Acme Home Health Services was found to be in compliance with CoP 484. 65 Quality Assurance and Performance Improvement, CoP 484.102 Emergency Preparedness, and CoP 484.105 Organization and Administration of Services. The agency remained out of compliance with Cop 484.60 Care Planning, coordination of services, and quality of care</p> <p>Acme Home Health Services</p>	G0000		

	<p>continues to be precluded from providing its own home health aide training and competency evaluation program for a period of 2 years beginning February 12th, 2024, and continuing through February 11th, 2026.</p> <p>QR completed by Area 3 on 4-05-2024.</p>			
<p>G0570</p>	<p>Care planning, coordination, quality of care</p> <p>484.60</p> <p>Condition of participation: Care planning, coordination of services, and quality of care.</p> <p>Patients are accepted for treatment on the reasonable expectation that an HHA can meet the patient's medical, nursing, rehabilitative, and social needs in his or her place of residence. Each patient must receive an individualized written plan of care, including any revisions or additions. The individualized plan of care must specify the care and services necessary to meet the patient-specific needs as identified in the comprehensive assessment, including identification of the responsible discipline(s), and the measurable outcomes that the HHA anticipates will occur as a result of implementing and coordinating the plan of care. The individualized plan of care must also specify the patient and caregiver education and training. Services must be furnished in accordance with accepted standards of practice.</p> <p>Based on record review and interview the agency failed to ensure all patients received an individualized plan of care</p>	<p>G0570</p>	<p>The agency has made significant improvements toward compliance in this area and recognizes that additional improvements are still needed. In February 2024, the agency launched an extensive six-week nurse training program in which nurses and leadership began meeting at least once per week so that nurses, including Clinical Manager and Alternate Clinical Manager, could be in-serviced and re-trained on the process of both comprehensive assessments and care planning. Nurses have received extensive training both individually and in group sessions, step-by-step through each section of the comprehensive assessment process, as well as through the care planning, coordination of services and quality of care processes. This training has</p>	<p>2024-04-25</p>

the plan of care to meet all required elements (G574); failed to ensure the plan of care was reviewed and revised every 60 days (G588), failed to ensure the coordination of care delivery (G608) for 4 of 6 active clinical records reviewed. (Patients #1, 4, 5, and 6)

The cumulative effect of this systemic problem resulted in the home health agency's inability to ensure the provision of quality health care in a safe environment for 42 CoP 484.60 Care Planning, Coordination of Services, and Quality of Care.

Findings Include:

*

included, but has not been limited to, meeting the needs of therapy patients and notifying relevant physicians of such, ensuring patient-specific and measurable outcomes and goals, ensuring appropriate DME and documentation of such, appropriately documenting specific frequency and duration of visits and treatments, safety measures to protect against injury, patient specific interventions, reporting significant changes to relevant physicians and coordinating care among other agencies to ensure patient needs are met. The initial six-week training program ended, and Administrator and Executive Director performed a thorough review of newly performed assessments, plans of care and nurse documentation, which illustrated improvements had been made in these areas, but also indicated that deficiencies in this process still exist, as related to the comprehensive assessment, care planning coordination of care and quality of care processes. In addition to this training, nurses will also receive further training on

		<p>appropriate physician communication as related to sixty-day revisions to the plan of care. Weekly training sessions have been extended and will continue indefinitely until leadership is confident that nurses have retained the information and that it is being appropriately applied in the course of their daily work with patients and their associated assessments and plans of care. Nurses will be held accountable to the standard that all sections of the comprehensive assessment, care planning, coordination of services and quality of care processes are followed, and the Clinical Manager will be responsible for ensuring that the standards are being met and that agency remains in compliance. Any deficiencies found by clinical management will be addressed with the attending nurse who will be responsible for correcting said deficiencies within 24 hours and to report those corrections to clinical management for further review. Clinical management will report directly to the Administrator and Executive Director on this plan of correction. This deficient</p>	
--	--	---	--

			<p>practice had the potential to affect all patients, and therefore, all patient assessments and plans of care will be held to this standard and corrected during each patient's next scheduled re-certification visit. The Clinical Manager has the ultimate responsibility to ensure that this plan of correction is followed. To further ensure said correction, the Executive Director is auditing the most recent comprehensive assessment and plan of care for each current patient, is documenting audit findings and is reviewing the Clinical Manager, Administrator and respective attending nurses.</p> <p>After this phase of administrative audits are completed, the Administrator and Executive will continue to perform additional quality assurance checks on comprehensive assessments and plans of care. They will audit at least 10% of assessments and plans of care on a monthly basis. This plan of correction will remain ongoing in nature and compliance threshold is 100%.</p>

(xv) Information related to any advanced directives; and

(xvi) Any additional items the HHA or physician or allowed practitioner may choose to include.

