

# What's included in this module:

Within the sentencing process, IDOC monitors and manages the manner in which offenders are incarcerated and/or supervised as prescribed by Indiana law. The sentencing module also includes the calculations to track credit time and sentence expiration dates.

## What's in it for me?

- One system for all of my work
- Less manual calculation & data entry
- Easily accessible & searchable information

## Associated Roles:

Sentence Computation Specialist

Release Specialist

Parole Agent

## Key Changes?

# Module: Sentencing

The Credit Action Dashboard (CAD) will consolidate the 3 screens that are currently used to manage credit time. All Actions will appear in a grid so you can see the progression of Actions that affect the offender's time, release status, and parole status.

DELTA will allow staff to view comments and dates through the Sentence Worksheet, and certain staff can view specific case order/count details on the Sentence Detail Screen. This will reduce the need for unnecessary communication channels.

There will be a Sentence Detail Screen for Out-of-State Offenders in DELTA. This is a new feature for IDOC. Out-of-State offenders will no longer be tracked on a spreadsheet.

Staff will be able to add as many Confinement Types that are needed for a Case Order, and they can be distinguished by Court Ordered Credit, Incarceration, Home Detention With Credit/Without Credit, etc.

CPCT Time Cut credits can now be entered on the Credit Action Dashboard (CAD) as a CPCT Time Cut, instead of a Note Action to manipulate the system into calculating the CPCT Time Cuts.

When the PRD is within 30 days, there will be a 'Sentence Detail Final Audit' toggle and a 'Sentence Comp Final Audit' toggle on the Sentence Detail and CAD screens. The Banner and Release Dashboard will auto-update to reflect the audit status.

Staff will be able to manually lock dates in the event a legislative change is made changing any calculation, if a different way of calculating a sentence per a Judgement that goes against Statute is received, or if the system will not give the expected outcome for the PRD, MRD, Parole Start Date, or Parole End Date.

Certain staff will be able to see a history of all edits to the Sentence Detail and Sentence Worksheet when they result in a date change. This will make it easy to see why a release date has changed if an offender writes a letter asking what happened.

## What will be the same?

All calculations will remain the same, but they will be done by the DELTA system.

All previous data from the legacy systems will be migrated to DELTA.
