The products subject to recall include:

Individual packages bear the establishment number "P-33885" inside the USDA mark of inspection. The products were produced between Aug. 3, 2010 and Nov. 13, 2010 and were shipped for foodservice use nationwide and to distribution centers in New Jersey and Massachusetts.

The problem was discovered March 29, 2011 by a company representative during a label review at the establishment, and may have occurred because of a label change at the establishment. FSIS and the company have received no reports of adverse reactions due to consumption of these products. Anyone concerned about a reaction should contact a healthcare provider.
