CASH FLOW

Information should be reported for current year-to-date.

The Statement of Cash Flow is prepared using the direct method consistent with the Summary of Operations, excluding the effect of current and prior year accruals. All revenue, expenditure, purchases and sale transactions involving cash should be entered gross. Pursuant to SSAP No. 69—*Statement of Cash Flow*, for purposes of the Cash Flow Statement, cash is defined to include cash, cash equivalents and short-term investments. Refer to SSAP No. 69—*Statement of Cash Flow*, for accounting guidance about disclosure of non-cash operating, investing and financing transactions.

The following worksheets are provided to facilitate completion of the Cash Flow Statement. The forms reflect common reporting practices. Reporting entities may need to make adjustments to various lines consistent with their operations. For example, changes in the asset for foreign exchange rates is typically associated with the investment portfolio and shown as an adjustment to investment income. Alternatively, the adjustment could be made to insurance operations, if appropriate. The worksheets exclude certain noncash activities, e.g., change in nonadmitted assets and change in Asset Valuation Reserve for Life and Fraternal companies since the offset is to surplus and has no effect on cash, but adjustments are needed to remove other non-cash transactions. While the worksheets do not take into account the cumulative effect of changes in accounting principles, the appropriate lines of the Cash Flow Statement need to be adjusted for this change. Note that the worksheets are designed to take into account all lines of the Assets and Liabilities, Surplus and Other Funds pages, as well as the Summary of Operations.

NOTES TO FINANCIAL STATEMENTS

The interim financial information shall include disclosures sufficient to make the information presented not misleading. It may be presumed that the users of the interim financial information have read or have access to the annual statement for the preceding period and that the adequacy of additional disclosure needed for a fair presentation, except in regard to material contingencies, may be determined in that context. Accordingly, footnote disclosure that would substantially duplicate the disclosure contained in the most recent annual statement or audited financial statements, such as a statement of significant accounting policies and practices, details of accounts that have not changed significantly in amount or composition since the end of the most recently completed fiscal year, may be omitted but the footnote number and annotation such as “no change” should be included. However, provide disclosure for annual Note 1A, 1C(6), 1D, 5D, 5E(3)b, 5F, 5G, 5H, 5I, 5M(2), 5M(3), 5N, 11B, 12A(4), 17B(2), 17B(4)a, 17B(4)b, 17C, 20, 24E and 25 in all quarters; and all other notes where events subsequent to the end of the most recent fiscal year have occurred that have a material impact on the reporting entity. Disclosures shall encompass, for example, significant changes since the end of the period reported on the last annual statement in such items as statutory accounting principles and practices; estimates inherent in the preparation of financial statements; status of long term contracts; capitalization including significant new borrowings or modifications of existing financial arrangements; and the reporting entity resulting from business combinations or dispositions. Notwithstanding the above, where material noninsurance contingencies exist, disclosure of such matters shall be provided even though a significant change since year-end may not have occurred. If the reporting entity has changed its accounting policies since the end of its preceding year, the changes shall be disclosed in the quarterly financial statements. Information should be reported for current year-to-date.

1. Summary of Significant Accounting Policies and Going Concern

Instruction:

Refer to *SSAP No. 1—Accounting Policies, Risks & Uncertainties and Other Disclosures*, for accounting guidance regarding disclosure requirements. The major disclosure requirements are as follows:

- A. This note (**including a table reconciling income and surplus between the state basis and SAP basis**) is to be completed, even if there are no prescribed practices or permitted practices to report.

Indicate that the statement has been completed in accordance with the *Accounting Practices and Procedures Manual*. If a reporting entity employs accounting practices that depart from the *Accounting Practices and Procedures Manual*, including different practices required by state law, disclose the following information about those accounting practices.

Include:

- A description of the accounting practice;
- A statement that the accounting practice differs from NAIC statutory accounting practices and procedures (NAIC SAP) identifying whether the practice is a departure from NAIC SAP or from a state prescribed practice and include the financial statement reporting lines predominantly impacted by the permitted or prescribed practice. (Although most practices impact net income or surplus, direct reference to those lines should be avoided. The intent is to capture the financial statement lines reflecting the practice that ultimately impacts net income or statutory surplus.);
- The monetary effect on net income and statutory surplus of using an accounting practice that differs from NAIC statutory accounting practices and procedures; and
- If an insurance enterprise’s risk-based capital would have triggered a regulatory event had it not used a prescribed or permitted practice, that fact should be disclosed in the financial statements.

In addition, disclose the following information about accounting practices when NAIC statutory accounting practices and procedures do not address the accounting for the transaction:

- A description of the transaction and of the accounting practice used; and
- A statement that the NAIC statutory accounting practices and procedures do not address the accounting for the transaction.

A table reconciling income and surplus between the state basis and NAIC SAP basis for the current reporting period and the prior year-end shall be provided. The reconciliation table is required even if the reporting entity does not have any permitted or prescribed practices to report.

The reconciliation shall include:

Brief description of the prescribed or permitted practice;

SSAP # Enter the SSAP numbers to which the permitted or prescribed practice primarily pertains.

For permitted practices from state regulations, use “00.”

If multiple SSAPs are needed for the prescribed or permitted practice, separate with a comma (19,43R,00).

Financial statement pages (F/S pages) primarily impacted by the permitted or prescribed practice.

Only the following pages should be referenced.

2 – Assets

3 – Liabilities, Surplus and Other Funds

4 – Summary of Operations

Financial statement reporting lines (F/S lines) of the key financial statement page primarily impacted by the permitted or prescribed practice

(References to the financial statement reporting line for net income or statutory surplus should be avoided. The intent is to capture the financial statement line reflecting the practice that ultimately impacts net income or statutory surplus.)

If “N/A” was used for the F/S page, use “N/A” for the F/S line.

If multiple lines are needed for the prescribed or permitted practice, separate with a comma (2.1,8).

Below are examples of permitted and prescribed practices the reporting entity may or may not be using that could be disclosed. The reporting entity may have others not shown below.

- (3) The cost was \$_____, resulting in goodwill in the amount of \$_____.*

- (2) Whether SVO- Identified investments are being reported at a different measurement method from what was used in an earlier current-year interim and/or in a prior annual statement. (For example, if reported at systematic value prior to the sale, and then reacquired and reported at fair value.) This disclosure is required in all interim reporting periods and in the year-end financial statements for the year in which an SVO- Identified investment has been reacquired and reported using a different measurement method from what was previously used for the investment. (This disclosure is required regardless of the length of time between the sale/reacquisition of the investments, but is only required in the year in which the investment is reacquired.)

D. Going Concern

The reporting entity shall provide the following going concern disclosures after management's evaluation of the reporting entity's ability to continue as a going concern and consideration of management's plans to alleviate any substantial doubt about the entity's ability to continue as a going concern.

Note: The disclosures below are required for annual and interim reporting periods effective Dec. 31, 2016. Early application of the going concern guidance in *SSAP No. 1—Accounting Policies, Risks & Uncertainties, and Other Disclosures*, is permitted.

- (1) If after considering management's plans, substantial doubt about an entity's ability to continue as a going concern is alleviated, the reporting entity shall disclose in the notes to the financial statements the following information:
 - a. Principal conditions and events that raised substantial doubt about the entity's ability to continue as a going concern (before consideration of management's plans).
 - b. Management's evaluation of the significance of those conditions or events in relation to the entity's ability to meet its obligations.
 - c. Management's plans that alleviated substantial doubt about the entity's ability to continue as a going concern.
- (2) If after considering management's plans, substantial doubt about an entity's ability to continue as a going concern is not alleviated, the entity shall include a statement in the notes to the financial statements indicating that there is substantial doubt about the entity's ability to continue as a going concern within one year after the date that the financial statements are issued. Additionally, the reporting entity shall disclose the information in paragraphs 1D(1)a and 1D(1)b, as well as the management plans that are intended to mitigate the conditions or events that raise substantial doubt about the entity's ability to continue as a going concern.
- (3) The going concern evaluation and going concern disclosures discussed in *SSAP No. 1—Accounting Policies, Risks & Uncertainties, and Other Disclosures*, are required for both interim and annual financial statements. If substantial doubt was determined, and the conditions or events continue to raise substantial doubt about an entity's ability to continue as a going concern in subsequent annual or interim reporting periods, the entity shall continue to provide the disclosures in each subsequent reporting period. In these subsequent periods, the disclosures should become more extensive as additional information becomes available about the relevant conditions or events and about management's plans. A. Accounting Practices

The financial statements of XYZ Company are presented on the basis of accounting practices prescribed or permitted by the ABC Insurance Department.

The ABC Insurance Department recognizes only statutory accounting practices prescribed or permitted by the State of ABC for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the ABC Insurance Law. The *Accounting Practices and Procedures Manual* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of ABC. The state has adopted certain prescribed accounting practices that differ from those found in NAIC SAP. Specifically, 1) goodwill arising from the purchase of a subsidiary, controlled or affiliated entity is written off directly to surplus in the year it originates by ABC domiciled companies. In NAIC SAP, goodwill in amounts not to exceed 10% of an insurer's capital and surplus may be capitalized and all amounts of goodwill are amortized to unrealized gains and losses on investment over periods not to exceed 10 years, and, 2) 100% of all fixed assets are admitted by ABC domiciled companies. In NAIC SAP, fixed assets are not admitted. The Commissioner of Insurance has the right to permit other specific practices that deviate from prescribed practices.

The Company, with the explicit permission of the Commissioner of Insurance of the State of ____, records the value of its home office building at fair market value instead of a depreciated cost required by the NAIC SAP. If the home office building were carried at depreciated cost, home office property and statutory surplus would be decreased by \$ _____ and \$ _____ as of December 31, 20__ (prior year end) and 20__ (current year to date), respectively. Additionally, net income would be increased by \$ _____ and \$ _____ respectively, for the years then ended. Finally, if the company had not been permitted to record the value of its home office building at fair market value, the Company's risk-based capital would have triggered a regulatory event.

THE RECONCILIATION TABLE BELOW IS REQUIRED TO BE FILED REGARDLESS OF WHETHER THE REPORTING ENTITY HAS ANY STATE PRESCRIBED OR PERMITTED PRACTICES.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of ABC is shown below:

- Intent to sell.
 - Inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost basis.
- (3) For each security, by CUSIP, with an other-than-temporary impairment, recognized in the current reporting period by the reporting entity, if the present value of cash flows expected to be collected is less than the amortized cost basis of the securities:

- The disclosures in (a) and (b) above should be segregated by those securities that have been in a continuous unrealized loss position for less than 12 months and those that have been in a continuous unrealized loss position for 12 months or longer using fair values determined in accordance with *SSAP No. 27—Off-Balance-Sheet and Credit Risk Disclosures*.
- (5) Additional information should be included describing the general categories of information that the investor considered in reaching the conclusion that the impairments are not other-than-temporary.

E. Dollar Repurchase Agreements and/or Securities Lending Transactions

Reporting entities should complete the disclosures that are relevant to the repurchase/reverse repurchase activity they engaged within the annual and interim reporting periods. For example, if the reporting entity only participated in repurchase transactions accounted for as secured borrowings, only those disclosures shall be included in the financial statement. Those disclosures that are not applicable shall just be noted as “none.” (The use of the “sale” accounting method to account for repurchase/reverse repurchase agreements is anticipated to be very limited. Therefore, these disclosures are not anticipated to be applicable to most reporting entities.)

For initial application (year-end 2017), information about the fourth-quarter (year-end) balances should be included, without retrospective application of the quarterly detail. In 2018, the disclosure shall build each quarterly reporting period. This disclosure is required in all reporting periods (interim and annual) for all reporting entities that participate in repurchase or reverse repurchase transactions. A reporting entity that discontinues repurchase/reverse repurchase transactions during the year shall continue the disclosure (showing zero balances) in the reporting periods after discontinuing activity (retaining the quarterly detail that occurred prior to discontinuing the activity) through the annual reporting period. A reporting entity that begins participating in repurchase/reverse repurchase activity shall include the full disclosure in the quarterly reporting period for which activities began (noting zero activity in the quarters prior to engaging in the activity).

