Column 24 – Issuer

Issuer Definition:

> The name of the legal entity that develops, registers and sells securities for the purpose of financing its operations and may be domestic or foreign governments, corporations or investment trusts. The issuer is legally responsible for the obligations of the issue and for reporting financial conditions, material developments and any other operational activities as required by the regulations of their jurisdictions.

The reporting entity is encouraged to use the following sources:

- Bloomberg
- Interactive Data Corporation (IDC)
- Thomson Reuters
- S&P/CUSIP
- Name used in either the relevant SEC filing or legal documentation for the transaction. Issuer is the name of the legal entity that can be found on documents such as SEC Form 424B2, Note Agreements, Prospectuses and Indentures as appropriate. The name used should be as complete and detailed as possible to enable others to differentiate the legal entity issuing the security from another legal entity with a similar name.

Do not report ticker symbols, either internal or otherwise.

Column 25 – Issue

Issue information provides detailed data as to the type of security being reported (e.g., coupon, description of security, etc.). Below are examples of what could be provided but additional information should be provided as appropriate for the security.

It is used for numbering specific securities, such as stocks, bonds, options and futures. ISIN numbers are administered by a National Numbering Agency (NNA) in each of their respective countries, and they work just like serial numbers for those securities. Record the ISIN number only if no valid CUSIP, CINS or PPN exists to report in Column 1.

SCHEDULE D – PART 5

LONG-TERM BONDS AND STOCKS ACQUIRED DURING THE YEAR AND FULLY DISPOSED OF DURING CURRENT YEAR

This schedule should include a detailed listing of all securities that were both purchased/acquired and sold/disposed of during the current reporting year (amounts purchased and sold during the current reporting year are also reported in subtotals in Schedule D, Parts 3 and 4).

Reporting entities should track information separately for securities purchased in different lots rather than using some type of averaging for the issue in aggregate. Thus, this schedule should only be used when an entire lot of a security has been purchased and sold during the current reporting year (even when different lots of the same security still exist on the reporting entity's books).

As with Schedule D, Parts 3 and 4, this schedule should not be used for a transaction unless it affects the cost basis of the securities. Thus, it should not be used for allocations of TBAs to specific pools subsequent to initial recording in Schedule D, Part 3 or other situations such as CUSIP number changes.

Bonds, preferred stocks and common stocks are to be grouped separately, showing subtotals for each category. Bonds should be grouped and arranged alphabetically as described in the instructions for Schedule D, Part 1. (Securities included in U.S. States, Territories and Possessions; U.S. Political Subdivisions of States, Territories and Possessions; and U.S. Special Revenue and Special Assessment Obligations and all Non-Guaranteed Obligations of Agencies and Authorities of Governments and Their Political Subdivisions should be listed with a state abbreviation in the column provided for electronic data capture).

Bond Mutual Funds – as Identified by the SVO and Exchange Traded Funds – as Identified by the SVO that are described in the Investment Schedules General Instructions are to be included in SVO Identified Funds.

If a reporting entity has any detail lines reported for any of the following required categories or subcategories, it shall report the subtotal amount of the corresponding category or subcategory with the specified subtotal line number appearing in the same manner and location as the pre-printed total or grand total line number:

Column 1 – Description

Give a complete and accurate description of all bonds including identifying the kind of investment vehicle if other than short-term bond. Identify repos in Column 1; and for "repos," show the repurchase date. For collateral loans, the type of securities held and fair value of the securities should be included in the description.

Column 2 – Code

Enter "*" in this column for all SVO Identified Funds designated for systematic value.

Enter "@" in this column for all Principal STRIP Bonds or other zero coupon bonds.

Enter "^" in this column for all assets that are bifurcated between the insulated separate account filing and the non-insulated separate account filing.

If short-term investments are not under the exclusive control of the company as shown in the General Interrogatories, they are to be identified by placing one of the codes **identified in the Investment Schedules General Instructions** in this column.

If the security is an SVO Identified Fund designated for systematic value or Principal STRIP bond or other zero coupon bond and is not under the exclusive control of the company, the "*" or "@" should appear first immediately followed by the appropriate code (**identified in the Investment Schedules General Instructions**).

Separate Account Filing Only:

If the asset is a bifurcated asset between the insulated separate account filing and the non-insulated separate account filing, the "^" should appear first and may be used simultaneously with the "*" or "@"with the "^" preceding the "*" or "@"depending on the asset being reported, immediately followed by the appropriate code (**identified in the Investment Schedules General Instructions**)

Column 3 – Foreign

Insert the appropriate code in the column based on the **matrix provided in the Investment Schedules General Instructions**.

Column 4 – Date Acquired

For public placements, use trade date not settlement date. For private placements, use funding date. Reporting entities may total on one line each issue of bonds or stocks acquired at public offerings on more than one date and insert the date of last acquisition.

Column 5 – Name of Vendor

Reporting entities may total on one line purchases of various issues of the same issuer of short-term investments and insert the word "various."

Column 6 – Maturity Date

Reporting entities may total on one line purchases of various issues of the same issuer of short-term investments and insert the appropriate maturity date.

Column 7 – Book/Adjusted Carrying Value

Securities excluding SVO Identified fund and mandatory convertible bonds:

This should be the amortized value or the lower of amortized value or fair value, as appropriate (and adjusted for any other-than-temporary impairment), as of the end of the current reporting year.

Include: The original cost of acquiring the investment, including brokerage and other related fees.

Amortization of premium or accrual of discount, but not including any accrued interest or dividends paid thereon.

Amortization of deferred origination and commitment fees.

Deduct: A direct write-down for a decline in the fair value that is other-than-temporary.

Exclude: All other costs, including internal costs or costs paid to an affiliated reporting entity related to origination, purchase or commitment to purchase, are charged to expense when incurred. Cost should also be reduced by payments attributed to the recovery of cost.

Accrued interest or dividends.

Mandatory Convertible Bonds:

The amount should be the lower of amortized cost or fair value during the period prior to conversion.

SVO Identified Funds:

The amount should be fair value unless the reporting entity has designated a qualifying security for systematic value. The election of using systematic value is irrevocable.

NOTE: **Use of systematic value is effective Dec. 31, 2017.** This effective date requires entities to either report SVO-Identified investments at fair value on the effective date, or to identify the SVO-Identified investments with a code to identify use of systematic value. If the investment is coded for systematic value, the investment will be reported in the 2017 annual financial statements using the measurement method utilized throughout 2017. For these investments, beginning Jan. 1, 2018, the reporting entity shall report the investment using the calculated systematic value method detailed in *SSAP No. 26R—Bonds*.

Not for Distribution

The amount reported in this column should equal:

	Actual Cost
plus	Unrealized Valuation Increase (Decrease)Total in Book/Adjusted Carrying Value
plus	Current Year's (Amortization)/Accretion
minus	Current Year's Other-Than-Temporary Impairment Recognized
plus	Total Foreign Exchange Change in Book/Adjusted Carrying Value
plus	Changes due to acquisitions or disposals.

Column 8 – Unrealized Valuation Increase (Decrease)

The total unrealized valuation increase (decrease) for a specific security will be the change in Book/Adjusted Carrying Value that is due to carrying or having carried (in the previous year) the security at Fair Value.

Include For SVO-identified funds, the change from the prior reported BACV to fair value/net asset value. If an SVO-identified fund no longer qualifies for systematic value, the difference from systematic value in prior year to fair value/net asset value in current year.

These amounts are to be reported as unrealized capital gains (losses) in the Exhibit of Capital Gains (Losses) and in the Capital and Surplus Account.

Column 9 – Current Year's (Amortization)/Accretion

This amount should equal the current reporting year's amortization of premium or accrual of discount (regardless of whether the security is currently carried at Amortized Cost). The accrual of discount amounts in this column are to be reported as increases to investment income in the Exhibit of Net Investment Income, while the amortization of premium amounts are to be reported as decreases to investment income.

Include The (Amortization)/Accretion of SVO Identified Funds designated for reporting at systematic value.

Column 10 – Current Year's Other-Than-Temporary Impairment Recognized

If the security has suffered an other-than-temporary impairment, this column should contain the amount of the direct write-down recognized. The amounts in this column are to be reported as realized capital losses in the Exhibit of Capital Gains (Losses) and in the calculation of Net Income.

Column 11 – Total Foreign Exchange Change in Book/Adjusted Carrying Value

This is a positive or negative amount that is defined as the portion of the total change in Book/Adjusted Carrying Value for the year that is attributable to foreign exchange differences for a particular security. The amounts reported in this column should be included as net unrealized foreign exchange capital gain (loss) in the Capital and Surplus Account.

Column 12 – Par Value

Enter the par value of the bonds owned adjusted for repayment of principal. For mortgage-backed/loan-backed and structured securities, enter the par amount of principal to which the company has claim. For interest-only bonds without a principal amount on which the company has a claim, use a zero value. Enter the statement date par value for bonds with adjustable principal. An interest-only bond with a small par amount of principal would use that amount.

Not for Distribution

Column 13 – Actual Cost

Include: Cost of acquiring the issue, including brokers' commission and incidental expenses of effecting delivery.

Exclude: Accrued interest.

For a bond received as a property dividend or capital contribution enter the initial recognized value. See *SSAP No. 26R—Bonds* for guidance.

Column 15 – Nonadmitted Interest Due & Accrued

This should equal the nonadmitted amount of due and accrued interest for a specific security, based upon the assessment of collectibility required by *SSAP No. 34—Investment Income Due and Accrued* and any other requirements for nonadmitting investment income due and accrued.

