I. PURPOSE:

This Health Care Services Directive (HCSD) addresses the need to ensure that sufficient and suitable space, equipment, and supplies are available for each facility's Physical, Behavioral, and Transitional Health Services.

II. GUIDELINES:

- A. Examination and treatment rooms for Physical, Behavioral, and Transitional Healthcare must be large enough to accommodate the necessary equipment, supplies and fixtures and to permit privacy during clinical encounters. Facilities must identify specific space for use in delivering health services. This space must have adequate light, ventilation, floor space, equipment, and hand washing facilities. The amount of space and the configuration of the room(s) needed for the care and treatment of patients may vary with the size of the facility and the kinds of services provided on site.
- B. Pharmaceutical, medical supplies and mobile emergency equipment must be available and checked regularly. Inventories must be adequate to cover expected usage. Sharps and other dangerous items must be maintained under careful control at all times and must be inventoried daily (every shift when multiple shifts utilize the same supplies) to ensure that unnoticed loss does not occur; even back up supplies must be inventoried at least weekly.
- C. There must be adequate office space with administrative files, secure storage of paper health records and sufficient space to accommodate the computers needed for the electronic medical record.

Title <b>CLINIC SPACE, EQUIPMENT, AND SUPPLIES</b>			

- D. Space must be provided to accommodate individual and group treatment as well as desks, chairs, lockable file space, and relevant testing material.
- E. When laboratory, radiological, or other ancillary services are provided on site, the designated area is adequate to hold equipment and records.
- F. An appropriate basic library of health reference material must be maintained at each health care unit and accessible to staff.
- G. When patients are placed in a waiting area for more than a brief period, the waiting area has seats and access to drinking water and toilets. The waiting area must be adequately sized and supervised
- H. Each facility must have, at a minimum, the following equipment, supplies and materials for the physical examination and treatment of patients:
1. Hand-washing facilities or appropriate alternate means of hand sanitization;
  2. Examination table;
  3. A light capable of providing direct illumination;
  4. Scales;
  5. Thermometer;
  6. Blood pressure monitoring equipment;
  7. Stethoscope;
  8. Ophthalmoscope;
  9. Otoscope;
  10. EKG machine
  11. Pulse oximeter;
  12. Sterilizer;
  13. AED;
  14. Oxygen;
  15. PPE;
  16. Emergency Response Bag;
  17. Transportation equipment (e.g., wheelchair, stretcher);
  18. Trash container for biohazardous material and sharps; and,
  19. In female facilities, equipment and supplies for pelvic examinations.
- I. Facilities with full-time health care staff must have multiple-test dipstick urinalysis, finger-stick blood glucose tests, PEAK flow meters (hand held or other), stool blood testing material and in the DYS female intake facility, pregnancy test kits.
- J. Basic equipment for on-site dental examinations includes at a minimum:
1. Hand-washing facilities or appropriate alternate means of hand
