IDOA Contractor/City/Project Representatives	Expertise
<p>Glenroy Construction Co., Inc., Indianapolis General Contractor C. Lane Slaughter, President Jim Kojetin</p>	<p>Over the company's 60-years, Glenroy Construction Co., Inc. began to construct increasingly larger and more complex projects. Glenroy Construction Company, Inc. has successfully constructed projects of virtually every size and style, utilizing innovative, as well as traditional, materials, means and methods. Projects have served both public and private clients in uses ranging from retail and commercial to industrial and institutional.</p> <p>The company's experience in constructing Hoosier landmarks, taught company executives that almost any contractor can complete a project The secret to succeeding in a competitive business is to complete each project for each client on time, for the anticipated cost and with the least possible interruption and interference to the client's activities. Glenroy has a record of taking charge of the most difficult projects and making them a reality.</p>
<p>ARSEE Engineers, Inc., Fishers, Fritz Herget, President Victoria Emery, Professional Engineer</p>	<p>ARSEE Engineers was founded in 1968 primarily as a structural consultant to architects. Its clientele has grown and diversified to serve individuals, corporations, universities, governmental agencies, industrial facilities, commercial entities, contractors, suppliers, lawyers, and architects. ARSEE has developed a solid reputation for finding practical solutions to touch engineering problems.</p> <p>ARSEE's forte continues to be structural design and analysis and Civil Engineering in general. ARSEE has also developed considerable expertise in the analysis, design and repair of building facades, particularly masonry. Much of this work has been associated with Historic Facilities including the Indiana State House, Murat Theater, and the Central Branch of the Marion County Library. When advantageous to our clients, we team with other consulting engineers and materials specialists throughout the United States to collectively provide the specific expertise that is needed.</p> <p>ARSEE Engineers is one of the few firms in the United States that has diversified into the analysis and testing of problems in corrosion, freeze/thaw damage, soils related failures, structural vibrations, and masonry failures. The company has its own laboratory for testing the strength of structural assemblies in wood, concrete, steel, and masonry.</p>
<p>Lawson Elser, Carmel, Mike Lawson Brian Elser</p>	<p>Lawson Elser, Inc. has extensive experience with structural problems related to restoration of historic buildings and has been involved with hundreds of investigation, restoration and renovation projects of historic buildings, particularly the primary load-carrying system, the exterior façade, and the foundation.</p> <p>Lawson Elser has the capability to provide a Structural Investigation into all type of historic structures, evaluate the structural condition, determine existing capacity, and recommend structural repairs or modifications as needed.</p>

	<p>The company's experience includes all types of construction and materials including concrete, steel, timber, masonry, pre-cast and post-tensioned concrete. Its engineers have designed structural repairs for deterioration ranging from minor damage to full structural collapse.</p>

Subcontractor of Glenroy/ City/ Project Representatives	Expertise
Venus Bronze Works, Detroit, MI Giorgio Gikas	<p>Giorgio Gikas is the founder and president of Venus Bronze Works, Inc., Center for Conservation of Detroit, one of the handful of companies in the country that specializes in outdoor sculptural conservation. Some museums and private institutions have their own in-house conservation staff, but for everyone else, companies like Venus ensure that the heads, arms, and other parts of sculptures stay intact. Given the unique skills required for this job, and the fact that the weather is always, weathering, there is a constant need for Gikas' services.</p> <p>Sculpture conservators do far more than just clean, wax, polish, and paint. Their job requires sculptural skills, scientific expertise, construction know-how, and an understanding of art history. Much of their work is done on site, and in those instances they must often wear the hat of a construction worker. Gikas recounted a job repairing the figure of "Miss Wisconsin" perched atop the cupola of the state capitol in Madison. High above the ground, he and his crew worked with delicate gold leaf while clinging to their scaffolding in the face of 50 mile an hour gusting winds.</p>
R.H. Marlin, Indianapolis, Perry Bruce	<p>The purchase of 12 cranes was the beginning of the crane rental business for R.H. Marlin in the early 50s. During this time, the company worked at the Ford plant on Indy's east side and also worked downtown on the city's circle. Over the next two decades the company operated in many different cities in the Midwest, but has always called Indianapolis home.</p> <p>RH Marlin is one of the nation's foremost authorities for the crane and equipment rental industry:</p> <ul style="list-style-type: none"> • Cranes • Forklifts • Aerial Platforms • Transportation/Heavy Haul • Excavation • Potain Self-Erecting Tower Crane Dealer • Spyder Crane Dealer
Egenolf Machine aka Egenolf Contracting and Rigging, Indianapolis Pete Egenolf	<p>Since 1927, Egenolf Machine a/k/a Egenolf Contracting and Rigging has served North America with competitive pricing and competent installation crews. Egenolf's dedication to field service, maintenance, rigging, machinery moving, trucking and professional erection of equipment has kept the company at the forefront of its industry.</p> <p>Egenolf specializes in machinery moving and installation, heavy hauling, plant relocations, hoisting, erecting and rigging. The company's services are available for turnkey jobs as well as for those assignments requiring only or time and materials, machine refurbishing and renovation skills or mechanical installation services.</p>
Scaffold King, Rockville, Kelly Wingert	<p>Scaffold King Rentals, Inc. is a woman owned scaffold company, founded on a combined 25 years of experience in the scaffold building industry.</p> <p>No matter the size of project, Scaffold King Rentals provides competitive bids on rental of scaffolding as well as labor for the erecting and dismantling of the scaffolding at any site. Scaffold King strives for customer satisfaction and makes every effort to maintain a record that reflects integrity and consistency in quality service.</p>

<p>Soley Metal Fabricating, Detroit, MI, David Soley</p>	<p>Custom stainless steel manufacturer specializing in the pharmaceutical, architectural and food & beverage industry, as well as architectural restorations of doors, iron work and other metal applications. Restoring, replacing, or filling in the "missing pieces" of historical architectural building components is usually a combined effort of many disciplines. This starts with a building owner or museum board deciding where to begin a restoration and the size of a project determines how many disciplines will be necessary to complete it.</p>
<p>Broady Campbell, Indianapolis, Scott Broady</p>	<p>The company has been in business for over 80 years doing primarily commercial, industrial and educational masonry construction, including historic restoration, caulking, waterproofing and stone (exterior).</p>
<p>Capitol Lightning Protection, Fishers, Mark Benham</p>	<p>Capitol Lightning Protection Co. specializes in custom designed lightning protection systems for residential and commercial structures. The company is a listed Dealer/Contractor with Underwriters Laboratories and also maintains certification through the Lightning Protection Institute.</p> <p>As representatives of the Independent Protection Company in Goshen, Indiana, Capitol Lightning Protection installs materials designed to meet or exceed the requirements of Underwriters Laboratories, the National Fire Protection Association, and the Lightning Protection Institute – the United States authorities on lightning protection.</p>
<p>Harmon Steel. Inc., Indianapolis, Mike Orr</p>	<p>Harmon Steel, a full steel erection company, has more than 125 years of steel erection experience. Its employees have expertise in a vast array of services including structural steel for the Soldiers and Sailors Monument project.</p>
<p>Environmental Assurance Co., Avon, Jeff Hart</p>	<p>Environmental Assurance Co., Inc in Avon, IN specializes in hazardous material abatement.</p>
