Thumb Oilseed Producer's Cooperative of Ubly, Michigan is recalling 2623, 40 lb. bags and 360, 1500 lb. totes of soybean flour; in addition to 924, .08 ton loads of bulk soy meal because they may be contaminated with *Salmonella*, an organism which can cause serious and sometimes fatal infections in young children, frail or elderly people, and others with weakened immune systems. *Salmonella* can affect animals eating the product and there is risk to humans from handling contaminated products. Especially if they have not thoroughly washed their hands after having contact with the product or any surfaces exposed to these products. Healthy persons infected with *Salmonella* often experience fever, diarrhea, nausea, vomiting and abdominal pain. In rare circumstances, infection with *Salmonella* can result in the organism getting into the bloodstream and producing more severe or chronic illnesses.

Animals with salmonella infections may be lethargic and have diarrhea or bloody diarrhea, fever, and/or vomiting. Some animals will have only decreased appetite, fever and abdominal pain. Infected but otherwise healthy animals can be carriers and infect other animals or humans. If your animal has consumed the recalled product and has these symptoms, please contact your veterinarian.