Column 16 – Rate of Interest

Show rate of interest as stated on the face of the issue. Where the original stated rate has been renegotiated, show the latest modified rate. Short-term bonds with various issues of the same issuer use the last rate of interest. All information reported in this field must be a numeric value.

For Principal STRIP Bonds or other zero coupon bonds, enter numeric zero (0).

Column 17 – Effective Rate of Interest

Short-term bonds with various issues of the same issuer use the weighted average effective yield to maturity. The Effective Yield calculation should be modified for other-than-temporary impairments recognized. All information reported in this field must be a numeric value.

Column 18 – Interest – When Paid

Insert initial letters of months in which interest is payable. For securities that pay interest annually, provide the first three letters of the month in which the interest is paid (e.g., JUN for June). For securities that pay interest semi-annually or quarterly, provide the first letter of each month in which interest is received (e.g., JD for June and December, and MJSD for March, June, September and December). For securities that pay interest on a monthly basis, include "MON" for monthly. Finally, for securities that pay interest at maturity, include "MAT" for maturity.

For Principal STRIP Bonds or other zero coupon bonds, enter N/A.

Column 19 – Interest – Amount Received During Year

Include: The proportionate share of investment income directly related to the securities reported in this schedule.

Report amounts net of foreign withholding tax.

**** Column 21 will be electronic only. ****

Column 21 – Legal Entity Identifier (LEI)

SCHEDULE DB

DERIVATIVE INSTRUMENTS

All derivatives, regardless of maturity date, are to be reported on Schedule DB. Forward commitments where a reporting entity cannot determine at the inception of the contract, with certainty, if delivery will be made at the earliest opportunity are essentially forward contracts and should be reported on Schedule DB.

This schedule should be used to report derivative instruments. Specific accounting procedures for each derivative instrument will depend on the definition below and documented intent that best describes the instrument. Uses of derivative instruments that are reported in this schedule include hedging, income generation, replication and other. State investment laws and regulations should be consulted for applicable limitations and permissibility on the use of derivative instruments. If the derivative strategy meets the definition of hedging as outlined in *SSAP No. 86—Derivatives*, then the underlying derivative transactions composing that strategy should be reported in that category of Schedule DB. If the underlying derivative strategy does not meet the definition of hedging as per *SSAP No. 86—Derivatives*, then the underlying derivative transactions composing that strategy should be reported as either hedging other, replication, income generation or other.

DEFINITIONS OF DERIVATIVE INSTRUMENTS

A hedge transaction is "Anticipatory" if it relates to:

a. A firm commitment to purchase assets or incur liabilities;

b. An expectation (but not obligation) to purchase assets or incur liabilities in the normal course of business.

"Underlying Interest" means the asset(s), liability(ies) or other interest(s) underlying a derivative instrument, including, but not limited to, any one or more securities, currencies, rates, indices, commodities, derivative instruments, or other financial market instruments.

"Option" means an agreement giving the buyer the right to buy or receive, sell or deliver, enter into, extend or terminate, or effect a cash settlement based on the actual or expected price, level, performance or value of one or more Underlying Interests.

"Warrant" means an agreement that gives the holder the right to purchase an underlying financial instrument at a given price and time or at a series of prices and times according to a schedule or warrant agreement.

"Cap" means an agreement obligating the seller to make payments to the buyer, each payment under which is based on the amount, if any, that a reference price, level, performance or value of one or more Underlying Interests exceed a predetermined number, sometimes called the strike/cap rate or price.

"Floor" means an agreement obligating the seller to make payments to the buyer, each payment under which is based on the amount, if any, that a predetermined number, sometimes called the strike/floor rate or price exceeds a reference price, level, performance or value of one or more Underlying Interests.

"Collar" means an agreement to receive payments as the buyer of an Option, Cap or Floor and to make payments as the seller of a different Option, Cap or Floor.

"Swap" means an agreement to exchange or net payments at one or more times based on the actual or expected price, level, performance or value of one or more Underlying Interests or upon the probability occurrence of a specified credit or other event.

Not for Distribution

"Forward" means an agreement (other than a Future) to make or take delivery of, or effect a cash settlement based on, the actual or expected price, level, performance or value of one or more Underlying Interests.

"Future" means an agreement traded on an exchange, Board of Trade or contract market to make or take delivery of, or effect a cash settlement based on, the actual or expected price, level, performance or value one or more Underlying Interests.

"Option Premium" means the consideration paid (received) for the purchase (sale) of an Option.

"Financing Premium" means that the premium cost to acquire or enter into the derivative is paid at the end of the derivative contract or throughout the derivative contract.

"Swaption" means an agreement granting the owner the right, but not the obligation, to enter into an underlying swap.

"Margin Deposit" means a deposit that a reporting entity is required to maintain with a broker with respect to the Futures Contracts purchased or sold.

DEFINITION OF NOTIONAL AMOUNT

The definition below is intended to be a principle for determining notional for all derivative instruments. To the extent a derivative type is not explicitly addressed in a through c, notional should be reported in a manner consistent with this principle.

"Notional amount" is defined as the face value of a financial instrument in a derivatives transaction as of a reporting date, which is used to calculate future payments in the reporting currency. Notional amount may also be referred to as notional value or notional principal amount. The notional amount reported should remain static over the life of a trade unless the instrument is partially unwound or has a contractually amortizing notional. The notional amount shall apply to derivative transactions as follows:

a. For derivative instruments other than futures contracts (e.g., options, swaps, forwards), the notional amount is either the amount to which interest rates are applied in order to calculate periodic payment obligations or the amount of the contract value used to determine the cash obligations. Non-U.S. dollar contracts must be multiplied or divided by the appropriate inception foreign currency rate.

b. For futures contracts, with a U.S. dollar-denominated contract size (e.g., Treasury note and bond contracts, Eurodollar futures) or underlying, the notional amount is the number of contracts at the reporting date multiplied by the contract size (value of one point multiplied by par value).

c. For equity index and similar futures, the number of contracts at the reporting date is multiplied by the value of one point multiplied by the transaction price. Non-U.S. dollar contract prices must be multiplied or divided by the appropriate inception foreign currency rate.

GENERAL INSTRUCTIONS FOR SCHEDULE DB

Each derivative instrument should be reported in Parts A, B or C according to the nature of the instrument, as follows:

Part A: Positions in Options,* Caps, Floors, Collars, Swaps, and Forwards**

Part B: Positions in Futures Contracts

Part C: Positions in Replication (Synthetic Asset) Transaction

* Warrants acquired in conjunction with public or private debt or equity that are more appropriately reported in other schedules do not have to be reported in Schedule DB.

** Forward commitments that are not derivative instruments (for example, the commitment to purchase a GNMA security two months after the commitment date or a private placement six months after the commitment date) should be disclosed in the Notes to Financial Statements, rather than on Schedule DB.

All derivatives, regardless of maturity date, are to be reported on Schedule DB. Forward commitments where the reporting entity cannot determine at the inception of the contract, with certainty, if delivery will be made at the earliest opportunity are essentially forward contracts and should be reported on Schedule DB.

The reporting entity may be required to demonstrate the intended hedging characteristics under state statute in order to report in this derivative "Hedge Other" category.

The fair value is the value at which the instrument(s) could be exchanged in a current transaction. Amortized or book/adjusted carrying values should not be substituted for fair value. Public market quotes are the best indication of fair value. The reporting entity should document the determination of fair value.

Part D should be used to report the counterparty exposure (i.e., the exposure to credit risk on derivative instruments) to each counterparty (or guarantor, as appropriate).

Derivatives shall be shown gross when reported in the Schedule DB. If these transactions are permitted to be reported net in accordance with *SSAP No. 64—Offsetting and Netting of Assets and Liabilities*, the investment schedule shall continue to provide detail of all transactions (gross), with the net amount from the valid right to offset reflected in the financial statements (pages 2 & 3 of the statutory financial statements). Disclosures for items reported net when a valid right to offset exists, including the gross amount, the amount offset, and the net amount reported in the financial statements are required per *SSAP No. 64—Offsetting and Netting of Assets and Liabilities*.

Column 10 – Strike Price, Rate or Index Received (Paid)

Show the strike price, rate or index for which payments are received (paid), or an option could be exercised or which would trigger a cash payment to (by) the reporting entity on a derivative.

Forward exchange rate must be stated as: Fx Currency per US$ (Fx/US$).

For credit derivatives, state "credit event" when the payment is triggered by a standard International Swaps and Derivatives Association (ISDA) defined credit event.

Describe non-standard credit event in footnotes to the annual statement.

For example, for a credit default swap sold at 0.50% per annum, show "0.50 / (credit event)," or for an interest swap with 4.5% received, LIBOR + 0.50% paid, show "4.50 / (L+0.50)."

Insert @ in this column if the income/expenses is combined with income/expenses on assets or liabilities hedged.

Insert ^ in this column if the derivative has unpaid financing premiums.

Not for Distribution

For Clearly Defined Hedging Strategy (CDHS) instruments applying the provisions of SSAP No. 108:

Insert $ in this column for derivatives held in a SSAP No. 108 CDHS throughout the current reporting period (or since inception if shorter).

Insert & in this column for derivatives repurposed from a SSAP No. 108 CDHS to SSAP No. 86 during the current reporting period.

Insert ! in this column for derivatives previously held that were designated from SSAP No. 86 to a SSAP No. 108 CDHS during the current reporting period.

Insert ~ in this column for CDHS hedging instruments removed as the variable annuities derivative program was terminated.

