Re: ASHRAE 62.2 Compliance Procedures using the Red Calculator

Beginning July 1, 2026, all Indiana WAP audits performed on or after July 1 must use the Red Calculator in LITT/WAPLink to document ASHRAE 62.2 compliance. This requirement aligns with WPN ventilation guidance and SWS standards and supports consistent documentation across Subgrantees. SWS requires ventilation systems to meet ASHRAE 62.2 requirements including calculated and measured airflow, document final compliance and use consistent, accurate Grantee-approved tools.

This replaces prior versions, spreadsheets, and external tools as the only approved tool for Indiana WAP. Audits conducted before July 1 may retain the calculator used at the time of audit.

Please see WAP-2026-07 for more detail.

Any questions regarding the Red Calculator may be directed to IWx@ihcda.in.gov.