- b. The amount of **contractually specified servicing fees**, late fees and ancillary fees earned for each period for which results of operations are presented, including a description of where each amount is reported in the statement of income.
- c. Quantitative and qualitative information about the assumptions used to estimate the fair value (for example, discount rates, anticipated credit losses and prepayment speeds). An entity that provides quantitative information about the instruments used to manage the risks inherent in the servicing assets and servicing liabilities, as encouraged by *SSAP No. 103R—Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, also is encouraged but not required to disclose the quantitative and qualitative information about the assumptions used to estimate the fair value of those instruments.
- (4) For securitizations, asset-backed financing arrangements and similar transfers accounted for as sales when the transferor has continuing involvement (as defined in the glossary of the *Accounting Practices and Procedures Manual*) with the transferred financial assets:
- a. For each income statement presented:
1. The characteristics of the transfer (including a description of the transferor's continuing involvement with the transferred financial assets, the nature and initial fair value of the assets obtained as proceeds and the liabilities incurred in the transfer, and the gain or loss from the sale of transferred financial assets. For initial fair value measurements of assets obtained and liabilities incurred in the transfer, the following information:
 - (a) The level within the fair value hierarchy in which the fair value measurements in their entirety fall, segregating fair value measurements using quoted prices in active markets for identical assets or liabilities (Level 1), significant other observable inputs (Level 2) and significant unobservable inputs (Level 3).
 - (b) The key inputs and assumptions used in measuring the fair value of assets obtained and liabilities incurred as a result of the sale that relate to the transferor's continuing involvement (including, at a minimum, but not limited to, and if applicable, quantitative information about discount rates; expected prepayments, including the expected weighted-average life of prepayable financial assets; and anticipated credit losses, including expected static pool losses).
 - If an entity has aggregated multiple transfers during a period, it may disclose the range of assumptions.
 - The weighted-average life of prepayable assets in periods (for example, months or years) can be calculated by multiplying the principal collections expected in each future period by the number of periods until that future period, summing those products, and dividing the sum by the initial principal balance.
 - Expected static pool losses can be calculated by summing the actual and projected future credit losses and dividing the sum by the original balance of the pool of assets.
 2. Cash flows between a transferor and transferee, including proceeds from new transfers, proceeds from collections reinvested in revolving-period transfers, purchases of previously transferred financial assets, servicing fees and cash flows received from a transferor's beneficial interests.

- b. For each statement of financial position presented, regardless of when the transfer occurred:
1. Qualitative and quantitative information about the transferor's continuing involvement with transferred financial assets that provides financial statement users with sufficient information to assess the reasons for the continuing involvement and the risks related to the transferred financial assets to which the transferor continues to be exposed after the transfer and the extent that the transferor's risk profile has changed as a result of the transfer (including, but not limited to, credit risk, interest rate risk and other risks), including:
 - (a) The total principal amount outstanding, the amount that has been derecognized and the amount that continues to be recognized in the statement of financial position.
 - (b) The terms of any arrangements that could require the transferor to provide financial support (for example, liquidity arrangements and obligations to purchase assets) to the transferee or its beneficial interest holders, including a description of any events or circumstances that could expose the transferor to loss and the amount of the maximum exposure to loss.
 - (c) Whether the transferor has provided financial or other support during the periods presented that it was not previously contractually required to provide to the transferee or its beneficial interest holders, including when the transferor assisted the transferee or its beneficial interest holders in obtaining support, including:
 - The type and amount of support.
 - The primary reasons for providing the support.
 - (d) Information is encouraged about any liquidity arrangements, guarantees and/or other commitments provided by third parties related to the transferred financial assets that may affect the transferor's exposure to loss or risk of the related transferor's interest.
 2. The entity's accounting policies for subsequently measuring assets and liabilities that relate to the continuing involvement with the transferred financial assets.
 3. The key inputs and assumptions used in measuring the fair value of assets or liabilities that relate to the transferor's continuing involvement (including, at a minimum, but not limited to, and if applicable, quantitative information about discount rates; expected prepayments, including the expected weighted-average life of prepayable financial assets; and anticipated credit losses, including expected static pool losses).
 4. For the transferor's interests in the transferred financial assets, a sensitivity analysis or stress test showing the hypothetical effect on the fair value of those interests (including any servicing assets or servicing liabilities) of two or more unfavorable variations from the expected levels for each key assumption that is reported per *SSAP No. 103R—Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, independently from any change in another key assumption, and a description of the objectives, methodology and limitations of the sensitivity analysis or stress test.
 5. Information about the asset quality of transferred financial assets and any other assets that it manages together with them. This information shall be separated between assets that have been derecognized and assets that continue to be recognized in the statement of financial position. This information is intended to provide financial statement users with an understanding of the risks inherent in the transferred financial assets, as well as in other assets and liabilities that it manages together with transferred financial assets. For example, information for receivables shall include, but is not limited to:
 - Delinquencies at the end of the period
 - Credit losses, net of recoveries, during the period.

C. Wash Sales

A reporting entity shall disclose the following information for wash sales, as defined in *SSAP No. 103R—Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, involving transactions for securities with an NAIC designation of 3 or below, or unrated (the disclosures shall be made for the current quarter in the quarterly statement and for the year in the annual statement):

- (1) A description of the reporting entity’s objectives regarding these transactions; and
- (2) An aggregation of transactions by NAIC designation 3 or below, or unrated;

Include:

- The number of transactions involved during the reporting period;
- The book value of securities sold;
- The cost of securities repurchased; and
- The realized gains/losses associated with the securities involved.

Illustration:

C. Wash Sales

- (1) In the course of the reporting entity’s asset management, securities are sold and reacquired within 30 days of the sale date.
- (2) The details of NAIC designation 3 or below, or unrated of securities sold during the first quarter ended March 31, 20__, and reacquired within 30 days of the sale date are:

Description	NAIC Designation	Number of Transactions	Book Value of Securities Sold	Cost of Securities Repurchased	Gain (Loss)
_____	_____	_____	\$ _____	\$ _____	\$ _____
_____	_____	_____	\$ _____	\$ _____	\$ _____
_____	_____	_____	\$ _____	\$ _____	\$ _____
_____	_____	_____	\$ _____	\$ _____	\$ _____
_____	_____	_____	\$ _____	\$ _____	\$ _____
_____	_____	_____	\$ _____	\$ _____	\$ _____

Note: Examples of values for the Description Column are Bonds, Preferred Stocks, Common Stocks, etc.
 The NAIC Designation Column should indicate 3 through 6 for those transactions for securities that would have been reported with an NAIC Designation if still owned at the end of the reporting period (e.g., bonds and preferred stocks).
 For those transactions for securities that would not have been reported with an NAIC Designation if still owned at the end of the reporting period (e.g., real estate mortgage loans and common stocks), leave the column blank.

20. Fair Value Measurements

Instruction:

- A. A reporting entity shall disclose information that helps users of the financial statements to assess both of the following:
- For assets and liabilities that are measured and reported¹ at fair value in the statement of financial position after initial recognition, the valuation techniques and the inputs used to develop those measurements; and
 - For fair value measurements in the statement of financial position determined using significant unobservable inputs (Level 3), the effect of the measurements on earnings (or change in net assets) for the period.

To meet these objectives, the reporting entity shall disclose the information in paragraphs (1) through (4) below for each class of assets and liabilities measured and reported at fair value in the statement of financial position after initial recognition. The reporting entity shall determine appropriate classes of assets and liabilities in accordance with the annual statement instructions.

- (1) The level of the fair value hierarchy within which the fair value measurements are categorized in their entirety (Level 1, 2 or 3).

For assets and liabilities held at the reporting date, the amounts of any transfers between Level 1 and Level 2 of the fair value hierarchy, the reasons for the transfers, and the reporting entity's policy for determining when transfers between levels are recognized. Transfers into each level shall be disclosed and discussed separately from transfers out of each level.

- (2) For fair value measurements categorized within Level 3 of the fair value hierarchy, a reconciliation from the opening balances to the closing balances disclosing separately changes during the period attributable to the following:

- a. Total gains or losses for the period recognized in income or surplus.
- b. Purchases, sales, issues and settlements (each type disclosed separately).
- c. The amounts of any transfers into or out of Level 3, the reasons for those transfers, and the reporting entity's policy for determining when transfers between levels are recognized. Transfers into Level 3 shall be disclosed and discussed separately from transfers out of Level 3.

- (3) A reporting entity shall disclose and consistently follow its policy for determining when transfers between levels are recognized. The policy about the timing of recognizing transfers shall be the same for transfers into Level 3 as that for transfers out of Level 3. Examples of policies for when to recognize the transfers are as follows:

- a. The actual date of the event or change in circumstances that caused the transfer.
- b. The beginning of the reporting period.
- c. The end of the reporting period.

¹ The term "reported" is intended to reflect the measurement basis for which the asset or liability is classified within its underlying SSAP. For example, a bond with an NAIC designation of 2 is considered an amortized cost measurement and is not included within this disclosure even if the amortized cost and fair value measurement are the same. An example of when such a situation may occur includes a bond that is written down as other-than-temporarily impaired as of the date of financial position. The amortized cost of the bond after the recognition of the other-than-temporary impairment may agree to fair value, but under SSAP No. 26R this security is considered to still be reported at amortized cost.

- (4) For fair value measurements categorized within Level 2 and Level 3 of the fair value hierarchy, a description of the valuation technique(s) and the inputs used in the fair value measurement. If there has been a change in the valuation technique(s) (for example, changing from a market approach to an income approach or the use of an additional valuation technique), the reporting entity shall disclose that change and the reason for making it.

For fair value measurements categorized within Level 2 and Level 3 of the fair value hierarchy, *SSAP No. 100—Fair Value*, requires a reporting entity to disclose a description of the valuation technique(s) and the inputs used in the fair value measurement. A reporting entity might disclose the following:

- a. Quantitative information about the input, for example, for certain debt securities or derivatives, information such as, but not limited to, prepayment rates, rates of estimated credit losses, interest rates (for example the LIBOR swap rate) or discount rates and volatilities.
 - b. The nature of the item being measured at fair value, including the characteristics of the item being measured that are considered in the determination of relevant inputs. For example, for residential mortgage-backed securities, a reporting entity might disclose the following:
 1. The types of underlying loans (for example, prime loans or subprime loans)
 2. Collateral
 3. Guarantees or other credit enhancements
 4. Seniority level of the tranches or securities
 5. The year of issue
 6. The weighted-average coupon rate of the underlying loans and the securities
 7. The weighted-average maturity of the underlying loans and the securities
 9. The geographical concentration of the underlying loans
 10. Information about the credit ratings of the securities
 - c. How third-party information such as broker quotes, pricing services, net asset values and relevant market data was considered in measuring fair value.
- (5) For derivative assets and liabilities, the reporting entity shall present both of the following:

- a. The fair value disclosures required by paragraph (1) and (2) above on a gross basis.
- b. The reconciliation disclosures required by paragraphs (2), (3) and (4) on either a gross or net basis.

The quantitative disclosures required by 20A above shall be presented using a tabular format. (See Illustrations.)

- B. The reporting entity is encouraged, but not required, to combine the fair value information disclosed under *SSAP No. 100—Fair Value*, with the fair value information disclosed under other accounting pronouncements (for example, disclosures about fair value of financial instruments) in the periods in which those disclosures are required, if practicable. The reporting entity also is encouraged, but not required, to disclose information about other similar measurements, if practicable.

- C. A reporting entity shall disclose in the notes to the financial statements, as of each date for which a statement of financial position is presented in the quarterly or annual financial statements, the aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall. This disclosure shall be summarized by the type of financial instrument for which it is practicable to estimate fair value, except for certain financial instruments identified below.

The disclosures about fair value prescribed in the preceding paragraph are not required for the following. (Note: These exclusions are specific to Note 20C and do not impact the reporting of fair value that may be required in other SSAPs or statutory accounting schedules.)