Column 16 – Fair Value

See the Glossary of the NAIC *Accounting Practices and Procedures Manual* for a definition of fair value. For purposes of this column, fair value can be obtained from any one of these sources:

a. A pricing service.

b. An exchange.

c. Broker or custodian quote.

d. Determined by the reporting entity.

Column 17 – Unrealized Valuation Increase/(Decrease)

For purposes of this schedule, **increase** should be reported when the change results in an increase to the asset or a decrease to the liability. A **decrease** should be reported when the change results in a decrease to the asset or an increase to the liability.

The total unrealized valuation increase/(decrease) for a specific derivative will be the change in Book/Adjusted Carrying Value that is due to carrying or having carried (in the previous year) the derivative at Fair Value.

These amounts are to be reported as unrealized capital gains/(losses) in the Exhibit of Capital Gains/(Losses) and in the Capital and Surplus Account. For SSAP No. 108 Derivatives, the entire change in fair value shall be initially reported as an unrealized change, with adjustments shown to represent the amounts removed from unrealized and recognized as realized or deferred assets/liabilities under the provisions of SSAP No. 108. The Column 17 summary Total (i.e. Line 1759999999) should reflect only unrealized gains or losses remaining after the Total Adjustments for SSAP No. 108 Derivatives.

Column 18 – Total Foreign Exchange Change in Book/Adjusted Carrying Value

This is a positive or negative amount that is defined as the portion of the total change in Book/Adjusted Carrying Value for the year that is attributable to foreign exchange differences for a particular derivative.

The amounts reported in this column should be included as net unrealized foreign exchange capital gain/(loss) in the Capital and Surplus Account.

For purposes of this schedule, **positive amounts** should be reported when the change results in an increase to the asset or a decrease to the liability. A **negative amount** should be reported when the change results in a decrease to the asset or an increase to the liability.

Not for Distribution

Column 19 – Current Year's (Amortization)/Accretion

For purposes of this schedule, **positive amounts** should be reported when the change results in an increase to the asset or a decrease to the liability. A **negative amount** should be reported when the change results in a decrease to the asset or an increase to the liability.

Column 20 – Adjustment to the Carrying Value of Hedged Item

This represents the amortized book/adjusted carrying value used to adjust the basis of the hedged item(s) during the current year.

Column 21 – Potential Exposure

Potential Exposure is a statistically derived measure of the potential increase in derivative instrument risk exposure, for derivative instruments that generally do not have an initial cost paid or consideration received, resulting from future fluctuations in the underlying interests upon which derivative instruments are based.

For collars, swaps other than credit default swaps and forwards, the Potential Exposure = 0.5% x "Notional Amount" x Square Root of (Remaining Years to Maturity).

For credit default swaps, enter the larger of notional amount or maximum potential payment.

For purchased credit default swaps bought for protection, the amount reported will be zero.

If the maximum potential exposure cannot be determined, enter zero and explain in the Notes to Financial Statement.

Disclose in the footnotes to the annual statement any assets, held either as collateral or by third parties that the reporting entity can obtain and liquidate to recover all or a portion of the amounts paid under the derivative.

Column 22 – Credit Quality of Reference Entity

Only applies to credit default swaps (for other derivatives, leave blank)

Disclose:

- NAIC designation of the reference entity; or, if not available, then
- NAIC designation equivalent of the reference entity, if it is CRP rated; or, if not available, then
- The reporting entity's own credit assessment translated into an NAIC designation equivalent with a "*" to indicate that the designation is based on the reporting entity's own internal evaluation of the reference entity's creditworthiness.

For first loss type of basket credit default swaps, use the lowest designation in the basket.

For other types of baskets, or other structures, determine a designation that fairly represents the likelihood of credit losses.

Not for Distribution

Column 23 – Hedge Effectiveness at Inception and at Year-end

For hedge transactions show as a percentage expressed as (XX / YY), where "XX" shows the hedge effectiveness percentage at inception and "YY" shows the hedge effectiveness percentage on December 31 of the current year.

For example, 100.45% hedge effectiveness at inception and 94.90% hedge effectiveness on December 31 of the current year is reported as "100 / 95."

Round to the nearest whole percentage. Do not use decimals.

When hedge effectiveness cannot be calculated, enter a reference code number in this column (e.g., 0001, 0002, etc.) then disclose the financial or economic impact of the hedge at the end of the reporting period in Schedule DB footnotes for each reference code number used in the schedule.

A reference code number may be used multiple times in this column to indicate the same explanation.

For example:

0001 Reduces bond portfolio duration by .2 years.

0002 Instrument was repurposed from SSAP No. 108; CDHS #001; hedged interest rate risks of assets.

0003 Instrument in CDHS #001 Rider Claims Less Rider Fees in VA Contracts – 50% of Rho SSAP 108 hedge 100% Effective.

a) Fair Value Hedges:

How much of the change in value of the hedged item(s) was hedged by the change in value of the derivative, both:

- At the inception of the derivative transaction.
- On December 31st end of the current year.

b) Cash Flow Hedges:

How much of the change in cash flows or present value of cash flows of the hedged item(s) was hedged by the change in cash flows or present value of cash flows of the derivative, both:

- At the inception of the derivative transaction, and
- At the end of the current year.

**** Columns 24 through 32 will be electronic only. ****

Column 24 – Fair Value Hierarchy Level and Method Used to Obtain Fair Value Code

Whenever possible, fair value should represent the amount of money the reporting entity would receive (pay) in order to close the derivative position at the market price. Fair value should only be determined analytically when the market price-based value cannot be obtained.

The following is a listing of valid fair value level indicators to show the fair value hierarchy level.

"1" for Level 1

"2" for Level 2

"3" for Level 3

The following is a listing of the valid method indicators for derivatives to show the method used by the reporting entity to determine the Fair Value.

"a" For derivatives where the fair value is determined by a pricing service.

"b" For derivatives where the fair value is determined by a stock exchange.

"c" For derivatives where the fair value is determined by a broker or the reporting entity's custodian. To use this method 1) the broker must be approved by the reporting entity as a derivative counterparty; and 2) the reporting entity shall obtain and retain the pricing policy of the broker or custodian that provided the quotations.

"d" For derivatives where the fair value is determined by the reporting entity. The reporting entity is required to maintain a record of the pricing methodology used.

Enter a combination of hierarchy and method indicator. The fair value hierarchy level indicator would be listed first and the method used to determine fair value indicator would be listed next. For example, use "1b" to report Level 1 for the fair value hierarchy level and stock exchange for the method used to determine fair value.

Column 25 – Source Used to Obtain Fair Value

For Method Code "a," identify the specific pricing service used.

For Method Code "b," identify the specific stock exchange used.

The listing of most **stock exchange codes can be found in the Investment Schedules General Instructions or the following Web site**:

www.fixprotocol.org/specifications/exchanges.shtml

For Method Code "c," identify the specific broker or custodian used.

For Method Code "d," leave blank.

Column 26 – Method of Clearing (C or U)

Indicate whether derivative transaction is cleared through a central clearinghouse with a "C" or not cleared through a centralized clearinghouse with a "U."

Not for Distribution

Column 27 – Legal Entity Identifier (LEI)

Provide the 20-character Legal Entity Identifier (LEI) for any counterparty as assigned by a designated Local Operating Unit. If no LEI number has been assigned, leave blank.

****Columns 28 through 32 are for derivatives with financing premiums****

Column 28 – Total Undiscounted Premium Cost

Report the total, undiscounted (contractual) cost to acquire/enter into the derivative.

Column 29 – Unpaid Undiscounted Premium Cost

Report the undiscounted (contractual) cost to acquire/enter into the derivative unpaid by the reporting entity.

Column 30 – Fair Value of Derivative, Excluding Impact of Financing Premiums

Reflect the fair value of the derivative adjusted to exclude the impact of discounted future settled premiums. For example, if the fair value of the derivative reported in Column 16 has been reduced due to expected cash outflows representing the reporting entity's future payment of financing premiums, the consideration of those future premium cash outflows shall be removed from the reported fair value of the derivative captured in this column.

(At acquisition, a derivative may be reported with a net zero fair value in Column 16 as the value of the derivative and the net present value of future financing premiums owed from the acquisition of the derivative may offset. The fair value reported in Column 30 shall reflect the fair value of the derivative without an offset for the future financing premiums.)

Column 31 – Unrealized Valuation Increase/Decrease, Excluding Impact of Financing Premiums

Reflect the unrealized gain or unrealized loss reported for the derivative adjusted to exclude the impact from discounted future settled premiums. For example, if the valuation increase/valuation decrease reported in Column 17 includes "losses" to recognize the net present value of the financing cost owed by the reporting entity, those "losses" shall be removed from the unrealized valuation increase/decrease reflected in this column.

Column 32 – CDHS Identifier

Provide a unique identifier for each Clearly Defined Hedging Strategy (CDHS) applying the provisions of SSAP No. 108 reported on this schedule (e.g., 001, 002, etc.). This identifier will also be used for reporting of the CDHS in Column 1 of Schedule DB, Part E.

This column should only be used for the following line numbers:

Column 20 – Potential Exposure

Potential Exposure is a statistically derived measure of the potential increase in derivative instrument risk exposure, for derivative instruments that generally do not have an initial cost paid or consideration received, resulting from future fluctuations in the underlying interests upon which derivative instruments are based.

For futures, the Potential Exposure = (Initial Margin per contract on the valuation date, set by the exchange on which contract trades) x (the number of contracts open on the valuation date).

