

PERINATAL HIV TRANSMISSION

Children Born to HIV Infected Mothers who are current residents of Indiana,
Cumulative 1982 through December 31, 2018

Race	2018 Exposures	2018 Exposures now with HIV Disease	Total Exposures	Child Exposures now with HIV Disease
White	9	0	329	47
Black	26	1	648	100
Hispanic – All Races	13	0	124	12
Multiracial – Non Hispanic	1	1	13	13
Other	3	0	109	16
Total	52	2	1,223	188

Exposure = Children born to HIV+ women. Laboratory testing has not yet determined their HIV status.

HIV Disease = Children born to HIV+ women. Laboratory testing has confirmed that the child is HIV+.

NOTE: Counts include foreign-born adoptees or children diagnosed in another state who currently reside in Indiana.

Special Note: The 2 listed Pediatric cases were diagnosed in 2018 when follow-up occurred by a provider but it does not reflect the date of birth which was prior to 2018.

New Perinatal Exposure Case Report Form for Babies Born to HIV Positive Mothers

Babies born to HIV-positive mothers must be reported by law (IC 16-41-2-1) to the Indiana State Department of Health (ISDH) within 72 hours following birth. The current Pediatric Case Report form was to be completed for all Perinatal Exposures, Pediatric Seroreverters and/or Pediatric HIV/AIDS cases. A simpler form was requested by a number of providers and in response, the new Perinatal Exposure Case Report form was developed. It is important to note that this new Perinatal Exposure Case Report form does not take the place of the Pediatric Case Report entirely. However, this new form is shorter and more user-friendly when informing ISDH of perinatal exposures that will require further follow-up at a later time. This new form can be accessed at:

<http://www.in.gov/isdh/17764.htm>

For questions with regards to the use of this form or any other HIV case report forms please contact:

Office of Clinical Data and Research, 800-376-2501.