- Employers' and plans' obligations for pension benefits, other postretirement benefits (see scope Paragraph of *SSAP No. 92—Postretirement Benefits Other Than Pensions*), post-employment benefits, employee stock option and stock purchase plans, and other forms of deferred compensation arrangements, as defined in *SSAP No. 12—Employee Stock Ownership Plans*; *SSAP No. 104R—Share-Based Payments*; *SSAP No. 92—Postretirement Benefits Other Than Pensions*; and *SSAP No. 102—Pensions*.
- Substantively extinguished debt subject to the disclosure requirements of *SSAP No. 103R—Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*.
- Insurance contracts, other than financial guarantees and deposit-type contracts
- Lease contracts as defined in *SSAP No. 22—Leases*.
- Warranty obligations and rights.
- Investments accounted for under the equity method.
- Equity instruments issued by the entity.

Fair value disclosed in the notes shall be presented together with the related admitted values in a form that makes it clear whether the fair values and admitted values represent assets or liabilities and to which line items in the Statement of Assets, Liabilities, Surplus and Other Funds they relate. Unless specified otherwise in another SSAP, the disclosure may be made net of encumbrances, if the asset or liability is so reported. A reporting entity shall also disclose the method(s) and significant assumptions used to estimate the fair value of financial instruments.

If it is not practicable for a reporting entity to estimate the fair value of the financial instrument or a class of financial instruments, the aggregate carrying amount for those items shall be reported in the "not practicable" column with additional disclosure as required in paragraph 20D below.

- D. If it is not practicable for an entity to estimate the fair value of a financial instrument or a class of financial instruments, the following shall be disclosed:
- (1) Information pertinent to estimating the fair value of that financial instrument or class of financial instruments, such as the carrying amount, effective interest rate and maturity; and
 - (2) The reasons why it is not practicable to estimate fair value.

(4)

As of December 31, 2011, the reported fair value of the reporting entity's investments in Level 3, NAIC designated 6, residential mortgage-backed securities was \$X,XXX. These securities are senior tranches in a securitization trust and have a weighted-average coupon rate of XX percent and a weighted-average maturity of XX years. The underlying loans for these securities are residential subprime mortgages that originated in California in 2006. The underlying loans have a weighted-average coupon rate of XX percent and a weighted-average maturity of XX years. These securities are currently below investment grade. To measure their fair value, the reporting entity used an industry standard pricing model, which uses an income approach. The significant inputs for the pricing model include the following weighted averages:

- Yield: XX Percent
- Probability of default: XX percent constant default rate
- Loss severity: XX percent
- Prepayment: XX percent constant prepayment rate

However, the business to which it relates is subject to premium adjustments.

GENERAL INTERROGATORIES

The General Interrogatories are required for the quarterly statement

For interrogatory questions asking if there have been changes (e.g. to the charter, bylaws, articles of incorporation or deed of settlement), the reporting entity should report changes since the prior year-end, unless a different time frame is specifically mentioned by the interrogatory or by reference to another interrogatory. Those changes would continue to be reported in subsequent quarters for that year.

For those interrogatories not referring to a change from a prior reporting period but are asking for information as of a point in time, the reporting entity should answer the question as of the current quarter, unless a different time frame is specifically mentioned by the interrogatory or by reference to another interrogatory.

General Instructions

The General Interrogatories are divided into two parts. Part 1 is titled Common Interrogatories. Common Interrogatories are defined as interrogatories that are similar or identical across the Life and Health, Property and Casualty, Health, Fraternal and Title Blanks. The common interrogatories are further divided into three sections: General, Financial and Investment. Part 2 interrogatories are those interrogatories that pertain only to the individual blanks.

Sections

1. General is defined as those interrogatories that relate to the reporting entity framework.
2. Financial is defined as those interrogatories that relate to financial transactions of the reporting entity.
3. Investment is defined as those interrogatories that pertain to the solvency of the reporting entity.

NOTE: New Interrogatories are to be added to the section that relates to them.

Column 1 – NAIC Company Code

Company codes are assigned by the NAIC and are listed in the *NAIC Listing of Companies*. The NAIC does not assign a company code to insurers domiciled outside of the U.S. or to non-risk bearing pools or associations. The “NAIC Company Code” field should be zero filled for those organizations. Non-risk bearing pools or associations are assigned a Pool/Association Identification Number. See the instruction for Column 2 for details on assignment of Pool/Association Identification Numbers. Risk bearing pools or associations are assigned a company code. If a reinsurer or reinsured has merged with another entity, report the company code of the surviving entity.

If a risk bearing entity (e.g., risk bearing pools or associations) does not appear in the *NAIC Listing of Companies*, contact the NAIC Financial Systems and Services Department, Company Demographics Analyst at FDRCCREQ@NAIC.ORG for numbers assigned since the last publication or information on having a number assigned. Newly assigned company codes are incorporated in revised editions of the *NAIC Listing of Companies*, which are available semi-annually. The NAIC provides this information to annual statement software vendors for incorporation into the software.

Column 2 – ID Number

Enter one of the following as appropriate for the entity being reported on the schedule. See the Schedule S General Instructions in the annual statement instructions for more information on these identification numbers.

- Federal Employer Identification Number (FEIN)
- Alien Insurer Identification Number (AIIN)
- Certified Reinsurer Identification Number (CRIN)
- Pool/Association Identification Number

Federal Employer Identification Number (FEIN)

The Federal Employer Identification Number (FEIN) must be reported for each U.S.-domiciled insurer and U.S. branch of an alien insurer. The FEIN should not be reported as the “Federal ID Number” for other alien insurers even if the federal government has issued such a number.

Alien Insurer Identification Number (AIIN)

In order to report transactions involving alien companies correctly, the appropriate Alien Insurer Identification Number (AIIN) must be included on Schedule S instead of the FEIN. The AIIN number is assigned by the NAIC and is listed in the NAIC *Listing of Companies*. If an alien company does not appear in that publication, contact the NAIC Financial Systems and Services Department, Company Demographics Analyst at FDRCCREQ@NAIC.ORG for numbers assigned since the last publication or information on having a number assigned.

Newly assigned numbers are incorporated in revised editions of the NAIC *Listing of Companies*, which are available semiannually. The NAIC provides this information to annual statement software vendors for incorporation into the software.

Pool and Association Numbers

In order to report transactions involving non-risk bearing pools or associations consisting of non-affiliated companies correctly, the company must include on Schedule S the appropriate Pool/Association Identification Number. These numbers are listed in the NAIC *Listing of Companies*. The Pool/Association Identification Number should be used instead of any FEIN that may have been assigned. If a pool or association does not appear in that publication, contact the NAIC Financial Systems and Services Department, Company Demographics Analyst at FDRCCREQ@NAIC.ORG for numbers assigned since the last publication or information on having a number assigned.

Newly assigned numbers are incorporated in revised editions of the NAIC *Listing of Companies*, which are available semiannually. The NAIC provides this information to annual statement software vendors for incorporation into the software.

Certified Reinsurer Identification Number (CRIN)

In order to report transactions involving certified reinsurers correctly, the appropriate Certified Reinsurer Identification Number (CRIN) must be included on Schedule S instead of the FEIN or Alien Insurer Identification Number (AIIN). The CRIN is assigned by the NAIC and is listed in the NAIC *Listing of Companies*. If a certified reinsurer does not appear in that publication, contact the NAIC Financial Systems and Services Department, Company Demographics Analyst at FDRCCREQ@NAIC.ORG for numbers assigned since the last publication or information on having a number assigned.

Newly assigned numbers are incorporated in revised editions of the NAIC *Listing of Companies*, which are available semi-annually. The NAIC also provides this information to annual statement software vendors for incorporation into the software.

If the premium in the jurisdiction represents both branch operations and other direct business (e.g., the policyholder or group member residence changed to the jurisdiction), then indicate “B.” If there are no branch operations in the jurisdiction, then leave blank. The definition of “branch operations” is the definition used by the reporting entity’s state of domicile.

Definitions for the following section Lines 1 – 58 Allocation by State/Jurisdiction

Resident

A member who occupies a dwelling within a state with indication that the state is their primary domicile by payment of taxes, voting registration, and other indicators.

Residence

The domicile location of a member as shown by his or her determination as a resident. In the context of Schedule T, the residence of the policyowner or group member would equate to the location that the member uses for official documents; information maintained by an employer as the home address of the employee would be accepted as a member’s residence for allocation purposes.

Situs of the Contract

The jurisdiction in which the contract is issued or delivered as stated in the contract.

Rule of 500

For individual and group life insurance shall be defined as a premium allocation method for group policies which 1) permits a reporting entity to allocate premiums and other considerations from a group policy covering fewer than 500 members to the state or territory in which the majority of covered members reside or to the situs of the contract; 2) requires a reporting entity to allocate premiums and other considerations from a non-employer group policy covering 500 or more members to the state or territory where each member resides and 3) requires a reporting entity to allocate premiums and other considerations from an employer group policy covering 500 or more members to the state or territory where each member resides or is employed.

For individual and group health insurance shall be defined as a premium allocation method for group policies which 1) permits a reporting entity to allocate premiums and other considerations from a non-employer group policy covering fewer than 500 members to the jurisdiction in which the majority of covered members reside or to the situs of the contract; 2) permits a reporting entity to allocate premiums and other considerations from an employer group policy covering fewer than 500 members to the jurisdiction in which the majority of covered members reside or are employed or to the situs of the contract; 3) requires a reporting entity to allocate premiums and other considerations from a non-employer group policy covering 500 or more members to the jurisdiction where each member resides and 4) requires a reporting entity to allocate premiums and other considerations from an employer group policy covering 500 or more members to the jurisdiction where each member resides or is employed.

Members

A person, employee, retiree, etc., that qualifies for and is covered under a group insurance policy. No consideration should be given to a member’s dependents for counting the number of members in a group or in allocating premium and other considerations to the various state and territories.

Lines 1 – 58 Allocation by states and territories for individual and group life insurance

The instructions are minimum allocation standards. More detailed methods of allocation are acceptable as long as they still encompass the minimum allocation instructions. Methods of allocation that better reflect the actual risk location by state are encouraged.

For individual policies, allocate and report premium and other considerations to a state or territory based on the residence of the policyowner, insured or payer. Use of policyowner, insured or payer residence should be established by company policy and must be consistently applied to all individual policies and reporting periods.

For group policies not provided by an employer, allocate and report premium and other considerations to a state or territory based on the residence of each group member. A group policy covering less than 500 members may allocate all group premium to the state or territory where the greatest number of members reside or to the situs of the contract (Rule of 500).

For group policies provided by an employer, allocate and report premium and other considerations based on the residence or the employment location of each covered group member. For group insurance provided by an employer covering less than 500 members, the premium may be allocated to one state or territory based on the residence or employment location of the greatest number of covered members or to the situs of the contract (Rule of 500).

For group insurance sold through associations or trusts, allocate and report premium and other considerations on a basis similar to group policies. Apply the Rule of 500 to the association or trust policy first. An association or trust policy covering less than 500 members may allocate all premium to the state or territory where the greatest number of members reside or work or to the situs of the contract. Regardless of the number of groups or employers under the association or trust policy, if the association or trust policy has more than 500 covered members, apply the Rule of 500 at the level of each group and employer in determining the allocation of the premium. The determination of state and territory allocation by group or employer should be added to the determination of state and territory allocation of each group or employer under the association or trust policy to come up with the total allocation of premium. Do not report all association or trust business in one state unless all covered members of the association or trust reside in one state, in fact or by operation of the Rule of 500. If the group is a collection of employers, do not report all premiums in one state or territory unless all of the covered employees reside or work in one state, in fact or by operation of the Rule of 500.

Example of an association policy that covers a group of employers: If the association policy covers more than 500 members, each employer would be reviewed to determine if coverage is provided through the association policy for more than 500 members. If an employer has less than 500 covered members, the premium for that employer may be reported in one state based on the residence or work location of the most employees or to the situs of the contract. If an employer covers more than 500 members through the association policy, the premium would be reported based on the residence or employment location of each member. The determination for each employer would be added to the determinations for all the other employers that provide coverage to employees through the association policy.

