

## PDSA Cycle

### Details

PDSA Cycle #:

Primary Driver:

Change idea: What changes can we make that will result in an improvement?

### Prediction

If we...

It will result in...

### Plan

What:

What idea are you testing in this PDSA cycle? (script to introduce depression screening)

Who:

With Whom:

Start Date :

End Date:

Where:

Task or Tools required to set up:

What tasks will you need to complete before testing the change? (e.g. draft script and review with team)

### Plan for Collection of Data

What:

What data will you collect? Include both qualitative and quantitative data

Who:

Who will collect this data?

With Whom:

Who will you collect this data from?

Start Date:

End Date:

Where:

Where will you collect the data from?

Please check the checkbox below if a parent contributed to the development, testing or adaptation of this change. Parent contribution could involve suggesting the change idea, helping to plan or execute the PDSA, studying the results or planning next steps.

Do:

Was the test carried out as planned? What did you observe that wasn't part of the plan?

Study:

What did the data tell you? (include here the data that answers the question or prediction you sought to answer with this PDSA) What surprised you?

Act:

You may select to adapt, adopt, or abandon this PDSA Cycle

\*Ramps of PDSA cycles are provided as examples to show how teams tested and adapted change ideas over time and different conditions to build their confidence that a change was effective. Additional teams looking to test these ideas should adapt the plans for each cycle to both their local contexts and what is learned in each PDSA cycle that is run.
