 2019 | 565 | 43.02 | 6.3 | \$ 14.8 |
| Exercisable, December 31, 2019 | 364 | 35.16 | 5.1 | 12.4 |

We recognized approximately \$1.4 million, \$1.1 million, and \$0.8 million of compensation expense related to our stock options for the years ended December 31, 2019, 2018, and 2017, respectively. As of December 31, 2019, there was \$1.8 million of unrecognized compensation cost related to unvested stock options. This cost is expected to be recognized over a weighted-average period of 22 months. The total intrinsic value of options exercised during the years ended December 31, 2019, 2018, and 2017 was \$3.6 million, \$5.2 million, and \$29.0 million, respectively.

Stock Appreciation Rights—

In conjunction with the EHHI acquisition, we granted SARs based on Encompass Health Home Health Holdings, Inc. (“Holdings”) common stock to certain members of EHHI management at closing on December 31, 2014. Under a separate plan, we granted 122,976 SARs that vest based on continued employment and an additional maximum number of 129,124 SARs that vest based on continued employment and the extent of the attainment of a specified 2017 performance measure. The maximum number of performance SARs was achieved. Half of the SARs of each type vested on December 31, 2018 with the remainder vested on December 31, 2019. The vested SARs will expire on the tenth anniversary of the grant date or within a specified period following any earlier termination of employment. Upon exercise, each SAR must be settled for cash in the amount by which the per share fair value of Holdings’ common stock on the exercise date exceeds the per share fair value on the grant date. The fair value of Holdings’ common stock is determined using the product of the trailing 12-month specified

Notes to Consolidated Financial Statements

performance measure for Holdings and a specified median market price multiple based on a basket of public home health companies and publicly disclosed home health acquisitions with a value of \$400 million or more.

The fair value of the SARs granted in conjunction with the EHHI acquisition has been estimated using the Black-Scholes option-pricing model with the following weighted-average assumptions:

| | As of December 31, | |
|-------------------------|--------------------|-------|
| | 2019 | 2018 |
| Expected volatility | 38.6% | 27.1% |
| Risk-free interest rate | 1.5% | 2.6% |
| Expected life (years) | 0.3 | 1.3 |
| Dividend yield | —% | —% |

We did not include a dividend payment as part of our pricing model because Holdings currently does not pay dividends on its common stock. Under the Black-Scholes option-pricing model, the weighted-average fair value per share of SARs granted in conjunction with the EHHI acquisition was \$870.28 and \$419.28 as of December 31, 2019 and 2018, respectively. In February 2019, members of the management team exercised a portion of their vested SARs for approximately \$13 million in cash. In July 2019, members of the management team exercised the remainder of the vested SARs for approximately \$55 million in cash. As of December 31, 2019, the fair value of the remaining 115,545 SARs is approximately \$101 million, all of which is included in *Other current liabilities*. In January 2020, members of the management team exercised the remaining SARs, and in February 2020, we settled those awards upon payment of approximately \$101 million in cash.

We recognized approximately \$81.9 million, \$56.2 million, and \$26.0 million of compensation expense related to our SARs for the years ended December 31, 2019, 2018 and 2017, respectively. As of December 31, 2019, there was no unrecognized compensation cost related to unvested SARs.

Restricted Stock—

The RSAs granted in 2019, 2018, and 2017 included service-based awards and performance-based awards (that also included a service requirement). These awards generally vest over a three-year requisite service period. For RSAs with a service and/or performance requirement, the fair value of the RSA is determined by the closing price of our common stock on the grant date.

A summary of our issued restricted stock awards is as follows (share information in thousands):

| | Shares | Weighted-Average Grant Date Fair Value |
|---------------------------------------|--------|--|
| Nonvested shares at December 31, 2018 | 907 | \$ 37.61 |
| Granted | 660 | 49.84 |
| Vested | (718) | 34.84 |
| Forfeited | (31) | 48.65 |
| Nonvested shares at December 31, 2019 | 818 | 49.49 |

The weighted-average grant-date fair value of restricted stock granted during the years ended December 31, 2018 and 2017 was \$37.61 and \$42.85 per share, respectively. We recognized approximately \$29.5 million, \$27.1 million, and \$19.6 million of compensation expense related to our restricted stock awards for the years ended December 31, 2019, 2018, and 2017, respectively. As of December 31, 2019, there was \$32.3 million of unrecognized compensation expense related to unvested restricted stock. This cost is expected to be recognized over a weighted-average period of 21 months. The remaining unrecognized compensation expense for the performance-based awards may vary each reporting period based on changes in the expected achievement of performance measures. The total fair value of shares vested during the years ended December 31,

Notes to Consolidated Financial Statements

2019, 2018, and 2017 was \$45.2 million, \$22.1 million, and \$17.7 million, respectively. We accrue dividends on outstanding RSAs, which are paid upon vesting.