Reporting entities must have procedures to capture and maintain changes in member's residence and/or employment location and/or policyowner location when notified through renewals or other procedures and must use the changes to allocate premium and other considerations. It is not necessary to anticipate unreported changes in allocation at any specific reporting date.

For all group policies, the premium and other considerations associated with a member should be the basis of determining the amount of premium to report in a jurisdiction. If information is not available to associate a specific premium to each member, an allocation can be made based on the number of covered persons in a state or territory compared to the total number of the group's covered members and apply that ratio to the total group premium and other considerations.

Lines 1 – 58 Allocation by jurisdictions for individual and group health insurance

The instructions are minimum allocation standards. More detailed methods of allocation are acceptable as long as they still encompass the minimum allocation instructions. Methods of allocation that better reflect the actual risk location by jurisdiction are encouraged. The method should be established by company policy and must be consistently applied to all policies within each type and for all reporting periods.

For individual policies, allocate and report premium and other considerations to the jurisdiction based on the residence of the policyowner, insured or payer or on the situs of the contract.

For group policies not provided by an employer, allocate and report premiums and other considerations to the jurisdiction based on the Rule of 500, or on the situs of the contract.

For group policies provided by an employer, allocate and report premiums and other considerations to the jurisdiction based on the Rule of 500, location of employer or on the situs of the contract.

If using the Rule of 500 for group insurance sold through an association or trust, the following instructions apply:

Apply the Rule of 500 to the association or trust policy first. If the association or trust policy has more than 500 covered members, apply the Rule of 500 at the level of each group or employer in determining the allocation of the premium. The determination of jurisdiction allocation by group or employer should be added to the determination of jurisdiction allocation of each group or employer under the association or trust policy to come up with the total allocation of premium. Do not report all association or trust business in one state unless all covered members of the association or trust reside in one state, in fact or by operation of the Rule of 500. If the group is a collection of employers, do not report all premiums in one jurisdiction unless all of the covered employees reside or work in one state, in fact or by operation of the Rule of 500.

Example of an association policy that covers a group of employers: If the association policy covers more than 500 members, each employer would be reviewed to determine if coverage is provided through the association policy for more than 500 members. If an employer has less than 500 covered members, the premium for that employer may be reported in one state based on the Rule of 500. If an employer covers more than 500 members through the association policy, the premiums would be reported based on the residence or employment location of each member. The determination for each employer would be added to the determinations for all the other employers that provide coverage to employees through the association policy.

Where applicable, reporting entities must have procedures to capture and maintain changes in allocation when notified through renewals or other procedures and must use the changes to adjust the allocation of premiums and other considerations in subsequent financial statements. It is not necessary to anticipate unreported changes in allocation at any specific reporting date.

If allocating premiums to multiple jurisdictions under group policies, the premiums and other considerations associated with a member should be the basis of determining the amount of premium to report in a jurisdiction. If information is not available to associate a specific premium to each member, an allocation can be made based on the number of covered persons in a jurisdiction compared to the total number of the group's covered members and apply that ratio to the total group premiums and other considerations.

The allocation method established by the reporting entity in compliance with these instructions and the instructions of the domiciliary state should be consistently applied to all policies and reporting periods.

The data reported in Schedule T of the annual statement may or may not be used for the calculation of the amount of premium tax due to a state/jurisdiction. Individual states/jurisdictions may require a separate schedule to support premium tax calculations.

NOTE: Existing State laws and regulations need to be considered when applying these instructions.

INVESTMENT SCHEDULES GENERAL INSTRUCTIONS
(Applies to all investment schedules)

The following definitions apply to the investment schedules.

SAP Book Value (Defined in Glossary of *Accounting Practices and Procedures Manual*):

Original Cost, including capitalized acquisition costs and accumulated depreciation, unamortized premium and discount, deferred origination and commitment fees, direct write-downs and increase/decrease by adjustment.

SAP Carrying Value (Defined in Glossary of *Accounting Practices and Procedures Manual*):

The SAP Book Value plus accrued interest and reduced by any valuation allowance (IF APPLICABLE) and any nonadmitted adjustment applied to the individual investment. Carrying Value is used in the determination of impairment.

Adjusted Carrying Value:

Carrying Value amount adjusted to remove any accrued interest and to add back any of the following amounts: individual nonadmitted amounts, individual valuation allowances (IF APPLICABLE), and aggregate valuation allowance (IF APPLICABLE). In effect, this is equivalent to the definition of SAP Book Value (not to be confused with the old "Book Value" reported in the annual statement blanks for data years 2000 and prior).

Recorded Investment:

The SAP Book Value (Adjusted Carrying Value) plus accrued interest.

The information included in the investment schedules shall be broken down to the level of detail as required when all columns and rows are considered together unless otherwise addressed in specific instructions. For example, on Schedule D Part 4, a reporting entity is required to list the CUMIP book and adjusted carrying value, among other things. The reporting entity would only be required to break this information down to a lower level of detail if the information was inaccurate if reported in the aggregate. Thus, the reporting entity would not be required to break the information down by lot (information for each individual purchase) and could utilize the information for book/adjusted carrying value using an average cost basis, or some other method, provided the underlying data reported in that cell was calculated in accordance with the *Accounting Practices and Procedures Manual*. However, reporting entities are not precluded from reporting the information at a more detailed level (by lot) if not opposed by their domiciliary commissioner.

"To Be Announced" securities (commonly referred to as TBAs) are to be reported in Schedule D unless the structure of the security more closely resembles a derivative, as defined within *SSAP No. 86—Derivatives* in which case the security should be reported on Schedule DB. The exact placement of TBAs in the investment schedules depends upon how a company uses TBA.

For Rabbi Trusts, refer to *SSAP No. 104R—Share-Based Payments*, for accounting guidance.

For the Foreign Code columns in Schedules D and DA, the following codes should be used:

- "A" For Canadian securities issued in Canada and denominated in U.S. dollars.
- "B" For those securities that meet the definition of foreign provided in the Supplement Investment Risk Interrogatories and pay in a currency OTHER THAN U.S. dollars.
- "C" For foreign securities issued in the U.S. and denominated in U.S. dollars.
- "D" For those securities that meet the definition of a foreign as provided in the Supplement Investment Risk Interrogatories and denominated in U.S. dollars (e.g., Yankee Bonds or Eurodollar bonds).

Leave blank for those securities that do not meet the criteria for the use of "A," "B," "C" or "D."

Derivatives (Schedule DB); repurchase and reverse repurchase agreements (Schedule DA); and securities borrowing and securities lending transactions (Schedule DL) shall be shown gross when reported in the investment schedules. If these transactions are permitted to be reported net in accordance with *SSAP No. 64—Offsetting and Netting of Assets and Liabilities*, the investment schedule shall continue to provide detail of all transactions (gross), with the net amount from the valid right to offset reflected in the financial statements (pages 2 & 3 of the statutory financial statements). Disclosures for items reported net when a valid right to offset exists, including the gross amount, the amount offset, and the net amount reported in the financial statements are required per *SSAP No. 64—Offsetting and Netting of Assets and Liabilities*.

For the Columns that disclose information regarding investments that are not under the exclusive control of the reporting entity, and also including assets loaned to others, the following codes should be used:

- LS – Loaned or leased to others
- RA – Subject to repurchase agreement
- RR – Subject to reverse repurchase agreement
- DR – Subject to dollar repurchase agreement
- DRR – Subject to dollar reverse repurchase agreement
- C – Pledged as collateral – excluding collateral pledged to FHLB
- CF – Pledged as collateral to FHLB (including assets backing revolving agreements)
- DB – Placed under an option agreement
- DBP – Placed under an option agreement involving “asset transfers with put options”

(Note: Private placements are not to be included unless specific restrictions as to sale are included as part of the security agreement)
- RF – FHLB capital stock
- SD – Placed on deposit with state or other regulatory body
- M – Not under the exclusive control of the insurer for multiple reasons
- SS – Short sale of a security
- O – Other

Mortgages in good standing:

This section applies to loans on which all the original basic terms of the loan are being met by the borrowers. It also includes loans on which all the basic terms of refinancing agreements at current market terms are being met by the borrowers. Insured or guaranteed loans are considered to be only those loans insured or guaranteed by the Federal Housing Administration, the National Housing Act of Canada or by the Veterans Administration. For loans subject to a participation agreement, include only the reporting entity's share of book value/recorded investment excluding accrued interest.

Mortgages with restructured terms:

Restructured loans include commercial mortgage loans on which the basic terms such as interest rate, maturity date, collateral or guaranty have been restructured in 1986 or later as a result of actual or anticipated delinquency. Include those loans whose basic terms are being met in accordance with the restructuring agreement. A maturing balloon mortgage that has been refinanced or extended at below current market terms should be classified as a restructured loan. (A maturing balloon mortgage that has been refinanced or extended at current market terms should be considered a performing loan.) Current market terms are loan terms where the borrower pays a current market interest rate consistent with the collateral, maturity date and other terms of the mortgage.

A mortgage loan will no longer be considered in this category when one or more of the following events occur:

The loan is paid in full or otherwise retired;

The loan becomes delinquent under the terms of the restructure agreement;

The loan is in the process of foreclosure;

The borrower has resumed the original contractual terms on the current loan balance including payments, interest rate and loan duration. The borrower must have also made cash payments of any interest or principal foregone during the restructure.

If none of the above are met, a loan will no longer be considered as restructured when all of the following conditions exist:

The loan-to-value ratio based upon the current appraisal cannot be greater than 80%. Additionally, the loan-to-value ratio cannot be greater than the state of domicile's limits for first mortgages. An independent appraiser must perform the current appraisal. The appraisal requirement does not apply to individual loans the lesser of \$1 million or 5% of capital and surplus. The aggregate of such exempted loans must not exceed 15% of total long-term mortgage holdings.

AND

The coupon rate after restructuring is a current market rate. Such coupon rates should be consistent with the coupon rate on new commercial mortgages of comparable terms made by the reporting entity in the quarter in which the restructure date occurred; or

On the restructure date, not be less than the quarterly average of new commercial mortgage loan rates of loans of comparable terms from the Survey of Mortgage Commitments of Commercial Properties by the American Council of Life Insurers, by more than ½ of a percentage point difference.

AND

The restructured mortgage loan performs according to the new terms for at least two years.

Mortgages with overdue interest over 90 days not in the process of foreclosure:

Show individually mortgages upon which interest is overdue more than 90 days or upon which taxes or other liens are delinquent more than one year.

Mortgages in process of foreclosure:

This section applies to loans in the process of being foreclosed or voluntarily conveyed by the borrower to the lender. It also includes loans in which transfer of title is awaiting expiration of redemption or moratorium period.

Any increases in the investments in SCA companies that adjust the cost basis (e.g., subsequent capital infusions [investments] in SCA companies valued using the equity method).

This schedule should NOT be used for stock splits to show increases in the number of shares, nor should it be used for stock dividends to show increases in the number of shares (unless the stock shares received and dividends are in a stock that is not already owned by the reporting entity – e.g., received in a spin off).

Bonds, preferred stocks and common stocks are to be grouped separately, showing a subtotal for each category.

Bond Mutual Funds – as Identified by the SVO and Exchange Traded Funds – as Identified by the SVO, which are described in the Investment Schedules General Instructions, are to be included in SVO Identified Funds.

Column 1 – CUSIP Identification

CUSIP numbers for all purchased publicly issued securities are available from the broker’s confirmation or the certificate. For private placement securities, the NAIC has created a special number called a PPN to be assigned by the Standard & Poor’s CUSIP Bureau. For foreign securities, use a CINS that is assigned by the Standard & Poor’s CUSIP Bureau:

www.cusip.com/cusip/index.htm.

If no valid CUSIP, CINS or PPN number exists, then report a valid ISIN (Column 15) security number. The CUSIP field should be zero-filled.

Column 2 – Description

Give a description of all bonds and preferred and common stocks. As appropriate, the reporting entity is encouraged to include data consistent with that reported in Column 13, Issuer and Column 14, Issue. This does not preclude the company from including additional detail to provide a complete and accurate description. Abbreviations may be used as needed.

