Closest Airport:	Midway International

2 Days Tuition \$575.00

Monadnock Expandable Baton (MEB) Instructor Course

Using a comprehensive learning and dynamic hands-on curriculum, first responders will learn how to utilize a straight baton, which is one of the most useful less lethal technologies on the duty belt, in direct and/or transitional ways for overcoming subject resistance through strikes, jabs or blocks and establish practical anatomical control over a subject for the purposes of escort and/or handcuffing.

This 2-day, highly dynamic course is like no other because it provides you with the useful defensive skills in all 3 zones of defense, especially for CQB. It relies heavily on practical hands-on applications and is intended for first responders who want instruction in the proper uses of straight baton (expandable or rigid) batons used for self-defense and subject control for escort and handcuffing.

Benefits from attending the class:

- Learn the basic components of stance, balance and practical patterns of movement (or Survival Dancing for Victory)
- Learn what Zone of Defense is and how to establish a tactical position of advantage over a subject.

This Course provides Instructor Development for In-Service Training, Including Reviews of Policy Development and Civil/Criminal Liabilities