Nonemployee Stock-Based Compensation Plans—

During the years ended December 31, 2019, 2018, and 2017, we provided incentives to our nonemployee members of our board of directors through the issuance of RSUs out of our share-based incentive plans. RSUs are fully vested when awarded and receive dividend equivalents in the form of additional RSUs upon the payment of a cash dividend on our common stock. During the years ended December 31, 2019, 2018, and 2017, we issued 23,270, 24,771, and 27,594 RSUs, respectively, with a fair value of \$64.48, \$62.88, and \$47.30, respectively, per unit. We recognized approximately \$1.5 million, \$1.6 million, and \$1.3 million, respectively, of compensation expense upon their issuance in 2019, 2018, and 2017. There was no unrecognized compensation related to unvested shares as of December 31, 2019. During the years ended 2019, 2018, and 2017, we issued an additional 8,876, 8,045, and 9,968, respectively, of RSUs as dividend equivalents. As of December 31, 2019, 536,658 RSUs were outstanding.

15. Employee Benefit Plans:

Substantially all Encompass Health employees are eligible to enroll in Encompass Health-sponsored healthcare plans, including coverage for medical and dental benefits. Our primary healthcare plans are national plans administered by third-party administrators. We are self-insured for these plans. During 2019, 2018, and 2017, costs associated with these plans, net of amounts paid by employees and stop-loss recoveries, approximated \$178.4 million, \$164.7 million, and \$145.0 million, respectively.

Encompass Health offers two qualified 401(k) savings plans, the Encompass Health Retirement Investment Plan (the “RIP”) and the Encompass Home Health Savings Plan (the “HHSP”). The RIP allows eligible employees to contribute up to 100% of their pay on a pre-tax basis into their individual retirement account in the plan subject to the normal maximum limits set annually by the Internal Revenue Service. Inpatient rehabilitation employees who are at least 21 years of age are eligible to participate in the RIP and all contributions to the plan are in the form of cash. Encompass Health’s employer matching contribution under the RIP is 50% of the first 6% of each participant’s elective deferrals, which vest 100% after three years of service. Participants are always fully vested in their own contributions.

The HHSP allows eligible employees to contribute up to 60% of their pay on a pre-tax basis into their individual retirement account in the plan subject to the normal maximum limits set annually by the Internal Revenue Service. All home health and hospice full-time and part-time employees are eligible to participate in the HHSP and all contributions to the plan are in the form of cash. Encompass Health’s employer matching contribution under the HHSP is 25% of the first 3% of each participant’s elective deferrals, which vest gradually over a six-year service period. Participants are always fully vested in their own contributions.

Employer contributions to the RIP and HHSP approximated \$23.4 million, \$21.5 million, and \$19.3 million in 2019, 2018, and 2017, respectively. In 2019, 2018, and 2017, approximately \$1.4 million, \$2.5 million, and \$1.5 million, respectively, from forfeited accounts were used to fund the matching contributions in accordance with the terms of the RIP and HHSP.

Senior Management Bonus Program—

We maintain a Senior Management Bonus Program to reward senior management for performance based on a combination of corporate or regional goals and individual goals. The corporate and regional goals are approved on an annual basis by our board of directors as part of our routine budgeting and financial planning process. The individual goals, which are weighted according to importance, are determined between each participant and his or her immediate supervisor. The program applies to persons who join the Company in, or are promoted to, senior management positions. In 2020, we expect to pay approximately \$18.6 million under the program for the year ended December 31, 2019. In March 2019 and March 2018, we paid \$19.7 million and \$14.7 million, respectively, under the program for the years ended December 31, 2018 and 2017.

Notes to Consolidated Financial Statements
16. Income Taxes:

The significant components of the *Provision for income tax expense* related to continuing operations are as follows (in millions):

| | For the Year Ended December 31, | | |
|---|--|-----------------|-----------------|
| | 2019 | 2018 | 2017 |
| Current: | | | |
| Federal | \$ 58.1 | \$ 103.8 | \$ 72.2 |
| State and other | 17.8 | 24.2 | 12.8 |
| Total current expense | <u>75.9</u> | <u>128.0</u> | <u>85.0</u> |
| Deferred: | | | |
| Federal | 32.0 | (13.7) | 58.4 |
| State and other | 8.0 | 4.6 | 2.4 |
| Total deferred expense (benefit) | <u>40.0</u> | <u>(9.1)</u> | <u>60.8</u> |
| Total income tax expense related to continuing operations | <u>\$ 115.9</u> | <u>\$ 118.9</u> | <u>\$ 145.8</u> |

