Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined other safeguards provide sufficient protection to the patients. (see instructions.) Except for nursing homes, the findings stated above are disclosable following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosed days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F 0602 SS=D Bldg. 00	<p>483.12 Free from Misappropriation/Exploitation</p> <p>Based interview and record review, the facility failed to ensure residents were free from misappropriation of resident property related to drug diversions of residents' narcotic pain medications (hydrocodone and oxycodone) for 3 of 3 residents reviewed for misappropriation of resident property. (Residents B, F, and G) The deficient practice was corrected on 1/3/25, prior to the start of the survey, and was therefore past noncompliance.</p> <p>Finding includes:</p> <p>A Indiana Department of Health (IDOH) reported incident indicated on 12/27/24 at 10:01 a.m., it was reported to the Assistant Director of Nursing and the Administrator that the facility was unable to account for a Resident B's narcotic pain medication or oxycodone 15 mg (milligrams).</p> <p>A 5-Day Follow-up to the reported incident, dated 1/3/25, indicated a registered nurse had admitted to taking Resident B's oxycodone 15 mg.</p> <p>The investigation of the incident, undated and completed by the RN Nurse Consultant, indicated all residents' medications and count sheets were reviewed. There were discrepancies for the narcotic pain medications for Residents B, F, and G.</p> <p>Review of the resident records and investigation indicated the following:</p> <p>1. Resident B's record was reviewed on 2/6/25 at 11:02 a.m. The diagnoses included, but were not limited to, peripheral neuropathy and diabetes</p>	F 0602	PNC	02/26/2025

	<p>12/26/24 that RN 4 had been administering several oxycodones to Resident B. On 12/26/24, Resident B had a card of 8 and a card of 30 oxycodone tablets in the medication cart. On the morning of 12/27/24, the ADON indicated the card of 8 oxycodone tablets was missing. RN 3 had indicated 1 oxycodone had been given out of the card of 8 on the evening of 12/26/24. The 7 left in the card were unaccounted for. She indicated RN 4 would volunteer to come in early to relieve the nurses on the evening shift. When the facility reviewed when she came in early, it was the days the pharmacy was delivering the narcotics that she had ordered. RN 4 would sign for the narcotics and the count sheet and the cards would be missing. RN 4 took the card with 7 of Resident B's oxycodone and the narcotic count record. RN 4 admitted to taking the card and the narcotic count record.</p> <p>During a telephone interview with the Corporate RN Consultant on 2/6/25 at 12:28 p.m., she indicated RN 4 had admitted to taking the 7 oxycodone tablets. RN 4 had informed the Police Officer she had been taking the medication over the course of a year. There were over 300 narcotics missing. It was determined RN 4 would order the medications then be at the facility when they were delivered and take the medications along with the narcotic count record or she would sign the medications out and not sign the MAR as given.</p> <p>The deficient practice was corrected by 1/3/25 after the facility implemented a systemic plan that included the following actions: law enforcement were notified and responded to the allegation with an investigation, narcotic counts were immediately performed, oriented residents were interviewed to ensure there was no pain or</p>

F 0609 SS=D Bldg. 00	<p>discomfort, and nurses were interviewed. New protocols were initiated to prevent further drug diversion, the Director of Nursing (DON) or the ADON will check the narcotic counts randomly to ensure staff are following the new protocols. When adding narcotic cards to the cart, there must be two signatures and two staff members must sign the delivered narcotic in when delivered by pharmacy. If the narcotic is discontinued, medication card is empty, or the narcotic count record is completed, the DON or ADON will remove the card and the count record. The Narcotics will be counted at the beginning and end of every shift and will be signed by two staff (nurse/QMA). Education has been provided to 12 of the 21 nurses/QMA's and agency staff will be educated when they work. The new protocols are kept in the front the narcotic count binder on each cart. A narcotic count was completed on the 4 of 4 medication carts in the facility and all narcotics were accounted for. Five nurses on day and evening shift were interviewed and were able to describe the new protocols and what to do if there was a discrepancy. They also indicated they would report if a resident was receiving more pain medications than normal. The DON indicated the audits would be continued indefinitely and the results from the audits would be discussed in Quality Assurance meetings.</p> <p>This citation relates to Complaint IN00450100.</p> <p>3.1-28(a)</p> <p>483.12(b)(5)(i)(A)(B)(c)(1)(4) Reporting of Alleged Violations</p> <p>Based on record review and interview, the facility failed to ensure a 5-Day follow up to a reported incident of misappropriation to the Indiana</p>	F 0609	I. 	<p>ADON indicated she completed wound rounds with the Wound Nurse Practitioner (NP) weekly. Resident C was on hospice and the Wound NP did not see the resident weekly. The ADON completed the wound care and indicated the left hip had two wounds. The ADON estimated the first left hip wound as Length (L) 4 centimeters (cm) by width (W) 3 cm and the second wound was estimated at (L)7 cm by (W) 4 cm with a small area of 0.5 cm depth and slough covering the rest of the wound. The ADON indicated the areas had declined and the odor, drainage, and slough were new to the area. She was just made aware that the treatment to the left hip had been changed and was unsure when the Hospice Nurse changed the treatment orders, as it had not been communicated to her. The ADON indicated the left hip had just been covered with a dressing prior to the calcium alginate (wound treatment for wounds with drainage). A dry dressing was removed from the sacral area. There were two wounds on the sacral area. The ADON indicated both wounds were unstageable due to the necrotic tissue and the areas had declined. She did not complete skin checks and assessments on every resident. The nurses completed weekly skin assessments and were to notify her if there was a concern.</p> <p>Resident C's record was reviewed on 2/5/25 at 11:46 a.m. The diagnoses included, but were not limited to, vascular dementia and diabetes mellitus. The resident was receiving hospice care.</p> <p>A Care Plan, dated 11/7/24, indicated there was a potential for impairment of the skin. 	<p>A Physician's Order, dated 1/2/25, indicated the sacral area was to be cleansed with soap and water, patted dry, and a sacral foam dressing was to be used for protection. The treatment was to be completed on Tuesdays, Thursdays, and Saturdays for skin maintenance.</p> <p>A Weekly Skin assessment, dated 1/3/25 at 5:31 p.m., indicated the right buttock area had a stage two pressure area and a treatment was in place. The coccyx (sacral) area was red and a prophylactic dressing was used for the area.</p> <p>There were no Weekly Skin Assessments completed from 12/23/24 to 1/3/25. The right buttock and coccyx areas were not measured or thoroughly described.</p> <p>A Weekly Skin Assessment, dated 1/25/25 and completed by RN 3, indicated the right buttock was unstageable (depth of the wound cannot be determined due to eschar or slough) and the sacral area was red. A hydrocolloid dressing was used for the sacral area.</p> <p>There were no Weekly Skin Assessments completed from 1/3/25 through 1/25/25. There were no measurements or thorough descriptions of the pressure areas on the 1/25/25 assessment. There was no documentation the Wound Nurse, Physician, and family had been notified of the decline of the right buttock pressure area.</p> <p>A Care Plan, dated 1/27/25 and revised on 2/5/25, indicated a pressure ulcer was present on the right buttock. The interventions included the treatment would be completed as ordered.</p> <p>The Care Plan did not indicate other pressure</p>