Column 21 – Hedge Effectiveness at Inception and at Year-end

For hedge transactions show, as a percentage expressed as (XX / YY), where "XX" shows the hedge effectiveness percentage at inception and "YY" shows the hedge effectiveness percentage at reporting date.

For example, 100.45% hedge effectiveness at inception and 94.90% hedge effectiveness on December 31 of the current year is reported as "100 / 95."

Round to the nearest whole percentage. Do not use decimals.

When hedge effectiveness cannot be calculated, enter a reference code number in this column (e.g., 0001, 0002, etc.) then disclose the financial or economic impact of the hedge at the end of the reporting period in Schedule DB footnotes for each reference code number used in the schedule.

A reference code number may be used multiple times in this column to indicate the same explanation.

For example:
0001 Reduces bond portfolio duration by .2 years.

0002 Instrument was repurposed from SSAP No. 108; CDHS #001; hedged interest rate risk of assets.

0003 Instrument is CDHS #001 Rider Claims Less Rider Fees in VA Contracts – 50% of Rider SSAP 108 hedge; 100% Effective.

Column 23 – Fair Value Hierarchy Level and Method Used to Obtain Fair Value Code

Whenever possible, fair value should represent the price at which the security could be sold, based on market information. Fair value should only be determined analytically when the market-based value cannot be obtained.

The following is a listing of valid fair value level indicators to show the fair value hierarchy level.

"1" for Level 1

"2" for Level 2

"3" for Level 3

The following is a listing of the valid method indicators for derivatives to show the method used by the reporting entity to determine the Rate Used to Obtain Fair Value.

"a" for securities where the rate is determined by a pricing service.

"b" for securities where the rate is determined by a stock exchange.

"c" for securities where the rate is determined by a broker or custodian. The reporting entity should obtain and maintain the pricing policy for any broker or custodian used as a pricing source. In addition, the broker must either be approved by the reporting entity as a counterparty for buying and selling securities or be an underwriter of the security being valued.

"d" for securities where the rate is determined by the reporting entity. The reporting entity is required to maintain a record of the pricing methodology used.

Enter a combination of hierarchy and method indicator. The fair value hierarchy level indicator would be listed first and the method used to determine fair value indicator would be listed next. For example, use "1b" to report Level 1 for the fair value hierarchy level and stock exchange for the method used to determine fair value.

Column 24 – Source Used to Obtain Fair Value

For Method Code "a," identify the specific pricing service used.

For Method Code "b," identify the specific stock exchange used.

The listing of most **stock exchange codes can be found in the Investment Schedules General Instructions or the following Web address**:

For Method Code "c," identify the specific broker or custodian used.

For Method Code "d," leave blank.

Report the undiscounted (contractual) cost to acquire/enter into the derivative unpaid by the reporting entity.

Column 28 – Fair Value of Derivative, Excluding Impact of Financing Premiums

Reflect the fair value of the derivative adjusted to exclude the impact of discounted future settled premiums. For example, if the fair value of the derivative reported in Column 16 has been reduced due to expected cash outflows representing the reporting entity's future payment of financing premiums, the consideration of those future premium cash outflows shall be removed from the reported fair value of the derivative captured in this column.

(At acquisition, a derivative may be reported with a net zero fair value in Column 16 as the value of the derivative and the net present value of future financing premiums owed from the acquisition of the derivative may offset. The fair value reported in Column 28 shall reflect the fair value of the derivative without an offset for the future financing premiums.)

Column 29 – Unrealized Valuation Increase/Decrease, Excluding Impact of Financing Premiums

Reflect the unrealized gain or unrealized loss reported for the derivative adjusted to exclude the impact from discounted future settled premiums. For example, if the valuation increase/valuation decrease reported in Column 17 includes "losses" to recognize the net present value of the financing cost owed by the reporting entity, those "losses" shall be removed from the unrealized valuation increase/decrease reflected in this column.

Column 30 – CDHS Identifier

Provide a unique identifier for each Clearly Defined Hedging Strategy (CDHS) applying the provisions of SSAP No. 108 reported on this schedule (e.g., 001, 002, etc.). This identifier will also be used for reporting of the CDHS in Column 1 of Schedule DB, Part E.

SCHEDULE DB – PART D – SECTION 1

COUNTERPARTY EXPOSURE FOR DERIVATIVE INSTRUMENTS OPEN DECEMBER 31 OF CURRENT YEAR

Counterparty Exposure to any one counterparty is the exposure to credit risk associated with the use of derivative instruments with that counterparty. This section displays the Book/Adjusted Carrying Value exposure and Fair Value exposure to each counterparty, net of collateral. Also displayed is the total potential exposure for each counterparty for Schedule DB, Parts A and B.

On the first line, show the aggregate sum for exchange traded derivatives, also known as listed derivatives or futures (Line 0199999999). (Exchange-Traded Derivatives are executed over a centralized trading venue known as an exchange and then booked with a central counterparty known as a clearing house.)

On the next six lines, show separately six groups of OTC (over-the-counter) derivative counterparties by NAIC Designation (Lines 0299999999 through 0799999999).

Then show the aggregate sum for centrally cleared derivatives (Line 0899999999). This line is used to show centrally cleared derivatives that are not considered exchange-traded.

The final line will show a total of all derivatives listed in the lines above (Line 0999999999).

Within each group, list the counterparties or central clearinghouses in alphabetical order.

For each counterparty with a master agreement, show on a second line, if applicable, totals for derivative instruments not covered by the master agreement.

Use additional lines, as needed, if multiple master agreements with the counterparty exist that do not provide for netting of offsetting amounts by the reporting entity against the counterparty upon termination in the event that the counterparty defaults.

Show subtotals for each group.

If a reporting entity has any detail lines reported for any of the following required groups, it shall report the subtotal amount of the corresponding group with the specified subtotal line number appearing in the same manner and location as the pre-printed total.

Include the name and the LEI of the central clearinghouse and the derivatives clearing member, where appropriate.

Column 2 – Master Agreement (Y or N)

The lines for the Aggregate Sum of Exchange-Traded Derivatives (Line 0199999999) and for the Aggregate Sum of Central Clearinghouses (Line 0899999999) should be left blank.

For OTC counterparties, indicate "Y" if:

1. The reporting entity has a written International Swaps and Derivatives Association (ISDA) master agreement with the counterparty that provides for the netting of offsetting amounts by the reporting entity against the counterparty upon termination in the event that the counterparty defaults, or if such netting provisions of an ISDA master agreement are either incorporated by reference in transaction confirmations or are otherwise contractual provisions to which derivative instrument confirmations with the counterparty are subject, or if the reporting entity has a written non-ISDA master agreement with the counterparty that provides for the netting of offsetting amounts or the right of offset by the reporting entity against the counterparty upon termination in the event that the counterparty defaults; and

2. The domiciliary jurisdiction of such counterparty is either within the United States or if not within the United States, is within a foreign (non-United States) jurisdiction listed in the *Purposes and Procedures Manual of the NAIC Investment Analysis Office* as eligible for netting.

Column 3 – Credit Support Annex (Y or N)

The lines for the Aggregate Sum of Exchange-Traded Derivatives (Line 0199999999) and for the Aggregate Sum of Central Clearinghouses (Line 0899999999) should be left blank.

For OTC counterparties, indicate "Y" if:

The reporting entity has an additional annex to the International Swaps and Derivatives Association (ISDA) master agreement called a Credit Support Annex (CSA). The CSA agreement with the counterparty provides functionality of collateral postings against net counterparty exposure in excess of a threshold amount. This limits the net exposure the reporting entity has to a derivative counterparty in the event of a counterparty default.

Column 4 – Fair Value of Acceptable Collateral

Leave blank for the aggregate reporting of Exchange-Traded Derivatives (Line 0199999999).

For OTC counterparties, show the Fair Value of acceptable collateral pledged by the counterparty.

For central clearinghouses, this amount would be the net positive variation margin received by the reporting entity.

Not for Distribution

"Acceptable collateral" means cash, cash equivalents, securities issued or guaranteed by the United States or Canadian governments or their government-sponsored enterprises, letters of credit, publicly traded obligations designated 1 by the SVO, government money market mutual funds, and such other items as may be defined as acceptable collateral in the *Purposes and Procedures Manual of the NAIC Investment Analysis Office*. For purposes of this definition, the term "letter of credit" means a clean, irrevocable and unconditional letter of credit issued or confirmed by, and payable and presentable at, a financial institution on the list of financial institutions meeting the standards for issuing such letter of credit published pursuant to the *Purposes and Procedures Manual of the NAIC Investment Analysis Office*. The letter of credit must have an expiration date beyond the term of the subject transaction.

For Columns 5 and 6, Book/Adjusted Carrying Values that are debit balances on the balance sheet are positive numbers; those that are credit balances are negative numbers.

Column 5 – Contracts with Book/Adjusted Carrying Value > 0 (i.e., debit balance on balance sheet)

On the first line, show the aggregate sum for exchange traded derivatives that have a positive Book/Adjusted Carrying Value.

For futures, this equals the sum of the positive cumulative variation margin for highly effective futures (Part B, Section 1, Column 15), plus the sum of the ending balance of all cash deposits with brokers (Part B, Section 1, Broker Name/Net Cash Deposits Footnote, Ending Cash Balance).

On subsequent lines, show the sum of the Book/Adjusted Carrying Values of all derivative instruments with the counterparty or central clearinghouse that have a positive statement value.