Based on record review and interview, the agency failed to ensure the Plan of Care was individualized and included all the required elements for 3 of 6 active clinical records reviewed (Patients #1, 4, and 6).

Findings Include:

4. A review of the plan of care for Patient #1 for the recertification period of 03/16/2024 to 05/14/2024, electronically signed by the Clinical Manager, indicated but was not limited to diagnoses, Spastic quadriplegic cerebral palsy (a condition that affects the ability to control muscles and movement in all four limbs, the trunk, and face), Neuromuscular scoliosis (a sideways curvature of the spine), Localization-related (focal) (partial) symptomatic epilepsy (a condition caused by certain brain activity causing seizure activity). The sections titled "DME [durable medical equipment] and Supplies, Safety Measures, Nutritional Requirements, Prognosis,

services and quality of care processes. The initial six-week training program ended, and Administrator and Executive Director performed a thorough review of newly performed assessments, plans of care and nurse documentation, which illustrated improvements had been made in these areas, but also indicated that deficiencies in this process still exist, as related to the comprehensive assessment and the overall care planning process. Weekly training sessions have been extended and will continue indefinitely until leadership is confident that nurses have retained the information and that it is being appropriately applied in the course of their daily work with patients and their associated assessments and plans of care. The extended training also places an emphasis on all pertinent diagnosis; patient's mental, psychosocial and cognitive status; types of services, supplies and equipment required; frequency and duration of visits; prognosis; rehabilitation potential; functional limitations; activities permitted; all medications and treatments;

Goals/Rehabilitation and Potential/Discharge Plans" were left blank. The plan of care failed to be complete, patient-specific, failed to provide clinical directions to clinicians providing care, and failed to list any goals for Patient #1.

During an interview on 03-25-2024 at 12:44 PM with the Clinical Manager, they reported Patient 1's plan of care for the certification period beginning 03/16/2024 was not completed and was still in quality review and they had not received a verbal order or physician's signature for the certification period.

5. A review of Patient #4's clinical record evidenced a plan of care with a start of care date of 02-18-2019 and a recertification of 03/23/2024 to 05/23/2024 indicating a primary diagnosis of Multiple Sclerosis (a disease of the brain and spinal cord affecting speech and movement), and other diagnoses including Idiopathic peripheral autonomic neuropathy (a disease causing damage to the nervous system, causing pain and weakness in

safety measures to protect against injury; risk for emergency departments visits and hospital re-admissions; advanced directive information; patient and family specific education, and measurable outcomes. Regarding patients #1, #4 and #6, each of their respective plans of care have been corrected and nurses have been trained on the deficient processes within each of these respective plans of care. Regarding the re-certifying plan of care that was still in review for patient #1, this was due to a system "conflict error" which could not be corrected by the Clinical Manager and it was necessary to work with the software company to resolve this conflict. It has since been corrected. Nurses will be held accountable to the standard that all sections of the comprehensive assessment, care planning, coordination of services and quality of care processes are followed, and the Clinical Manager will be responsible for ensuring that the standards are being met and that agency remains in compliance. Any deficiencies found by clinical management will be addressed with the

the body), Hypertensive heart disease (chronic high blood pressure causing changes in the heart), Chronic diastolic heart failure (the main pumping chamber in the heart becomes stiff and fails to fill with blood properly), Hyponatremia (low sodium), Hypokalemia (low potassium), and Hyperlipidemia (high lipid levels, such as cholesterol). The plan of care failed to evidence DME, supplies, safety measures, nutritional requirements, functional limitations, mental status, prognosis, goals, and discharge plans.

attending nurse who will beresponsible for correcting said deficiencies within 24 hours and to reportthose corrections to clinical management for further review. Clinical management will report directly tothe Administrator and Executive Director on this plan of correction. This deficient practice had the potential toaffect all patients, and therefore, all patient assessments and plans of care willbe held to this standard and corrected during each patient’s next scheduledre-certification visit. The Clinical Manager has the ultimateresponsibility to ensure that this plan of correction is followed. To further ensure said correction, theExecutive Director is auditing the most recent comprehensive assessment andplan of care for each current patient, is documenting audit findings and isreviewing the Clinical Manager, Administrator and respective attending nurses. After this phase of administrative audits arecompleted, the Administrator and Executive will continue to perform additionalquality assurance checks on comprehensive

