

## What's included in this module:

The Scheduling module ensures that offenders' schedules are accurately displayed with the offenders' complete list of activities. Additional appointments such as Parole Hearings, Court or Medical appointments can be added, and the module also indicates when there are scheduling conflicts to allow staff to act.

## What's in it for me?

One system for all of my work

Increased standardization

Easily accessible & searchable information

## Associated Roles:

Caseworker

Program Coordinator

Count Desk

# Module: Scheduling

## Key Changes?

The Out Custody screen lets users track when an offender leaves the facility for a job or program. It is linked to the Out Custody toggle for a cycle.

Job Descriptions will be used instead of Job codes in DELTA. The Job Descriptions will be standard from facility to facility.

The Administrative Review Committee (ARC) system for Youth Services will be accessible within DELTA and will be used to access offender schedules and set up meetings.

Staff will be able to set a priority for activities to help users determine the best way to handle conflicts in an offender's schedule.

Call Out Passes will no longer be used. All information previously found on them will be available and tracked in DELTA.

## What will be the same?

Offenders can still be assigned to activities and cycles.

All data found in the legacy systems will be available in DELTA.