Column 6 – Contracts with Book/Adjusted Carrying Value < 0 (i.e., credit balance on balance sheet)

On the first line, show the sum of the statement values in parentheses ( ) of all exchange traded derivatives that have a negative Book/Adjusted Carrying Value.

For futures, this equals the sum of the negative cumulative variation margin for highly effective futures (Part B, Section 1, Column 15).

On subsequent lines, show the sum of the Book/Adjusted Carrying Values in parentheses ( ) of all derivative instruments with the counterparty or central clearinghouse that have a negative Book/Adjusted Carrying Value.

Column 7 – Exposure Net of Collateral (Book/Adjusted Carrying Value)

For the aggregate reporting of Exchange-Traded Derivatives (Line 0199999999), show the amount in Column 5.

For OTC counterparties, if no master agreement is in place, show the sum of the Book/Adjusted Carrying Values of all derivative instruments with the counterparty that has a positive Book/Adjusted Carrying Value, less any Acceptable Collateral (Column 5 – Column 4).

For OTC counterparties with a master agreement in place and central clearinghouses, show the net sum of the Book/Adjusted Carrying Values of all derivative instruments, less any acceptable collateral (Column 5 + Column 6 – Column 4).

This amount should not be less than zero.

Not for Distribution

For Columns 8 and 9, market values that would be debit balances on the balance sheet are positive numbers; those that would be credit balances are negative numbers.

Column 8 – Contracts with Fair Value > 0 (i.e., debit balance on the balance sheet)

Show the sum of the market values of all derivative instruments that have a positive market value.

Column 9 – Contracts with Fair Value < 0 (i.e., credit balance on the balance sheet)

Show the sum of the market values in parentheses ( ) of all derivative instruments that have a negative market value.

Column 10 – Exposure Net of Collateral (Fair Value)

For the aggregate reporting of Exchange-Traded Derivatives (Line 0199999999), show the amounts in Column 8.

For OTC counterparties, if no master agreement is in place, show the sum of the market values of all derivative instruments with the counterparty that has a positive market value, less any acceptable collateral (Column 8 – Column 4).

For OTC counterparties with a master agreement in place, exchange-traded derivatives and central clearinghouses show the net sum of the market values of all derivative instruments, less any acceptable collateral (Column 8 + Column 9 – Column 4).

This amount should not be less than zero.

Column 11 – Potential Exposure

Show the potential exposure for Parts A and B for Exchange-Traded Derivatives in aggregate (Line 0199999999) and for each OTC counterparty and central clearinghouse.

Column 12 – Off–Balance Sheet Exposure

For Exchange-Traded Derivatives (Line 0199999999), show Column 11.

For central clearinghouses:

Show [Column 5 + Column 6 – Column 4 + Column 11] – Column 7 but not less than zero.

For OTC counterparties:

If Column 2 = yes; show [Column 5 + Column 6 – Column 4 + Column 11] – Column 7 but not less than zero.

If Column 2 = no; show Column 11.

Optional: If there is no master netting agreement, companies may still encounter double-counting in cases where a premium is received for an off-balance sheet derivative transaction, such as an interest rate swap. In such cases, report "no" in Column 2 and calculate off-balance sheet exposure on a contract-by-contract basis using the first formula.

SCHEDULE DL – PART 1

SECURITIES LENDING COLLATERAL ASSETS

Reinvested Collateral Assets Owned December 31 Current Year
(Securities lending collateral assets reported in aggregate on Line 10 of the asset page
and not included on Schedules A, B, BA, D, DB and E.)

This schedule should include a detailed listing of reinvested collateral assets that were owned as of the end of the current reporting year. For Schedule DL, reinvested collateral assets are collateral currently held as part of a securities lending program administered by the reporting entity or its agent (affiliated or unaffiliated) that can be resold or repledged. This is the **currently held collateral**, meaning original collateral if it is still in the original form received or the new invested asset resulting from the disposal and/or reinvestment of the original collateral. See *SSAP No. 103R—Transfers and Servicing of Financial Assets and Extinguishments of Liabilities* for accounting guidance.

Include reinvested collateral assets from securities lending programs where the program is administered by the reporting entity's unaffiliated agent (i.e., collateral is received by the reporting entity's unaffiliated agent that can be resold or repledged). These securities will be reported in aggregate on the Assets page, Line 10.

For reinvested collateral assets from securities lending programs where the program is administered by the reporting entity's affiliated agent (i.e., collateral is received by the reporting entity's affiliated agent that can be resold or repledged), the securities may be reported on Schedule DL, Part 1 if reported in aggregate on the Assets page, Line 10 or reported on Schedule DL, Part 2 if reported in other investment schedules (e.g., Schedules A, B, BA, D, DA and E), but not both.

Reinvested collateral assets reported on Schedule DL, Part 1 are excluded from other investment schedules (e.g., Schedules A, B, BA, D, DA and E).

Bonds, preferred stocks and common stocks are to be grouped separately showing a subtotal for each category.

Securities borrowing and securities lending transactions shall be shown gross when reported in the Schedule DL. If these transactions are permitted to be reported net in accordance with *SSAP No. 64—Offsetting and Netting of Assets and Liabilities*, the investment schedule shall continue to provide detail of all transactions (gross), with the net amount from the valid right to offset reflected in the financial statements (pages 2 & 3 of the statutory financial statements). Disclosures for items reported net when a valid right to offset exists, including the gross amount, the amount offset, and the net amount reported in the financial statements are required per *SSAP No. 64—Offsetting and Netting of Assets and Liabilities*.

Bond Mutual Funds – as Identified by the SVO and Exchange Traded Funds – as Identified by the SVO, which are described in the Investment Schedules General Instructions, are to be included in SVO Identified Funds.

If an insurer has any detail lines reported for any of the following required categories or subcategories, it shall report the subtotal amount of the corresponding category or subcategory, with the specified subtotal line number appearing in the same manner and location as the pre-printed total or grand total line and number:

For foreign securities, use a CINS that is assigned by the Standard & Poor's CUSIP Bureau: *www.cusip.com/cusip/index.htm*.

For Lines 0199999 through 7999999, if no valid CUSIP, CINS or PPN number exists, then report a valid ISIN (Column 11) security number. The CUSIP field should be zero-filled.

The CUSIP reported for this column should be determined in a manner consistent with the instructions of other schedules for the lines shown below:

If the security is an SVO Identified Fund designated for systematic value, Principal STRIP bond or other zero coupon bond, certificates of deposit under the FDIC limit or a TBA (To Be Announced) security and is not under the exclusive control of the company, the "*", "@", "$" or "&" should appear first, immediately followed by the appropriate code (**identified in the Investment Schedules General Instructions**).

The following is a listing of the valid method indicators to show the method used by the reporting entity to determine the Rate Used to Obtain Fair Value.

"a" for securities where the rate is determined by a pricing service.

"b" for securities where the rate is determined by a stock exchange.

"c" for securities where the rate is determined by a broker or custodian. The reporting entity should obtain and maintain the pricing policy for any broker or custodian used as a pricing source. In addition, the broker must either be approved by the reporting entity as a counterparty for buying and selling securities or be an underwriter of the security being valued.

"d" for securities where the rate is determined by the reporting entity. The reporting entity is required to maintain a record of the pricing methodology used.

"e" for securities where the rate is determined by the unit price published in the NAIC *Valuation of Securities*.

Enter a combination of hierarchy and method indicator. The fair value hierarchy level indicator would be listed first and the method used to determine fair value indicator would be listed next. For example, use "1b" to report Level 1 for the fair value hierarchy level and stock exchange for the method used to determine fair value.

The guidance in *SSAP No. 100R—Fair Value* allows the use of net asset value per share (NAV) instead of fair value for certain investments. If NAV is used instead of fair value leave blank.

Column 9 – Source Used to Obtain Fair Value

For Method Code "a," identify the specific pricing service used.

For Method Code "b," identify the specific stock exchange used.

The listing of most **stock exchange codes can be found in the Investment Schedules General Instructions or the following Web address**:

www.fixprotocol.org/specifications/exchanges.shtml

For Method Code "c," identify the specific broker or custodian used.

For Method Code "d," leave blank.

For Method Code "e," leave blank.

If net asset value (NAV) is used instead of fair value, the reporting entity should use "NAV" to indicate net asset value used instead of fair value.

Column 10 – Legal Entity Identifier (LEI)

Provide the 20-character Legal Entity Identifier (LEI) for any mortgagor, issuer or counterparty as assigned by a designated Local Operating Unit. If no LEI number has been assigned, leave blank.

Column 11 – ISIN Identification

The International Securities Identification Numbering (ISIN) system is an international standard set up by the International Organization for Standardization (ISO). It is used for numbering specific securities, such as stocks, bonds, options and futures. ISIN numbers are administered by a National Numbering Agency (NNA) in each of the respective countries, and they work just like serial numbers for those securities. Record the ISIN number only if no valid CUSIP, CINS or PPN exists to report in Column 1.

The ISIN reported for this column should be determined in a manner consistent with the instructions of other schedules for the lines shown below:

Lines 0199999 through 7099999	Schedule D, Part 1, Column 1
Lines 7199999 through 7399999	Schedule D, Part 2, Section 1, Column 1
Lines 7499999 through 7999999	Schedule D, Part 2, Section 2, Column 1

The ISIN number should be zero-filled for the following lines:

Real Estate (Schedule A type)	8699999
Mortgage Loans on Real Estate (Schedule B type)	8799999
Other Invested Assets (Schedule BA type)	8899999
Short-Term Invested Assets (Schedule DA, Part 1 type)	8999999

General Interrogatories:

1. The total activity for the year represents the net increase (decrease) from the prior year-end to the current year-end.