For Bond Mutual Funds – as Identified by the SVO and Exchange Traded Funds – as Identified by the SVO, enter the complete name of the fund. As appropriate, the reporting entity is encouraged to include data consistent with that reported for Column 13, Issuer.

For Certificate of Deposit Account Registry Service (CDARS) or other similar services that have a maturity of greater than one year, individually list the various banking institutions that are financially responsible for honoring the certificates of deposit. As appropriate, the name of the banking institutions should follow from the registry of the Federal Financial Institutions Examination Council (FFIEC) (www.ffiec.gov/nicpubweb/nicweb/SearchForm.aspx).

For Collateralized Debt Obligations (CDOs) or Collateralized Loan Obligations (CLOs), indicate what the CDO/CLO collateral is, such as high-yield bonds, corporate loans, etc. If the collateral is of mixed type, indicate “Mix,” in addition to the largest type of collateral in the mix. If the collateral is derived synthetically, indicate “synthetic.”

Column 3 – Foreign

Insert the appropriate code in the column based on the **matrix provided in the Investment Schedules General Instructions**.

Column 5 – Name of Vendor

The items with reference to each issue of bonds and stocks acquired at public offerings may be totaled in one line and the word “various” inserted.

Exclude: Accrued interest and dividends.

All other costs, including internal costs or costs paid to an affiliated reporting entity related to origination, purchase or commitment to purchase bonds shall be charged to expense when incurred.

Column 8 – Par Value

For mortgage-backed/loan-backed and structured securities, enter the par amount of principal purchased on a security on which the reporting entity has a claim. An interest-only bond with a small par amount of principal would use that amount.

For preferred stock, enter par value per share of stock, if any.

For Bond Mutual Funds – as Identified by the SVO and Exchange Traded Funds – as Identified by the SVO, enter 0.

Column 9 – Paid for Accrued Interest and Dividends

For the meaning and applicability of suffixes and designations, please refer to the most recent version of the *Purposes and Procedures Manual of the NAIC Investment Analysis Office* Part One, Section 3.

It is used for numbering specific securities, such as stocks, bonds, options and futures. ISIN numbers are administered by a National Numbering Agency (NNA) in each of their respective countries, and they work just like serial numbers for those securities. Record the ISIN number only if no valid CUSIP, CINS or PPN exists to report in Column 1.

Not for Distribution

SCHEDULE D – PART 4

LONG-TERM BONDS AND STOCKS SOLD, REDEEMED OR OTHERWISE DISPOSED OF DURING THE CURRENT QUARTER

This schedule should include a detail listing of all securities that were sold/disposed of during the current quarter that were owned as of the beginning of the current quarter. Detailed information for investments that are acquired and disposed of during the current reporting quarter should be included in this schedule and in Schedule D, Part 3. Note that this is not a detailed listing of items for the Year-to-Date. This should include all transactions that adjust the cost basis of the securities (except other-than-temporary impairments that are not part of a disposal transaction). Thus, it should not be used for allocations of TBAs to specific pools subsequent to initial recording in Schedule D, Part 3, or other situations such as CUSIP number changes. The following list of items provides examples of the items that should be included:

Pay downs of securities still owned (including CMO prepayments);

Subsequent partial sales of investment issues still owned;

Reallocation of the cost basis of an already owned stock to the cost basis of a new stock received as a dividend (e.g., spin off); and

Any decreases in the investments in SCA companies that adjust the cost basis, not including other-than-temporary impairments (e.g., subsequent return of capital from investments in SCA companies valued using the equity method).

Bonds, preferred stocks and common stocks are to be grouped separately, showing a subtotal for each category.

Bond Mutual Funds – as Identified by the SVO and Exchange Traded Funds – as Identified by the SVO, which are described in the Investment Schedules General Instructions are to be included in SVO Identified Funds.

Bonds are to be grouped as listed below and each category arranged alphabetically (securities included in U.S. States, Territories and Possessions; U.S. Political Subdivisions of State, Territories and Possessions; and U.S. Special Revenue and Special Assessment Obligations and all Non-Guaranteed Obligations of Agencies and Authorities of Governments and Their Political Subdivisions should be listed with a state abbreviation in the column provided for electronic data capture).

If a reporting entity has any detail lines reported for any of the following required categories or subcategories, it shall report the subtotal amount of the corresponding category or subcategory, with the specified subtotal line number appearing in the same manner and location as the pre-printed total or grand total line and number:

NOTE: See the Investment Schedules General Instructions for the following:

For Collateralized Debt Obligations (CDOs) or Collateralized Loan Obligations (CLOs), indicate what the CDO/CLO collateral is, such as high-yield bonds, corporate loans, etc. If the collateral is of mixed type, indicate “mix,” in addition to the largest type of collateral in the mix. Column 9	– Actual Cost	<p>This is the recorded cost of the investment purchased during or prior to the current reporting quarter and sold during the current reporting quarter. If purchase was recorded on prior year Annual Statement and sold during the current reporting quarter, the amount will come from the prior reporting year's Actual Cost column of Schedule D, Part 1 for bonds, Schedule D, Part 2, Section 1 for preferred stock, and Schedule D, Part 2, Section 2 for common stock. - Exclude: Accrued interest.
- This should equal the Actual Cost Column amount (adjusted for other-than-temporary impairments recognized) for each specific common stock and for each preferred stock that is not amortizable; and the Amortized Cost (adjusted for other-than-temporary impairments recognized) at disposal date for each specific redeemable preferred stock that is amortizable.
- Column 17 – Foreign Exchange Gain (Loss) on Disposal
- Report the foreign exchange gain or loss on disposal.
- Column 18 – Realized Gain or (Loss) on Disposal
- This should be the difference between the Consideration column amount and the Book/Adjusted Carrying Value at Disposal Date, excluding any portion that is attributable to foreign exchange differences.
- For Bond Mutual Funds – as Identified by the SVO and Exchange Traded Funds – as Identified by the SVO, enter the difference between the consideration, Column 7 and aggregate cost Column 9 at date of sale.
- For securities sold, redeemed or otherwise disposed of, which generate investment income as a result of a prepayment penalty and/or acceleration fee; the amount of realized gain (loss) reported is equal to the Par value of the investment (Column 8) less the BACV at the Disposal Date (Column 16).

Column 25 – Issuer

Issuer Definition:

The name of the legal entity that develops, registers and sells securities for the purpose of financing its operations and may be domestic or foreign governments, corporations or investment trusts. The issuer is legally responsible for the obligations of the issue and for reporting financial conditions, material developments and any other operational activities as required by the regulations of their jurisdictions.

The reporting entity is encouraged to use the following sources:

- Bloomberg
- Interactive Data Corporation (IDC)
- Thomson Reuters
- S&P/CUSIP
- Name used in either the relevant SEC filing or legal documentation for the transaction. Issuer is the name of the legal entity that can be found on documents such as SEC Form 424B2, Note Agreements, Prospectuses and Indentures, as appropriate. The name used should be as complete and detailed as possible to enable others to differentiate the legal entity issuing the security from another legal entity with a similar name.

Do not report ticker symbols, either internal or otherwise.

Column 26 – Issue

Issue information provides detailed data as to the type of security being reported (e.g., coupon, description of security, etc.). Below are examples of what could be provided, but additional information should be provided as appropriate for the security.

6% Senior 2018
7% Subordinated Debenture 03/15/2022
3% NY Housing Authority Debenture 2035

The reporting entity is encouraged to use the following sources:

- Bloomberg
- Interactive Data Corporation (IDC)
- Thomson Reuters
- S&P/CUSIP
- Descriptions used in either the relevant SEC filing or legal documentation for the transaction.

Do not report ticker symbols, either internal or otherwise, include tranche information.

Column 27 – ISIN Identification

The International Securities Identification Numbering (ISIN) system is an international standard set up by the International Organization for Standardization (ISO). It is used for numbering specific securities, such as stocks, bonds, options and futures. ISIN numbers are administered by a National Numbering Agency (NNA) in each of their respective countries, and they work just like serial numbers for those securities. Record the ISIN number only if no valid CUSIP, CINS or PPN exists to report in Column 1.

SCHEDULE DB

DERIVATIVE INSTRUMENTS

All derivatives, regardless of maturity date, are to be reported on Schedule DB. Forward commitments where the reporting entity cannot determine at the inception of the contract, with certainty, if delivery will be made at the earliest opportunity are essentially forward contracts and should be reported on Schedule DB.

This schedule should be used to report derivative instruments. Specific accounting procedures for each derivative instrument will depend on the definition below and documented intent that best describes the instrument. Uses of derivative instruments that are reported in this schedule include hedging, income generation, replication and other. State investment laws and regulations should be consulted for applicable limitations and permissibility on the use of derivative instruments. If the derivative strategy meets the definition of hedging as outlined in *SSAP No. 86—Derivatives*, then the underlying derivative transactions composing that strategy should be reported in that category of Schedule DB. If the underlying derivative strategy does not meet the definition of hedging as per *SSAP No. 86—Derivatives*, then the underlying derivative transactions composing that strategy should be reported as either hedging other, replication, income generation or other.

DEFINITIONS OF DERIVATIVE INSTRUMENTS

A hedge transaction is “Anticipatory” if it relates to:

- a. A firm commitment to purchase assets or incur liabilities;
- b. An expectation (but not obligation) to purchase assets or incur liabilities in the normal course of business.

“*Underlying Interest*” means the asset(s), liability(ies) or other interest(s) underlying a derivative instrument, including, but not limited to, any one or more securities, currencies, rates, indices, commodities, derivative instruments or other financial market instruments.

“*Option*” means an agreement giving the buyer the right to buy or receive, sell or deliver, enter into, extend or terminate, or effect a cash settlement based on the actual or expected price, level, performance or value of one or more Underlying Interests.

“*Warrant*” means an agreement that gives the holder the right to purchase an underlying financial instrument at a given price and time or at a series of prices and times according to a schedule or warrant agreement.

“*Cap*” means an agreement obligating the seller to make payments to the buyer, each payment under which is based on the amount, if any, that a reference price, level, performance or value of one or more Underlying Interests exceed a predetermined number, sometimes called the strike/cap rate or price.

“*Floor*” means an agreement obligating the seller to make payments to the buyer, each payment under which is based on the amount, if any, that a predetermined number, sometimes called the strike/floor rate or price exceeds a reference price, level, performance or value of one or more Underlying Interests.

“*Collar*” means an agreement to receive payments as the buyer of an Option, Cap or Floor and to make payments as the seller of a different Option, Cap or Floor.

“*Swap*” means an agreement to exchange or net payments at one or more times based on the actual or expected price, level, performance or value of one or more Underlying Interests or upon the probability occurrence of a specified credit or other event.

“*Forward*” means an agreement (other than a Future) to make or take delivery of, or effect a cash settlement based on, the actual or expected price, level, performance or value of one or more Underlying Interests.

“*Future*” means an agreement traded on an exchange, Board of Trade or contract market to make or take delivery of, or effect a cash settlement based on the actual or expected price, level, performance or value of one or more Underlying Interests.

“*Option Premium*” means the consideration paid (received) for the purchase (sale) of an Option.

“*Swaption*” means an agreement granting the owner the right, but not the obligation, to enter into an underlying swap.

“*Margin Deposit*” means a deposit that an insurer is required to maintain with a broker with respect to the Futures Contracts purchased or sold.

DEFINITION OF NOTIONAL AMOUNT

The definition below is intended to be a principle for determining notional for all derivative instruments. To the extent a derivative type is not explicitly addressed in a through c, notional should be reported in a manner consistent with this principle.

“Notional amount” is defined as the face value of a financial instrument in a derivatives transaction as of a reporting date, which is used to calculate future payments in the reporting currency. Notional amount may also be referred to as notional value or notional principal amount. The notional amount reported should remain static over the life of a trade unless the instrument is partially unwound or has a contractually amortizing notional. The notional amount shall apply to derivative transactions as follows:

- a. For derivative instruments other than futures contracts (e.g., options, swaps, forwards), the notional amount is either the amount to which interest rates are applied in order to calculate periodic payment obligations or the amount of the contract value used to determine the cash obligations. Non-U.S. dollar contracts must be multiplied or divided by the appropriate inception foreign currency rate.
- b. For futures contracts, with a U.S. dollar-denominated contract size (e.g., Treasury note and bond contracts, Eurodollar futures) or underlying, the notional amount is the number of contracts at the reporting date multiplied by the contract size (value of one point multiplied by point value).
- c. For equity index and similar futures, the number of contracts at the reporting date is multiplied by the value of one point multiplied by the transaction price. Non-U.S. dollar contract prices must be multiplied or divided by the appropriate inception foreign currency rate.

