

# Answers to Questions Re: RFP Impact Grant Evaluator

Q: To what extent should the measurement tools and goals be the same across agencies?

A: IHEDA expects there to be similarity in measurement tool for any projects that have similar characteristics, in order to facilitate conversations/learning between Impact Grant awardees. However, IHEDA ultimately expects measurement tools to be personalized to the projects and teams they serve.

Q: How broad or focused will the engagement with agency and agency staff be? Who at the agency will be involved?

A: It is expected that the Evaluator will work with both agency leadership and project staff at the very beginning, to help develop an understanding of the project and project goals. The majority of the work however is expected to take place with specific project staff.
