Governor

Gregory N. Larkin, M.D., F.A.A.F.P.  
State Health Commissioner

**DATE:** August 20, 2010

**TO:** All Local Health Departments  
Attn: Chief Food Inspection Officer

**FROM:** A. Scott Gilliam, MBA, CP-FS  
Director, Food Protection Program

**SUBJECT:** Hillendale Farms Recall

**SUGGESTED**

**ACTION:** Unclassified Recall; Shell eggs because they have the potential to be contaminated with *Salmonella*; Recommend notification of affected stores via phone, fax or e-mail.

From the information provided by FDA, the products being recalled were distributed in the State of Indiana. Eggs affected by this recall were distributed to grocery distribution centers, retail grocery stores and foodservice companies which service or are located in fourteen states, including the following: Arkansas, California, Iowa, Illinois, Indiana, Kansas, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Texas, and Wisconsin. Detail information is not available at this time. In addition, if any recalled product is found, please notify this office at 317-233-7360.

**FOR IMMEDIATE RELEASE** - August 20, 2010 – Hillendale Farms of Iowa is voluntarily recalling shell eggs because they have the potential to be contaminated with *Salmonella*.

*Salmonella* is an organism which can cause serious and sometimes fatal infections in young children, frail or elderly people, and others with weakened immune systems. Healthy persons infected with *Salmonella* often experience fever, diarrhea, nausea, vomiting and abdominal pain. In rare circumstances, infection with *Salmonella* can result in the organism getting into the bloodstream and producing more severe illnesses such as arterial infections, endocarditis, or arthritis.

Eggs affected by this recall were distributed to grocery distribution centers, retail grocery stores and foodservice companies which service or are located in fourteen states, including the following: Arkansas, California, Iowa, Illinois, Indiana, Kansas, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Texas, and Wisconsin.

There have been laboratory-confirmed *Salmonella enteritidis* illnesses associated with the shell eggs; the investigation is ongoing.

Eggs are distributed under the following brand names: Hillandale Farms, Sunny Farms, and Sunny Meadow in 6-egg cartons, dozen-egg cartons, 18-egg cartons, 30-egg package, and 5-dozen cases. Loose eggs are packaged under the following brand names: Wholesome Farms and West Creek in 15 and 30-dozen tray packs. The loose eggs may also be repackaged by customers.

The only eggs effected by this recall have plant numbers P1860 or P1663 and Julian dates as follows:

- P1860 – Julian dates ranging from 099 to 230
- P1663 – Julian dates ranging from 137 to 230

**Only eggs with these plant numbers are effected** - even though the brand name may be the same

Julian dates and plant codes can be found stamped on the end of the egg carton or printed on the case label. The plant number begins with the letter P and then the number. The Julian date follows the plant number, for example: P1860 230.

Consumers who believe they may have purchased these shell eggs should not eat them but should return them to the store where they were purchased for a full refund. Consumers with questions should contact Hillandale Farms at (866) 262-4208.

Hillandale Farms strives to provide our customers with safe, high-quality eggs – that is our responsibility and our commitment and why we are fully cooperating with FDA's investigation and are undertaking this voluntary recall. Additionally, as a precautionary measure, we are also diverting our existing inventory of shell eggs.
