The LAST MILE
PAVING THE ROAD TO SUCCESS

Volunteers Needed!

NextLevel INDIANA

The Last Mile prepares incarcerated individuals for successful re-entry through business and technology training.

The Last Mile (TLM) is a non-profit founded in 2010 at San Quentin to address the societal impact of incarceration as a drain on human and fiscal resources. TLM is the first full stack coding program inside US prisons. Its mission is to provide marketable skills that result in gainful employment and a core belief is that having a job is the key to successful re-entry and breaking the cycle of incarceration. The program provides computer coding training to prepare its students for release into today's high-tech environment.

#PavingtheRoadtoSuccess

Students learn skills in web development with the objective of becoming full-stack JavaScript engineers. Technologies used include, but are not limited to, HTMS5, CSS3, JavaScript with Node.js, MongoDB, and several popular JavaScript libraries including React, Express, and Mongoose.

The Indiana Department of Correction is currently recruiting volunteers to mentor students for The Last Mile. Volunteers have a flexible schedule and typically spend a couple hours each week either assisting students in the classroom during the day or helping students grasp concepts during evening labs. We are actively recruiting for mentors at the following sites.

- Rockville Correctional Facility
- Putnamville Correctional Facility
- Plainfield Correctional Facility
- Pendleton Juvenile Correctional Facility
- Indiana Women's Prison

If you are interested in volunteering or would like more information, contact DOCoutreach@idoc.IN.gov.