A reconciliation of differences between the federal income tax at statutory rates and our actual income tax expense on our income from continuing operations, which include federal, state, and other income taxes, is presented below:

| | For the Year Ended December 31, | | |
|--|--|---------------|---------------|
| | 2019 | 2018 | 2017 |
| Tax expense at statutory rate | 21.0 % | 21.0 % | 35.0 % |
| Increase (decrease) in tax rate resulting from: | | | |
| State and other income taxes, net of federal tax benefit | 4.3 % | 4.5 % | 3.5 % |
| Increase (decrease) in valuation allowance | 0.8 % | (0.4)% | 0.4 % |
| Government, class action, and related settlements | (1.2)% | 2.7 % | — % |
| Noncontrolling interests | (3.0)% | (3.2)% | (4.6)% |
| Share-based windfall tax benefits | (1.0)% | (0.4)% | (1.8)% |
| Tax Act | — % | — % | (2.8)% |
| Other, net | (0.3)% | (0.1)% | (0.3)% |
| Income tax expense | <u>20.6 %</u> | <u>24.1 %</u> | <u>29.4 %</u> |

The *Provision for income tax expense* in 2019 was less than the federal statutory rate primarily due to: (1) the impact of noncontrolling interests, (2) government, class action, and related settlements, and (3) share-based windfall tax benefits offset by (4) state and other income tax expense. See Note 1, *Summary of Significant Accounting Policies*, “Income Taxes,” for a discussion of the allocation of income or loss related to pass-through entities, which is referred to as the impact of noncontrolling interests in this discussion. The *Provision for income tax expense* in 2018 was greater than the federal statutory rate primarily due to: (1) state and other income tax expense and (2) government, class action, and related settlements offset by (3) the impact of noncontrolling interests. The *Provision for income tax expense* in 2017 was less than the federal statutory rate primarily due to: (1) the impact of noncontrolling interests, (2) the impact of the 2017 Tax Cuts and Jobs Act (the “Tax Act”) and (3) share-based windfall tax benefits offset by (4) state and other income tax expense.

On December 22, 2017, the US enacted the Tax Act. The Tax Act, which is commonly referred to as “US tax reform,” significantly changes US corporate income tax laws by, among other things, reducing the US corporate income tax rate from 35% to 21% starting in 2018. As a result, we recorded a net benefit of \$13.6 million during the fourth quarter of 2017. This amount, which is included in *Provision for income tax expense* in the consolidated statement of operations,

Notes to Consolidated Financial Statements

consists of three components: (i) a \$5.8 million credit resulting from the remeasurement of our net federal deferred tax assets based on the new lower corporate income tax rate, (ii) a \$13.8 million credit resulting from the remeasurement of our net state deferred tax assets as a result of the decreased federal benefit implicit in the new lower corporate income tax rate, and (iii) a \$5.8 million charge resulting from the remeasurement of our net valuation allowances for state NOLs as a result of the decreased federal benefit implicit in the new lower corporate income tax rate. In addition, we adopted the Tax Act's provisions allowing for 100% bonus depreciation on qualifying assets placed in service after September 27, 2017, which resulted in additional bonus depreciation deductions of \$8.8 million in the fourth quarter of 2017.

Deferred income taxes recognize the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and amounts used for income tax purposes and the impact of available NOLs. The significant components of our deferred tax assets and liabilities are presented in the following table (in millions):

| | As of December 31, | |
|---------------------------------------|---------------------------|----------------|
| | 2019 | 2018 |
| Deferred income tax assets: | | |
| Net operating loss | \$ 61.8 | \$ 66.0 |
| Property, net | 33.9 | 30.8 |
| Insurance reserve | 17.0 | 16.8 |
| Stock-based compensation | 38.3 | 33.0 |
| Revenue reserves | — | 6.1 |
| Operating lease liabilities | 30.6 | — |
| Other accruals | 23.4 | 22.5 |
| Tax credits | 6.8 | 4.7 |
| Other | 0.2 | 0.6 |
| Total deferred income tax assets | <u>212.0</u> | <u>180.5</u> |
| Less: Valuation allowance | (38.4) | (33.7) |
| Net deferred income tax assets | <u>173.6</u> | <u>146.8</u> |
| Deferred income tax liabilities: | | |
| Revenue reserves | (11.6) | — |
| Intangibles | (94.6) | (88.5) |
| Operating lease right-of-use assets | (30.3) | — |
| Carrying value of partnerships | (34.0) | (15.2) |
| Other | (0.2) | (0.2) |
| Total deferred income tax liabilities | <u>(170.7)</u> | <u>(103.9)</u> |
| Net deferred income tax assets | <u>\$ 2.9</u> | <u>\$ 42.9</u> |

We have state NOLs of \$61.8 million that expire in various amounts at varying times through 2031. For the years ended December 31, 2019, 2018, and 2017, the net increase (decrease) in our valuation allowance was \$4.7 million, \$(2.1) million, and \$7.9 million, respectively. The increase in our valuation allowance in 2019 related primarily to our expected inability to realize related net operating losses prior to their expiration. The decrease in our valuation allowance in 2018 related primarily to expirations of state net operating losses.