2. The average balance for the year is the average daily balance.

   Average daily balance: Total of daily balances divided by the number of days. Always calculate based on a 365/366 day year. If data is missing for a given date (e.g., weekend, holiday), count the previous day's value multiple times. The actual day count for the year (365/366) would serve as the denominator in the average calculation.

SCHEDULE DL – PART 2

SECURITIES LENDING COLLATERAL ASSETS

Reinvested Collateral Assets Owned December 31 Current Year
(Securities lending collateral assets included on Schedules A, B, BA, D, DB and E
and not reported in aggregate on Line 10 of the asset page.)

This schedule should include a detailed listing of reinvested collateral assets that were owned as of the end of the current reporting year. For Schedule DL, reinvested collateral assets are collateral currently held as part of a securities lending program administered by the reporting entity or its agent (affiliated or unaffiliated) that can be resold or repledged. This is the **currently held collateral**, meaning original collateral if it is still in the original form received or the new reinvested asset resulting from the disposal and/or reinvestment of the original collateral. See *SSAP No. 103R—Transfers and Servicing of Financial Assets and Extinguishments of Liabilities* for accounting guidance.

Include reinvested collateral assets from securities lending programs where the program is administered by the reporting entity (i.e., collateral is received by the reporting entity that can be resold or repledged).

For reinvested collateral assets from securities lending programs where the program is administered by the reporting entity's affiliated agent (i.e., collateral is received by the reporting entity's affiliated agent that can be resold or repledged), the securities may be reported on Schedule DL, Part 2 if reported in other investment schedules (e.g., Schedules A, B, BA, D, DA and E) or reported on Schedule DL, Part 1 if reported in aggregate on the Asset page Line 10, but not both.

Reinvested collateral assets reported on Schedule DL, Part 2 are included in the other investment schedules (e.g., Schedules A, B, BA, D, DA and E).

Bonds, preferred stocks and common stocks are to be grouped separately, showing a subtotal for each category.

Securities borrowing and securities lending transactions shall be shown gross when reported in the Schedule DL. If these transactions are permitted to be reported net in accordance with *SSAP No. 64—Offsetting and Netting of Assets and Liabilities*, the investment schedule shall continue to provide detail of all transactions (gross), with the net amount from the valid right to offset reflected in the financial statements (pages 2 & 3 of the statutory financial statements). Disclosures for items reported net when a valid right to offset exists, including the gross amount, the amount offset, and the net amount reported in the financial statements are required per *SSAP No. 64—Offsetting and Netting of Assets and Liabilities*.

Bond Mutual Funds – as Identified by the SVO and Exchange Traded Funds – as Identified by the SVO that are described in the Investment Schedules General Instructions are to be included in SVO Identified Funds.

If an insurer has any detail lines reported for any of the following required categories or subcategories, it shall report the subtotal amount of the corresponding category or subcategory, with the specified subtotal line number appearing in the same manner and location as the pre-printed total or grand total line and number:

CUSIP numbers for all purchased publicly issued securities are available from the broker's confirmation or the certificate. For private placement securities, the NAIC has created a special number called a PPN to be assigned by the Standard & Poor's CUSIP Bureau. For foreign securities, use a CINS that is assigned by the Standard & Poor's CUSIP Bureau: *www.cusip.com/cusip/index.htm*.

For Lines 0199999 through 7999999, if no valid CUSIP, CINS or PPN number exists, then report a valid ISIN (Column 11) security number. The CUSIP field should be zero-filled.

The CUSIP reported for this column should be same for the security as reported in other schedules for the lines shown below:

SCHEDULE E – PART 1 – CASH

This schedule shows all banks, trust companies, savings and loan and building and loan associations in which the company maintained deposits at any time during the year and the balances, if any (according to Reporting Entity's record), on December 31 of the current year. Certificates of deposit in banks or other similar financial institutions with maturity dates of one year or less from the acquisition date and other instruments defined as cash in accordance with *SSAP No. 2R—Cash, Cash Equivalents, Drafts, and Short-Term Investments* should be reported in this schedule. All Cash Equivalents should be reported in Schedule E, Part 2. Long-term certificates of deposit are to be reported in Schedule D.

In each case where the depository is not incorporated and subject to government supervision, the word "PRIVATE" in capitals and in parentheses — (PRIVATE) — should be inserted to the left of the name of the depository.

Report separately all deposits in excess of $250,000 or less than ($250,000). Deposits not exceeding $250,000 or not less than ($250,000) in federally insured depositories may be combined. Deposits in foreign bank accounts may be combined to the extent that the amount on deposit does not exceed the lesser of $250,000 or the amount of the foreign guarantee. The amount combined should be reported opposite the caption, "Deposits in (insert number) depositories that do not exceed the allowable limit." However, any reporting entity that does not maintain total deposits in any one depository of more than $250,000 is required to list its primary depository; and all entities must list all depositories where the total deposits or overdrafts (as represented by the absolute value) exceed 5% of the total cash as reported on Page 2 of the annual statement.

For Certificate of Deposit Account Registry Service (CDARs) or other similar services that have a maturity of one year or less, each individual banking institution providing a certificate of deposit should be reviewed separately to determine if the balance maintained by the reporting entity at that banking institution meets the criteria set forth above (i.e., does not exceed $250,000 or is not less than ($250,000) in federally insured depositories) for combining with other depository balances. If not, it should be listed individually on the schedule.

Cash in Reporting Entity's Office should be reported in this schedule.

The total of all Cash on Deposit at December 31 plus Cash in Reporting Entity's office (Total Cash, on a gross basis), less any applicable nonadmitted amounts (e.g., nonadmitted cash resulting from state-imposed limitations), should equal the parenthetical amount reported as cash on the Assets Page.

If the reporting entity has any detail lines reported for any of the following required groups, categories, or subcategories, it shall report the subtotal amount of the corresponding group, category, or subcategory, with the specified subtotal line number appearing in the same manner and location as the pre-printed total or grand total line and number:

Short Sales:

> Selling a security short is an action by a reporting entity that results with the reporting entity recognizing proceeds from the sale and an obligation to deliver the sold security. For statutory accounting purposes, obligations to deliver securities resulting from short sales shall be reported as contra-asset (negative assets) in the investment schedule, with an investment code in the code column detailing the item as a short sale. The obligation (negative asset) shall be initially reflected at fair value, with changes in fair value recognized as unrealized gains and losses. These unrealized gains and losses shall be realized upon settlement of the short sale obligation. Interest on short sale positions shall be accrued periodically and reported as interest expense.

If a reporting entity has any detail lines reported for any of the following required categories or subcategories, it shall report the subtotal amounts of the corresponding category or subcategory with the specified subtotal line number appearing in the same manner and location as the pre-printed total or grand total line and number.

SUPPLEMENTAL INVESTMENT RISKS INTERROGATORIES

This set of Supplemental Interrogatories is to assist regulators in identifying and analyzing the risks inherent in the entity's investment portfolio. The Supplemental Investment Risks Interrogatories apply only to general account assets. These lines were determined based upon the investment categories contained in the NAIC Statutory Statement and considered as invested assets. The reported amounts are to be consistent with net admitted amounts reported by the entity in the statement and supporting schedules, not on a consolidated basis. Compute the percentage calculations by dividing the reported amount by the total admitted assets reported in Line 1 of the Interrogatories unless otherwise indicated. It is recommended that the first step in responding to this set of Interrogatories is for the person preparing this document to read through the Interrogatories to gain an understanding of the reporting requirements.

All reporting entities must answer Interrogatories 1 through 4, 11 through 16, 18, 19 and, if applicable 21 through 23. Answer each Interrogatory 5 through 10 only if the reporting entity's aggregate holdings in foreign investments as addressed in Interrogatory 4 equals or exceeds 2.5% of the reporting entity's total admitted assets. Answer Interrogatory 17 only if the reporting entity's aggregate holdings in mortgage loans as addressed in Interrogatory 16 equals or exceeds 2.5% of the reporting entity's total admitted assets. For Life\Fraternal blank, responses are to exclude Separate Accounts. For the Property/Casualty blank, responses are to exclude Protected Cell Accounts.

If listing a Supranational, put Supranational and the union or member on the line (Example: Supranational – World Trade Organization).

The following definitions apply to interrogatories 4 through 10, unless otherwise defined by state statute.

Foreign investment: An investment in a foreign jurisdiction, or an investment in a person, real estate or asset domiciled in a foreign jurisdiction. An investment shall not be deemed to be foreign if the issuing person, qualified primary credit source or qualified guarantor is a domestic jurisdiction or a person domiciled in a domestic jurisdiction, unless:

(a) The issuing person is a shell business entity; and

(b) The investment is not assumed, accepted, guaranteed or insured or otherwise backed by a domestic jurisdiction or a person, that is not a shell business entity, domiciled in a domestic jurisdiction.

Domestic jurisdiction: The United States, Canada, any state, any province of Canada or any political subdivision of any of the foregoing.

Foreign jurisdiction: A jurisdiction other than a domestic jurisdiction.

Shell business entity: A business entity having no economic substance, except as a vehicle for owning interests in assets issued, owned or previously owned by a person domiciled in a foreign jurisdiction.

Qualified guarantor: A guarantor against which a reporting entity has a direct claim for full and timely payment, evidenced by a contractual right for which an enforcement action can be brought in a domestic jurisdiction.