<p>During an interview on 03/26/2024 at 10:45 AM with the Clinical Manager and the Executive Director, the Clinical Manager indicated the incomplete plan of care for Patient #4 was due to it not being finalized through their quality assurance and it should have been completed during the last 5 days of the previous certification period. The Executive Director further explained if a comprehensive assessment does not go through their quality review the information does not carry over to the plan of care.</p> <p>410 IAC 17-13-1(a)(1)(D)(i, ii, iii, iv, v, vi, vii, viii, ix, x, xi, xii, xiv)</p> <p>1. Supplies and equipment required, P. Discharge or referral plans, Q. Discharge teaching, R. Frequency and duration of visits, S. Prognosis, T. Rehabilitation potential ..."

2. A review of Patient #6's clinical record evidenced a Plan of Care (POC) with a start of care date of 03-10-2024 and a recertification date from 03-10-2024 to 05-08-2024. It indicated a primary diagnosis of Chronic combined systolic and diastolic, congestive heart failure (a disease where the ventricles of the heart are unable to produce enough pressure to circulate the blood appropriately and cannot relax, expand, or fill enough blood), Hypertension (high blood pressure), Osteoarthritis (wear and tear on the joints), pain in

	<p>abnormalities of gait and mobility. The POC indicated in the goals for the patient was for the Skilled Nurse to identify and implement an appropriate activity level, home safety program, and measures to manage pain by the next certification period. The POC failed to indicate the patient's pain goal level and a home safety program. The POC failed to have patient-specific goals. The POC failed to indicate the patient's risk for rehospitalization and emergency room visits. The POC evidenced the Discharge plans were left blank.</p> <p>3. During an interview with the Executive Director, Clinical Manager, and Registered Nurse 1 on 03-26-2024 at 4:45 PM, they confirmed discharge planning was to be included in the plan of care and the goals were to be patient-specific.</p>			
<p>G0588</p>	<p>Reviewed, revised by physician every 60 days</p> <p>484.60(c)(1)</p> <p>The individualized plan of care must be reviewed and revised by the physician or allowed practitioner who is responsible for the</p>	<p>G0588</p>	<p>The agency has re-trained allnurses on the requirement to appropriately communicate the patient physician as frequently as the patient's condition or needs require, but to do so no less frequently than once every</p>	<p>2024-04-25</p>

home health plan of care and the HHA as frequently as the patient's condition or needs require, but no less frequently than once every 60 days, beginning with the start of care date.

Based on record review and interview the agency failed to evidence a recertification plan of care had been reviewed by a physician every 60 days in 1 of 6 clinical records reviewed.
(Patient #1)

Findings include:

1. A policy titled "Verification of Physician Orders" Policy No. 3-003.1 received from the Executive Director on 03/26/2024 at 9:43 AM, indicated but was not limited to, "PURPOSE To ensure that accurate physician . . . orders are obtained in accordance with applicable law and regulation. Orders will be obtained from a licensed physician (or other authorized licensed independent practitioner) for care and services provided to home health patients".

2. A review of the plan of care for Patient #1 for the recertification period of 03/16/2024 to 05/14/2024, electronically signed by the Clinical Manager, indicated but was not limited to "Respite RN 60.00 Hour Monthly for 1

60 days. Nurses have further been re-trained to document the exact time that they have spoken with the physician, or his/her authorized designee, rather than following the timestamp in the software system. The EHR software automatically stamps a time, based upon when the RN is in the system and entering all the necessary data. Often, the RN's will do the assessment visits and later document everything in the system, and sometimes, this may occur during the evening hours, merely depending upon the RN's workload on any given day. In the particular example of Patient #1, the RN made the visit to see the client during late afternoon hours and did the data entry and charting from home that same night; hence, the time stamp of 10:04 pm. Nurses have been re-educated on the timestamp system and that they must manually change the times to reflect actual time that they spoke with the physician representative. The Clinical Manager has also been trained in her responsibility to ensure that she is checking date and time stamps when performing QA on nurse visits

Certification Period(s) starting 3/16/2024, RN HOURLY I 76.00 Hour Weekly for 1 Certification Period(s) . . . RN ReCert Oasis 1 Visit for Certification Period(s) starting 3/16/2024. The sections titled "Clinician/Therapist signature and date of Verbal SOC where applicable" indicated "Verbal order obtained and electronically signed by [name of Clinical Manager] RN, 03/14/2024 at 22:04 [10:04 PM]" The plan of care failed to evidence a review was completed by the physician with a verbal order within 60 days.