As of December 31, 2019, we have a remaining valuation allowance of \$38.4 million. This valuation allowance remains recorded due to uncertainties regarding our ability to utilize a portion of our state NOLs and other credits before they expire. The amount of the valuation allowance has been determined for each tax jurisdiction based on the weight of all available evidence including management's estimates of taxable income for each jurisdiction in which we operate over the periods in which the related deferred tax assets will be recoverable. It is possible we may be required to increase or decrease our valuation allowance at some future time if our forecast of future earnings varies from actual results on a consolidated basis or in the

Notes to Consolidated Financial Statements

applicable state tax jurisdictions, if the timing of future tax deductions differs from our expectations, or pursuant to changes in state tax laws and rates.

During the third quarter of 2016, we filed a non-automatic tax accounting method change related to billings denied under pre-payment claims reviews conducted by certain of our MACs. In March 2017, the IRS approved our request resulting in establishment of a deferred tax liability and additional cash tax benefits of approximately \$51.3 million through December 31, 2017. This amount was reduced to \$33.7 million after considering the federal tax rate reduction to 21% provided for in the Tax Act. The Tax Act included revisions to Internal Revenue Code §451 that might have eliminated a portion of this deferral of revenue for tax purposes. Accordingly, we reversed \$23.6 million of our revenue reserves and carrying value of partnerships deferred tax liabilities and recorded a current tax payable for the same amount in the first quarter of 2018. In September 2019, a Treasury Regulation was issued that supported the accounting method change we received calling for continued deferral of denied prepayment claims. As a result, we have recorded additional deferred tax liabilities of \$22.2 million and a corresponding benefit to our income tax receivable to fully defer taxable income related to pre-payment claim denials as of December 31, 2019. These changes did not have a material impact on our effective tax rate in any period of adjustment and all benefits are expected to reverse as pre-payment claims denials are settled or collected.

As of January 1, 2017, total remaining gross unrecognized tax benefits were \$2.8 million, all of which would have affected our effective tax rate if recognized. The amount of unrecognized tax benefits decreased \$2.5 million during 2017, primarily related to the favorable settlement of a federal interest claim. Total remaining gross unrecognized tax benefits were \$0.3 million as of December 31, 2017, all of which would have affected our effective tax rate if recognized. The amount of unrecognized tax benefits did not change significantly during 2018 or 2019. Total remaining gross unrecognized tax benefits were \$0.9 million and \$0.4 million as of December 31, 2018 and 2019, respectively, all of which would have affected our effective tax rate if recognized.

A reconciliation of the beginning and ending liability for unrecognized tax benefits is as follows (in millions):

| | Gross Unrecognized Income Tax Benefits | Accrued Interest and Penalties |
|---|---|---|
| January 1, 2017 | \$ 2.8 | \$ — |
| Gross amount of decreases in unrecognized tax benefits related to prior periods | (0.4) | — |
| Decreases in unrecognized tax benefits relating to settlements with taxing authorities | (2.1) | — |
| December 31, 2017 | 0.3 | — |
| Gross amount of increases in unrecognized tax benefits related to prior periods | 0.8 | 0.1 |
| Reductions to unrecognized tax benefits as a result of a lapse of the applicable statute of limitations | (0.2) | — |
| December 31, 2018 | 0.9 | 0.1 |
| Reductions to unrecognized tax benefits as a result of a lapse of the applicable statute of limitations | (0.5) | — |
| December 31, 2019 | \$ 0.4 | \$ 0.1 |

Our continuing practice is to recognize interest and penalties related to income tax matters in income tax expense. Interest recorded as part of our income tax provision during 2019, 2018, and 2017 was not material. Accrued interest income related to income taxes as of December 31, 2019 and 2018 was not material.

In December 2016, we signed an agreement with the IRS to participate in their Compliance Assurance Process (“CAP”) for the 2017 tax year. CAP is a program in which we and the IRS endeavor to agree on the treatment of significant tax positions prior to the filing of our federal income tax returns. We renewed this agreement in January 2018 for the 2018 tax year, in December 2018 for the 2019 tax year, and in February 2020 for the 2020 tax year. As a result of these agreements, the IRS is currently examining the 2018, 2019, and 2020 tax years. In July 2019, the IRS issued a no-change Letter effectively closing our 2017 tax year audit. The statute of limitations has expired or we have settled federal income tax examinations with the IRS for

Notes to Consolidated Financial Statements

all tax years through 2017. Our state income tax returns are also periodically examined by various regulatory taxing authorities. We are not currently under audit by any states.

For the tax years that remain open under the applicable statutes of limitations, amounts related to unrecognized tax benefits have been considered by management in its estimate of our potential net recovery of prior years' income taxes. Based on discussions with taxing authorities, we anticipate \$0.3 million of our unrecognized tax benefits will be released within the next 12 months.