Qualified primary credit source: The credit source to which a reporting entity looks for payment as to an investment and against which a reporting entity has a direct claim for full and timely payment, evidenced by a contractual right for which an enforcement action can be brought in a domestic jurisdiction.

Supranational: Entities with more than one sovereign government as a member

Not for Distribution

Line 1 – Report the reporting entity's total admitted assets as reported on Page 2 of the annual statement.

Report the total net admitted assets for the current year, Page 2, Assets, Column 3, excluding Separate Account, Protected Cell or Segregated Account business.

Line 2 – Report the single 10 largest exposures to a single issuer/borrower/investment.

Determine the ten largest exposures by first, aggregating investments from all investment categories (except the excluded categories) by issuer. The first six digits of the CUSIP number can be used as a starting point; however, please note that the same issuer may have more than one unique series of the first six digits of the CUSIP. For example, the reporting entity owns bonds issued by the XYZ Company of $500,000 and common stock of the XYZ Company of $600,000. In addition the reporting entity has a mortgage loan to the XYZ Company of $300,000. The total exposure to Issuer XYZ Company is $1.4 million ($500,000+$600,000+$300,000).

For funds that are not diversified within the meaning of the Investment Company Act of 1940, insurance reporting entities are required to identify actual exposures and aggregate those exposures with directly held investments to determine the 10 largest exposures. For example, if a reporting entity directly holds a significant number of investments in Exxon Mobil and holds a non-diversified closed-end fund with a high concentration of Exxon Mobil, the reporting entity shall aggregate the direct investments with the investments in the closed-end funds to determine the aggregate investment risk to Exxon Mobile.

SEC registered investment funds are required by law to disclose holdings within 60 days following the fund's fiscal quarter end. Insurers who own funds classified as "non-diversified" are to use the last publicly available fund holding disclosure to account for holdings which should be included in their Top 10 holdings.

Exclude: U.S. government securities (Part Six, Section 2(e)), U. S. government agency securities (Part Six, Section 2(e)).

Those U. S. Government money market funds (Part Six, Section 2(f)) listed in the *Purposes and Procedures Manual of the NAIC Investment Analysis Office* as exempt;

Property occupied by the company;

Policy loans

All SEC and foreign registered funds (open-end, closed-end, UIT and ETFs) and common trust funds that are diversified within the meaning of the Investment Company Act of 1940 [Section 5(b) (1)].

In Column 2 list the categories of securities that are included in the total for each issuer (e.g., bonds, mortgage loans, etc.)

Line 3 – Report by NAIC designation, the amounts and percentages of the reporting entity's total admitted assets held in bonds and preferred stocks.

Report the total amount for each subcategory. The amounts reported in the bond subcategories should be consistent with the amounts reported in Schedule D, Part 1A, Section 1, Column 7, Lines 11.1 – 11.6. Schedule D, Part 1A, Section 1 is reported gross and will not tie to this line if any amounts are reported and nonadmitted for bonds and preferred stocks on the asset page.

Line 4 – Report the amounts and percentages of the reporting entity's total admitted assets held in foreign investments (regardless of whether there is any foreign currency exposure) and unhedged foreign currency exposure.

Not for Distribution

Line 4.02 – Report the aggregate amount of foreign investments as determined by the rules or statutes of the state of domicile (regardless of whether there is any foreign currency exposure).

Line 4.03 – Report the portion of the aggregate amount of foreign investments that supports insurance liabilities denominated in that same foreign currency.

The amount reported in 4.03 should be included in all answers to Lines 5 through 10.

Line 4.04 – Report the amount of the insurance liabilities associated with the investments reported in 4.03 and that are denominated in the same currency.

Lines 5-10 should be answered only if the reporting entity's aggregate foreign investments exceed 2.5% of total admitted assets (response to 4.01 is no). The NAIC designations for Lines 5, 6, 8 and 9 relate to country ratings, not investment ratings. If the country does not have a rating, include the investment in the NAIC-3 or below category.

Line 5 – Report the aggregate foreign investment exposure (regardless of currency exposure) categorized by the country's NAIC sovereign designation. Aggregate foreign investments first by foreign jurisdiction and then by NAIC sovereign designation.

The sovereign ratings and designation equivalents are available on the NAIC Web site.

Line 6 – Within each of the following three categories of NAIC country sovereign designations, which are available on the NAIC Web site (1, 2, and 3 or below), identify the two countries in which the company has its largest aggregate foreign investment exposures (regardless of currency exposure), and report the dollar value and percentage of company investments issued within each of those countries.

Line 8 – Report the aggregate unhedged foreign currency exposure categorized by NAIC sovereign designation. Aggregate unhedged foreign currency exposures first by foreign jurisdiction and then by NAIC sovereign designation.

The sovereign ratings and designation equivalents are available on the NAIC Web site.

Line 9 – Within each of the following three categories of NAIC country sovereign designations, which are available on the NAIC Web site (1, 2, and 3 or below), identify the two countries in which the company has its largest aggregate unhedged foreign currency exposures, and report the dollar value and percentage of company investments issued within each of those countries.

Line 10 – Report the 10 largest non-sovereign (i.e., non-governmental) exposures to a foreign issuer/borrower/ investment.

Determine the ten largest foreign exposures by first aggregating investments from all foreign investment categories by issuer. See example in Line 2. If an investment does not have an NAIC designation, indicate the investment category, e.g., mortgage loan, in the NAIC Designation Column after first indicating any available NAIC designations for that issuer/borrower.

Line 11 – Report the amounts and percentages of the reporting entity's total admitted assets held in Canadian investments, including Canadian-currency denominated investments, Canadian insurance liabilities ("Canadian Investments") and unhedged Canadian currency exposure.

Line 11.03 – Report the aggregate amount of Canadian Investments that support insurance liabilities denominated in Canadian currency.

The amount listed in Line 11.03 should be included in all answers to Line 11.

Line 11.04 – Report the aggregate amount of the insurance liabilities associated with the investments reported in Line 11.03.

Line 11.05 – Unhedged Canadian Currency Exposure

If the reporting entity's aggregate Canadian investments exceed 2.5% of total admitted assets, answer this question.

Line 12 – Report the aggregate amounts and percentages of the reporting entity's total admitted assets held in investments with contractual sales restrictions (defined as investments having restrictions that prevent investment from being sold within 90 days).

Line 12.02 – The aggregate amount reported in this line is limited to investments with contractual restrictions. It does not include, for instance, investments that have procedural requirements to be met prior to sale or internal company restrictions.

Line 13.02 through 13.11 – Report the amounts and percentages of admitted assets held in the ten largest equity interests (including investments in the shares of mutual funds, preferred stocks, publicly traded equity securities, and other equity securities (including Schedule BA equity interests), and excluding money market and bond mutual funds listed in Part Six, Sections 2(f) and (g) of the *Purposes and Procedures Manual of the NAIC Investment Analysis Office* as exempt or NAIC 1).

Determine the ten largest equity interests by first aggregating investments included in this line by issuer. For example, the reporting entity owns preferred stock of the XYZ Company of $600,000 and common stock of the XYZ Company of $300,000. The total is $900,000 ($600,000+$300,000). The reporting entity also owns bonds issued by the XYZ Company of $500,000 that are excluded from this calculation because bonds are debt instruments. Other equity securities include partnerships and Limited Liability Companies (LLC) and any other investments reported in Schedule BA classified as equity.

Line 14 – Report the amounts and percentages of the reporting entity's total admitted assets held in nonaffiliated, privately placed equities (included in other equity securities) and excluding securities eligible for sale under Securities Exchange Commission (SEC) Rule 144a or SEC Rule 144 without volume restrictions.

Line 14.02 – The amount reported in this line is a subset of the Line 14 amount, but excludes any public securities, any affiliated equity interests and any securities that can be sold under SEC Rule 144 or under Rule 144a without any volume restrictions.

Not for Distribution

Line 14.06
through 14.15 – Report the investments held in the ten largest fund managers, with allocation between funds that are diversified or non-diversified in accordance with the meaning of the Investment Company Act of 1940. This should include all "funds" regardless of the type of fund (private placement, mutual fund, exchange-traded fund, closed-end fund, money market mutual fund, etc), reporting schedule or underlying investments captured in a fund.

SEC registered investment funds are required by law to disclose holdings within 60 days following the fund's fiscal quarter end. Insurers who own funds classified as "non-diversified" are to use the last publicly available fund holding disclosure to account for holdings which should be included in their Top 10 holdings.

Determine the ten largest fund managers by aggregating all "fund" investments by fund manager. For example, if a reporting entity holds a BlackRock SVO-Identified Bond ETF (diversified within the meaning of the Investment Company Act of 1940) reported on Schedule D-1 at $500,000, four BlackRock diversified mutual funds reported on Schedule D-2-2 at $2,200,000 and two BlackRock non-diversified closed-end funds totaling $1,500,000, the reporting entity shall report their aggregated investment in BlackRock funds of $4,200,000, with $2,700,000 in diversified funds and $1,500,000 in non-diversified funds.

SEC registered investment funds are required by law to disclose holdings within 60 days following the fund's fiscal quarter end. Insurers who own funds classified as "non-diversified" are to use the last publicly available fund holding disclosure to account for holdings which should be included in their Top 10 holdings.

Line 15 – Report the amounts and percentages of the reporting entity's total admitted assets held in general partnership interests (included in other equity securities).

Line 15.02 – Report the aggregate amount of all general partnership interests reported in Schedule BA. The amount excludes limited partnership interests of any LLC investments.