	<p>ulcers were present.</p> <p>A Physician's Order, dated 12/28/25 and discontinued on 1/31/25, indicated the bilateral hips were to be cleansed with soap and water, patted dry and a hydrocolloid (protective dressing) was to applied to the area for protection on every Tuesday, Thursday, and Saturday evening.</p> <p>There were no skin assessments of the bilateral hips that indicated there were open areas or the condition of the skin.</p> <p>A Hospice Nurse's Note, dated 1/10/25 at 1:15 p.m., indicated a large stage three (full thickness tissue loss) wound was present on the left hip that had declined from a stage two. The ADON was notified. The wound was cleansed and a foam dressing was applied.</p> <p>There was no thorough assessment of the left hip wound that indicated a size and description of the area.</p> <p>A Hospice Nurse's Note, dated 1/31/25 at 1:45 p.m., indicated the stage three area on the left hip was observed. There was odorous drainage on the old dressing and no warmth to the area. The facility staff were notified and informed the dressing needed to be changed daily.</p> <p>There had been no documentation of changes in the left hip status from 1/10/25 to 1/31/25. The area had not been assessed by the facility.</p> <p>A Physician's Order, dated 1/31/25, indicated on 2/1/25, the bilateral hips were to be cleansed with soap and water, patted dry, calcium alginate was to be applied and then covered with a foam</p>

	<p>dressing daily.</p> <p>There were no thorough assessments of the pressure area on the left hip that indicated the size or description.</p> <p>A Weekly Skin Assessment, dated 2/4/25 and completed by RN 3, indicated the sacral area was red and a hydrocolloid dressing was used for protection. The right buttock remained unstageable and a treatment was in place.</p> <p>There were no measurement or thorough description of the pressure areas on the assessment. There was no assessment of the left hip.</p> <p>During an interview on 2/5/25 at 10 a.m., the ADON indicated the Weekly Skin Assessments were to be completed by the nurses and the nurses would either contact her by writing/alert charting or orally about the concerns. The nurses were responsible for obtaining treatment orders. The nurses were not responsible for assessments/staging and measurements. The ADON looked at the wound areas on Thursdays or sooner, "if I can get to them", for the initial assessment. She did rounds with the Wound NP on Thursdays and pictures were taken along with the measurements. She did not assess a pressure area unless the area was open. The ADON indicated no one had notified her the resident's left hip area had opened. The Wound NP did not consult on/assess Resident C. She had just seen the calcium alginate order for the left hip this morning.</p> <p>During an telephone interview on 2/5/25 at 11 a.m., the Hospice Nurse, indicated she would inform the nurse taking care of the resident of any</p>

	<p>changes and updates. The pressure areas were unavoidable due to the resident's decline in status and nutrition.</p> <p>During an interview on 2/5/25 at 2:30 p.m., the ADON indicated the bilateral hips were not being assessed on the weekly skin assessment. There was no area of concern on the right hip and the order should state the treatment was for the left hip. She indicated there had been no assessments or measurements of the left hip and sacral area completed. The care plan was not correct for the pressure area on the right buttock and the information was taken from the weekly skin assessments.</p> <p>During an interview on 2/5/25 at 2:40 p.m., the ADON indicated there was no open area on the right buttock and the treatment to right buttock had been discontinued 12/5/24</p> <p>During an observation on 2/5/25 at 2:52 p.m., the resident was lying in bed, the low air loss mattress was not turned on nor plugged in. The ADON indicated at the time of the observation, she was unsure how long the air flow on the bed had been turned off. There was no pressure area located on the right buttock. The ADON indicated she was unsure why staff were documenting there was an area on the right buttock.</p> <p>During a telephone interview on 2/6/25 at 1:28 a.m., RN 3 indicated he had marked the wrong area and there was not an unstageable area on the right buttock. The unstageable area was on the sacral area and was necrotic. The ADON had not been notified, as it was assumed she had already known about the area.</p> <p>A facility skin condition assessment policy, dated</p>