Notes to Consolidated Financial Statements
17. Earnings per Common Share:

The following table sets forth the computation of basic and diluted earnings per common share (in millions, except per share amounts):

| | For the Year Ended December 31, | | |
|--|--|-----------------|-----------------|
| | 2019 | 2018 | 2017 |
| Basic: | | | |
| <i>Numerator:</i> | | | |
| Income from continuing operations | \$ 446.4 | \$ 374.3 | \$ 350.6 |
| Less: Net income attributable to noncontrolling interests included in continuing operations | (87.1) | (83.1) | (79.1) |
| Less: Income allocated to participating securities | (1.3) | (0.9) | (0.9) |
| Income from continuing operations attributable to Encompass Health common shareholders | 358.0 | 290.3 | 270.6 |
| (Loss) income from discontinued operations, net of tax, attributable to Encompass Health common shareholders | (0.6) | 1.1 | (0.4) |
| Net income attributable to Encompass Health common shareholders | <u>\$ 357.4</u> | <u>\$ 291.4</u> | <u>\$ 270.2</u> |
| <i>Denominator:</i> | | | |
| Basic weighted average common shares outstanding | <u>98.0</u> | <u>97.9</u> | <u>93.7</u> |
| <i>Basic earnings per share attributable to Encompass Health common shareholders:</i> | | | |
| Continuing operations | \$ 3.66 | \$ 2.97 | \$ 2.88 |
| Discontinued operations | (0.01) | 0.01 | — |
| Net income | <u>\$ 3.65</u> | <u>\$ 2.98</u> | <u>\$ 2.88</u> |
| Diluted: | | | |
| <i>Numerator:</i> | | | |
| Income from continuing operations | \$ 446.4 | \$ 374.3 | \$ 350.6 |
| Less: Net income attributable to noncontrolling interests included in continuing operations | (87.1) | (83.1) | (79.1) |
| Add: Interest on convertible debt, net of tax | — | — | 4.6 |
| Add: Loss on extinguishment of convertible debt, net of tax | — | — | 6.2 |
| Income from continuing operations attributable to Encompass Health common shareholders | 359.3 | 291.2 | 282.3 |
| (Loss) income from discontinued operations, net of tax, attributable to Encompass Health common shareholders | (0.6) | 1.1 | (0.4) |
| Net income attributable to Encompass Health common shareholders | <u>\$ 358.7</u> | <u>\$ 292.3</u> | <u>\$ 281.9</u> |
| <i>Denominator:</i> | | | |
| Diluted weighted average common shares outstanding | <u>99.4</u> | <u>99.8</u> | <u>99.3</u> |
| <i>Diluted earnings per share attributable to Encompass Health common shareholders:</i> | | | |
| Continuing operations | \$ 3.62 | \$ 2.92 | \$ 2.84 |
| Discontinued operations | (0.01) | 0.01 | — |
| Net income | <u>\$ 3.61</u> | <u>\$ 2.93</u> | <u>\$ 2.84</u> |

Notes to Consolidated Financial Statements

The following table sets forth the reconciliation between basic weighted average common shares outstanding and diluted weighted average common shares outstanding (in millions):

| | For the Year Ended December 31, | | |
|---|---------------------------------|------|------|
| | 2019 | 2018 | 2017 |
| Basic weighted average common shares outstanding | 98.0 | 97.9 | 93.7 |
| Convertible senior subordinated notes | — | — | 4.0 |
| Restricted stock awards, dilutive stock options, and restricted stock units | 1.4 | 1.9 | 1.6 |
| Diluted weighted average common shares outstanding | 99.4 | 99.8 | 99.3 |

Options to purchase approximately 0.1 million and 0.2 million shares of common stock were outstanding as of December 31, 2019 and 2017, respectively, but were not included in the computation of diluted weighted-average shares because to do so would have been antidilutive. There were no antidilutive options to purchase shares of common stock outstanding as of December 31, 2018.

In February 2014, our board of directors approved an increase in our common stock repurchase authorization from \$200 million to \$250 million. The repurchase authorization does not require the repurchase of a specific number of shares, has an indefinite term, and is subject to termination at any time by our board of directors. On July 24, 2018, the Company's board approved resetting the aggregate common stock repurchase authorization to \$250 million. During 2019 and 2017, we repurchased 0.8 million and 0.9 million shares of our common stock in the open market for \$45.9 million and \$38.1 million, respectively. There were no repurchases of our common stock during 2018.

In July 2016, our board of directors approved an increase in the quarterly cash dividend on our common stock and declared a dividend of \$0.24 per share. The cash dividend of \$0.24 per common share was declared and paid each quarter through July 2017. In July 2017, our board of directors approved an increase in our quarterly dividend and declared a cash dividend of \$0.25 per share. The cash dividend of \$0.25 per common share was declared and paid in each quarter through July 2018. In July 2018, our board of directors approved an increase in our quarterly dividend and declared a cash dividend of \$0.27 per share. The cash dividend of \$0.27 per common share was declared and paid in each quarter through July 2019. In July 2019, our board of directors approved an increase in our quarterly dividend and declared a cash dividend of \$0.28 per share. The cash dividend of \$0.28 per share was declared in July 2019 and October 2019 and paid in October 2019 and January 2020, respectively. As of December 31, 2019 and 2018, accrued common stock dividends of \$29.0 million and \$28.4 million were included in *Other current liabilities* in our consolidated balance sheet. Future dividend payments are subject to declaration by our board of directors.