GENERAL INSTRUCTIONS FOR SCHEDULE DB

Each derivative instrument should be reported in Parts A, B or C according to the nature of the instrument, as follows:

- Part A: Positions in Options*, Caps, Floors, Collars, Swaps, and Forwards**
- Part B: Positions in Futures Contracts
- Part C: Positions in Replication (Synthetic Assets) Transactions

* Warrants acquired in conjunction with public or private debt or equity that are more appropriately reported in other schedules do not have to be reported in Schedule DB.

** Forward commitments that are not derivative instruments (for example, the commitment to purchase a GNMA security two months after the commitment date or a private placement six months after the commitment date) should be disclosed in the Notes to Financial Statements, rather than on Schedule DB.

All derivatives, regardless of maturity date, are to be reported on Schedule DB. Forward commitments where the reporting entity cannot determine at the inception of the contract, with certainty, if delivery will be made at the earliest opportunity are essentially forward contracts and should be reported on Schedule DB.

The company may be required to demonstrate the intended hedging characteristics under state statute in order to report in this derivatives "Hedging Other" category.

The fair value is the value at which the instrument(s) could be exchanged in a current transaction. Amortized or book/adjusted carrying values should not be substituted for fair value. Public market quotes are the best indication of fair value. The company should document the determination of fair value.

Part D should be used to report the counterparty exposure (i.e., the exposure to credit risk on derivative instruments) to each counterparty (or guarantor, as appropriate).

Derivatives shall be shown gross when reported in the Schedule DB. If these transactions are permitted to be reported net in accordance with *SSAP No. 64—Offsetting and Netting of Assets and Liabilities*, the investment schedule shall continue to provide detail of all transactions (gross), with the net amount from the valid right to offset reflected in the financial statements (pages 2 & 3 of the statutory financial statements). Disclosures for items reported net when a valid right to offset exists, including the gross amount, the amount offset, and the net amount reported in the financial statements are required per *SSAP No. 64—Offsetting and Netting of Assets and Liabilities*.

Definitions:

Hedging Effective:

A derivative transaction that is used in hedging transactions that meet the criteria of a highly effective hedge as described in *SSAP No. 86—Derivatives*, which are valued and reported in a manner that is consistent with the hedged asset or liability. These transactions have been voluntarily designated and are effective as of the reporting date.

Hedging Other:

A derivative transaction that is used in a hedging transaction where the intent is for an economic reduction of one or more risk factors. This transaction is not part of an effectively designated relationship as described under *SSAP No. 86—Derivatives*, guidance of the reporting date.

Replication:

A derivative transaction entered into in conjunction with other investments in order to reproduce the investment characteristics of otherwise permissible investments as described under *SSAP No. 86—Derivatives*. A derivative transaction entered into by a reporting entity as a hedging or income generation transaction shall not be considered a replication (synthetic asset) transaction. These transactions are considered to be replication as of the reporting date.

Income Generation:

A derivative transaction written or sold to generate additional income or return to the reporting entity as described under *SSAP No. 86—Derivatives*.

Other:

A derivative transaction written or sold by the reporting entity used for means other than (1) Hedging Effective; (2) Hedging Other; (3) Replication; or (4) Income Generation (definitions listed above or referenced in *SSAP No. 86—Derivatives*). When this subcategory is utilized, a description of the use should be included in the footnotes to the financial statements.

Value of One (1) Point:

The monetary value of a one (1) point move in a futures position published by the exchange. May also be referred to as “Lot Size,” “Lots” or “Points” by the exchange.

Interest rate and currency swap [where receive/(pay) notional amounts are denominated in different currencies], are filed under the “Foreign Exchange” swap subcategory.

Include all options, caps, floors, collars, swaps and forwards owned as of the current statement date, including those owned on December 31 of the previous year, and those acquired during the current year.

Column 1 – Description

Give a complete and accurate description of the derivative instrument, including a description of the underlying securities, currencies, rates, indices, commodities, derivative instruments or other financial market instruments.

Include details such as:

- For options, the basis. For example, caps should include the underlying interest rate (e.g., CMS 5 year) and frequency of the reset (typically three months);
- For credit default swaps, the name of the reference entity (a single issuer or an index) and the equity ticker symbol, if available;
- For currency derivatives, report the currency and describe the pay/receive (or buy/sell) legs of the transaction; and
- For baskets, note that it is a basket and include the top five equity tickers, if applicable.

Where leveraging is a feature of the payment terms, the multiplier effect will be clearly presented in the description.

For swaptions, include the hedge ID number, the term of the option (i.e., time from effective date to maturity date of the option aspect), and the start and end dates of the underlying swap.

If traded on an exchange, disclose the ticker symbol. Indicate the maturity of the underlying, as appropriate.

Do not use internal descriptions or identifiers unless provided as supplemental information.

Column 2 – Description of Items Hedged or Used for Income Generation or Replicated

Describe the assets or liabilities hedged, including CUSIP(s) when appropriate. For example, “Bond Portfolio Hedge,” “VAGLB Hedge,” “Fixed Annuity Hedge,” “Investment in Foreign Operations,” etc.

Column 16 – Fair Value

See the Glossary of the *Accounting Practices and Procedures Manual* for a definition of fair value. For purposes of this column, fair value can be obtained from any one of these sources:

- a. A pricing service.
- b. An exchange.
- c. Broker or custodian quote.
- d. Determined by the insurer.

Column 17 – Unrealized Valuation Increase/(Decrease)

For purposes of this schedule, **increases** should be reported when the change results in an increase to the asset or a decrease to the liability. A **decrease** should be reported when the change results in a decrease to the asset or an increase to the liability.

The total unrealized valuation increase/(decrease) for a specific derivative will be the change in Book/Adjusted Carrying Value that is due to carrying or having carried (in the previous year) the derivative at Fair Value.

These amounts are to be reported as unrealized capital gains(losses) in the Exhibit of Capital Gains/(Losses) and in the Capital and Surplus Account.

Column 18 – Total Foreign Exchange Change in Book/Adjusted Carrying Value

This is a positive or negative amount that is defined as the portion of the total change in Book/Adjusted Carrying Value for the year that is attributable to foreign exchange differences for a particular derivative.

The amounts reported in this column should be included as net unrealized foreign exchange capital gain (loss) in the Capital and Surplus Account.

For purposes of this schedule, **positive amounts** should be reported when the change results in an increase to the asset or a decrease to the liability. A **negative amount** should be reported when the change results in a decrease to the asset or an increase to the liability.

Column 19 – Current Year's (Amortization)/Accretion

For purposes of this schedule, **positive amounts** should be reported when the change results in an increase to the asset or a decrease to the liability. A **negative amount** should be reported when the change results in a decrease to the asset or an increase to the liability.

Column 20 – Adjustment to the Carrying Value of Hedged Item

This represents the amortized book/adjusted carrying value used to adjust the basis of the hedged item(s) during the current year.

Column 21 – Potential Exposure

Potential Exposure is a statistically derived measure of the potential increase in derivative instrument risk exposure, for derivative instruments that generally do not have an initial cost paid or consideration received, resulting from future fluctuations in the underlying interests upon which derivative instruments are based.

For collars, swaps other than credit default swaps and forwards, the Potential Exposure = 0.5% x “Notional Amount” x Square root of (Remaining Years to Maturity).

For credit default swaps, enter the larger of notional amount or maximum potential payment.

For purchased credit default swaps bought for protection, the amount reported will be zero.

If the maximum potential exposure cannot be determined, enter zero and explain in the Notes to Financial Statement.

Disclose in the footnotes to the annual statement any assets, held either as collateral or by third parties that the reporting entity can obtain and liquidate to recover all or a portion of the amounts paid under the derivative.

Column 22 – Credit Quality of Reference Entity

Only applies to credit default swaps (for other derivatives, leave blank)

Disclose:

- NAIC designation of the reference entity or, if not available, then
- NAIC designation equivalent to the reference entity, if it is CRP rated; or, if not available, then
- The company's own credit assessment translated into a NAIC designation equivalent with a “*” to indicate that the designation is based on the reporting entity's own internal evaluation of the reference entity's creditworthiness.

For first loss type of basket credit default swaps, use the lowest designation in the basket.

For other types of baskets, or other structures, determine a designation that fairly represents the likelihood of credit losses.

Column 23 – Hedge Effectiveness at Inception and at Quarter-end

For hedge transactions, show, as a percentage, expressed as (XX / YY), where “XX” shows the hedge effectiveness percentage at inception and “YY” shows the hedge effectiveness percentage, at current statement date.

For example, 100.45% hedge effectiveness at inception and 94.90% hedge effectiveness on December 31 of the current year is reported as “100 / 95.”

Round to the nearest whole percentage. Do not use decimals.

When hedge effectiveness cannot be calculated, enter a reference code number in this column (e.g., 0001, 0002, etc.) then disclose the financial or economic impact of the hedge at the end of the reporting period in Schedule DB footnotes for each reference code number used in the schedule.

A reference code number may be used multiple times in this column to indicate the same explanation.

For example: 0001 Reduces bond portfolio duration by .2 years.

a) Fair Value Hedges:

How much of the change in value of the hedged item(s) was hedged by the change in value of the derivative, both:

- At the inception of the derivative transaction.
- At current statement date.

b) Cash Flow Hedges:

How much of the change in cash flows or present value of cash flows of the hedged item(s) was hedged by the change in cash flows or present value of cash flows of the derivative, both:

- At the inception of the derivative transaction.
- At current statement date.

**** Columns 24 through 27 will be electronic only. ****

Column 24 – Method Used to Obtain Fair Value Code

Whenever possible, fair value should represent the amount of money the reporting entity would receive (pay) in order to close the derivative position at the market price. Fair value should only be determined analytically when the market price-based value cannot be obtained.

Insert the code for the method used by the issuer to determine the Fair Value. Following is a listing of the valid method codes:

- “a” – For derivatives where the fair value is determined by a pricing service.
- “b” – For derivatives where the fair value is determined by a stock exchange.
- “c” – For derivatives where the fair value is determined by a broker or the reporting entity’s custodian. To use this method 1) the broker must be approved by the reporting entity as a derivative counterparty; and 2) the reporting entity shall obtain and retain the pricing policy of the broker or custodian that provided the quotations.
- “d” – For derivatives where the fair value is determined by the reporting entity. The reporting entity is required to maintain a record of the pricing methodology used.

Column 25 – Source Used to Obtain Fair Value

For Method Code “a,” identify the specific pricing service used.

For Method Code “b,” identify the specific stock exchange used.

The listing of most **stock exchange codes can be found in the Investment Schedules General Instructions or the following Website:**

www.fixprotocol.org/specifications/exchanges.shtml

For Method Code “c,” identify the specific broker or custodian used.

For Method Code “d,” leave blank.

Column 26 – Method of Clearing (C or U)

Indicate whether derivative transaction is cleared through a centralized clearinghouse with a “C” or not cleared through a centralized clearinghouse with a “U.”

Column 27 – Legal Entity Identifier (LEI)

Provide the 20-character Legal Entity Identifier (LEI) for counterparty as assigned by a designated Local Operating Unit. If no LEI number has been assigned, leave blank.

These transactions have been voluntarily designated and are effective as of the reporting date.

A derivative transaction entered into in conjunction with other investments in order to reproduce the investment characteristics of otherwise permissible investments described under *SSAP No. 86—Derivatives*, guidance. A derivative transaction entered into by a reporting entity as a hedging or income generation transaction shall not be considered a replication (synthetic asset) transaction. These transactions are considered to be replications as of the reporting date.

