The purpose of this report is to document a physical inspection of a project funded in whole or in part by ARRA funds.

The OIG's enabling statute provides that the OIG is responsible for addressing fraud, waste, abuse and wrongdoing in agencies. IC 4-2-7-2(b). The OIG is also to review and recommend policies and carry out other activities

designed to deter, detect, and eradicate fraud, waste, abuse, mismanagement, and misconduct in state government. IC 4-2-7-3(2).

Based upon these authorities, random ARRA projects were selected from the Invest Indiana website map (<http://www.in.gov/gov/countyarra.htm>). This website specifies ARRA projects by county.

A physical inspection was then made of the selected project. The inspection was limited to a visual review of the work that had occurred.

In this case, Contract SRS-32601-A was inspected. This was an asphalt resurfacing of Carroll Road from 46th Street to 56th Street, Marion County, IN. The contract on this project was let on January 27, 2010. The location of this project began at Carroll Road from 46th Street to 56th Street, Marion County, IN. This project is still in progress.

In addition to a visual inspection, a photograph was taken of the area and is included in Exhibit A, attached hereto.

As the inspection revealed that the location and type of work to be performed was being completed, this case will be closed.
