Leaking Underground Storage Tank (LUST)
Trust Fund
VA Convenience Store, Indianapolis, IN**

ARRA Assistance Provided

UST Removal and Remediation.
Approved Budget: \$74,805

Background

A gasoline service station operated on the Site from around 1930 to 1964. Reportedly three gasoline underground storage tanks (USTs) were located on the Site.

Current Status

The goal for the expenditure of ARRA funds is to complete remediation on the subject property and achieve a No Further Action designation to facilitate site redevelopment. On August 22, 2011, a geophysical survey was completed to determine the location of the USTs suspected to be on-Site. The survey was inconclusive; therefore, exploratory trenching, which discovered the location of the USTs, was completed on August 30, 2011. Two USTs and associated contaminated soil were removed from the Site. One UST was discovered under a sidewalk and may be left in-place in order not to jeopardize the structural stability of the on-Site building. The Program has requested a release for any damage to the building in order to remove the third tank and complete corrective action.
