State Government	Size & Scope	Services Provided by Tyler
Kansas	<p>The State of Kansas represents Tyler's longest-tenured state partner. Our Kansas subsidiary, Tyler Kansas (fka: Kansas Information Consortium), executed its initial contract with the State of Kansas in 1991. The state of Kansas launched the nation's first electronic state government services in 1992 through its partnership with NIC. Kansas was also the first state to use a self-funding model to fund online government services, and many more states have since adopted the same business model to build e-government solutions <i>without using upfront general tax dollars</i>.</p> <p>During the last 32 years, Tyler has worked with more than 700 Kansas agencies to develop more than 400,000 pages of content for www.kansas.gov, the State's official web portal, have developed and deployed 1,355 interactive government services for businesses and citizen users, and processed over \$600M in payments in 2022 alone.</p>	<p>Enterprise portal/website management Content Management Third Party Application Management Data sales and management program management Application development Technology infrastructure management Mobile App Solutions Marketing and public relations Help Desk and Customer support Market research Security Payment processing Policy consulting Project management Performance management Training Cross-boundary agency outreach Local government services Service Level Agreement compliance Accessibility and WCAG compliance services Legacy application replacement Chat Bot and live chat services Financial and Performance Reporting</p>
Kentucky	<p>Our subsidiary in the Commonwealth, Tyler Kentucky (fka: Kentucky Interactive), contracted with Kentucky in 2003 to manage its official e-government program. Tyler has now helped build more than 2,500 online services for state and local government agencies by leveraging the funding stream created through the fee-based services deployed in the Commonwealth.</p>	<p>Enterprise portal/website management Content Management Third Party Application Management Data sales and management program management Application development Technology infrastructure management Mobile App Solutions Marketing and public relations Help Desk and Customer support Market research Security Payment processing Policy consulting Project management Performance management Training Cross-boundary agency outreach</p>
