Pediatric Trauma, Burn & Emergency Care Symposium

Presented by Riley Children's Health

April 28, 2026

Physicians, advanced practice providers, nurses, respiratory therapists and EMS professionals are invited to join us for our third annual Pediatric Trauma, Burn & Emergency Care Symposium. This full-day, in-person event in Indianapolis will feature national experts and physicians sharing the latest in pediatric trauma, critical care, emergency medicine and pre-hospital care.

Topics will highlight evidence-based guidelines, advances in scientific inquiry, and practical tools and resources to provide the best outcomes for critically ill and injured children. Beyond trauma-focused sessions, the symposium will also feature education in non-trauma pediatric emergency and burn care. Continuing education credit will be provided.

Registration details coming soon.