During an interview on 03/25/2024 at 12:44 PM the Clinical Manager reported they did not call the physician and receive a verbal order for Patient #1's plan of care for the certification period beginning 03/16/2024 and indicated they only call if there is a change in the plan of care and provided no evidence the physician had been notified of the recertification for review of the plan of care.

IAC 17-13-1(a)(2)

and the plans of care. Nurse trainings will weekly and indefinitely until administration leadership is confident that nurses have corrected all deficiencies and are incorporating the training into their daily routine as they visit patients and prepare their plans of care. The Clinical Manager will be responsible for ensuring that the agency is in compliance with this regulation by communicating with the physician as frequently as needed, upon a significant change or at least every 60 days upon re-certification. The Clinical Manager is responsible for ensuring that all nurses are documenting physician contact and communication. This deficient practice had the potential to affect all patients and the Clinical Manager has the ultimate responsibility to ensure that this plan of correction is followed. To further ensure said plan of correction, the Administrator and Executive will perform monthly quality assurance checks on no less than 10% of patient records. This plan of correction will remain ongoing in nature and compliance threshold is 100%.

<p>G0608</p>	<p>Coordinate care delivery</p> <p>484.60(d)(4)</p> <p>Coordinate care delivery to meet the patient's needs, and involve the patient, representative (if any), and caregiver(s), as appropriate, in the coordination of care activities.</p> <p>Based on record review and interview, the agency failed to coordinated care delivery with other providers for 2 of 6 active clinical records reviewed. (Patients #5 and 6)</p> <p>Findings Include:</p> <p>1. An agency policy with a revision date of October 2016, titled "Coordination of Services with Other Providers" Policy No. 4-016.1, indicated but was not limited to, " ... The Case Manager will act as a liaison with other organizations or individuals also providing care to the patient to assure effective coordination of related services ..."</p> <p>2. During the Entrance conference on 03-25-2024 at 9:45 AM, when queried on how care was coordinated with other agencies, the Executive Director, Admin 2, indicated they had called the other agencies and</p>	<p>G0608</p>	<p>As previously noted in prior deficiency response to G0570, G0572 and G0574, the agency has made significant improvements toward compliance in all areas of comprehensive assessments and the care planning process, as well as the coordination of care delivery; and agency recognizes that additional improvements are still needed. As also noted in G0570, G0572 and G0574, in February 2024, the agency launched an extensive six-week nurse training program in which nurses and leadership began meeting at least once per week so that nurses, including Clinical Manager and Alternate Clinical Manager, could be in-serviced and re-trained on the entire assessment, care planning and coordination of care delivery processes. Nurses have received extensive training both individually and in group sessions, step-by-step through each of these processes. The training process for integrating and coordinating care delivery of all services includes, but is not limited to, conducting multi-disciplinary meetings to ensure that patients' overall health and goals</p>	<p>2024-04-25</p>
--------------	--	--------------	--	-------------------

providers and received updates. They indicated they contacted the other providers in the patients' homes upon the patients' recertification. They indicated the communication and updates were listed in the electronic medical record titled "Case Communication". They indicated the other providers were also listed in the plans of care (POC).

3. During a review of Patient #5's clinical record, it evidenced, in the POC, a start of care date of 11-13-2019 and a recertification date of 02-20-2024 to 04-19-2024. The POC evidenced the patient received assistance from Entity C, a personal service agency, Sunday through Saturday 4:00 PM to 9:00 PM.

During an interview with Person D, the owner of Entity C, on 03-25-2024 at 3:40 PM, they indicated the agency had never reached out to them regarding Patient #5. They indicated the only individual they received information from was Person E, Patient #5's relative and caregiver.

4. During a review of Patient

are being met; ensuring that members of the multi-disciplinary team, whether agency employees or joint providers, are receiving frequent communication regarding patient's overall health status, any significant changes, recent or upcoming physician visits, the need for and receipt of any new durable medical equipment, changes in living arrangements, changes in care providers and any other pertinent information related to the patient. Given that deficiencies still exist, as previously noted, weekly training sessions have been extended and will continue indefinitely until leadership is confident that nurses have retained the information and that it is being appropriately applied in the course of their daily work with patients and their coordination of care delivery. The extended training also places an emphasis on the responsibility of all nurses to communicate with other providers and to document such communication in the appropriate areas of the EHR. In February, the agency developed and implemented a

#6's clinical record, it evidenced, in the POC, a start of care date of 07-14-2023 and a recertification date of 03-10-2024 to 05-08-2024. The POC evidenced the patient received Attendant care services from Entity F, a personal service agency.