On September 30, 2009, we issued 5.0 million shares of common stock and 8.2 million common stock warrants in full satisfaction of our obligation to do so under the January 2007 comprehensive settlement of the consolidated securities action brought against us by our stockholders and bondholders. Prior to their expiration on January 17, 2017, the warrants were exercisable at a price of \$41.40 per share by means of a cash or a cashless exercise at the option of the holder. The warrants were not assumed exercised for dilutive shares outstanding because they were antidilutive in 2016.

Notes to Consolidated Financial Statements

The following table summarizes information relating to these warrants and their activity through their expiration date (number of warrants in millions):

| | Number of Warrants | Weighted Average Exercise Price |
|--|-----------------------|------------------------------------|
| Common stock warrants outstanding as of December 31, 2016 | 8.2 | \$ 41.40 |
| Cashless exercise | (6.5) | 41.40 |
| Cash exercise | (0.6) | 41.40 |
| Expired | (1.1) | 41.40 |
| Common stock warrants outstanding as of January 17, 2017 | <u>—</u> | |

The above exercises resulted in the issuance of 0.7 million shares of common stock in January 2017. Cash exercises resulted in gross proceeds of \$26.7 million in January 2017.

See also Note 10, *Long-term Debt*.

18. Contingencies and Other Commitments:

We operate in a highly regulated industry in which healthcare providers are routinely subject to litigation. As a result, various lawsuits, claims, and legal and regulatory proceedings have been and can be expected to be instituted or asserted against us. The resolution of any such lawsuits, claims, or legal and regulatory proceedings could materially and adversely affect our financial position, results of operations, and cash flows in a given period.

Nichols Litigation—

We were named as a defendant in a lawsuit filed March 28, 2003 by several individual stockholders in the Circuit Court of Jefferson County, Alabama, captioned *Nichols v. HealthSouth Corp.* In July 2019, we entered into settlement agreements with all but one plaintiff and paid those settling plaintiffs an aggregate amount of cash less than \$0.1 million. The remaining plaintiff alleges that we, some of our former officers, and our former investment bank engaged in a scheme to overstate and misrepresent our earnings and financial position. The plaintiff is seeking compensatory and punitive damages.

This case was stayed in the circuit court on August 8, 2005. However, the complaint has been amended from time to time, including to request certification as a class action. Additionally, one of the former officers named as a defendant has repeatedly attempted to remove the case to federal district court. We filed our latest motion to remand the case back to state court on January 10, 2013. On September 27, 2013, the federal court remanded the case back to state court. On December 10, 2014, we filed a motion to dismiss on the grounds the plaintiffs lacked standing because their claims were derivative in nature, and the claims were time-barred by the statute of limitations. On May 26, 2016, the trial court granted our motion to dismiss. On appeal, the Supreme Court of Alabama reversed the trial court's dismissal on March 23, 2018. On April 6, 2018, we filed an application for rehearing with the Alabama Supreme Court. On March 22, 2019, the Alabama Supreme Court denied our application for rehearing and remanded the case to the trial court for further proceedings. The court has scheduled the trial to begin August 10, 2020.

We intend to vigorously defend ourselves in this case against the sole remaining plaintiff. Based on the stage of litigation, review of the current facts and circumstances as we understand them, the nature of the underlying claim, the results of the proceedings to date, and the nature and scope of the defense we continue to mount, we do not believe an adverse judgment or settlement is probable in this matter, and it is also not possible to estimate an amount of loss, if any, or range of possible loss that might result from an adverse judgment or settlement of this case.

Other Litigation—

One of our hospital subsidiaries was named as a defendant in a lawsuit filed August 12, 2013 by an individual in the Circuit Court of Etowah County, Alabama, captioned *Honts v. HealthSouth Rehabilitation Hospital of Gadsden, LLC*. The plaintiff alleged that her mother, who died more than three months after being discharged from our hospital, received an unprescribed opiate medication at the hospital. We deny the patient received any such medication, accounted for all the opiates

Notes to Consolidated Financial Statements

at the hospital and argued the plaintiff established no causal liability between the actions of our staff and her mother's death. The plaintiff sought recovery for punitive damages. On May 18, 2016, the jury in this case returned a verdict in favor of the plaintiff for \$20.0 million. On June 17, 2016, we filed a renewed motion for judgment as a matter of law or, in the alternative, a motion for new trial or, in the further alternative, a motion seeking reduction of the damages awarded (collectively, the "post-judgment motions"). The trial court denied the post-judgment motions. We appealed the verdict as well as the rulings on the post-judgment motions to the Supreme Court of Alabama on October 12, 2016. On September 28, 2018, the Alabama Supreme Court reversed the trial court's judgment and remanded the case for a new trial.

