

Mitchell E. Daniels, Jr.  
Governor

Gregory N. Larkin, M.D., F.A.A.F.P.  
State Health Commissioner

**DATE:** July 1, 2010

**TO:** All Local Health Departments  
Attn: Chief Food Inspection Officer

**FROM:** A. Scott Gilliam, MBA, CP-FS  
Director, Food Protection Program

**SUBJECT:** Feline's Pride Recall

**SUGGESTED**

**ACTION:** Unclassified Recall; Feline's Pride Raw food with ground bone for cats and kittens, Natural Chicken Formula, Net Wt. 2.5 lbs; Recommend notification of affected stores via phone, fax or e-mail.

From the information provided by FDA, the product being recalled was distributed in the State of Indiana. The product is packaged in uncoded plastic containers and sold frozen to private consumers nationwide. Once thawed, the pet food has a shelf life of about 1 week. The firm manufactures the pet food by an as-ordered basis. This recall affects only those orders placed and shipped from June 10 through June 17, 2010. Detail information is not available at this time. In addition, if any recalled product is found, please notify this office at 317-233-7360.

**Recall -- Firm Press Release**

FDA posts press releases and other notices of recalls and market withdrawals from the firms involved as a service to consumers, the media, and other interested parties. FDA does not endorse either the product or the company.

**Feline's Pride Issues Nationwide Recall of its Natural Chicken Formula Cat Food Due to Salmonella Contamination**

**Contact:**  
Shelby Gomas,  
Tel: 1-716-580-3096

**FOR IMMEDIATE RELEASE** - July 1, 2010 - Buffalo, NY – Feline’s Pride is announcing a voluntary recall of **Feline’s Pride Raw food with ground bone for cats and kittens, Natural Chicken Formula, Net Wt. 2.5 lbs. (1.13 kg., 40 oz.) produced on 6/10/10**, because it may be contaminated with *Salmonella*. People handling raw pet food can become infected with *Salmonella*, especially if they have not thoroughly washed their hands after having contact with the raw pet food or any surfaces exposed to the product.

When consumed by humans, *Salmonella* can cause an infection, salmonellosis. The symptoms of salmonellosis include nausea, vomiting, abdominal cramps, minimal diarrhea, fever, and headache. Certain vulnerable populations, such as children, the elderly, and individuals with compromised immune systems, are particularly susceptible to acquiring salmonellosis from such pet food products and may experience more severe symptoms.

Pets with *Salmonella* infections may be lethargic and have diarrhea or bloody diarrhea, fever, and vomiting. Some pets will have only decreased appetite, fever and abdominal pain. Infected but otherwise healthy pets can be carriers and infect other animals or humans. If your pet has consumed the recalled product and has these symptoms, please contact your veterinarian.

The product is packaged in **uncoded** plastic containers and sold frozen to private consumers nationwide. Once thawed, the pet food has a shelf life of about 1 week. The firm manufactures the pet food by an as-ordered basis. This recall affects only those orders placed and shipped from **June 10 through June 17, 2010**.

The firm and FDA are investigating this matter to determine the source of this problem, and will take any additional steps necessary to protect the public health.

**To date, both the firm and the FDA have received no reports of *Salmonella* infection relating to this product.**

This product should not be fed to pets but should instead be disposed of in a safe manner (e.g., in a securely covered trash receptacle). People who are experiencing the symptoms of *Salmonella* infection after having handled the pet food product should seek medical attention, and report their use of the product and illness to the nearest FDA office.

People should thoroughly wash their hands after handling the pet food – especially those made from raw animal protein such as meat or fish -- to help prevent infection. People may risk bacterial infection not only by handling pet foods, but by contact with pets or surfaces exposed to these foods, so it is important that they thoroughly wash their hands with hot water and soap.

Since certain vulnerable populations, such as children, the elderly, and individuals with compromised immune systems, are particularly at risk from exposure they should avoid handling this product.

Consumers with questions should contact the company at (716) 580-3096, Monday –Friday from 10 am - 4 pm EDT.