During an interview with Person G, the owner of Entity F, on 03-26-2024 at 2:37 PM, they indicated they had provided services to Patient #6 for more than a year and was not aware the patient received services from the agency. They indicated they were never contacted by the agency regarding Patient #6.

5. During an interview with the Executive Director, Clinical Manager, and Registered Nurse 1 on 03-26-2024 at 4:45 PM, they confirmed they were supposed to coordinate care with other providers in the patient's home.

410 IAC 17-14-1(a)(1)(F)

new form, "joint provider listing," and the Alternate Clinical Director and another RN are communicating with all patients and/or their authorized representatives to ensure that the agency has a current list of all joint providers. For the purposes of defining "joint provider," this may include, but not be limited to, other home health agencies, personal service agencies, dialysis clinics, coumadin clinics, IV infusion services, adult day programs, assisted living facilities, adult family care homes, waiver case managers, relevant physicians, social workers and mental health counselors and practitioners, transportation providers, emergency response systems, home delivered meals, providers of durable medical equipment, pharmacies, providers of diabetic supplies and providers of incontinent supplies. Attending nurses are required to take said listing to each patient visit and to review the listing with patient and/or authorized representative and to update any changes. The attending nurse will further be required to document any changes within the patient's plan of care during

			<p>there-certification process. The ClinicalManager will be responsible for ensuring that the agency is compliance with thecoordination of care delivery and that there is appropriate documentation ofsuch within each patient’s electronic health record. This deficient practice had the potential toaffect all patients and the Clinical Manager has the ultimate responsibility toensure that this plan of correction is followed. To further ensure said plan of correction,the Administrator and Executive will perform monthly quality assurance checkson no less than 10% of patient records. This plan of correction will remain ongoing in nature and compliancethreshold is 100%.</p>

coordination of care with other providers in the patient's home, failed to ensure patients' needs were continuously assessed, and provided services for all active patients for 5 of 6 active clinical records reviewed. (Patients #1, 4, 5, 6, and 14)

Findings Include:

1. The Clinical Manager's job description titled "Clinical Director" dated 03-21-2023 indicated but was not limited to, " ... 1. Coordinates and oversees all direct and indirect patient services provided by clinical organization personnel ... 4. Provides help in assessment, planning, implementation and evaluation of patient and family/caregiver care to all clinical personnel as indicated ..."

2. A review of 2 of 6 active clinical records (Patients #5 and 6) failed to evidence any coordination of care notes with other providers providing care for the patients.

The agency failed to coordinate care with Patient #5's personal service agency, Entity C.

The agency failed to coordinate

is also receiving additional orientation and training that is specific to her new role as Clinical Manager. To ensure that the new Clinical Manager has an understanding of this plan of correction and the various tags and deficiencies associated with it, the Executive Director has reviewed the 2567 and the plan of correction, with her and has incorporated it into the training of her new role. The Clinical Manager is being trained on all areas of responsibility, and those have included deficiencies related to coordinating and overseeing all direct and indirect patient services provided by clinical personnel; assisting with assessing, planning, implementing and evaluating of patients; monitoring clinical visits and ensuring that appropriate charting and documentation to assessments and plans of care occur; communicating with MD's and other joint providers and documenting such communication; ensuring that plans of care are current and accurate to include all providers, DME, mental health status, psychosocial and cognitive status, frequency and

	<p>care with Patient #6's personal service agency, Entity F.</p> <p>3. During the Entrance Conference with the Executive Director on 03-25-2024 at 9:45 AM, they indicated the coordination of care notes would be in the electronic medical record titled "Case Communication" or "Client Logging". The clinical records evidenced no communication to Entity C and Entity F.</p>		<p>duration of visits, prognosis, rehabilitation potential, functional limitations, activities permitted, nutritional requirements, all medications and treatments, safety, hospitalization potential, patient and caregiver education and training, interventions, advanced directives and patient-specific goals.</p> <p>The deficient practices in this area noted had the potential to affect all patients, and therefore, the new Clinical Manager has received additional training on the overall care coordination process, along with the discharge process, and will have the ultimate responsibility to ensure that this entire plan of correction is followed. To further ensure said correction, the Executive Director has tasked the new Clinical Manager with the responsibility of personally contacting each client to discuss each of their respective plans of care and their overall care experience. This will allow the new Clinical Manager to become personally familiar with those patients whom she has not previously met and will</p>

