## General Comments

- We will purchase a fluorescent microscope and non-networked PC to be utilized within the rabies lab at the IDOH Lab. This new microscope will serve as the new core of the rabies lab, while the old scope will serve as a backup - in case of scope failure. Also, the new scope does not require expensive bulb replacements and will save money in the long term. This bid will be sent out for the instrument and the maintenance required to cover the life of the equipment.