As a result of the Alabama Supreme Court's reversal, we reduced the associated liability below our insurance retention level of \$6.0 million, and no longer maintained an insurance receivable in our consolidated balance sheet because we believed the liability did not exceed that retention level. As of December 31, 2018, we maintained a liability included in *Other current liabilities* in our consolidated balance sheet in connection with this matter. On February 27, 2019, we entered into a settlement with the plaintiff for an amount less than the remaining liability reserved and not material to us.

Governmental Inquiries and Investigations—

On March 4, 2013, we received document subpoenas from an office of the HHS-OIG addressed to four of our hospitals. On April 24, 2014, we received document subpoenas relating to an additional seven of our hospitals. The associated investigation led by the United States Department of Justice ("DOJ") was based on relator claims of alleged improper or fraudulent claims submitted to Medicare and Medicaid and requested documents and materials relating to practices, procedures, protocols and policies, of certain pre- and post-admissions activities at these hospitals including, among other things, marketing functions, pre-admission screening, post-admission physician evaluations, patient assessment instruments, individualized patient plans of care, and compliance with the Medicare 60% rule. Under the Medicare rule commonly referred to as the "60% rule," an inpatient rehabilitation hospital must treat 60% or more of its patients from at least one of a specified list of medical conditions in order to be reimbursed at the inpatient rehabilitation hospital payment rates, rather than at the lower acute care hospital payment rates.

The investigation focused on a specific set diagnoses made by independent physicians at our hospitals. We relied on the medical judgment of these independent physicians to code the diagnoses. DOJ claimed, among other things, that under CMS regulations we improperly used the codes. However, CMS periodically reviewed industry usage of the codes and confirmed our reliance was appropriate. In addition, throughout the period of the investigation, CMS continued to pay our claims under those codes. The seven-year investigation produced no evidence of falsity or fraudulent conduct. Eventually, the court refused to give DOJ more time to decide whether to intervene and unsealed the related *qui tam* cases. DOJ chose not to intervene to prosecute the matter.

Based on discussions with the government during the fourth quarter of 2018 as well as the burdens and distractions associated with continuing the investigation and the likely costs of future litigation, we estimated a settlement value of \$48 million and accrued a loss contingency in that amount which was included in *Other current liabilities* in our consolidated balance sheet for the year ended December 31, 2018. Following further discussions, we settled the DOJ investigation, together with related *qui tam* or "whistleblower" lawsuits, in 2019 for a payment of \$48 million, and we expressly denied any wrongdoing. In return for the settlement payment, the plaintiffs dismissed with prejudice their pending *qui tam* claims, and the DOJ provided Encompass Health and all its subsidiaries with a release from civil liability.

Other Matters—

The False Claims Act allows private citizens, called "relators," to institute civil proceedings on behalf of the United States alleging violations of the False Claims Act. These lawsuits, also known as "whistleblower" or "*qui tam*" actions, can involve significant monetary damages, fines, attorneys' fees and the award of bounties to the relators who successfully prosecute or bring these suits to the government. *Qui tam* cases are sealed at the time of filing, which means knowledge of the information contained in the complaint typically is limited to the relator, the federal government, and the presiding court. The defendant in a *qui tam* action may remain unaware of the existence of a sealed complaint for years. While the complaint is under seal, the government reviews the merits of the case and may conduct a broad investigation and seek discovery from the defendant and other parties before deciding whether to intervene in the case and take the lead on litigating the claims. The court lifts the seal when the government makes its decision on whether to intervene. If the government decides not to intervene, the relator may elect to continue to pursue the lawsuit individually on behalf of the government. It is possible that *qui tam* lawsuits

Notes to Consolidated Financial Statements

have been filed against us, which suits remain under seal, or that we are unaware of such filings or precluded by existing law or court order from discussing or disclosing the filing of such suits. We may be subject to liability under one or more undisclosed *qui tam* cases brought pursuant to the False Claims Act.

It is our obligation as a participant in Medicare and other federal healthcare programs to routinely conduct audits and reviews of the accuracy of our billing systems and other regulatory compliance matters. As a result of these reviews, we have made, and will continue to make, disclosures to the HHS-OIG and CMS relating to amounts we suspect represent overpayments from these programs, whether due to inaccurate billing or otherwise. Some of these disclosures have resulted in, or may result in, Encompass Health refunding amounts to Medicare or other federal healthcare programs.

Other Commitments—

We are a party to service and other contracts in connection with conducting our business. Minimum amounts due under these agreements are \$61.4 million in 2020, \$41.7 million in 2021, \$15.1 million in 2022, \$10.8 million in 2023, \$6.9 million in 2024, and \$7.1 million thereafter. These contracts primarily relate to software licensing and support.

