ABOUT THE COURSE

ITLS is a two-day, hands-on trauma course for EMS providers that combines classroom instruction with skill stations and scenario-based practice. Providers will build a systematic approach to assessing and managing trauma patients in the field, from scene size-up through transport decisions.

COURSE TOPICS

- Primary and secondary trauma assessment
- Airway, breathing, and hemorrhage control
- Spinal motion restriction and extremity trauma
- Shock recognition and management
- Pediatric and geriatric trauma considerations
- Scenario-based skill stations and practical exam