Column 21 – Hedge Effectiveness at Inception / and at Quarter-end

For hedge transactions, show, as a percentage, expressed as (XX / YY), where “XX” shows the hedge effectiveness percentage at inception and “YY” shows the hedge effectiveness percentage at reporting date.

For example, 100.45% hedge effectiveness at inception and 94.90% hedge effectiveness on December 31 of the current year is reported as “100 / 95.”

Round to the nearest whole percentage. Do not use decimals.

When hedge effectiveness cannot be calculated, enter a reference code number in this column (e.g., 0001, 0002, etc.) then disclose the financial or economic impact of the hedge at the end of the reporting period in Schedule DB footnotes for each reference code number used in the schedule.

A reference code number may be used multiple times in this column to indicate the same explanation.

For example: 0001 Reduces bond portfolio duration by .2 years.

- At reporting date.

Column 22 – Value of One (1) Point

**** Column 23 will be electronic only. ****

Column 23 – Legal Entity Identifier (LEI)

Provide the 20-character Legal Entity Identifier (LEI) for counterparty as assigned by a designated Local Operating Unit. If no LEI number has been assigned, leave blank.

SCHEDULE DB – PART D – SECTION 1

**COUNTERPARTY EXPOSURE FOR DERIVATIVE INSTRUMENTS OPEN
AS OF CURRENT STATEMENT DATE**

Counterparty Exposure to any one counterparty is the exposure to credit risk associated with the use of derivative instruments with that counterparty. This section displays the Book/Adjusted Carrying Value exposure and Fair Value exposure to each counterparty, net of collateral. Also displayed is the total potential exposure for each counterparty for Schedule DB, Parts A and B.

On the first line, show the aggregate sum for exchange traded derivatives.

On subsequent lines, show separately six groups of OTC (over-the-counter) derivative counterparties by NAIC Designation, followed by the aggregate sum for centrally cleared derivatives.

Within each group, list the counterparties or central clearinghouses in alphabetical order.

For each counterparty with a master agreement, show on a second line, if applicable, totals for derivative instruments not covered by the master agreement.

Use additional lines, as needed, if multiple master agreements with the counterparty exist that do not provide for netting of offsetting amounts by the reporting entity against the counterparty upon termination in the event that the counterparty defaults.

Show subtotals for each group.

If a reporting entity has any detail lines reported for any of the following required groups, it shall report the subtotal amount of the corresponding group with the specified subtotal line number appearing in the same manner and location as the pre-printed total.

Aggregate Sum of Exchange Traded Derivatives.....	0199999
Total NAIC 1 Designation.....	0299999
Total NAIC 2 Designation.....	0399999
Total NAIC 3 Designation.....	0499999
Total NAIC 4 Designation.....	0599999
Total NAIC 5 Designation.....	0699999
Total NAIC 6 Designation.....	0799999
Aggregate Sum of Central Clearinghouses.....	0899999
Total (Sum of 0199999, 0299999, 0399999, 0499999, 0599999, 0699999, 0799999 & 0899999)	0999999

Column 1 Description of Exchange, Counterparty or Central Clearinghouse

The first line (Line 0199999) is for the Aggregate Sum of Exchange Traded Derivatives.

On subsequent lines, show the name and the Commodity Futures Trading Commission’s Legal Entity Identifier (LEI), if an LEI number has been assigned, for the counterparty or central clearinghouse.

Include the name and the LEI of the central clearinghouse and the derivatives clearing member, where appropriate.

Column 2 – Master Agreement (Y or N)

The lines for the Aggregate Sum of Exchange Traded Derivatives (Line 0199999) and for the Aggregate Sum of Central Clearinghouses (Line 0899999) should be left blank.

For OTC counterparties, indicate “Y” if:

1. The reporting entity has a written International Swaps and Derivatives Association (ISDA) master agreement with the counterparty that provides for the netting of offsetting amounts by the reporting entity against the counterparty upon termination in the event that the counterparty defaults, or if such netting provisions of an ISDA master agreement are either incorporated by reference in transaction confirmations or are otherwise contractual provisions to which derivative instrument confirmations with the counterparty are subject, or if the reporting entity has a written non-ISDA master agreement with the counterparty that provides for the netting of offsetting amounts or the right of offset by the reporting entity against the counterparty upon termination in the event that the counterparty defaults; and
2. The domiciliary jurisdiction of such counterparty is either within the United States or, if not within the United States, is within a foreign (non-United States) jurisdiction listed in the *Purposes and Procedures Manual of the NAIC Investment Analysis Office* as eligible for netting.

Column 3 – Credit Support Annex (Y or N)

The lines for the Aggregate Sum of Exchange Traded Derivatives (Line 0199999) and for the Aggregate Sum of Central Clearinghouses (Line 0899999) should be left blank.

For OTC counterparties, indicate “Y” if:

The reporting entity has an additional annex to the International Swaps and Derivatives Association (ISDA) master agreement called a Credit Support Annex (CSA). The CSA agreement with the counterparty provides functionality of collateral postings against net counterparty exposure in excess of a threshold amount. This limits the net exposure insurer has to derivative counterparty in the event of a counterparty default.

Column 4 – Fair Value of Acceptable Collateral

Leave blank for the aggregate reporting of Exchange Traded Derivatives (Line 0199999).

For OTC counterparties, show the Fair Value of acceptable collateral pledged by the counterparty.

For central clearinghouses, this amount would be the net positive variation margin received by the company.

“Acceptable collateral” means cash, cash equivalents, securities issued or guaranteed by the United States or Canadian governments or their government-sponsored enterprises, letters of credit, publicly traded obligations designated 1 by the SVO, government money market mutual funds, and such other items as may be defined as acceptable collateral in the *Purposes and Procedures Manual of the NAIC Investment Analysis Office*. For purposes of this definition, the term “letter of credit” means a clean, irrevocable and unconditional letter of credit issued or confirmed by, and payable and presentable at, a financial institution on the list of financial institutions meeting the standards for issuing such letter of credit published pursuant to the *Purposes and Procedures Manual of the NAIC Investment Analysis Office*. The letter of credit must have an expiration date beyond the term of the subject transaction.

For Columns 5 and 6, Book/Adjusted Carrying Values that are debit balances on the balance sheet are positive numbers; those that are credit balances are negative numbers.

Column 5 – Contracts with Book/Adjusted Carrying Value > 0 (i.e., debit balance on balance sheet)

On the first line, show the aggregate sum for exchange traded derivatives that have a positive Book/Adjusted Carrying Value.

For futures, this equals the sum of the positive cumulative variation margin for highly effective futures (Part B, Section 1, Column 15), plus the sum of the ending balance of all cash deposits with brokers (Part B, Section 1, Broker Name/Net Cash Deposits Footnote – Ending Cash Balance).

On subsequent lines, show the sum of the Book/Adjusted Carrying Values of all derivative instruments with the counterparty or central clearinghouse that have a positive statement value.

Column 6 – Contracts with Book/Adjusted Carrying Value < 0 (i.e., credit balance on balance sheet)

On the first line, show the sum of the statement values in parentheses () of all exchange traded derivatives that have a negative Book/Adjusted Carrying Value.

For Futures, this equals the sum of the negative cumulative variation margin for highly effective futures (Part B, Section 1, Column 15).

On subsequent lines, show the sum of the Book/Adjusted Carrying Values in parentheses () of all derivative instruments with the counterparty or central clearinghouse that have a negative Book/Adjusted Carrying Value.

Column 7 – Exposure Net of Collateral (Book/Adjusted Carrying Value)

For the aggregate reporting of exchange traded derivatives (Line 0199999), show amount in Column 5.

For OTC counterparties, if no master agreement is in place, show the sum of the Book/Adjusted Carrying Values of all derivative instruments with the counterparty that have a positive Book/Adjusted Carrying Value, less any Acceptable Collateral (Column 5 – Column 4).

For OTC counterparties with a master agreement in place and central clearinghouses, show the net sum of the Book/Adjusted Carrying Values of all derivative instruments, less any acceptable collateral (Column 5 + Column 6 – Column 4).

This amount should not be less than zero.

For Columns 8 and 9, market values that would be debit balances on the balance sheet are positive numbers; those that would be credit balances are negative numbers.

Column 8 – Contracts with Fair Value > 0 (i.e., debit balance on the balance sheet)

Show the sum of the market values of all derivative instruments that have a positive market value.

Column 9 – Contracts with Fair Value < 0 (i.e., credit balance on the balance sheet)

Show the sum of the market values in parentheses () of all derivative instruments that have a negative market value.

Column 10 – Exposure Net of Collateral (Fair Value)

For the aggregate reporting of exchange traded derivatives (Line 0199999), show amounts in Column 8.

For OTC counterparties with a master agreement in place, exchange-traded derivatives and central clearinghouses show the net sum of the market values of all derivative instruments, less any acceptable collateral (Column 8 + Column 9 – Column 4).

This amount should not be less than zero.

Column 11 – Potential Exposure

Show the potential exposure for Parts A and B for exchange traded derivatives in aggregate (Line 0199999) and for each OTC counterparty and central clearinghouse.

Column 12 – Off-Balance Sheet Exposure

For OTC counterparties:

If Column 2 = yes; show [Column 5 + Column 6 – Column 4 + Column 11] – Column 7 but not less than zero.

If Column 2 = no; show Column 11.

Optional: If there is no master netting agreement, companies may still encounter double-counting in cases where a premium is received for an off-balance sheet derivative transaction, such as an interest rate swap. In such cases, report “no” in Column 2 and calculate off-balance sheet exposure on a contract-by-contract basis using the first formula.

**** Column 13 will be electronic only. ****

SCHEDULE DL – PART 1

SECURITIES LENDING COLLATERAL ASSETS

Reinvested Collateral Assets Owned Current Statement Date

(Securities lending collateral assets reported in aggregate on Line 10 of the asset page and not included on Schedules A, B, BA, D, DB and E.)

This schedule should include a detailed listing of reinvested collateral assets that were owned as of the end of the current statement date. For Schedule DL reinvested collateral assets are collateral currently held as part of a securities lending program administered by the reporting entity or its agent (affiliated or unaffiliated) that can be resold or repledged. This is the **currently held collateral**, meaning original collateral if it is still in the original form received or the newly invested asset resulting from the disposal and/or reinvestment of the original collateral. See *SSAP No. 103R—Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, for accounting guidance.

Include reinvested collateral assets from securities lending programs where the program is administered by the reporting entity's unaffiliated agent (i.e., collateral is received by the reporting entity's unaffiliated agent that can be resold or repledged). These securities will be reported in aggregate on the Assets page, Line 10.

For reinvested collateral assets from securities lending programs where the program is administered by the reporting entity's affiliated agent (i.e., collateral is received by the reporting entity's affiliated agent that can be resold or repledged), the securities may be reported on Schedule DL, Part 1 if reported in aggregate on the Assets page, Line 10 or reported on Schedule DL, Part 2 if reported in other investment schedules (e.g., Schedules A, B, BA, D, DA and E), but not both.

Reinvested collateral assets reported on Schedule DL, Part 1 are excluded from other investment schedules (e.g., Schedules A, B, BA, D, DA and E).

Bonds, preferred stocks and common stocks are to be grouped separately, showing a subtotal for each category.

Securities borrowing and securities lending transactions shall be shown gross when reported in the Schedule DL. If these transactions are permitted to be reported net in accordance with *SSAP No. 64—Offsetting and Netting of Assets and Liabilities*, the investment schedule shall continue to provide detail of all transactions (gross), with the net amount from the valid right to offset reflected in the financial statements (pages 2 & 3 of the statutory financial statements). Disclosures for items reported net when a valid right to offset exists, including the gross amount, the amount offset, and the net amount reported in the financial statements are required per *SSAP No. 64—Offsetting and Netting of Assets and Liabilities*.

Bond Mutual Funds – as Identified by the SVO and Exchange Traded Funds – as Identified by the SVO, which are described in the Investment Schedules General Instructions, are to be included in SVO Identified Funds.