19. Segment Reporting:

Our internal financial reporting and management structure is focused on the major types of services provided by Encompass Health. We manage our operations using two operating segments which are also our reportable segments: (1) inpatient rehabilitation and (2) home health and hospice. These reportable operating segments are consistent with information used by our chief executive officer, who is our chief operating decision maker, to assess performance and allocate resources. The following is a brief description of our reportable segments:

- *Inpatient Rehabilitation* - Our national network of inpatient rehabilitation hospitals stretches across 33 states and Puerto Rico, with a concentration of hospitals in the eastern half of the United States and Texas. As of December 31, 2019, we operate 133 inpatient rehabilitation hospitals. We are the sole owner of 86 of these hospitals. We retain 50.0% to 97.5% ownership in the remaining 47 jointly owned hospitals. In addition, we manage four inpatient rehabilitation units through management contracts. We provide specialized rehabilitative treatment on both an inpatient and outpatient basis. Our inpatient rehabilitation hospitals provide a higher level of rehabilitative care to patients who are recovering from conditions such as stroke and other neurological disorders, cardiac and pulmonary conditions, brain and spinal cord injuries, complex orthopedic conditions, and amputations.
- *Home Health and Hospice* - As of December 31, 2019, we provide home health services in 245 locations and hospice services in 83 locations across 31 states with concentrations in the Southeast and Texas. In addition, two of these home health agencies operate as joint ventures which we account for using the equity method of accounting. We are the sole owner of 320 of these locations. We retain 50.0% to 81.0% ownership in the remaining eight jointly owned locations. Our home health services include a comprehensive range of Medicare-certified home nursing services to adult patients in need of care. These services include, among others, skilled nursing, physical, occupational, and speech therapy, medical social work, and home health aide services. Our hospice services include in-home services to terminally ill patients and their families to address patients' physical needs, including pain control and symptom management, and to provide emotional and spiritual support.

The accounting policies of our reportable segments are the same as those described in Note 1, *Summary of Significant Accounting Policies*. All revenues for our services are generated through external customers. See Note 1, *Summary of Significant Accounting Policies*, "Net Operating Revenues," for the disaggregation of our revenues. No corporate overhead is allocated to either of our reportable segments. Our chief operating decision maker evaluates the performance of our segments and allocates resources to them based on adjusted earnings before interest, taxes, depreciation, and amortization ("Segment Adjusted EBITDA").

Notes to Consolidated Financial Statements

Selected financial information for our reportable segments is as follows (in millions):

| | Inpatient Rehabilitation | | | Home Health and Hospice | | |
|---|--|-----------------|-----------------|--|-----------------|-----------------|
| | For the Year Ended December 31, | | | For the Year Ended December 31, | | |

Notes to Consolidated Financial Statements

21. Condensed Consolidating Financial Information:

The accompanying condensed consolidating financial information has been prepared and presented pursuant to SEC Regulation S-X, Rule 3-10, "Financial Statements of Guarantors and Issuers of Guaranteed Securities Registered or Being Registered." Each of the subsidiary guarantors is 100% owned by Encompass Health, and all guarantees are full and unconditional and joint and several, subject to certain customary conditions for release. Encompass Health's investments in its consolidated subsidiaries, as well as guarantor subsidiaries' investments in nonguarantor subsidiaries and nonguarantor subsidiaries' investments in guarantor subsidiaries, are presented under the equity method of accounting with the related investment presented within the line items *Intercompany receivable* and *Intercompany payable* in the accompanying condensed consolidating balance sheets.

The terms of our credit agreement allow us to declare and pay cash dividends on our common stock so long as: (1) we are not in default under our credit agreement and (2) our senior secured leverage ratio (as defined in our credit agreement) remains less than or equal to 2x. The terms of our senior note indenture allow us to declare and pay cash dividends on our common stock so long as (1) we are not in default, (2) the consolidated coverage ratio (as defined in the indenture) exceeds 2x or we are otherwise allowed under the indenture to incur debt, and (3) we have capacity under the indenture's restricted payments covenant to declare and pay dividends. See Note 10, *Long-term Debt*.

Periodically, certain wholly owned subsidiaries of Encompass Health make dividends or distributions of available cash and/or intercompany receivable balances to their parents. In addition, Encompass Health makes contributions to certain wholly owned subsidiaries. When made, these dividends, distributions, and contributions impact the *Intercompany receivable*, *Intercompany payable*, and *Encompass Health shareholders' equity* line items in the accompanying condensed consolidating balance sheet but have no impact on the consolidated financial statements of Encompass Health Corporation.

The "Holdings" column in the condensed consolidating financial statements below represents Holdings and its wholly-owned subsidiaries. As discussed in Note 12, *Redeemable Noncontrolling Interests*, Holdings had 5.5% noncontrolling interest as of December 31, 2019, and accordingly, Holdings and its wholly-owned subsidiaries were not guarantors of our debt. In February 2020, we acquired for cash all but 1.2% of the remaining noncontrolling interest in Holdings following the most recent exercise of the put option by the management investors. On February 20, 2020, Encompass Health Corporation and each of the two remaining management investors agreed to exchange the remaining shares representing the noncontrolling interest for an equal value of shares of common stock of Encompass Health Corporation. We expect to settle the exchanges in March 2020.