4. During a review of 3 of 6 active clinical records (Patients #1, 4, and 6), the Clinical Manager failed to ensure plans of care were updated, complete, patient-specific, and contained all pertinent diagnoses, patient’s mental, psychosocial, and cognitive status, types of services, durable medical equipment (DME), frequency and duration of visits, prognosis, rehabilitation potential, functional limitations, activities permitted, nutritional requirements, all medications and treatments, safety, hospitalization potential, patient and caregiver education and training, interventions, advanced directive, and patient-specific goals.

5. During an interview with the Clinical Manager on 03-26-2024 at 4:45 PM, they indicated the plan of care needed to be patient-specific and individualized.

6. During a review of the document titled “Resident Census” on 03-25-2024, it evidenced Patient #14 was an active patient with a start of care date of 09-25-2023. A review of the document titled

allow her the opportunity to correct any further deficiencies as related to each of their personalized plans of care. The Clinical Manager will be directly supervised by the Executive Director who will continue to assist in training of Clinical Manager and the monitoring of this plan of correction. This plan of correction will remain ongoing in nature and compliance threshold is 100%.

“Discharge Details Reports” failed to evidence Patient #14 was discharged from the agency.

During a review of the patient’s clinical record, it failed to evidence a current plan of care, physician orders for services, comprehensive assessment, and Home Health Aide (HHA) visit notes. The clinical record evidenced a plan of care with a start of care date of 09-25-2024 and an initial certification date of 09-25-2024 to 11-23-2023. The plan of care was signed by the patient’s primary care provider, Person H, on 11-20-2023. . The clinical record evidenced the patient’s relative and primary caregiver signed consents for service documents. The clinical record evidenced Registered Nurse 1 performed a Start of care assessment on Patient #14 on 09-25-2023. The clinical record failed to evidence any further visits for the patient since 09-25-2023.

Patient #14’s clinical record evidenced documents titled “Client Logging Report”. The report evidenced on 10-12-2023 at 5:43 PM, the

the note they had thought they had an aide for the patient, but the aide was not able to work the hours the patient needed. The note indicated Person I had said, "will take whatever (sic Patient #14) can get, as far as hours, at this point". A note dated 12-04-2023 by Admin 5, Intake and Clerical staff, indicated Person I informed the Scheduler, Admin 4, they had a relative who was willing to be certified to care for Patient #14. The clinical record evidenced no further notes or documentation.

During an interview with Person I, Patient #14's relative and primary caregiver, on 03-26-2024 at 11:04 AM, they indicated the patient never received any services from the agency. Person I indicated a nurse had performed an assessment on the patient and they completed the initial admission paperwork during the visit. They indicated the agency informed them they were unable to staff the patient. They indicated the agency had not assisted them with finding another agency for the patient.

During an interview with the Executive Director on

03-26-2024 at 10:30 AM, they indicated they were unsure who Patient #14 was because they had only spoken to Person I. They indicated they were unable to staff the patient because of the patient's location. They indicated they never discharged the patient.

During an interview with Person I on 03-26-2024 at 12:15 PM, they indicated they had no one to care for the patient during the hours they were at work. They indicated Patient #14 was not a patient at another home health agency. They indicated they were under the impression the patient was never admitted because of staffing.

During an interview with RN 1 on 03-26-2024 at 1:10 PM, they confirmed the document titled "Resident Census" was the active roster. They indicated they may have seen Patient #14 once or twice when the patient first started. They admitted the patient on the first initial assessment but were unable to find an aide for the patient to meet the patient's needs. They confirmed the patient was not discharged. They confirmed for active patients, they needed to

have a new plan of care every 60 days. They indicated if they were unable to staff the patient, they were to discharge the patient. They indicated they had not had to help Person I find another agency for the patient. They indicated active patients were to receive all services according to physician orders on the plan of care. They indicated the patient never received any services from the agency and the patient should have been discharged.

During an interview with the Clinical Manager on 03-26-2024 at 1:52 PM, they indicated a patient was admitted to the agency when they received orders from the physician and the Admission paperwork was completed. They indicated they would discharge the patient if they were unable to provide staff and assist the patient in finding another agency. The Clinical Manager indicated they were not aware of who Patient #14 was and were unaware of the patient being an active patient.