Lines 15.03
through 15.05 – Report the details of the three largest general partnership interests if the aggregate amount reported in Interrogatory 15.01 exceeds 2.5% of admitted assets.

Line 16 – With respect to mortgage loans reported in Schedule B, report the amounts and percentages of the reporting entity's total admitted assets.

Line 16.02
through 16.11 – The aggregate mortgage interest represents the combined value of all mortgages secured by the same property or same group of properties.

Report the details of the ten largest mortgage interests if the aggregate amount exceeds 2.5% of admitted assets.

The amounts reported in 16.13, 16.14 and 16.16 should be consistent with the corresponding subtotals reported in Column 8 of Schedule B, Part 1.

Line 17 – Report the aggregate mortgage loans having the indicated loan-to-value ratios as determined from the most current appraisal as of the annual statement date.

Line 17.01
through 17.05 – For each mortgage loan, determine its loan-to-value ratio and assign it to one of the five loan-to-value categories, separated into residential, commercial or agricultural. Aggregate the amounts for each category and calculate the percent of admitted assets.

Not for Distribution

Line 18.02 through 18.06 – Report the amounts and percentages of the reporting entity's total admitted assets held in each of the five largest investments in one parcel or group of contiguous parcels of real estate reported in Schedule A, excluding property occupied by the company, if the aggregate amount reported in Interrogatory 18.01 exceeds 2.5% of admitted assets.

Line 19 – Report the amounts and percentages of potential exposure (defined as the amount determined in accordance with the *Annual Statement Instructions*) for mezzanine real estate loans.

Line 19.01 – If the response is yes, the reporting entity need not complete the remainder of Interrogatory 19.

Line 20 – Report the amounts and percentages of the reporting entity's total admitted assets subject to securities lending agreements, repurchase agreements, reverse repurchase agreements, dollar repurchase agreements and dollar reverse repurchase agreements.

Line 20.01 through 20.05 – Report the aggregate amount for each category at year-end and at the end of each quarter. Calculate the percentage of admitted assets at year-end.

Line 21 – Report the amounts and percentages for warrants not attached to other financial instruments, options, caps and floors.

SCHEDULE SIS

STOCKHOLDER INFORMATION SUPPLEMENT

The Stockholder Information Supplement shall be completed by all stock companies incorporated in the U.S.A. that have 100 or more stockholders. Such supplement shall be filed with the insurance commissioner of the company's domiciliary state as a part of its annual statement. The information required to be contained in this supplement is to be furnished to the best of the knowledge of the company. Where appropriate, the company should obtain the required information, in writing, from its directors or officers and from any person known to the company to be the beneficial owner of more than 10% of any class of its equity securities.

The term "officer" means a president, vice-president, treasurer, actuary, secretary, controller and any other person who performs for the company functions corresponding to those performed by the foregoing officers.

INFORMATION REGARDING MANAGEMENT AND DIRECTORS

1. This information applies to any person who was a director or officer of the company at any time during the year. However, information need not be given for any portion of the year during which such person was not a director or officer of the company.

2. Include under "Other Employee Benefits" information for such items as savings plans, deferred compensation plans, thrift plans, profit-sharing plans, etc., or other contracts, authorizations or arrangements, whether or not set forth in any formal document. Briefly describe such "plans" and the basis upon which directors or officers participate therein, if not previously described in a prior "Stockholder Information Supplement" indicating date thereof. Company cost of benefits accrued or set aside need not be stated with respect to payments computed on an actuarial basis under any plan that provides for fixed benefits on retirement at a specified age or after a specified number of years of service.

3. Information need not be included as to payments made for or benefits received from, group life or accident insurance, group hospitalization or similar group payments or benefits.

4. If it is impractical to state the amount of the estimated annual benefits proposed to be made upon retirement, the aggregate amount set aside or accrued to date in respect of such payment should be stated, together with an explanation of the basis for future payments.

5. Attach separate sheets if necessary to fully answer questions.

STATEMENT OF BENEFICIAL OWNERSHIP OF SECURITIES

Column 1 – Name and Title

Indicate relationship of the person to the company, for example: "director," "director and vice-president," "beneficial owner of more than 10% of the company's common stock," etc.

Column 2 – Title of Security

The statement of the title of a security should be such as to clearly identify the security, even though there may be only one class, for example: "common stock," "4% convertible preferred stock," etc.

Column 3 – Nature of Ownership

Under the "Nature of Ownership", state whether ownership of securities is "direct" or "indirect." If the ownership is indirect (i.e., through a partnership, corporation, trust or other entity), indicate in a footnote or other appropriate manner the name or identity of the medium through which the securities are indirectly owned. The fact that securities are held in the name of a broker or other nominee does not, of itself, constitute indirect ownership. Securities owned indirectly shall be reported on separate lines from those owned directly and from those owned through a different type of indirect ownership.

Column 4 – Number of Shares Owned at the End of Prior Year and
Column 8 – Number of Shares Owned at the End of Current Year

In the case of securities owned indirectly, the entire amount of securities owned by the partnership, corporation, trust or other entity shall be stated. There may also be indicated in a footnote or other appropriate manner the extent of the security holder's interest in such partnership, corporation, trust or other entity.

If a transaction in securities of the company was with the company or one of its subsidiaries, so state. If it involved the purchase of securities through the exercise of options, so state. If any other purchase or sale was effected otherwise than in the open market, that fact shall be indicated. If the transaction was not a purchase or sale, indicate its character, for example, gift, stock dividend, etc., as the case may be.

Any additional information or explanation deemed relevant by the company should be included as a footnote or in other appropriate manner.

Column 9 – Percentage of Voting Stock Directly and Indirectly Owned or Controlled at the End of the Current Year

Report the percentage of voting stock directly and indirectly owned or controlled at the end of the current year by each director, officer and/or any other entity/person who directly or indirectly, own, control, hold with the power to vote, or hold proxies representing 10% of more of the voting interests of the entity. See *SSAP No. 25—Affiliates and Other Related Parties* for the definition of control.

APPENDIX

INSTRUCTIONS FOR USE OF BARCODES

It is the responsibility of the company to prepare and utilize barcodes correctly.

The upper right-hand corner of the jurat page, and other pages and forms as identified on the Document Identifier Codes listing, will be the location of a 17-digit barcode symbol. The barcode standard to be utilized is the 3 of 9 (or 39) methodology. The barcode should be printed using at least a 24-point font. In addition to the barcode symbols, the name of the reporting entity, the year, and the document code should be printed on the barcode label. When the barcode is printed as part of the page rather than an affixed label, the reporting entity's name need not be printed above the barcode.

The barcode consists of the entity identifier (5 digits), the year (YYYY-4 digits), the document identifier (3 digits), the state code (2 digits), if state specific page, the data indicator (1 digit) and a filing type identifier (1 digit).

This 17th digit should utilize the following codes:

0 to represent the annual filings

1 to represent the March quarterly filing

2 to represent the June quarterly filing

3 to represent the September quarterly filing

4 to represent the Health Maintenance Organization's fourth quarter filing

5 to represent amended annual filings

6 to represent amended March quarterly filing

7 to represent amended June quarterly filing

8 to represent amended September quarterly filing

For filings of a reporting entity, the entity identifier is the NAIC company code number.

The year is represented as the last four digits of the filing year. For the 2019 annual statement due March 1, 2020, the year would be 2019.

The document identifier represents what page, schedule, exhibit, etc., is being filed. The respective identifiers for those documents requiring a barcode are included on the document identifier listing.

The state code represents if the document identifier can be filed for each individual state (e.g., the state business pages). The two-digit code would be the same as used on Schedule T. If it is not a state-specific form, the state code is 00. The state code Other is 58, and the code for Grand Total is 59. If the reporting entity has nothing to report on any state-specific supplemental schedule or exhibit, the barcode included in the Supplemental Exhibits and Schedules Interrogatories should contain a state code of 59.

The data indicator represents if the document contains data. For filings containing data place a one (1) in this field. If the document is a NONE, place a zero (0) in this field.

The filing type identifier is used to indicate the filing of NAIC filing components or state mandated (state specific) filing requirements other than those required by the NAIC. For NAIC filing requirements, the type code is 0. For state filing requirements, the type code is 1.

Not for Distribution

If forms which are required to have a separate barcode as identified on the Document Identifier Codes listing are bound in the statement, these forms MUST have the barcode affixed to them. If a reporting entity submits with the March 1 filing a page requiring a barcode and that page has not been completed due to a later filing date, the barcode should not be affixed for the March filing. If the filing includes a page listing none schedules (and the state in which you are filing permits such a filing) and any of these schedules fall within that listing that requires a barcode, the barcode must be placed to the right of the name of the page, exhibit or schedule. On those forms which are completed on a by-state basis and are marked none because the company does not write that type of business or that particular state page is none, place the appropriate identifier with the data indicator of zero (0). State pages which have values reported must use the appropriate state barcode identifier from Schedule T. If any state requires the filing of a none "by-state basis" page, the name of the appropriate state must still be printed on the hard copy after "For the State of _____."

A listing of the Document Identifier Codes can be found at *www.naic.org/cmte_e_app_blanks.htm*.

The reporting entity is required to affix the appropriate barcode next to the respective Supplemental Interrogatory using the document identifier code provided. Note that it is only Supplemental Interrogatories to which the reporting entity has responded "NO" that it does not have to file a particular exhibit or form, and for which the physical page or form is marked none that the appropriate barcode be affixed. For supplements that are state specific, the only instance a barcode should be affixed is when that type of business is not written at all in any state.