If an insurer has any detail line reported for any of the following required categories or subcategories, it shall report the subtotal amount of the corresponding category or subcategory, with the specified subtotal line number appearing in the same manner and location as the pre-printed total or grand total line and number:

NOTE: See the Investment Schedules General Instructions for the following:

- Category definitions for bonds and stocks.
- Code column list of codes and definitions for securities not under the exclusive control of the reporting entity.
- Flow chart for determining the NAIC designation for structured securities.

Column 1 – CUSIP Identification

CUSIP numbers for all purchased publicly issued securities are available from the broker's confirmation or the certificate. For private placement securities, the NAIC has created a special number called a PPN to be assigned by the Standard & Poor's CUSIP Bureau. For foreign securities, use a CINS that is assigned by the Standard & Poor's CUSIP Bureau: www.cusip.com/cusip/index.htm.

For Lines 0199999 through 7599999, if no valid CUSIP, CINS or PPN number exists, then report a valid ISIN (Column 9) security number. The CUSIP field should be zero-filled.

The CUSIP reported for this column should be determined in a manner consistent with the instructions of other schedules for the lines shown below:

Lines 0199999 through 6699999	Schedule D, Part 1, Column 1

Column 9 – ISIN Identification

The International Securities Identification Numbering (ISIN) system is an international standard set up by the International Organization for Standardization (ISO). It is used for numbering specific securities, such as stocks, bonds, options and futures. ISIN numbers are administered by a National Numbering Agency (NNA) in each of their respective countries, and they work just like serial numbers for those securities. Record the ISIN number only if no valid CUSIP, CINS or PPN exists to report in Column 1.

The ISIN reported for this column should be determined in a manner consistent with the instructions of other schedules for the lines shown below:

- Lines 0199999 through 6699999 Schedule D, Part 1, Column 1

General Interrogatories:

1. The total activity for the year to date represents the net increase (decrease) from the prior year-end to the current statement date.
2. The average balance for the year to date is the average daily balance.

Average daily balance: Total of daily balances divided by the number of days that have passed in the year as of the reporting date. If data is missing for a given date (e.g., weekend, holiday), count the previous day's value multiple times. The actual day count for the year to date would serve as the denominator in the average calculation.

SCHEDULE DL – PART 2

SECURITIES LENDING COLLATERAL ASSETS

Reinvested Collateral Assets Owned Current Statement Date
(Securities lending collateral assets included on Schedules A, B, BA, D, DB and E
and not reported in aggregate on Line 10 of the asset page.)

This schedule should include a detailed listing of reinvested collateral assets that were owned as of the end of the current statement date. For Schedule DL, reinvested collateral assets are collateral currently held as part of a securities lending program administered by the reporting entity or its agent (affiliated or unaffiliated) that can be resold or repledged. This is the **currently held collateral**, meaning original collateral if it is still in the original form received or the newly invested asset resulting from the disposal and/or reinvestment of the original collateral. See *SSAP No. 103R—Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, for accounting guidance.

Include reinvested collateral assets from securities lending programs where the program is administered by the reporting entity (i.e., collateral is received by the reporting entity's unaffiliated agent that can be resold or repledged).

For reinvested collateral assets from securities lending programs where the program is administered by the reporting entity's affiliated agent (i.e., collateral is received by the reporting entity's affiliated agent that can be resold or repledged), the securities may be reported on Schedule DL, Part 2 if reported in other investment schedules (e.g., Schedules A, B, BA, D, DA and E) or reported on Schedule DL, Part 1 if reported in aggregate on the Asset page, Line 10, but not both.

Reinvested collateral assets reported on Schedule DL, Part 2 are included in the other investment schedules (e.g., Schedules A, B, BA, D, DA and E).

Bonds, preferred stocks and common stocks are to be grouped separately, showing a subtotal for each category.

Securities borrowing and securities lending transactions shall be shown gross when reported in the Schedule DL. If these transactions are permitted to be reported net in accordance with *SSAP No. 64—Offsetting and Netting of Assets and Liabilities*, the investment schedule shall continue to provide detail on all transactions (gross), with the net amount from the valid right to offset reflected in the financial statements (pages 2 & 3 of the statutory financial statements). Disclosures for items reported net when a valid right to offset exists, including the gross amount, the amount offset, and the net amount reported in the financial statements are required per *SSAP No. 64—Offsetting and Netting of Assets and Liabilities*.

Bond Mutual Funds – as Identified by the SVO and Exchange Traded Funds – as Identified by the SVO that are described in the Investment Schedules General Instructions are to be included in SVO Identified Funds.

If an insurer has any detail lines reported for any of the following required categories or subcategories, it shall report the subtotal amount of the corresponding category or subcategory, with the specified subtotal line number appearing in the same manner and location as the reported total or grand total line and number:

NOTE: See the Investment Schedules General Instructions for the following:

- Category definitions for bonds and stocks.
- Code column list of codes and definitions for securities not under the exclusive control of the reporting entity.
- Flow chart for determining the NAIC designation for structured securities.

Column 1 – CUSIP Identification

CUSIP numbers for all purchased publicly issued securities are available from the broker's confirmation or the certificate. For private placement securities, the NAIC has created a special number called a PPN to be assigned by the Standard & Poor's CUSIP Bureau. For foreign securities, use a CINS that is assigned by the Standard & Poor's CUSIP Bureau: www.cusip.com/cusip/index.htm.

For Lines 0199999 through 7599999, if no valid CUSIP, CINS or PPN number exists, then report a valid ISIN (Column 9) security number. The CUSIP field should be zero-filled.

The CUSIP reported for this column should be same for the security as reported in other schedules for the lines shown below:

Lines 0199999 through 6699999	Schedule D, Part 1, Column 1
Lines 6899999 through 7099999	Schedule D, Part 2, Section 1, Column 1

Column 9 – ISIN Identification

The International Securities Identification Numbering (ISIN) system is an international standard set up by the International Organization for Standardization (ISO). It is used for numbering specific securities, such as stocks, bonds, options and futures. ISIN numbers are administered by a National Numbering Agency (NNA) in each of their respective countries, and they work just like serial numbers for those securities. Record the ISIN number only if no valid CUSIP, CINS or PPN exists to report in Column 1.

The ISIN reported for this column should be same for the security as reported in other schedules for the lines shown below:

Lines 0199999 through 6699999 Schedule D, Part 1, Column 1
 Lines 6899999 through 7099999 Schedule D, Part 2, Section 1, Column 1

General Interrogatories:

1. The total activity for the year to date represents the net increase (decrease) from the prior year-end to the current statement date.
2. The average balance for the year to date is the average daily balance.

Average daily balance: Total of daily balances divided by the number of days that have passed in the year as of the reporting date. If data is missing for a given date (e.g., weekend, holiday), count the previous day's value multiple times. The actual day count for the year to date would serve as the denominator in the average calculation.

SCHEDULE E – PART 1 – CASH

MONTH END DEPOSITORY BALANCES

This schedule shows all banks, trust companies, savings and loan and building and loan associations in which deposits were maintained by the reporting entity at any time during the quarter and the balances, if any (according to reporting entity's records), at each month end of the reporting quarter. Certificates of deposit in banks or other similar financial institutions with maturity dates of one year or less from the acquisition date and other instruments defined as cash in accordance with *SSAP No. 2R—Cash, Cash Equivalents, Drafts, and Short-Term Investments* should be reported in this schedule. All Cash Equivalents should be reported in Schedule E, Part 2. Long-term certificates of deposit are to be reported in Schedule D.

In each case where the depository is not incorporated and subject to government supervision, the word "PRIVATE" in capital letters and in parentheses, thus — (PRIVATE) — should be inserted to the left of the name of the depository.

Report separately all deposits in excess of \$250,000 or less than (\$250,000). Deposits in federally insured depositories not exceeding \$250,000 or not less than (\$250,000) may be combined. Deposits in foreign bank accounts may be combined to the extent that the amount on deposit does not exceed the lesser of \$250,000 or the amount of the foreign guarantee. The amount combined should be reported opposite the caption, "Deposits in (insert number) depositories that do not exceed allowable limits." However, any reporting entity that does not maintain total deposits in any one depository of more than \$250,000 is required to list its primary depository, and all entities must list all depositories where the total deposits or overdrafts (as represented by the absolute value) exceed 5% of the total cash as reported on Page 2 of the quarterly statement.

For Certificate of Deposit Account Registry Service (CDARS) or other similar services that have a maturity of one year or less, each individual banking institution providing a certificate of deposit should be reviewed separately to determine if the balance maintained by the reporting entity at that banking institution meets the criteria set forth above (e.g. does not exceed \$250,000 or is not less than (\$250,000) in federally insured depositories) for combining with other depository balances. If not, it should be listed individually on the schedule.

Cash in Reporting Entity's Office should be reported in this schedule.

Total Cash, on a gross basis, less any applicable nonadmitted amounts (e.g. nonadmitted cash resulting from state imposed limitations), should equal the first parenthetical amount reported as cash on Page 2, Line 5 of the quarterly statement.

If the reporting entity has any detail lines reported for any of the following required categories or subcategories it shall report the subtotal amount of the corresponding category or subcategory with the specified subtotal line number appearing in the same manner and location as the pre-printed total and grand total line and number:

MEDICARE PART D COVERAGE SUPPLEMENT
NET OF REINSURANCE

The federal Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (the MMA) created a new prescription drug coverage, referred to as "Part D" coverage, effective for the first time on January 1, 2006. This form is intended to capture information about the new coverage net of reinsurance.

The form applies to the following **stand-alone** Medicare Part D coverage:

Stand-alone Part D coverage written through individual contracts; and

Stand-alone Part D coverage written through group contracts and certificates;

Part D coverage written on employer groups where the reporting entity is responsible for reporting claims to the Centers for Medicare & Medicaid Services (CMS).

The form does not apply to:

Part D coverage that is provided through a Medicare Advantage plan (referred to as MA-PD); and

Employer coverage that is part of the employer's comprehensive medical coverage and where the reporting entity does **not** provide claim data directly to CMS, including instances where the employer and the medical provider are one and the same but the administration and reporting to CMS is handled by a third party.

The statutory accounting treatment of Medicare Part D coverage is addressed by Interpretation 05-05 in the *Accounting Practices and Procedures Manual* (INT 05-05). Although most of the coverage is treated as an insured plan, a portion is treated as uninsured. Refer to INT 05-05 for specifics of the accounting treatment, as well as for definitions of many of the capitalized terms used below.

Group "Uninsured" would be only the aspects of any Group coverage for which the entity has federal payments that are to be considered "Uninsured" per INT 05-05; e.g., payments for a subsidy (cost-sharing portion) and the group plan is an insured plan. Group coverage where the basic coverage is uninsured is not reported in this supplement.

Since a reporting entity may offer multiple prescription drug plans (PDPs) with varying benefits, it is possible for a portion of the entity's coverage to be subject to reinsurance coverage and another portion to be part of the Part D Payment Demonstration, where no reinsurance coverage is provided. While the Annual Statement Supplement will require reporting these portions on separate lines (to allow for appropriate RBC factors to be applied), there is no separation required for the Quarterly Statement.

Columns 2 – Uninsured Individual Coverage }

Report here the amounts for coverage written through individual contracts. Amounts treated as insured business pursuant to INT 05-05 should be reported in Column 1. Amounts treated as uninsured business pursuant to INT 05-05 should be reported in Column 2.

Columns 4 – Uninsured Group Coverage }

Report here the amounts for coverage written through group contracts and certificates, including coverage of employer groups as described above. Amounts treated as insured business pursuant to INT 05-05 should be reported in Column 3. Amounts treated as uninsured business pursuant to INT 05-05 should be reported in Column 4.

Column 5 – Total Cash

Report here the totals of Columns 1 through 4 for the indicated lines. This column is intended to measure the cash flow impact of the Part D coverage on the reporting entity (i.e., including both insured and uninsured business).

These amounts represent the premium as approved by CMS (including the effect of the “health status risk adjustments”) for the Part D coverages that qualify as Standard Coverage. Report all other premiums received for Part D coverage. These will be the additional premiums that the PDP requires participants to pay for Supplemental Benefits.
